LEAGUE OF WOMEN VOTERS OF UTAH,
MORMON WOMEN FOR ETHICAL
GOVERNMENT, STEFANIE CONDIE,
MALCOLM REID, VICTORIA REID,
WENDY MARTIN, ELEANOR
SUNDWALL, and JACK MARKMAN,

Plaintiffs,

v.

UTAH STATE LEGISLATURE et al.,

Defendants.

**PLAINTIFFS' MOTION FOR
SUMMARY JUDGMENT ON COUNT
VIII AND MEMORANDUM IN
SUPPORT**

Case No. 220901712

Honorable Dianna Gibson

RELIEF REQUESTED AND GROUNDS

Pursuant to Rule 56(a) of the Utah Rules of Civil Procedure, Plaintiffs move for summary judgment on Count VIII of their Amended Complaint. Plaintiffs are entitled to judgment as a matter of law because in the absence of a lawful legislatively enacted map, the 2011 congressional map is the operative map and it is unconstitutionally malapportioned. Because there are no disputed facts, this motion presents only questions of law proper for resolution on summary judgment.

STATEMENT OF UNDISPUTED MATERIAL FACTS

1. The 2011 congressional map was drawn based on the population data from the 2010 Census, and after passing the House and Senate, it was signed by the Governor on October 20, 2011. It was codified at § 20A-13-102.¹

2. On November 12, 2021, Governor Cox signed H.B. 2004, the 2021 congressional map. H.B. 2004 amended § 20A-13-102 to replace the references to the 2011 map with references to the 2021 map.²

3. On August 25, 2025, this Court granted Plaintiffs' Motion for Summary Judgment on Count V and enjoined enforcement of H.B. 2004.

4. According to the 2020 Census, each district in the 2011 congressional map deviates from the ideal district population of 817,904. Ex. 3 at 12 (Office of Legislative Research and General Counsel Report showing the following population deviations: CD 1 (-17,807), CD 2 (-16,268), CD 3 (-31,190), CD 4 (+65,265)).³

5. At least two individual plaintiffs reside in the overpopulated CD 4 under the 2011 congressional map. Ex. 1 (Malcolm Reid Decl.); Ex. 2 (Victoria Reid Decl.).

¹ See <https://le.utah.gov/~2011s3/bills/static/SB3002.html>.

² See <https://le.utah.gov/~2021s2/bills/static/HB2004.html>.

³ Available at: <https://le.utah.gov/interim/2021/pdf/00002972.pdf>; cf. Utah R. Evid. 902(5).

LEGAL STANDARD

Plaintiffs are entitled to summary judgment when “there is no genuine dispute as to any material fact and the moving party is entitled to judgment as a matter of law.” Utah R. Civ. P. 56(a).

ARGUMENT

The 2011 map is currently the legally operative congressional map following this Court’s injunction against enforcement of H.B. 2004, which had amended § 20A-13-102 to replace references to the 2011 map with the 2021 map. *See In re J. P.*, 648 P.2d 1364, 1378 n.14 (Utah 1982) (“Where amendatory legislation repealing or displacing a former statute addressing the same subject matter is held unconstitutional, the amendment has no superseding effect and the prior statute remains in full force as though no amending legislation had been enacted.”); *see also Bd. of Educ. of Ogden City v. Hunter*, 159 P. 1019, 1024 (Utah 1916).

The 2011 map, with population deviations ranging from -31,190 to +65,265, is unconstitutionally malapportioned and thus dilutes the voting power of people—like Plaintiffs Malcolm Reid and Victoria Reid—who reside in the overpopulated District 4. *See* Utah Const. art. I, § 2 (requiring “equal protection and benefit”); *id.* art. I, § 24 (requiring uniform operation of laws); *Gallivan v. Walker*, 2002 UT 89 ¶ 64, 54 P.3d 1069 (holding that a law that dilutes voting power relative to others violates uniform operation of laws); *cf. Karcher v. Daggett*, 462 U.S. 725, 730 (1983) (holding that federal law requires “good faith effort to achieve precise mathematical equality” of congressional districts (quoting *Kirkpatrick v. Preisler*, 394 U.S. 526, 530 (1969))).

If the Legislature fails to enact a remedial map in response to this Court’s injunction of H.B. 2004, or if the Legislature enacts a new map that does not “abide[] by and conform[] to the redistricting standards, procedures, and requirements of [Proposition 4]” and thus is enjoined by

the Court, then the Court must also enjoin implementation of the 2011 map as unconstitutionally malapportioned and impose a remedial map that is equally populated and complies with all relevant redistricting laws, including Proposition 4. *See Scott v. Germano*, 381 U.S. 407, 409 (1965) (“The power of the judiciary of a State to require valid reapportionment or to formulate a valid redistricting plan has not only been recognized by this Court but appropriate action by the States in such cases has been specifically encouraged.”); *Grove v. Emison*, 507 U.S. 25, 33 (1993) (explaining that “state courts have a significant role in redistricting” and requiring federal court to abstain from deciding malapportionment challenge to Minnesota’s congressional and legislative maps in favor of allowing state court to formulate valid map); *id.* at 34 (noting that U.S. Supreme Court has “encouraged” “state judicial supervision of redistricting” to impose lawful map).

Plaintiffs respectfully request that this motion be heard at the same time the Court conducts its remedial hearing on Count V.

CONCLUSION

For the foregoing reasons, this Court should grant Plaintiffs’ motion for summary judgment on Count VIII and impose an equally apportioned map that complies with Proposition 4’s requirements in the event the Legislature fails to enact a remedial map or such map is enjoined as violative of Proposition 4’s requirements or other legal requirements in conjunction with the upcoming remedial proceeding.

