part 1

REPORT ON FINAL MAPS

2020 CALIFORNIA CITIZENS REDISTRICTING COMMISSION

December 26, 2021

EXECUTIVE SUMMARY

In accordance with the provisions of Article XXI of the California Constitution, the California Citizens Redistricting Commission (the “Commission”) has created statewide district maps for the State Assembly, State Senate, State Board of Equalization, and United States Congress. The Commission has prepared this report to fulfill its duty to explain how it achieved compliance with the criteria established in the California Constitution. (See Cal. Const., art. XXI, § 2, subd. (h).)

The Constitution requires that the Commission “(1) conduct an open and transparent process enabling full public consideration of and comment on the drawing of district lines; (2) draw district lines according to the redistricting criteria specified in this article; and (3) conduct themselves with integrity and fairness.” (*Id.*, art. XXI, § 2, subd. (b).) The Commission has met all of these requirements.

As an initial matter, and as explained in **Part II**, the Commission was selected through a fair, impartial, and transparent process. Following an exhaustive review of more than 20,000 applicants—including public interviews and a review by the leaders of both parties in the California Legislature—the first eight members of the Commission were selected at random from qualified sub-pools of Democrats, Republicans, and others not affiliated with either party. Those eight Commissioners then reviewed the candidates remaining in the sub-pools and filled the remaining seats to ensure that the Commission broadly reflected the diversity of California. In the end, five Democrats, five Republicans, and four unaffiliated Californians with a variety of personal and professional backgrounds, and hailing from different parts of the state, came together to serve all of California in this important effort.

Once it was formed, the Commission drew district maps in an open and transparent process that did more than merely allow public input—the Commission affirmatively sought out and encouraged broad public participation in the redistricting process through a massive education and outreach program. This public education and engagement mission, detailed in **Part III**, had three specific goals: (1) activate and involve a historic number of Californians in the redistricting process; (2) ensure the redistricting process equitably reflected the voices of California’s diverse population; and (3) make participation in the redistricting process accessible to all Californians.

To achieve these goals, the Commission implemented three phases of education and outreach, which are described in **Part IV** of the Report. In Phase I, the Commission focused on raising public awareness of California’s redistricting process and engaging entities with significant local and regional networks that could reach thousands of Californians as part of these education efforts. In Phase II, the Commission encouraged individuals and groups to provide input to the Commission on their “communities of interest,” or populations sharing common social or economic interests. The focus during Phase III, when the Commission

began the line-drawing process, was on receiving the public's proposed district plans and receiving input on the Commission's visualizations and draft maps.

Throughout these three phases, the Commission ensured accessibility and maximum public participation by providing language access and structuring its meetings to maximize involvement of all Californians in the redistricting process, regardless of English-language proficiency or audio or visual impairments. To these ends, the Commission translated any non-English public input and comment submitted to the Commission, provided interpretation services when requested, set meeting times to ensure they would be convenient for the participation of average Californians and, during particularly high-volume periods of public input, offered appointments to eliminate long wait times to provide comment. The Commission also promoted multilingual educational content regarding redistricting to Californians in all geographic areas, across all demographic categories, from students to the elderly, and in all socio-economic groups, including Californians who have traditionally been underrepresented or less involved in public affairs. In total, the Commission received over 36,280 comments and suggestions from the public.

The Commission's outreach and education efforts were successful largely because it developed and utilized new electronic tools that were particularly effective during the COVID-19 pandemic. These included new tools for public input on communities of interest, free-to-use mapping tools to help Californians develop and share their own maps with the Commission, a map viewing tool that allowed the public to compare various iterations of the Commission's district plans to existing district boundaries, and an online portal that provided timely public access to the public input received by the Commission.

Finally, as detailed in **Part V**, the Commission's final maps fully satisfy all legal requirements. Article XXI of the California Constitution establishes the legal framework for drawing new political districts in California every ten years. This framework establishes and prioritizes several map-drawing criteria, starting with compliance with the United States Constitution and the federal Voting Rights Act of 1965 (the "Voting Rights Act" or "VRA"), and then adherence to a set of traditional redistricting criteria.

The resulting maps comply with all California and United States constitutional requirements, including those relating to population equality and to the Equal Protection Clause of the Fourteenth Amendment. The maps also satisfy all requirements under Section 2 of the Voting Rights Act. To meet its obligations, the Commission hired Voting Rights Act counsel and a racially polarized voting expert to analyze voting patterns and historical conditions in districts throughout the state so as to identify all areas in California with VRA obligations. The Commission used this information to create maps that fully comply with the VRA. As explained below, the Commission carefully adhered to all other redistricting criteria throughout the line-drawing process, including drawing districts that are contiguous and that respect the geographic integrity of counties, cities,

neighborhoods, and communities of interest. To the extent practicable and without violating higher-ranked criteria, the Commission drew districts that are compact and nest Assembly districts into Senate districts and Senate districts into Board of Equalization districts. Through this process, the Commission created final district maps that achieve effective and fair representation for all Californians—precisely what the voters intended when they enacted Propositions 11 and 20. (See, e.g., Prop. 20 (2010), § 2, subd. (d), “Findings and Purpose.”)

I. INTRODUCTION

The Citizens Redistricting Commission for the State of California (the “Commission”) has created statewide district maps for the State Assembly, State Senate, State Board of Equalization, and United States Congress in accordance with the provisions of Article XXI of the California Constitution. The Commission has approved the final maps and certified them to the Secretary of State.

The 2020 redistricting cycle has taken place in the midst of a global pandemic that saw the Census results significantly delayed. This delay brought with it prolonged mapping uncertainties and required the Commission to seek an extension and clarification of its deadlines, but did not prevent the Commission from carrying out its core responsibilities. The global pandemic also required the Commission to meet—both as a body and with the public at large—largely by video conference, which brought with it both advantages and disadvantages. While in-person meetings always have benefits, video conference and telephonic public comments arguably made the Commission’s meetings more accessible to a wider audience, fulfilling the Commission’s duty to “conduct an open and transparent process enabling full public consideration of and comment on the drawing of district lines” at each level. (Cal. Const., art. XXI, § 2, subd. (b).)

The Commission did its work under a changed legal landscape. At the Legislature’s request to be consistent with new state laws, the Commission reallocated individuals in state prisons to their last known addresses.¹ Also, in prior redistricting cycles, the federal Voting Rights Act required California to seek federal preclearance for redistricting plans affecting several counties, but in 2013, the United States Supreme Court issued a landmark decision rendering a key part of the law unconstitutional. (*Shelby County v. Holder* (2013) 570 U.S. 529, 557.) This meant that federal preclearance—which had previously applied to Kings, Merced, Monterey, and Yuba counties—was no longer required.

Technological advances enabled the Commission to hear from the public and publicly track input to a greater degree. The Commission received the benefit of thousands of submissions on newly designed online tools that allowed the public to map and describe communities of interest and even propose their own district plans directly to the Commission.

Given the delay in the release of the 2020 Census results, the Commission had a considerably longer education and outreach phase as compared to its predecessor. It used this period to develop and carry out an extensive effort to educate Californians about the importance of redistricting, the criteria to be

¹ As noted in Part IV.A.3, the Commission also sought—but was ultimately unable to obtain—the last known address information for those in federal custody and thus was unable to undertake a reallocation of those populations.

implemented by the Commission under the state's Constitution, and ways that the public could provide input at each stage of the process. These efforts were in line with the requirement that the Commission undertake an "outreach program to solicit broad public participation in the redistricting public review process." (Gov. Code, § 8253, subd. (a)(7).) The result of the Commission's concerted efforts to involve all Californians in the redistricting process was an outpouring of public engagement.

Altogether, the Commission held 196 public meetings, including public meetings to solicit information on communities of interest, public meetings to receive feedback on visualizations, and live line-drawing sessions. The Commission received more than 3,870 verbal comments, input, and suggestions during Commission meetings. The Commission also received over 32,410 written comments, input, and suggestions from individuals and groups. These commenters shared information about their communities of interest, suggested parameters for district boundaries, proposed alternative maps, and made recommendations to the Commission on the overall redistricting process.

The result of this effort is a set of statewide district maps for the State Assembly, Senate, Board of Equalization, and United States Congress that reflects the input of the people of California and the best judgment of the Commission—a group of 14 citizens, chosen from an initial applicant pool of more than 20,000—based on the criteria established in the California Constitution. The people of California demanded a fair and open process when they adopted Propositions 11 and 20, which amended the California Constitution and created the Commission. The process was open, transparent, and free of partisanship. There were long and difficult debates over where to draw the lines, and frequent disagreements among competing communities and interested persons. No person or group was excluded from full participation in the process. In the end, the full Commission unanimously voted to approve the four final district maps.

It was an honor for the Commission to serve the people of California, and, while aware that not every Californian will be fully satisfied with the outcome of the process, the Commission urges everyone to accept and support the resulting maps that were created in collaboration with the public. This document serves as the report that the Commission is required to submit that explains the bases on which the Commission made its decisions in achieving compliance with the criteria established in the state Constitution, including definitions of the terms and standards used in drawing each final map. (See Cal. Const., art. XXI, § 2, subd. (h).)

II. SELECTING A FAIR AND IMPARTIAL COMMISSION

Before the 2010 cycle, redistricting was conducted by the Legislature, when the Legislature and the Governor could agree, or by the courts, when they could not. In November 2008, voters approved Proposition 11 and enacted the Voters First Act to shift the responsibility for drawing Assembly, Senate, and Board of Equalization

districts to an independent Commission made up of citizens. In November 2010, the voters approved Proposition 20 and amended the Act to include Congressional redistricting within the Commission's mandate. The stated purpose of the Voters First Act includes the following:

The independent Citizens Redistricting Commission will draw districts based on strict, nonpartisan rules designed to ensure fair representation.

The Voters First Act also charged the Commissioners with applying the law in a manner that is "impartial and reinforces public confidence in the integrity of the redistricting process." (Cal. Const., art. XXI, § 2, subd. (c)(6).) Consequently, the Act provides that each Commissioner is prohibited from holding elective public office at the federal, state, county, or city level for a period of ten years from the date of their appointment, and from holding appointive public office for a period of five years from the date of their appointment. (*Ibid.*) In addition, Commissioners are ineligible for five years from holding any paid position with the Legislature or with any individual legislator, and cannot be a registered federal, state, or local lobbyist during this period. (*Ibid.*) There are similar criteria related to applicants' activities before the formation of the Commission.

The selection process for Commissioners was designed to be fair and impartial, and to lead to a group of Commissioners who would meet very high standards of independence and reflect the diverse population of our state. The Act established new sections of the Government Code to create a process that required the State Auditor, a constitutional officer independent of the executive branch and legislative control, to select the Commissioners through an application process open to all registered voters in a manner that promoted a diverse and qualified applicant pool. (Gov. Code, § 8252.) To ensure that the Commission was selected from a broad pool of Californians, the State Auditor undertook a significant outreach process throughout the state utilizing a wide variety of communications media, including mainstream and ethnic media, social media, a website, and staff assigned to respond to all telephone calls and emails.

The implementing laws required the State Auditor to establish an independent Applicant Review Panel ("ARP") consisting of three qualified senior auditors licensed by the California Board of Accountancy, to screen the applicants for the Commission. (Gov. Code, § 8252, subd. (b).) The ARP was randomly selected in a manner identical to the first eight Commissioners, including one member for the largest party in the state, one member from the second largest party in the state, and one member not affiliated with either party. (*Ibid.*) Once the ARP was established, it held all of its meetings and interviews in public, and every event was live-streamed and archived for public review. It was trained in a public meeting on all aspects of the Commission's job to better enable the ARP to review the necessary qualifications of the applicants.

The ARP engaged in a review of all applicants who had preliminarily qualified after being screened against a detailed set of conflict-of-interest rules. (Gov. Code, § 8252, subds. (a)(2) & (d).) The selection process was public. The ARP was charged with first narrowing the initial pool to 120 applicants (40 from each of the three political subgroups) to interview. Following those interviews, the ARP selected 60 qualified applicants (20 from each of the three political subgroups) based on their “analytical skills, ability to be impartial, and appreciation for California’s diverse demographics and geography” to be presented to the leaders of both parties in both houses of the Legislature. (*Id.*, § 8252, subd. (d).)

The leaders of the two major parties in the Assembly and the Senate were each allowed to eliminate two persons from each pool of applicants, based on their judgment and discretion. (Gov. Code, § 8252, subd. (e).) This procedure allowed for further scrutiny of the applicant pool by both Republican and Democratic party leaders to help ensure that real or perceived partisan leanings were further minimized. This process eliminated eight individuals from each of the three pools of 20 applicants, leaving 12 Republicans, 12 Democrats, and 12 not affiliated with either major party. (*Ibid.*) Following those strikes, one Democrat withdrew from consideration, leaving 11 applicants in that sub-pool.

From the remaining pool, the State Auditor randomly selected three Democrats, three Republicans, and two not affiliated with either party, to become the first eight Commissioners. (Gov. Code, § 8252, subd. (f).) Upon their selection on July 2, 2020, the terms of all 14 of the 2010 Commissioners concluded.

This extraordinary effort to implement a fair selection process then continued, with the first eight Commissioners charged with selecting the remaining six Commissioners (two Democrats, two Republicans, and two not affiliated with either party) from the applicants remaining in the three sub-pools. Specifically, the eight Commissioners were charged with applying the following additional criteria:

The six appointees shall be chosen to ensure the commission reflects this state’s diversity, including but not limited to racial, ethnic, geographic, and gender diversity. However, it is not intended that formulas or specific ratios be applied for this purpose. Applicants shall also be chosen based on relevant analytical skills and ability to be impartial. (Gov. Code, § 8252, subd. (g).)

The eight Commissioners deliberated on each applicant and applied all necessary criteria during the course of their discussions. In all, more than two dozen potential slates were proposed and debated, with extensive public input throughout the discussions. In the end, on August 7, 2020, the eight Commissioners agreed on a proposed slate of six Commissioners by the required supermajority vote of at least two Democrats, two Republicans, and one affiliated with neither major party.

As a result of this process, and as required by the Constitution, the full Commission consisted of five individuals who were registered as Democrats, five who were registered as Republicans, and four unaffiliated voters. The Commission also highlights the diversity of our state in several ways. There are eight women and six men of various ages, with different lived, educational, and employment experiences, who come from different geographic regions, have worked and lived in multiple locations around the state, and reflect the ethnic diversity of California.

The Commissioners' backgrounds and biographic information are available on the Commission's website (www.wedrawthelinesca.org).

III. THE COMMISSION UNDERTOOK AN EXTENSIVE PUBLIC EDUCATION EFFORT

The Voters First Act amended Article XXI, section 2(b) of the California Constitution to require that the Commission “conduct an open and transparent process enabling full public consideration of and comment on the drawing of district lines.” In addition, the Commission was required to “establish and implement an open hearing process for public input and deliberation” and to conduct an “outreach program to solicit broad public participation in the redistricting public review process.” (Gov. Code, § 8253, subd. (a)(7).) The Commission took this obligation very seriously and made extensive efforts to ensure compliance by creating an open public hearing and input process. Based on this extensive process, the Commission successfully met its mandate to hold open and transparent proceedings so that the public could participate meaningfully in the line drawing and redistricting process.

A. Goals for the Commission's Education and Outreach

The Commission's public education and engagement mission had three specific goals in its efforts to reach all Californians, including communities that have been historically disenfranchised, communities protected under the federal Voting Rights Act, and others who wished to have their input heard and considered in the redistricting of California. First, the Commission sought to activate and involve a historic number of Californians in the redistricting process by setting a goal activation rate—the rate of individuals who participated in the process by providing input in any format to the commission—of 1/1,000, or .1% of any given area, be it neighborhood, city, county, or region.

Second, the Commission sought to ensure Californians' engagement was *representative*. In other words, the Commission sought to elicit input from individuals and groups so that the redistricting process equitably reflected the voices of California's diverse population, which represented different geographies (mountain, desert, coastal, urban, suburban, rural, county centers, and non-county centers), races, ethnicities, citizenship and immigration statuses, genders, disabilities, economic backgrounds (small businesses to big businesses to nonprofits, educators to students, employers, employees, laborers, farm workers to farm owners, homeowners to renters to homeless), ages, sexual orientations, sexual

identities, and language abilities (native English speakers to non-native English speakers to American Sign language users).

Third, the Commission sought to ensure that participating in the redistricting process was *accessible* to all Californians. Such accessibility considerations included, but were not limited to: access and proficiency with technology or internet connectivity; language or transportation barriers; education levels; understanding of the political system; historic political disenfranchisement; eligibility to vote (for example, whether someone is undocumented, a U.S. citizen, formerly or currently incarcerated, or under 18 years old); isolated or afraid to engage; religious considerations; cultural considerations; and disability status.

B. Key Elements of the Commission's Outreach, Education, and Activation Strategy

The Commission's outreach efforts took place in multiple phases and were strategically developed to ensure coverage throughout the state. Building on civic engagement best practices, the Commission leveraged trusted messengers, local leaders, and stakeholders across numerous sectors to educate and activate Californians in this once-in-a-decade redistricting process. The following elements were key to these efforts.

1. Language Access Policy

To make Commission business accessible to as many Californians as possible, the Commission approved a Language Access Policy in January 2021 that guided the translation of outreach materials and the interpretation of public input and comment. This policy identified the top 13 languages of California's Limited English Proficient populations: Arabic, Armenian, Simplified and Traditional Chinese (for written materials) and Mandarin and Cantonese (for spoken interpretation), Cambodian/Khmer, Farsi, Japanese, Korean, Punjabi, Russian, Spanish, Tagalog, and Vietnamese.

To comply with the Americans with Disabilities Act (ADA), the Commission provided American Sign Language (ASL) interpretation and captions for all public meetings. Besides ASL and English captioning, spoken-language interpretation was provided for anyone seeking to provide comment in another language, so long as they provided sufficient notice for the request. For example, almost half of the meetings specifically devoted to receiving input from communities of interest offered Spanish listening lines and had Spanish interpreters on standby for those wishing to provide input. For 6 of these meetings, the Commission provided additional language listening lines in 12 other languages and offered interpreters on standby.

The Commission also took steps to encourage participation by those who are blind and visually impaired, including providing audio descriptions of draft maps.

2. Structuring Commission Meetings for Public Engagement

The Commission structured its meetings to maximize involvement of all Californians in the redistricting process. Specifically, Commission meeting times were intentionally varied and selected to include times that were convenient for average Californians to participate. Furthermore, the Commission regularly incorporated public feedback at business meetings, allowing an opportunity for public input and comment, generally at the beginning or end of each day—sometimes both—and before any Commission vote. The Commission also extended the hours of its designated input sessions, allowing many meetings to go well beyond the scheduled adjournment to ensure that all Californians who wished to be heard had the opportunity to address the Commission.

3. Statewide and Regional Outreach

Statewide outreach focused on large associations, coalitions, networks, and entities that could engage dozens of affiliates or local chapters, ultimately reaching thousands of Californians. Additionally, state agencies disseminated information to groups serving people with disabilities, incarcerated individuals, people experiencing homelessness, seniors, and economically disadvantaged people.

The Commission also engaged in outreach at the regional level. To do this, the Commission divided the state into eleven (11) “Outreach Zones” and assigned two Commissioners to each zone to lead regional efforts. The intent was to mirror the process used by the California Complete Count Census 2020 outreach campaign and enable the Commission to leverage the relationships with grassroots and other stakeholders who engaged on Census outreach within the respective zones. These statewide and regional outreach efforts were solely to raise awareness of the Commission and its process, and included no discussions about substantive line drawing. The efforts helped build trust among local communities and the Commission, resulting in an outreach network for the Commission to disperse information and updates throughout California. During this early education process, the Commission engaged over 50 statewide entities and hundreds of local associations to leverage their local and regional networks.

4. Additional Resources For Public Education and Engagement Efforts & Engaging Hard-to-Reach Populations

The Commission successfully augmented its budget to expand outreach efforts and took advantage of a longer time period to hire staff, especially once it became apparent that there would be Census delays. With a sufficient budget for outreach, the Commission’s Communications and Outreach staff were able to receive, track, and follow up on a wide variety of information requests from the

public, associations, and the press, develop a new website, create videos to promote awareness of the Commission's work, and educate Californians about redistricting.

The Commission also undertook a significant effort to educate and engage populations in the redistricting process that are traditionally less civically engaged. These included people incarcerated individuals, K-12 youth, Native American communities, military families and veterans, limited English speakers, refugees and immigrants, and unhoused individuals. Dedicated outreach resources and staff time ensured that opportunities to participate in the statewide redistricting process reached even these traditionally hard-to-engage populations.

a. Gathering Input From Incarcerated Populations

To engage California's incarcerated population in the redistricting process, the Commission developed an unprecedented campaign to reach adults and youth in California's state and county prison facilities. Critical to the Commission's outreach and education efforts were the California Department of Corrections & Rehabilitation, county probation officers, sheriff's associations, and community-based organizations, as well as their families and staff in each of these systems.

This work led to the development of a paper Communities of Interest Input form (the "Paper COI Tool") that could be distributed to people in each of these systems who did not have internet access. The two-page form and one-page cover insert provided context to the Commission's work while providing examples of community-of-interest input and inviting participation.

Paper COI Tools were shipped to 190 facilities around the state. Additionally, by working with engaged community-based organizations and Department of Corrections staff, the Commission produced a video about redistricting that was played in prisons statewide, and two community-based organizations created their own independent introduction videos. These community-produced videos provided additional context and were critical trusted messengers to invite engagement. Additionally, partnering facilities provided communications to staff across the statewide institutions to also share opportunities of how they could participate in the redistricting process. Nearly 1,300 incarcerated youth and adults returned Paper COI Tools, providing a unique source of community-of-interest input for the Commissioners.

b. Reaching Those With Limited Broadband Through Libraries

The Commission coordinated with statewide networks like the California State Library and California Library Association along with local branches to inform libraries about the redistricting process and also encouraged the public to take advantage of computer access at the library to participate in the redistricting process in those communities with limited broadband access at home.

5. Numerous Materials and Online Tools for Educating and Engaging the Public

Although on-the-ground outreach faced numerous challenges including the COVID-19 pandemic and California wildfires, the Commission took advantage of the delay in receiving 2020 Census data to mount a comprehensive public education and outreach campaign. The following were the main online and offline tools of the Commission's outreach and education efforts.

a. The "California Redistricting Basics" Presentation

One of the Commission's primary educational tools was a presentation called "California Redistricting Basics," which offered the public an explanation of redistricting in California (including mention of the various local redistricting efforts that would be underway simultaneously), an overview of the Commission's history, an introduction to the Commissioners, and discussion of ways to participate in the redistricting process.² The presentations set out the six criteria to be followed in the line-drawing process, as well as examples and guidance on how the public could describe their communities of interest. The Commission's "California Redistricting Basics" presentation was also available for streaming in both English and Spanish through the Commission's website. In total, the Commissioners conducted 182 presentations of "California Redistricting Basics," including two Commission-hosted statewide presentations, one in English and another in Spanish. Organizations in 34 of the state's 58 counties hosted these presentations, covering each of the Commission's 11 designated outreach zones and directly reaching more than 7,000 individuals. The Commission's outreach and communications team promoted these presentations to engage an even broader audience. The full list of presentations is available on the Commission's website (www.wedrawthelinesca.org/final_maps_report).

b. New Tools for Public Input on Communities of Interest and Proposed District Plans

California's Statewide Database, based at the University of California at Berkeley, is responsible for providing the Commission with a comprehensive database containing both Census and election data for use in the redistricting process. For this redistricting cycle, the Statewide Database developed an online tool (www.drawmycacommunity.org) that enabled Californians to provide the Commission with descriptions and maps of their communities of interest. Working with the Commission, the Statewide Database developed and tested the tool in late

² Given the restrictions against receiving input on maps outside of public meetings, Commissioners only answered questions regarding the content of the presentation itself or about how Californians could participate in the process and directed those interested in providing input on the maps to do so through the Commission's website, electronic mail, postal mail, and the online community of interest tool.

2020 and early 2021. The “Draw My CA Community” tool was subsequently released in 15 other languages, and the Statewide Database opened six access centers throughout California to assist the public with using the online tool to submit their public input related to communities of interest.

Given the success of the Draw My CA Community tool, the Statewide Database subsequently developed two other free-to-use online mapping tools—Draw My CA Districts and Draw My CA QGIS, both available at www.drawmycalifornia.org—to help Californians develop and share their own maps with the Commission. Although the 2020 redistricting cycle witnessed the wide public availability of a number of online mapping tools, the tools offered by the Statewide Database were the only redistricting applications through which users could submit their input directly to the Commission.

