**Details:**

This partial plan of CDs 20-24 takes the Nov. 10 staff-drawn plans and eliminates CD 20's appendage to Boynton Beach.

As this map demonstrates, it possible to eliminate that appendage while maintaining Black voters' ability to elect candidates of choice in CD 20. All key statistics, including Black VAP, share of 2020 general registrants, share of 2020 registered Dems, and share of both 2020 and 2018 Dem primary voters, are comparable to the benchmark. And in fact, those key statistics in my CD 20 each differ from the staff-drawn district by less than one percentage point. (Except for the Black share of the 2018 Dem primary, which is 1.15 points less in my plan, at 64.6%.)

Compared to staff plans, my map improves Tier Two compliance by:

- improving compactness in CD 20 and either CD 21 (in 8004, 8006) or CD 22 (8002, 8008) with the elimination of the Boynton appendage
- making Margate, Lake Worth Beach, Lantana, Hypoluxo, Boynton Beach, Palm Beach, Palm Beach Gardens, and Loxahatchee Groves whole (split in all plans)
- making Boca Raton whole (split in 8004, 8006)
- eliminating a split of Hollywood by removing CD 24 from it (split three ways in all plans)
- generally utilizing existing major geographic and political boundaries, including using the Boca Raton city line and SR/CR 794 (Yamato Rd) as the 21/22 boundary; the FEC Railway in Broward; and the Lake Worth Inlet/Palm Beach town line as the northern boundary of CD 21

I did not use political, elections, or registration data in developing this plan, with the exception of comparing the benchmark, staff-drawn, and my CD 20 to ensure no diminishment of Black voters' ability to elect candidates of choice. I did not draw this plan with the intent to favor or disfavor any political party, incumbent, or potential candidate.

I respectfully submit this plan for your consideration. The altered districts can be plugged into any of the staff maps drawn thus far. These proposed districts have 0 population deviations.
