## SUBJECT: Need to Redraw Virginia $5^{\text {th }}$ Congressional District Map

My name is Ken Chasin and I reside in Albemarle County which is located in Virginia's $5^{\text {th }}$ Congressional District.

I am requesting that the election map for Virginia's fifth congressional district be redrawn because the district has been severely gerrymandered and has resulted in the following situation:

1. The district is Virginia's largest U.S. congressional district with an area of $\mathbf{1 0 , 0 0 0}$ plus square miles and is larger in area than six US states (Vermont, New Jersey, Rhode Island, Connecticut, Delaware, and New Hampshire).
2. The 5th District contains counties located in the Piedmont and Blue Ridge Region stretching vertically across the state from the Virginia-North Carolina Border going 250 miles up to in Northern Virginia, 40 miles southwest of Washington DC.
3. As of 2019, the population of the district was approximately $\mathbf{7 3 6 , 0 0}$ residents which equates to just 72 residents per square mile.
4. The district is approximately $2 / 3$ rural and $1 / 3$ urban which tilts the playing field in favor of Republicans as rural voters almost invariably vote Republican.
5. Since 2008, only one Democrat has won this congressional seat (Tom Perriello).

In conclusion, the Virginia $5^{\text {th }}$ congressional district must and needs to be redrawn to reduce its square miles, have a more equitable voter distribution among rural and urban voters and make the district more competitive as regards elections.

## Muriel-Theresa Pitney

Clerk, Supreme Court of Virginia
It is a sad comment on the behavior of our legislators that they can not bring themselves to respect the will of the electorate, and deliver a bipartisan and nonpartisan redistricting plan for the Commonwealth of Virginia. I am hopeful that our State Judiciary Branch, to whom this responsibility was entrusted in anticipation of just such a failure of the Commission, can step in and deliver a credible proposal.

I fully support the very reasonable, logical, and defensible methodology proposed by former State Delegate Jim LeMunyon in his letter to the Clerk of the Supreme Court, dated 11/1/2021. I hope that you will use it, or something very similar, to produce a nonpartisan and transparent redistricting plan that is responsive to the will of Virginia's voters, rather than one that operates in service of political parties and politicians.

Sincerely
Bill Hafker
12192 Brecknock St
Oakton, VA 22124
Sent from my iPad

Muriel-Theresa Pitney
Clerk, Supreme Court of Virginia
100 North $9^{\text {th }}$ Street, Fifth Floor
Richmond, Virginia 23219
Dear Ms. Pitney:
The following comments are respectfully submitted according to Rule 4(a) of the Court's rules of February 23, 2021, related to redistricting. These comments make recommendations regarding a process that could be following in defining maps for the House of Delegates, Virginia Senate, and congressional districts, with particular emphasis on the criteria of communities of interest and compactness. These comments are submitted without partisan motivation. In addition to accepting written comments, I hope public hearings would be held according to Rule 4(b).

Use existing locality boundaries to define legislative districts and complete the process with House of Delegates districts before considering state Senate or congressional districts. Doing so would help meet the "communities of interest" and "compactness" tests. It should be noted the principles underlying these tests include the practical effect of making the day-to-day operation of government more efficient, especially in the administration of voting and elections. The number of different combinations of candidates on ballots is reduced, unnecessarily small "orphan" precincts are reduced, and local governments, school boards, and civic organizations would be better aligned with the state legislators who represent them.

In the case of localities in which the population approximates $1 / 100$ of Virginia's population (86,313, or the "target population"), the House districts should be drawn to the locality lines as much as possible, so the locality has a single House member.

In the case of localities that are smaller than the target population, House district lines should circumscribe whole adjacent localities to bring the total population as close as possible to the target population and with a portion of an adjacent locality added only to the extent necessary to meet the population target. In doing so, the principle of "communities of interest" should be extended to include regions of interest. As a hypothetical example, in defining a House district in Shenandoah Valley, such district should include Valley localities rather than drawing House district lines eastward across the Blue Ridge to include the Piedmont Region.

In the case of localities that are larger than the target population, the number of House districts in such localities should be maximized to minimize the number of House districts that cross the locality's boundary, which would help ensure compactness. For example, Fairfax County, which surrounds the entirety of Fairfax City, has a combined population with Fairfax City of 1,174,455. Thirteen (plus a fraction) House districts would "fit" into Fairfax County and City. This should be goal of drawing lines, with one House district including the entirety of Fairfax City plus adjacent areas of Fairfax County, with a fourteenth district straddling the Fairfax County boundary with an adjacent jurisdiction.

Muriel-Theresa Pitney
November 1, 2021
page two

Consistent with "communities of interest" principle, House districts should be drawn to encompass entire towns within a particular county, and common interest communities as defined in the Code of Virginia. Some common interest communities are quite large, such as Reston, South Riding, Ashburn, Brambleton among many others in Northern Virginia and elsewhere.

In addition, consideration should be given to defining "communities of interest" in large localities according to public high school attendance areas. High school education and extra-curricular activities, and that of their "feeder" elementary and middle schools, define as a practical matter much of what is considered "community." Encompassing these types of communities in single House districts would also contribute to the efficient operation of government as noted above.

In taking these considerations into account, one test of compactness that could be applied is the measure of the ratio of the physical area of a district to the length of its boundary. The larger this ratio, the more compact the district and vice versa. Once an initial map of House districts is defined, the additional tests to comply with racial, language, and other federal and state laws should be applied, and adjustments made accordingly.

In considering state Senate districts, I suggest the process borrow from Wisconsin. Wisconsin has 99 House districts and 33 Senate districts. Each Senate district is defined to encompass exactly three House districts. In Virginia, with 40 Senate districts and 100 House districts, application of the Wisconsin rule would define Virginia's Senate seats as encompassing the entirety of two House districts plus half of another. This would also further the efficient operation of government for the reasons stated above, and contribute to more effective governing, as 80 of the 100 House members would be pared with a single Senator in terms of constituency, with 20 House members paired with two Senators.

In taking this approach, defining Senate districts could be done more easily than "starting from scratch," since Senate districts would substantially meet the criteria of compactness, encompass communities of interest, and meet the other legal requirements because they would be based on the House districts defined to meet these requirements. In larger jurisdictions with populations at or greater than a target Senate district $(215,785)$ one or more entire Senate districts should be defined within the boundaries of the locality while minimizing the crossing of locality lines.

For these same reasons, a similar approach could be taken to defining congressional districts.
Virginia's 11 congressional districts could be drawn so each encompasses the entirety of nine House districts and three Senate districts plus fractions of a tenth House and fourth Senate district, while applying the "regions of interest" principle.

Thank you for the opportunity to submit comments.

3965 Mountain Valley Road
Keezletown, Virginia 22832
26 October 2021
The Honorable William C. Mims, Justice

Supreme Court of Virginia
P.O. Box 1315

100 North Ninth Street
Richmond, Virginia 23218-1315

Dear Justice Mims:
As a resident of Rockingham County, Virginia, I am writing to you regarding the Court's role in the redrawing of Virginia's State Senate, State House, and, presumably, Congressional districts. I have three comments:

The first has to do with the confusion surrounding how we identify our districts. Virginia is divided into 11 Congressional Districts, 40 Senate Districts, and 100 House Districts. Each set of districts is identified numerically starting with the number one. This results in multiple districts with the same name. There are 3 districts for each number 1-11. Likewise, there are 2 districts for each number 12-40.

When a district is referred to by number only, which often occurs, it hard to know if it is a Congressional, Senate, or House district that is being referenced. It has also resulted in the unfortunate situation experienced by some in Rockingham County that they vote in two different districts \#26: House District \#26 and Senate District \#26.

One very simple solution would be to leave the Congressional districts as they are and rename the State districts as follows:
State Senate Districts would be numbered 100-139; and
State House Districts would become districts 200-299.

Not only would this system give every district a different name, it would immediately identify the districts as Congressional, Senate, or House, and it would give each category room for expansion. Clarifying our current naming system would be of great service to the Citizens of Virginia, particularly those less engaged in politics.

Secondly, as much as we like our neighbors to the East, the mountains that separate Rockingham County from Madison, Greene, and Albemarle counties are a natural boundary that put us in different communities of interest. Several maps considered by the Redistricting Commission as well as current districts, extend over the mountains, which makes no sense. The Shenandoah Valley is distinctly separate from the Pledmont. I urge the Court to respect natural boundaries, especially in the redrawing of House districts.

## The Honorable William C. Mims

26 October 2021
page two

Thirdly, Harrisonburg and the surrounding area comprise one community of interest and the rest of the county comprises another. The Harrisonburg area contains two universities, one college, and numerous $\mathrm{K}-12$ schools. There are tech companies, poultry processing plants, and several breweries and wineries as well as the homes of the people who work in these occupations. Included in this community of interest are the incorporated villages of Bridgewater, Dayton, Elkton, Grottoes, and Mount Crawford; the unincorporated villages of Edom, Keezletown, McGaheysville, Montezuma, Mt. Clinton, Ottobine, Port Republic, and Singer's Glen; and the census-designated areas of Belmont Estates, Massanetta Springs, and Massanutten. The remainder of Rockingham County is a rural community of interest that should also be kept together.

Thank you for your time. Please rename House and Senate districts, respect natural boundaries, and recognize the distinct communities of interest of the greater Harrisonburg area and the surrounding rural agricultural area.

Very truly yours,

Janet I. Trettner

To whom it may concern-
I saw one of the first redistricting maps that made quite a bit of sense in that it reflected true communities, without ridiculous considerations for race, income etc. The district lines truly represented the communities that exist in Northern Virginia, which would allow pockets of low-income neighborhoods the ability to elect someone from their area and would allow people in other locales to do the same, based on where they shop, worship, play sports, and commute most.

I encourage the committee to look at Catholic diocesan boundaries as part of the redistricting project. These frequently reflect communities in the truest sense, containing no biases regarding race or income but, rather, full integration due to where the people have chosen to live.

Attached you will find a one-page .PDF document that outlines my suggestions for possible resources to be used to assist in defining communities of interest and place when redrawing Virginia's election maps.

## Ken Chasin

Mobile Phone: 508-246-6887

The Virginia Redistricting Commission has established that one of the criteria for redrawing any Virginia election map is that the map represents a "community of interest" or "community of place". The National Conference of State Legis/atures (NCSL) has also established this criterion for every state in the United States. Communities of interest share similar historical, cultural, or economic interests. However, they should not be defined by political affiliation.

## Possible Resources for Defining Communities of Interest/Place

The Virginia Supreme Court should consider using the following governmental agencies and business organizations for inputs on defining communities of interest and place:

- Local School Boards
- Geographic Information Systems (G.I.S.) departments of the major counties of Virginia
- Virginia Beach Council of Civic Organizations
- Virginia Association of Counties and Regions (VACo)
- Real Estate Associations
- Regional Chambers of Commerce
- Civic Organizations (e.g. ; Rotary Clubs)

The Virginia Association of Counties and Regions exists to support county officials and to effectively represent, and promote the interests of counties to better serve the people of Virginia. It currently represents over eighty (80) Virginia counties.

I have examined the credentials of all six of the nominees submitted by both Democratic and Republican legislators for your consideration. I would strongly recommend that you choose Bernard Grofman and Thomas Bryan. Dr. Grofman is already familiar with Virginia from his earlier work in redrawing racially gerrymandered districts. Mr. Bryan is a Virginia resident, and is at least not the obvious partisan hack that the other two nominees appear to be.

Re: Redistricting
Date: November 7, 2021
Your Honors,
In November 2020, Republicans and Democrats alike voted overwhelmingly in favor of the Redistricting amendment because they wanted to take politics out of the redistricting process.

I urge you to instruct the Special Masters to abide by the wishes of the citizens of Virginia and draw maps that meet statutory criteria: equitable in population, compact, contiguous, and with regard to Communities of Interest and to avoid any considerations of political implications.

Thank you for the opportunity to express my opinion.
Regards,
Carla W. Heath

Dear Honorable Members of the Virginia Supreme Court,

I am writing regarding the Special Masters for the Redistricting process. After having researched all six candidates, I strongly urge you to choose Bernard Grofman and Thomas Bryan.

Dr. Grofman has done prior work in Virginia in redrawing previously gerrymandered districts.

Of the three Republican nominees, Mr. Bryan seems the best suited with Virginia credentials. The other two Republicans on the list are extreme partisans with vested interests to Republican party gerrymandering efforts in other states.

As part of this process, I also strongly urge you and the selected Special Masters to carefully review and consider the PUBLIC INPUT that has been given throughout this process (through emails, letters, postcards, and virtual and inperson public hearings). Please remember to keep the City of Lynchburg as ONE community of interest within one State House district, one State Senate district, and ONE Congressional House district when drawing maps.

Sincerely,

Niro Rasanayagam
Lynchburg, VA

Clerk of the Supreme Court of Virginia:
I own a home in Reston, Virginia and am a graduate of Oakton High School in our commonwealth. I am imploring this Court to prevent partisan special masters from controlling the redistricting process, regardless of what political party they represent. I am not asking for a Democratic gerrymander, but it is clear that the special masters submitted by the Republican Party of Virginia are all partisans whose main aims would be to gerrymander the commonwealth to favor one political party.

Many throughout the nation have accused this Court have having a preconceived agenda to favor the Republicans Party in this redistricting cycle. This Court has a chance to prove them wrong, and demonstrate that it is committed to the rule of law, not loyalty to a single political party. The Democratic Party of Virginia has made a good faith attempt to recommend nonpartisan academics for their special master slate. However, if they had submitted their own slate of partisan Democrats intent on gerrymandering the commonwealth that would have been unacceptable as well.

Best regards,
Darius Massoudi (1851 Stratford Park PL APT 105; Reston, VA 20190)

Honorable members of the Supreme Court,

As a current City Council member and former Mayor of the City of Bristol, I am writing to ask you consider a house district that includes the City of Bristol and Washington and part of Smyth counties in your deliberations. My reason for this is that these localities create a clear community of interest in terms of geography, workforce, and commerce.

The City of Bristol, along with Washington and Smyth counties, is intersected by Interstate 81, which joins these localities together. The localities share a common geography lying primarily in a valley between mountain ranges. As such the localities share a common workforce, as many residents of the City of Bristol work in businesses located in Washington and Smyth counties, and likewise the residents of those counties work and shop in Bristol. Furthermore, Virginia Highlands Community College which serves the City of Bristol, Washington County, and a portion of Smyth county, is jointly funded by these three localities and is one of the major tools for workforce development in our region. Finally, all three localities are part of the same local development district (Mount Rogers Planning District) and work together on many regional projects.

Please consider keeping this community of interest in your deliberations. Thank you for your service to the Commonwealth and best wishes in your endeavors.