Additionally, the Commission set up an online form through which Californians could provide feedback on the Commission’s visualizations, draft maps, and subsequent district iterations, and made that feedback immediately available to Commissioners and the public on the Commission’s website.

c. A Robust, Easy-to-Navigate Website

The Commission’s website was one of the most important tools for maintaining a transparent and public redistricting process. All of the Commission’s public meetings were live streamed, captured on video, and posted on the Commission’s website for public viewing at any time. Stenographers were present at the Commission business meetings and meetings where line-drawing instructions were provided, and transcripts of these meetings were also placed on the Commission’s website. The Commission’s website, which incorporated a tool to facilitate translation into 104 languages, also housed documents prepared by the Commission and its staff, along with a public database containing all documents presented to the Commission by the public and suitable for posting.

d. Comprehensive Outreach Materials

A suite of professionally created public outreach materials—including digital flyers, videos, a Digital Action Toolkit, Frequently Asked Questions (FAQs), and sample newsletter articles—helped the Commission reach as many Californians as possible, educating the public about the redistricting process and how to get involved. Copies of these outreach materials are available on the Commission’s website (www.wedrawthelinesca.org/final_maps_report).

e. Social Media

With almost daily posting on Facebook, Twitter, Instagram, LinkedIn, and YouTube, social media marketing campaigns also helped to increase the Commission’s online presence and promote participation in the Commission’s public meetings. In addition, a weekly social media toolkit was sent to parties interested in sharing messaging from the Commission. Each Monday, five graphics and

suggested language were shared for Facebook, Twitter, and Instagram. This allowed for up-to-date content to be shared with external audiences on a regular basis. The toolkit went to approximately 625 people weekly, starting the week of April 5, 2021.

f. Statewide 11th and 12th Grade Curriculum

A partnership between the Sacramento and Los Angeles County Offices of Education resulted in a statewide curriculum on redistricting geared towards 11th and 12th graders. Commission staff collaborated with the curriculum developers to include available Commission tools and links, increase engagement opportunities, ensure accuracy, and consult on the timing of the curriculum's release. Commission staff also encouraged all 58 county Offices of Education across the state, as well as facilities housing incarcerated youth, to disseminate the redistricting curriculum and otherwise engage students, teachers, and families in the redistricting process. Facilities housing incarcerated youth were particularly enthusiastic about receiving this curriculum, which is available on the Commission's website (www.wedrawthelinesca.org/final_maps_report).

C. Total Public Input

The Commission received over 36,280 public comments in total:

Source Type	Approximate Number of Inputs
Commission Public Input Forms	21,947
Email (votersfirstact@crc.ca.gov)	5,348
Letter	1,728
Input during Public Meeting ³	3,871
Paper Community of Interest (COI) Tool	1,278
Submissions from online COI tool (drawmycacommunity.org)	1,809
Submissions from online district mapping tools, including Drawmycadistricts.org and Draw My CA QGIS Plugin	305
Total	36,286

³ This figure does not include input during the Commission's public meetings prior to June 10, 2021.

IV. THE REDISTRICTING TIMELINE

Once the basic timeline resulting from the Census delays became clear, the Commission developed a three-phase approach to its work.

A. Phase I: Public Education and Outreach (October 2020 to July 2021)

From October 2020 through July 2021, the Commission focused on educating itself as well as raising public awareness and understanding about the statewide redistricting process.

1. Initial Outreach and Education Efforts

The Commission's initial outreach and education efforts included a learning phase for the Commission, featuring 23 educational panels between October 2020 and May 2021 for Commissioners to learn about specific topics, discuss methods to reach various populations, facilitate training opportunities, and inform Commission policy decisions. Presenters included:

- Access California Services
- Advancement Project CA
- Asian Americans Advancing Justice
- Asian Health Services
- California Black Census and Redistricting Hub
- California Chamber of Commerce
- California Complete Count Census 2020
- California Department of Corrections & Rehabilitation
- California Farm Bureau Federation
- California Labor Federation
- California League of Conservation Voters
- California Native Vote Project
- California School Board Association
- California State Parent Teachers Association
- California Statewide Database
- Common Cause California
- Disability Rights California
- Dolores Huerta Foundation
- Equality California
- HaystaqDNA (Haystaq)
- Imperial Valley LGBT Resource Center
- Initiate Justice
- Justin Levitt (professor, Loyola Law School)
- Connie Galambos Malloy (former Commissioner, 2010)
- Mexican American Legal Defense & Education Fund (MALDEF)
- National Association of Latino Elected Officials (NALEO)

- Partnership for the Advancement of New Americans
- Philanthropy California
- Prison Policy Initiative
- Public Policy Institute of CA
- Power California
- Redistricting Partners
- Sacramento County Office of Education
- San Diego LGBTQ Community Center
- San Ysidro Health
- Service Employee International Union (SEIU)
- Silicon Valley Leadership Group
- Southern California Tribal Chairmen's Association
- True North Organizing Network
- UCLA Voting Rights Project
- U.S. Digital Response
- Alberto Vásquez (formerly incarcerated individual)
- Q2 Data & Research LLP (Q2)

In addition, during Phase I, Commissioners conducted more than 180 educational presentations of “California Redistricting Basics” as described earlier.

2. Launch of Draw My CA Community

During Phase I, the Statewide Database launched Draw My CA Community, an online tool allowing the public to draw and share information about their communities of interest directly with the Commission. The Commission understood that an individual could belong to multiple communities of interest (i.e., an economic community of interest, a cultural community of interest, and an environmental community of interest) and communicated that understanding through its California Redistricting Basics presentation.

3. Setting Policy to Reallocate Incarcerated Populations

During Phase I, the Commission also made an important decision regarding the redistricting process. The United States Census Bureau's long-standing practice counts persons who are incarcerated in state and federal correctional facilities as residents of the district where they are confined. But this practice can lead to unfair representation in communities with facilities located in their jurisdiction (sometimes referred to as “prison gerrymandering”), so the California Legislature requested that the Commission deem each incarcerated person as residing at that person's last known place of residence, rather than at the institution of that person's incarceration. (Elections Code, § 21003, subd. (d).) If the last known place of residence is outside California or cannot be determined, the Legislature requested that the Commission deem inmates as residing in an “unknown geographical location” and to “exclude the inmate from the population count for any district, ward, or precinct.” (*Ibid.*)

Following an educational panel and robust discussion on the issue, the Commission decided to reallocate those in state custody to their last known address. The Commission also sought the last known address information for those in federal custody, but was unable to obtain the necessary information to complete the task of reallocating that population.

B. Phase II: Activation, Receiving Input, and Receiving Census Data (June to September 2021)

Phase II consisted of additional, more targeted outreach efforts, gathering input from the public, receiving Census data, and obtaining clarity from the California Supreme Court on revised Commission deadlines that were thrown into question by the timing and format of multiple Census data releases.

1. Communities of Interest Input Meetings

In June 2021, the Commission began hosting virtual Communities of Interest (“COI”) Public Input meetings, as well as spreading the word about online and other opportunities to provide community-of-interest input. Building on the Commission’s outreach efforts in Phase I, Commission staff began engaging thousands of stakeholder organizations throughout California, providing information about public meetings, online input tools, sign-ups for the weekly social media toolkits and monthly newsletters, and encouraging participation in the redistricting process.

The Commission created an online appointment sign-up system for the COI Public Input meetings, eliminating the need for members of the public to wait in long lines to provide testimony, as well as providing same-day call-in opportunities for those choosing not to or unable to make an appointment. This process helped reduce barriers for many Californians balancing work and family time, and allowed for easier access to participation in the redistricting process. Those sharing public input with an appointment could enable video capabilities so that they could personally address the Commission, much as they would have during an in-person meeting. In all, technology allowed these virtual meetings to be as inclusive and accessible as possible.

The Commission held 35 COI Public Input meetings, with 1,340 individuals providing their input during these virtual, Zoom-platform meetings. Thousands of Californians listened in or watched the live-feed stream. On the busiest day, 80 Californians provided community-of-interest input or public comment to the Commissioners.

2. Additional Education Trainings

In early September 2021, Commission staff began a separate round of educational presentations geared toward increasing community-of-interest input to the Commission through a variety of channels. More than 1,900 viewer screens signed on to attend the more than 80 presentations, which covered each of the Commission’s 11 outreach zones.

3. Access Centers

Recognizing that many Californians may not have reliable access to computers and the Internet, or required assistance with submitting input using online portals, the Statewide Database opened six “Access Centers” in late August to help ensure all Californians had the opportunity to provide input on their communities of interest. These Access Centers, located in Fresno, Long Beach, Oakland, Sacramento, San Bernardino, and San Diego, allowed the public to obtain help in-person or to utilize publicly accessible computers and redistricting software developed by the Statewide Database. Staff at the Access Centers also provided telephone-based support for users.

4. Launch of Draw My CA Districts

In September 2021, the Statewide Database launched two more online free-to-use tools—Draw My CA Districts and Draw My CA QGIS—enabling members of the public to draw their own proposed district maps and submit them directly to the Commission for consideration.

5. Receipt of Census Data

The Legislature has the obligation to provide the Commission and the public with a dataset that can be used for redistricting, but the process of constructing that dataset cannot begin until the Census Bureau has released the census data, known as the P.L. 94-171 data. In April 2020, however, the Census Bureau announced that it would not be able to deliver these data by its March 31, 2021, deadline and that it did not expect the data to be available for release until July 31, 2021. In February 2021, the Census Bureau announced that the projected release of the P.L. 94-171 dataset had been delayed even further, to as late as September 30, 2021.

Amid considerable push-back and even legal action by states with redistricting and election deadlines that could not be met according to that schedule, on March 15, 2021, the Census Bureau announced that it would release a version of the P.L. 94-171 dataset by mid-to-late August of 2021. This interim data product was referred to as the “legacy” dataset. The “legacy” dataset was not user friendly and necessitated the application of more advanced database, analysis, and manipulation skills to be usable for redistricting purposes than the originally planned for, later release of the P.L. 94-171 dataset.

The Census Bureau released the “legacy” redistricting dataset on August 12, 2021, and the Statewide Database immediately downloaded the data and began the reformatting and data verification process necessary to convert the “legacy” data into a usable format for the public and for building the statewide redistricting database for the Legislature and the Commission. Alongside the Statewide Database, the California Demographic Research Unit parallel processed the data to ensure its accuracy. Once the Chief of the California Demographic Research Unit,

State Demographer Dr. Walter Schwarm, validated the accuracy of the reformatted data, the dataset was released on the Statewide Database's website on the afternoon of August 18, 2021.

Once that occurred, the Statewide Database began the next tasks required to build the redistricting database for the State of California: adjusting the decennial Census data to reallocate data about incarcerated persons that had been enumerated in facilities under the control of the Department of Corrections and Rehabilitation to their last residential address; removing data about incarcerated persons that were enumerated in federal facilities in California (per the Commission's August 20, 2021 decision), and merging the census data with historical individual-level voter registration records and historical precinct-level election results. The Statewide Database completed the redistricting dataset and made the data available to the Commission and to the public on September 20, 2021.

6. Supreme Court Ruling on Commission Deadlines

In July 2020, the California Supreme Court granted a request from the California Legislature to extend the deadline to finalize the state's maps by four months due to the anticipated delay in the federal government's release of the Census data from March 31, 2021, to July 31, 2021. The Court's opinion also provided that the adjusted deadlines should be further extended by the length of any additional federal delay in the release of the Census data to the states beyond four months.

The Supreme Court's order, however, did not foresee the Census Bureau's decision to transmit the Census data to the states in two different formats on two different dates, creating an ambiguity in how the length of the "additional federal delay" should be calculated. The Commission was also concerned that the additional delay in receiving the Census data had pushed the crucial phase of the state's redistricting process—the period for the public to review and comment upon the Commission's preliminary maps—into the traditional Thanksgiving-Christmas-New Year's holiday period, diminishing the opportunity for meaningful public engagement and participation in the line-drawing process.

The Commission therefore filed a motion on August 20, 2021, asking the Supreme Court to clarify and to slightly extend the deadlines for its issuance of the preliminary and final maps. On September 22, 2021, the Supreme Court granted the motion in part, directing the Commission to release its preliminary statewide maps for congressional, State Senatorial, Assembly, and State Board of Equalization districts for public display and comment no later than November 15, 2021, and to approve and certify its final maps to the Secretary of State no later than December 27, 2021.

C. Phase III: Line Drawing and Additional Public Input (October to December 2021)

1. Beginning Visualizations

As the Commission began the line-drawing process in the fall of 2021, it dedicated several weeks to reviewing geographic areas for potential district ideas. Using the communities-of-interest testimony it had received, the Commission assessed how that testimony could potentially inform district boundaries and considered the tradeoffs that would need to be made in eventual maps in light of other considerations, such as compliance with the Voting Rights Act. This resulted in several visualizations of potential district maps.

During this process, the Commission continued to provide a variety of opportunities for public input on the visualizations and line-drawing processes, even creating a database for Commissioners and the public to view feedback received thus far. Redistricting presentations by Commission staff continued through Phase III to highlight the ongoing ways to participate in the redistricting process, including submitting input on communities of interest, visualizations, and eventually draft maps.

2. Media Blitz

Over the final months of the redistricting process, the Commission's public communications activities expanded even further into paid media efforts, including 30-second and 60-second radio spots, billboards, and bus-shelter advertisements in high-visibility areas all designed to publicize the Commission's public meetings and the Commission's website. A statewide print media campaign designed to reach diverse racial, ethnic, and rural communities also ran from August 2021 through December 2021, with ads running for seven days in 46 daily newspapers and over 15 weeks in 142 weekly community newspapers. Public communications staff also engaged members of the ethnic press, holding roundtables and mini town-halls.

3. Proposed Maps from the Public

The Commission held 168 public meetings, including several public live line-drawing sessions, before it issued a set of preliminary draft maps on November 10, 2021. Three of these public input meetings offered members of the public the opportunity to present their own proposed district maps. During these meetings, more than 40 organizations or individuals gave public presentations of their proposed maps. The list of stakeholders that presented to the Commission is available on the Commission's website (www.wedrawthelinesca.org/final_maps_report).

Meanwhile, the public continued to utilize the Commission's free online mapping tools and other options for providing input to the Commission. Ultimately, the Commission received more than 3,750 separate submissions containing maps of

districts or communities of interest designed on the Commission's tools or other mapping software.⁴

4. Draft Map Public Input Meetings

In the final days leading up to the release of the Commission's preliminary draft maps, the Commission was receiving an outpouring of public input and comment. Between November 7 and 10, the Commission received more than 3,640 written submissions and as many as 1,122 members of the public provided their input on a single day (November 9, 2021). By the time draft maps were released, the Commission had received more than 17,000 public submissions. On November 10, five days ahead of the Supreme Court mandated deadline, the Commissioners posted a set of preliminary draft maps for public comment.

After the release of the draft maps, the Commission held six Draft Map Public Input meetings that focused on community feedback and input to the preliminary draft maps. Again, an online appointment system allowed members of the public to participate in the process without needing to wait hours. The Commission also opened daily non-appointment public comment, allowing for hundreds more to participate over the six days of meetings. This generally resulted in the meetings extending one to two hours past the scheduled end time to allow all callers in the queue to speak. In all, about 720 members of the public provided verbal input at one of the six Draft Map Public Input meetings and the Commission received 5,846 pieces of input submitted via other means during the two-week period after draft maps were published.

5. Incorporating Public Input for the Final Maps

From November 29 to December 18, 2021, the Commission continued the process of considering and incorporating the public input it had received both prior to and following the release of its draft maps, and using that input to work toward final maps. The Commission used December 18th and 19th to make minor refinements to all maps before voting to approve final maps on December 20, 2021.

For this period, the Commission relied on an electronic Map Viewer tool on its website, which allowed members of the public to view recent iterations of the Commission's working maps, its November draft maps, and the existing maps as different layers in the tool, currently available at www.wedrawthelinesca.org/map_viewer. The Map Viewer also allowed users to see counties and other geopolitical boundaries. The Map Viewer tool allowed members of the public to upload shape files to view their own or other suggested maps submitted by members of the public in the same tool. The Commission updated its

⁴ Some submissions contained more than one map.

latest iterations of its working maps in the Map Viewer regularly throughout this three-week process.

In order to maximize public input during this crucial final process, the Commission revised its public comment policy in a way that decreased the amount of time that callers would typically have to wait on hold before being heard. So that it was able to meet its deadlines, the Commission also limited public input to three hours per day. Nevertheless, between November 29 and December 20, 2021, the Commission dedicated over 40 hours to receiving public comment, hearing from over 1,340 callers and receiving over 11,065 written submissions.

V. CRITERIA USED IN DRAWING MAPS

When voters approved the constitutional amendments tasking an independent citizens commission with drawing districts for Congress, the Legislature (Senate and Assembly), and the Board of Equalization, they declared that the Commission would “draw districts based on strict, nonpartisan rules designed to ensure fair representation.” (Prop. 20 (2010), § 2, subd. (d), “Findings and Purpose.”) To fulfill this purpose, Article XXI of the California Constitution establishes the legal framework for drawing new districts.

First, Article XXI codifies six specific criteria, in descending order of priority, that the Commission must consider:

- (1) Districts shall comply with the United States Constitution. Congressional districts shall achieve population equality as nearly as is practicable, and Senatorial, Assembly, and State Board of Equalization districts shall have reasonably equal population with other districts for the same office, except where deviation is required to comply with the federal Voting Rights Act or allowable by law.
- (2) Districts shall comply with the federal Voting Rights Act. . .
- (3) Districts shall be geographically contiguous.
- (4) The geographic integrity of any city, county, city and county, local neighborhood, or local community of interest shall be respected in a manner that minimizes their division to the extent possible without violating the requirements of any of the preceding subdivisions. A community of interest is a contiguous population which shares common social and economic interests that should be included within a single district for purposes of its effective and fair representation. Examples of such shared interests are those common to an urban area, a rural area, an industrial area, or an agricultural area, and those common to areas in which the people share similar living standards, use the same transportation facilities, have similar work opportunities, or have access to the same media of communication relevant to the election process.

Communities of interest shall not include relationships with political parties, incumbents, or political candidates.

- (5) To the extent practicable, and where this does not conflict with the criteria above, districts shall be drawn to encourage geographical compactness such that nearby areas of population are not bypassed for more distant population.
- (6) To the extent practicable, and where this does not conflict with the criteria above, each Senate district shall be comprised of two whole, complete, and adjacent Assembly districts, and each Board of Equalization district shall be comprised of 10 whole, complete, and adjacent Senate districts. (Cal. Const., art. XXI, § 2, subd. (d).)

Second, in addition to listing the criteria the Commission must consider, Article XXI also precludes the Commission from considering the residence of an incumbent or from favoring or discriminating against particular candidates or parties. Specifically, Article XXI states the “place of residence of any incumbent or political candidate shall not be considered in the creation of a map. Districts shall not be drawn for the purpose of favoring or discriminating against an incumbent, political candidate, or political party.” (Cal. Const., art. XXI, § 2, subd. (e).)

Finally, Article XXI provides that “[d]istricts for the Congress, Senate, Assembly, and State Board of Equalization shall be numbered consecutively commencing at the northern boundary of the State and ending at the southern boundary.” (Cal. Const., art. XXI, § 2, subd. (f).)

As explained below, the Commission carefully adhered to these criteria throughout the line-drawing process.

A. Criterion One: The United States Constitution

The Commission’s highest-ranking criterion is to comply with the United States Constitution. (Cal. Const., art. XXI, § 2, subd. (d)(1).) The federal Constitution prohibits substantial disparities or malapportionment in total population between electoral districts in the same districting plan, known as the principle of “one person, one vote.” (See *Reynolds v. Sims* (1964) 377 U.S. 533, 559 (*Reynolds*).) Furthermore, the Fourteenth Amendment of the federal Constitution prohibits the use of race when it “predominates” in the redistricting process unless it is narrowly tailored to achieve a compelling state interest. (See *Miller v. Johnson* (1995) 515 U.S. 900, 916–920 (*Miller*).)

1. Population Equality

The United States Constitution requires that any redistricting plan must achieve population equality among electoral districts. The population-equality requirement for Congressional districts flows from Article I, Section 2, which states that the “House of Representatives . . . shall be apportioned among the several

States which may be included within this Union, according to their respective numbers.” (U.S. Const., art. I, § 2.) The population-equality requirement for state legislative districts derives from the Equal Protection Clause of the Fourteenth Amendment. (*Reynolds, supra*, 377 U.S. at p. 568 “[T]he Equal Protection Clause requires that the seats in both houses of a bicameral state legislature must be apportioned on a population basis.”].)

Maintaining equal numbers of people in state legislative and congressional districts helps to ensure individuals living in every part of the state have equal voting power and access to elected representatives. (*Kirkpatrick v. Preisler* (1969) 394 U.S. 526, 531 (*Kirkpatrick*).) Indeed, an individual’s right to vote for state or federal legislators may be unconstitutionally impaired when the weight of that vote is diluted, as compared with the votes of citizens living in other parts of the state. (E.g., *Reynolds, supra*, 377 U.S. at p. 568.)

As far as who is counted for purpose of equalizing state and local districts, the United States Supreme Court has provided fewer clear answers about what the federal Constitution requires. Most states, including California, rely on total population figures, where counts are based on the total number of people in each district, including children, noncitizens, and others not eligible to vote. (*Evenwel v. Abbott* (2016) 578 U.S. 54, 60 (*Evenwel*) [noting that, “in the overwhelming majority of cases, jurisdictions have equalized total population, as measured by the decennial census.”].) In recent years, other measures have been suggested, such as voting-age population (“VAP”), citizen voting-age population (“CVAP”), or registered voters. Nevertheless, in a unanimous decision, the Supreme Court approved relying on total population for equalizing districts—which is the approach that the Commission used—and called it “plainly permissible.” (*Id.*, at p. 64.)

a. United States Congressional Districts

There are different standards governing population equality for United States congressional districts, on the one hand, and state legislative districts (Assembly and Senate) and districts for state entities such as the Board of Equalization, on the other. For congressional districts, populations must be “as close to perfect equality as possible.” (*Evenwel, supra*, 578 U.S. at p. 59.) This strict standard of population equality requires that states “make a good-faith effort to achieve precise mathematical equality.” (*Kirkpatrick, supra*, 394 U.S. at pp. 530–531; see also *Karcher v. Daggett* (1983) 462 U.S. 725, 739–743 (*Karcher*).)

Nonetheless, recognizing that “[p]recise mathematical equality . . . may be difficult to achieve in an imperfect world,” the United States Supreme Court has explained that the population equality “standard is enforced only to the extent of requiring that districts be apportioned to achieve population equality *as nearly as is practicable*.” (*Karcher, supra*, 462 U.S. at p. 730, italics added, internal quotation marks and citation omitted.) Article XXI of the California Constitution uses very

similar language, stating that “Congressional districts shall achieve population equality as nearly as is practicable.” (Cal. Const., art. XXI, § 2, subd. (d)(1).)

Applying the “as nearly as practicable” standard, the United States Supreme Court has explained that any deviation, no matter how small, must be either unavoidable (despite a good-faith effort to achieve absolute equality) or necessary to achieve a legitimate legislative policy. (*Tennant v. Jefferson County Comm’n* (2012) 567 U.S. 758, 760; *Karcher, supra*, 462 U.S. at pp. 740–741; see also *Kirkpatrick, supra*, 394 U.S. at p. 530 [rejecting contention “that there is a fixed numerical or percentage population variance small enough to be considered *de minimis* and to satisfy without question the [population equality] standard.”].) Whether a nondiscriminatory legislative policy justifies a deviation depends on case-specific circumstances such as “the size of the deviations, the importance of the State’s interests, the consistency with which the plan as a whole reflects those interests, and the availability of alternatives that might substantially vindicate those interests yet approximate population equality more closely.” (*Karcher, supra*, 462 U.S. at pp. 740–741.)

The Commission’s congressional district maps comply with these equal population standards. The Commission’s congressional district maps achieved a total deviation of +/- one person. Specifically, 21 of the 52 congressional districts achieved the ideal population of 760,066 persons. Eighteen of the 52 districts achieved a population of 760,067 persons, or one person more than the ideal. Thirteen of the 52 districts achieved a population of 760,065 persons, or one person less than the ideal.

b. State Legislative and Board of Equalization Districts

In contrast to the strict standard applicable to congressional districts, when drawing state legislative districts, the United States Supreme Court has interpreted the federal Constitution to allow jurisdictions “to deviate somewhat from perfect population equality to accommodate traditional districting objectives, among them, preserving the integrity of political subdivisions, maintaining communities of interest, and creating geographic compactness.” (*Evenwel, supra*, 578 U.S. at p. 59.)

