

Expert Report of Mr. Blakeman B. Esselstyn

Pendergrass v. Raffensperger, No. 1:21-CV-05339-SCJ (N.D. Ga.)

December 12, 2023

Blakeman B. Esselstyn

Expert Report of Blakeman B. Esselstyn

I. INTRODUCTION

1. My name is Blakeman B. Esselstyn. I am the founder and principal of a consultancy called Mapfigure Consulting. A previous report that I submitted on December 5th, 2022 includes information about my qualifications.

2. In both the preliminary injunction hearing and the trial in this matter, I served as a testifying expert. I was accepted by the Court as an expert in redistricting, demographics, and census data, and my expert testimony was credited by the Court.

3. Plaintiffs' counsel has asked me to review the newly enacted Georgia General Assembly electoral district plans for each of the state legislature's two chambers. The analysis that I undertook included comparisons to the previously enacted plans and to the two illustrative redistricting plans, also for the Georgia State Senate and House of Representatives, that I presented in my December 5th, 2022 report.

4. This report will present my findings about the Georgia State Senate plan, followed by findings related to the plan for the Georgia State House. Background information about relevant demographic changes disclosed by the 2020 census, the number of seats and ideal total population counts for districts in each chamber, and compactness measures can also be found in my December 5th, 2022 report.

5. Unless otherwise specified, all map images in the report are ones that I created (though they may be maps showing redistricting plans I did not create).¹

6. More detailed information about the sources of data, the software, and my methodology can be found in **Attachment A**.

7. My conclusions can be summarized as follows: the newly enacted plans for the State Senate and House both include additional majority-Black² districts (two and five respectively) compared to the previously enacted 2021 plans, however, five of the seven additional majority-Black districts contain significant portions of their Black voting age population from areas outside the vote dilution areas specified by the Court. The new plans also depart from their predecessors in other substantive ways, including less adherence to traditional redistricting principles. The illustrative plans that I created in 2022 generally exhibit more adherence to traditional redistricting principles than do the 2023 enacted plans. Further, the new plans include significant—and in the case of the State House, surprisingly extensive—changes that cannot be explained by the requirement to include additional majority-Black districts.

II. Georgia State Senate redistricting plan enacted in December 2023

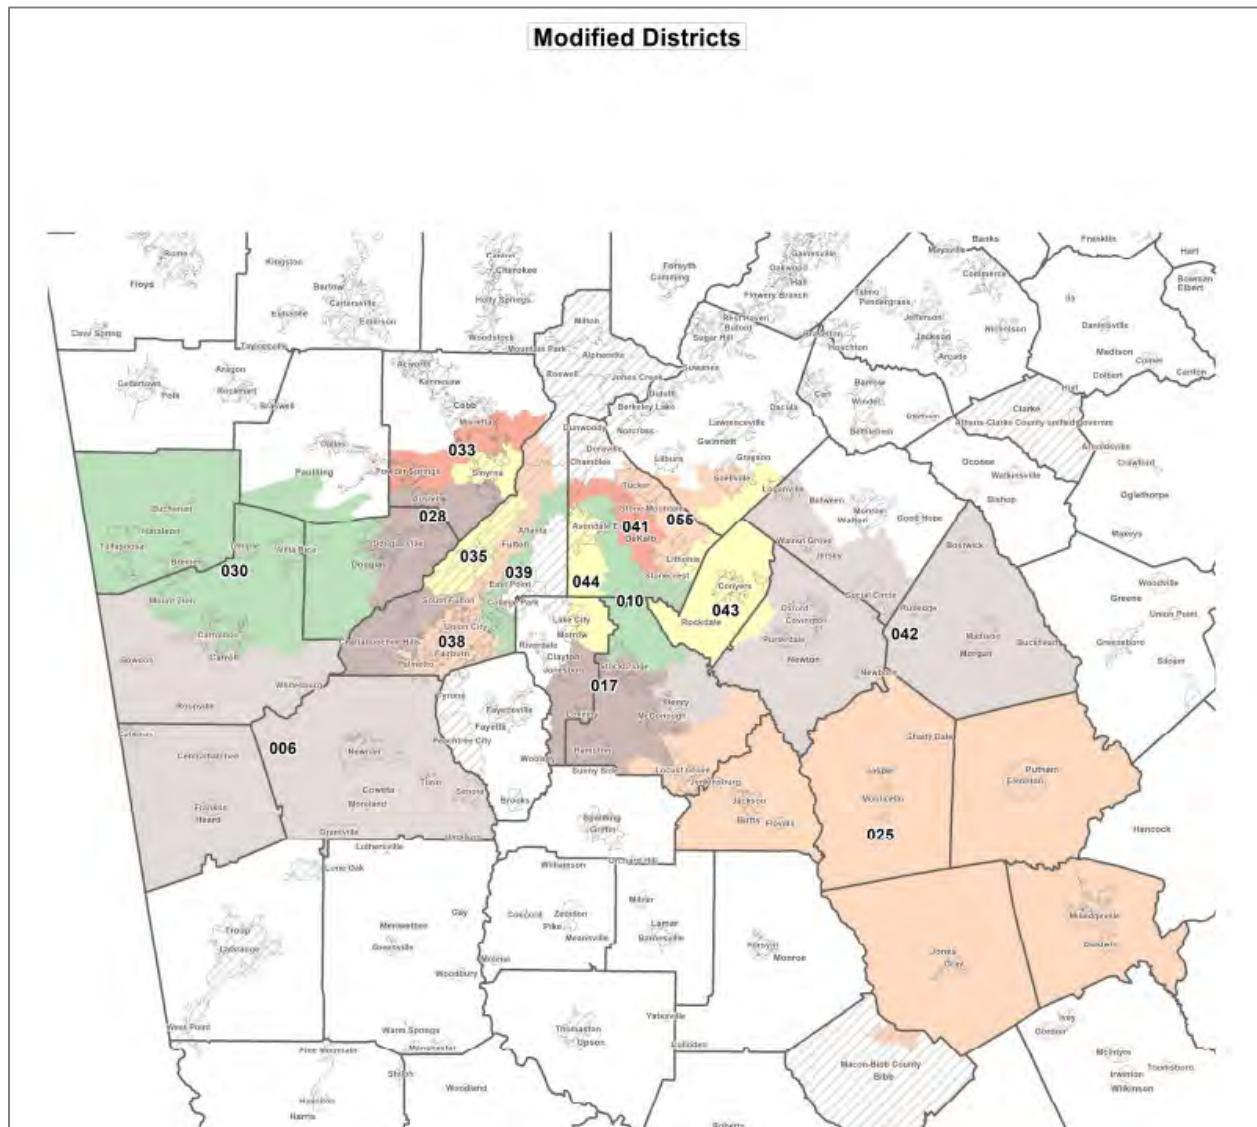

8. On December 8th, 2023, Georgia Governor Brian Kemp signed new State Senate districts into law. As shown in the Maps and Population Report Packet published

¹ Some maps deliberately do not show the State of Georgia in its entirety, as the districts in large areas of the northern and southern parts of the state are unchanged in the 2023 enacted plans. Focusing in on affected portions of the State's geography allows for more clarity and higher level of detail in the map figures.

² Per convention in Section 2 cases, "majority-Black" is taken to indicate that the district's *voting age* population that identifies as Black (alone or in combination) constitutes more than 50% of the district's voting age population.

on the Georgia General Assembly website, the plan modified 15 of the 56 districts relative to the plan enacted in 2021. See Figure 1. The packet is appended to this report as **Attachment B**.

Figure 1: Map of modified districts in enacted State Senate plan

9. Some of my analysis will focus on the 15 out of 56 (26.8%) of districts that were modified, as the statistics and characteristics of other districts in the plan are unchanged from the previously enacted plan that was used in the 2022 elections. But

comparisons with the December 5th, 2022 illustrative plan do not lend themselves to a focus on solely those 15 districts, since the illustrative plan changed different districts and also made more changes in the Black Belt area.

A. Population deviation

10. Population deviation in the 2023 enacted State Senate plan is comparable to both population deviation in the 2021 enacted plan and in the illustrative plan. In all three plans, most district populations are within $\pm 1\%$ of the ideal, and a small minority are within between ± 1 and 2%. None has a deviation of more than 2%. For the 2023 enacted plan the relative average deviation is 0.56%, for the 2021 enacted plan, the relative average deviation is 0.53%, and for the illustrative plan the relative average deviation is 0.67%. Population summary reports for the plans other than the 2023 enacted plan are provided as **Attachment C**.