Sincerely,

Bill Hartley
Councilman, City of Bristol Virginia

Clerk of the Supreme Court of Virginia:
I own a home in Reston, Virginia after having lived several other places across the United States. I am asking this Court to prevent partisan special masters from controlling the redistricting process. I am not asking for a Democratic gerrymander, but it is clear that the special masters submitted by the Republican Party of Virginia are all partisans whose main aims would be to gerrymander the commonwealth to favor one political party.

Recent articles have accused this Court of having an agenda to favor the Republicans in this redistricting cycle. This Court has a chance to prove them wrong, and show they do not owe loyalty to a single political party. The Democratic Party of Virginia has made a good faith attempt to recommend nonpartisan academics for their special master slate, while the Republicans have submitted only partisans. I do not want a gerrymander by either party, and that starts with ensuring that everyone is acting in good faith in the process.

Regards,
Jonathan Russell (1851 Stratford Park PL APT 105; Reston, VA 20190)

## OneVirginia2021

Advocacy Board:
Anne D. Sterling, President

John Stone, Treasurer

Gregory E. Lucyk, Secretary

I write today on behalf of the $60,000+$ members of OneVirginia2021, a nonpartisan organization dedicated to fair and representative redistricting and one of many groups in Virginia who have spent years advocating for improvements to our former redistricting process.

Our organization fought hard for the passage of last year's Constitutional Amendment referendum and were hopeful that the formation of the Virginia Redistricting Commission would force entrenched partisans to come together and compromise for a final set of maps. We were disappointed when that did not happen.

That being said, we know that recent history indicates that courts across the country have drawn fair and representative maps in the past, and we remain confident that you will do so in this instance as well.

To achieve this, we believe the Court and the two Special Masters you will appoint will need full access to all of the public input collected for the last ten months.

We have worked to encourage Virginia voters to remain engaged in the process through public comments to the Commission since January. Public feedback has been chronicled through several different methods and exists in multiple formats; it includes comments submitted through the Department of Legislative Services email portal, hours of in-person and virtual testimony, and over 100 citizen-drawn maps (with over 1,500 comments left on those maps).

Looking forward, we know that you will have a number of important decisions to make as you tackle the task before you. Throughout the Commission and DLS staff deliberations in the past several months, OneVirginia2021 has worked to provide nonpartisan educational resources -- not as a way to endorse one methodology or party over another, but to allow them to have a central repository of information to make informed decisions.

To that end, we feel compelled to speak on behalf of our membership as you decide on Special Masters to assist you in the map-drawing process. As you know, selecting the correct people for these roles will determine the fairness of our electoral districts for the next decade. The most recent Virginia plans drawn by a Special Master have now been used in two legislative elections and, both times, have accurately reflected the will of the overall electorate.

The lists submitted to you by the General Assembly reflect a wide variety of philosophies and approaches regarding redistricting. Some are well-respected academics, and others
have a long track record of partisanship on their resumes. We have provided a brief summary of each below:

## Mr. Thomas Bryan:

- Is a professional demographer and head of Bryan GeoDemographics since 2001.
- Was a statistician for the U.S. Census Bureau, focusing on small area population and housing unit estimates.
- Has provided demographic analysis and support in over 30 court cases.

## Dr. Bruce Cain:

- Has taught courses and written extensively on redistricting, democracy, and partisanship from the 1980s to the present.
- Served as Redistricting Consultant, Los Angeles City Council, 1986; Attorney General of the State of Massachusetts, 1987-88; U.S. Justice Department, 1989; Los Angeles County, 1991; Oakland City Council, 1993; San Diego Citizens Commission on Redistricting, 2001; City and County of San Francisco, 2002; Special Master for three judge panel, Arizona State Legislative Redistricting, 2002; Maryland Attorney General's Office, 2011.

## Mr. Adam Foltz:

- Facilitated the drafting of the 2021 Texas legislative and congressional district plans, which are currently under litigation.
- Was the primary map drawer of the 2011 Wisconsin legislative district plan, which was the subject of the U.S. Supreme Court lawsuit Gill v. Whitford.
- Has worked exclusively for Republican legislators or the Republican Party since 2010.

## Dr. Bernard Groffman:

- Served as Special Master to redraw 11 House of Delegates districts in Virginia after a previous finding that they were racially gerrymandered (Bethune-Hill v. VA Board of Elections, 2018).
- Served as Special Master to redraw Virginia's 3rd Congressional District after a previous finding that it was racially gerrymandered (Personhuballah v. Alcorn, 2016).
- Has served in 27 court cases, consulting for both political parties, as well as many states and localities.

## Mr. Adam Kincaid:

- Serves as the current President and Executive Director of the National Republican Redistricting Trust.
- Has been employed by the Republican Party since 2005.
- Lists no relevant redistricting or GIS experience on resume.

## Dr. Nathaniel Persily:

- Served as Special Master to redraw North Carolina state legislative districts (Covington v. North Carolina, 2018).
- Served as Court-Appointed Expert to assist the Pennsylvania Supreme Court in drawing Congressional district maps (League of Women Voters v. Commonwealth, 2018).
- Has served in 12 court cases, consulting for states and municipalities.

OneVirginia2021 was founded on the mission of drawing fair districts for the next decade, and Virginia is still on track to achieve that goal -- but only if good faith negotiations are made.

In order for compromise to be reached in the coming weeks, we strongly encourage the court to select Special Masters who reflect a track record of nonpartisanship. Our hope is that the Justices will consider the gridlock of the Commission and its partisan map drawers as a cautionary tale while they make this important decision.

To conclude, we would like to thank you for the opportunity to express our thoughts today. Our organization is available as a resource for anything you might need in the coming weeks. Good luck with the task before you.

Sincerely,

Hello,
With the failure of the bipartisan commission, it now falls on SCOVA to draw our new Congressional and Commonwealth maps.

As someone who voted for Amendment 1, I demand the new maps be fair and representative of the voters therein. The intent should be to represent the Commonwealth as best as possible, with no regard for political party.

If the maps are not drawn as such, it will forever scar the court's reputation, and the citizens of the Commonwealth will see it as a partisan institution, which will damage our state. Please, please keep this in mind when drawing the maps.

Very Respectfully,
Chris Buchheit
Arlington, VA

Dear Madame Clerk,
I write in support of the Virginia Senate Democrats’ request to disqualify Mr. Kincaid, Mr. Bryan, and Mr. Foltz from serving the Court as special masters in the redistricting process.

It would be such a violation of the expressed wishes of the voting public to allow these hyper-partisan individuals to draw the lines. Voters have demanded for at least a decade that politics be taken out of the redistricting process. The Constitutional Amendment creating the Virginia Redistricting Commission was a weak response to that demand, but voters approved it anyway-by large margins-with the hope that finally there would be an end to partisan gerrymandering nonetheless.

Once underway, the Commission itself immediately went down the road to letting partisanship interfere with their work, by choosing two sets of lawyers and map-drawers, and it's regrettable that your charge also requires you to use two sets of drawers. Nonetheless, the best hope we have of respecting the will of the voters, is for the two special masters you appoint to be as nonpartisan (or at least not hyperpartisan) as possible.

Please disqualify these partisan gerrymandering experts, and ask that the Republican leadership send back a new list that are not so unacceptable and that do not force voters to live through another decade of partisan maps.

Thank you,
Cindy Cunningham
Falls Church, Virginia

Clerk of the Supreme Court of Virginia,
Martinsville and Danville are connected via Route 58, share SOVA Health's hospital system, and are the region's economic hubs outside of Lynchburg, Roanoke, and Greensboro, NC. Martinsville and Danville represent an area of that state that has suffered significantly from economic and population decline since the textile and tobacco industries became unsustainable. Now, as both cities pivot towards an economy with an emphasis on technology and manufacturing, Martinsville faces the incredibly difficult task of reverting from an independent city to a town. Since 1995, three independent cities, including our neighbor South Boston, have reverted to towns. Though these reversions have been successful in the long term, I feel as though it's important to anchor Martinsville to Danville with a single delegate, to ensure economic stability and growth going forward.
These two cities also have similar racial demographics, including a large minority population. According to statistics provided by the US 2020 Census, Martinsville has a 'Black alone or in combination' population of $48.2 \%$. Danville has a 'Black alone or in combination' population of $53.4 \%$. I was able to create an example district that was $48.91 \%$ minority and $51.09 \%$ White. Though this does not constitute a minority-majority district, it would ensure that minorities would be able to elect a delegate of their choosing. The Readjuster Party, a biracial coalition that formed following the Reconstruction Era, had significant success in Virginia. Danville was able to elect a majority Black council and hired an integrated police force due to expanded voting access from actions taken by the Readjuster Party. Currently, Martinsville has two minority city council members while Danville has five. Historical legacy and current racial demographics must be factors in drawing a district that gives a voice to residents of the Southside.
Please consider creating a single House of Delegates district that includes both the City of Danville and the City of Martinsville.

Thank you,
Brady Walker
Dry Fork, VA

To Whom It May Concern:
My name is Jorge Figueredo and I am the executive director of Edu-Futuro, a non-profit that employs a two generational programmatic approach to break the cycle of poverty through educational empowerment in the immigrant community. The maps proposed by the Virginia Coalition on Immigrant Rights (VACIR), the Virginia Latino Leaders Council (VLLC), and the Virginia Counts Coalition (VCC) were based on extensive feedback by immigrant communities across the Commonwealth, including communities that we at Edu-Futuro directly serve.

All three of these maps uplift the interests of the communities we serve, communities that have been historically underrepresented and underserved, so that they can successfully vote on candidates and referenda of their choice. It is my hope that the Supreme Court of Virginia will take into account the immigrant support for the maps submitted by VACIR, VLLC, and VCC as it redraws district lines in the commonwealth.

Yours Sincerely,

Jorge E. Figueredo, MPP
Executive Director

Dear Madam or Sir:

I would like to express my frustration at not being represented in Congress since moving to the Charlottesville, Virginia area nearly 40 years ago. Because of how the congressional district is drawn, a conservative Republican has represented the 5th district for as long as I can remember.

The city of Charlottesville and surrounding Albemarle County deserve a Congressman who represents their views. Please make sure we are not chopped up and lumped in with rural voters from southside, Greene, and Madison.

Thank you for your attention to this matter,
Martha Miller

## Good afternoon:

This email is intended to be taken as public comment to request that, to the extent possible, Grayson County, Galax City and the entire Mount Rogers Planning District be kept together within two House of Delegates Districts. The entire Mount Rogers PDC, and the counties and towns that comprises it share unique qualities and challenges that are best served by having the type of representation that we have enjoyed for the last several years. To disrupt that, in my opinion, would do great harm to our region. Having representatives who have invested their time and energy to become connected on a human level to their district results in better representation. I can say that our representatives in the House of Delegates throughout the Mount Rogers PDC, and specifically Grayson County and the CIty of Galax, have done just that. I humbly ask that you take into account my request.

Thank you for your time and consideration.

## Virginia Redistricting Commission Members

## RE: Redistricting in Southwest Virginia

The Towns of Marion, Chilhowie, and Saltville, in solidarity with Smyth County, are strongly advocating that as you deliberate redistricting, you do not significantly alter the current dynamic of Smyth County being served by both Delegate Israel O'Quinn and Delegate Jeff Campbell.

Residents of Smyth County, nestled between Washington and Wythe counties along the I-81 corridor and being geographically bounded by mountain ranges to the northwest and southeast, have historically gravitated to west, with the Saltville town limits straddling the Smyth County Washington County line and the Chilhowie town limits being almost contiguous to Washington County. Because of those constraints and synergies, it has always made sense to draw the lines to include those areas in a House District. Synergies are not born through county lines; they are developed through complementary endeavors over time. Having a House Delegate that transcends county lines and supports those endeavors has proven time and again to be advantageous to Smyth County citizens. Having a House Delegate serving the eastern portion of the county, promoting synergies with Wythe County yet always in concert with the western Delegate, augments the efforts of both, and serves the citizens of Smyth County and its towns very well.

We hope you will consider our request, and will not significantly alter the dual House Delegate dynamic that has served the citizens of Smyth County judiciously for generations.

W.T. Rush III, town Manager, Marion

Brian Martin, Town Manager, Saltville

## Introduction

## Guiding Principle for Redrawing Virginia Election Maps

The overriding principle for redrawing Virginia's election maps should be that it is "data driven" not partisan driven. Key demographic factors such as ethnicity, race, industry, occupation and educational levels of residents should be the driving forces in shaping any new state election maps.

## Redistricting Criteria for Congressional Districts

## Overview

Any new Virginia congressional district map needing to be drawn should be guided by the following criteria:

1. Incorporate the concept of communities of interest/communities of place
2. Congressional district land areas must be contiguous and be of approximate equal population
3. Allow for racial fairness
4. Don't give a partisan edge
5. Preserve existing geographic boundaries of cities/towns and counties wherever possible
6. The land area chosen for each new congressional district map should be reflective of key demographics.

## Communities of Interest/Communities of Place

The Virginia Redistricting Commission has established that one of the criteria for redrawing any Virginia election map is that the map represents a "community of interest" or "community of place". The National Conference of State Legislatures (NCSL) has also established this criterion for every state in the United States. Communities of interest share similar historical, cultural, or economic interests.
However, they should not be defined by political affiliation.

## Contiguous Space and Equal Populations

Per past U.S. Supreme Court rulings, each congressional district's land area must be contiguous and each district within the same state must be of approximate equal population. In the case of Virginia, this implies that each district's population must be within a $5 \%+/$ - range of one-eleventh of Virginia's current population (currently at $\mathbf{7 8 4}, \mathbf{2 0 1}$ ). At the present time, the following Virginia congressional districts do NOT fall within a $5 \%+/$ - range of 784,201 : VA-01, VA-02, VA-05, VA-09, VA-10.

## Racial fairness

The redrawn congressional district maps should not intend to or have the effect of diluting the power of minority voters or their ability to elect candidates of their choice.

## No Political Party / Candidate Advantages

The newly redrawn Virginia congressional district maps must not give a partisan edge or advantage to any one political party, candidate or incumbent.

## Preserve Existing Geographic Boundaries

Newly redrawn Virginia congressional district maps should avoid splitting existing city, town, or county boundaries as much as possible.

## Reflective of Key Demographics

Any newly drawn congressional district maps must take into consideration percentage breakdowns of the following demographics:
a) Race/Ethnicity \% Distribution (White, Black, Hispanic, Asian, etc.)
b) Industries and Occupations
c) Urban versus Rural population distribution
d) Education (Enrollment/Level of Educational Achievement)
e) Median Household Income

## Rationale/Criteria for Redrawing a Congressional District Map

The overriding rationale for redrawing the map for any particular Virginia congressional district is to have its demographic attributes fall within a $95 \%$ to 105\% range of the averages for the abovementioned key demographic attributes for all of the state's congressional districts.