“Where the maximum population deviation between the largest and smallest district is less than 10%,” the Court has held, “a state or local legislative map presumptively complies with the one-person, one-vote rule.” (*Evenwel, supra*, 578 U.S. at p. 60.)⁵ By contrast, maximum deviations above 10% are “presumptively

⁵ “Maximum population deviation” refers to the sum of the percentage deviations from the ideal population equality of the most- and least-populated districts. (*Id.*, at p. 60.) For example, if the least-populated district in a plan is 6% below the “ideal” population and the largest district in a plan is 5% above the “ideal” population, then the maximum population deviation is 11%.

impermissible.” (*Ibid.*) Importantly, this is only a general rule. In one case, the United States Supreme Court affirmed a district court decision holding that a state redistricting plan with a total deviation under 10% nonetheless violated the population equality requirement, because the maps were designed to give rural and inner-city areas more legislative influence at the expense of suburbs, and the deviations were created to protect incumbents in an inconsistent and discriminatory manner. (*Larios v. Cox* (N.D.Ga. 2004) 300 F.Supp.2d 1320, *affd.* (2004) 542 U.S. 947.) In another case, by contrast, the United States Supreme Court approved a state legislative map with a maximum population deviation of 16% to accommodate the state’s interest in “maintaining the integrity of political subdivision lines.” (*Mahan v. Howell* (1973) 410 U.S. 315, 325.)

To sum up: state legislative districts have “[s]omewhat more flexibility” in drawing state districts (*Reynolds, supra*, 377 U.S. at p. 578) and, under the federal Constitution, these districts can have smaller or larger populations than the mean if deviations are supported by legitimate state interests that are consistently applied, without “any taint of arbitrariness or discrimination.” (*Brown v. Thompson* (1983) 462 U.S. 835, 843, quoting *Roman v. Sincock* (1964) 377 U.S. 695, 710.)

In addition to the standard under the federal constitution, Article XXI of the California Constitution states that “Senatorial, Assembly, and State Board of Equalization districts shall have reasonably equal population with other districts for the same office, except where deviation is required to comply with the federal Voting Rights Act or allowable by law.” (Cal. Const., art. XXI, § 2, subd. (d)(1).) Although this language has not been interpreted by the California Supreme Court since it was amended by Proposition 11 and Proposition 20, it is consistent with and appears to incorporate the federal constitutional standard applicable to state legislative districts described above.

Applying the guidance provided by the United States Supreme Court and the text of Article XXI, the Commission ensured that districts in all of the state maps maintained a population size within +/- 5% of the ideal.

The ideal population of an Assembly district is 494,043. Thirty-eight Assembly districts achieved a deviation within 3% of the ideal; 16 of the 80 Assembly districts achieved a deviation within 1% of the ideal. The total deviation of the Assembly districts is 9.88%, ranging from -4.89% to +4.99%.

The ideal population of a Senate district in California is 988,086 people. Thirteen Senate districts have a deviation within 3% of the ideal; seven of the 40 Senate districts have a deviation from the ideal of less than 1.0%. The total deviation of the Senate districts is 9.78%, ranging from -4.98% to +4.89%.

The ideal population of a Board of Equalization district is 9,880,859. The total deviation of the Board of Equalization districts is 2.88%, ranging from -1.47% to +1.69%.

2. Equal Protection Clause of the Fourteenth Amendment

The Equal Protection Clause of the Fourteenth Amendment to the United States Constitution provides that “no state shall . . . deny to any person within its jurisdiction the equal protection of the laws.” (U.S. Const., 14th Amend., § 1.) As interpreted by the United States Supreme Court, this text prohibits certain forms of racial gerrymandering in drawing electoral districts. (*Miller, supra*, 515 U.S. at pp. 916, 920.) Specifically, the United States Supreme Court has explained that a state’s “predominant” use of race in drawing district lines is only permissible when it satisfies the Court’s “strict scrutiny” standard, meaning that the use of race is narrowly tailored to achieve a compelling state interest. (*Ibid.*) Simply put, a redistricting body violates the federal Constitution if race is the “predominant” factor in determining which voters to put where and the use of race was not justified by some other compelling interest.

Importantly, considering race during redistricting is not the same as allowing racial considerations to “predominate.” Redistricting bodies, the United States Supreme Court has acknowledged, will “almost always be aware of racial demographics” (*Miller, supra*, 515 U.S. at p. 916), and race does not predominate “merely because redistricting is performed with consciousness of race.” (*Bush v. Vera* (1996) 517 U.S. 952, 958–959 (*Vera*).) “Nor does [strict scrutiny] apply to all cases of intentional creation of majority-minority districts,” as required by the Voting Rights Act, discussed in Part V.B. (*Ibid.*) Rather, the Supreme Court has stated that race “predominates” where a redistricting body “subordinated traditional race-neutral districting principles, including but not limited to compactness, contiguity, and respect for political subdivisions or communities defined by actual shared interests, to racial considerations.” (*Miller, supra*, 515 U.S. at p. 916; see also *Cooper v. Harris* (2017) 137 S.Ct. 1455, 1464–1465 [predominance “entails demonstrating that the legislature ‘subordinated’ other factors—compactness, respect for political subdivisions, partisan advantage, what have you—to ‘racial considerations’”].)

Even if race were the predominant reason for moving some significant populations into or out of a district, that would not necessarily render the districting process unconstitutional. The United States Supreme Court has explained that a predominant focus on race does not violate the Fourteenth Amendment if the use of race is narrowly tailored to achieve a compelling state interest. (*Miller, supra*, 515 U.S. at p. 920.) The United States Supreme Court has not directly stated which state interests are adequately compelling to survive strict scrutiny in the redistricting context, but it has repeatedly assumed that compliance with Sections 2 or 5 of the Voting Rights Act constitutes a “compelling governmental interest” that would justify drawing districts based predominantly on race. (E.g., *Bethune-Hill v. Va. State Bd. of Elections* (2017) 137 S.Ct. 788, 801 (*Bethune-Hill*) [“As in previous cases, therefore, the Court assumes, without

deciding, that the State’s interest in complying with the Voting Rights Act was compelling.”].)

“When a State justifies the predominant use of race in redistricting on the basis of the need to comply with the Voting Rights Act, ‘the narrow tailoring requirement insists only that the legislature have a strong basis in evidence in support of the (race-based) choice that it has made.’” (*Bethune-Hill*, *supra*, 137 S.Ct. at p. 801, quoting *Ala. Legislative Black Caucus v. Alabama* (2015) 575 U.S. 254, 278.) Put another way, if the redistricting body has a “strong basis in evidence” for concluding that the “creation of a majority-minority district is reasonably necessary to comply with § 2, and the districting that is based on race substantially addresses the § 2 violation, it satisfies strict scrutiny.” (*Vera*, *supra*, 517 U.S. at p. 977, citations omitted.)

The Commission’s map-drawing process complied with these principles because it relied on race-neutral, traditional redistricting criteria as its primary focus in crafting district lines, even in areas where the Commission needed to ensure district lines were consistent with the Voting Rights Act. While the Commission was aware of and sensitive to the Census data and demographics of the areas under review—particularly in areas with sizeable minority populations, evidence of racially polarized voting, and a history of discrimination—the Commission did not impermissibly use race as the sole or predominant criterion to draw district lines. Rather, the Commission’s iterative process weighed a host of traditional, race-neutral redistricting criteria, including balancing population, maintaining the geographic integrity of cities, counties, neighborhoods, and communities of interest, and considering natural topography, ecological zones, transportation corridors, and industrial/economic interests that define communities. The Commission made a substantial effort to focus on the shared interests and community relationships that belonged together for fair and effective representation of all of the people of the State of California when drawing district lines.

B. Criterion Two: The Federal Voting Rights Act

The Commission’s second criterion in order of priority is that “[d]istricts shall comply with the federal Voting Rights Act.” (Cal. Const., art. XXI, § 2, subd. (d)(2).)⁶

⁶ In addition, the Voters First Act requires that at least one of the legal counsel hired by the Commission has experience and expertise in implementation and enforcement of the federal Voting Rights Act (“VRA”). (Gov. Code, § 8253, subd. (a)(5).) Accordingly, the Commission retained experienced election law and redistricting attorneys Strumwasser & Woocher LLP and David Becker to serve as its Voting Rights Act counsel and to help ensure compliance with the VRA. Voting Rights Act counsel conducted legal compliance trainings for the Commission and the public, advised the Commission on VRA compliance, attended and provided legal counsel in all visualization and line-drawing meetings, reviewed all

1. Section 2 of the Voting Rights Act

Congress enacted Section 2 of the Voting Rights Act in an effort to combat minority vote dilution. Section 2, subdivision (a) provides that no “standard, practice, or procedure shall be imposed or applied . . . in a manner which results in a denial or abridgement of the right . . . to vote on account of race or color” or membership in a language minority group. (52 U.S.C. § 10301, subd. (a); *Id.*, § 10303, subd. (f)(2).)

Section 2, subdivision (b) provides that:

“A violation [of Section 2] is established if, based on the totality of circumstances, it is shown that the political processes . . . are not equally open to participation by members of a class of citizens protected by subsection (a) in that its members have less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice.” (52 U.S.C. § 10301(b).)

a. The Legal Standard

In 1982, Congress clarified that Section 2 plaintiffs need not prove that “a contested electoral mechanism was intentionally adopted or maintained by state officials for a discriminatory purpose.” (*Thornburg v. Gingles* (1986) 478 U.S. 30, 35 (*Gingles*)). Rather, a “violation [can] be proved by showing discriminatory effect alone.” (*Ibid.*) Accordingly, a Section 2 violation occurs where “a contested electoral practice or structure results in members of a protected group having less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice.” (*Id.*, at p. 63.) Importantly, the United States Supreme Court has invoked Section 2 to strike down legislative redistricting plans that result in minority vote dilution as defined by Section 2. (See *League of United Latin American Citizens v. Perry* (2006) 548 U.S. 399, 423–443 (*LULAC*).)

A single-member redistricting scheme can run afoul of Section 2 either through “cracking” or “packing” minority voters. “Cracking” occurs when a redistricting plan fragments a minority group that is large enough to constitute the majority in a single-member district among various districts so that it is a majority in none. (*Voinovich v. Quilter* (1993) 507 U.S. 146, 153 (*Voinovich*)). “If the majority in each district votes as a bloc against the minority[- preferred] candidate, the fragmented minority group will be unable to muster sufficient votes in any district to carry its candidate to victory.” (*Ibid.*; see also *LULAC*, *supra*, 548 U.S. at pp.

visualizations and map drafts for legal compliance, retained and managed a racially polarized voting expert, and drafted pertinent portions of this report.

427–443 [redistricting program violated Section 2 by reducing Latino citizen voting-age population from 57.5% to 46% in challenged district].)

“Packing,” on the other hand, occurs when a redistricting plan results in excessive concentration of minority voters within a single district, thereby depriving minority voters of influence in surrounding districts. (*Voinovich, supra*, 507 U.S. at p. 153; e.g., *Bone Shirt v. Hazeltine* (8th Cir. 2006) 461 F.3d 1011, 1016–1019 [finding a Section 2 violation where Native Americans comprised 86% of the voting-age population in a district].)

The Supreme Court has established a number of elements that a plaintiff must prove to establish that a redistricting plan violates Section 2 of the Voting Rights Act. As an initial matter, a Section 2 plaintiff must prove the three so-called “*Gingles* preconditions” articulated by the Court in *Thornburg v. Gingles*. (See *Grove v. Emison* (1993) 507 U.S. 25, 37–42.) The *Gingles* preconditions are as follows:

First, the minority group must be able to demonstrate that it is sufficiently large and geographically compact to constitute a majority in a single-member district.

Second, the minority group must be able to show that it is politically cohesive.

Third, the minority must be able to demonstrate that the white majority votes sufficiently as a bloc to enable it . . . usually to defeat the minority’s preferred candidate. (*Gingles, supra*, 478 U.S. at pp. 50–51.)⁷

With respect to the first *Gingles* precondition—a sufficiently large and geographically compact minority group—a minority group is sufficiently large only where “the minority population in the potential election district is greater than 50 percent.” (*Bartlett v. Strickland* (2009) 556 U.S. 1, 20 (*Bartlett*) (plur. opn. of Kennedy, J., joined by Roberts, C.J. and Alito, J.)) Although the Supreme Court has not expressly defined the proper measure of “minority population,” the Ninth

⁷ The “majority” does not actually have to be White (as opposed to some other racial group), or even composed of a single racial group, in order to satisfy the third *Gingles* precondition. (See *Gomez v. City of Watsonville* (9th Cir. 1988) 863 F.2d 1407, 1417 [“Although the court did not separately find that Anglo bloc voting occurs, it is clear that the non-Hispanic majority in Watsonville usually votes sufficiently as a bloc to defeat the minority votes plus any crossover votes.”]; *Meek v. Metropolitan Dade County, Fla.* (S.D. Fla. 1992) 805 F.Supp. 967, 976 & fn.14 [“In order to prove the third prong in *Gingles*, Black Plaintiffs must be able to demonstrate that the Non-Black majority votes sufficiently as a bloc Non-Blacks refer to Hispanics and Non-Hispanic Whites.”], *affd. in part & revd. in part on other grounds* (11th Cir. 1993) 985 F.2d 1471.)

Circuit Court of Appeals has endorsed the use of citizen voting-age population (“CVAP”) statistics, rather than total population or voting-age population statistics, to satisfy the first *Gingles* precondition. (*Romero v. City of Pomona* (9th Cir. 1989) 883 F.2d 1418, 1426 [“The district court was correct in holding that eligible minority voter population, rather than total minority population, is the appropriate measure of geographical compactness.”], *abrogated on other grounds, Townsend v. Holman Consulting Corp.* (9th Cir. 1990) 914 F.2d 1136 [en banc]; see also *LULAC, supra*, 548 U.S. at p. 429 [observing that CVAP “fits the language of § 2 because only eligible voters affect a group’s opportunity to elect candidates”]).⁸

In addition, proof that the minority population in a hypothetical election district is large enough to form a “crossover” district does *not* satisfy the first *Gingles* precondition. (See *Bartlett, supra*, 556 U.S. at pp. 12–15.) A district in which minority voters make up less than a majority, but can nevertheless elect a candidate of the minority group’s choice because White voters “cross over” in sufficient numbers to support the minority’s preferred candidate, is referred to as a “crossover district.” (*Id.*, at p. 13.) Notably, that the possibility of drawing an influence or crossover district cannot be used as a basis for asserting a Section 2 violation does not mean that these district types are prohibited. To the contrary, the Supreme Court has acknowledged that state legislative bodies may legitimately consider the use of crossover districts to enhance or protect minority voting interests. (See *id.*, at p. 23 [“Our holding that § 2 does not require crossover districts does not consider the permissibility of such districts as a matter of legislative choice or discretion. Assuming a majority-minority district with a substantial minority population, a legislative determination, based on proper factors, to create two crossover districts may serve to diminish the significance and influence of race by encouraging minority and majority voters to work together toward a common goal.

⁸ The decennial Census does not collect or report data on citizenship. The Census Bureau’s American Community Survey (“ACS”) does collect information on citizenship. ACS data are released in 1-year and 5-year data collection intervals, with smaller units of analysis being released in the 5-year datasets. Based on citizenship data collected by the ACS, the Census Bureau releases a special tabulation of CVAP data by race and ethnicity on census block group geography specifically for Voting Rights Act assessments. The Census Bureau cautions users that this data consists of estimates rather than counts and explains that it cannot be used as an estimate of a specific population at a specific point in time. Because of the requirements of the Voting Rights Act, the Commission needed to use the most readily available and commonly used data in order to make its determinations about whether the Voting Rights Act required the drawing of certain districts. The Commission’s mapping consultant used CVAP data from California’s Statewide Database (which provides the ACS CVAP data by census block) to provide estimates to the Commission and its counsel of the CVAP in any given area. While these CVAP data are not exact, the Commission, with expert guidance from its mapping consultant, exercised its judgment and relied on the CVAP data from the Statewide Database as the best available estimate of the CVAP in a given area.

The option to draw such districts gives legislatures a choice that can lead to less racial isolation, not more.”].)

Further, the *Gingles* “compactness” inquiry focuses on the compactness of the minority population, not the shape of the district itself. (*LULAC*, *supra*, 548 U.S. at p. 433.) “[W]hile no precise rule has emerged governing [*Gingles*] compactness, the inquiry should take into account traditional districting principles such as maintaining communities of interest and traditional boundaries.” (*Ibid.*, quotation marks and citations omitted.)⁹

The second and third *Gingles* preconditions are often referred to collectively as “racially polarized voting” and are generally considered together. Courts first assess whether a politically cohesive minority group exists, i.e., whether a significant number of minority group members usually vote for the same candidates. (*Gingles*, *supra*, 478 U.S. at p. 56.) Then, courts look for legally significant majority bloc voting, i.e., a pattern in which the majority’s bloc vote normally will defeat the combined strength of minority support plus majority crossover votes. (*Ibid.*) This analysis typically requires expert evaluation and evidence regarding prior voting patterns. (See, e.g., *id.*, at pp. 53–74 [considering expert testimony].)

A plaintiff who establishes all three *Gingles* preconditions has not yet established that a challenged district violates Section 2. Instead, once the *Gingles* preconditions have been shown, a court must then consider whether, based on the “‘totality of the circumstances,’ minorities have been denied an ‘equal opportunity’ to ‘participate in the political process and to elect representatives of their choice.’” (*Abrams v. Johnson* (1997) 521 U.S. 74, 90, quoting 52 U.S.C. § 10301(b).)

Courts look to the following non-exhaustive list of factors (the so-called “Senate Factors,” based on the Senate Report accompanying the 1982 amendments to Section 2) to determine whether, based on the totality of circumstances, a Section 2 violation exists:

- (1) “[T]he extent of any history of official discrimination in the state or political subdivision that touched the right of the members of the minority group to register, to vote, or otherwise participate in the democratic process.” (*Gingles*, *supra*, 478 U.S. at pp. 36–37, quoting Sen. Rep. No. 97-417, 2d Sess. (1982), reprinted in 1982 U.S. Code Cong. & Admin. News, pp. 206–207.)

⁹ “Because *Gingles* advances a functional evaluation of whether the minority population is large enough to form a district in the first instance, the Circuits have been flexible in assessing the showing made for this precondition.” (*Sanchez v. State of Colorado* (10th Cir. 1996) 97 F.3d 1303, 1311; see *Houston v. Lafayette County, Miss.* (5th Cir. 1995) 56 F.3d 606, 611.)

- (2) “[T]he extent to which voting in the elections of the state or political subdivision is racially polarized.” (*Id.*, at p. 37.)
- (3) “[T]he extent to which the state or political subdivision has used unusually large election districts, majority vote requirements, anti-single shot provisions, or other voting practices or procedures that may enhance the opportunity for discrimination against the minority group.” (*Ibid.*)
- (4) “[I]f there is a candidate slating process, whether the members of the minority group have been denied access to the process.” (*Ibid.*)
- (5) “[T]he extent to which members of the minority group in the state or political subdivision bear the effects of discrimination in such areas as education, employment and health, which hinder their ability to participate effectively in the political process.” (*Ibid.*)
- (6) “[W]hether political campaigns have been characterized by overt or subtle racial appeals.” (*Ibid.*)
- (7) “[W]hether the number of districts in which the minority group forms an effective majority is roughly proportional to its share of the population in the relevant area.” (*LULAC*, *supra*, 548 U.S. at p. 426.) “[T]he proper geographic scope for assessing proportionality [is] statewide.” (*Id.*, at p. 437.)

If, under the above-described analysis, a jurisdiction has the obligation to draw one or more districts, any such district must ensure that the voters of the relevant protected group have an effective opportunity to elect candidates of choice. (See *LULAC*, *supra*, 548 U.S. at pp. 428–429 [tying the existence of a violation to efforts that “prevented the immediate success of the emergent Latino majority”].) This is measured not by a single election, but rather by the ability of the voters of the protected group to consistently control the outcome of elections in the district.

The proportion of minority voters within a district necessary to yield a consistent effective opportunity to elect candidates of choice is not a number that can be assessed in the abstract. In some cases, based on turnout or other considerations, a district may have to substantially comprise more than 50% minority voters to yield an effective opportunity district; in other cases, by contrast, because of local political conditions, a district may be an effective opportunity district for the minority community even with less than a majority of voters.

b. The Commission’s Compliance

With the legal framework of Section 2 of the Voting Rights Act in mind, the Commission—with the assistance of its line drawing team and VRA counsel—initially worked to identify areas of the state in which, at least potentially, the first *Gingles* precondition was met—that is, areas of the state where a geographically

compact concentration of a single minority group could form a majority (50% or greater CVAP) of voters in an Assembly, Senate, or congressional district. For this exercise, the identification of *Gingles* 1 areas was not limited by traditional redistricting principles. Instead, the Commission analyzed any area with a potential *Gingles* 1 district that was above the minority population threshold of 50% plus one person, no matter the shape of the district or other geographical or community-of-interest considerations. Based on population statistics, the Commission also included possible coalition districts for further analysis.

In the areas so identified, the Commission next sought to analyze whether racially polarized voting (RPV) existed in these areas. As noted above, RPV is said to exist when minority and majority voters systematically vote for different candidates. Both groups therefore express different candidates of choice. The second *Gingles* precondition is designed to examine *minority* voting patterns and the existence of polarization around preferred candidates; the third *Gingles* precondition is designed to evaluate *majority* voting patterns, especially as they relate to minority voting patterns in the same area.

As is well known, we maintain a secret ballot in the United States, so it is impossible to simply tally up and compare how different racial groups voted in any given election. Instead, RPV analysis relies upon ecological measures in an effort to assess voting patterns. Ecological analyses use aggregate data to make inferences about voting behavior at the individual level. More specifically here, RPV analysis uses vote and demographic data aggregated into precincts in order to infer how voters behave.

With the Commission's approval, VRA counsel hired RPV expert Dr. Megan Gall to help evaluate the existence and degree of racially polarized voting in the areas of the state where the Commission had identified significant minority concentrations and to assist counsel in forming its legal judgment about Section 2-required districts. For her analyses, Dr. Gall used data from the Statewide Database, which houses Census, voting, registration, and geographic data sets for statewide elections beginning in 1992. Consistent with all RPV methodologies, these analyses were based on precinct level data; demographic data reflected the citizen voting age population.

There are a number of statistical methods available to test for the presence of RPV in a jurisdiction, and all of them were employed, to one degree or another, in the Commission's California RPV analysis. The first method examines homogenous precincts. This is a primitive test that ascribes the voting patterns observed in the most homogenous precincts (i.e., those precincts with the greatest percentage of voters with similar racial and ethnic characteristics) to the jurisdiction as a whole. The second method is a bivariate regression analysis called ecological regression (ER), which summarizes the relationship between the racial or ethnic composition of the jurisdiction and the election results for candidates. In certain circumstances, however, ER can produce estimates outside the bounds of logic; for example, ER

models can estimate that a racial group voted for a candidate at levels above 100% or below 0%, both real-world impossibilities.

The third and most predominant technique is called Ecological Inference (EI), developed by Gary King. EI has been approved as an appropriate RPV methodology by the courts and remains a staple in RPV analysis today. EI combines ER with a method of bounds first developed in 1953¹⁰ in order to create a method that keeps results inside of real-world logical boundaries. Finally, Ecological Inference Rows by Columns (EI RxC) is the most recent methodological advance in RPV analysis, allowing for the modeling of two or more candidates and two or more demographic groups.¹¹

The RPV analysis examined elections conducted in the areas identified as relevant for the redistricting efforts across all Congressional, State Senate, State Assembly, and State Board of Equalization districts over the past ten years. (Assembly and Congressional contests take place every two years; Senate contests occur every four years, with odd- and even-numbered districts alternating election years.) Overall, the RPV analysis incorporated the results of some 735 separate electoral contests held from 2012 to 2020 and included both primary and general elections, as well as both endogenous and exogenous elections.¹² Like all RPV analyses, the Commission's analysis sought to identify and discern consistent patterns of racial bloc voting based on the prior decade's election results, taking into account shifting demographic trends and discounting the inevitable "outlier" elections in favor of the more reliable and generalizable findings.