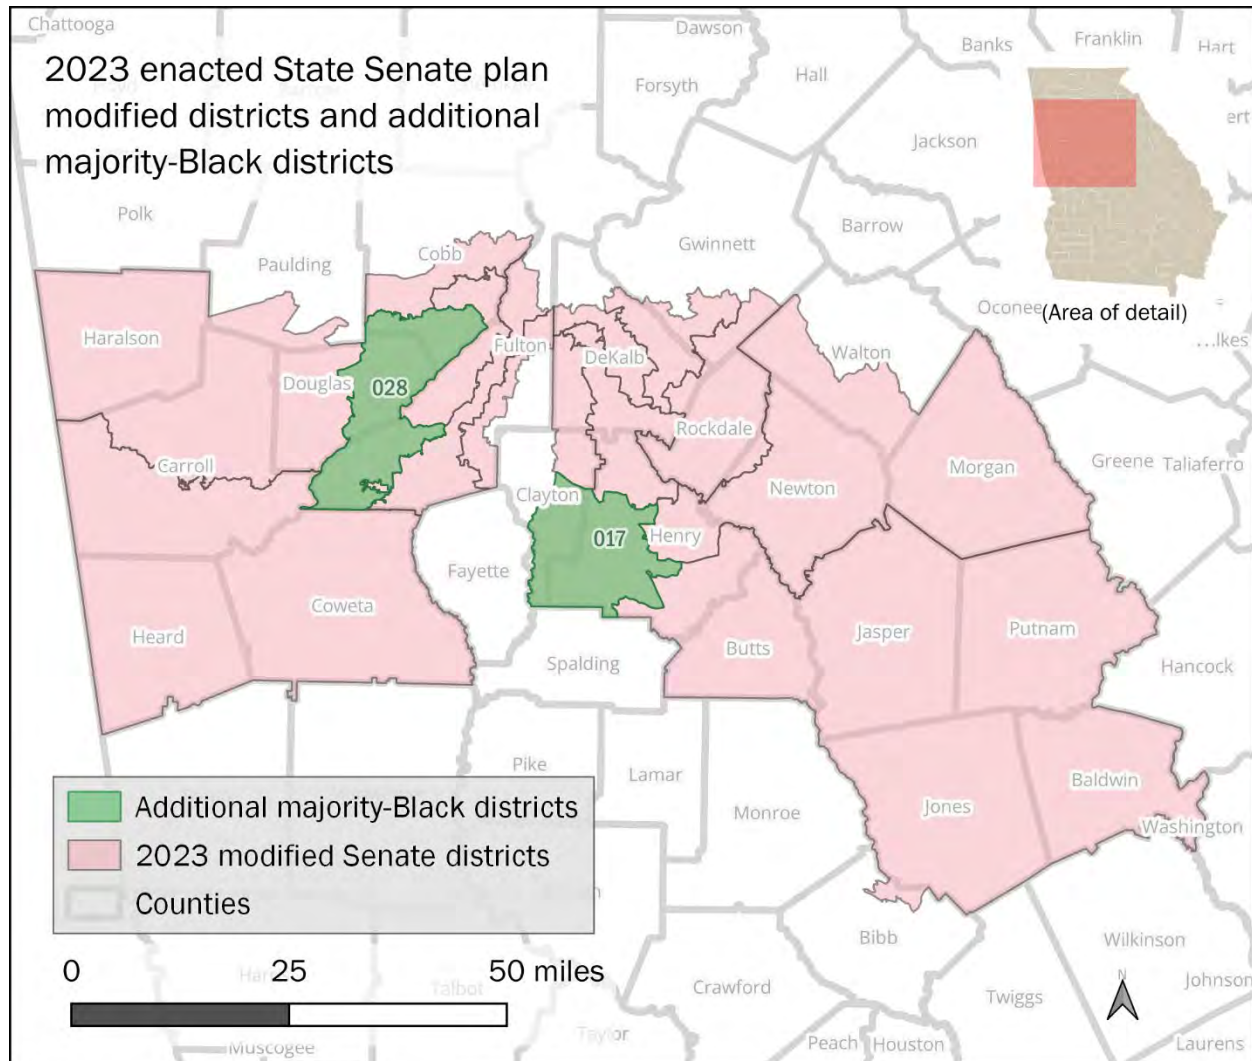

B. Majority-Black districts

11. Of the 56 districts in the 2023 enacted plan, 16 are majority-Black. This number is two higher than the number in the 2021 enacted plan.³ The two districts that were not majority-Black districts in the 2021 plan that are majority-Black in the 2023 plan, namely Senate Districts 017 and 028, are both in the Metro Atlanta area, as can be seen in Figure 1 above. The four majority-Black districts that are south of Metro Atlanta in the Black Belt region were not changed by the 2023 Senate plan and thus will not be a

³ District demographic statistics in the 2023 Maps and Population Report Packet did not include the APBVAP, or “any part Black” voting age population statistics, but I’ve included them as part of **Attachment D**.

focus of this report. The additional majority-Black districts in the 2023 enacted plans can be seen in the context of all the changed districts for the plan in Figure 2 below.

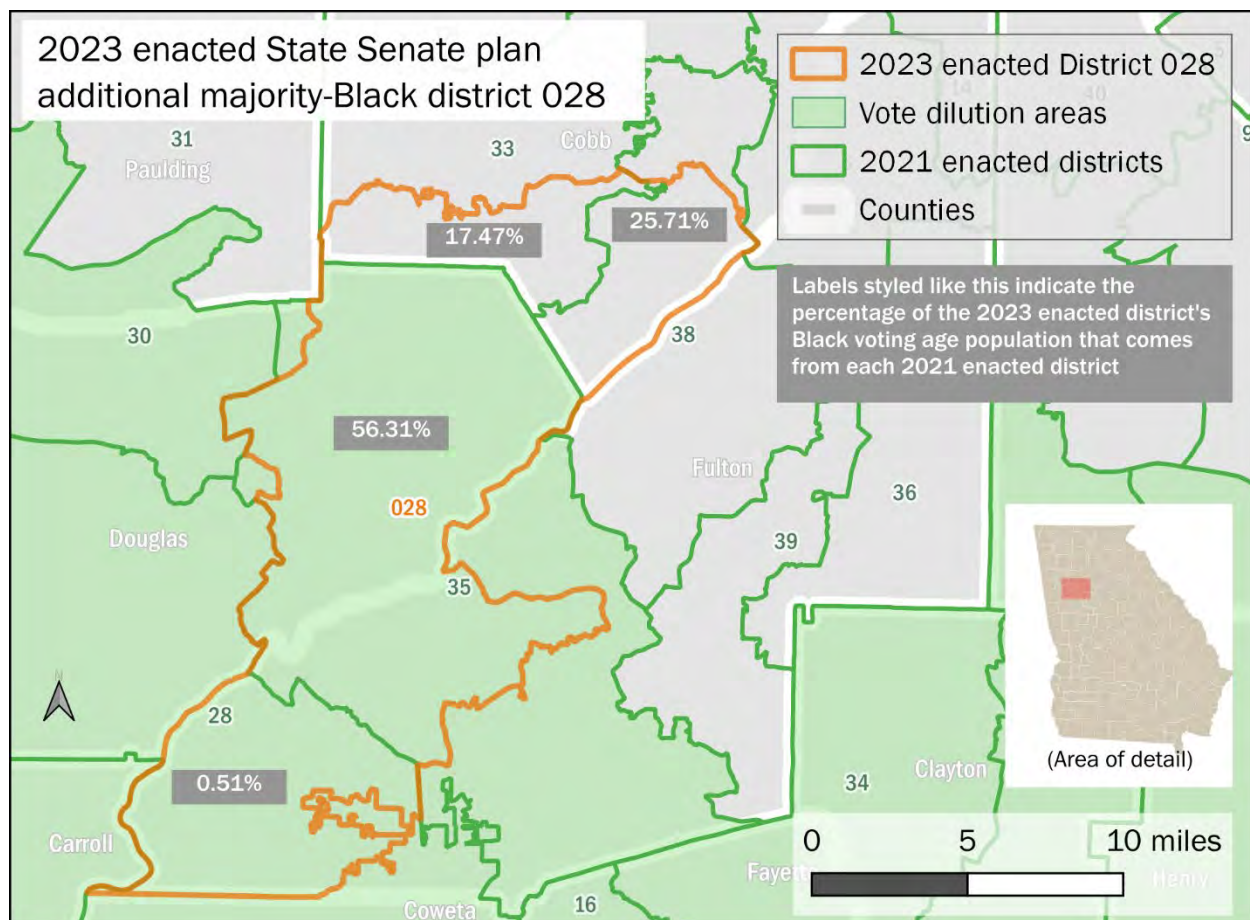

Figure 2: Map of additional majority-Black districts' locations in the context of all the modified districts in 2023 enacted State Senate plan

12. The Court's order from October 26th, 2023 identifies the following districts from the 2021 enacted plan as being in violation of Section 2 of the Voting Rights Act: 10, 16, 17, 25, 28, 30, 34, 35, 43, and 44. In this report, I will refer to those districts' geographies as the vote dilution areas.

13. Senate district 028, one of the two additional majority-Black districts in the enacted 2023 plan, only partially overlaps with the vote dilution areas. In fact, 43.18% of the Black voting age population of the district comes from areas outside the vote dilution areas. See Figure 3. The core constituency report, which indicates the “source” districts for the newly enacted districts (and their relative populations), from which the preceding percentage statistic and the statistics in Figure 3 are derived, is provided in **Attachment E**.