## Blueprint for Redrawing Virginia's Congressional District Maps

## Overview

Any Virginia congressional district map needing to be redrawn should be based on a hub-and-spoke architecture where the hubs are Virginia's 25 most-populated counties and the spokes are adjacent smaller populated counties. The proposed overall congressional district maps architecture is modeled after how the Virginia Association of Counties -Regions ("VACo") is organized which currently has thirteen designated state regions and a subset (80+) of all existing counties in the state of Virginia.

## District Architecture -the Hubs

Virginia's 25 most populated counties represent significant communities of interest and place and account for two-thirds of Virginia's total population. These counties can be used as the hubs for any new congressional districts because that is where:

- Most people live in Virginia
- Highest concentration of schools exists
- Highest concentration of jobs and industries exist
- The largest collection of major shopping centers occurs
- Where many major religious centers are located
- And further these counties provide a wide-array of government products and services to their residents and neighboring smaller counties (e.g.; Police , Courts, Utilities, Election Polling Locations \& Libraries).

## District Architecture - The Spokes

Each district hub will have attached to it adjacent smaller populated counties going out in wider arcs until a congressional district population of one-eleventh of the total population of Virginia is achieved. The total population of Virginia as of 2020 was: $\mathbf{8 , 6 2 6 , 2 1 0}$. The total population of the twenty-five (25) most populated counties in Virginia is: 5,756,900.

Candidates for the adjacent counties must satisfy the following criteria:

- Either be adjacent to the congressional district hub and/or each other to be in compliance with the "contiguous" rule.
- Should have similar demographics as much as possible as regards:
a) Race/Ethnicity \% Distribution (White, Black, Hispanic, Asian, etc.)
b) Industries and Occupations
c) Urban / Rural breakdown
d) Education (Enrollment/Level of Educational Achievement)

To the clerk of SCOVA:

I live in the city of Charlottesville, VA, and am totally disgusted that the redistricting commission found itself unable to do the task it was charged to do and find a fair way to set up districts in Virginia so that everyone's vote would count. We could have given the task to a team of three high schoolers and they could have gotten it done in an afternoon.

It would be a travesty to see our community split into $4 / 5$ districts, or to see Albemarle county lumped into a Congressional district over the mountain.

I hope these citizen comments will be read and taken to heart.
Sincerely,
Lise M. Dobrin

Good morning, Ms. Pitney.
I understand from WTOP news this morning that the Democrats and Republicans are fighting about who represents each side for redistricting.

Both sides accusing the other of selecting left or right extremists.
What if the Democrats select the Republican representatives and the Republicans select the Democrat representatives? Maybe each will then be forced to select moderates in their party.

Just a thought for the Court from a resident of Prince William County.
Current politics could certainly use more moderates who understand and value the maturity of compromise.

Thanks.

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

To the Honorable Clerk of the Supreme Court of Virginia,
I seek to provide written comment in accordance with Rule 4(a) of the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia. My comment is below:

I am a citizen of Virginia, currently living in the City of Alexandria. In 2020, I voted in favor of amending the Constitution of Virginia to the end of establishing a fairer \& less partisan redistricting process.

The nominees put forward for special master by the House \& Senate minorities are wellknown partisan operatives; their presence and participation in the redistricting process would only serve to taint any proposed maps with partisan intent. While the Court has ultimate say over the selection of special master, I believe that the selection of a partisan operative will lead to maps that are less representative of Virginia, less responsive to Virginians, and perceived as less fair by both parties.

When I voted in favor of Amendment 1, I voted with the hope of establishing a redistricting process that puts Virginians first: putting communities of interest and compactness ahead of incumbent protection and partisan advantage. Instead, what I fear the process becoming is each party pushing the map in their favor, with the Court seen as the tiebreaker.

I trust the Court to lay down political concerns - and to seek special masters who will do the same.

Sincerely, Charles Paul

Dear Mrs. Pitney,
I am writing you as a concerned citizen of Virginia. I have lived in this state for 23 years and was born and raised here. It has recently come to my attention that the redistricting masters nominated by the minority leadership have severe conflicts of interest and I do not believe have the best interests of the state at heart. Kincaid, Bryan and Foltz all have massive problems to fairly redistrict the state and can't possibly be trusted to offer Virginians a fair and balanced amount of representation. It is imperative that the court, as a nonpartisan entity, allow for appropriate representation from both sides of the aisle and to disqualify these individuals. This state should not be another political playground for politicians to select their voters and instead be a state where the people elect their politicians.

Given the candidates for map drawers by Republican legislators they are not capable of serving as a disinterested special master to assist this Court in proceedings that should, by law, be nonpartisan. They are political operatives with a long track record of pushing gerrymandered maps. If you want fair district maps for our Commonwealth please tell the GOP legislature to nominate candidates who have a record of pushing for district maps that fairly represent communities.

Dear J ustices.
All eyes are on Virginia.
We cannot afford to continue allowing this type of charade in our democracy.
There is no way a redistricting process can be neutral if there is any partisanship involved.
Republican nominees should be disqualified from this process without question. Democratic nominees should be disqualified from this process (if there are any), but my understanding is that it is only Republican nominees. The fundamental challenge to this will expose the very protections the founders were trying to prevent, unchecked power.
If this is not done, it will only continue to disenfranchise our democracy and civic engagement. It will continue to disenfranchise and disincentivize Virginians.
It will continue to cast doubt on any hope in our elected officials and our government.
This will truly be a travesty for our state, if you do not disqualify the partisan members of this process.
Sincerely,

Ms. Pitney,
I am writing to the Court to express my concerns on the Special Master nominees put forward by the GOP caucus of the Virginia Legislature. I voted in support of this amendment, and it's provision to have the Virginia Supreme Court act as a fall back to produce fair maps for the Commonwealth, in the event the Commission was unable to arrive at an agreement.

The Republican slate of proposed Special Masters, are as partisan as they come. The whole point of this exercise was to remove as much partisan bias as possible, so that communities would have fair and equitable representation, and that our voices as voters would count as much as in office politicians and political party's. The current nominees from the Delegate and Senate GOP make a mockery of that hope. The Court needs to be advised by experts in the apportionment process, not by partisan political hacks, intent on subverting free and fair elections. Please direct the legislature to submit a new slate that will be able to provide reasonably unbiased, non-partisan advice to the Court as they undertake this important duty.

Very Respectfully,

To the Clerk of SCOVA,
I am a small business owner and mother living in Albemarle County, VA. It has come to my attention that the Virginia Redistricting Commission failed to come to an agreement which puts the responsibility of re-drawing our maps on the SCOVA. As a long-time resident of Albemarle County, I would like to weigh in that I have almost NEVER had representation in the House of Representatives. And at the state level it's even worse. Charlottesville and Albemarle County are gerrymandered to within an inch of our lives, to ensure that we don't get a representative who reflects the actual needs and wishes of our residents. Splitting us up into many districts, or lumping us in with communities over the mountain that have no similarity to us in terms of education, socio-economic status or political bent has been done in the past purely to disenfranchise us as a community and maintain the Republican party's grip on power, and should be rectified with the current redistricting efforts. I am fairly active politically, and write frequently to my elected representatives. I am a 47 year old woman who has ONLY ever gotten responses from my reps that effectively say, "Thanks for reaching out. I really like hearing from my constituents and respect your views but am going to totally ignore them and do the opposite of what you are asking." For almost 30 years. Everyone I know feels the same way. Frequently our reps won't even ever set foot in their Charlottesville offices but force us to come to their remote offices because they don't like the large protests that happen outside their offices when they come here. That wouldn't happen if we didn't all always feel like we never get a rep who cares about us or our viewpoints.

Please do the right thing and redistrict in a way that allows us to finally have someone fighting for us who represents us.

Thank you.
Warm regards,
Eve

Dear VA Supreme Court,

Hello, my name is Daryl Gillespie Jr. from North Chesterfield County and I'm emailing you because I've just learned that the VA Supreme Court is now tasked with drawing fair and nonpartisan maps and that the GOP is trying to force the court to appoint a partisan operative to oversee the process. I wholly object to the GOP's attempt to sabotage the redistricting process! Voters deserves fair maps that are free from partisanship and we as voters deserve to choose our representatives not the other way around. I demand that the court reject the GOP's request and ensure that the redistricting lines are redrawn in a way to ensure that the new districts best reflects the population and the diversity of Virginia. The maps should be free, fair, transparent, and free from partisanship from both sides. I repeat, please reject the GOP's request and reassure voters that when they vote, their votes will count. Thank you for your time.

Sincerely, Daryl Gillespie Jr. North Chesterfield, Virginia

Dear Virginia Supreme Court,
Please do not appoint anyone to oversee the redistricting effort, especially a singular person who will be perceived as partisan and increase distrust in the election process and the court. Any favoritism to one side would be a step away from democracy.

As the 2021 Virginia election cycle shows, increasing voting rights and making elections fair and secure has benefitted both parties.

While I recognize that no redistricting effort will be embraced universally, only districts that are drawn independent of political interest can guarantee that the rights of the citizens of Virginia are protected.

Let Virginia be the bright light of democracy and set the standard for fair redistricting.
Thank you for your consideration on this matter.

To those overseeing the Court's redistricting efforts,
I am a resident of Fairfax County and am writing to express my support for efforts to keep the process as non-partisan and transparent as possible.

I have read news reports that the Court is considering using some extremely partisan map makers and fear that would severely undermine credibility in the eyes of Virginia's citizens. Our democracy is under a tremendous amount of stress these days, but an open and objective map-drawing process would soothe some of the enflamed passions and serve to restore public confidence in our institutions.

Very respectfully,
John P Brown
McLean VA

All map masters must be nonpartisan and experts in their fields. The Republicans have nominated three political operatives - two of whom have been found by the courts to have engaged in partisan gerrymandering in prior roles and the third, a paid consultant for the Republican party. Enough is enough. Republicans need to engage three neutral nominees.

Sincerely,
Kimberly Kirby

To Whom It May Concern,
I am a resident of Virginia Beach and would like to see fairly drawn maps for Virginia. As such I firmly support the concerns of the Virginia Democratic caucus about the three Republican nominees for the position of special master. From the evidence presented each clearly has a conflict of interest and therefore does not meet the qualifications for the position. I encourage you to reflect on the evidence and I hope that you will do your best to insure the fair maps that the citizens who voted for this amendment were expecting when they voted for it.

Sincerely,
John R Krenzke

To whom it may concern:
I am a resident of Virginia and I'm greatly concerned about the status of redistricting in our commonwealth.

After the commission failed to draw new maps in a bipartisan manner (as they were instructed to do), the responsibility now falls to the Supreme Court. It is critical that the court appoints a nonpartisan who is committed to protecting free and fair elections to oversee this process. With so much at stake, this cannot be a partisan role.

Please protect free and fair elections in our commonwealth. The responsibility now falls to you and I pray that you can overcome partisan pressures and do what's right for Virginia.

Thank you.

Hello,
I am writing in regards to the redistricting task the Vieginia Supreme Court must complete.
I implore the court to not appoint partisan people to oversee the process. Partisans already had an opportunity to develop maps in a bipartisan way and failed to complete that task.

The courts should prioritize fair and equitable representation without partisan interference.
Thank you

Supreme Court of Virginia:
I am writing in support of drawing fair, nonpartisan district maps. I agree with Majority Leader Richard Saslaw that House and Senate Republican Caucus' nominees are not qualified to act in a non-partisan way. These types of nominees are definitely not who voters had in mind when they voted for an amendment for a fair redistricting process. Please say NO to this effort to sabotage the redistricting process, and uphold the intent of voters who supported the amendment.
Thank you,
Macaria Scott Richmond, Va

Members of the Supreme Court of Virginia,
I am writing in support of the effort to disqualify the three special masters proposed by the minority party.

Bringing partisan operatives into this second attempt at redistricting will undoubtedly lead to maps that do not accurately represent the electorate of the commonwealth. The end goal is to wear down the members of the SCOVA and the Democratic special master so that they agree to 'compromised' maps that have a Republican bias.

Republicans, having nominated three partisan operatives, have brought a gun to a knife fight.

To whom it may concern,

In regards to the redistricting process. The commission has been a disappointed, in no small part as a result of some members being uninterested in a process that provides all Virginians with fair representation. This process shouldn't be tainted by those looking to keep their office by choosing their voters or those that wish to use advantage their preferred party at the expense of the electorates will.

It is my hope the Supreme Court of Virginia will draw Virginia's Congressional, state senate and house of delegates districts with communities of interest in mind first and foremost. Will avoid drawing districts that intentionally exclude voters from having a voice in their government. That the redistricting process will honor what a democracy should be, by allowing the voters to pick their elected officials.

Sincerely,

Ian Lowenthal

Hi,

I support the Virginia Senate Democrats' objections to the Republican individuals nominated to serve as special masters for the redistricting commission. State law says these individuals may not have any conflicts of interest, and yet:

- One was paid $\$ 20,000$ by the Virginia Senate Republican Caucus two months ago.
- One is Executive Director of the National Republican Redistricting Trust and is paid \$5,000/month by the Republican National Committee
- One drew the 2010 Wisconsin Maps and is currently employed by Texas Republicans to draw Texas districts and has been criticized by numerous courts for lacking credibility and drawing maps that violate federal law and the U.S. Constitution

I support the Senate Democrats' proposed three independent academics who have been previously used by courts to serve in this function instead.

Thank you,
Brooke G.

Greetings,
I am a mom, a registered voter, a tax payer, and a resident of Virginia in Rockingham County. I am interested in fair redistricting that is equitable and as least partisan as possible for ANYBODY's political party. I do NOT support the following choices set forth by the Republican voices:

Adam Kincaid seems awful. He had his past maps called out in Federal court in Ohio and tossed out by judges. He has no business touching Virginia maps. He has shown by his past history that he has zero ability to be neutral in any sense or follow the merit of the law which is to be more fair to everyone and not just heavily favor his party or unethically target communities that don't support republicans.

Thomas Bryan I know less about, but I do find it concerning that he’s being accused of taking 20 grand from Republican Party and not reporting it. I am not sure why he was paid so much by them.

Adam Foltz is as bad as Kincaid. His map drawing results ended up in court in Wisconsin in 2010 because his attempt at drawing a map was grossly unfair and gerrymandered.

I know I'm a single voter and I have gathered my information by looking at PDFs of their issues that are circulating and using Google to look up these candidates. I am sure you have the actual court records and information related to Foltz and Kincaid. But I really hope you listen to my voice and consider them very critically and demand better options without a track record of gerrymandering that led to court.

Best,
Annette Cashatt

Courts are supposed to be free of politics-which is why they enacted conflict of interest provisions in the enabling legislation for the nonpartisan redistricting constitutional amendment and these candidates backgrounds do not meet the provisions. Below is why I do not want these candidates presented as nominees.

Thomas Bryan was paid \$20,000 by Virginia Senate Republicans on 9/3/2021, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.

Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.

Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional maps."

Honorable Members of the Court,

I object to the Thomas Bryan, Adam Kincaid and Adam Foltz nominations.