The preliminary results of the RPV analysis were memorialized in a series of maps that were posted on the Commission's website and that are included in Appendix 7 (Maps 1-5). Generally speaking, levels of RPV varied by demographics and region across the state, but certain patterns emerged: Areas in the Central Valley and Southern California indicate Voting Rights Act ("VRA") considerations were likely present in those regions, with the Antelope Valley, the Gateway Cities, and San Gabriel Valley being the areas where VRA considerations most likely exist in Los Angeles. VRA considerations were likely less relevant in drawing districts in the Bay Area and the Central Coast, and minority populations were generally not

¹⁰ See Duncan, Otis Dudley & David, Beverly, *An Alternative to Ecological Correlation* (1953) 18 *American Sociological Review*, at pp. 665–66.

¹¹ See Rosen, Ori, et. al. *Bayesian and Frequentist Inference for Ecological Inference* (2001) 55 *Statistica Neerlandica* 2, at pp. 134–56.

¹² Endogenous elections refer to elections in the specific jurisdiction under consideration; exogenous elections refer to elections with jurisdictional boundaries that extend outside of, or overlap with, the endogenous jurisdiction under consideration (e.g., when examining an Assembly district, Senate and Congressional districts in the same area are considered exogenous elections).

large enough in Northern and Eastern California to create VRA obligations in those regions. For the most part, the RPV findings were similar across Assembly, Senate, and Congressional districts.

More specifically, Map 1 highlights the areas that show where all three *Gingles* preconditions were determined to have been met for the current (2012-2020) State Assembly districts. (The bold lines are county boundaries.) Dark red indicates areas where all three *Gingles* preconditions are likely met. The swath through the Central Valley area and in southern California stands out in this respect. Portions of Los Angeles County likely met all three preconditions, including areas in and around portions of the Antelope Valley, the Gateway Cities, and San Gabriel Valley. Current Assembly districts in the Bay Area and into the Central Coast area, including San Francisco, San Mateo, Alameda, Santa Clara, Santa Cruz, San Benito, and Monterey counties, likely only satisfied *Gingles* 1 and 2, but not 3. The same preliminary result was found in several Assembly districts around South and Central Los Angeles, one district in Orange County, and one district in San Diego County.

Map 2 in Appendix 7 highlights the areas that show which *Gingles* preconditions were met for state Senate contests in the existing Senate district configurations. The dark blue areas are the Senate districts where all three *Gingles* preconditions are likely met. The geographic patterns largely mimic what was observed in Map 1's display of Assembly districts: All three *Gingles* preconditions are likely met in the Central Valley area and down through the southern part of the state. The exceptions are a handful of Senate districts in Los Angeles that likely only demonstrate *Gingles* 1 and 2. These districts overlap with the Assembly districts in Los Angeles that also do not likely demonstrate the existence of all three *Gingles* preconditions. As with the Assembly districts, the Bay Area and parts of the Central Coast likely satisfy *Gingles* 1 and 2, but not 3.

Map 3 displays the *Gingles* preconditions findings for the current Congressional districts. The areas where all three *Gingles* preconditions are likely met are colored in dark green. Most of the patterns observed in the State Assembly and Senate districts hold for Congressional districts, as well, with a few exceptions. The northern part of the Central Valley and areas throughout Southern California likely met all three *Gingles* preconditions. Congressional Districts 23 (Tulare and Kern county area) and 36 (Riverside county) appear to be exceptions, but in both cases, the district has been held by one person during the past decade and thus incumbency is likely a complicating factor. As seen in the Assembly and State Senate analyses, the Bay Area and northern part of the Central Coast likely satisfy *Gingles* 1 and 2, but not necessarily *Gingles* 3. The same is true for several Congressional districts in Los Angeles. This pattern, too, mimics the findings in other jurisdictions.

Map 4 in Appendix 7 overlays all of the likely *Gingles* determinations across Assembly, Senate, and Congressional districts. The darkest areas illustrate

overlapping findings; areas in lighter shades indicate areas where some, but not all, of the preconditions were met. Finally, Map 5 isolates the areas where all 3 *Gingles* preconditions were likely met for all existing Assembly, Senate, and Congressional districts in the area, once again providing a visual display of where RPV most likely exists across the state.

Following the completion of the preliminary RPV analysis in October 2021, further analyses were conducted in certain selected districts and areas for which the preliminary RPV analysis had yielded somewhat mixed or inconclusive results (such as where analyses of elections in overlapping Assembly, Senate, or Congressional districts were not fully consistent) or in which more precise geographical distinctions might be needed to be drawn (such as where an existing state Senate district included “pockets” of minority populations that might qualify for protection under the VRA even if the current district as a whole did not satisfy all three *Gingles* preconditions). The additional analyses included RPV analyses of recent exogenous statewide primary and general elections, a more detailed examination of voting and population data in the affected precincts, public input from stakeholders in the impacted areas, and historical considerations, including prior coverage for some areas under Section 5 of the Voting Rights Act. The results of these additional analyses, which are portrayed pictorially in Map 6 and Map 7 of Appendix 7, confirmed the existence of RPV and resulting VRA considerations in two existing Congressional districts in Los Angeles and Orange Counties (but not in two other Los Angeles County Congressional districts) and allowed for a refinement in the geographic identification of the VRA-protected minority population in San Benito and Monterey Counties.

The final conclusions from all of these RPV analyses are incorporated into Map 8 in Appendix 7, which shows the geographic areas in the state where, in the judgment of VRA counsel based upon consideration of the totality of the circumstances, all three *Gingles* preconditions were determined to have been satisfied in an existing Assembly, Senate, or Congressional district. In sum, racially polarized voting was found to exist between Latino voters and non-Latino voters in all or certain portions of the counties of San Joaquin, Stanislaus, Merced, Madera, San Benito, Monterey, Fresno, Kings, Tulare, Kern, Los Angeles, San Bernardino, Riverside, Orange, San Diego, and Imperial. With respect to other minority voters, the RPV analyses presented strong evidence that the three *Gingles* preconditions were likely satisfied in a portion of the San Gabriel Valley of Los Angeles County for Asian voters.¹³

¹³ The relative dearth of additional districts where the *Gingles* preconditions were satisfied with respect to Asian and Black voters is primarily the result of these voters being geographically dispersed, lacking political cohesion, or benefitting from significant cross-over voting from majority White voters.

In addition to the RPV analyses, the Commission and its VRA counsel considered public input, testimony received in educational presentations, academic papers, and published reports that documented and provided ample evidence that social and historical conditions compounded racially polarized voting to provide Latino and Asian voters less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice throughout the state. While California is the most diverse state in the country and there is a rich history of African American, Asian American, and Latino presence and culture, the history of voting rights discrimination in California is well documented. Accordingly, the “totality of the circumstances,” as outlined in the above-mentioned Senate Factors, fully supported the drawing of districts designed to provide Latino and Asian voters with the opportunity to elect candidates of their choice.

For example, Albert Camarillo, a Stanford University historian, previously catalogued the history of discrimination against Latinos in California. (Camarillo, Albert M., Expert Witness Report, *Cano v. Davis*, CV 01-08477 MMM (RCx) (C.D. Cal. 2002), Apr. 12, 2002, pp. 3-20, available at www.wedrawthelinesca.org/final_maps_report.) In that report, Professor Camarillo details the manner in which Mexican Americans soon after statehood “fell victim to discriminatory policies and practices that defined them as a second class, racial minority group.” (*Id.*, at p. 3.) In every sphere of life, he recounts, “Mexican Americans were pushed to the margins of society in the half century after California was admitted to the Union.” (*Ibid.*) This process of marginalization included “land loss, political exclusion, residential segregation, economic inequality, and social ostracism.” (*Ibid.*) By the end of the nineteenth century, “it was rare to find a Spanish-surname elected official anywhere in southern California towns and cities,” and “Mexican Americans were a disenfranchised minority population whose right of suffrage and other civil rights as American citizens, guaranteed by the Treaty of Guadalupe Hidalgo, had been violated and abridged.” (*Id.*, at p. 5.) Professor Camarillo’s report also outlines official discrimination that has taken place within recent memory and details, for example, the racial appeals of political campaigns during Pete Wilson’s governorship and how Propositions 187 (a statewide initiative that sought to restrict public services and education to undocumented immigrants and their children) and 209 (an anti-affirmative action statewide initiative) contributed to an anti-Latino climate in California. (*Id.*, at p. 17.) The published literature on voting discrimination in California echoes Professor Camarillo’s conclusions. (E.g., Avila, Joaquin G., Lee, Eugene, & Ao, Terry, *Voting Rights in California: 1982-2006* (2007) 17 Southern California Review of Law and Social Justice 1, 131, available at www.wedrawthelinesca.org/final_maps_report.)

Regarding the extent to which members of protected groups bear the effects of discrimination, Latino and Black Californians continue to experience disparities in education, employment, and health. For example, according to a CalMatters June 2020 report that cites data from the California Department of Education, Black and

Latino students significantly trail their White and Asian American counterparts in meeting the state's reading and math standards, graduation rates, and college-readiness. (Cano, Ricardo & Hong, Joe, *Mind the Achievement Gap: California's Disparities in Education, Explained*, CalMatters (Feb. 3, 2020) (updated Dec. 21, 2021) available at www.wedrawthelinesca.org/final_maps_report.) Perhaps no fact is as evocative and representative of persistent health disparities as the outcomes that have resulted from the recent and ongoing global pandemic. As of November 2021, data from the Kaiser Family Foundation shows that Latino and Black Californians are overrepresented by approximately 115 percent and 140 percent, respectively, in their share of deaths due to COVID-19 relative to their share of the population. (*COVID-19 Deaths by Race/Ethnicity*, Kaiser Family Foundation (Nov. 10, 2021), available at www.wedrawthelinesca.org/final_maps_report.) Moreover, a report from the Public Policy Institute of California ("PPIC") found that although "the Latino poverty rate has fallen from 30.9% in 2011, Latinos remain disproportionately poor—comprising 51.6% of poor Californians but only 39.7% of the state population." (Bohn, Sarah et al., *Poverty in California*, PPIC (July 2021), available at www.wedrawthelinesca.org/final_maps_report.) Indeed, a 2020 report from UC Berkeley's Labor Center concluded that Latino workers have the highest rate of employment in front-line, low-wage, essential jobs and are particularly overrepresented in occupations in agriculture, construction, trucking, food preparation, and janitorial services. (Thomason, Sarah & Bernhardt, Annette, *Front-line Essential Jobs in California: A Profile of Job and Worker Characteristics*, UC Berkeley Labor Center (May 14, 2020), available at www.wedrawthelinesca.org/final_maps_report.)

Although not directly applicable to the Commission's redistricting effort, recent studies and litigation in California relating to at-large electoral systems by local governments provide an example of the extent to which voting in California has been racially polarized, and to which certain electoral practices have enhanced opportunities for discrimination against minority groups. (See, e.g., *Gingles*, *supra*, 478 U.S. at p. 47 ["This Court has long recognized that multimember districts and at-large voting schemes may operate to minimize or cancel out the voting strength of racial minorities in the voting population."], internal quotations omitted.) In response to this well-documented concern, the state legislature enacted the California Voting Rights Act to address the specific and continuing harm of vote dilution caused by racial polarization in at-large election systems. Under the law, a violation is established if it is shown that racially polarized voting occurs in elections for members of the challenged governing body of the political subdivision or in elections incorporating other electoral choices by voters of the political subdivision. Since the law's enactment in 2002, hundreds of cities, school districts, community college districts, and special districts have abandoned at-large elections and transitioned to district-based elections as a result of a court order, under the threat of litigation, or voluntarily. (See *NDC and the California Voting Rights Act*

(CVRA), National Demographics Corporation (May 20, 2020), available at www.wedrawthelinesca.org/final_maps_report.)

Regarding the extent to which members of minority groups have been elected to public offices, Latinos remain underrepresented in California. A recent analysis from the PPIC found that, as of December 2020, 62% of the state's congressional delegation and 54% of state legislators are White. (Paluch, Jennifer, *Diversity in the California Statehouse*, PPIC (December 17, 2020), available at www.wedrawthelinesca.org/final_maps_report.) By contrast, only 25% of state legislators are Latino, despite Latinos now constituting almost 40% of the total population and almost 30% of the citizen voting-age population in California.

The history of official discrimination against Asian Americans in California is just as long. Until it was made void by the federal Civil Rights Act in 1870, a discriminatory tax levied only on foreign miners (most of whom were Chinese) generated between one-fourth and one-half of California's total state revenue. (Ancheta, A.N., *Race, Rights, and the Asian Experience* (2d ed., 2006), p. 28.) During the nineteenth century, the California Legislature passed laws explicitly named and designed to promote White supremacy, barred Asian Americans from attending public schools, abridged rights to own property, and California's Supreme Court held that a Chinese witness could not testify against a White defendant in a criminal trial. (*Id.*, at pp. 28–30.) Perhaps the most notorious form of discrimination against an Asian American community during the twentieth century was the forced relocation and internment of Japanese Americans during World War II. (*Id.*, at p. 30.) And even after the 1960s, with the passage of expansive legislation prohibiting racial discrimination, anti-immigrant sentiment and legislation have not only appeared, but have become more prominent. (*Id.*, at p. 41.) In fact, according to Angelo Ancheta, a well-published legal scholar and author of *Race, Rights, and the Asian American Experience*, the 1990s and 2000s “witnessed nativist scapegoating that rivals the explicitly racist rhetoric of the late nineteenth and early twentieth centuries” and the subordination of Asian Americans “by government persists in the form of anti-immigrant laws having adverse effects on Asian Americans.” (*Id.*, at pp. 20, 41.) Moreover, analysis from PPIC found that, compared to White people, a greater share of California's Asian American and Pacific Islanders population is poor. (Bohn, *supra*, available at www.wedrawthelinesca.org/final_maps_report.)

The Commission also heard significant public testimony that an overwhelming majority of Asian Americans living in Los Angeles County are foreign-born and face significant language barriers to political participation and accessing social services, and that a history of racial tension plagues the area. Indeed, in early 2021, a study by the Center for the Study of Hate & Extremism at California State University, San Bernadino revealed that anti-Asian hate crimes surged in Los Angeles County by 115% in 2020. (*Report to the Nation: Anti-Asian Prejudice & Hate Crime*, Center for the Study of Hate & Extremism (April 28, 2021), p. 3, available at www.wedrawthelinesca.org/final_maps_report.)

Based on all of this information, the Commission determined it had the obligation to draw several districts where populations of minority voters were given an effective opportunity to elect candidates of their choice. To accomplish this task, the Commission employed both racial/ethnic data and traditional redistricting criteria to the extent practicable. In particular, the Commission focused its efforts on trying to group neighborhoods, communities, and cities together based on shared interests and commonalities, including social, economic, cultural, and geographic factors. The Commission obtained this information by evaluating public input, publicly available information and data (including Census figures), and by considering the Commissioners' own personal knowledge of the relevant areas as informed by their public outreach and engagement efforts.

Further, in analyzing the proportion of minority voters within a district necessary to yield an effective opportunity to elect candidates of choice, the Commission assessed, on a district-by-district basis, such factors as past election results, turnout figures, registration numbers, the degree of racial polarization, and public input from members of the affected communities. Decisions as to how best to create these effective districts were often very difficult. For example, the Commission determined, as did all other public stakeholders who provided proposed maps, that it was possible to draw only two effective majority-minority Latino Senate districts in the Central Valley area, yet these two districts could not possibly cover the entirety of the Latino population in the Central Valley in areas that arguably had VRA obligations. As such, the Commission drew districts that it believed were most effective in meeting its VRA obligations, informed by population analysis, voting histories, and considerable public input.

As a result of this process, among the 176 districts it was charged with drawing, the Commission drew 42 districts to address VRA obligations—19 Assembly districts, 9 Senate districts, and 14 congressional districts. These districts are Assembly Districts 27, 29, 31, 33, 35, 36, 39, 45, 48, 49, 50, 53, 56, 58, 60, 62, 64, 68, and 80; Senate Districts 14, 16, 18, 22, 29, 30, 31, 33, and 34; and Congressional Districts 13, 18, 21, 22, 25, 31, 33, 35, 38, 39, 42, 44, 46, 52. One of the districts, Assembly District 49, was drawn to provide Asian American voters an opportunity to elect candidates of their choice. The remainder of the districts were drawn to provide Latino voters the opportunity to elect candidates of their choice. Detailed descriptions of and information regarding these districts are included with the discussion of all newly drawn districts later in this report, as well as in the accompanying data, appendices, and maps.

2. Section 5 of the Voting Rights Act

A core provision of the Voting Rights Act is the “preclearance” requirement found in Section 5, which prohibited certain jurisdictions from implementing any changes affecting voting without receiving prior approval from the Department of Justice or a federal district court in Washington, D.C. A different section of the VRA, Section 4(b), contains the “coverage formula” that determines which

jurisdictions Section 5 applies to. However, in 2013, the Supreme Court held that the coverage formula in Section 4(b) is unconstitutional. (*Shelby County, supra*, 570 U.S. at p. 557.) Accordingly, there are no jurisdictions currently covered by Section 5, and jurisdictions previously covered by the Section 4(b) formula do not need to seek preclearance for new voting changes, such as redistricting plans, absent enactment of a new coverage provision. In prior redistricting cycles, Section 5 applied to Kings, Merced, Monterey, and Yuba counties, and California was required to submit any statewide voting-related change that affected these counties for pre-clearance. (E.g., *Lopez v. Monterey County* (1999) 525 U.S. 266, 287.) At present, the only jurisdictions that need to seek preclearance for redistricting plans (or other changes in methods of election) are those covered for such changes by a current federal court order entered under Section 3(c) of the VRA. (52 U.S.C. § 10302(c).) The State of California is not among those jurisdictions.

C. Criterion Three: Geographic Contiguity

The Commission's third criterion is that "[d]istricts shall be geographically contiguous." (Cal. Const. art. XXI, § 2, subd. (d)(3).)

The California Supreme Court has endorsed a "functional" approach to contiguity as it appeared in prior iterations of the Constitution. (See *Wilson v. Eu* (1992) 1 Cal.4th 707, 725 [approving special masters' "concept of functional contiguity and compactness"].) Although there is no judicial decision interpreting the term "contiguous" after the adoption of Propositions 11 or 20, the Commission has relied on commonly accepted interpretations of contiguity that focus on ensuring that areas within a district are connected to each other.

All of the Commission's districts comply with the geographic contiguity criterion. Historically, several islands that lie off the California coast (e.g., Santa Catalina Island, the Farallon Islands, and the Channel Islands) have formed portions of California counties—these islands traditionally have been maintained in Congressional, legislative, or Board of Equalization districts that contain all or part of such counties. The islands satisfy contiguity requirements by being contiguous by water travel. The Commission employed a functional approach to contiguity, relying on forms of water travel, such as regularly scheduled ferryboats, to maintain contiguity within a district.

D. Criterion Four: Geographic Integrity

The Commission's fourth criterion provides:

The geographic integrity of any city, county, city and county, local neighborhood, or local community of interest shall be respected in a manner that minimizes their division to the extent possible without violating the requirements of any of the preceding subdivisions. (Cal. Const., art. XXI, § 2, subd. (d)(4).)

To determine the boundaries of cities, counties, and the City and County of San Francisco, the Commission relied on 2020 Census geography. In addition, the Commission relied on appropriate municipal data such as planning department boundaries or neighborhood council boundaries to help determine the boundaries of some neighborhoods in major cities such as Los Angeles, San Diego, and San Francisco.

A “community of interest” is “a contiguous population which shares common social and economic interests that should be included within a single district for purposes of its effective and fair representation.” (Cal. Const., art. XXI, § 2, subd. (d)(4).) The Constitution provides several examples of such shared interests, including

those common to an urban area, a rural area, an industrial area, or an agricultural area, and those common to areas in which the people share similar living standards, use the same transportation facilities, have similar work opportunities, or have access to the same media of communication relevant to the election process. (*Ibid.*)

Notably, communities of interest are not based on “relationships with political parties, incumbents, or political candidates.” (*Ibid.*)

Public input is critical to respecting the geographic integrity of communities of interest, so the Commission launched the innovative public engagement tool, described above, that allowed Californians to tell the Commission about their communities, draw them on a map, and submit their comments directly to the Commission. To capture anecdotal information used to shape the boundaries of a community, users were prompted to describe the shared interests of their community, what brings people in their community together, and what their community finds important. Users were specifically asked whether there were nearby areas that their community would prefer to be in a district with or separated from. In total, the Commission received more than 3,085 submissions through its online and Paper COI Tools, not including thousands of submissions providing community-of-interest testimony at public meetings or responding to visualizations or draft maps.

Because identifying communities of interest depended on public input rather than the Census or municipal data the Commission could use for identifying other geographic areas, the Commission began accepting input from communities of interest even before it had considered specific visualizations of district-sized areas. This was also to preclude any “tailoring” of communities of interest to achieve very specific outcomes, such as the crafting of a specific district nominally for a community of interest but actually for some other, unrelated purpose. This robust public input continued throughout the process.

The Commission sought to minimize the division of geographical units whenever possible by using an iterative approach, in which the Commission deliberated options to minimize the splitting of cities, counties, neighborhoods and communities of interest district by district. However, because the California Constitution does not require the Commission to prioritize the geographic integrity of “any city, county, city and county, local neighborhood, or local community of interest” relative to each other, there is often no clear or ideal way to resolve competing claims between these various entities. For example, maintaining the geographical integrity of a community of interest might involve bisecting a county or small city. To resolve these challenging mapping realities, the Commission paid careful attention to instances when maintaining the geographical integrity of a particular geographic unit could aid in satisfying other statutory criteria.

E. Criterion Five: Geographic Compactness

The Commission’s fifth criterion states:

To the extent practicable, and where this does not conflict with the criteria above, districts shall be drawn to encourage geographical compactness such that nearby areas of population are not bypassed for more distant population. (Cal. Const., art. XXI, § 2, subd. (d)(5).)

As conveyed in the Commission’s California Redistricting Basics presentation, the concept of compactness is subordinate to the higher-ranked criteria. Indeed, the Commission’s districts are geographically compact under the definition of compactness within the Act, both to the extent practicable and in consideration of other higher-ranked criteria such as compliance with the United States Constitution, the federal Voting Rights Act, geographic contiguity, and maintaining the geographic integrity of cities, counties, local neighborhoods, and local communities of interest.

F. Criterion Six: Nesting

The Commission’s sixth criterion states:

To the extent practicable, and where this does not conflict with the criteria above, each Senate district shall be comprised of two whole, complete, and adjacent Assembly districts, and each Board of Equalization district shall be comprised of 10 whole, complete, and adjacent Senate districts.” (See Cal. Const., art. XXI, § 2, subd. (d)(6).)

Simply put, this criterion indicates a constitutional preference for plans for Senate and Board of Equalization districts that are “nested,” provided it would not conflict with higher-ordered criteria.

The Commission’s final maps attempted to nest two whole Assembly districts within a single Senate district, where practicable, and ten whole Senate districts within a single Board of Equalization District, where practicable. In most instances,

however, the Commission achieved only partial nesting in order to comply with higher-ranked criteria, such as compliance with the Voting Rights Act or minimizing the division of cities and counties within Senate and Board of Equalization districts. Nevertheless, the Commission achieved significant partial nesting, or “blended” Senate districts with substantial portions of two Assembly districts put together in one Senate district. This allowed the Commission to best comply with the higher-ranked criteria and repair unavoidable splits that occurred in the Assembly districts.

Specifically, one of the Commission’s Senate districts is 100% nested. Twelve of the Senate districts are between 90% and 99.9% nested. Seven of the Senate districts are between 80% and 89.9% nested. Sixteen of the Senate districts are between 70% and 79.9% nested. Three of the Commission’s Senate districts are between 65% and 69.9% nested. The final Senate district is 52.3% nested.

All of the Board of Equalization districts are between 77.4% and 81.1% nested and were adjusted only to respect the borders of counties and cities.

G. No Consideration of Incumbent Status

Article XXI, section 2, subdivision (e) of the California Constitution states:

The place of residence of any incumbent or political candidate shall not be considered in the creation of a map. Districts shall not be drawn for the purpose of favoring or discriminating against an incumbent, political candidate, or political party.

(See also *id.*, § 2, subd. (d)(4) [“Communities of interest shall not include relationships with political parties, incumbents, or political candidates.”].) The Commission gave no consideration to incumbent status, partisan registration, or residences of candidates or incumbents when drawing districts.

H. Numbering of Districts

The California Constitution provides that California’s 40 Senators are elected to four-year terms, half of which begin every two years. (Cal. Const., art. IV, § 2, subd. (a).) Under this system, 20 of California’s Senate seats are up for election every two years. The next Senate election—in 2022—will apply to all of the even-numbered Senate districts, while odd-numbered Senate districts are up for election in 2024.