RESPECTFULLY SUBMITTED this 4th day of September 2025.

Notice to responding party

You have a limited amount of time to respond to this motion. In most cases, you must file a written response with the court and provide a copy to the other party:

- within 14 days of this motion being filed, if the motion will be decided by a judge, or
- at least 14 days before the hearing, if the motion will be decided by a commissioner.

In some situations a statute or court order may specify a different deadline.

If you do not respond to this motion or attend the hearing, the person who filed the motion may get what they requested.

The court's Finding Legal Help web page (utcourts.gov/help) provides information about the ways you can get legal help, including the Self-Help Center, reduced-fee attorneys, limited legal help and free legal clinics.

Aviso para la parte que responde

Su tiempo para responder a esta moción es limitado. En la mayoría de casos deberá presentar una respuesta escrita con el tribunal y darle una copia de la misma a la otra parte:

- dentro de 14 días del día que se presenta la moción, si la misma será resuelta por un juez, o
- por lo menos 14 días antes de la audiencia, si la misma será resuelta por un comisionado.

En algunos casos debido a un estatuto o a una orden de un juez la fecha límite podrá ser distinta.

Si usted no responde a esta moción ni se presenta a la audiencia, la persona que presentó la moción podría recibir lo que pidió.

OFFICE OF LEGISLATIVE RESEARCH AND GENERAL COUNSEL

John Q. Cannon, Director
John L. Fellows, General Counsel

August 16, 2021

Members of the Legislative Redistricting Committee:

The U.S. Census Bureau released official PL94-171 redistricting data on August 12, 2021. The following graphs, tables, and maps are based on the total population counts for Utah's Congressional, Legislative, and State School Board districts.

Redistricting, as many of you know, is necessary because uneven population growth creates political inequities that, over time, undermine democratic representation. If population growth across districts occurred at a uniform rate, redistricting would be unnecessary. This report not only documents the uneven distribution of Utah's growth, but it offers insight into specific population and geographic trends that will have a major impact on redistricting.

Without the U.S. Census Bureau, which counts every person living in the United States once a decade, it would not be possible to implement the provision of the U.S. Constitution that requires each district to contain roughly the same population. The Utah Constitution vests the Legislature with the responsibility to redraw Congressional, Legislative, and State School Board district boundaries based on the results of the census resident population count.

Utah has a resident population of 3,271,616. Dividing this number by the corresponding number of Congressional, Legislative, and State School Board districts yields the ideal district population for each district type.

For congressional districts, there is a strict standard of equality ("one person, one vote"), meaning the population in each congressional district should be as close to the ideal district size as practicable. For congressional districts, the Legislative Redistricting Committee has adopted a principle that these districts must be as nearly equal as practicable with a deviation not greater than $\pm 0.1\%$, which is measured from the ideal congressional district size.

For Legislative and State School Board districts, the standard is substantial equality, meaning that Legislative and State School Board districts must have substantial equality of population among the various districts with an overall deviation of less than 10% from the smallest to the largest district. For Legislative and State School Board districts, the Legislative Redistricting Committee adopted the principle that these districts must have substantial equality of population with a deviation less than $\pm 5.0\%$, which is measured from the ideal district size.

Using the ideal size of each district type is the simplest way to calculate whether each district complies with the one person, one vote principle established by the United States Supreme Court.

District Type	Number	Ideal District Size	Legal Standard	Committee Adopted Standards	
				Deviation From Ideal	Population Range
Congress	4	817,904	Close as Practicable	±0.1%	817,086 – 818,722
State School Board	15	218,108	10% overall	<±5.0%	207,202 - 229,013
State Senate	29	112,814	10% overall	<±5.0%	107,174 - 118,455
State House	75	43,622	10% overall	<±5.0%	41,440 - 45,803

The uneven distribution of the state's population is demonstrated in the following examples.

The 2020 population of the fourth Congressional district is 65,265 larger than the ideal district size. The population of the third Congressional district is 31,190 less than the ideal size. The population of both the first and second districts is about 17,000 below the ideal district size. Consequently, the fourth district will lose population so the other three districts can gain population.

In the State Senate, District 13 has a population of 178,369, which is 65,555 greater than the ideal district size of 112,814. Conversely, district 16 has a population of 95,841, which is 16,973 less than the ideal district size.

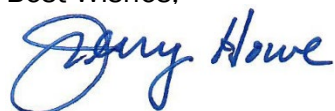

In the House of Representatives, District 2 has a population of 78,429, which is 34,807 greater than the ideal size, while the population of District 69 is 7,443 below the ideal size.

Identifying districts with populations that are above or below the ideal is the first step in deciding how best to approach a redistricting solution. Because of the comparative location of districts with populations above or below the ideal size, one should not assume that districts with a population close to the ideal size will not experience boundary adjustments. It should also be noted that the number of potential redistricting solutions is astronomical.

Understanding these trends, especially the comparative location of districts, will help those with an interest in redistricting decide how district boundaries need to be adjusted to arrive at total district populations that are within acceptable standards.

The Legislature's redistricting staff is prepared to assist members of the Legislative Redistricting Committee draw maps. Staff may also assist other legislators with prior approval from the chairs of the Legislative Redistricting Committee. For other interested persons, the Legislature will provide a publicly available, state-of-the-art software package that will enable any Utah resident to draw and submit redistricting maps.

Best Wishes,

Jerry Howe
Strategic Initiatives Manager