I agree with Senators Locke and Surovell in labeling these individuals as 'partisan operatives'. This is not what fair people had in mind in regard to non partisan redistricting.

Caucus Chair Mamie Locke said: "Voters did not think they were asking maps to be drawn by partisan operatives when they approved the nonpartisan redistricting constitutional amendment in 2020. All of the GOP's nominees are currently on the payroll of Republican organizations; how can they be trusted to draw fair maps in a transparent and inclusive way?"

Caucus Vice-Chair Scott Surovell said: "Courts are supposed to be free of politics—which is why we enacted conflict of interest provisions in the enabling legislation for the nonpartisan redistricting constitutional amendment, and the Republican caucuses have asked the Supreme Court of Virginia to effectively sanction partisan map drawing."

## BACKGROUND:

Thomas Bryan was paid $\$ 20,000$ by Virginia Senate Republicans on $9 / 3 / 2021$, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.

Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.

Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional maps."

Paid Republican operatives have no business participating in any efforts at redistricting that are presented as nonpartisan. Voters approved a nonpartisan redistricting constitutional amendment in 2020.

Democrats submitted special master nominees who are leading respected academics in the fields of political science, demographics, and law. All of the GOP's nominees are currently on the payroll of Republican organizations.

Thomas Bryan was paid \$20,000 by Virginia Senate Republicans on $9 / 3 / 2021$, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.
Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.

Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional maps.

It would be an obscene betrayal of voters to allow their participation in a nonpartisan redistricting effort.

Stop the madness! Do not appoint the GOP national partisan experts to draw what is supposed to be fair redistricting maps. The GOP appointees have worked tirelessly to gerrymander the country to deny a representative vote to the people. We need a bipartisan group to work together to make Virginia maps fair. I live in Va Congressional District \#10 which was gerrymandered over time to keep Frank Wolf in office, carving out Democratic-leaning areas, so it runs from McLean to West Virginia and down to Manassas, while not including Herndon or Reston. We need to stop drawing maps to benefit political parties!

When Virginians voted for this redistricting process, we wanted fair, non- partisan maps that are not gerrymandered. Please stop this attempt by the GOP to make Virginia voting maps worse and to benefit one party over another!

Good morning,
I write to object to the list submitted from the Republican party for nominees to act as one of two special masters in the reapportionment process.

I voted against Amendment 1 because I believed then, and now, that nakedly partisan affiliations do not belong in our redistricting processes. I am Chairman of the Fairfax County Redistricting Advisory Committee - it is an uneven venture that is nonetheless possible to accomplish with bipartisan participation.

When that participation does not incentivize individuals to use their political preferences as a guide, but rather as a set of passive biases directing mapping choices, fair maps are possible.

That the leadership of one party would so obviously and deliberately offer up individuals who make it their professional business to help their chosen partisans win elections (and by extension create conditions for opposite partisans to lose) is anathema to the spirit of the Amendment not all of us voted for, but all of us honor.

Thank you,
Paul Berry

## Dear Court,

The Republican nominees for special master for redistricting as violating the state's conflict of interest rules because:
One was paid $\$ 20,000$ by the Virginia Senate Republican Caucus two months ago. One is Executive Director of the National Republican Redistricting Trust and is paid $\$ 5,000 / \mathrm{mo}$. by the Republican National Committee
The other drew the 2010 Wisconsin Maps and is currently employed by Texas Republicans to draw Texas districts and has been criticized by numerous courts for lacking credibility and drawing maps that violate federal law and the U.S. Constitution

Special Masters are judicial officers who are typically vetted for their impartiality. State law also says all nominees cannot have any conflicts of interest.

Please refuse to accept the Republican nominees and require them to nominate academics or consultants with expertise without conflicts of interest or the clear bias of their first nominees.

Thank you,
Carolyn Woodard

Dear Supreme Court of Virginia,
I am writing to urge the Court to reject three of the nominees for Special Master, Mr. Kinkaid, Mr. Bryan and Mr. Foltz. All three are partisan political operatives with a personal or financial stake in creating gerrymandered districts to benefit one party. This goes against both the letter of the law --- the Code states that the persons should have no conflicts of interest -- and the spirit of the law, which was originally intended to eliminate partisan gerrymandering.

Though many Virginians saw the flaws in the Constitutional amendment which would lead us to this point, most of those who voted in favor of it did not think they were approving a oneparty map-drawing process.

Thank you for your consideration.
Sincerely,
Frank Anderson

Hello,

I live and work in Richmond, VA.

To ensure fair redistricting, the Court should not appoint any partisan operative to draw the maps. It's that simple. The GOP is pressuring the Court to allow a partisan to draw the maps and sabotage the will of the people. That should not happen.

Thank you.
Dash Lewis

To Whom It May Concern:
I'm writing to comment on Senate Democrat requests that several individuals be disqualified from consideration for the special master position for the redistricting process.
Special masters are supposed to be judicial officers who are impartial and have a proven record of experience . They also are supposed to be vetted so as to avoid conflicts of interest. The nominees the GOP have put forth for these positions have been paid substantial sums by the RNC either at state or national level and one has even been critiqued by numerous courts for his violation of federal law when drawing maps in Wisconsin and Texas. This is unacceptable and nominees such as this should not be permitted to oversee the redistricting process here in VA. It would undermine its integrity and do a great disservice to Citizens of our commonwealth. All special master nominee should have a proven record of experience as independent experts with background in legal, statistical or academic fields. Thank you for taking the time to consider my comments as a concerned Virginian. I appreciate your hard work to make this process as fair as possible.

Best,
Meredith Richard

I am writing about the Special Masters to be appointed to redistrict Virginia based on new Census. Virginia voters wanted to eliminate past practice of partisan gerrymandering of districts and approved the constitutional amendment in 2020 to do so. Therefore, new districts must be drawn by experts who know what they are doing and not by political operatives. The three Republican nominees are currently or have been on the payroll of Republican organizations and therefore have a conflict of interest, whereas the Democrat's nominees are not on the payroll of democratic organizations but are experts in this field. Virginia Supreme Court must not allow this partisan map drawing. I respectfully ask the court to disqualify the three Republican currently proposed.

## Good morning,

The consequences of gerrymandering for elections and the health of the Commonwealth is paramount. It is in the best interest of voters and elected to officials to compete on maps that do not disenfranchise voters by race, religion, age, or party affiliation. A competitive map that does not require a party to earn more than $50 \%$ of the votes to get $50 \%$ of the assembly is in the best interest of Commonwealth as a whole. And it is up to you now to make sure that the people's will with the vote of the new redistricting committee is upheld with a equal map that gives voters a voice in their districts, does not entrench politicians, and makes for a free and fair election for the Commonwealth.

Be the example not repeating mistakes of the past.

## Dear Virginia Courts,

All we want are free and fair elections that represent ALL the people of Virginia. Sometimes my candidate wins, sometimes my candidate loses-- I can handle that. But continually rigging the system is bringing the concept of democracy down.

The 3 special master nominees offered by the Republicans have serious conflicts of interest. One guy has already been found by a federal court to have engaged in partisan gerrymandering in Ohio. One guy does paid work as a consultant for the Virginia Republicans. The other guy provided "almost laughable" testimony about his maps for redistricting in Wisconsin, and it was found to be a violation of the Voting Rights Act. No reasonable person with a lick of common sense could consider these guys nonpartisan, as the redistricting amendment requires. Please disqualify these guys and ask for new nominees to be submitted.

Thank you.

## Good morning,

Redistricting committee should be non-partisan and impartial. Having GOP special master nominees on the committee is not productive to the redistricting procedure to create fair and equal maps.

All voters deserve equal chance for representation in all government elections.
I have attached the information Virginia Senate Democrats have submitted for your reference.
"Today, Virginia Senate Democrats submitted a letter asking the Supreme Court of Virginia to disqualify the special master nominees submitted by Republicans Delegate Todd Gilbert and Senator Tommy Norment to assist the Court in the redistricting.

Majority Leader Dick Saslaw said: "Virginia Senate and House Democrats have set an example in submitting special master nominees who are leading respected academics in the fields of political science, demographics, and law. We hope Republicans will do the right thing for the Commonwealth and choose new nominees whose participation in this important process will ensure Virginians have fair representation in state and federal government."

Caucus Chair Mamie Locke said: "Voters did not think they were asking maps to be drawn by partisan operatives when they approved the nonpartisan redistricting constitutional amendment in 2020. All of the GOP's nominees are currently on the payroll of Republican organizations; how can they be trusted to draw fair maps in a transparent and inclusive way?"

Caucus Vice-Chair Scott Surovell said: "Courts are supposed to be free of politics-which is why we enacted conflict of interest provisions in the enabling legislation for the nonpartisan redistricting constitutional amendment, and the Republican caucuses have asked the Supreme Court of Virginia to effectively sanction partisan map drawing."

## BACKGROUND:

Thomas Bryan was paid $\$ 20,000$ by Virginia Senate Republicans on 9/3/2021, a fact that the

Senate Republican Caucus did not disclose to the Court in nominating him.
Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.

Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional maps."

I write to make my objection known with regard to the three Republican-nominated map-drawing consultants currently before the VA Supreme Court.

These three nominees for special master for redistricting violate the state's conflict of interest rules. As evidence of conflict of interest, Thomas Bryan was paid $\$ 20,000$ by the Virginia Senate Republican Caucus two months ago. Adam Kincaid is Executive Director of the National Republican Redistricting Trust and is paid $\$ 5,000 / \mathrm{mo}$. by the Republican National Committee and he collaborated on Ohio legislative maps that a 3-panel federal court found to be extreme, illegal partisan gerrymandering. The 3rd, Adam Foltz, drew the 2010 Wisconsin Maps and is currently employed by Texas Republicans to draw Texas districts, even while a district court ruled the Wisconsin redistricted maps violated federal gerrymandering law and the U.S. Constitution.

Special Masters are judicial officers who are typically vetted for their impartiality, a condition of which these three have not met.

Virginia Senate Democrats proposed three independent academics who have been previously used by Courts to serve in this function, have been appropriately vetted, and raise zero conflict-of-interest flags.

I thank you for your astute consideration of rejecting Mr. Bryan, Mr. Kincaid and Mr. Foltz as special masters for the conflict of interests they represent.

Thank you,
Donelle Sawyer

Voters did not think they were asking maps to be drawn by partisan operatives when they approved the nonpartisan redistricting constitutional amendment in 2020. All of the GOP's nominees are currently on the payroll of Republican organizations; how can they be trusted to draw fair maps in a transparent and inclusive way? The citizens of Virginia voted to depolitize the construction of legislative districts. Democracy is subverted when the democratic process is manipulated. For that reason, I ask that you disqualify the GOP nominees as they have an agenda not to improve democracy, but to sway elections in a partisan direction.

The Democrats have set an example in submitting special master nominees who are leading respected academics in the fields of political science, demographics, and law. We hope Republicans will do the right thing for the Commonwealth and choose new nominees whose participation in this important process will ensure Virginians have fair representation in state and federal government.

Below is a short background on the Republican nominees:
Thomas Bryan was paid $\$ 20,000$ by Virginia Senate Republicans on $9 / 3 / 2021$, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.
Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.
Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional maps."

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Good morning,
My name is Kellen Squire; I'm an emergency department nurse from Charlottesville, Virginia.
I just wanted to provide a comment about the proposed Special Masters for redistricting that have been proposed.

It appears to me that the Democratic Party of Virginia has chosen three experts who are widely regarded for their knowledge and experience in non-partisan redistricting. As far as I can ascertain from researching their CVs and experience noted on the Internet, they have bipartisan accolades, and seem to be well equipped to take politics out of the map selection process to the greatest extent that is possible.

Meanwhile, the Virginia GOP appears to have openly chose the three most partisan candidates they could find, who I see are on record saying that redistricting is a tool to be wielded as a weapon- an attitude is clearly not what the people of the Commonwealth of Virginia intended when voting for this redistricting commission.

Quite frankly, I am astounded that the Virginia GOP would so openly insult and mock the process the Court has enacted. I almost gasped aloud when I saw how blatantly they were disrespecting the judges of the Virginia Supreme Court. It's clear to me that the Republican Party or Virginia doesn't care a single whit about the experience and dedication to jurisprudence that has been the hallmark of this Court- they, instead, expect the court to be a blind rubber stamp, expecting "their" judges to simply "fall in line".

I have run for office as a Democrat before, and I say any party- Democratic, Republican, whatever- if they're afraid of being held accountable to voters, to know that the maps being draw are given weight only to the people of the Commonwealth of Virginia, that anyone who is afraid of running for office in that environment needs to not be representing the Commonwealth at all.

We have a chance here to really "stick it in the eye" of BOTH major parties here in Virginia, to show the rest of the country how this sort-of thing is supposed to work. To stand up first and foremost for the people of the Commonwealth. Please: cement your place in Commonwealth history (and the country's history!) by disqualifying the Republican special Masters and telling them to be either be serious with the Court's requests- or to stand aside.

Thank you.
Kellen Squire, RN

Re: Senator Saslaw's recommendations to the Virginia Supreme Court: a differing view focusing on mathematics

\section*{Dear Virginia Supreme Court Justices:}

I am writing to this esteemed Court to provide a different perspective to that of Mr. Saslaw concerning appropriate advisors to this Court regarding Virginia redistricting. I am a scientist, a native Virginian with deep roots in this great Commonwealth, and, like the members of this august Court, I am primarily concerned with the best interest of all Virginians and hope not to see an extreme left or right bias in the outcome. Virginia has now returned to her former "purple" status, neither red nor blue, which is exactly as it should be. I am also a Democrat, but not of the extreme left variety, although Mr. Saslaw leans in that direction. Because his idea of appropriate advisors are 3 University of California Political Science professors, who generally have no knowledge or understanding of Virginia or her communities, or the geography and needs of the Virginians who must live with the consequences of their input, I decided I should write to you, providing a centrist Virginian's perspective, one knowledgeable of mathematics. Since some of the nominees have mathematics and statistics background, I decided I have some qualifications to give you my perspective on these nominees. I therefore want to express my views, as scientist with a PhD in Chemical Physics, and strong mathematical background, I suggest two candidates, one from each list, to become Special Masters to assist this Court.