Because all of the even-numbered Senate district seats will be up for election in 2022, the Commission took note of the following practical issue: following the release of the new maps, some Californians who had voted in Senate elections in 2018 and would have been eligible to vote again in 2022, because they had been in an even-numbered district, might have to wait until 2024 to vote, because they would subsequently be in an odd-numbered district after the decennial redistricting. This issue is commonly known as “deferral.” Conversely, other Californians who had

voted in Senate elections in 2020 and would have been eligible to vote again in 2024, because they had been in an odd-numbered district, might be able to vote two years earlier in 2022, because they would subsequently be in an even-numbered district. This is commonly known as “acceleration.”

In light of these issues, the Commission chose a numbering alternative for Senate districts that best maintained continuity in terms of the placement of voters in odd and even numbered districts. In other words, if a voter lived in an odd-numbered Senate district during the last decade, the Commission chose the numbering alternative that maximized the likelihood that this same voter would remain in an odd-numbered Senate district for the next decade, thereby minimizing accelerations and deferrals.

VI. DETAILS ABOUT THE DISTRICTS

Set forth below is a discussion of each of the statewide maps for State Assembly, State Senate, State Board of Equalization, and California’s Congressional delegation. Below is an overview of some considerations and includes references to some of the important issues and decisions made for each district.

Details about each district are provided in the data Appendices attached to this report. In addition, interactive maps are available on the Commission’s website (www.wedrawthelinesca.org). The official version of the final maps and accompanying data are being timely delivered to the Secretary of State.

A. Map Overviews

California is the most diverse state in the nation and the third largest by landmass. And though it also remains by far the most populous state, the Commission had to consider many demographic shifts in the decennial process of redistricting, including the reduction of California’s Congressional delegation (from 53 to 52). To realize its mission of creating fair representation for Californians, and to fully understand the contours of various communities of interest, the Commission also considered natural topography, ecological zones, and industrial/economic interests that define communities, as well as transportation corridors that either link or serve as barriers to access.

The 80 Assembly districts have an ideal population of around 500,000 people each, and in consideration of population equality, the Commission chose to limit the population deviation range to as close to zero percent as practicable. With these districts, the Commission was able to respect many local communities of interest and group similar communities; however, it was more difficult to keep densely populated counties, cities, neighborhoods, and larger communities of interest whole due to the district size and correspondingly smaller number allowable in the population deviation percentage.

Each of the 40 Senate districts has an ideal population of nearly one million people and represents the largest state legislative districts in the nation. In

consideration of population equality, the Commission chose to limit the population deviation as close to zero percent as practicable. Per the California Constitution, the Commission strived to nest two Assembly districts where practicable. However, higher ranking criteria made this difficult in practice.

While the size of the Senate districts allowed the Commission to recognize broadly shared interests, these interests did not always overlap exactly with the interests of smaller communities recognized in the related Assembly districts. Based on the large number of people in each district, there were a variety of different interests that were balanced and included.

The four Board of Equalization (BOE) districts have a population larger than most other states in the country. In consideration of population equality, the Commission chose to limit the population deviation to under 2%. The BOE is responsible for property tax programs, the alcoholic beverage tax, the tax on insurers, and the private railroad car tax, including conducting appraisals and audits of state-assessed public utility companies and railroad companies, and ensuring statewide uniformity in the assessment of properties by county assessors. Given this, the Commission recognized the relevant shared interests included business and economic interests. In addition, tax revenues are distributed to counties independent of electoral districts. The Commission's BOE districts reflect a balancing of multiple requirements and interests, including maintaining, to the extent practicable, county, city, neighborhood, and community of interest boundaries. In particular, because the main mission of the BOE focuses on county tax assessment, the Commission attempted to keep counties whole in these districts.

Each of the 52 Congressional districts apportioned to California have an ideal population of 760,066, and the Commission adhered to federal constitutional mandates by requiring a district population deviation of no more than +/- one person. These districts also posed some of the Commission's biggest challenges, and, because of strict population equality requirements, resulted in many more splits of counties, cities, neighborhoods, and communities of interest compared to State Assembly or Senate plans.

B. District Descriptions

1. The Assembly Districts

AD 1 consists of the whole Counties of Alpine, Siskiyou, Sierra, Shasta, Plumas, Lassen, Nevada, and Modoc. Portions of Placer, Amador, and El Dorado Counties are included to balance population while considering communities of interest to maintain a mountainous, more rural district. This district includes the whole Cities of Nevada City, Grass Valley, Mount Shasta, Redding, Fort Jones, Loyalton, Colfax, Tulelake, Portola, Shasta Lake, Montague, Etna, Plymouth, Amador City, Dorris, Dunsmuir, Yreka, Alturas, Susanville, Anderson, Sutter Creek, Weed, South Lake Tahoe, and Jackson, and the town of Truckee. Shared

history and concerns over wildfire protection join these eastern mountain communities, which feature many natural landmarks including Mt. Shasta and Lake Tahoe.

AD 2 consists of the whole Counties of Trinity, Del Norte, Humboldt, and Mendocino, and portions of Sonoma. This district includes the whole Cities of Sebastopol, Crescent City, Ukiah, Blue Lake, Fortuna, Eureka, Cloverdale, Fort Bragg, Ferndale, Arcata, Trinidad, Willits, Rio Dell, Point Arena, Healdsburg, the town of Windsor, and portions of the City of Santa Rosa to equalize population amongst districts. This district includes coastal communities that share environmental concerns and the Highway 101 corridor.

AD 3 consists of the whole Counties of Tehama, Sutter, Yuba, Glenn, and Butte, and portions of Placer. The district includes the whole Cities of Marysville, Chico, Red Bluff, Tehama, Corning, Willows, Wheatland, Live Oak, Gridley, Biggs, Oroville, Yuba City, Orland and the town of Paradise and portions of Lincoln to balance population while considering communities of interest. This district unites agricultural communities that share their workforce and various waterways. This district also joins communities that regularly partner together for fire protection and to offer mutual assistance following wildfires.

AD 4 consists of the whole Counties of Yolo, Napa, Lake, and Colusa, and portions of Sonoma. This district includes the Cities of Clearlake, Yountville, Williams, West Sacramento, Colusa, Sonoma, Lakeport, Winters, Napa, Woodland, Calistoga, Davis, St. Helena, and American Canyon. The communities in this district are bound together by shared waterways and transportation corridors. The wine industry-based communities of Napa and Sonoma Counties are representative of this district's shared interests as agriculturally-focused economies.

AD 5 consists of portions of Placer, Sacramento, and El Dorado Counties, including the whole Cities of Auburn, Placerville, Loomis, Rocklin, and Roseville, and portions of Lincoln to balance population while considering communities of interest. These suburban communities form a distinct economic area and share school districts, a community college district, and their own independent water agency.

AD 6 consists of portions of Sacramento County, including portions of the City of Sacramento, which was split to balance population while considering communities of interest. Downtown Sacramento and the Capitol are featured in this district as well as Sacramento's more northern neighborhoods, which share transit systems and community parks. Communities of interest highlighted in this district also include an LGBTQ+ community and a refugee community spanning across the suburbs of Carmichael and Arden-Arcade.

AD 7 consists of portions of Sacramento County, including the whole Cities of Folsom, Rancho Cordova, and Citrus Heights. Following the American River, these

cities and unincorporated communities of Sacramento County routinely come together in shared school districts and commercial centers. This district is more suburban than the neighboring City of Sacramento and shares concerns related to homelessness.

AD 8 consists of the whole Counties of Inyo, Tuolumne, Mariposa, and Mono, and portions of Fresno, Madera, and Calaveras Counties. This district includes the whole Cities of Sonora, Angels, Bishop, the town of Mammoth Lakes, and portions of the Cities of Clovis and Fresno. Calaveras County is divided to balance population while considering communities of interest; portions of Madera and Fresno foothill communities are added to respect mountainous communities and to balance population. This district keeps Sierra communities together, reflecting shared interests such as watersheds, fire protection, emergency response, and recreation.

AD 9 consists of portions of San Joaquin, Calaveras, Amador, Sacramento, and Stanislaus Counties. This district consists of the whole Cities of Ione, Ripon, Riverbank, Manteca, Galt, Waterford, Oakdale, Lodi, Escalon, Hughson, Isleton, and Lathrop. This district splits San Joaquin, Stanislaus, and Sacramento Counties to balance population while considering communities of interest to put smaller agricultural communities together with foothills communities from Amador and Calaveras.

AD 10 consists of portions of Sacramento County, including the whole City of Elk Grove, and portions of the City of Sacramento, which was split to balance population while considering communities of interest. This district consists of many working-class communities, including the Sacramento neighborhoods of Fruitridge Manor, Lemon Hill, and Florin. Communities in this district are linked by, among other things, their shared school districts and transportation routes.

AD 11 consists of the whole County of Solano and portions of Contra Costa and Sacramento Counties surrounding the Delta. This district includes the whole Cities of Dixon, Suisun City, Fairfield, Benicia, Oakley, Vacaville, Vallejo, and Rio Vista. Solano County and other Delta communities are brought together in this district. Common interests relate to water management, land use, flood control, ecosystem restoration, and agriculture. The area is connected by Interstate 80 and features a strong military community.

AD 12 consists of all of Marin County and portions of Sonoma and San Francisco Counties including the whole Cities of San Rafael, Rohnert Park, Larkspur, Sausalito, Novato, Petaluma, Belvedere, Mill Valley, Cotati, the communities of Corte Madera, Fairfax, Ross, San Anselmo, Tiburon, and portions of the Cities of Santa Rosa. The City of San Francisco has a zero-population split. Sonoma County and the City of Santa Rosa were split to balance population while considering communities of interest. Communities in this district share a small-

town feel, interests in coastal protection and open spaces, and are linked by transportation corridors such as Highway 101.

AD 13 consists of portions of San Joaquin County and the whole Cities of Stockton and Tracy. Splits in other communities of San Joaquin County are made to balance population while considering communities of interest. This district links the Central Valley with communities that border the Delta to the west. These communities are bound together by shared waterways and similar commuting patterns.

AD 14 consists of portions of Alameda and Contra Costa Counties, including the whole Cities of Albany, San Pablo, Hercules, Berkeley, Piedmont, Richmond, Pinole, and El Cerrito, and portions of the City of Oakland. The counties as well as the City of Oakland were split to balance population while considering communities of interest. These communities share service districts, including ones charged with transportation and regional parks. A prominent K-12 school district is also featured in the area, as well as University of California, Berkeley. Additionally, these communities have common interests in housing affordability and environmental issues.

AD 15 consists of portions of Contra Costa County, including the Cities of Concord, Brentwood, Clayton, Martinez, Antioch, Pittsburg, and Pleasant Hill, and portions of the City of Walnut Creek, which was split to balance population while considering communities of interest. Included in this district are a collection of diverse, lower-income, and working-class communities that run along Highway 4.

AD 16 consists of portions of Alameda and Contra Costa Counties, including the whole Cities of Livermore, San Ramon, Orinda, and Lafayette, and the towns of Moraga, and Danville. The Cities of Walnut Creek, Dublin, and Pleasanton were split to balance population while considering communities of interest. This district includes wealthier and culturally similar communities of Lamorinda and the Tri-Valley. These East Bay suburban communities share, among other things, the same commercial centers and transportation corridors.

AD 17 consists of portions of the City and County of San Francisco County. Shared interests include historical, cultural, and community ties as well as socio-economic composition. The Chinatown neighborhood includes working-class communities, many struggling with poverty and housing issues. This district also has a large LGBTQ+ community.

AD 18 consists of portions of San Francisco and Alameda Counties, including the whole Cities of Alameda and Emeryville, and portions of the Cities of Oakland and San Francisco. The City of Oakland had to be split to balance population while considering communities of interest. A zero-population split of the City and County of San Francisco is included to make Alameda Island whole in this district. The communities in this district are bound by shared concerns relating to homelessness,

gentrification, and displacement. This urban area also has a large nonprofit sector, a variety of local businesses, and yearly community events and gatherings, many of which happen around Lake Merritt.

AD 19 consists of portions of San Francisco and San Mateo Counties, including all of Daly City and the town of Colma, as well as portions of the Cities of San Francisco, South San Francisco, and San Bruno. This western San Francisco district maintained the more residential and coastal neighborhoods of San Francisco together with portions of San Mateo County linked by Highway 1 and Interstate 280. This district features multiple parks, including Golden Gate Park and the Presidio of San Francisco, as well as both San Francisco State University and University of California, San Francisco. The communities in this district have shared interests in improving their public transit system and commonly come together at their shared commercial centers and beachfronts.

AD 20 consists of portions of Alameda County, including the whole Cities of Hayward, San Leandro, and Union City, and portions of the Cities of Pleasanton, Dublin to balance population while considering communities of interest. There is a zero-population split of the City of Oakland. Many working families and immigrant communities make up this district, which share interests in small businesses, housing, economic development, and education. The Eden Township is brought together in this district along with communities linked by Highway 580 and Highway 880.

AD 21 consists of portions of San Mateo County, including the whole Cities of San Mateo, Belmont, Millbrae, East Palo Alto, Redwood City, San Carlos, Brisbane, Burlingame, and Foster City, and the town of Hillsborough, and portions of the Cities of San Bruno, Menlo Park, Atherton, and South San Francisco. Splits were made to balance population while considering communities of interest, including communities that share similar social and economic interests.

AD 22 consists of portions of Merced and Stanislaus Counties, including the whole Cities of Newman, Turlock, Ceres, Modesto, Patterson, and Gustine. While this district includes the entire City of Modesto, it splits off north-eastern Stanislaus County in order to keep the City of Oakdale whole in neighboring AD 9. Modesto and Turlock are heavily commuter communities that share transportation corridors (Interstate 5 and Highway 99), water systems for agriculture, and challenges relating to access to healthcare and higher education. This district places rural communities together.

AD 23 consists of portions of San Mateo and Santa Clara Counties, including the whole Cities of Mountain View, Saratoga, Palo Alto, Pacifica, Los Altos, Campbell, and Half Moon Bay, and the towns of Portola Valley, Los Altos Hills, and Woodside, as well as portions of the Cities of Menlo Park, San Jose, and the town of Atherton. Splits were made to balance population while considering communities of interest. This district includes smaller, rural, and agricultural communities, mostly

along the coast, together with Silicon Valley communities. These communities are bound by the shared Caltrain transportation system, the 101 transit corridor, and parks and recreation areas in the Santa Cruz mountains.

AD 24 consists of portions of Santa Clara and Alameda Counties, including the whole Cities of Milpitas, Fremont, and Newark, and portions of the City of San Jose, which was split to balance population while considering communities of interest. This district includes a large immigrant Asian American Pacific Islander community that shares deep cultural and linguistic ties. Many people in this district are employed in the tech industry and rely on Highway 680 and Highway 880 to get to work.

AD 25 consists of portions of Santa Clara County, including portions of the City of San Jose. Splits in this district are made to balance population while considering communities of interest, and to meet obligations under Section 2 of the Voting Rights Act in neighboring districts. This district also keeps together communities of interest connected to Berryessa.

AD 26 consists of portions of Santa Clara County, including the whole Cities of Santa Clara, Cupertino, and Sunnyvale, and portions of the City of San Jose. Santa Clara County and the City of San Jose were split to balance population while considering communities of interest. Cities in this district are the heart of Silicon Valley's tech industry, house Apple headquarters, and support the innovation economy. They share concerns about quality of life and feature large immigrant Asian American communities.

AD 27 consists of portions of Merced, Fresno, and Madera Counties, including the whole Cities of Coalinga, Kerman, San Joaquin, Merced, Mendota, Dos Palos, Madera, Los Banos, Firebaugh, Huron, Atwater, Chowchilla, and Livingston, and portions of the City of Fresno. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. The district splits Fresno and Madera Counties to meet those obligations and to keep communities of interest together. Major commuting and transportation corridors are Interstate 5 and Highway 99. Communities in this district share concerns related to affordable housing, transportation, healthcare, water, broadband accessibility, and access to well-paying jobs.

AD 28 consists of portions of Santa Clara and Santa Cruz Counties, including the whole Cities of Monte Sereno, Morgan Hill, Scotts Valley, and Santa Cruz, the town of Los Gatos, and portions of the City of San Jose. Splits were made to balance population while considering communities of interest. The district configuration honors Santa Cruz's growing ties with Silicon Valley. The district also features University of California, Santa Cruz and its surrounding community.

AD 29 consists of the whole County of San Benito and portions of Santa Clara, Santa Cruz, and Monterey Counties. This district includes the whole Cities of

Hollister, San Juan Bautista, Greenfield, King City, Salinas, Gonzales, Gilroy, and Soledad, and portions of Watsonville. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Counties and the City of Watsonville were split to meet these obligations and to balance population while considering communities of interest. This district includes smaller, rural, and agricultural-based communities that are connected to the larger communities of Watsonville and Gilroy. Communities in the Salinas Valley, which are kept together, have shared housing and transportation concerns.

AD 30 consists of portions of Monterey, Santa Cruz, and San Luis Obispo Counties, including the whole Cities of Sand City, Del Rey Oaks, Morro Bay, Carmel-by-the-Sea, Capitola, Pacific Grove, Atascadero, Seaside, Arroyo Grande, Pismo Beach, Marina, El Paso de Robles (Paso Robles), Monterey, Grover Beach, and San Luis Obispo, and a zero-population split of Watsonville. Splits were made to balance the population and respect communities of interest. This coastal district shares a tourism-based economy and strong ties to higher education institutions, including the Monterey Institute of International Studies and California State University, Monterey Bay.

AD 31 consists of portions of Fresno County, including the whole Cities of Parlier, Selma, Orange Cove, Fowler, and Sanger, as well as portions of the Cities of Fresno, Clovis, and a zero-population split of Reedley. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. The City of Fresno was split to meet these obligations. This district consists largely of the City of Fresno and communities along Highway 99. Eastern communities are connected to metropolitan Fresno via Highway 180. Another major commuter and transportation corridor is Highway 41, which connects southwestern communities to the City of Fresno. This is a culturally diverse district with significant Latino, Hmong, Sikh, Black, and Middle Eastern populations. Shared concerns in these communities include immigrant rights, education, housing, and transportation.

AD 32 consists of portions of Kern and Tulare Counties, including the whole Cities of Exeter, Ridgecrest, Tehachapi, Maricopa, and Taft, and portions of the Cities of Bakersfield and Visalia. The Cities of Bakersfield and Visalia were split to balance population while considering communities of interest. This district's border is impacted by Voting Rights Act obligations in three neighboring districts. The district maintains local communities of interest along the Valley floor. Areas within the district share common social and economic characteristics as well as shared environmental concerns.

AD 33 consists of all of Kings County and portions of Tulare and Fresno Counties, including the whole Cities of Farmersville, Kingsburg, Lemoore, Tulare, Woodlake, Avenal, Porterville, Corcoran, Lindsay, Dinuba, and Hanford, and portions of the Cities of Visalia and Reedley. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits in Fresno and Kern Counties were made to meet these obligations and to balance population while

considering communities of interest. Communities along Interstate 5 in Kings and Kern Counties are maintained together along with many communities connected by Highway 99. Communities in this district share common barriers to employment, affordable housing, and access to higher education.

AD 34 consists of portions of Los Angeles, San Bernardino, and Kern Counties. This district includes the whole Cities of California City, Barstow, Twentynine Palms, Big Bear Lake, and the town of Apple Valley, as well as portions of the Cities of Palmdale, Highland, Hesperia, Victorville, Lancaster, and a zero-population split of Adelanto. The splits in the counties and cities are to balance population while considering communities of interest. This district includes the High Desert communities in San Bernardino County, Apple Valley in Los Angeles County, and the area around California City in Kern County. The communities in these areas share interests and concerns related to desert and mountainous terrain, oil production, aerospace industry, Edwards Air Force Base, Twentynine Palms Marine Corps Base, and the Mojave National Preserve.

AD 35 consists of portions of Kern County including the whole Cities of McFarland, Shafter, Arvin, Delano, and Wasco, and portions of the City of Bakersfield. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. The City of Bakersfield was split to meet these obligations and to keep communities of interest whole. Communities in the western portion of the county along the Interstate 5 corridor are kept together. Shared social and economic characteristics include an agriculture-based economy, and common concerns relate to land use and water accessibility. The district also features large farmworker communities that commute throughout the district for work.

AD 36 consists of all of Imperial County and a large portion of Riverside County, including areas on the eastern and northeastern sides of the Coachella Valley. The district also includes portions of San Bernardino County and the whole Cities of Indio, Calexico, Brawley, Calipatria, Holtville, Imperial, Blythe, El Centro, Coachella, Needles, and Westmorland, and portions of the City of Hemet. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. This district includes tribal lands and communities that run along the California/Arizona border and the United States/Mexico border, which are all connected by environmental and health concerns related to the Salton Sea and agricultural interests. It includes the town of Needles and the surrounding unincorporated area that makes up the Colorado River basin.

AD 37 includes all of Santa Barbara County and portions of San Luis Obispo County. This district includes the whole Cities of Guadalupe, Buellton, Lompoc, Santa Maria, Goleta, Carpinteria, Solvang, and Santa Barbara. This is a coastal district with strong communities of farmworkers to the north, and includes University of California, Santa Barbara.

AD 38 consists of portions of Ventura County, including the whole Cities of Ojai, Port Hueneme, Fillmore, Oxnard, Santa Paula, and San Buenaventura (Ventura), and portions of the City of Camarillo. Camarillo was split to balance population while considering communities of interest to keep Santa Barbara County whole and to keep Simi Valley and Moorpark together. This is a largely coastal district that includes significant immigrant communities. Shared interests include, among other things, agriculture, oil production, and the military.

AD 39 consists of portions of Los Angeles and San Bernardino Counties, including portions of the Cities of Palmdale, Adelanto, Victorville, Hesperia, and Lancaster. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. This district includes working-class communities with shared interests in, among other things, transportation, wildfire safety, the aerospace industry, economic development, and access to higher education.

AD 40 consists of portions of Los Angeles County, including the whole City of Santa Clarita and portions of the City of Los Angeles. Splits in the City and County of Los Angeles are to balance population while considering communities of interest. Communities in this district share interests and concerns related to water, education, traffic, wildfires, and housing.

AD 41 consists of portions of San Bernardino and Los Angeles Counties, including the whole Cities of La Verne, Pasadena, Sierra Madre, La Cañada Flintridge, Bradbury, Claremont, and San Dimas, as well as portions of the Cities of Hesperia, Monrovia, Rancho Cucamonga, Upland, and a zero-population split of Duarte. Other splits in this district were made to balance population while considering communities of interest. This district includes foothill communities of the San Gabriel Mountains. Communities in the region share interests and concerns related to the environment, wildlife management, wildfires, and transportation.

AD 42 consists of portions of Ventura and Los Angeles Counties, including the whole Cities of Westlake Village, Thousand Oaks, Simi Valley, Agoura Hills, Hidden Hills, Calabasas, Malibu, and Moorpark, and portions of the Cities of Los Angeles and Camarillo. Splits in this district were made to balance population while considering communities of interest. This district consists of 40 miles of Pacific coastline, the Santa Monica Mountains, and small communities surrounded by mountains. Communities in this region work together on issues such as transportation, the environment, wildlife protection, and emergency management.

AD 43 consists of portions of Los Angeles County, including the whole City of San Fernando and portions of the City of Los Angeles. Splits in the County and City of Los Angeles were made to balance population while considering communities of interest. This district includes East San Fernando Valley communities that are socially and economically distinct from the Santa Clarita Valley. A network of neighborhood councils advocates for the area within the City of Los Angeles. These

communities are impacted by the Hollywood Burbank Airport and share common challenges, which include noise and air pollution.

AD 44 consists of portions of Los Angeles County, including the whole City of Burbank, and portions of the City of Glendale and San Fernando Valley neighborhoods in the City of Los Angeles, including Sherman Oaks, Studio City, Valley Village, North Hollywood, Toluca Lake, La Crescenta, and Sunland-Tujunga. Splits were made to balance population while considering communities of interest. This area is a high-risk fire district and home to numerous public lands, including the Santa Monica Mountains. The district also includes a large portion of the Hollywood Burbank Airport and is impacted by its flight paths. San Fernando Valley communities have a distinct culture from those on the westside Los Angeles.

AD 45 consists of portions of San Bernardino County, including portions of Fontana, Highland, Rialto, Redlands, San Bernardino, and a zero-population split of Rancho Cucamonga. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. This district's splits were made to meet these obligations and to balance the population while considering communities of interest. This district includes significant working-class communities, major universities, local community colleges, shared transportation issues, and common economic development interests.