Figure 3: Map showing the relative location of 2023 enacted State Senate District 028 and vote dilution areas

14. The total Black voting age population in the vote dilution areas that is *not* located in a majority-Black district in the 2023 enacted plan numbers 185,186.

C. Compactness

15. Compactness scores in the 2023 plan's modified districts diminish significantly relative to the same districts in the 2021 plan. Mean Reock and Polsby-Popper scores in the 15 changed districts each drop by 20% (from 0.40 to 0.32 and 0.25 to 0.20 respectively). Two districts (038 and 039) become even less compact on Reock and Polsby-Popper scores than what had been the least compact district in the 2021 enacted plan. Reports on measures of compactness for entire plans and changed districts can be found in **Attachment F**.

16. The chart below in Figure 4 shows the Reock scores from the 2021 and 2023 plans for the 15 districts that were modified in the latter, sorted in ascending order. This graphic illustrates that all of the modified districts in the 2023 plan score as less compact than their sorted counterparts in the 2021 plan and shows how much lower the districts in the 2023 plan perform on these metrics.

Figure 4: Chart of sorted compactness scores (Reock)

17. The chart in Figure 5 below, showing a similar graphic for the sorted Polsby-Popper scores, reveals a similar pattern, with all of the 2023 scores beneath the 2021 scores. Here more than half of the relevant 2023 districts score worse than the second-worst score from the same 2021 districts.

Figure 5: Chart of sorted compactness scores (Polsby-Popper)

18. Comparing the modified districts from the 2023 enacted plan to the changed districts in the illustrative plan is a less well-ordered undertaking, because (unlike the previous comparison), the districts are drawn from different areas, and there are a different number of changed districts.⁴ That said, comparisons of the summary statistics of the changed districts in each plan show that the illustrative ones solidly outperform the 2023 enacted ones (mean Reock 0.38 vs. 0.32 and mean Polsby-Popper 0.25 vs. 0.20).⁵

⁴ As mentioned earlier, the illustrative plan sought to illustrate a changed configuration in the Black Belt as well as Metro Atlanta, unlike the 2023 enacted plan.

⁵ Even when looking at the summary scores for the entire plans, the illustrative Reock and Polsby-Popper scores are higher than the 2023 enacted ones.

D. Political subdivision splits

19. The newly enacted plan splits one county more than the 2021 plan, and—surprisingly—splits 18 more VTDs, an increase of 38.3% over the previous plan’s total of 47.⁶ The newly enacted plan splits four fewer counties than the illustrative plan, but as John Morgan pointed out in his January 23, 2023 report, four of the county splits in the illustrative plan were related to changes made in the eastern Black Belt area. The newly enacted plan splits 16 more VTDs than the illustrative plan. Relevant reports can be found in **Attachment G**.

E. Core retention

20. As mentioned previously, the newly enacted plan modified 15 districts, which is comparable to the number of districts changed in the illustrative plan outside of the Black Belt. A closer look at the areas impacted, however, indicates that the changes in the newly enacted plan would be significantly more disruptive.

21. Even though the new majority-Black Senate District 017 is in Clayton and Henry Counties, the plan makes surprisingly substantial changes to the arrangements of districts in DeKalb and Gwinnett Counties. One striking example is that Senate District 042 is relocated from western DeKalb, where it included part of the City of Atlanta, to the eastern edges of the Metro area, east of Rockdale County.

⁶ While local election precincts in Georgia can and do change throughout the decade, the U.S. Census Bureau uses a similar entity called “voting districts” (also referred to as “VTDs”) that are set at the time of each decennial census and do not change in between. The VTD geographies provided by the U.S. Census Bureau in 2020 as part of the P.L. 94-171 geographic support products were designed to match the precinct geographies in Georgia at the time of that census. Most redistricting software uses the VTD geographies instead of precincts, as those are political subdivision units to which the population counts are designed to be reliably assigned. In practice, the terms “precincts” and “VTDs” often are used interchangeably.

22. In another example from the western side of Atlanta, Senate District 006 goes from being in Fulton and Cobb Counties, also including part of the City of Atlanta, out to the western edge of the state, in Heard, Carroll, and Coweta Counties.

23. Analysis of the modified districts reveals that 1,539,468 people, or 14.4% of the entire state population would be assigned to a new district under this plan. Remarkably, this number of people, when divided by the number of affected districts, yields 102,631 people, 53.7% of a typical district population—in other words, on average, in the affected districts, well over half of the population would be re-assigned.⁷

24. In stark contrast, the illustrative Senate plan, which modified 47% *more* districts (22 instead of 15, as it was illustrating a changed configuration in the Black Belt as well), would have changed the assignments of 1,122,851 (a reduction of 416,617 people, or 27%, *even with seven more* affected districts). When expressed as a per-district reassignment, the number turns out to be 51,039, less than half of the per-district disruption in the newly enacted plan.

25. The illustrative plan shows that this extent of disruption is by no means a required consequence of creating additional majority-Black districts, and also that it is not necessary to relocate entire districts to distant areas where they will retain none of the population from their previous configuration.

⁷ The core constituencies reports, which yielded these numbers, can be found in **Attachment E**, as has been mentioned earlier.

