---

Ben, following up from meeting last month, attached are tables showing the House members elected in the regular 2014 election cycle (November 2014) and black percentage of each district based on voter registration data—one table is for Democrats, the other Republicans. (Recall we had a “computer virus” a few months ago, thus delay in getting electronic version to you for your records). Does not include all the special elections of the last year (the 11 House resignations since the Nov 2014 regular election—hard to keep track of!)
