SENATE COMMITTEE ON
REAPPORTIONMENT
WORKSHOP ON
CONGRESSIONAL MAPS
NOVEMBER 16, 2021

Congressional Redistricting Plans in Florida

- Committee staff has produced a series of redistricting plans per the directives received on October 18, 2021.
- Districts are numbered to be roughly analogous to their predecessor districts, with the exception of the 28th district.
- In drawing plans, staff relied on the plain language of the constitution, federal law, and existing judicial precedent to ensure that plans comply with the complex layering of federal and state standards.
- Districts were drawn to balance co-equal Tier Two standards of Article III, Sections 20 and 21 of the Florida Constitution, unless doing so would conflict with Tier One standards.

Congressional Redistricting Plans in Florida

- To comply with Tier-One standards:
  - Districts were drawn without reviewing any political data other than where a review of the political data was required to perform an appropriate functional analysis to evaluate whether or not a district denied or abridged a racial or language minority group's ability to participate in the political process or diminished their ability to elect representatives of their choice.
  - Districts were drawn without the use of any residence information of any sitting member of the Florida Legislature or Congress.
  - Districts were drawn without regard to the preservation of existing district boundaries.

Congressional Redistricting Plans in Florida

- To comply with Tier-Two standards, districts were drawn:
  - To be as nearly equal in population as practicable, with district population deviations of plus or minus one person of the ideal population of 769,221.
  - To be visually compact in relation to their shape and geography. Mathematical scores were used where appropriate.
  - To use county boundaries where feasible. In less populated areas, whole counties were grouped together to make a district or set of districts. In more populated areas where it was feasible to do so, districts were kept wholly within a county.
  - To use geographic features that are easily recognizable and readily ascertainable as district boundaries where feasible. The Boundary Analysis for each plan illustrates the rate at which railways, interstates, federal and state highways, and large water bodies were used as district boundaries for each district.
  - To keep cities whole where doing so was feasible, while recognizing the impermanent and irregular shapes of municipal boundaries. If or when a city was split, static geographic features were sought out for usage as district boundaries.
- Accordingly, plans contain trade-offs within the co-equal Tier Two criteria, and are presented for consideration and exercise of legislative discretion.

Congressional Redistricting Plans in Florida

- Plans are published and available on www.floridaredistricting.gov, where they may be viewed interactively or downloaded from the Submitted Plans page for independent analysis:
  - S000C8002
  - S000C8004
  - S000C8006
  - S000C8008
- Plan packets are part of the meeting materials published by the committee and available on the Select Subcommittee's page:
  - Select Subcommittee on Congressional Reapportionment

Plan Packets

- Plan packets contain everything used to analyze a redistricting plan. Data comes from the Redistricting Application, and is reformatted for easier consumption.
  - Statewide map, with insets of South Florida, Jacksonville, Tampa Bay, and Orlando.
  - Census and Boundary Statistics
  - Split Counties and Cities