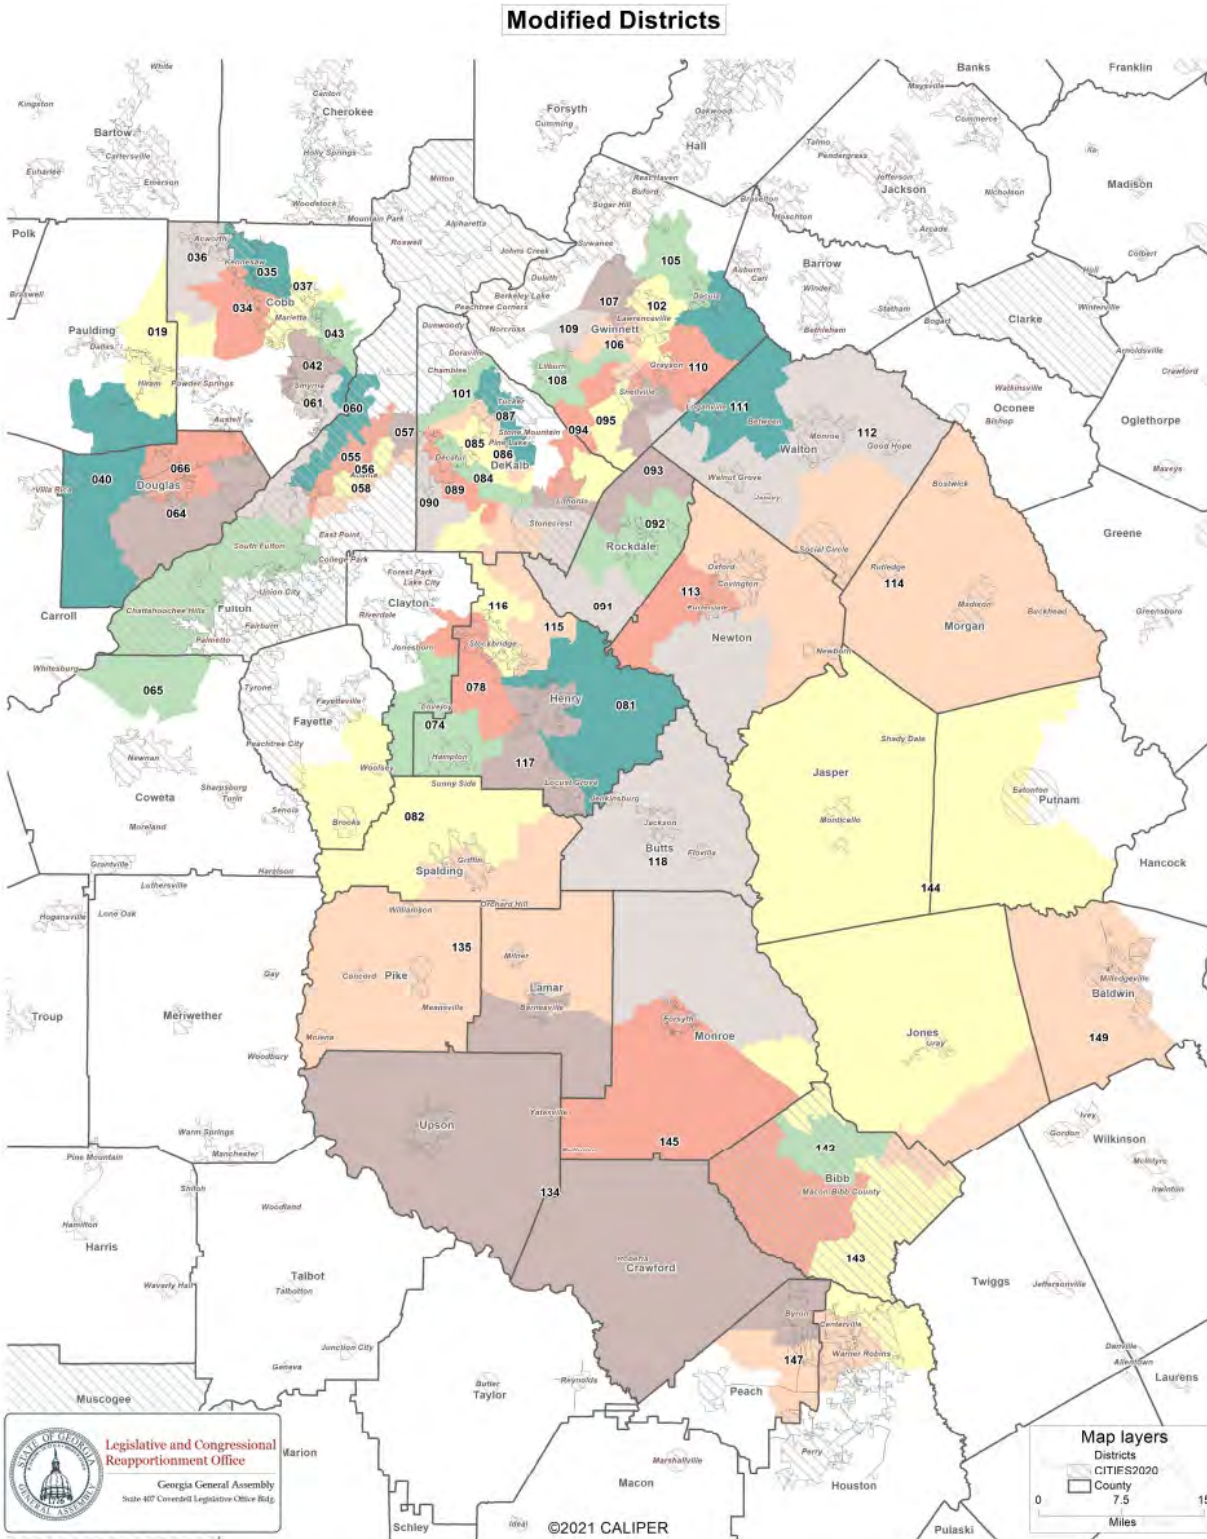

F. Incumbents

26. Based on my analysis using the incumbent addresses provided by counsel shortly after the 2022 general elections, the changed districts in the proposed plan appear to pair no incumbents. The analysis for my illustrative plan also showed that no incumbents would be paired.

III. Georgia House redistricting plan enacted in December 2023

27. On December 8th, 2023, Georgia Governor Brian Kemp signed new State House districts into law. The Maps and Population Report Packet published on the Georgia General Assembly website suggests that the plan modified 56 of the 180 districts relative to the plan enacted in 2021. See Figure 6. The packet is appended to this report as **Attachment H**.

Figure 6: Map of modified districts in enacted State House plan

28. Interestingly, the packet's delineation of "Modified Districts" does not include House District 133. The shape and location of House District 133 have changed significantly from the 2021 plan to the 2023 plan. The 2023 incarnation of House District 133 contains none of the same population as the 2021 incarnation.⁸

29. Much of my analysis will thus focus on the 57 out of 180 (31.7%) of districts that were modified, as the statistics and characteristics of other districts in the plan are unchanged from the previous plan that was used in the 2022 elections.

A. Population deviation

30. Population deviation in the 2023 enacted State House plan is comparable to both population deviation in the 2021 enacted plan and in the illustrative plan. In all three plans, most district populations are within $\pm 1\%$ of the ideal, and a small minority are within between ± 1 and 2%. None has a deviation of more than 2%. For the 2023 enacted plan the relative average deviation is 0.63%, for the 2021 enacted plan, the relative average deviation is 0.61%, and for the illustrative plan the relative average deviation is 0.64%. Population summary reports for the plans other than the 2023 enacted plan are provided in **Attachment I**.

B. Majority-Black districts

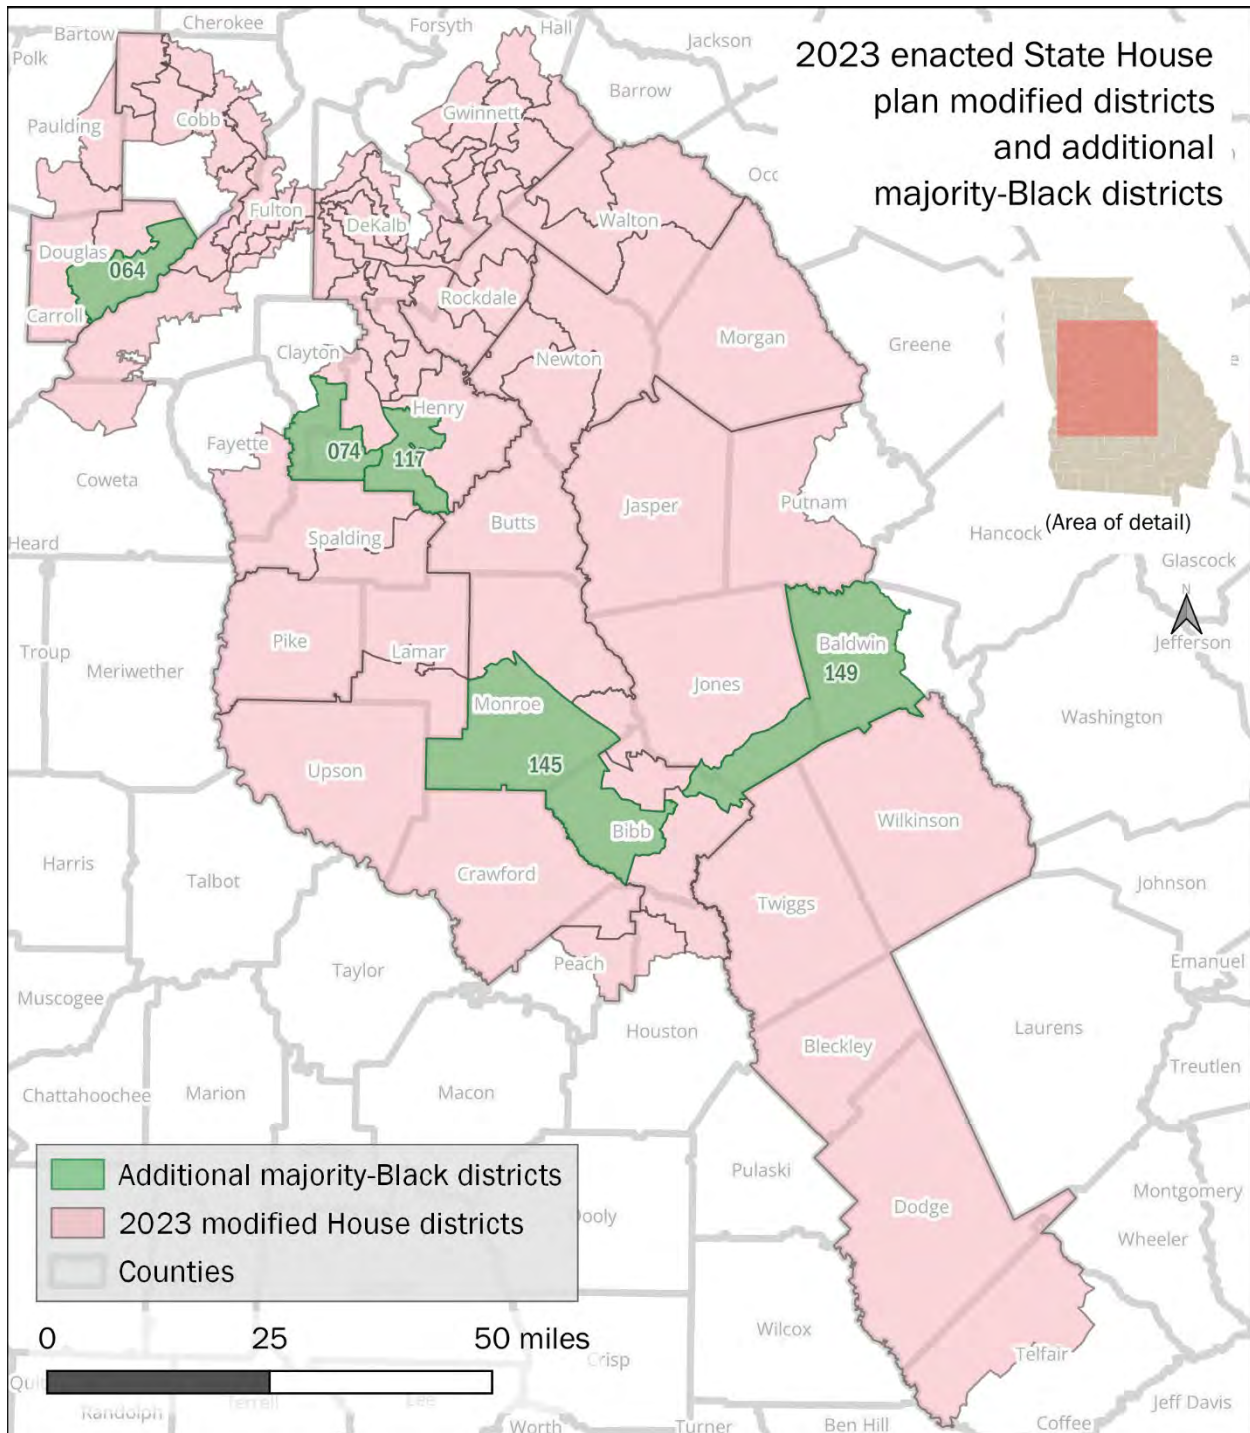

31. Of the 180 districts in the 2023 enacted plan, 54 are majority-Black. This number is five higher than the equivalent number for the 2021 enacted plan. The five

⁸ My presumption is that the General Assembly packet's assertion that District 133 was not modified is because its geography matches the geography of House District 149 from the 2021 plan. However, in my opinion, to omit any mention of District 133 from the map of modified districts gives an incomplete picture of the extent of change.

districts that were not majority-Black districts in the 2021 plan that are majority-Black in the 2023 plan are 064, 074, 117, 145, and 149. The first three in that list are in the Metro Atlanta area, and the last two are in the Macon-Bibb general area, as can be seen in Figure 6.