A strongly biased, in my view, Washington Post editorial vigorously endorsing Mr. Saslaw's list as the only one to choose from is the second reason I am writing. They seek to have only the most left leaning advisors to this Court, all from California, which at present seeks to abolish math as we know it, from its classrooms. These recent election results in Virginia, New Jersey, and New York in which Democrats lost are widely believed to be a rejection of the respective state parties' and candidates' shift too far to the left. Mr. Saslaw represents that part of the Democratic Party. I must also address the false charges about this entire process by Mr. Saslaw with a review of the history the past decade. For years Democrats wanted the Commission for redistricting, not the legislature drawing the map. After regaining the majority in 2019, suddenly the Democrats did NOT want a commission and wanted to draw the map themselves. However, a Constitutional Amendment requiring a commission was already in progress, but that was opposed by the machine Democrats, Saslaw, Simon, Filler-Corn and others part of McAuliffe's Machine, once they gained control. However, allowing the people their right to be heard prevailed, the constitutional amendment passed, subject to popular will. The vote was held and the People Spoke, approving
the amendment with \(67 \%\) of the vote. It is NOT the Republicans who stoked this change to the commission, it was initiated by Democrats, and overwhelmingly ratified by Virginia's people. Having this commission is the Will of Virginia's People. However, the Machine placed a potential saboteur, Marcus Simon, who twice voted to oppose the commission, on the commission possibly to ensure it did not succeed.

In this case, Mr. Saslaw's recommendation of 3 experts, all college professors from University of California, are, in my view, biased as well. These individuals are as likely to be biased toward the extreme left of the party as Saslaw disingenuously claims the Republicans choices are to Republicans. Allowing the people to decide by ballot was adamantly opposed by the Machine Democrats. Why the Post Editorial Board blindly accepts the false narrative provided by Saslaw, McAuliffe's chieftain without bothering with facts \& the history of redistricting over a decade is also a mystery, except all seek to keep the extreme left in control despite defeats at the ballot. Post's Editorial Board also have not been in Virginia for over a decade either. Ill-informed opinions such as the Washington Post, who act as if the Commission was entirely the idea of the Republicans, ill-serve both Virginians and others who read their misconceptions. That is the political perspective from a centrist non-Machine Democrat.

My intent now is to provide you with a technical perspective that I hope will be of some value. I will comment on what I perceive to be the best qualified individuals to serve as your Special Masters, for your consideration.

Of those nominated by both parties, my view as a computational scientist, leans toward those with strong mathematical backgrounds. The two I believe best qualified are statistician Thomas Bryan, formerly of the US Census Bureau, who has served bipartisan clients in state and local redistricting as a technical consultant on redistricting, and is extremely well qualified, and Professor Bernard Grofman, with his background in mathematics and prior experience in Virginia redistricting. I believe both these individuals can provide suitable guidance for this important task, as Special Masters to the Supreme Court of Virginia to advise on the 2021 Redistricting of Virginia. I therefore respectfully submit this perspective for you to consider.

Sincerely,

Sheryl Baldwin, PhD
Richmond, Virginia

To the Honorable Members of the Virginia Supreme Court,
I want to add my voice to those who are expressing concerns about the partisan backgrounds of the three special masters who have been put forward by submitted by Republicans Delegate Todd Gilbert and Senator Tommy Norment to assist the Court in the redistricting.

Others far more familiar than I with the backgrounds of Thomas Bryan, Adam Kincaid, and Adam Foltz have pointed out that the latter two gentlemen were found by federal courts to have been involved in partisan gerrymandering efforts in Ohio and Texas, while Mr. Bryan did not disclose to your body his employment by Virginia Senate Republicans when nominated.

These individuals bring to this effort the type of track record that runs counter to the spirit of the 2020 redistricting amendment to the Constitution. We urge you to choose fair minded experts who can ensure that legislative districts are redrawn in a fashion that aligns with wishes of voters who saw the passage of the amendment as a way to remove hyper partisanship from this process.

Sincerely,
Ron

\section*{THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS}

I am writing to express my extreme concern and profound disappointment in the suggested appointments of redistricting representatives Thomas Bryan, Adam Kincaid and Adam Foltz. The process that Virginians voted for was supposed to be NON-PARTISAN. The fact that these obviously extreme partisans have been nominated to be on the board is absolutely unjustifiable and not in keeping with the intention of the amendment.

Thomas Bryan was paid \$20,000 by Virginia Senate Republicans on 9/3/2021, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.

Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.

Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional maps.

You must disqualify these nominees. To not do so violates the intention of the new amendment and therefore, Virginians' vote for a more fair redistricting process.

The masters the Republicans have proposed are not neutral. All map masters must be nonpartisan and experts in their field. This initial Redistricting, following the adoption of the amendment, sets an important precedent.

Please order the Republicans to engage 3 neutral, nonpartisan map masters who are acknowledged experts in their field.

We cannot continue to let partisan politics invade a non-partisan process. That is not in the Constitutional Amendment the citizens of Virginia passed.

I am writing today to request that you disqualify the Republican party's special master nominees to the Virginia redistricting process. Republican Delegate Todd Gilbert and Republican Senator Tommy Norment nominated partisan operatives, who are currently on the payroll of Republican organizations. It is clear that these individuals will make no effort to draw fair maps in determining future voting districts. The people of Virginia deserve fair voting maps that allow their votes to matter, and not be weakened through partisan gerrymandering. Accordingly, I hereby request that you disqualify the nominations of Thomas Bryan, Adam Kincaid, and Adam Foltz.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

I urge the Courts to please disqualify the Special Master nominees submitted by the Republicans Delegate Todd Gilbert and Senator Tommy Norment to protect our democratic process from partisan interferences and manipulations in order to redraw lines that will not reflect the will of the people of Virginia and could disenfranchise large sections of the population.
Virginia Senate and House Democrats have set an example in submitting special master nominees who are leading respected academics in the fields of political science, demographics, and law. We hope Republicans will do the right thing for the Commonwealth and choose new nominees whose participation in this important process will ensure Virginians have fair representation in state and federal government

Caucus Chair Mamie Locke said: "Voters did not think they were asking maps to be drawn by partisan operatives when they approved the nonpartisan redistricting constitutional amendment in 2020. All of the GOP's nominees are currently on the payroll of Republican organizations; how can they be trusted to draw fair maps in a transparent and inclusive way?"

Caucus Vice-Chair Scott Surovell said: "Courts are supposed to be free of politicswhich is why we enacted conflict of interest provisions in the enabling legislation for the nonpartisan redistricting constitutional amendment, and the Republican caucuses have asked the Supreme Court of Virginia to effectively sanction partisan map drawing."

I urge you to protect ALL Virginians' rights for representation.
Regards,
Nouma T. Dione

Loudoun County resident.

To whom it may concern:
I write today as a concerned citizen to echo the issues raised in Majority Leader Saslaw's letter regarding GOP Special Master nominees.

Section 30-399(F) of the Virginia Code and this Court's Redistricting Rule 2(b) clearly state that " \([\mathrm{t}]\) he persons appointed to serve as special masters should have the requisite qualifications and experience to serve as a special master and should have no conflicts of interest." This language very clearly disqualifies the GOP Special Master nominees for the reasons stated in Leader Saslaw's letter (see here).

Thank you for your consideration.

Virginia Supreme Court,

I am concerned with Special Master nominees;
Thomas Bryan - was paid last month \(\$ 20,000\) by Virginia Senate Republicans, and not disclosed to the Redistricting Committee.
Adam Kincaid - is the current Executive Director of the National Republican Redistricting Trust
Adam Foltz - is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering.

These are partisan GOP operatives that don't belong overseeing the drawing of fair maps. Please consider other options.

Thank you,
VA Resident

Good afternoon,
When the voters of Virginia supported the constitutional amendment for redistricting being handled by a non-partisan group last year, I do not believe the proposed GOP special masters would have been considered qualified as "non partisan." I encourage you to ask the GOP leadership to submit a different list of candidates who would conform to the stated will of the people to ensure that this crucial process is handled properly. If the Republican party is not concerned with the propriety of keeping politics out of this, I trust that the judiciary in our Commonwealth is and recognizes the perception that allowing these nominees to move forward would set a bad precedent. Further, that this would undermine faith in this branch as being impartial.

Sincerely,
Millie Fife

Hello,

I urge the Court to consider disqualifying Adam Kincaid, Thomas Bryan, and Adam Foltz from being special masters in the redistricting process. Virginians deserve fair, nonpartisan legislative and congressional maps. Adam Kincaid and Thomas Bryan are both Republican Party operatives - allowing them to become special masters will be incredibly detrimental to a process that is supposed to be fair. Adam Foltz should also be disqualified. Foltz illegally cracked the latino population in Wisconsin when he drew their legislative maps in 2010. Minority populations in Virginia, such as African American communities in Richmond, Southside, and Hampton Roads, deserve a special master who has not egregiously gerrymandered minority communities in the past.

I hope you take these considerations into account,

Nate Welz

\section*{THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS}

To whom it may concern,
It was not easy to decide how to vote in 2020, concerning the proposal to have a designated committee of both Democrats and Republicans work on re-drawing the maps of VA. It was obvious it was not a perfect plan and that the system as proposed had its flaws, but it seemed better than what we had, which was pretty much nothing.

I cannot believe the extent to which the Republicans that have been nominated are inappropriate for the body to which they have been nominated. Thomas Bryan.. paid by VA Senate Republicans previously and not disclosed to the court? The 2 others - Adam Kincaid and Adam Foltz - both already having been found to be participants in partisan gerrymandering by federal courts??? Is this who the VA people really wanted to be the "nonpartisan" actors in drawing "fair" district lines? No.. it is so frustrating as a citizen to put up a little bit of faith in the system.. that there seems to be an effort to do something fair for everyone.. and it is not enough for some people and they have to make every effort to take advantage. Please reject these candidates.. please do whatever possible to find representatives who will do what is fair for all, not just their side.

Thank you for your consideration,
Jayna Wiebel

}

November 10, 2021
VIA E-MAIL

Dear Ms. Pittney:

I am a citizen and resident of Virginia's \(53^{\text {rd }}\) House District, located in Fairfax County and write on behalf of myself as a Virginian. It has come to my attention that the three special masters nominees offered by the minority (currently Republican) caucuses of the House of Delegates and Senate hold disqualifying conflicts of interests. I urge the court to uphold the law in Section 30-399(F) and Redistricting Rule 2(b) which underscore that nominees should have no conflicts of interest.

Mr. Adam Kinkaid is president of the National Republican Redistricting Trust and a partisan advancer of national gerrymandering efforts. Mr. Thomas Bryan has received "consulting fees" to the tune of \(\$ 20,000\) from Virginia Republicans. Mr. Adam Foltz is implicated in Wisconsin's horrendously gerrymandered districts and a partisan operator.

The people of Virginia chose to have such a redistricting commission, and enacted laws that should empower Virginians to have bipartisan and objective districts drawn. Section 24.2-304.04 of the Virginia Code flatly forbids partisan gerrymandering: "A map of districts shall not, when considered on a statewide basis, unduly favor or disfavor any political party."

In light of this, all three special master nominees proferred by Virginia statewide Republicans are patently disqualified to serve in this position. The Court should uphold the law and the desire of the people of the Commonwealth to not have this process hijacked by those who have blatant conflicts of interest. The minority party can try again, and hopefully nominate common citizens without such conflicts rather than a batch of partisan professional operators who seek to advance a blatant partisan gerrymander in the Commonwealth where the people have chosen to prevent such efforts.

Sincerely,
Miguel A. Rodriguez

## To the Virginia Court Justices

The reason that redistricting for our state was called for is that in so many districts, it was clear that 'gerrymandering' to preserve clusters of voters in particular districts, had been practiced to give a particular political party the advantage for winning in the individual district.

This practice violates the concept of fairness of our citizen vote, by continuing to change the voters' district if the balance for one particular party is less likely to win. These partisan changes add and subtract geographic area boundaries if a party's majority vote is threatened to be no longer the district majority. This seems ipso facto to be unfair to what has become the majority in the district.

If our government, with our wonderful founding fathers' history of 'by, for and of the people' means fair elections to choose the leadership of a city, state or nation, then it's clear that gerrymandering needs to end and more fair means than the partisan political party practices of changing districts boundaries to have a minority vote become the winning vote.

It is up to you, the judges of fairness and what the Constitution and the founding fathers of Virginia meant justice to be, to ensure that we citizens of this state have the right to fairly choose our leaders--all those who are elected to serve and represent us !

Thank you for taking time to read this. It matters so much as our democratic systems are more threatened that before in my long lifetime.

Sincerely, Patricia L'Herrou, voter in Albemarle County...

Dear Court Officials:

The special master nominees submitted by Republicans Del. Todd Gilbert and Sen. Tommy Norment are partisan operatives rather than the nonpartisan, objective nominees envisioned by the redistricting process. In contrast, the Democrats submitted nominees who are leading respected academics in political science, demographics, and law with knowledge of redistricting principles. In contrast the Republicans have submitted nominees paid by the Republicans (Thomas Bryan $\$ 20,000$ ), who serve as the Executive Director of the publican Redistricting Trust and has previously worked for the RNC (Adam Kincaid), and who is a Republican operative who worked on map-drawing in Wisconsin that a court found to be partisan gerrymandering (Adam Foltz). Please disqualify these three Republican special master nominees as overtly partisan and antithetical to the charge of nonpartisan participation in drawing these maps.

As a Virginia voter I am deeply concerned about the biases these three Republicans bring to the process and have no confidence in a fair outcome if they are part of the process.

Sincerely,
Bonnie Beckett

Good Afternoon:

I have followed with great interest Virginia's attempt to draw fairer maps in the redistricting process, which I believe is very important for our democracy. I am actually optimistic that this work has landed with the Court, through I realize it places an enormous burden on the court.

My greatest wish is for maps to emerge from this process that are viewed as fair and derived at without partisanship. I am concerned that the republican "special masters" have a verifiable partisan record, and I ask that the court reject those nominations from their process and ask for new nominations that will undertake this work in the manner and seriousness that it requires.

## Greetings,

It has come to my attention that a decision will be made regarding special master nominees. Virginia Senate and House Democrats have set an example in submitting special master nominees who are leading respected academics in the fields of political science, demographics, and law. We hope Republicans will do the right thing for the Commonwealth and choose new nominees whose participation in this important process will ensure Virginians have fair representation in state and federal government.

Thomas Bryan was paid \$20,000 by Virginia Senate Republicans on $9 / 3 / 2021$, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him. Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010. Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional maps.

I implore you to reject these nominees and give Republicans a chance to reconsider their choices.

Sincerely, James Schoenster

## To Whom It May Concern:

I am writing to you concerning the special master nominees submitted by Republicans Delegate Todd Gilbert and Senator Tommy Norment to assist the Court in the redistricting. These nominees, Thomas Bryan, Adam Kincaid, \& Adam Foltz, have already demonstrated extreme bias towards the Republican party, Mr. Bryan having recently accepted a large payment from the VA Senate Republicans and Mr. Kincaid \& Mr. Foltz have both been found in federal court to have engaged in partisan gerrymandering. Based on these nominees backgrounds it is obvious that the Republican Party in VA is making efforts to use the redistricting process to gerrymander VA districts in their favor, defeating the entire purpose behind the 20202020 Virginia Redistricting Commission Amendment.

Please reject these nominees. The people of the Commonwealth of Virginia deserve a redistricting process that is as impartial as can reasonably be expected.