AD 46 consists of portions of Ventura and Los Angeles Counties, including portions of the City of Los Angeles. These splits were made to balance population while considering communities of interest. This district includes the West Valley communities of the San Fernando Valley. The region has a distinct culture and has multiple neighborhood councils that advocate on their behalf within the City of Los Angeles. This district is suburban and home to diverse communities and working families.

AD 47 consists of portions of San Bernardino and Riverside Counties, including the whole Cities of Banning, Beaumont, Calimesa, Cathedral City, Desert Hot Springs, Indian Wells, La Quinta, Yucaipa, Palm Springs, Palm Desert, and Rancho Mirage, and the town of Yucca Valley. This district also includes portions of the Cities of Redlands, Highland, and San Jacinto. The splits in the district were to balance the population while considering communities of interest. This district includes a significant portion of the Coachella Valley and features the Joshua Tree National Park, a tourism-based economy, rapid population growth, and infrastructure and transportation issues.

AD 48 consists of portions of Los Angeles County, including the whole Cities of Covina, Irwindale, West Covina, Baldwin Park, Azusa, and Glendora, as well as portions of Monrovia and Duarte. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. The district's boundaries were drawn to meet these obligations, to balance population while considering communities of interest. This district consists of Eastern San Gabriel Valley

communities that have significant Latino and Asian American and Pacific Islander populations. Communities in this district share transportation corridors and concerns related to healthcare, wildfires, forest management, wildlife, and watersheds.

AD 49 consists of portions of Los Angeles County, including the whole Cities of San Marino, South Pasadena, Temple City, Alhambra, Rosemead, Monterey, San Gabriel, and Arcadia, and portions of the City of El Monte. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. The district's boundaries were drawn to meet those obligations, to balance population while considering communities of interest. This district consists of West San Gabriel Valley cities that are home to significant Asian American and Pacific Islander and Latino communities. The district includes a large transportation hub, the El Monte Station. Common concerns and interests across this district include language access, immigrant rights, education, economic development, homelessness, and housing affordability.

AD 50 consists of portions of San Bernardino County, including the whole Cities of Loma Linda and Colton, and portions of the Cities of San Bernardino, Redlands, Rialto, Rancho Cucamonga, Fontana, and Ontario. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. The district's boundaries were drawn to meet those obligations, to balance population while considering communities of interest. This district consists of multi-ethnic communities that share concerns related to affordable housing, wildfires, and rural living.

AD 51 consists of portions of Los Angeles County, including the whole Cities of Beverly Hills, West Hollywood, and Santa Monica, and portions of the City of Los Angeles. Splits in the County and City of Los Angeles were made to balance population while considering communities of interest. This district includes LGBTQ+ communities and is home to entertainment, tourism, and hospitality industries. It features Santa Monica College, the Santa Monica Municipal Airport, and the heavily commercial and residential Wilshire corridor. This is an east-to-west district with common transportation and commuting corridors.

AD 52 consists of portions of Los Angeles County, including portions of the Cities of Glendale and Los Angeles. These cities were split to balance population while considering communities of interest. This district consists of Northeast Los Angeles communities and includes Dodger Stadium and Echo Park Lake.

AD 53 consists of portions of Los Angeles and San Bernardino Counties, including the whole Cities of Montclair and Pomona, and portions of the Cities of Ontario, Chino, and Upland. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. The district's boundaries are drawn to meet those obligations and to balance population while considering

communities of interest. This district features racial, ethnic, and religious diversity. Common interests and concerns include education and economic development.

AD 54 consists of portions of Los Angeles County, including the whole Cities of Commerce, Montebello, and Vernon, and portions of the City of Los Angeles. Splits in the County and City of Los Angeles were made to balance population while considering communities of interest. This district includes parts of downtown Los Angeles and historic working-class, immigrant neighborhoods. This district also has a history of political activism and shared concerns regarding housing, education, and gentrification.

AD 55 consists of portions of Los Angeles County, including all of Culver City and portions of the City of Los Angeles. Splits in the City of Los Angeles were made to balance population while considering communities of interest. Communities in this district include historic Black neighborhoods such as Mid City, West Adams, the Crenshaw Corridor, Baldwin Hills, and the unincorporated communities of Ladera Heights and View Park-Windsor Hills, which share socio-economic characteristics. Additionally, communities throughout this district share interests related to housing, environmental risks that come from a significant concentration of oil wells at the Inglewood Oil field. These communities are also connected by light rail transit, educational institutions, like West LA Community College, and the Ballona Creek.

AD 56 consists of portions of Los Angeles County, including the whole Cities of La Habra Heights, Walnut, South El Monte, Pico Rivera, Whittier, Diamond Bar, Industry, and La Puente, and portions of the City of El Monte. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. The district's boundaries were drawn to meet those obligations, to balance population while considering communities of interest. This district features significant Latino and Asian American and Pacific Islander communities. These communities share interests and concerns related to language access and education. The district includes Mt. San Antonio College, which serves as a commuter school for students across Los Angeles County.

AD 57 consists of portions of Los Angeles County, including portions of the City of Los Angeles such as downtown Los Angeles and Skid Row. Splits in the County and City of Los Angeles were made to balance population while considering communities of interest. This district includes historic South Los Angeles Black and immigrant Latino communities. The district features the Los Angeles Coliseum, the University of Southern California, and Mount St. Mary's University. Shared interests and concerns in these communities include housing, education, and economic development.

AD 58 consists of portions of San Bernardino and Riverside Counties, including the whole Cities of Jurupa Valley and Grand Terrace, as well as portions of the Cities of Corona, Eastvale, and Riverside. This district is located in areas

where there are obligations under Section 2 of the Voting Rights Act. Splits to counties and cities in the district were made to meet these obligations and to balance population while considering communities of interest. The northwestern area of the City of Riverside is grouped with Jurupa Valley and Corona because of, among other things, shared economic interests and affordable housing issues.

AD 59 consists of portions of Orange and San Bernardino Counties, including the whole Cities of Chino Hills, Brea, Placentia, Yorba Linda, and Villa Park, as well as portions of the Cities of Anaheim, Fullerton, Orange, and Chino to balance population while considering communities of interest. There is a zero-population split of the city of Tustin. This inland district has shared interests in economic development, open space, and education.

AD 60 consists of portions of Riverside County, including the whole Cities of Perris and Moreno Valley, as well as portions of the Cities of Riverside, San Jacinto, and Hemet. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits to counties and cities in the district were made to meet these obligations and to balance population while considering communities of interest. This valley district is made up of communities that are demographically similar, and which share interests related to community planning, economic development, and open spaces such as the Lake Perris Recreational Park.

AD 61 consists of portions of Los Angeles County, including the whole Cities of Inglewood, Lawndale, and Hawthorne, and portions of the Cities of Gardena and Los Angeles. Splits in Gardena and the County and City of Los Angeles were to balance population while considering communities of interest. This district connects the Westside of Los Angeles and portions of the South Bay. This district features Los Angeles International Airport, SoFi Stadium, and the Forum. This area is impacted by the airport and the 405, 105, and 110 Freeways, which result in noise, air pollution, and other environmental impacts.

AD 62 consists of portions of Los Angeles County, including the whole Cities of Bellflower, Lynwood, Lakewood, South Gate, Paramount, Huntington Park, and Maywood. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. The district's boundaries were drawn to meet these obligations and to balance population while considering communities of interest. This district consists of some Gateway Cities of Southeast Los Angeles County, which have historically collaborated together, share similar demographics, and are primarily immigrant and working-class communities. Funding for infrastructure and addressing environmental health, pollution, and interstate highway issues are priorities for these communities.

AD 63 consists of portions of Riverside County, including the whole Cities of Norco, Menifee, Lake Elsinore, and Canyon Lake, as well as portions of the Cities of Eastvale, Riverside, and Corona. The cities in this district were split to balance the population while considering communities of interest. This district in western

Riverside County keeps rural communities next to the Cleveland National Forest and along the Interstate 15 corridor together. These communities have shared interests related to forest management, wildfires, developable land, and transportation. The district's borders are impacted by Voting Rights Act obligations to the north and east.

AD 64 consists of portions of Orange and Los Angeles Counties, including the whole Cities of Santa Fe Springs, Bell Gardens, Downey, La Mirada, Bell, Norwalk, Cudahy, and La Habra. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Orange and Los Angeles Counties were split to meet these obligations and to balance population while considering communities of interest. This district consists of cities near the Interstate 5 corridor. Communities like Downey and Whittier are similar in density and share local economies, transportation interests, and common public service agencies.

AD 65 consists of portions of Los Angeles County, including all of the City of Compton, as well as portions of the Cities of Long Beach, Carson, and Los Angeles. Splits in this district were made to balance population while considering communities of interest. This district consists of Harbor Gateway communities that have similar socio-economic characteristics. Communities like Watts, Willowbrook, Rancho Dominguez, Harbor Gateway, and Compton work together on issues like transportation, public safety, economic development, and education.

AD 66 consists of portions of Los Angeles County, including the whole Cities of Lomita, El Segundo, Rancho Palos Verdes, Redondo Beach, Rolling Hills Estates, Manhattan Beach, Hermosa Beach, Torrance, Rolling Hills, and Palos Verdes Estates, as well as portions of the Cities of Gardena and Los Angeles. City splits in the City and County of Los Angeles were to balance population while considering communities of interest. This district honors long-standing ties between South Bay cities and Palos Verdes Peninsula communities.

AD 67 consists of portions of Los Angeles and Orange Counties, including the whole Cities of Cerritos, La Palma, Hawaiian Gardens, Artesia, Buena Park, and Cypress, as well as portions of the Cities of Fullerton and Anaheim. Splits in this district were made to satisfy Voting Rights Act obligations in neighboring districts and to balance population while considering communities of interest. This district is ethnically diverse and generally low-to-middle income. Residents in this district have shared interests in education, health, and hospitality. The district is also home to the largest Muslim humanitarian relief organization and a major commercial district that is important to Arab, Middle Eastern, Muslim, and South Asian ("AMEMSA") communities.

AD 68 consists of portions of Orange County, including portions of the Cities of Santa Ana, Orange, and Anaheim. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits in Orange County were made to meet these obligations and to balance population while considering

communities of interest. Residents in this district share similar social and economic characteristics. Common interests include housing, public safety, immigration, and the environment.

AD 69 consists of portions of Los Angeles County, including the whole Cities of Signal Hill and Avalon, as well as portions of the Cities of Carson and Long Beach. Splits were made to balance population while considering communities of interest. This district includes Long Beach City College, the Long Beach Unified School District, and the Long Beach Airport. This district includes historic immigrant and working-class communities in North Long Beach. Downtown Long Beach is home to an LGBTQ+ community. Common community concerns relate to the quality of education, policing, supply chain infrastructure, healthcare, sewage, and water quality. This area provides much of the oil drilling and refinery capacity for the Los Angeles area.

AD 70 consists of portions of Orange County, including the whole Cities of Westminster, Stanton, Los Alamitos, Fountain Valley, and Garden Grove, as well as portions of the Cities of Seal Beach, Santa Ana, and Huntington Beach. The Cities in Orange County were split due to Voting Rights Act obligations in a neighboring district and to balance population while considering communities of interest, including preserving the integrity of the socio-economically cohesive community of Little Saigon. Communities in this district share concerns related to economic development, language access, education, and housing. Residents in this district share school systems and socio-economic characteristics.

AD 71 consists of portions of Riverside and Orange Counties, including the whole Cities of Wildomar, Murrieta, Mission Viejo, Rancho Santa Margarita, and Temecula. The counties in this district were split to balance population while considering communities of interest. This district keeps most of the rural areas of Orange and Riverside Counties together. Shared interests include the Temecula-based wine industry, transportation corridors such as Interstate 15 and Interstate 215, suburban lifestyles, and outdoor recreational activities.

AD 72 consists of portions of Orange County, including the whole Cities of Laguna Hills, Aliso Viejo, Newport Beach, Laguna Woods, Laguna Beach, and Lake Forest, as well as portions of the Cities of Seal Beach and Huntington Beach to balance population while considering communities of interest. This is a largely coastal district that shares economic, environmental, and economic interests.

AD 73 consists of portions of Orange County, including the whole Cities of Costa Mesa and Irvine, as well as portions of the City of Tustin to balance population while considering communities of interest. Common interests include open space, affordable housing, workforce development, healthcare, economic development, education, and transportation.

AD 74 consists of portions of San Diego and Orange Counties, including the whole Cities of Laguna Niguel, Dana Point, Oceanside, San Juan Capistrano, Vista, and San Clemente. This district honors community of interest testimony requesting South Orange County and North San Diego County communities to be grouped together. Common interests in these communities include coastal erosion, tourism, infrastructure, and issues relating to the Camp Pendleton Marine Corps Base.

AD 75 consists of portions of San Diego County, including the whole Cities of Santee and Poway, as well as portions of the City of San Diego. This district splits the City of San Diego to balance population while considering communities of interest. These are suburban and rural areas whose concerns include urban sprawl and fires. This district also includes the east San Diego County region that features vast valleys, mountainous terrain, unincorporated areas, and tribal lands.

AD 76 consists of portions of San Diego County, including the whole Cities of San Marcos and Escondido, as well as portions of the City of San Diego. The district splits the City of San Diego to maintain population deviation and respect communities of interest. This district is a mix of urban and suburban communities along the Interstate 15 and State Route 78 corridors that share interests and concerns related to environmental stewardship, education, fire safety, and recreational outdoor activities. The district features California State University San Marcos.

AD 77 consists of portions of San Diego County, including the whole Cities of Del Mar, Carlsbad, Encinitas, Solana Beach, and Coronado, as well as portions of the City of San Diego. This district splits the City of San Diego to balance population while considering communities of interest. This district runs along Interstate 5 from Carlsbad to Coronado and its communities share interests related to coastal erosion, tourism, retirement living, and Naval Base Coronado.

AD 78 consists of portions of San Diego County, including portions of the Cities of San Diego and El Cajon. This district splits the Cities of San Diego and El Cajon to balance population while considering communities of interest. This City of San Diego-based district is both urban and suburban. It is home to a historic LGBTQ+ community in Hillcrest and cultural assets such as Balboa Park.

AD 79 consists of portions of San Diego County, including the whole Cities of Lemon Grove and La Mesa, as well as portions of the Cities of San Diego and El Cajon. This district splits the Cities of San Diego and El Cajon to balance population while considering communities of interest. It includes several immigrant and refugee communities that are connected by shared interests such as affordable housing, commercial centers, and community-based organizations.

AD 80 consists of portions of San Diego County including the whole Cities of National City, Chula Vista, and Imperial Beach, as well as portions of the City of San Diego. This district is located in areas where there are obligations under

Section 2 of the Voting Rights Act. The district's boundaries were drawn to meet those obligations and to balance population while considering communities of interest. Communities in this district share common interests in the environment (including the Tijuana River Valley), air quality, affordable housing, and immigration. One of this district's shared assets and concerns is the busy international border between the United States and Mexico.

2. The Senate Districts

SD 1 is based on nesting AD 1 and AD 3 and includes the whole Counties of Butte, Colusa, Glenn, Lassen, Modoc, Plumas, Shasta, Sierra, Siskiyou, Sutter, Tehama, and Yuba, and portions of Nevada and Placer Counties. This district includes the whole Cities of Alturas, Anderson, Biggs, Chico, Colfax, Colusa, Corning, Dorris, Dunsmuir, Etna, Fort Jones, Grass Valley, Gridley, Live Oak, Loyalton, Marysville, Montague, Mount Shasta, Nevada City, Orland, Oroville, Portola, Red Bluff, Redding, Shasta Lake, Susanville, Tehama, Tulelake, Weed, Wheatland, Williams, Willows, Yreka, Yuba City, the town of Paradise, and portions of the City of Auburn to meet population requirements. This district consists of the northern inland and mountainous counties, primarily rural communities with agriculture as a major economic contributor. They are joined by north-to-south transportation arteries and share concerns related to wildfires, forest management, and water issues.

SD 2 is based on nesting AD 2 and AD 12 and includes the whole Counties of Del Norte, Humboldt, Lake, Marin, Mendocino, and Trinity, and portions of Sonoma County to meet population requirements. A zero-population portion of the City and County of San Francisco is also included in order to keep the Angel Island State Park whole. This district includes the whole Cities of Arcata, Belvedere, Blue Lake, Clearlake, Cloverdale, Crescent City, Eureka, Ferndale, Fort Bragg, Fortuna, Healdsburg, Lakeport, Larkspur, Mill Valley, Novato, Petaluma, Point Arena, Rio Dell, San Rafael, Santa Rosa, Sausalito, Sebastopol, Trinidad, Ukiah Willits, the towns of Corte Madera, Fairfax, Ross, San Anselmo, Tiburon, and Windsor. This district features the northern coastline, stretching from Del Norte to Marin County. The communities in this district share similar terrain, a transportation corridor running north to south, and healthcare networks. The district includes the Emerald Triangle, tribal lands, and brings together counties with shared issues related to the environment, wildfires, agriculture, as well as the fishing, timber, and tourism industries.

SD 3 is based on nesting AD 4 and AD 11 and includes the whole Counties of Napa, Solano, Yolo, and portions of Contra Costa, Sacramento, and Sonoma Counties in order to incorporate the Delta-oriented regions of Contra Costa and Sacramento Counties and the essential worker and farming communities of Sonoma County. This district includes the whole Cities of American Canyon, Benicia, Brentwood, Calistoga, Cotati, Davis, Dixon, Fairfield, Isleton, Napa, Oakley, Rio Vista, Rohnert Park, St. Helena, Sonoma, Suisun City, Vacaville, Vallejo, West

Sacramento, Winters, Woodland, and Yountville. This district honors a pre-existing partnership amongst aforementioned counties and includes many agricultural and working-class communities. It also features the Delta and communities with an interest in delta management, University of California, Davis, Sonoma State University, and a strong wine-focused tourism industry.

SD 4 is based on nesting AD 8 and AD 22 and includes the whole Counties of Alpine, Amador, Calaveras, El Dorado, Inyo, Mariposa, Mono, Stanislaus, Tuolumne, and portions of Madera, Merced, Nevada, and Placer Counties. This district includes the whole Cities of Amador City, Angels, Bishop, Ceres, Hughson, Ione, Jackson, Modesto, Newman, Oakdale, Patterson, Placerville, Plymouth, Riverbank, Sonora, South Lake Tahoe, Sutter Creek, Turlock, Waterford, and the towns of Truckee and Mammoth Lakes. There is a zero-population split of the City of Livingston. The lines of this district are impacted by Voting Rights Act obligations to the west. This district follows communities-of-interest requests from Sierra counties to be placed with neighboring counties to the north. The inclusion of most Valley rural communities and some urban cities helps populate this Sierra district. The district brings together communities that have common interests in issues related to open space, water, broadband access, medical access, federal land management, national parks, tourism, emergency services, and transportation infrastructure challenges.

SD 5 is based on nesting AD 9 and AD 13 and includes San Joaquin County and portions of Alameda County, including the whole Cities of Dublin, Escalon, Lathrop, Livermore, Lodi, Manteca, Pleasanton, Ripon, Stockton, and Tracy. The split in Alameda County is a result of keeping cities whole and to comply with population requirements. This district is defined by suburban communities with job centers and main transportation and commuting routes. Communities in this district are concerned with affordable housing and the cost of living. The area also includes agricultural communities and shared interests in water resources.

SD 6 is based on nesting AD 5 and AD 7 and includes portions of Placer and Sacramento Counties, including the whole Cities of Citrus Heights, Folsom, Galt, Lincoln, Rancho Cordova, Rocklin, Roseville, the town of Loomis, and portions of the City of Auburn, which was split to meet population requirements. This district encompasses the more suburban communities of the Counties of Sacramento and Placer, which share school districts and commercial centers. Many in this district rely on the US 50 and Interstate 80 freeways for travel and commuting to work. This district is also home to large immigrant communities of Slavic, Afghan origin, and senior citizen communities.

SD 7 is the perfect nesting of AD 14 and AD 18 and includes portions of Alameda, Contra Costa, and San Francisco Counties, including the whole Cities of Alameda, Albany, Berkeley, El Cerrito, Emeryville, Hercules, Oakland, Piedmont, Pinole, Richmond, and San Pablo, and a zero-population portion of the City and County of San Francisco to keep Alameda Island whole. This district includes the

western portions of the East Bay and the eastern shore of the San Francisco Bay. Communities here have a long history of working together and share concerns related to homelessness, gentrification, and access to affordable housing. The communities of this district are very diverse, vary in income and wealth by neighborhood and city, and share transportation corridors and transit systems.

SD 8 is based on nesting A6 and AD 10 and includes portions of Sacramento County, including the whole Cities of Elk Grove and Sacramento. This district is united by a shared transit system, and the major transportation corridors of Interstate 5 and Highway 99. Keeping these cities together enables them to work on shared issues, including flood control, updating infrastructure, and supporting local businesses. This district also honors various communities of interest including an LGBTQ+ community, a growing immigrant community, and California State University, Sacramento.

SD 9 is based on nesting AD 15 and AD 16 and includes portions of Alameda and Contra Costa Counties, including the whole Cities of Antioch, Clayton, Concord, Lafayette, Martinez, Orinda, Pittsburg, Pleasant Hill, San Leandro, San Ramon, Walnut Creek, and the towns of Danville and Moraga. This district encompasses much of Contra Costa County, including the county seat of Martinez. Also included are whole or portions of Lamorinda, the Tri-Valley, and the Eden Township of Alameda County. Other East Bay suburban communities are incorporated into this district that all share the transportation corridors of Interstate 680 and Highway 4.

SD 10 is based on nesting AD 24 and AD 26 and includes portions of Alameda and Santa Clara Counties, including the whole Cities of Fremont, Hayward, Milpitas, Newark, Sunnyvale, Santa Clara, and Union City, and portions of the City of San Jose. The City of San Jose was split to balance population while considering communities of interest, such as uniting the northern neighborhood of Berryessa with similar communities to the north. Many Silicon Valley-based communities are brought together in this district, representing a large population that works in the tech industry. This district is home to large immigrant Asian-American communities that share similar cultures and languages.

SD 11 is based on an almost complete nesting of AD 17 and AD 19 and includes portions of San Mateo and San Francisco Counties, including the whole City of Daly City, the town of Colma, and portions of the Cities of San Bruno, San Francisco, and South San Francisco. This district keeps all populated areas of San Francisco whole, including keeping the LGBTQ+ community united, but does not include a few unpopulated census blocks cut out to keep Alameda, Angel Island, and Tiburon each whole. Splits were made to balance population while considering communities of interest. This district also keeps together multiple communities of interest, including historic immigrant Asian American and Pacific Islander communities such as the largest Filipino community in the United States. This district also unites the working-class neighborhoods on the west side of San Francisco.

SD 12 is based on nesting AD 8 and AD 32 and includes portions of Fresno, Kern, and Tulare Counties, including the whole Cities of California City, Clovis, Exeter, Maricopa, Ridgecrest, Taft, and Tehachapi, and portions of the Cities of Bakersfield, Fresno, Shafter, Tulare, and Visalia. Splits in the Cities of Fresno, Tulare, Visalia, and Bakersfield were to populate foothill communities, and honor communities-of-interest input. The district links Central Valley communities to foothill communities. Shared interests in these communities include natural resources, transportation infrastructure, aging populations, tourism, agriculture, ranching, and being a gateway to recreational activities. The borders of this district are also shaped by Voting Rights Act obligations to the west.

SD 13 is based on nesting AD 21 and AD 23 and includes portions of San Mateo and Santa Clara Counties, including the whole Cities of Belmont, Brisbane, Burlingame, Campbell, Cupertino, East Palo Alto, Foster City, Half Moon Bay, Los Altos, Menlo Park, Millbrae, Monte Sereno, Mountain View, Pacifica, Palo Alto, Redwood City, San Carlos, San Mateo, Saratoga, the towns of Atherton, Hillsborough, Los Altos Hills, Los Gatos, Portola Valley, and Woodside, and portions of the Cities of San Bruno and South San Francisco. Splits in cities and counties in this district are made to balance population while considering communities of interest, to keep South San Francisco, Daly City, and Redwood City areas together. The district includes rural coastal communities on the western side of the ridgeline of the Santa Cruz Mountains and more urban communities on the Bay side, closer to Highway 101. Communities in this district share a transit corridor and access to Caltrain and other modes of transportation, have ties to the tech industry, and include areas of great economic disparity. This district's communities face transportation and housing challenges.