32. Below, Figure 7 shows the locations of the five additional majority-Black districts in the context of the 57 modified districts.

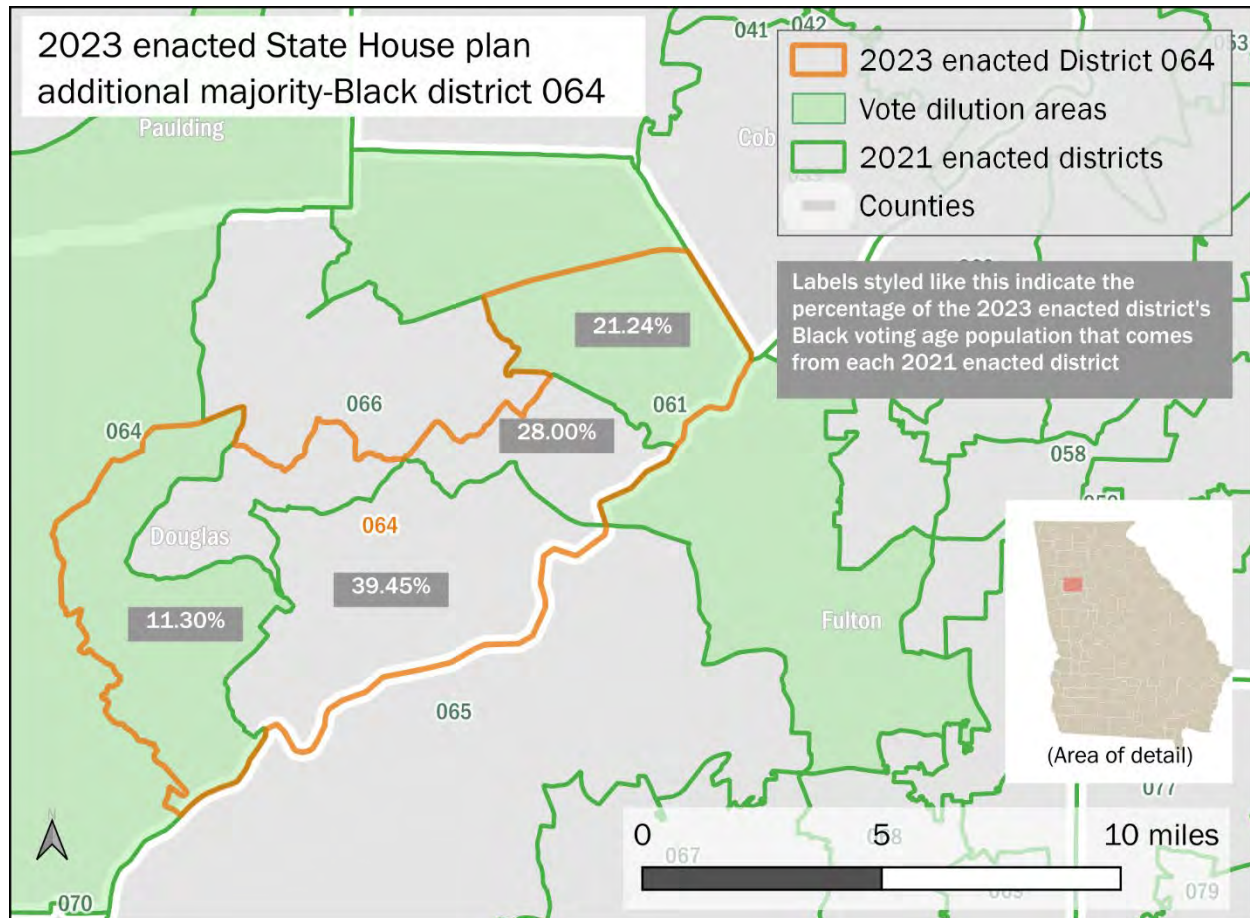

Figure 7: Map of additional majority-Black districts' locations in the context of all the modified districts in the 2023 enacted House plan

33. The Court's order from October 26th, 2023 identifies the following districts from the 2021 enacted plan as being in violation of Section 2 of the Voting Rights Act: 61, 64, 74, 78, 117, 133, 142, 143, 145, 147, and 149. In this report, I will refer to those districts' geographies as the vote dilution areas.

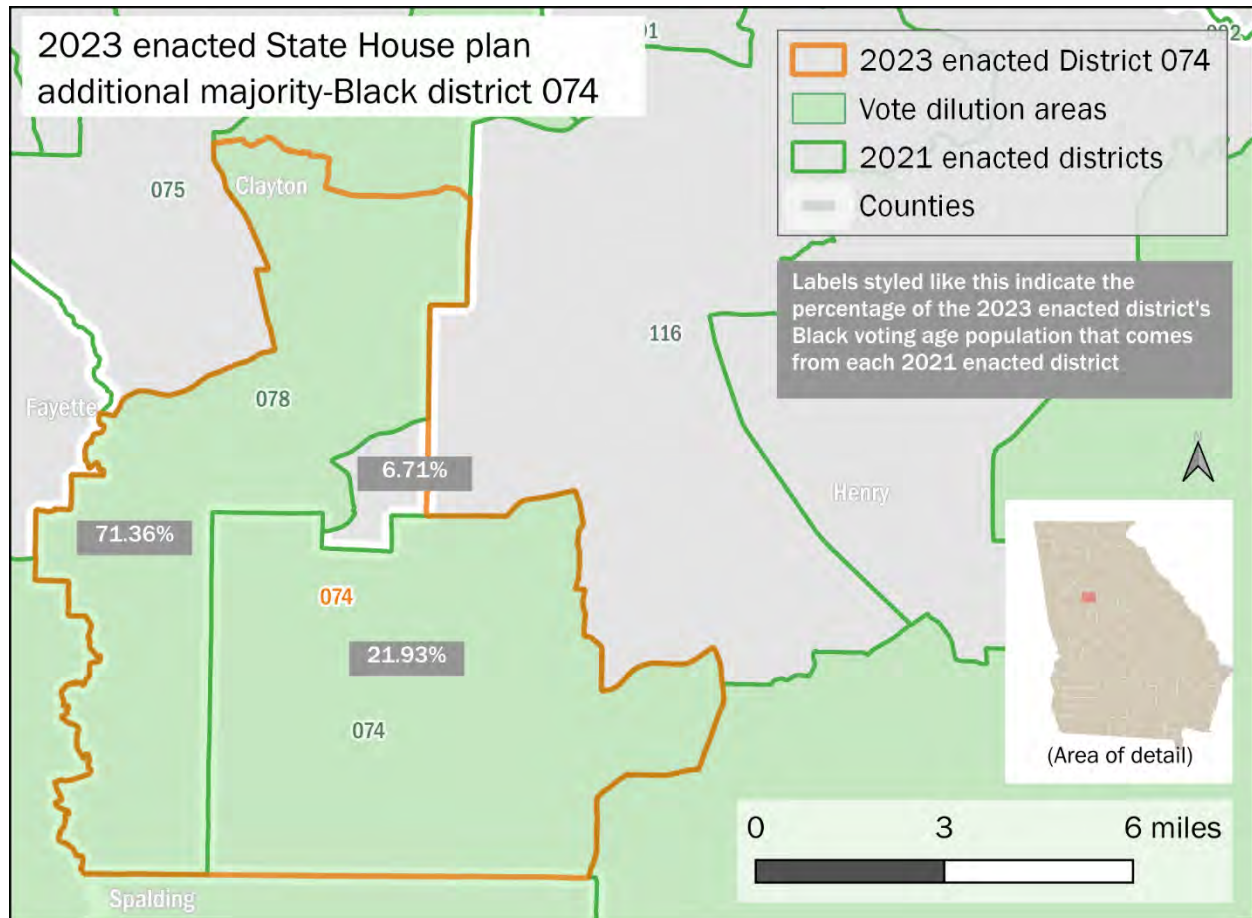

34. House District 064, one of the five additional majority-Black districts in the enacted 2023 plan, only partially overlaps with the vote dilution areas. In fact, 67.45% of the Black voting age population of the district comes from areas outside the vote dilution areas. See Figure 8. The core constituency report, which indicates the "source" districts for the newly enacted districts (and their relative populations), from which the preceding percentage statistic and the statistics in the following three paragraphs and in Figure 8, Figure 9, Figure 10, and Figure 11 are derived, is provided in **Attachment J**.