Thank you for your time, Scott Silvers

A request to the Supreme Court in redistricting decisions.
Please observe the very obvious community of interest that holds together Charlottesville and Albemarle. For some years, this community has been divided in non-sensical ways. On a flat piece of paper, it may seem that we are close to Augusta County, but that mountain is a serious divide that has stood for generations. In the last election, Albemarle County had to produce 9 distinct versions of ballots in order to let voters cast correct ballots, due to House of Delegate boundaries' meandering across the countryside. With a concern for voters' sanity and their interest in participating, please keep us together.
Thank you for your service.

Richmond, VA 23219

## To Whom It May Concern,

My name is Tim Hickey. I am a resident of Albemarle County, Virginia, and was a 2019 candidate for the House of Delegates in the 59th District. Pursuant to Rule 4 under the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, I am submitting my comments to you regarding redistricting.

House of Delegates Map: Please keep Albemarle County as unified as possible to maintain our community of interest and allow us to live in fair, compact House of Delegates Districts. Specifically, please include us in only 2 House Districts. One District should be Charlottesville and some portion of Albemarle. The second District should be the rest of Albemarle and our neighbor to the south, Nelson County, with whom we share a community of interest. This would be a fair treatment of our county.

Unfortunately, for the past decade the people of Albemarle County have been fractured across 4 House Districts. This divides neighborhoods, separates families and friends, sows confusion among residents, breeds apathy, dilutes our ability to participate in the political process, and muzzles the voices of the people in state-level government. You can keep Albemarle County in 2 Districts in the way I have described above by doing something the Redistricting Commission was not able to do: compromise. Specifically, a compromise between proposed maps A7 and B6 offers a path forward for a fair treatment of Albemarle County. One negative aspect of Map A7 is that it slices Albemarle into 3 Districts. This would lead to the same negative results that we experience under the current map. That is simply not acceptable. In contrast, Map B6 keeps Albemarle in 2 compact Districts, thereby maintaining our community of interest. This is much better for the people here. However, Map B6 draws Albemarle County in with a piece of Augusta County. GOP Commissioners specifically objected to this proposal because there are mountains between Augusta and Albemarle. To address that concern directly, we can look to Map A7, which combines Nelson County with Albemarle County. This solution has the benefit that Nelson County has roughly the same population as the portion of Augusta County included with Albemarle under Map B6. Thus, it should be a relatively easy fix in terms of map drawing. In sum, dividing Albemarle County into any more than 2 Districts would be a betrayal of the people here. Please draw a fair map for our area by keeping us into the 2 Districts I have described.

Congressional Map: With regard to the Congressional Map, our area is currently in the heavily gerrymandered, non-compact 5th District. The Congressional maps proposed by the GOP members of the Redistricting Commission were unfortunately egregious partisan gerrymanders. Please proceed in good faith in ensuring that we have an opportunity to choose our Representative in a compact, fairly-drawn District that maintains communities of interest and rejects bad faith partisan efforts to gerrymander us for another decade.
Republican Proposed Special Masters: The three proposed Special Masters by the Republican
caucus have disqualifying conflicts of interest. They are partisan operatives who will erode the faith of the people of Virginia in the maps produced by this Court. I urge you to direct the Republican caucus to do as the Democratic caucus has done and put forward unbiased nominees.

Thank you.

Tim Hickey

Having been raised in Charlottesville, and now living in Albemarle and working in Charlottesville, I can say that from a geographic, economic, and cultural standpoint, the two entities should be together in any redistricting map.

Thanks,

To Whom this May Concern,
As a longtime resident of Alexandria, VA I am writing to concur with the Virginia Senate Democrats that the special masters suggested by the Virginia republicans have too many conflicts of interest to serve in this role.

All of them are long-time operatives with the republican party, including past experiences redistricting in order to maintain republican majorities. I firmly believe that none of these nominees will act within the spirit or the letter of the constitutional amendment passed by Virginia. The goal of this constitutional amendment is to keep politics out of redistricting and have the voters pick their representatives and not the other way around. I implore you to reject those special masters and ask for a new slate for the republicans, or just disqualify them outright in favor of a non partisan special master.

Thank you for your consideration.
Sarah Mournighan
Alexandria, VA.

To whom it may concern,
Virginia Senate Democrats have submitted a letter asking the Supreme Court of VA to disqualify Thomas Bryan, Adam Kincaid and Adam Foltz from assisting in the redistricting process. Appointing partisan political operatives to participate in redistricting is not what the people of VA had in mind when they voted to change the process. This is unacceptable and I ask you to reject the GOP's nominees. These candidates have all been paid by the Republican party in the past for their work and thus this is a clear conflict of interest.

Thanks,
Kelly Gotschalk
N. Chesterfield, VA

Honorable members of the Virginia Supreme Court:

I am writing in support off the written request of Virginia Senate Democrats that you disqualify the special master nominees submitted by Virginia Republican party officials.

Democratic members of Virginia's legislature submitted special master nominees who are leading respected academics in relevant fields. To permit the individuals submitted by the Virginia Republican party to serve as special masters would make a mockery of this process and would violate the conflict of interest protections incorporated into the consititutional amendment to help avert such an outcome.

The public must have confidence in both the process and the outcome of this process, such that the new boundaries will be fair and will not amount to a partisan power play.

If the process does result in a partisan outcome, the public will know this, and the integrity and nonpartisan reputation of the Virginia Supreme Court will take a major hit.

The relevant facts about the Republican special master nominees that would create obvious and major credibility problems for this process if they are permitted to perform these roles, as I understand them, are as follows:

Thomas Bryan was paid \$20,000 by Virginia Senate Republicans on 9/3/2021, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.

Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.

Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional maps."

These facts establish clear, disqualifying conflict of interest, in each case.

Virginians of all and no political affiliations across the Commonwealth need you to do the right thing and disqualify these individuals from serving as special masters.

Thank you for listening.

Very respectfully submitted.
Sincerely,

Robert Tate

I moved to Virginia in 1979 and we lived in Albemarle County until my husband, Lloyd Snook, and I bought our first home in Charlottesville in 1980. We have lived in Charlottesville ever since and we practice law together here. When you draw the maps to re-district, please keep Charlottesville and Albemarle County together as much as possible on every map. We definitely share a community of interest, which we do to a much lesser extent with some of the rural counties not contiguous with the City with which we have sometimes been lumped for voting purposes.

Thank you.

To the Clerk of the Supreme Court of Virginia:
The nonpolitical distribution of voters into fair voting districts is imperative for democracy to survive.
Sadly, one side of the discussion wishes to add lobbyists of their cause to the debate. I believe the Republican roster of special masters is not a contribution to fairness and equity but an attempt to eliminate equity and fairness.
I hope the court will support fair and equitable districting by rejecting the Republican roster and by compelling the Republicans to submit a less biased list of names.
Yours respectfully,
Linda Dunham

I respectfully submit that with redistricting these 2 jurisdictions should remain in the same congressional district. Thank you. William B. Harvey, 2721 Timberlake Road, Charlottesville (Albemarle County) Virginia 22901

Virginia wants to prevent gerrymandering. Can a mathematician help?
By Steve Thompson
September 06 at 6:00 AM ET
When Virginians voted last year to create a commission to draw the state's political districts, many hoped to head off the partisanship that has marred previous redistricting efforts.
Gerrymandering - rigging maps to favor a political party or candidate - has long been used by incumbents in Virginia and elsewhere to hold onto or expand political power. Both parties agree it damages the integrity of elections, but the complexities of map drawing make it difficult to prevent.
Now Virginia's commission is considering an offer of help from someone accustomed to solving complex problems: a mathematician.
Moon Duchin, a math professor at Tufts University who specializes in geometry, has been immersed in redistricting problems since 2016, when she taught a class on voting theory. Duchin figured the field of geometry ought to be able to help. She soon founded the MGGG Redistricting Lab, an effort to apply data science to redistricting.
The lab, which grew out of an informal research collective called the Metric Geometry and Gerrymandering Group, has helped refine techniques that construct representative samples of the universe of valid redistricting maps for a given jurisdiction. When human-generated maps deviate far from statistical norms, it can be a dead giveaway of gerrymandering or some other agenda, Duchin and other mathematicians say.
[Virginians approve turning redistricting over to bipartisan commission]
In 2018, Pennsylvania Gov. Tom Wolf (D) hired Duchin to evaluate the fairness of a congressional map revised by legislators, after that state's Supreme Court ruled that a previous map was an illegal gerrymander. Duchin found the new map's "bias in favor of Republicans [was] extremely unlikely to have come about by chance," she later wrote, putting the odds at roughly 0.1 percent.
In 2019, Duchin's lab organized a group of mathematical and legal experts to file an amicus brief to the U.S. Supreme Court about the new mathematical method. They touted what they said was an emerging scientific consensus that computer sampling techniques can help distinguish maps drawn to conform to aboveboard and transparent goals - such as creating compact districts and keeping communities together - from maps created with hidden agendas like partisan gerrymandering.
In that landmark case, Rucho v. Common Cause, the court ultimately ruled that federal judges do not have the power to stop politicians from drawing electoral districts to preserve or expand their party's power.
Duchin has worked with commissions and groups across the country, including the Michigan Independent Citizens Redistricting Commission, the People's Maps Commission in Wisconsin, and Arizona's Independent Redistricting Commission. Her work has flagged numerous instances of gerrymandering by both parties.
Last month, she offered her services to Virginia's redistricting commission. The bipartisan commission, which has an equal number of Democratic and Republican members, has faced traditional partisan pressures. The members voted 10 to 4 this summer to hire two sets of lawyers - one Democratic and one Republican - to make sure neither party gets an edge. Then they voted to hire two different map drawers as well.

The Democratic lawyer, Gerald Hebert, told commissioners at their Aug. 23 meeting that he approached Duchin's team to be his map drawer. She declined, saying she didn't want to work for one side or the other. So Hebert selected another map drawer and proposed that the commission hire Duchin to consult for both sides, perhaps to help evaluate their proposed maps.
[Virginia's bipartisan redistricting commission struggling with partisan pressures] The commission's co-chair, Greta J. Harris, a Democrat, greeted the offer warmly. "I am thrilled that Ms. Duchin is on the call," said Harris, one of the commission's nonlegislative members, after Duchin was introduced by phone at the meeting. "The work that I have looked at that her lab does really tries to strip out the partisan nature that can be so prevalent in any redistricting process."
It remained unclear what others on the commission thought of the idea. A Republican-side lawyer, Bryan Tyson, said at the meeting that he needed more time to consider it.
"I could see some value depending on what it is," he said. "But I want to understand what are kind of the contours of it."
The commissioners have pledged to avoid speaking about the redistricting process outside of public meetings, and several members either declined to comment or did not return messages from The Washington Post. Harris declined to comment, except to say that she expected the decision of whether to hire Duchin to be discussed at a coming meeting.
Virginians overwhelmingly approved a constitutional amendment last fall to create the commission rather than continuing to allow the General Assembly to draw the state's political districts. The process unfolds every 10 years, based on data from the U.S. census. The commission has 45 days to submit new maps to the General Assembly. If the commission fails to agree, or if the legislature rejects the plan, the Supreme Court of Virginia would create the new maps.
The commission's creation came after years of court battles over gerrymandering. The maps in place now were created by a special master after federal courts repeatedly found that maps by Virginia Republicans unconstitutionally packed Black voters into a handful of districts.
A 2018 white paper by Duchin's lab found that a plan for the House of Delegates put forward by Democrats similarly diluted the Black vote.
Duchin said in an interview that she wants no part of any partisan agenda. Rather, she seeks out work "where you can kind of call balls and strikes," she said.
"I'm a mathematician who uses open-source algorithms, open-source computer programs," she said. "Meaning not only is there a body of literature behind it that was developed outside of the political context, but also all the algorithmic stuff we do is completely transparent, because anybody can go look at the code and understand how it works."
A technique Duchin relies on, which she and others have called "the method of ensembles," works by randomly creating tens of thousands of maps drawn according to whatever priorities the computer is given. The result is a collection - or ensemble - of thousands of maps that mirror the much larger number (often trillions upon trillions) of maps that could be drawn in the same jurisdiction under those priorities.
The ensembles can help solve a problem that has long bedeviled map drawers: a lack of neutral benchmark maps, Duchin said.
[Redistricting battles kick off early as Democrats scramble to try to cut into GOP advantages]
"You'll see people arguing, for instance, about whether if you did party-blind redistricting, would you get an outcome that's proportional to the vote? Is that kind of the state of nature?" she said. "People have been fighting about that for at least many decades, if not longer."
In recent years, and with the help of refinements by Duchin's lab, mathematicians have learned to harness computing power to create such benchmarks.
"There are fast and efficient algorithms that build you a lot of plans," Duchin said. "Not only are they numerous, but you can explain how they're distributed in the world of possibilities. That's new, and it's kind of exciting."
Many people approach redistricting with an intuitive sense that a state should elect representatives of each party in proportion to that party's voters. Under this concept, called proportionality, where a party has 40 percent of voters, it should get 4 out of 10 political representatives.
But mathematical research shows that because of political geography and demographic patterns - how densely or spread-out voters for different parties are, for instance - things don't necessarily work out that way naturally. Duchin says getting rid of gerrymandering does not mean getting rid of the partisan advantages that geography and demographics create; it means stopping people from intentionally orchestrating partisan advantage. "The opposite of gerrymandering isn't proportional representation; the opposite of gerrymandering is not gerrymandering," Jordan Ellenberg, a math professor at the University of Wisconsin and a co-author of the 2019 mathematicians' brief to the Supreme Court, wrote in an essay in Slate that Duchin likes to quote.
And although Duchin advocates computing power as a potentially game-changing tool, she doesn't propose taking humans out of the process.
"In all the different states, as we approach redistricting now and into the future, we need to keep on having these debates about what principles we want embodied in our maps," she said. "Different states will come to different ideas about local fairness, about what fairness looks like there. I hope that they'll use techniques like this to help them get closer to those ideals."

I would like to formally and strongly object to the nominations put forth by the Republican Caucus for the Virginia Redistricting Committee. They should be disqualified on the following grounds.

Adam Kincaid was found to have engaged in partisan gerrymandering in Ohio after the last census.

Adam Foltz was also found to be engaged in partisan gerrymandering in Wisconsin in 2010.
Thomas Bryan was paid \$20,000 in September 2021 by the Virginia Senate Republicans. That would certainly put him under a cloud of suspicion the they would unduly influence his decisions.

These 3 men should not be allowed to make any decisions regarding the redistricting in Virginia.

Sincerely, Jenny Seitz

## Good afternoon,

I ask that the current Republican special master nominees be disqualified.
The point of the redistricting amendment passed a year ago was to end the abhorrent practice of partisan gerrymandering of legislative districts. No one who voted for that amendment myself included - expected the process to end up being administered by special masters. That the committee was unable to complete its job due to extreme partisan logjams, moving the work of redistricting to the courts, just proves that partisans should have no place in the process.

