HWOL The Help Wanted Online Data Series™ fills a critical gap in the current U.S. economic indicators by providing timely monthly measures of labor demand (advertised vacancies) at the national, regional, State and metropolitan area levels. These monthly measures are comparable in timing and geographic detail to the Bureau of Labor Statistics (BLS) monthly measures of labor supply (unemployment).

The Catalogue of Workforce Information Sources, formerly the Environmental Scan, has been finalized by the Employment and Training Administration. You can find it here.