Figure 8: Map showing the relative location of 2023 enacted State House District 064 and vote dilution areas

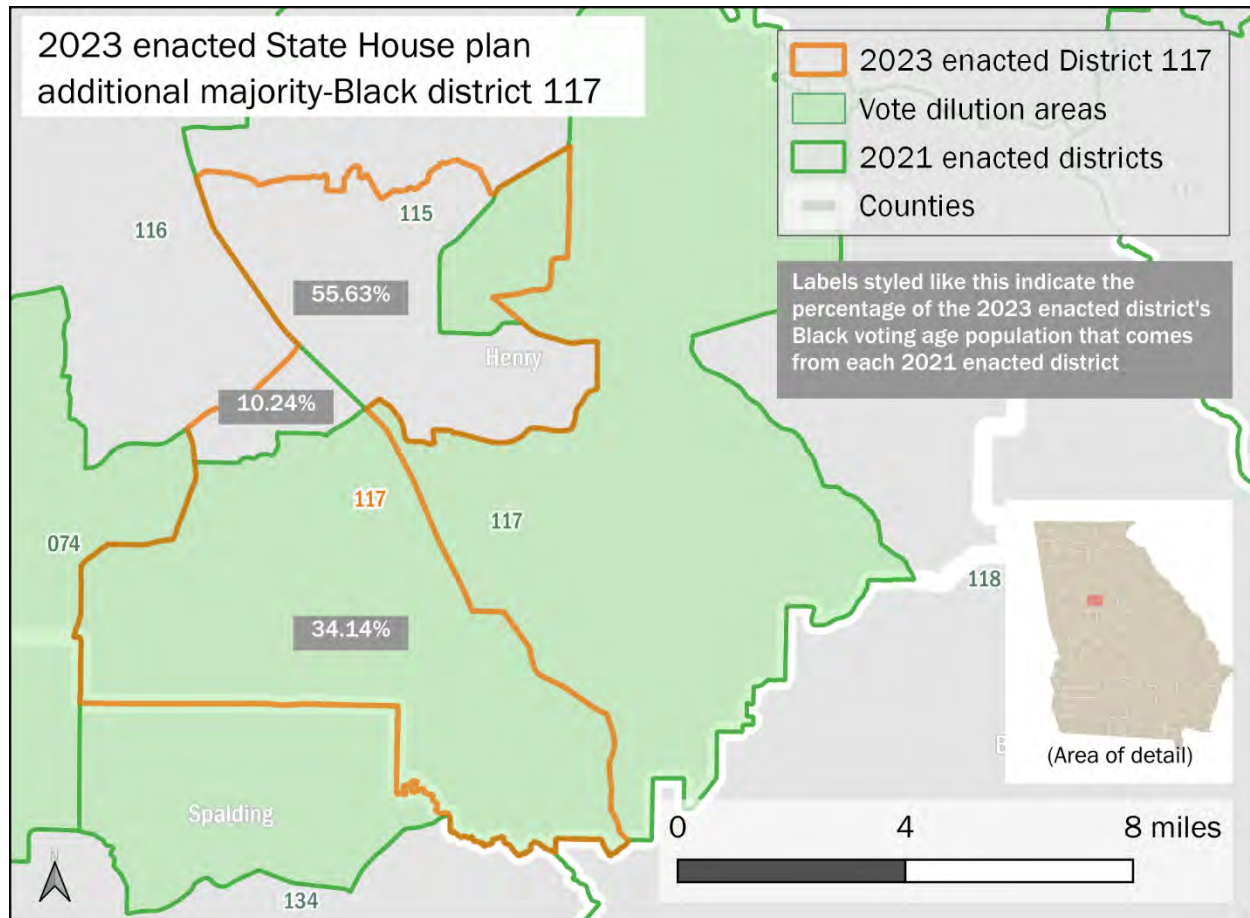

35. House District 074, another of the five additional majority-Black districts in the enacted 2023 plan, only partially overlaps with the vote dilution areas. 6.71% of the Black voting age population of the district comes from areas outside the vote dilution areas. See Figure 9.

Figure 9: Map showing the relative location of 2023 enacted State House District 074 and vote dilution areas

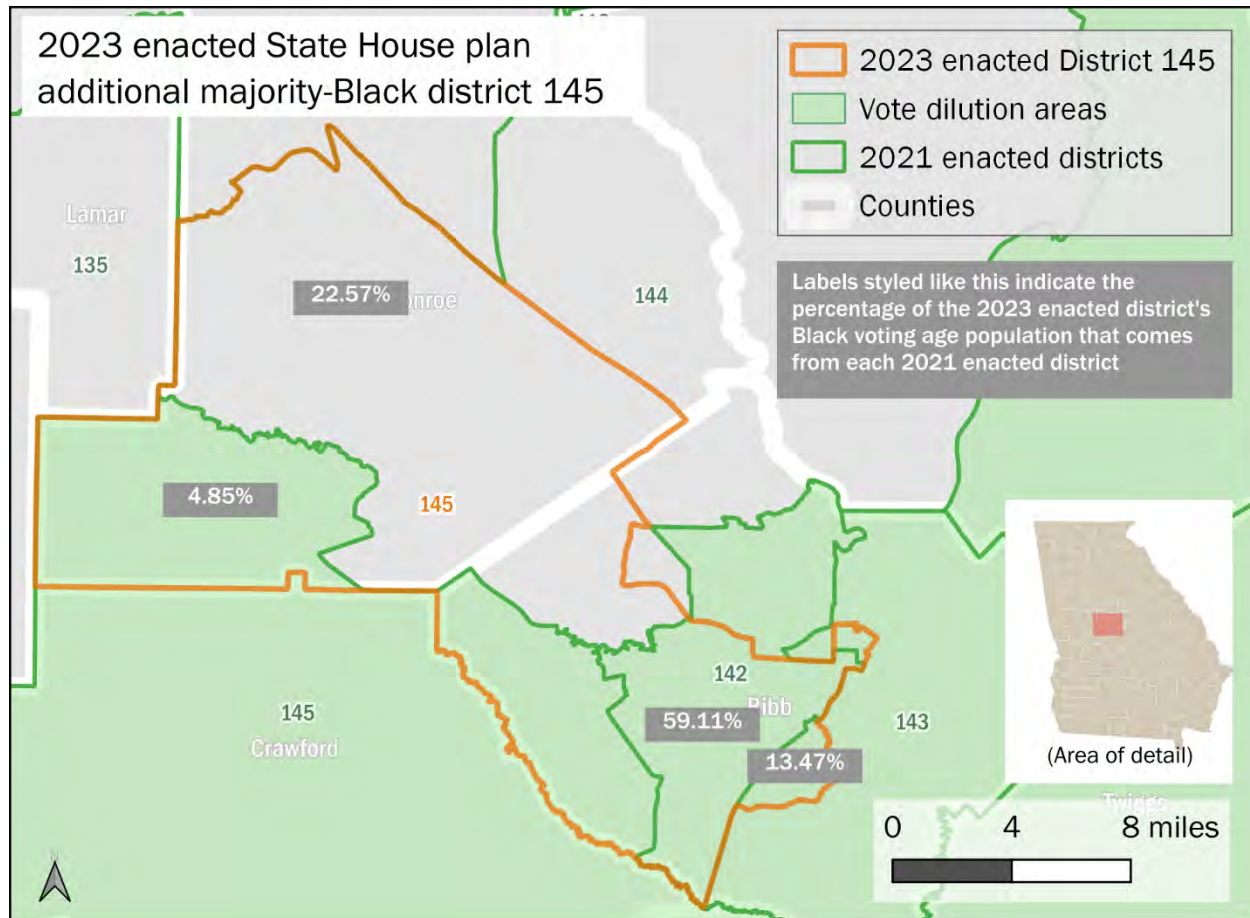

36. House District 117, another of the five additional majority-Black districts in the enacted 2023 plan, only partially overlaps with the vote dilution areas. In fact, 65.86% of the Black voting age population of the district comes from areas outside the vote dilution areas. See Figure 10.

Figure 10: Map showing the relative location of 2023 enacted State House District 117 and vote dilution areas

37. House District 145, another of the five additional majority-Black districts in the enacted 2023 plan, only partially overlaps with the vote dilution areas. In fact, 22.57% of the Black voting age population of the district comes from areas outside the vote dilution areas. See Figure 11.

Figure 11: Map showing the relative location of 2023 enacted State House District 145 and vote dilution areas

38. The total Black voting age population in the vote dilution areas that is *not* located in a majority-Black district in the 2023 enacted plan numbers 57,630.

