The background of the slide is a blue-tinted photograph of the Florida State Capitol building. The building is a large, white, neoclassical structure with a prominent central dome and a portico supported by columns. Palm trees and other landscaping are visible in the foreground. A large, faint watermark of the Florida State Seal is visible in the background, behind the text.

# SENATE COMMITTEE ON REAPPORTIONMENT

## WORKSHOP ON CONGRESSIONAL MAPS

NOVEMBER 16, 2021

## Congressional Redistricting Plans in Florida

- Committee staff has produced a series of redistricting plans per the directives received on October 18, 2021.
- Districts are numbered to be roughly analogous to their predecessor districts, with the exception of the 28<sup>th</sup> district.
- In drawing plans, staff relied on the plain language of the constitution, federal law, and existing judicial precedent to ensure that plans comply with the complex layering of federal and state standards.
- Districts were drawn to balance co-equal Tier Two standards of Article III, Sections 20 and 21 of the Florida Constitution, unless doing so would conflict with Tier One standards.

## Congressional Redistricting Plans in Florida

- To comply with Tier-One standards:
  - Districts were drawn without reviewing any political data other than where a review of the political data was required to perform an appropriate functional analysis to evaluate whether or not a district denied or abridged a racial or language minority group's ability to participate in the political process or diminished their ability to elect representatives of their choice.
  - Districts were drawn without the use of any residence information of any sitting member of the Florida Legislature or Congress.
  - Districts were drawn without regard to the preservation of existing district boundaries.

## Congressional Redistricting Plans in Florida

- To comply with Tier-Two standards, districts were drawn:
  - To be as nearly equal in population as practicable, with district population deviations of plus or minus one person of the ideal population of 769,221.
  - To be visually compact in relation to their shape and geography. Mathematical scores were used where appropriate.
  - To use county boundaries where feasible. In less populated areas, whole counties were grouped together to make a district or set of districts. In more populated areas where it was feasible to do so, districts were kept wholly within a county.
  - To use geographic features that are easily recognizable and readily ascertainable as district boundaries where feasible. The Boundary Analysis for each plan illustrates the rate at which railways, interstates, federal and state highways, and large water bodies were used as district boundaries for each district.
  - To keep cities whole where doing so was feasible, while recognizing the impermanent and irregular shapes of municipal boundaries. If or when a city was split, static geographic features were sought out for usage as district boundaries.
- Accordingly, plans contain trade-offs within the co-equal Tier Two criteria, and are presented for consideration and exercise of legislative discretion.

## Congressional Redistricting Plans in Florida

- Plans are published and available on [www.floridaredistricting.gov](http://www.floridaredistricting.gov), where they may be viewed interactively or downloaded from the [Submitted Plans](#) page for independent analysis:
  - [S000C8002](#)
  - [S000C8004](#)
  - [S000C8006](#)
  - [S000C8008](#)
- Plan packets are part of the meeting materials published by the committee and available on the Select Subcommittee's page:
  - [Select Subcommittee on Congressional Reapportionment](#)

## Plan Packets

- Plan packets contain everything used to analyze a redistricting plan. Data comes from the Redistricting Application, and is reformatted for easier consumption.
  - Statewide map, with insets of South Florida, Jacksonville, Tampa Bay, and Orlando.
  - Census and Boundary Statistics
  - Split Counties and Cities
  - Functional Analysis of districts protected from non-diminishment standards in Tier-One of Article III Sections 20 and 21 of the Florida Constitution.

# Census and Boundary Statistics

- Census and Boundary Statistics
  - District's population deviation from the ideal, also expressed as a percentage
  - Voting Age Population for
    - BVAP – respondents who identified as being Black either singly or in combination with some other race and/or ethnicity, including Hispanic
    - HVAP – respondents who identified as Hispanic and of any race or combination of races, including Black
  - District Area in square miles, Perimeter in miles, and Compactness scores (Convex Hull, Polsby-Popper, and Reock).
  - Counts of whole and partial counties and cities within each district.
  - Counts of counties and cities that have all their population in only one district.
  - Each district's boundary coincidence with certain types of features identified by the US Census Bureau in their TIGER layers. These include those recognized by the Florida Supreme Court as political and geographic boundaries:
    - City boundaries
    - County boundaries
    - Primary and Secondary Roads (Interstates, US Highways, and State Highways)
    - Railroads
    - Water features with a contiguous area of greater than ten acres.
  - The portion of each district's boundary that does not coincide with these features.

## Split Cities and Counties

- Split Counties
  - List of counties that have two or more districts. Total population is presented along with the area (square miles), and is also expressed as a percentage.
- Split Cities
  - List of cities that have two or more districts. Total population is presented along with the area (square miles), and is also expressed as a percentage.

## Functional Analysis – Summary

- Functional Analysis - Summary
  - Lists only the districts for which it is necessary to evaluate whether or not a district denies or abridges a racial or language minority group's ability to participate in the political process, or diminishes their ability to elect representatives of their choice.
  - BVAP – respondents who identified as being Black either singly or in combination with some other race and/or ethnicity, including Hispanic
  - HVAP – respondents who identified as Hispanic and of any race or combination of races, including Black
  - 2020 General Election Voter Registration Information for:
    - Registration by Party
    - Registration by Race or Ethnicity
    - Registration by Race or Ethnicity and Party
    - Registration by Party and Race or Ethnicity

## Functional Analysis – Summary

- Average of Voter Turnout in 2012, 2014, 2016, 2018, and 2020 Primary Elections
  - Turnout by Party and Race or Ethnicity
- Average of Voter Turnout in 2012, 2014, 2016, 2018, and 2020 General Elections
  - Turnout by Party
  - Turnout by Party and Race or Ethnicity
  - Turnout by Race or Ethnicity and Party
- General Election Performance in Statewide Elections 2012-2020
  - Average Performance (Vote Share) for the Democrat and Republican candidate
  - Count of Wins in Statewide contests for Democrat and Republican candidates
  - Margins
    - Maximum margin of victory in a statewide contest for either the Democrat or Republican candidate
    - Minimum margin of victory in a statewide contest for either the Democrat or Republican candidate
    - Average margin of victory in statewide contests for either the Democrat or Republican candidate

## Functional Analysis – Returns

- Shows the percentage of votes received by each candidate in contests for which there was a statewide primary election (2012, 2014, 2016, 2018).
- Shows the percentage of votes received by each candidate in contests for which there was a statewide General Election (2012, 2014, 2016, 2018, 2020).
