Subject: Re: Redistricting Issues

Delegates Cardin, Morhaim and Stein,

The Villages at Woodholme is a gated community of 286 homes in Pikesville. We believe that our community has been divided unfairly by districting which was created prior to the development of our homes. The existing districting has put 58 of our homes in different Precincts and Congressional Districts than the other 228 homes. This division of our community creates difficulties for us in that we have different polling locations, different county trash collection and emergency services, and different representation.

We feel that it would be in the best interest of all of the residents of the Villages at Woodholme if we were redistricted so that all of us were served by the same representatives and the same services.

What we are requesting is that the 58 homes in the Villages at Woodholme on Bridalwreath Way, Mountainholly Drive, Mt. Wilson Lane and Winterhazel Road that are presently in the 8th

Precinct of the 2nd Congressional District be redistricted to the 25th Precinct of the 3rd Congressional District.

The attached map illustrates our community. The Red Line on the map shows the divide between the 58 homes (8th Precinct of the 2nd Congressional District) and the rest of the community (25th Precinct of the 3rd Congressional District). The Blue Dots on the map represents the gates. The gate at the upper right (Mt. Wilson Road entrance from Reisterstown Road) is manned from 7:00 p.m. to 7:00 a.m., and is open during the day. The gate at the lower left (at the Winands Road entrance) is key card controlled at all times.

Again, thanks for your support in this most important matter.

Jerry

Subject: **Refutation**

Hey All,

Secretary McDonough and I looked over the map and Press release. Thoughts:

First off, it should be noted that this plan significantly lowers the 6th, 8th and 3rd's DPI to help the 4th and 5th.

The 6th is now at 51.8% (was at 52.7%)
The 8th is now at 59.8% (was at 60.4%)
The 3rd is now at 55.0% (was at 58.4%)

It should be noted that in the last wave, 10 incumbent Democrats lost seats that were at 54.9% or higher, placing the 3rd in danger and making the 6th much harder to pick up.

Refutations:

Edwards 1: Allows for the possibility of minority representation in one of the congressional districts in Montgomery County

Counter: We argue that the electoral history in Montgomery County clearly suggests that both districts in the Governor's plan (6&8) can be won by a minority candidate.

Edwards 2: Unifies the Latino/Hispanic populations on the Montgomery-Prince George's County border in one congressional district;

Counter: (It should be noted that her argument is no longer percentages, it is now Communities). To combine these communities (Langley park), she also takes silver spring which contain precincts with little Hispanic population relative to other nearby precincts (see image 1 attached). This isn't about reuniting neighborhoods or strengthening communities, it's about preferred territory for a Congresswoman.

Edwards 3: Enables a significant Asian population in North Potomac to remain as a cohesive unit in Congressional District 8;

Counter: The Asian territory in North Potomac causes the bulk of the 1% DPI drop in the 8th and it dilutes the percentage of the Asian population in the 6th (from 10% to 9.2%). There are again, precincts she did not take (see image 2).

Edwards 4 & 5: Enables African American communities in Montgomery to remain in Congressional District 4 under the Voting Rights Act; 5) Strengthens the Black voting age population in Congressional Districts 4 and 5 and provides more cohesiveness in Prince George's County;

Counter: She actually bypasses heavier African-American precincts in Montgomery County to choose Silver Spring precincts she wanted even though they are less African-American (see Image 3). She even bypassed precincts she previously represented. Why do that if this is all about minority representation?

Other general issues:

- Montgomery County gets 4 CDs
- Howard County gets 4 CDs
- Edwards is not even standing by this map. At the hearing she freely suggested changing it again to eject the 3rd from Montgomery County which will disrupt the Baltimore area.

Overall Message:

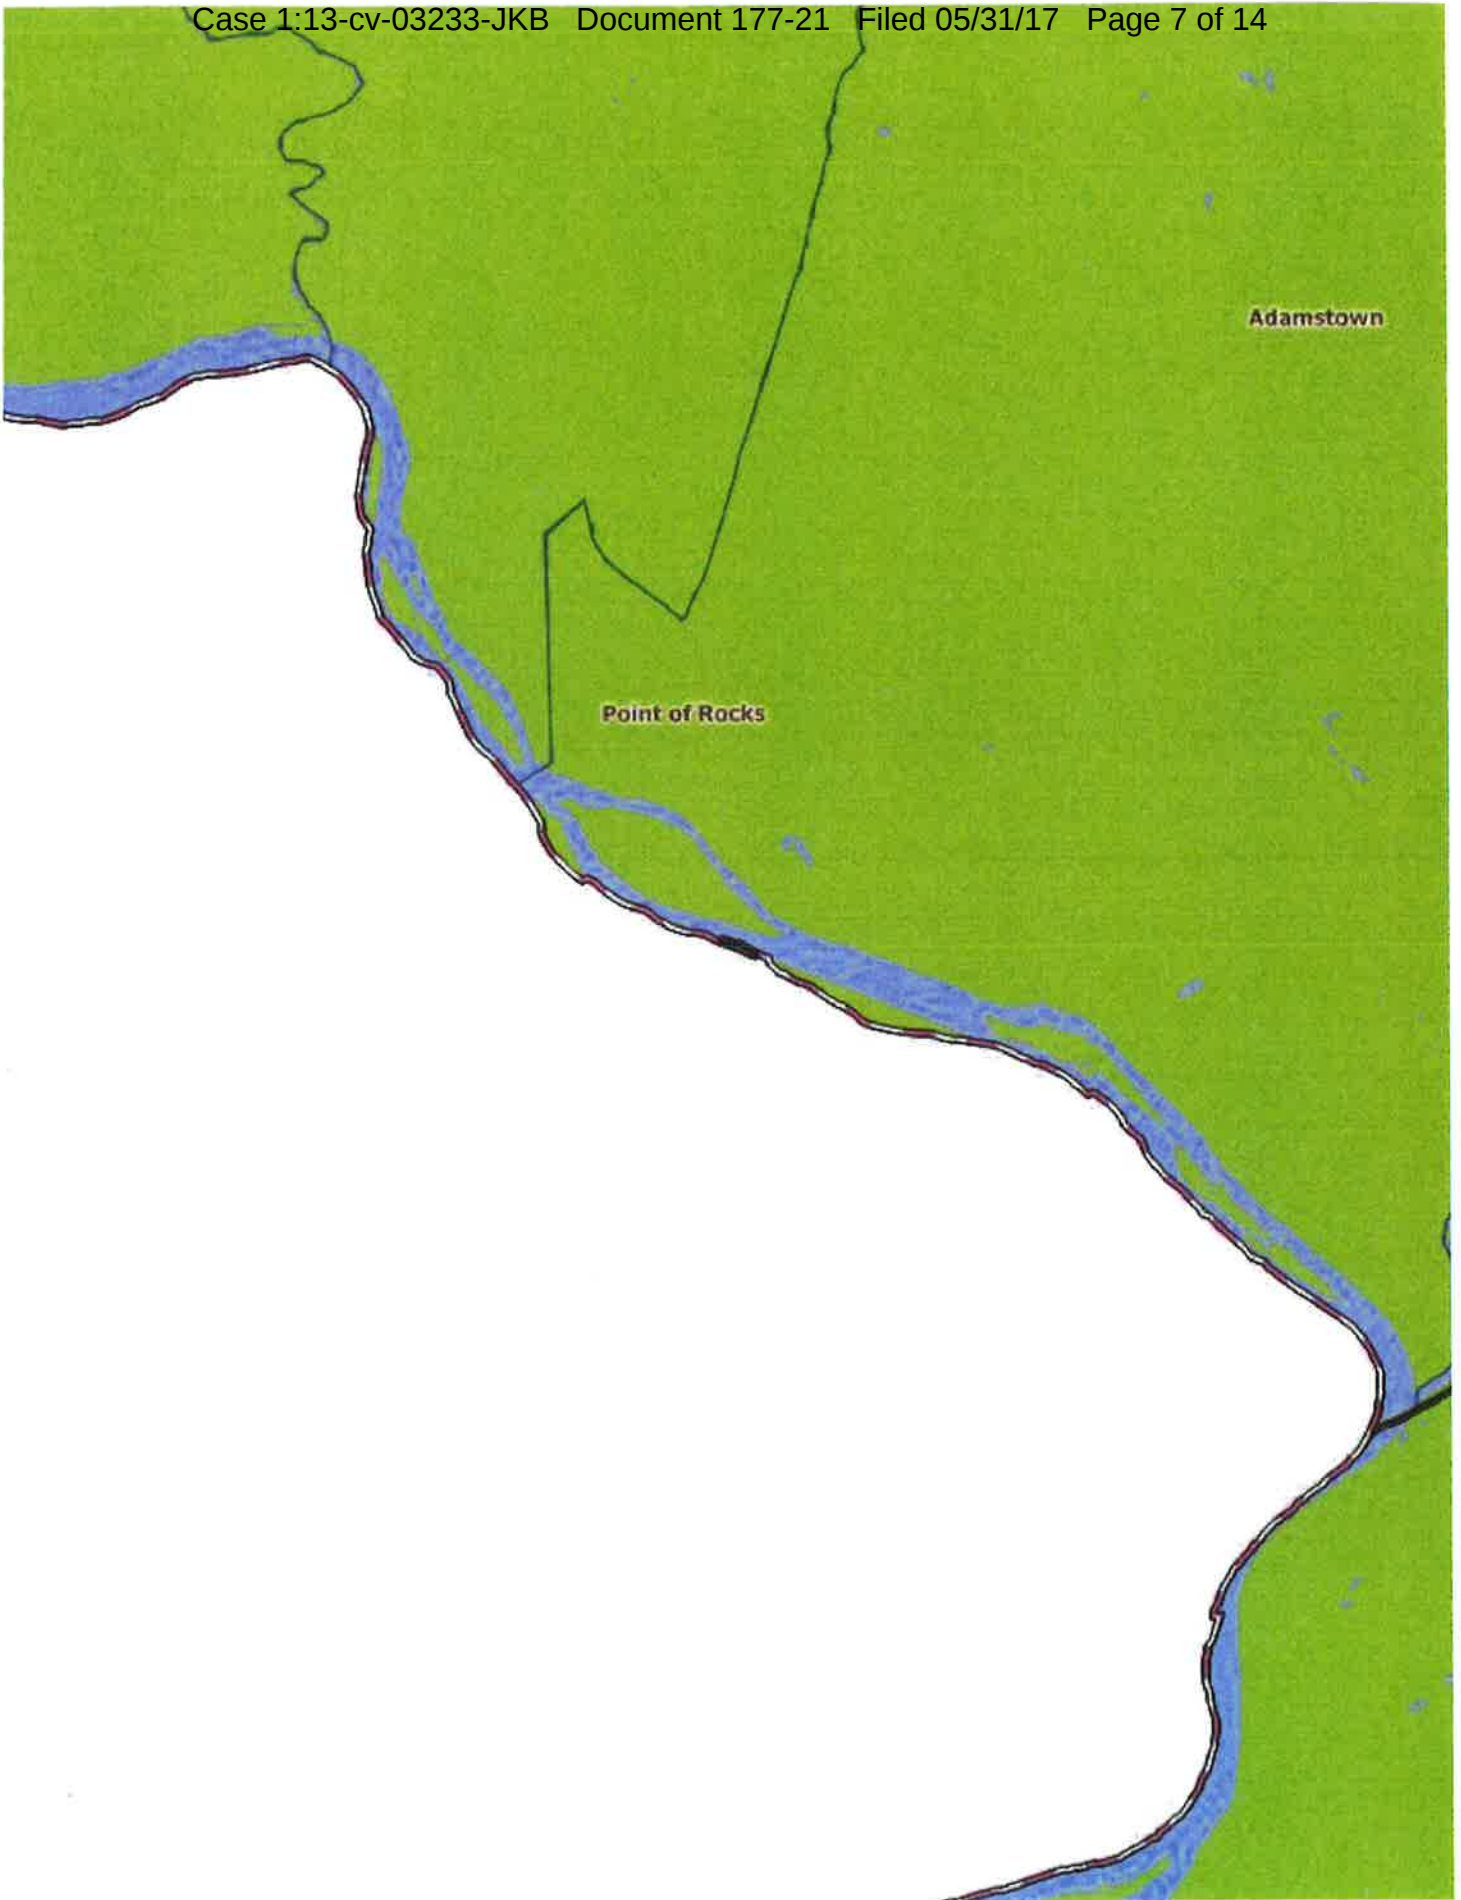

A vote for this amendment would put 4 in MoCo, 4 in Howard, just increases her margin in the General Election, slightly increases AA in 5th which is increasing due to demographic growth. Causes CD8 disruption, endangers effort to win the 6th and puts the 3rd in jeopardy. Dilutes the power of Asians and Hispanics in other parts of MoCo. Pure political selfishness and actually undermines the possibility of minority candidates winning the 6th or 8th CDs in the future.

Thanks!
Jake

He needs to see Steny's map before we figure out what direction we want to go in. But I don't think he wants to have to whip votes for the congressional map when our map is around the corner.

Hey J -- will anyone let us (ok, me) know what the Gov's commission congressional map will look like before it hits the street? I understand we may not have a whole caucus discussion of such things, but I'd like to have some sort of a heads up...?
Hope you're doing great.

Hey Man,

Could I request a map of the newly configured 5th congressional district? I would like to be able to see precincts but don't need to see street level or anything. If it's emailable that would be great. Thank you sir.

Sincerely,

Justin Ross