C. Compactness

39. Comparing the 57 modified districts' average Reock and Polsby-Popper compactness scores shows that for the 2023 plan the former is lower by 0.04 (0.35 vs. 0.39) and the latter by 0.02 (0.25 vs. 0.27) than in the 2021 plan. Another way of viewing these relationships is in Figure 12 below, which shows that when the Reock scores are in sorted order, 93% of the 2023 scores are lower than their 2021

counterparts (3 of the 57 are higher, and one is the same). Tables reporting compactness scores of entire plans and changed districts can be found in **Attachment K**.

Figure 12: Chart of sorted compactness scores (Reock)

40. Similarly, Figure 13 below shows the sorted Polsby-Popper scores, and with comparable findings. In the Polsby-Popper instance, over 87% of the sorted 2023 scores are lower than their 2021 parallels; 5 out of 57 are equal, and 2 out of 57 are higher.

Figure 13: Chart of sorted compactness scores (Polsby-Popper)

41. Comparing the modified districts from the 2023 enacted plan to the changed districts in the illustrative plan is a far less well-ordered undertaking, because (unlike the previous comparison), the districts are drawn from different areas, and there are a very different number of changed districts—57 in the 2023 enacted plan vs. 25 in the illustrative plan, as will be discussed further below. That said, comparisons of the summary statistics of the changed districts in each plan show that the illustrative ones outperform the 2023 enacted ones on the mean Reock (0.37 vs 0.35) and come out even on the mean Polsby-Popper (both are 0.25). When looking at the summary scores for the entire plans, the illustrative mean Reock and Polsby-Popper scores (0.39, 0.28) are higher than the 2023 enacted ones (0.38, 0.27).

D. Political subdivision splits

42. The newly enacted plan splits one fewer county than the 2021 enacted plan, but eight more VTDs (an increase of 4.3%). The newly enacted plan splits two fewer counties than the illustrative plan, but seven more VTDs. Relevant reports can be found in **Attachment L**.

E. Communities of interest

43. One community of interest that received a significant amount of attention in the public comment related to the 2021 redistricting process was Macon-Bibb County, with repeated entreaties to keep the consolidated government's jurisdiction intact or keep districts entirely within it rather than grouping fragments of the county with parts of neighboring, more rural counties.⁹ In the newly enacted house plan, only one district is wholly in Macon-Bibb, and four other districts pair fragments of Macon-Bibb with outlying counties. By contrast, both the 2021 enacted plan and the illustrative plan had two districts wholly in Macon-Bibb and two partly in Macon-Bibb.

F. Core retention

44. As with the Senate plan described above, the newly enacted House plan would be significantly more disruptive than it needs to be. It would put 1,684,564 people into a new district - this is 15.73% of the population of Georgia. That's the equivalent of more than 28 full districts worth (28.31, to be more precise). On a per-district basis, that

⁹ Please see my December 5th, 2022 report for more specifics and citations.

means that 29,554 people (on average) would get re-assigned, or 49.7% of a typical district population.¹⁰

45. By contrast, the illustrative plan modifies only 25 districts, well under half (43.9%) of the 57 districts modified in the newly enacted plan. And the illustrative plan would reassign 695,686 people (41.3% of the total for the 2023 enacted plan), or 6.49% of the state's population.

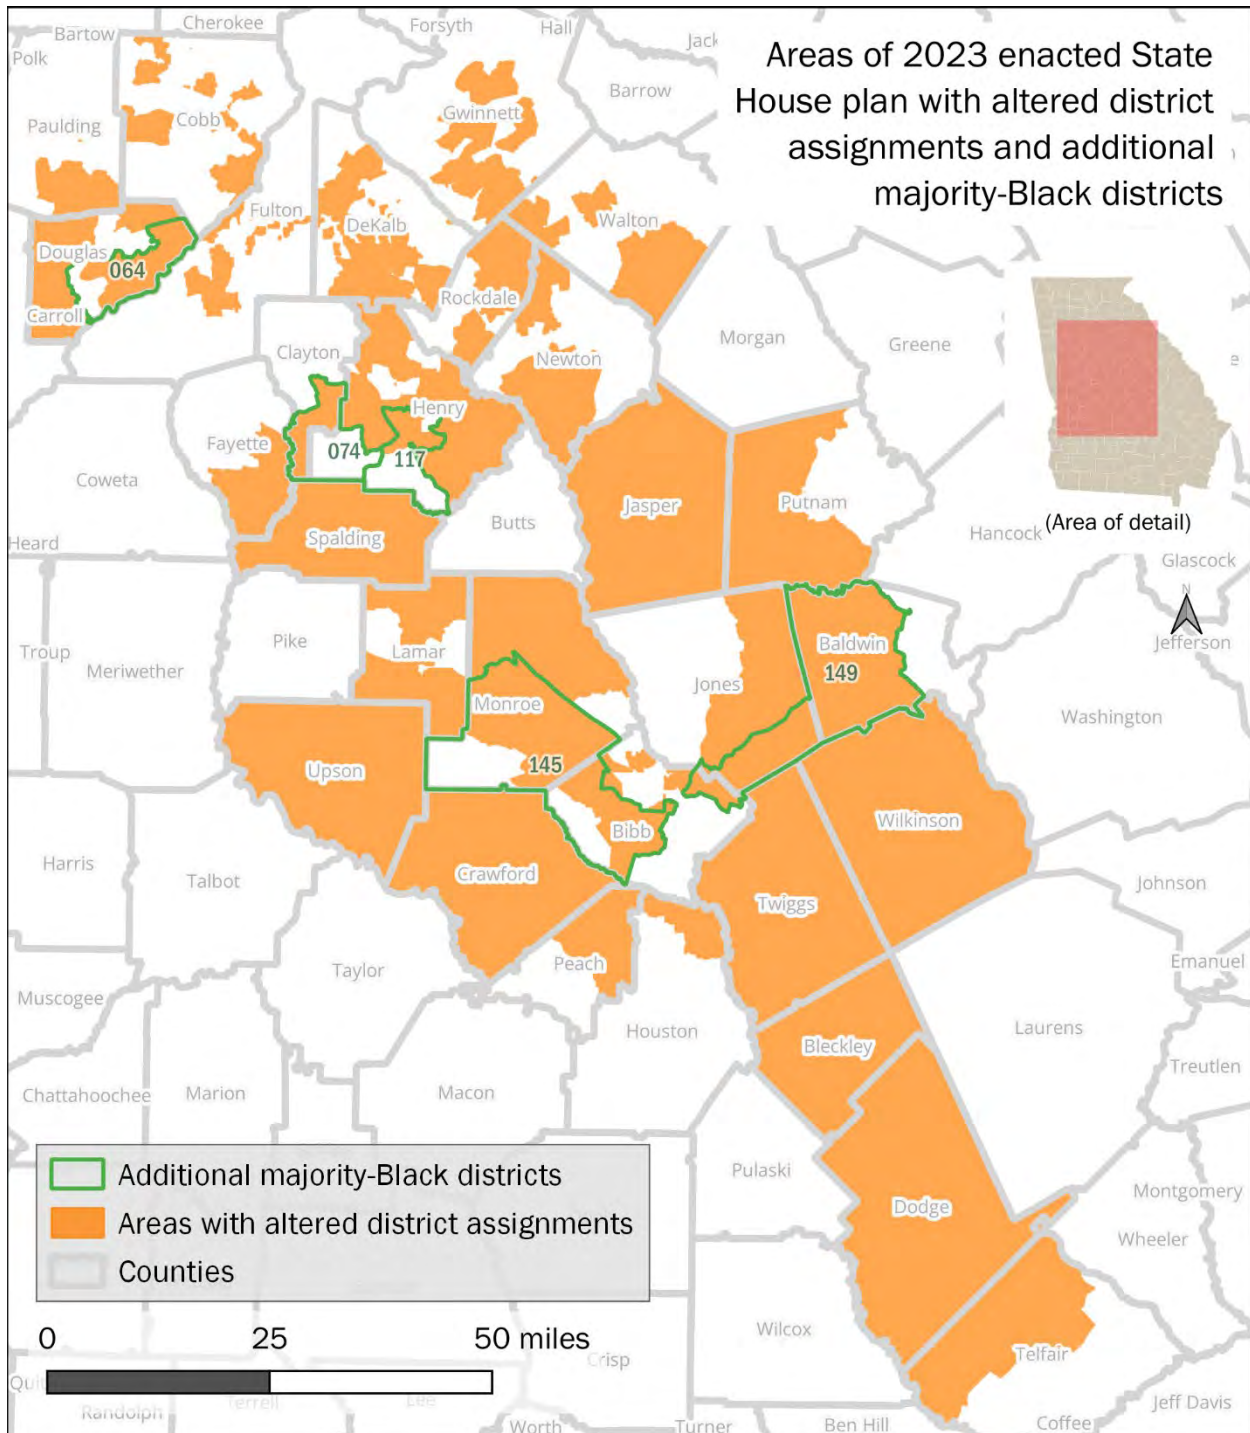

46. Six districts share zero population in common with their positioning in the 2021 plan (namely 040, 081, 082, 101, 134, and 149). The first three of these, like the ones discussed in the Senate plan, are relocated from the core counties of Metro Atlanta to the outer parts of that region. Seven other districts contain less than a quarter of their population in the previous plan.

