	Special Master Proposal	Legislative Proposal
Number of Counties Split	<b>25</b>	30
Total Number of County Splits	<b>66</b>	71
Reock Compactness	<b>38.9</b>	34.8
Polsby-Popper Compactness	<b>34</b>	27.7
Competitive Districts <sup>1</sup>	<b>15</b>	6

For splits, lower is better. For compactness and competitive districts, higher numbers are better.

Senate district numbers are provisional and based on an attempt to match the 2012-2020 map numbering as closely as possible. Because of relative population loss, two districts have been shifted and there are necessary changes throughout the state to reflect the population changes.

<sup>1</sup> As measured using the 2016/2020 Presidential election PVI on DRA; districts between 45% and 55%.