Republicans have nominated candidates who have been, or currently are, paid party operatives, two of whom have participated in gerrymandered redistricting processes in other states. It is a slap in the face to voters who want fairly drawn districts, and who thought the amendment passed would do away with gerrymandered districts, that Republicans chose these specific nominees. There are many, many non-partisan academics, legal scholars, demographic experts, and political science scholars who would make far better special masters, truly in keeping with the spirit of the amendment and the will of the people who voted for it a year ago.

Please disqualify the current Republican nominees.
Thank you,
Rosemary Lawler

To whom it may concern:
Our courts are intended to be free of politics-which is why conflict of interest provisions in the enabling legislation for the nonpartisan redistricting constitutional amendment were enacted. Three candidates' backgrounds do not meet these provisions. Below are reasons why I do not want the candidates named below presented as nominees.

Thomas Bryan was paid $\$ 20,000$ by Virginia Senate Republicans on 9/3/2021, a fact the Senate Republican Caucus did not disclose to the Court when nominating Bryan.

Adam Kincaid is current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that Kincaid engaged in partisan gerrymandering in Ohio in 2010.

Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found he engaged in partisan gerrymandering. Foltz has also been retained this year in Texas as Texas draws its legislative and congressional maps.

Please know the above three candidates are extremely biased and inappropriate persons to work on redistricting maps in Virginia.

Thank you.

Honored Justices of the Virginia Supreme Court,

I am writing to request that you consider nominations for a Special Master who is non-partisan, highly qualified and has a track record of independence and adherence to both the letter and spirit of the law. Citizens overwhelmingly voted for the Redistricting Constitutional Amendment in November 2020, on the understanding that it would eliminate partisanship and incumbency protection. I ask you to consider the intent of the voters during this nomination process.

The Special Masters' nominated by members of the Republican Senate caucus have demonstrated that they are partisan and have/will, based on reported evidence, engage(d) in gerrymandering districts in favor of the Republican Party of Virginia and the Republican legislative caucuses.

As an elected official, I strongly belief that we gain the trust of citizens by listening to and serving them. Voters have the right and the obligation to choose who represents them. Gerrymandering and incumbency protection distorts those rights and obligations, and serves to disenfranchise voters. I trust you to uphold the independence of the 2021 redistricting process and I ask you to reject those nominees selected by the Republican caucus and appoint an independent Special Master.

Thank you for your service to the Commonwealth of Virginia.

Kind regards,

| Subject: | Response to Virginia state Senator Richard Saslaw"s letter to disqualify Republican special master nominees |
| Date: | Wednesday, November 10, 2021 2:35:31 PM |

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

To whom it may concern,
My name is Fred Hussain and I am a resident of Dumfries, Virginia writing to you in response to the November 8th letter from Virginia Senate Majority Leader Richard L. Saslaw's to the Supreme Court of Virginia regarding Senator Saslaw's request to disqualify the list of Republican nominees for special master to redraw both the General Assembly and Congressional districts. As a Virginia resident, I support Senator Saslaw's request to disqualify the following Republican nominees being considered for special master: Thomas Bryan, Adam Foltz and Adam Kincaid.

I have been a Virginia resident nearly all of my life and I have witnessed in previous redistricting sessions where the elected members of the General Assembly have redrawn both the legislative and Congressional districts to benefit the legislators' interests. With the passing of the Constitutional Amendment last year to shift the redistricting responsibilities from the General Assembly to a bipartisan redistricting commission, voters in the Commonwealth hoped that the politics would be mitigated with the commission working together in coming up with these maps. However, it appears that the members of the state Republican Caucus, whom provided these three nominees, have an underlying interest to retain the status quo for maintaining their power in the General Assembly without regard to the change in demographics in every region across the Commonwealth over the past decade. Their disguise of being cooperative in the redistricting process while masking their resistance of working in a nonpartisan manner contradicts the rules set fourth in the Constitutional Amendment.

As for the nominees provided by the Democratic Caucus, I support all three nominees who each have the experience to perform this task and ensures that the newly created districts are in full compliance with Federal and Virginia laws. Specifically, I have full support for Bernard Grofman--the political science professor from the University of California, Irvine--who was previously selected as the special master to redraw the 3rd Congressional district back in 2016 and the 25 Virginia House of Delegates districts in 2018. From his work as special master, Mr. Grofman created these districts not only to become competitive in elections but that to become more compact and to minimize splitting communities. If Mr. Grofman is selected, I will feel confident in his ability to redraw both Congressional and General Assembly districts and that future elections, over the next 10 years, will increase voter interest.

In closing, the Constitutional Amendment to establishing the redistricting commission is not perfect as what the voters hoped. I still have hope that the Supreme Court of Virginia will honor the message that voters want to have districts be implemented in a nonpartisan manner and also the districts are designed to represent communities with a strong diverse background.

Selecting one from the three Democratic nominees as the special master will achieve that goal.
I look forward to the next steps that the Supreme Court of Virginia will take in the redistricting proceedings. Thank you for the opportunity to provide my response on the redistricting process.

Sincerely, Fred Hussain

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

To whom it may concern:
I am a resident of Sterling VA and am writing to request that the nominees put forward by the Republican Party be disqualified from serving in the redistricting process. I, like many other voters, want maps drawn for free and fair elections. This can only be done when political partisanship is taken out of the equation. Democrats have put forward professionals in the fields of demographics, political science, and law. Republicans have put forward House Delegate Todd Gilbert and Senator Tommy Norment, both are Republican elected officials and clearly not non-partisan.

Other people involved are Thomas Bryan was paid $\$ 20,000$ by Virginia Senate Republicans on $9 / 3 / 2021$, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him; Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010.

This cannot be what citizens voted for when they wanted maps redrawn for free and fair elections. I strongly urge the VA Supreme Court to disqualify these Republican partisans seeking to be special masters nominees.

Jay Cuasay

Sterling, VA

To the Honorable Members of the Supreme Court of Virginia:
Dear Justices:
A heavy burden of responsibility has been laid upon you to draw the districts for the Commonwealth of Virginia for the next 10 years. I urge you to step back from the divisive and partisan voices in your ears and use competent professional demographers to assist in the drawing of these lines and NOT make the mistake the Commission made by using partisan party politics to oversee your process. The voters of Virginia THOUGHT they had voted for an Amendment that would end Gerrymandering. They were wrong. The partisan aspects woven into the Commission became its undoing. Please do not let it continue. Use non-aligned professional staff.

In addition The amendment and the statutes surrounding it emphasize the importance of keeping jurisdictional boundaries as a priority. Albemarle Country and the City of Charlottesville which it surrounds have within 12,000 citizens of qualifying for 2 members of the House of Delegates. In Central Virginia, Charlottesville/Albemarle is the mecca for jobs, planning districts, entertainment and shopping not only for itself but also for the surrounding counties. PLEASE DO NOT DIVIDE CHARLOTTESVILLE/ALBEMARLE INTO MORE THAN 2 HOUSE OF DELEGATES DISTRICTS. Instead of sensibly adding 12K citizens to Charlottesville/Albemarle from any of the willing surrounding counties, the Gerrymandering mapmakers of the last several decades have chosen to send the citizens of Albemarle to far flung districts in Greene County, Augusta County, Orange County and even Lynchburg, both diluting their influence and vastly increasing the difficulty of having any significant access to their elected representatives. Please right these wrongs and keep out community intact.

Highest regards and gratitude for your service to the citizens of the Commonwealth,

Linda G. Perriello Albemarle County
415 Grassmere Road 22903

Dear Supreme Court members:
I am writing to add my voice to those who are opposed to the candidates for special masters that have been proposed by the Republicans. I will refrain from copying the comments already given by many others.

We Democrats have tried to play fair in this. I supported the Constitutional Amendment last year even though I thought that the Democrats would have the upper hand in the redrawing of the districts. I do not want partisan lines drawn in either direction. And the Democrats have nominated nonpartisan academics who have experience and a track record of fairness. The Republicans have once again shown their true colors and nominated political operatives with a history of proposing partisan gerrymandering. Please disqualify these individuals and force the Republicans to nominate people who will play by the rules of fairness.

I live in a purple district myself (especially the HofD and the Congressional districts) and I want to continue to have a fair election in which the result is not based on unfair gerrymandering.

Thanks for your attention to this matter.
Nancy Wein
Chesterfield County
Currently $-7^{\text {th }}$ district Congressional, $27^{\text {th }}$ district House of Delegates, and $11^{\text {th }}$ district Senate.

Thank you for taking my comments into consideration.
I am dumbfounded how the 2nd congressional district fails to be consolidated into communities of interest. The current district snakes from the Easter Shore through Norfolk and crisscrossing up the Virginia Peninsula. This is just crazy.

CD 2 should be a South Hampton Roads anchored district. Norfolk and Virginia Beach are tied to the Norfolk Naval Base with all the active duty and veterans who reside here. Why not have a Newport News/Hampton anchored peninsula district and the Norfolk/VB district. For that matter, a Chesapeake/Portsmouth might be considered for a 3rd sea anchor.

Please consider a Norfolk/VB district for CD2.

One other point. End the precinct spitting. If communities of interest are important, it would seem neighbors in a precinct are this by definition!

TO ALL CONCERNED:
As a lifelong resident and voter of Virginia I request that you disqualify the special master nominees submitted by Republicans Delegate Todd Gilbert and Senator Tommy Norment to assist the Court in redistricting.

I did not think that maps would be drawn by partisan operatives when I voted to approve the nonpartisan redistricting constitutional amendment in 2020. The GOP's nominees are currently on the payroll of Republican organizations; They cannot be trusted to draw fair maps in a transparent and inclusive way .

Courts are supposed to be free of politics-The Republican caucuses have asked the Supreme Court of Virginia to effectively sanction partisan map drawing - this is not free of politics it is quite the opposite.

Sincerely,
Juanita R. Thorne

## THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

## Good afternoon,

I am writing as a Virginia civics teacher, parent, and lifelong Virginian. I am concerned about the ability of the three special master nominees chosen by the Virginia republican party to redistrict our fair state.

We have come so far as a state when it comes to voting rights. We can see this is not a partisan issue because of the gubernatorial turn out and how well it went for the republican party. We had a record breaking electoral turnout thanks to good solid voting rights legislation. As a Virginian I support making voting easier and fair, and celebrate the efforts of the General assembly. We had a model election this November.

However, attempts to manipulate the redistricting process go against the foundation of our government that I'm currently teaching our students and future voters - representative government and democracy. Our state elections should reflect the will of the people, not the will of the people who draw the maps.

The people nominated by the GOP do not serve as experts in this process. They will not operate in good faith with the other party to produce maps that both sides can agree on. Those individuals have a record of being obstructionist when it comes to fair redistricting. The Virginia Supreme Court cannot allow these underqualified individuals to perform such an important task on behalf of the citizens of Virginia. The republican party must go back to the drawing board and choose three redistricting experts - not three political operatives - to draw our electoral map.

I implore you as someone who is educating future generations of citizens and civic participants. I've been teaching civics for a decade and doing my part to ensure that Virginians become lifelong voters and civic participants.

Efforts like this that feed into political climate of the time rather than the enduring fundamental principles of representative government and democracy. This type of partisanship behavior does not reflect the high standing that Virginia should hold itself when it comes to operating state government and state elections. We are Virginia for chrissake, not Florida. The country is watching us. We need to serve as a model for everyone else, as we have done for centuries.

Thank you,

Tina Takach

## To All Concerned:

As a concerned citizen of the State of Virginia, I am requesting the disqualifying of the Special Master Nominees submitted by Delegates Gilbert and Norment to assist in the SCOVA in redistricting.
Virginia Senate \& House Democrats have set an example in submitting special master nominees who are well respected academics in the fields of political science, demographics and law. It is expected the Republicans would do likewise and choose nominees whose participation will ensure fair and equal representation in State \& Federal government.
The current nominees can NOT be trusted to draw fair maps. Do NOT make this a partisan \& divisive issue in our State of Virginia. It is common knowledge the two gentlemen selected will not exercise fair and impartial decisions.

I live in Charlottesville and urge you to keep the city and Albemarle County in the same district. They are governmentally, culturally, historically and economically similar and entwined. People are crisscrossing every day for working, studying, dining, shopping, worshipping and recreating.

Thank you for preserving these natural communities for the purpose of redistricting.

## D. Jean Umiker-Sebeok

Mobile: 812-219-1062

My name is Megan Rickman Blackwood and I am a senior majoring in political science and minoring in philosophy at Virginia Commonwealth University. I am also a redistricting fellow with Fair Elections Center's Campus Vote Project, an organization that has empowered college student voices in state redistricting processes.

The Virginia Supreme Court has been asked to step in and take over our state's redistricting process from the Virginia Redistricting Commission. I am writing to you today to advocate for your inclusion of public hearings in this process. Virginians have shown that they are interested, knowledgeable, and confident enough to engage. 78 citizens have drawn and submitted community of interest maps to the commission, 63 have petitioned for consideration of communities of interest, and hundreds have testified at public hearings.

As a Redistricting Fellow with Campus Vote Project, I have personally drawn and submitted maps and testified before the Virginia Redistricting Commission, advocating for campus communities throughout Virginia to be brought and kept together. Citizens have answered the call of a free and fair democracy and have engaged in this process. I implore you to continue including their voices in your decision-making process, and that you listen to those voices asking that communities of interest be kept whole in the new Congressional and State Legislative district maps you will draw.

Please see my testimonies, below, that were previously submitted to the Virginia Redistricting Commission for your ongoing consideration.

Sincerely,
Megan Rickman Blackwood

## October 6, 2021

## Verbal testimony provided at Virginia Redistricting Commission public hearing

Good afternoon, my name is Megan Rickman Blackwood and I am neutral for today. I am a senior at Virginia Commonwealth University and have lived in Richmond for the last ten years. I am also participating in a college student Redistricting Fellowship with Campus Vote Project, an organization that is empowering college students to have a voice in their state's redistricting process. On behalf of students at Virginia Commonwealth University, we need representatives who listen to our voices and look to understand our needs.

My campus and the Richmond community are incredibly diverse mirroring other communities throughout our melting-pot state. Nestled in the heart of Richmond, our community represents all ethnicities and faiths. Much like the first settlers who first arrived in the Americas a short distance from our campus, we have all come to VCU seeking better lives for ourselves and our families, the freedom of opportunity that comes with a good education, and a chance to pursue our happiness.

However, students are confused about who is representing them. This is because our campus and our community are divided among multiple districts at certain levels of our government. For example, looking at our Virginia House of Delegates Representatives, our campus and the surrounding communities of student housing are split between eight districts. Students looking to for off-campus housing, a challenge in the densely populated capital of our state, find themself stratified through Congressional Districts 1, 4, and 7 for Representative in the United States. Affordable housing, located further from campus, often separates students from their peers, diluting the power of an increasingly engaged and powerful voting bloc.