SD 14 is based on nesting AD 27 and AD 31 and includes portions of Fresno, Madera, Merced, and Tulare Counties, including the whole Cities of Atwater, Chowchilla, Coalinga, Dos Palos, Firebaugh, Fowler, Gustine, Huron, Kerman, Los Banos, Madera, Mendota, Merced, Orange Cove, Parlier, Reedley, Sanger, San Joaquin, and Selma, and portions of the Cities of Fresno and Livingston. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits of counties and cities are made to meet those obligations and to balance population in neighboring districts, while considering communities of interest. Many of the cities in this district run along the main transportation routes of Interstate 5 and Highway 99, and share interests in the food processing economy, water, and agriculture. These are largely Latino and immigrant communities that confront infrastructure challenges and concerns related to healthcare.

SD 15 is based on nesting AD 25 and AD 28 and includes the majority of Santa Clara County, including its rural and agricultural-based communities. This district also includes the whole Cities of Gilroy and Morgan Hill, and portions of the City of San Jose. San Jose was split to balance the population in the eastern part of Santa Clara County. Linked by Highway 101, communities in this district have

common interests associated with language access, healthcare, infrastructure, and housing.

SD 16 is based on an almost complete nesting of AD 33 and AD 35 and includes Kings County and portions of Fresno, Kern, and Tulare Counties. This district includes the whole Cities of Arvin, Avenal, Corcoran, Delano, Dinuba, Farmersville, Hanford, Kingsburg, Lemoore, Lindsay, McFarland, Porterville, Wasco, and Woodlake, and portions of the Cities of Bakersfield, Shafter, Tulare, and Visalia. This district is located in an area where there are obligations under Section 2 of the Voting Rights Act. Splits in the Counties of Fresno, Kern, and Tulare are to balance population in neighboring districts and splits in the Cities of Bakersfield, Shafter, Tulare, and Visalia are made to meet Voting Rights Act obligations. This district is largely an immigrant Latino working-class region with shared interests in water and an agriculture-based economy.

SD 17 is based on nesting AD 29 and AD 30 and includes the whole Counties of Monterey, San Benito, Santa Cruz, and portions of San Luis Obispo County, which was split to balance population, but keeps together small coastal communities and cities. This district includes the whole Cities of Arroyo Grande, Atascadero, Capitola, Carmel-by-the-Sea, Del Rey Oaks, El Paso de Robles (Paso Robles), Gonzales, Greenfield, Hollister, King City, Marina, Monterey, Morro Bay, Pacific Grove, Pismo Beach, Salinas, Sand City, San Juan Bautista, San Luis Obispo, Santa Cruz, Scotts Valley, Seaside, Soledad, and Watsonville. This coastal district includes a mix of urban and suburban cities and rural communities. Shared interests include agriculture, tourism, and marine conservation. The district also includes the largest protected marine sanctuary in the United States and universities renowned in the biological sciences, including University of California, Santa Cruz and California State University, Monterey Bay.

SD 18 is based on nesting AD 36 and AD 80 and includes Imperial County and portions of Riverside, San Bernardino, and San Diego Counties. This district includes the whole Cities of Blythe, Brawley, Calexico, Calipatria, Chula Vista, Coachella, El Centro, Holtville, Imperial, Imperial Beach, Indio, National City, Needles, and Westmorland, and portions of the City of San Diego. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. The splits in these counties are made to keep cities whole while considering communities of interest. This district is characterized by the shared concerns associated with the Salton Sea, agriculture, the Colorado River Basin, and the US/Mexico border.

SD 19 is based on nesting AD 34 and AD 47 and includes portions of Riverside and San Bernardino Counties including the whole Cities of Banning, Barstow, Beaumont, Big Bear Lake, Calimesa, Cathedral City, Desert Hot Springs, Indian Wells, La Quinta, Palm Desert, Palm Springs, Rancho Mirage, Twentynine Palms, and Yucaipa, and the towns of Yucca Valley and Apple Valley. This district splits the Cities of Colton, Grand Terrace, Hemet, Highland, Loma Linda, and

Redlands for population requirements and in light of the district's terrain. This district consists of the majority of the High Desert communities of San Bernardino County, which share common interests in national parks, recreational activities, and tourism. This district links the communities next to the Nevada and Arizona borders with urban communities through Interstate 40 and Interstate 15. Northern communities are linked by Highway 58.

SD 20 is based on nesting AD 43 and AD 46 and includes portions of Los Angeles County, including the whole Cities of Burbank, San Fernando, and a portion of the City of Los Angeles. The City of Los Angeles split was made to honor community of interest testimony to keep the neighborhood of Toluca Lake with the neighborhoods of North Hollywood and Valley Glen together as much as possible. This district consists of small-to-mid-size communities that share similar economies, management of environmental resources, commercial districts, immigrant backgrounds, and income levels. For example, the area is home to an Armenian community defined by places of worship, the headquarters of the Armenian church, cultural landmarks, and memorials.

SD 21 is based on nesting AD 37 and AD 38 and includes Santa Barbara County and portions of San Luis Obispo and Ventura Counties. All splits were made to balance population while considering communities of interest. This district includes the whole Cities of Buellton, Camarillo, Carpinteria, Fillmore, Goleta, Grover Beach, Guadalupe, Lompoc, Ojai, Oxnard, Port Hueneme, San Buenaventura (Ventura), Santa Barbara, Santa Maria, Santa Paula, and Solvang. This district consists of coastal communities and smaller, rural, agricultural communities.

SD 22 is based on nesting AD 48 and AD 53 and includes portions of Los Angeles and San Bernardino Counties, including the whole Cities of Azusa, Baldwin Park, Bradbury, Chino, Covina, Duarte, El Monte, Irwindale, La Verne, Montclair, Ontario, Pomona, San Dimas, and South El Monte, and portions of the City of West Covina for population considerations. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Cities in this district share water and school districts. This district features numerous middle- and working-class Latino communities. Pomona serves as a transition area between San Bernardino and Los Angeles Counties.

SD 23 is based on nesting AD 39 and AD 40 and includes portions of Los Angeles and San Bernardino Counties, including the whole Cities of Adelanto, Hesperia, Lancaster, Palmdale, Santa Clarita, and Victorville. This district includes the High Desert communities of the Antelope Valley and parts of the Victor Valley. This district groups together communities with similar suburban backgrounds and commuter patterns. The region is home to clean energy and aerospace industries.

SD 24 is based on nesting AD 51 and AD 66 and includes coastal portions of Los Angeles County, including the whole Cities of Agoura Hills, Beverly Hills,

Calabasas, El Segundo, Hermosa Beach, Hidden Hills, Lomita, Malibu, Manhattan Beach, Palos Verdes Estates, Rancho Palos Verdes, Redondo Beach, Rolling Hills, Rolling Hills Estates, Santa Monica, Torrance, West Hollywood, Westlake Village, and southern portions of Gardena. The Cities of Los Angeles and Gardena were split to balance population while considering communities of interest. This district includes the Los Angeles communities of Bel Air, Westwood, West Los Angeles, Mid City West, Hollywood, and Venice. This district keeps the coastal Council of Governments together with small communities with similar cultures, income levels, and shared coastal interests.

SD 25 is based on nesting AD 41 and AD 49 and includes portions of Los Angeles and San Bernardino Counties to balance population while considering communities of interest. This district includes the whole Cities of Alhambra, Arcadia, Claremont, Glendale, Glendora, La Cañada Flintridge, Monrovia, Monterey Park, Pasadena, Rosemead, San Gabriel, San Marino, Sierra Madre, South Pasadena, and Temple City, and portions of the Cities of Rancho Cucamonga and Upland. Rancho Cucamonga and Upland were split to respect public input regarding forest access to the Angeles National Forest. Preservation of natural resources is important to the region. The district is composed of smaller, middle-sized cities that work together on shared economic and education issues. The district's borders are impacted by Voting Rights Act obligations to the south.

SD 26 is based on nesting AD 52 and AD 54 and includes portions of Los Angeles County, including the whole City of Vernon and portions of the City of Los Angeles. The Los Angeles neighborhood of Boyle Heights and unincorporated areas of East Los Angeles, which are adjacent, are historic working-class, immigrant areas that share deep cultural bonds. This district also has a history of political activism and shared concerns regarding housing, education, and gentrification. Other historic immigrant enclaves such as Koreatown, Chinatown, Thai Town, the Historic Filipino District, and Little Tokyo Area are included in the district. The district also includes neighboring higher income communities with economic ties to the entertainment industry.

SD 27 is based on nesting AD 42 and AD 46 and includes portions of the Counties of Ventura and Los Angeles. County splits were made to balance population while considering communities of interest. Communities in Ventura County include Simi Valley, Bell Canyon, Oak Park, Thousand Oaks, Lake Sherwood, Santa Rosa Valley, and Moorpark. Communities in Los Angeles County include the City of Los Angeles neighborhoods in the San Fernando Valley such as Toluca Lake, North Hollywood, Valley Glen, Studio City, Sherman Oaks, Encino, Tarzana, Woodland Hills, West Hills, Chatsworth, Northridge, Porter Ranch, and Granada Hills. The San Fernando Valley is defined by a diversity of languages, immigrant backgrounds, religions, and socio-economic statuses. In this district, LGBTQ+ communities and historic Jewish communities are preserved. Communities affected by the Aliso Canyon gas leak are also kept together.

SD 28 is based on nesting AD 55 and AD 57 and includes portions of Los Angeles County, including the whole City of Culver City and portions of the City of Los Angeles. The City of Los Angeles was split to balance population. The district consists of South Los Angeles and many historic Black neighborhoods such as Leimert Park and Ladera Heights. Food insecurity, housing, gentrification, and criminal justice issues are of particular concern in this district.

SD 29 is based on nesting AD 45 and AD 50 and includes portions of San Bernardino County, including the whole Cities of Rialto, and San Bernardino, and portions of the Cities of Colton, Fontana, Grand Terrace, Highland, Rancho Cucamonga, Redlands, Upland, and a zero-population split of the City of Loma Linda. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. This district keeps together a significant Latino population alongside a growing Black community. Shared community interests include food accessibility, wildfire concerns, and shared school districts.

SD 30 is based on nesting AD 56 and AD 64 and includes portions of Los Angeles and Orange Counties, including the whole Cities of Bellflower, Diamond Bar, Downey, Industry, La Habra Heights, La Mirada, La Puente, Montebello, Norwalk, Pico Rivera, Santa Fe Springs, Walnut, and Whittier, and portions of the Cities of Brea, Placentia, and West Covina. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. In addition to a significant Latino population, this district includes East San Gabriel Valley cities with sizable Asian American and Pacific Islander communities that share language schools, commercial centers, and religious institutions.

SD 31 is based on nesting AD 58 and AD 60 and includes portions of Riverside and San Bernardino Counties, including the whole Cities of Eastvale, Jurupa Valley, Moreno Valley, Perris, and San Jacinto, and portions of the Cities of Corona, Fontana, Menifee, and Riverside, and zero-population split of Hemet. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits in this district are made to meet these obligations and to balance population while considering communities of interest. This district is composed of communities that have changed significantly over the last 10 years. Shared interests include a robust freight and logistics industry, environmental and air quality concerns, the Interstate 215 transportation corridor, and higher education (University of California, Riverside is in this district).

SD 32 is based on nesting AD 63 and AD 71 and includes portions of Orange, Riverside, San Bernardino, and San Diego Counties, including the whole Cities of Canyon Lake, Chino Hills, Lake Elsinore, Murrieta, Norco, Temecula, and Wildomar, portions of the Cities of Brea, Corona, Menifee, Riverside, and Yorba Linda. This district consists of agricultural lands, open space, national and state parks, and areas for recreational activities. This district also shares major transportation corridors. The splits in this district are due to natural geographic

boundaries and terrain. The borders of this district are shaped by Voting Rights Act obligations in neighboring districts.

SD 33 is based on nesting AD 62 and AD 69 and includes portions of Los Angeles County, including the Cities of Avalon, Bell, Bell Gardens, Commerce, Cudahy, Huntington Park, Lakewood, Long Beach, Lynwood, Maywood, Paramount, Signal Hill, and South Gate. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits were made to meet those obligations and to balance population while considering communities of interest. The Southeast Los Angeles communities in this district share a connection to Long Beach through Interstate 605 and Interstate 710. Communities here share demographics, socio-economic status, language, environmental health concerns, and school districts.

SD 34 is based on nesting AD 67 and AD 68 and includes portions of Los Angeles and Orange Counties, including the whole City of La Habra, and portions of the Cities of Anaheim, Buena Park, Fullerton, Garden Grove, Orange, Placentia, and Santa Ana. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits were made to meet those obligations and to balance population while considering communities of interest. Residents of these communities consider themselves welcoming to immigrants and refugees. This district is rich in diversity and includes a number of working-class communities, many of which are home to essential workers and others with ties to the entertainment industry.

SD 35 is based on nesting AD 61 and AD 65 and includes portions of Los Angeles County, including the whole Cities of Carson, Compton, Hawthorne, Inglewood, and Lawndale, and portions of the Cities of Gardena and Los Angeles. The district is defined by low-income, working-class communities that are predominantly Black. The area is affected by pollution resulting from its numerous highways, Los Angeles International Airport, and the Los Angeles Harbor. Communities in this district share concerns related to environmental justice, and housing insecurity.

SD 36 is based on nesting AD 70 and AD 72 and includes portions of Los Angeles and Orange Counties, including the whole Cities of Artesia, Cerritos, Cypress, Dana Point, Fountain Valley, Hawaiian Gardens, Huntington Beach, Laguna Beach, La Palma, Los Alamitos, Newport Beach, San Clemente, Seal Beach, Stanton, and Westminster, and portions of the Cities of Buena Park and Garden Grove. The district's configuration is partially the result of Voting Rights Act obligations in two neighboring districts. The district also preserves the integrity of immigrant communities that share significant ties, including language and culture. Additionally, residents of this coastal district share concerns related to pollution, coastal erosion, climate change, and oil spills. This district also reflects input from inland communities in Orange County, including Little Saigon, which share economic interests with the beach cities.

SD 37 is based on nesting AD 59 and AD 73 and includes portions of Orange County, including the whole Cities of Aliso Viejo, Costa Mesa, Irvine, Laguna Niguel, Laguna Woods, Lake Forest, Tustin, and Villa Park, and portions of the Cities of Anaheim, Fullerton, Orange, Placentia, Santa Ana, and Yorba Linda. Splits in the district were made to balance the population while considering communities of interest. Communities in this district have shared interests and concerns related to open space, affordable housing, an aging population, and traffic.

SD 38 is based on nesting AD 74 and AD 77 and includes portions of Orange and San Diego Counties, including the whole Cities of Carlsbad, Del Mar, Encinitas, Laguna Hills, Mission Viejo, Oceanside, Rancho Santa Margarita, San Juan Capistrano, Solana Beach, and Vista, and portions of the City of San Diego. This district connects the inland and coastal communities of south Orange County with the north San Diego County coast. The split of Orange County was made to keep Camp Pendleton together with surrounding communities which share interests and concerns related to military life.

SD 39 is based on nesting AD 78 and AD 79 and includes portions of San Diego County, including the whole Cities of Coronado, El Cajon, La Mesa, and Lemon Grove, and portions of the City of San Diego. These splits were made to balance population while considering communities of interest. This district is defined by highly urbanized neighborhoods, a thriving LGBTQ+ community, multiple post-secondary educational institutions (San Diego State University and the University of San Diego), and military installations.

SD 40 is based on nesting AD 75 and AD 76 and includes portions of San Diego County including the whole Cities of Escondido, Poway, San Marcos, and Santee, and portions of the City of San Diego. This district was split to balance population and to honor community-of-interest testimony received that highlighted the region's rural communities, agricultural interests, tribal nations, shared water and fire districts, recreational enthusiasts, open space and common transportation corridor along Interstate 15. The district includes the eastern part of the City of San Diego, including San Pasqual Valley and Rancho Peñasquitos, which is predominantly suburban, and requested to be kept together with the aforementioned eastern San Diego cities.

3. The Board of Equalization Districts

BOE 1 is based on nesting SD 1, SD 4, SD 5, SD 6, SD8, SD 12, SD 14, and SD 16, and stretches from the Oregon border to the southern border of San Bernardino County. The district consists of 33 whole inland counties, including Alpine, Amador, Butte, Calaveras, Colusa, El Dorado, Fresno, Glenn, Inyo, Kern, Kings, Lassen, Madera, Mariposa, Merced, Modoc, Mono, Nevada, Placer, Plumas, Sacramento, San Joaquin, Shasta, Sierra, Siskiyou, Solano, Stanislaus, Sutter, Tehama, Tulare, Tuolumne, Yolo, and Yuba. San Bernardino County was split to balance population while considering communities of interest.

BOE 2 is based on nesting SD 2, SD 9, SD 10, SD 11, SD13, SD 15, SD 17, and SD 21, and includes 19 whole coastal counties stretching from the Oregon border to the Ventura-Los Angeles County line. Counties include Alameda, Contra Costa, Del Norte, Humboldt, Lake, Marin, Mendocino, Monterey, Napa, San Benito, San Francisco, San Luis Obispo, San Mateo, Santa Barbara, Santa Clara, Santa Cruz, Sonoma, Trinity, and Ventura.

BOE 3 is based on nesting SD 20, SD 24, SD 25, SD 26, SD 28, SD 30, SD 33, and SD 35, and includes all of Los Angeles County.

BOE 4 is based on nesting SD 18, SD 31, SD 32, SD 36, SD 37, SD 38, SD 39, and SD 40, and is composed of four whole Southern California counties, including Imperial, Orange, Riverside and San Diego. San Bernardino County was split to balance population while considering communities of interest.

4. The Congressional Districts

CD 1 contains the whole Counties of Butte, Colusa, Glenn, Lassen, Modoc, Shasta, Siskiyou, Sutter, and Tehama, and portions of Yuba County, which was split to balance population while considering communities of interest. This district includes the whole Cities of Alturas, Anderson, Biggs, Chico, Colusa, Corning, Dorris, Dunsmuir, Etna, Fort Jones, Gridley, Live Oak, Marysville, Montague, Mount Shasta, Orland, Oroville, Red Bluff, Redding, Shasta Lake, Susanville, Tehama, Tulelake, Weed, Wheatland, Williams, Willows, Yreka, and Yuba City, and the community of Paradise. This district unites the counties of the far north, which share a rural lifestyle and an agriculture- and ranching-based economy. Residents of this region also share concerns related to wildfires and are linked by Interstate 5, which runs north to south through this district.

CD 2 includes the whole Counties of Del Norte, Humboldt, Marin, Mendocino, and Trinity, portions of Sonoma County, a zero-population split of the City and County of San Francisco, the whole Cities of Arcata, Belvedere, Blue Lake, Cloverdale, Crescent City, Eureka, Ferndale, Fort Bragg, Fortuna, Healdsburg, Larkspur, Mill Valley, Novato, Point Arena, Rio Dell, San Rafael, Sausalito, Sebastopol, Trinidad, Ukiah, and Willits, and the communities of Corte Madera, Fairfax, Ross, San Anselmo, Tiburon, and Windsor and portions of the Cities of Santa Rosa and Petaluma to balance population while considering communities of interest. This district includes coastal counties which share concerns related to climate, the environment, water quality, and commercial fishing. These communities are linked together by Highway 101.

CD 3 includes the whole Counties of Placer, Nevada, Mono, Sierra, Inyo, Plumas and Alpine, portions of Yuba, Sacramento, and El Dorado Counties to balance population while considering communities of interest. This district includes the whole Cities of Auburn, Bishop, Colfax, Folsom, Grass Valley, Lincoln, Loyalton, Nevada City, Portola, Rocklin, Roseville, and South Lake Tahoe, and the towns of Loomis, Mammoth Lakes, and Truckee. This district incorporates communities

based in the Sierras, its foothills, and Placer County suburbs. The mountainous communities of the Eastern Sierras are kept together in this district, including the entire Tahoe Basin. Communities in this region share a more rural lifestyle and have common interests in protecting their undeveloped lands and natural landmarks.

CD 4 includes the whole Counties of Napa and Lake, portions of Solano, Sonoma, and Yolo Counties, and portions of the Cities of Vacaville and Santa Rosa, which were split to balance population and to incorporate more agriculture-based areas into the district. There is a zero-population split of the city of Petaluma. This district includes the whole Cities of American Canyon, Calistoga, Clearlake, Cotati, Davis, Dixon, Lakeport, Napa, Rio Vista, Rohnert Park, St. Helena, Sonoma, Winters, Woodland, and Yountville. This district is composed of agricultural communities, regions with a wine-focused economy, is home to numerous essential workers, and features University of California, Davis and Sonoma State University.

CD 5 includes the whole Counties of Amador, Tuolumne, Mariposa, and Calaveras, portions of Fresno, Stanislaus, Madera and El Dorado Counties, the whole the Cities Amador City, Angels, Hughson, Ione, Jackson, Oakdale, Placerville, Plymouth, Riverbank, Sonora, Sutter Creek, and Waterford, and portions of the Cities of Fresno, Turlock, and Modesto to balance population while considering communities of interest. In large part, these communities have tourism- and agriculture-based economies are nestled in large swaths of federal public lands. Shared interests include recreation, natural resource management, access to broadband, access to healthcare, wildfires, and forest conservation.

CD 6 contains a portion of Sacramento County, the whole Cities of Citrus Heights and Rancho Cordova, and a portion of the City of Sacramento to balance population while considering communities of interest. Communities included in this district have similar socio-economic characteristics and shared community resources. Shared concerns and interests include transportation and homelessness.

CD 7 includes portions of the Counties of Solano and Yolo, the whole Cities of Isleton, Elk Grove, West Sacramento, and Galt, and portions of the City of Sacramento and Sacramento County to balance population while considering communities of interest. This district features the downtown areas of Sacramento that share metropolitan services and school districts. The district follows the American River as a natural border. Suburban and more rural areas in this district have a shared interest in flood control and protecting green spaces. Bringing these communities together into a district enables them to take a more regional approach to issues related to transportation, infrastructure, housing, and economic development.

CD 8 includes portions of Contra Costa and Solano Counties, the whole Cities of Benicia, El Cerrito, Fairfield, Hercules, Pinole, Pittsburg, Richmond, San Pablo, Suisun City, and Vallejo, and portions of the Cities of Antioch, Martinez, and

Vacaville to balance population while considering communities of interest to create a working-class focused district. This district houses many who work in San Francisco and Oakland and is linked together by the BART transportation system. The district also encompasses the refineries along the San Francisco Bay and Delta waterways.

CD 9 includes portions of Contra Costa, San Joaquin, and Stanislaus Counties, including the whole Cities of Escalon, Lodi, Manteca, Ripon, Stockton, and Tracy, and portions of Brentwood. This district connects the Valley communities of southern San Joaquin County with the northeastern part of Stanislaus County. This district features an economy that is, in part, based on agriculture and food processing. Major transportation and commuting routes connect the district's larger cities like Tracy, Manteca, and Modesto with Bay Area communities.

CD 10 includes a portion of Alameda and Contra Costa Counties, the whole Cities of Clayton, Concord, Lafayette, Orinda, Pleasant Hill, San Ramon, Oakley, and Walnut Creek, the towns of Danville and Moraga, and portions of the Cities of Antioch, Brentwood, Dublin, and Martinez. Splits were made to balance population while considering communities of interest. The district includes many of the suburban areas of the East Bay along Interstate 680 and cities and communities along the Delta, where common interests include Delta management and recreation.

CD 11 includes a portion of the City and County of San Francisco. This district keeps most of San Francisco whole except for a southeastern portion to balance population, while connecting communities of interest in the southeastern portion of the city with their counterparts in San Mateo County. The district keeps historic as well as culturally and socioeconomically cohesive LGBTQ+ and immigrant communities intact. The district also includes a number of working-class communities such as Chinatown, Excelsior, Crocker Amazon, and Bayview-Hunters Point.

CD 12 includes a portion of Alameda County, including the whole Cities of Alameda, Albany, Berkeley, Emeryville, Oakland, and Piedmont, and a portion of the City of San Leandro. The City of San Leandro was split to balance population while considering communities of interest. There is a zero-population split of the City and County of San Francisco. This district is linked by Interstate 580 and Interstate 880, and features University of California, Berkeley, the Oakland Airport, and Oakland Children's Hospital. Communities in this district have shared concerns related to gentrification, homelessness, and access to affordable housing.

CD 13 includes all of Merced County, portions of Fresno, Madera, San Joaquin, and Stanislaus Counties, the whole Cities of San Joaquin, Patterson, Livingston, Dos Palos, Los Banos, Kerman, Madera, Atwater, Huron, Ceres, Mendota, Merced, Firebaugh, Lathrop, Coalinga, Newman, Gustine, and

Chowchilla, and portions of the Cities of Modesto and Turlock. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits were made to meet these obligations and to balance population while considering communities of interest. This district includes cities along Interstate 5 from Fresno County to San Joaquin County and communities along Highway 99. The district connects rural Valley communities with larger cities. These communities share interests in transportation and issues related to an agriculture- and food processing-based economy.

