JOHN W. LICCIONE

v.

RON DESANTIS, *et al.*

PLAINTIFF EXHIBIT 2

Ballotir Voter-Impact Summary — CD-13 / CD-14 / CD-16

Ballotir Voter-Impact Summary - CD-13 / CD-14 / CD-16

Plaintiff John W. Liccione used Ballotir to analyze official Florida Division of Elections voter registration and voter history files received by Plaintiff on DVD by United States mail in April in Plaintiff's capacity as a declared congressional candidate.

This exhibit summarizes the voter impact effect of EOGPCRP / House Bill D on Florida Congressional Districts 3, 4, and with particular focus on South Pinellas voters removed from the anti-Luna CD 3 electoral universe and assigned to a Manatee anchored CD.

Definition: Democratic-led Coalition voters means registered Democratic, No-Party-Affiliation, Independent, and minor-party voters in Pinellas County. Plaintiff uses this as a voter-file and campaign-analysis metric and does not allege that every No-Party-Affiliation, Independent, or minor-party voter necessarily votes for a Democratic candidate.

A. Current Pinellas CD-14 / Wave-One South Pinellas Bloc

Metric	Ballotir Result
Current Pinellas CD 4 registered voters	126,222
Democratic voters	55,108
Republican voters	34,869
No Party Affiliation voters	32,251
Independent voters	2,720
Minor party voters	1,274
Democratic led Coalition voters	91,353
Coalition advantage in current Pinellas CD 4 bloc over Republican voters	56,484

Summary: The current Pinellas CD 4 bloc is not politically neutral. It is a Democratic led South Pinellas Coalition bloc that Wave One removed from CD 3 and placed into Hillsborough anchored CD 4.

B. Wave-Two Deportation Into New CD-16

Metric	Ballotir Result
Total Pinellas voters moved from current CD 4 and current CD 3 into new CD	103,359
Democratic led Coalition voters moved into new CD	63,448
Net Coalition over Republican removal from CD 3 electoral universe	23,537
Receiving district	New CD-16
Receiving district anchor	Manatee County

Summary: EOGPCRP removes [REDACTED] Pinellas voters from the CD 3 / CD 4 Tampa Bay electoral structure and assigns them to new CD. Of those voters, 3,448 are Democratic led Coalition voters.

Ballotir Voter-Impact Summary - CD-13 / CD-14 / CD-16

C. Effect on CD-13 / Luna-Protection Impact

CD-13 Metric	Before EOGPCRP2026	After EOGPCRP2026	Change
Democratic led Coalition advantage in CD 3	74,710	51,173	-23,537
Democratic two party registration share	40.67%	38.98%	-1.69 pts
Republican two party registration share	59.33%	61.02%	+1.69 pts

Summary EOGPCRP makes CD 3 more favorable to Republican incumbent Anna Paulina Luna by reducing the Democratic led Coalition advantage by 3 53 voters and shifting CD 3 s two party registration further toward Republicans

D. Receiving-District Vote-Wasting Context

Metric	Ballotir Result
Manatee County Republican voters before deported Pinellas voters are added	138,346
Manatee County Democratic voters before deported Pinellas voters are added	66,283
Manatee Republican advantage before deported Pinellas voters are added	72,063

Summary The deported South Pinellas Coalition voters are not merely removed from CD 3 They are placed into a Manatee anchored CD where Manatee County alone already contains a large Republican registration advantage before the deported Pinellas voters are added

E. Ballotir Conclusions

Constitutional Effect	Ballotir Finding
CD-13 is made safer for Luna	The map removes 3 53 more Coalition voters than Republican voters from the CD 3 electoral universe
South Pinellas voters are removed from the anti-Luna contest	3 359 Pinellas voters are moved into new CD
Coalition voters are disproportionately removed	3 44 Democratic led Coalition voters are moved into new CD
The deported voters are moved into a district where they cannot offset the Manatee Republican advantage	Manatee County alone already has a 3 Republican registration advantage before the deported Pinellas voters are added
The map shifts CD-13 Republican	CD 3 moves from approximately 4 Democratic / 59 33 Republican to approximately 3 9 Democratic /

F. One-Sentence Summary

Ballotir proves that EOGPCRP2026 protects Representative Luna by removing 103,359 Pinellas voters - including 63,448 Democratic-led Coalition voters - from the anti-Luna CD-13 electoral universe, reducing the CD-13 Coalition advantage by 23,537 voters, and deporting those voters into a Manatee-anchored CD-16 where Manatee County alone already has a 72,063 Republican registration advantage before the deported Pinellas voters are added.

Underlying Ballotir spreadsheet and source data are available for filing, supplementation, or presentation at hearing as directed by the Court.