47. As with the Senate plan, these extensive changes are not a necessary by-product of drawing additional majority-Black districts. The illustrative plan shows that that goal can be achieved with far less disruption.

48. The map in Figure 14 shows all the areas where population would be reassigned to a new district. One noteworthy aspect is the areas that are far removed from the new majority-Black areas—such as Gwinnett County, where eleven House districts were modified.

¹⁰ The core constituencies reports, which yielded these numbers, can be found in **Attachment J**, as has been mentioned earlier.

Figure 14: Map showing all areas where district assignments have changed as well as additional majority-Black districts

G. Incumbents

49. Using the late 2022 list of incumbent addresses (174 of the 180) received from counsel I analyzed the relative locations of incumbent addresses and the modified districts.

50. The plan pairs eight incumbents in four districts¹¹—the same number paired in my illustrative plan, (and the enacted plan, according to John Morgan’s PI report).¹²

51. Eight of the newly modified districts have no incumbent.¹³ Interestingly, half of these eight are additional majority-Black districts, namely, 064, 074, 117, and 145.¹⁴

IV. Conclusion

52. This report has demonstrated that the newly enacted plans for the State Senate and House both include additional majority-Black districts (two and five respectively) compared to the previously enacted 2021 plans, however, five of the seven additional majority-Black districts contain significant portions of their Black voting age population that are from areas outside the vote dilution areas specified by the Court. The new plans also perform worse than their predecessors on compactness and political subdivision splits. The House plan needlessly divides the Macon-Bibb community of interest into five districts, only one of which is wholly in the county. The illustrative plans that I created in 2022 generally exhibit more adherence to traditional redistricting

¹¹ 1. These are 065: Mike Glanton and Mandisha A. Thomas; 090: Becky Evans and Saira Draper; 107: Sam Park and Gregg Kennard; 135: Beth Camp and David Knight.

¹² See Declaration of John B. Morgan, January 18th, 2022, p. 9.

¹³ Please note that the provided list was missing 6 incumbents, so this could account for some of these “empty” districts.

¹⁴ The other four are 058, 061, 106, and 110.

principles than do the 2023 enacted plans. Further, the new plans include significant—and in the case of the State House, surprisingly extensive—changes that cannot be explained by the requirement to include additional majority-Black districts.

53. I reserve the right to supplement this report in consideration of additional facts, testimony, or materials that may come to light.

Executed on December 12th, 2023.

Data sources, software, and methodology

1. I arrived at the findings in the expert report using data from the United States Census Bureau's website (<https://www.census.gov>). This federal agency produces a) geographic files—e.g., county boundaries and block boundaries, b) tables of the block-level demographic information yielded specifically for redistricting (sometimes referred to as the PL 94-171 data) from the decennial census counts, and c) “block assignment files,” which are important for linking geography data to other data. Representative links for these three categories of data are provided below:

- a) <https://www.census.gov/geographies/mapping-files/time-series/geo/tiger-line-file.2020.html>
- b) <https://data.census.gov/cedsci/all?q=&y=2020&d=DEC%20Redistricting%20Data%20%28PL%2094-171%29>
- c) <https://www.census.gov/geographies/reference-files/time-series/geo/block-assignment-files.html>

2. Another critical source of information for the analysis was the Georgia General Assembly's Legislative and Congressional Reapportionment Office webpage, available at <https://www.legis.ga.gov/joint-office/reapportionment>. This webpage provided links to representations of the 2021 and 2023 enacted State Senate and State House plans, as well as statistical summaries for the plans.

3. The list of residential addresses of elected Georgia General Assembly legislators was provided to me by counsel. To associate those addresses with coordinates on a map, I used the *Google Maps Platform's Geocoding API*.

4. The primary software application I used in the analysis of maps and the creation of the illustrative plans is *Maptitude for Redistricting*, produced by the Caliper Corporation. This specialized geographic information system (GIS) software allows for

the importing, interconnecting, and synthesis of the multiple Census Bureau data files listed above. It allows for an existing plan to be imported (like the enacted plans from the Georgia General Assembly), then viewed in maps and quantitatively analyzed. The application generates not only the aggregated statistics for each of the created districts, but also can supply reports on overall characteristics of the plan like average district compactness and population deviation. *Maptitude for Redistricting* is widely used by state and local governments for redistricting and is in fact used by the Georgia General Assembly.

5. For the production of the visual figures in the report, I used two other pieces of software. For the maps, I used a separate open-source GIS software tool called *QGIS*. *QGIS* enabled me to take geographic files exported from *Maptitude for Redistricting* and create high-resolution graphics for insertion into the document with myriad options for customization of visual elements. For the graphs and charts, I used *Microsoft Excel*.

Measures of Compactness Summary

Reock	The measure is always between 0 and 1, with 1 being the most compact.
Schwartzberg	The measure is usually greater than or equal to 1, with 1 being the most compact.
Polsby-Popper	The measure is always between 0 and 1, with 1 being the most compact.
Area / Convex Hull	The measure is always between 0 and 1, with 1 being the most compact.
Cut Edges	A smaller number implies a more compact plan. The measure should only be used to compare plans defined on the same base layer.

Political Subdivision Splits Between Districts

Saturday, December 3, 2022

3:21 PM

Number of subdivisions not split:

County	130
Voting District	2,651

Number of subdivisions split into more than one district:

County	29
Voting District	47

Number of splits involving no population:

County	0
Voting District	8

Split Counts

County

Cases where an area is split among 2 Districts: 18
 Cases where an area is split among 3 Districts: 7
 Cases where an area is split among 6 Districts: 1
 Cases where an area is split among 7 Districts: 1
 Cases where an area is split among 9 Districts: 1
 Cases where an area is split among 10 Districts: 1

Voting District

Cases where an area is split among 2 Districts: 46
 Cases where an area is split among 3 Districts: 1

Total: 10,711,908**Ideal District: 59,511****Summary Statistics:**

Population Range:	58,678 to 60,375
Ratio Range:	0.03
Absolute Range:	-833 to 864
Absolute Overall Range:	1,697
Relative Range:	-1.40% to 1.45%
Relative Overall Range:	2.85%
Absolute Mean Deviation:	372.39
Relative Mean Deviation:	0.63%
Standard Deviation:	433.63

The District Packet report published by the Georgia General Assembly does not include statistics for the percentage of the voting age population that is “Black or African American alone or in combination,” also known as the “any part Black voting age population” percentage or “APBVAP%.” As these percentages are relevant for determining which House districts can be considered majority-Black under the conventions used in the expert report, I have provided them below after having exported a listing from the *Maptitude for Redistricting* software.

District	APBVAP%	District	APBVAP%	District	APBVAP%	District	APBVAP%	District	APBVAP%

Measures of Compactness Summary

Reock	The measure is always between 0 and 1, with 1 being the most compact.
Schwartzberg	The measure is usually greater than or equal to 1, with 1 being the most compact.
Polsby-Popper	The measure is always between 0 and 1, with 1 being the most compact.
Area / Convex Hull	The measure is always between 0 and 1, with 1 being the most compact.
Cut Edges	A smaller number implies a more compact plan. The measure should only be used to compare plans defined on the same base layer.

Political Subdivision Splits Between Districts

Saturday, December 3, 2022

10:06 PM

Number of subdivisions not split:

County	89
Voting District	2,513

Number of subdivisions split into more than one district:

County	70
Voting District	185

Number of splits involving no population:

County	0
Voting District	13

Split Counts

County

Cases where an area is split among 2 Districts: 35
 Cases where an area is split among 3 Districts: 9
 Cases where an area is split among 4 Districts: 12
 Cases where an area is split among 5 Districts: 4
 Cases where an area is split among 6 Districts: 2
 Cases where an area is split among 7 Districts: 3
 Cases where an area is split among 9 Districts: 1
 Cases where an area is split among 14 Districts: 1
 Cases where an area is split among 17 Districts: 1
 Cases where an area is split among 21 Districts: 1

Political Subdivision Splits Between Districts

Wednesday, November 29, 2023

8:13 PM

Number of subdivisions not split:

County	91
Voting District	2,506

Number of subdivisions split into more than one district:

County	68
Voting District	192

Number of splits involving no population:

County	0
Voting District	28

Split Counts

County

Cases where an area is split among 2 Districts: 32
 Cases where an area is split among 3 Districts: 12
 Cases where an area is split among 4 Districts: 9
 Cases where an area is split among 5 Districts: 5
 Cases where an area is split among 6 Districts: 4
 Cases where an area is split among 7 Districts: 1
 Cases where an area is split among 9 Districts: 1
 Cases where an area is split among 16 Districts: 1
 Cases where an area is split among 17 Districts: 1
 Cases where an area is split among 22 Districts: 2

Voting District

Cases where an area is split among 2 Districts: 175
 Cases where an area is split among 3 Districts: 17
 Cases where an area is split among 4 Districts: 1