CD 14 includes a portion of Alameda County, including the whole Cities of Hayward, Pleasanton, Livermore, and Union City, and portions of the Cities of Dublin, Fremont, and San Leandro to balance population while considering communities of interest. This district includes many suburban areas of Alameda County, including Eden Township and portions of the Tri-Valley.

CD 15 includes portions of San Francisco and San Mateo Counties, including the whole Cities of Brisbane, San Mateo, Foster City, East Palo Alto, Millbrae, Redwood City, Belmont, Daly City, San Bruno, Burlingame, San Carlos, and South San Francisco, the towns of Colma and Hillsborough, and portions of the Cities of Menlo Park, San Francisco, and the town of Atherton to balance population while considering communities of interest. The district includes more rural coastal communities on the western side of the ridgeline and more urban communities on the Bay side that are closer to Highway 101. Communities along Highway 101 share concerns related to wildfires and water access. Communities in this district share a transit corridor and have ties to the tech industry.

CD 16 includes a portion of Santa Clara and San Mateo Counties, including the whole Cities of Palo Alto, Pacifica, Los Altos, Saratoga, Monte Sereno, Campbell, Mountain View, Half Moon Bay, the towns of Los Gatos, Woodside, Los Altos Hills, and Portola Valley, and a portion of the Cities of Menlo Park, San Jose, and the town of Atherton. Splits were made to balance population while considering communities of interest and to meet Voting Rights Act obligations in a neighboring district. The district includes a mix of urban and suburban Silicon Valley-influenced cities, small coastal cities, rural communities with agricultural interests and some tourism-based economies. The district also includes the largest protected marine sanctuary in the United States and features University of California, Santa Cruz and California State University, Monterey Bay.

CD 17 includes a portion of Alameda and Santa Clara Counties, including the whole Cities of Cupertino, Milpitas, Newark, Santa Clara, and Sunnyvale, and portions of the Cities of Fremont and San Jose. Splits were made to balance population while considering communities of interest and to meet Voting Rights Act obligations in a neighboring district. This district is home to a large immigrant Asian American Pacific Islander community that shares deep cultural and linguistic ties. Many people in this district are employed in the tech industry.

CD 18 contains all of San Benito County, portions of Monterey, Santa Clara, and Santa Cruz Counties, including the whole Cities of Gilroy, Gonzales, Greenfield, Hollister, King City, Morgan Hill, Salinas, San Juan Bautista, and Soledad, and portions of the Cities of San Jose and Watsonville. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits were made to meet those obligations and to balance population while considering communities of interest. The district is composed of significant Latino communities, which share cultural and economic interests. Common concerns in these communities include issues relating to housing and transportation.

CD 19 includes a portion of Monterey, San Luis Obispo, Santa Clara, and Santa Cruz Counties, including the whole Cities of Atascadero, Capitola, Carmel-by-the-Sea, Del Rey Oaks, El Paso de Robles (Paso Robles), Marina, Monterey, Pacific Grove, Sand City, Santa Cruz, Scotts Valley, and Seaside, and portions of the City of San Jose. Splits were made to balance population while considering communities of interest and to meet Voting Rights Act obligations in a neighboring district. There is a zero-population split of the City of Watsonville. This district includes immigrant communities of tech workers who share common interests related to education. The district also includes working-class communities in parts of San Mateo and the southern coastal portion of the district along northern Monterey Bay, near California State University, Monterey Bay.

CD 20 includes portions of Fresno, Kern, Kings, and Tulare County, including the whole Cities of Clovis, Lemoore, Maricopa, Ridgecrest, Taft, and Tehachapi, and portions of the Cities of Bakersfield, Fresno, Hanford, Tulare, and Visalia. Splits were made to respect communities of interest and to balance population while considering communities of interest. This district borders two districts that have obligations under the Voting Rights Act. The borders of this district are impacted by these obligations. Communities within this district share common socio-economic characteristics and are primarily rural and suburban. Communities here share environmental concerns related to water, air quality, and public lands.

CD 21 includes portions of Fresno and Tulare Counties, including the whole Cities of Sanger, Farmersville, Fowler, Exeter, Parlier, Selma, Dinuba, Woodlake, Kingsburg, Reedley, and Orange Cove, and portions of the Cities of Fresno and Visalia. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits were made to meet these obligations and to balance population while considering communities of interest. This district shares the Valley's major transportation corridors of Highway 99, Highway 41, Highway 168, Highway 180, and Highway 198. Communities in this district share interests in agriculture, water, air quality.

CD 22 includes portions of Kern, Kings, and Tulare Counties, including the whole Cities of Arvin, Avenal, Corcoran, Delano, Lindsay, McFarland, Porterville, Shafter, and Wasco, and portions of the Cities of Bakersfield, Hanford, and Tulare.

This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits were made to meet these obligations and to balance population while considering communities of interest. Cities along Interstate 5 in Kings and Kern Counties are kept together along with many communities connected by Highway 99. Communities in this district share common interests in water, broadband accessibility, agriculture, and economic development.

CD 23 includes a portion of Kern, Los Angeles, and San Bernardino Counties, including the whole Cities of Adelanto, Barstow, Big Bear Lake, California City, Hesperia, Twentynine Palms, Victorville, and Yucaipa, the towns of Apple Valley and Yucca Valley, and portions of the Cities of Colton, Highland, Loma Linda, Redlands, and San Bernardino. Splits were made to balance population while considering communities of interest. This district includes communities in the High Desert, rural mountainous communities, the entire Morongo Basin, recreational areas, and an association of local governments. Shared interests include protection and preservation of lands, tourism, and economic development.

CD 24 includes the whole County of Santa Barbara, portions of San Luis Obispo and Ventura Counties, including the whole Cities of Arroyo Grande, Buellton, Carpinteria, Goleta, Grover Beach, Guadalupe, Lompoc, Morro Bay, Ojai, Pismo Beach, San Luis Obispo, Santa Barbara, Santa Maria, and Solvang, and portions of San Buenaventura (Ventura). The district consists of coastal communities and smaller and rural agriculture-based communities, including family farmers.

CD 25 includes all of Imperial County, portions of Riverside and San Bernardino Counties, including the whole Cities of Banning, Beaumont, Blythe, Brawley, Calexico, Calipatria, Cathedral City, Coachella, Desert Hot Springs, El Centro, Holtville, Imperial, Indio, Needles, San Jacinto, and Westmorland, and portions of the City of Hemet. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits were made to meet those obligations and to balance population while considering communities of interest. This district is characterized by interests related to environmental and health concerns associated with the Salton Sea, agriculture, tribal lands, the Colorado River Basin, and the United States/Mexico border.

CD 26 includes portions of Los Angeles and Ventura Counties, including the whole Cities of Agoura Hills, Calabasas, Camarillo, Fillmore, Moorpark, Port Hueneme, Santa Paula, Simi Valley, Thousand Oaks, Oxnard, and Westlake Village, and a portion of San Buenaventura (Ventura). Splits were made to balance population while considering communities of interest. The Cities of Oxnard, Port Hueneme, and Ventura include significant immigrant communities of farmworkers that are socioeconomically cohesive.

CD 27 includes a portion of Los Angeles County, including the whole Cities of Lancaster, Palmdale, and Santa Clarita, and a portion of the City of Los Angeles.

Splits were made to balance population while considering communities of interest. This district includes High Desert communities that commute between Antelope Valley and Santa Clarita using SR 14 and public transit like the Metrolink Antelope Valley line. The district encompasses a regional economy and is a hub of the aerospace industry.

CD 28 includes a portion of Los Angeles and San Bernardino Counties, including the whole Cities of Alhambra, Arcadia, Claremont, La Cañada Flintridge, Monterey Park, Rosemead, San Gabriel, San Marino, Sierra Madre, South Pasadena, and Temple City, and portions of the Cities of Glendora, Los Angeles, Monrovia, Pasadena, Rancho Cucamonga, and Upland. Splits were made to balance population while considering communities of interest. There is a zero-population split of the City of San Bernardino. This district is home to long-standing and significant immigrant Asian American and Pacific Islander communities that share deep cultural and linguistic ties.

CD 29 includes a portion of Los Angeles County, including the entire City of San Fernando and the City of Los Angeles neighborhoods of Lake Balboa, North Hollywood, Pacoima, Panorama City, Van Nuys, Valley Village, Sun Valley, and Sylmar. These San Fernando Valley communities strongly define themselves as north of Mulholland Drive. This district features a number of immigrant, working-class communities that are socio-economically cohesive.

CD 30 includes a portion of Los Angeles County, including the whole Cities of Burbank, Glendale, and West Hollywood, and portions of the Cities of Los Angeles and Pasadena. Splits were made to balance population while considering communities of interest. This district includes the Verdugo Mountains Open Space and includes the Armenian communities in Glendale and Burbank, the Thai Town community in Hollywood, and the LGBTQ+ communities in Hollywood and West Hollywood.

CD 31 includes a portion of Los Angeles County, including the whole Cities of Azusa, Baldwin Park, Bradbury, Covina, Duarte, El Monte, Irwindale, La Puente, La Verne, San Dimas, South El Monte, and West Covina, and portions of the Cities of Glendora, Industry, and Monrovia. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits were made to meet these obligations and to balance population while considering communities of interest. This district consists of communities of interest in the Eastern San Gabriel Valley, including those with shared interests in forest management, recreation, and environmental protection due to recent fires.

CD 32 includes portions of Los Angeles and Ventura Counties, including the whole Cities of Hidden Hills and Malibu, and the City of Los Angeles neighborhoods of Sherman Oaks, Encino, Woodland Hills, Canoga Park, Winnetka, Northridge, and Chatsworth. Splits were made to balance population while considering communities of interest. This district includes numerous smaller Valley

communities tied together via Highway 101, which are themselves, connected the coastal communities in the district via Topanga Canyon Boulevard.

CD 33 includes a portion of San Bernardino County, including the whole Cities of Grand Terrace and Rialto, and portions of the Cities of Colton, Fontana, Highland, Rancho Cucamonga, Redlands, and San Bernardino. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits were made to meet these obligations, to balance population while considering communities of interest. There is a zero-population split of the City of Loma Linda. Communities in this district have shared interests relating to healthcare, education, and economic development.

CD 34 includes a portion of Los Angeles County, including the northeastern and eastern portions of the City of Los Angeles. Splits were made to balance population while considering communities of interest. This district is home to numerous historic working-class, immigrant neighborhoods that are socioeconomically cohesive. Shared concerns relate to housing, gentrification, displacement, and education.

CD 35 includes portions of Los Angeles, Riverside, and San Bernardino Counties, including the whole Cities of Chino, Montclair, and Ontario, and portions of the Cities of Chino Hills, Eastvale, Fontana, Pomona, Rancho Cucamonga, and Upland. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. This district is composed of working-class communities with similar socioeconomic characteristics, shared transportation issues, and common economic interests.

CD 36 includes a western portion of Los Angeles County, including the whole Cities of Santa Monica, Beverly Hills, Manhattan Beach, Hermosa Beach, Redondo Beach, El Segundo, Rancho Palos Verdes, Palos Verdes Estates, Rolling Hills, Rolling Hills Estates, and Lomita, and a portion of the City of Los Angeles, Torrance, and Culver City. Splits were made to balance population while considering communities of interest. This district consists of beach communities, the Palos Verdes Peninsula, and UCLA. Economically, it features a growing tech industry and a focus on tourism.

CD 37 includes a portion of Los Angeles County, including portions of the Cities of Culver City and Los Angeles. Splits were made to balance population while considering communities of interest. This district includes South Los Angeles and many historic Black neighborhoods such as Leimert Park and Ladera Heights. Food insecurity, housing, gentrification, and criminal justice issues are of particular concern in this district.

CD 38 includes a portion of Los Angeles and Orange Counties, including the whole Cities of Norwalk, Diamond Bar, Walnut, Montebello, Whittier, La Habra, La Habra Heights, La Mirada, Santa Fe Springs, and Pico Rivera. This district

includes a portion of the Cities of Downey, Pomona, and Industry. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. In addition to a significant Latino population, this district includes East San Gabriel Valley Cities with sizable communities that share language schools, commercial centers, and religious institutions.

CD 39 includes a portion of Riverside County, including the whole Cities of Perris, Jurupa Valley, and Moreno Valley, and portions of the City of Riverside. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. The Interstate 215 corridor connects the major communities within this district. Communities within this district share interests related to environmental and air-quality concerns, a booming freight and logistics industry, economic development, University of California, Riverside, and March Air Reserve Base.

CD 40 includes portions of Orange, Riverside, and San Bernardino Counties, including the whole Cities of Aliso Viejo, Lake Forest, Mission Viejo, Rancho Santa Margarita, Tustin, and Villa Park, and portions of the Cities of Anaheim, Brea, Chino Hills, Corona, Laguna Hills, Laguna Woods, Orange, and Yorba Linda. Splits were made to balance population while considering communities of interest. Communities in this district have common interests in issues related to the environment, open spaces, and education.

CD 41 includes a portion of Riverside County, including the whole Cities of Calimesa, Canyon Lake, Indian Wells, Lake Elsinore, La Quinta, Menifee, Norco, Palm Desert, Palm Springs, Rancho Mirage and Wildomar, and portions of the Cities of Corona, Eastvale, and Riverside. The lines of this district are impacted by Voting Rights Act obligations in three neighboring districts. Additionally, a northern border was drawn to respect the San Bernardino-Riverside County border. There is a zero-population split of the City of Hemet. This district is characterized by common interests and issues related to tourism, tribal lands, low desert geography, and housing. Communities in this district are connected by Interstate 15 and State Route 74.

CD 42 includes a portion of Los Angeles County, including the whole Cities of Avalon, Bell, Bell Gardens, Commerce, Cudahy, Huntington Park, Maywood, Signal Hill, and Vernon, and portions of the Cities of Lakewood, Long Beach, Bellflower and Downey. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits were made to meet these obligations to balance population while considering communities of interest. This district ties Long Beach to Southeast Los Angeles communities along highway corridors, connecting many who are impacted by pollution from freight and heavy traffic associated with the Ports of Los Angeles and Long Beach.

CD 43 includes a portion of Los Angeles County, the whole Cities of Compton, Gardena, Hawthorne, Inglewood, and Lawndale, and portions of the

Cities of Los Angeles and Torrance. Splits were made to balance population while considering communities of interest. This largely Black and Latino district is socioeconomically cohesive and predominantly lower income. The district is home to various industries, including aerospace, automobile, and oil. The district also features Los Angeles International Airport. Communities in this district share concerns related to environmental justice and housing insecurity.

CD 44 includes a portion of Los Angeles County, including the whole Cities of Carson, Lynwood, Paramount, and South Gate, and portions of Bellflower, Lakewood, Long Beach, and Los Angeles. This district is located in and adjacent to areas where there are obligations under Section 2 of the Voting Rights Act. This district consists of some Gateway Cities of Southeast Los Angeles County, which have historically collaborated together, share similar demographics, and are primarily immigrant and working-class communities. Funding for infrastructure and addressing environmental health, pollution, and interstate highway issues are priorities for these communities.

CD 45 includes portions of Los Angeles and Orange Counties, including the whole Cities of Artesia, Buena Park, Cerritos, Cypress, Fountain Valley, Hawaiian Gardens, La Palma, Los Alamitos, Placentia, and Westminster, and portions of the Cities of Brea, Fullerton, Garden Grove, Lakewood, and Yorba Linda. Splits were made to balance population while considering communities of interest. This district features cohesive immigrant and refugee communities of Vietnamese, Arab, Middle Eastern, Muslim, South Asian, and North African origin. Communities in this district share socio-economic status and deep linguistic and cultural ties. The lines of this district are impacted by Voting Rights Act obligations in neighboring districts.

CD 46 includes a portion of Orange County, including the whole Cities of Santa Ana and Stanton, and portions of Anaheim, Fullerton, Garden Grove, and Orange. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. Splits were made to meet these obligations and to balance population while considering communities of interest. This district is defined by multi-racial and multi-ethnic working-class communities, which share social and economic interests such as education, healthcare, and housing.

CD 47 includes a portion of Orange County, including the whole Cities of Costa Mesa, Huntington Beach, Irvine, Newport Beach, and Seal Beach, and portions of Laguna Beach, Laguna Hills, and Laguna Woods. Splits were made to balance population while considering communities of interest. Communities in this district share socio-economic characteristics and have common interests in coastal issues, including water quality and beach erosion.

CD 48 includes portions of Riverside and San Diego Counties, including the whole Cities of Murrieta, Poway, Santee, and Temecula, and portions of the Cities of Escondido and La Mesa. Splits were made to balance population while

considering communities of interest. There is a zero-population split of the City of San Diego. This district consists of a significant portion of eastern San Diego County and includes agriculture lands, open space, and public lands, and areas for recreational activities. This district shares major transportation corridors such as Interstate 8, Highway 76, and the Interstate 15 corridor. These commuting and transportation routes connect less urbanized and rural communities along the foothills and mountain ranges in the east to educational, health, and social service in the more urbanized communities in south San Diego County.

CD 49 includes portions of Orange and San Diego Counties, including the whole Cities of Carlsbad, Dana Point, Del Mar, Encinitas, Laguna Niguel, Oceanside, San Clemente, San Juan Capistrano, Solana Beach, and Vista, and a portion of Laguna Beach. Splits were made to balance population while considering communities of interest. The coastal communities of southern Orange County and northern San Diego County share common interests in coastal erosion, tourism, infrastructure, and issues and opportunities relating to the Camp Pendleton Marine Corps Base.

CD 50 includes a portion of San Diego County, including the whole Cities of Coronado and San Marcos, and portions of the Cities of Escondido and San Diego. Splits were made to balance population while considering communities of interest. This district includes coastal cities and neighborhoods that share transportation corridors. It includes a mix of working-class and wealthier communities. Shared interests include coastal issues and tourism.

CD 51 includes a portion of San Diego County, including the whole Cities of El Cajon and Lemon Grove, and portions of the Cities of La Mesa and San Diego. Splits were made to balance population while considering communities of interest. This district features highly urbanized neighborhoods, significant LGBTQ+ communities, and diverse ethnic enclaves. The district also includes the University of San Diego and San Diego State University, tourist attractions, a growing tech industry, and Marine Corps Air Station Miramar.

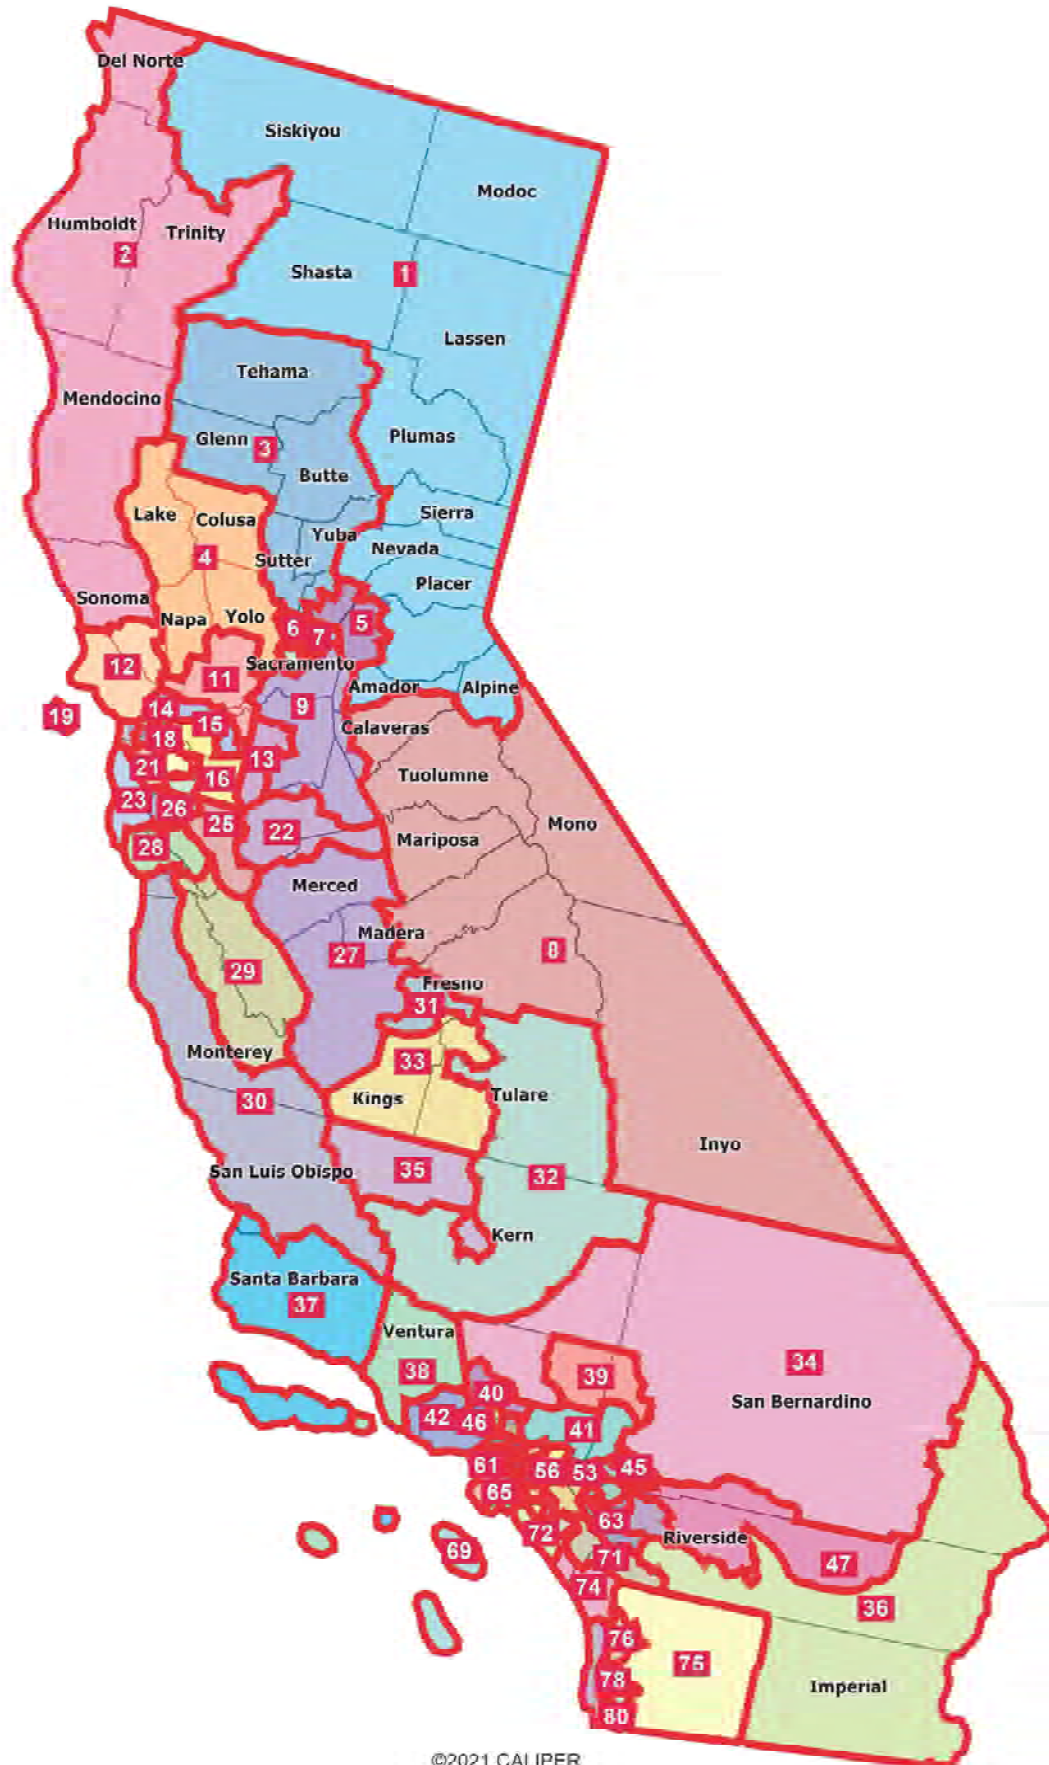

CD 52 includes a portion of San Diego County, including the whole Cities of Chula Vista, Imperial Beach, and National City, and portions of the City of San Diego. This district is located in areas where there are obligations under Section 2 of the Voting Rights Act. This district keeps the South Bay community whole and respects communities of interests around historic Barrio Logan. Common interests relate to environmental and air quality concerns, affordable housing, and immigration.
