Lamar is working on a borrowed blackberry and his email to us didn't go through yesterday afternoon.

Lamar would like Bexar pct 4008, (465 people); it's in CD 35 in Plan C136. It's the SA Country Club adjacent to SJS's house. Giving it to lamar should help improve ssvr a fraction in CD 35. You will also have to give pct 4101 to CD 21 as well because it would be orphaned (357 people).

Heads up.

Charlie Geren is going to offer an amendment to Plan C144 to put downtown Fort Worth back in the Fort Worth Congressional District rather than the Denton County Congressional district. Easy fix, you just have to keep the transit East of IH 35W and go under I 30.

Subject: C147-Madden Amendment

FYI--
Congressman Sessions and Congressman Marchant will be opposing Rep. Madden's amendment C147 and will be contacting Rep. Branch and Chairman Solomons as well.

Have we been able to find out why Madden's offering it? The explanation of keeping counties/cities/precincts whole doesn't mesh with what the amendment does.

EO
Guys--

Just heard from Cong. Session's staff that he spoke with Rep. Madden and is now fine with C147. Cong. Johnson is as well. Cong. Marchant remains opposed.

EO
Is there an amendment to the amendment that we can do to get Marchant on board?

You'll have to talk to him about that; his word to me was don't touch my district. So if you have an amendment which only affects Collin County, then yes, you probably will get him on board.

any truth to this part?

"If DOJ objects, the Texas federal court grants legislative deference to the map passed by the Legislature and is required to remedy ALL of DOJ's objections in its map. If preclearance is only pursued at DOJ there will be, most likely, a longer list of objections. If Texas foregoes DOJ preclearance and litigation is not completed in the DCDC, the Texas three-judge panel cannot use the legislatively-enacted map and would be required to begin from the 2003 map as if this were a deadlock case."

Subject: Re: 9 Jun 11

I would like add a correction that I received on the message that I sent earlier:
"If DOJ objects, the Texas federal court grants legislative deference to the map passed by the Legislature and is required to remedy ALL of DOJ's objections in its map. If preclearance is only pursued at DOJ there will be, most likely, a longer list of objections. If Texas foregoes DOJ preclearance and litigation is not completed in the DCDC, the Texas three-judge panel cannot use the legislatively-enacted map and would be required to begin from the 2003 map as if this were a deadlock case."

And another:
"DOJ's punch list will grow exponentially if they know we have to make changes. Little things that they wouldn't have nit picked in a clean map will show up on the list because of the obvious retrogression and lack of new Hispanic seat."

That having been said, is there any reason why every effort should not be made to make the map more likely to pre-clear, especially if it doesn't hurt the political aims in any way?

On Thu, Jun 9, 2011 at 1:15 PM, Dub Maines <dubmaines@gmail.com> wrote:
I would really appreciate you looking at this modified Solomons/Seliger map. It is 26R and 10D, as is the one the House Committee just passed. However, the Committee-passed map badly retrogresses CD20 without creating a new VRA district. CD35 is in no way a VRA district; it is a district that re-elects Congressman Doggett - whether he receives the support of Hispanic voters or not.

In the map I've sent you, CD25 is a heavily-Republican, Hill Country, West Texas district. CD20, contains the southeast quadrant of Travis County, has incumbent Congressman Charlie Gonzales in it, is heavily Bexar
County, and is a legal, performing VRA district. CD35 is an open seat and is a district from southern and central Bexar County to Webb County. It is a legal, performing VRA district. The Committee map, as passed, has next to no chance of pre-clearance - either by Justice or the DC circuit court. The map I've sent you has a very high probability of pre-clearing - at least in the DC court. This is the analysis of those who have practiced in the Voting Rights area - very successfully - for over 25 years. I would encourage you to speak with them about the Committee-passed map. They may be from evil DC, but they ARE the premier experts in this area, and I believe it would be prudent to entertain their thoughts on this map!

There seems to be quite a bit of confusion about Section 5 pre-clearance. Section 5 is not like Section 2, in that Section 2 deals with existing maps and makes minimal changes to those existing maps, if the courts feel changes are needed. Section 5 pre-clearance decides if a map ever really "exists." If a map is not pre-cleared, then it is as if nothing had ever been drawn. The courts will draw the map de novo as they did in 2001. Doggett will be re-elected. Canseco will not be. Farenthold will not be. They will likely split the baby on the 4 new seats. The Ds pick up a net of 4 seats. The Rs pick up a net of zero seats. This idea of challenging the Constitutionality of Section 5 is high-risk poker with no discernible positive return.

Again, I would appreciate you importing and looking at this map. Please call on me if you have any questions, comments, or suggestions.

Thank you,
Dub Maines

Gentlemen-

This is the best I could do. Only 17,360 in Maverick for CD 23. 52.4% McCain. All other districts at benchmark. Probably could get rid of all of Maverick if did Ector, but right now only districts changed are 16, 23, 28, 20, 35, 15. 20 doesn’t leave Bexar county, and 35 doesn’t leave Bexar in the south either. Quico has not yet seen/signed off on this, but could you please run the election performance on this one (in lieu of the non-Ector one I sent Friday).

Let’s discuss this morning.

Why do this to me? I get the stats to benchmark in 20 and look at the report tonight and y'all dropped them to 55! Please, please say this whole exercise was not for naught. Call me crazy but I could care less about 35 being at 45--the thing will probably perform at 40, why not take that difference and attempt to meet it if we can? I calmed Lee, Holman, et. al. down today to have this done?

Sent: Tuesday, June 14, 2011 8:32 AM
To: Gerardo Interiano
Subject: Re: why

No, just I think it's not good to not have all the stats at benchmark when we know its possible. Yes, I know CD 20's 10 of 10 performance and agree taking it below benchmark on SSVR can be justified by the creation of the new district. However, we know we can create the new district AND keep it at benchmark, so we should. Sure it performs the same, and will it make a difference in the end with the court, probably not; it just gives an easy paragraph where they can say we retrogressed, and we have to explain why it doesn't matter. That said, today's amendment is enormously better than C149, so let's just play ball. I do feel I was mislead into thinking y'all were going to keep all the districts at benchmark yesterday, and frankly, I used that argument to calm Lee and Chris Homan down when they were threatening to blow it all up. What is done is done.

Let's get this bill passed!

Scott,

I ran the numbers based on the actual election returns, comparing the Pena amendment configuration, vs. the C182 Engrossed configuration, and found the following:

The Pena change resulted in 186 less Republican votes for McCain (08) in CD 23.
The Pena change resulted in 105 more Republican votes for Wainwright (08) in CD 23.
The Pena change resulted in 58 less Republican votes for Perry (10) in CD 23.
The Pena change resulted in 40 less Republican votes for Staples (10) in CD 23.
The Pena change resulted in 130 less generic Republican congressional votes in 10 (a not-as reliable amalgamation of Republican congressional returns across 11, 16, 21, 23, and 28) in CD 23.

You would have to achieve around a 20% increase in turnout above the baseline turnout in order to overcome the decrease in performance, and that's to break even. Lamar is hesitant to make the change if it could actually result in either no improvement or a decline in performance for Quico.

EO
County R primary totals:

Hidalgo (approx) 3,308
Brooks 0
Jim Hogg 15
Duval 0
Live Oak 887
Karnes 547
Wilson (approx) 1,157
Guadalupe (approx) 10,036