Virginia Commonwealth University in Richmond needs to be considered as a Community of Interest when redrawing our district lines. We are entrusting you with the responsibility of ensuring every part of our campus is represented by the same elected officials in order to avoid confusion among voters. Because our campus is diverse in its people and ideals, I believe that this is a non-partisan matter. Because we should also have an equal voice in our government, I believe that everyone benefits from considering our campus as a Community of Interest regardless of political identity.

As students, we also contribute so much to the community. We contribute to local businesses around campus and town, we live, work, eat, and sleep in this community. I urge you all to remember, the college and university students you consider today, are statistically, the most likely population to engage in future elections. You have the unique opportunity to better their experience with democracy and help our university nurture life-long voters.

I am here today advocating for fair districts to be drawn. I believe that, if we draw fair districts, we will see more students civically engaged in the Richmond area and throughout the
state of Virginia. We will also see representatives who better reflect our community and are better able to advocate for our needs.

Thank you for your time today and have a blessed day.

## ---

October 22, 2021
Written testimony submitted to Virginia Redistricting Commission

My name is Megan Rickman Blackwood. I am a senior majoring in Political Science at Virginia Commonwealth University in Richmond, Va. I also serve as a Redistricting Fellow with Campus Vote Project, whose non-partisan parent organization is the Fair Elections Center. It is our mission at the Campus Vote Project to promote student registration, education, and turnout in a non-partisan manner while helping to empower lifelong voters. Leading field research continues to show that the development of these critical civic skills during early adulthood is imperative to shaping feelings of efficacy and enthusiasm about participating in democracy that follow voters throughout their lives.

I want to thank Chairwoman Babichenko and the rest of the commission here today for the opportunity to discuss the infrequent position that we are in to shape the future of our great Commonwealth. I come here today with the hope that even though this commission may disagree on social and economic issues, we can all agree that increasing the political participation of young people is something that we can work on together.

Today, I speak on behalf of over 524,932 fellow students, according to the latest numbers by the State Council of Higher Education, who are attending college and other higher educational opportunities in Virginia. After speaking with students from around the state, there is a clear and present need for this commission to ensure that colleges, technical schools, and other higher education centers are not broken up into multiple districts as they are a vital community of interest.

Unfortunately, too many students are facing the consequences of this issue across the state.

Roughly 300,000 of these students are enrolled within Virginia's Community College and Technical training programs. With the passage and funding of the G3 program, more Virginians than ever have the opportunity to pursue their dream of higher education. This influx of students, coinciding with the task of redistricting, offers this commission the rare opportunity to establish protections for these vital communities as they grow, ensuring each campus is a
connected voting bloc where students will have the chance to be educated, engaged, and active in our commonwealth's democracy.

For further clarification on the importance of protecting colleges and universities as Communities of Interest, we look to the definition established by White House Senior Policy Advisor for Democracy and Voting Rights Justin Levitt. Communities of Interest are "a neighborhood, community, or group of people who have common policy concerns and would benefit from being maintained in a single district."

I understand the temptation to dismiss college and university communities as impermanent ones, however, the Supreme Court has ruled in Symm v. United States, higher education campuses are a bona fide residence, thus we must be considered as such in the eyes of the law.

Students certainly have common policy concerns, with representatives making crucial decisions that impact higher education such as setting amounts for federal and state financial aid, appropriating research and institutional support spending, and legislating the communities students live and learn in.

Finally, meeting the last prong of the definition's test, student bodies certainly benefit from containing campuses and student housing within a single district. A unified campus will allow for greater student voter turnout with an easier process and allow students to elect representatives who understand and advocate for their needs and interests.

These communities of interest do exist across institutions in the state and deserve to be represented as such in the maps approved by this body.

In considering the Congressional District maps as they currently stand, George Mason University is split between districts. Imagine the confusion for students in housing along the north side of Braddock Road in District 10, catching a ride to the polls with their neighbor across the street, and ending up at a polling place for District 11. In these cases, students can be unaware of this issue and denied access to their right to vote. A study from Tufts University, in 2016, found that 1 out of 4 students who were registered to vote and did not vote in the 2016 elections cited not being able to find their polling place as the reason for not voting.

During the past three election cycles, there has been a drastic uptick in student voter participation. A report from Tufts University finds that in Virginia gubernatorial contests, the youth voting rate has increased from $17 \%$ in 2009 to $34 \%$ in 2017. Throughout the past four years, student voter participation has continued to skyrocket with $56 \%$ of young people in

Virginia casting a ballot in the 2020 presidential election. A quick glance at the monthly report, issued by the Department of Elections, tracking new registered voters shows 43,104 students registered to vote in Virginia in just the last six months. This shows that students are eager to participate in our electoral system. Your jobs today are to do everything you can to ensure that it is an easy, exciting process.

With that, this commission has the opportunity and duty to consider higher education institutions as communities of interest, given their importance for helping our young voters create a pattern of lifetime voting, engagement, and fulfillment of their duties as American citizens.

Thank you Chairwoman Babichenko and the rest of the commission here for giving me the opportunity to speak and I would be happy to answer any questions you may have.

Good afternoon,

As a lifelong resident and voter of Virginia, I request that you disqualify the special master nominees submitted by Republicans Delegate Todd Gilbert and Senator Tommy Norment to assist the Court in the drawing of redistricting maps.

The people of Virginia voted for nonpartisan redistricting with the passage of the constitutional amendment in 2020. The GOP's nominees are currently on the payroll of Republican organizations. Their involvement with the drawing of redistricting maps in Wisconsin and Ohio has shown they cannot not be trusted to draw fair maps in a transparent and nonpartisan manner.

The people of Virginia should be the ones choosing their elected officials, not partisan map makers.

Thank you,

Judy Chalkley
13701 Goosehaven Ln
Prince George, VA 23875

My name is Callie Jordan. I am a junior, double majoring in Political Science and Women's Studies at the University of Mary Washington in Fredericksburg, Virginia. I serve on the executive board of UMW Votes College Student Voting Coalition. I am also a Redistricting \& Democracy Fellow with Campus Vote Project, an organization that has empowered college student voices in state redistricting processes.

After speaking with students from around the state, there is a clear and present need for the Virginia Supreme Court to ensure that colleges, technical schools, and other higher education centers are not split between multiple Congressional or State Legislative districts as they are a vital community of interest.

At the University of Mary Washington, the campus is split between House Districts 28 and 88, in addition to a 3 -split division within its city wards. This means students who live, work, and attend the same institution are either represented on the state or city level by different officials simply contingent upon where their dorms or residential buildings are located on-campus.

It is with that I ask the Virginia Supreme Court to provide public hearings on these matters and allow all higher education institutions to be considered as communities of interest, given their shared interests and concerns, as well as their importance for helping our young voters create a pattern of lifetime voting, engagement, and fulfillment of their duties as American citizens.

## October 4, 2021

Verbal testimony provided at Virginia Redistricting Commission public hearing

Hi , my name is Callie Jordan. I have lived, worked, and gone to school in the city of Fredericksburg, VA for almost three years. I am also participating in a college student Redistricting Fellowship with Campus Vote Project, an organization that is empowering college students to have a voice in their state's redistricting process. I'd like you to keep my community, the University of Mary Washington together.

My community is composed of young people, students, faculty, staff, and administration. On-campus students either live in the underclassman and upperclassman mixed buildings, the UMW apartments, or the apartments in Eagle Village. Off-campus students frequently live downtown. Currently, on-campus students are split into three separate wards in between State House District 28 and 88 . This causes confusion come election time about where and how to vote. Many students feel that contingent upon where they live, they are isolated from the rest of their peers because they are not counted and represented together. In order to qualify for VA state financial aid programs and offers, students are encouraged to live and stay on-campus throughout their time at the University.

Students belong to a myriad of social and civic groups like Diversability, Prism, UMW Votes, and the Ecology Club. Common gathering points are Freddy Doughnuts, Soup, and Taco, and many of the bars along the downtown strip bordering the Rappahannock. Additionally, students regularly run, walk, and bike many of the local trails like the canal path, the VCR pathway, and Old Mill Park. Students often attend many of the annual celebrations hosted both on-campus and within the downtown areas like Octoberfest, and the annual Christmas Parade. The University and the greater Fredericksburg area partner together on many projects and initiatives for community members.

Nonprofits that serve our community are the FAHASS Fredericksburg and the RCASA. These groups offer services on-campus and in their office buildings just a short walk from campus. They provide backbones of support for many of the school's sexual assault and sexual wellness resources. Additionally, The greater Fredericksburg area is full of small and independently owned and operated small businesses that students enjoy and become regular customers at like Agora, Katora Cafe, Hyperion, and Curitiba Art Cafe. The locals look forward to students' arrival and are sad when they leave, and the students enjoy interacting with them on-campus. Many residents will walk their dogs along campus and enjoy our amenities with their families regularly. Over the last 20 years, the surrounding Fredericksburg area's makeup has grown to accommodate more young and working professionals and their families who often commute to
DC. Thus, the Fredericksburg Amtrak station downtown is another important locational marker.

In conclusion, it is important for my community to be kept together in the new district maps in order for students to be counted together and for our campus to vote and participate as one block. Thank you for letting me speak and provide testimony today.

## October 22, 2021

## Written testimony submitted to Virginia Redistricting Commission

My name is Callie Jordan. I am a junior, double majoring in Political Science and Women's Studies at the University of Mary Washington in Fredericksburg, Virginia. I serve on the executive board of UMW Votes College Student Voting Coalition. I am also a Redistricting \& Democracy Fellow with Campus Vote Project, which is a part of the non-partisan parent organization, Fair Elections Center. It is our mission at Campus Vote Project to promote student voter registration, education, and turnout in a non-partisan manner while helping create lifelong voters.

I want to first thank the Commission for the opportunity to discuss the infrequent position that we are in to shape the future of our great Commonwealth. I come here with the hope that even though some members of the Commission may disagree on social and economic issues, the idea of increasing political participation among all young people is something that we can work on together.

Today, I speak on behalf of my fellow students in the Commonwealth, including the over 37,700 new first-time students and, oftentimes, first-time voters enrolled at public four-year institutions according to insights from the State Council of Higher Education for Virginia. After speaking with students from around the state, there is a clear and present need for this Commission to ensure that colleges, technical schools, and other higher education centers are not broken up into multiple districts as they are a vital community of interest.

Unfortunately, too many students are facing the consequences of this issue across the state.

At the University of Mary Washington, the campus is split between House Districts 28 and 88, in addition to a 3 -split division within its city wards. This means students who live, work, and attend the same institution are either represented on the state level by Josh Cole or Mark Cole.

On the city level, students are represented by Jason Graham, William Withers, and Tim Diffy, all simply contingent upon where their dorms or residential buildings are located on-campus.

At Virginia Commonwealth University, the issue is further exacerbated. For example, looking at their state level representation, the campus and the surrounding communities where students live in larger percentages are split between eight districts. At the federal level, students are stratified through Congressional Districts 1, 4, and 7.

For various reasons, students might get reassigned to another dorm or residential building that is potentially located in another district, thus requiring certain actions on their part such as updating their voter information or learning more about who their new representatives are. In these cases, they might be unaware of this issue and denied access to their right to vote. A study from Tufts University, in 2016, found that 1 out of 4 students who were registered to vote and who did not vote in the 2016 elections cited not being able to find their polling place as the reason for not voting.

Another side effect of district lines going through colleges and universities is that some students may have a close and convenient polling place while another group of students may have to travel long distances that may require access to personal transportation. In that same study, $27 \%$ cited not having transportation to their polling place as why they did not vote. This issue is also apparent at other colleges across the state such as Norfolk State University, Old Dominion University, Christopher Newport University, among others.

During the past election cycle, there was immense support for students registering to vote and voting from non-profit groups, colleges, the Virginia Department of State, and other organizations. Even in smaller elections, Virginia students turned out. According to Virginia Department of Elections data, more than 14,000 students requested absentee ballots ahead of the 2020 Democratic presidential primary. This shows that when the process to vote is made more accessible, student voter turnout will increase accordingly.

But, why should higher education institutions be considered communities of interest? White House Senior Policy Advisor for Democracy and Voting Rights Justin Levitt stated that "a community of interest is a neighborhood, community, or group of people who have common policy concerns and would benefit from being maintained in a single district."

I understand there may be concerns that higher education is not a permanent community for many. However, the Supreme Court has ruled in Symm v. United States, higher education campuses are a bona fide residence, thus we must be considered as such in the eyes of the law.

The second part of the definition is that we must have common policy concerns, which students have with higher education such as issues on federal and state financial aid or ensuring students can find gainful employment upon graduation.

With the last part of the definition surrounding that a group must benefit from a single district, a unified campus will allow for greater student voter turnout with a more accessible process, thus allowing students to elect representatives who will understand and advocate for their needs. In Virginia House District 28 and city Ward 2, which encompasses the University of Mary Washington, many voters are students. These communities of interest do exist across institutions in the state, including my own, and deserve to be represented as such when the maps are finally drawn.

So it is with that I ask the Commission to allow all higher education institutions to be considered as communities of interest, given its importance for helping our young voters create a pattern of lifetime voting, engagement, and fulfillment of their duties as American citizens.

Thank you to the Commission for giving me the opportunity to speak and I would be happy to answer any questions you may have.

Clerk of the Supreme Court of Virginia,

Last year's elections were one of the most intense and divisive in modern American history, yet Democrats and Republicans alike voted overwhelmingly to take politics out of redistricting and draw fair maps that equally represent all Virginians.

However, it is clear that Mr. Adam Kincaid, Mr. Thomas Bryan, and Mr. Adam Foltz, who have been selected by the Republican Party of Virginia to serve as special masters during this process, are blatantly partisan and thus unfit to serve, unlike Dr. Bruce Cain, Dr. Bernard Groffman, and Dr. Nathaniel Persily, who have been nominated by the Democratic Party of Virginia to impartially carry out the important process of redistricting.

I join many of my fellow Virginians in asking the Court to fulfill their promise of ensuring equal justice under law and listening to the people of our Commonwealth. Therefore, it is only right that the Court disqualify Mr. Kincaid, Mr. Bryan, and Mr. Foltz, so politics can finally be taken out of our maps and all Virginians can be fairly and equally represented.

Best regards,

Zachary Lincoln
West Springfield, VA

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

I am concerned to learn that several individuals nominated by the Republican Party to participate in the redistricting process have a history of participating in partisan gerrymandering with the express purpose of artificially creating Republican power in Congress and state legislators. As a voter, I do not want to see gerrymandering occur in Virginia. Please reject any individuals whose partisan history disqualifies them from participating in a fair process.

Additionally, as a resident of Henrico County, I am concerned about the county being divided between three or four congressional districts. Many political and economic issues affect communities within the county, and making arbitrary divisions that separate voters from our neighbors and schools and work places will make it more difficult for elected representatives to work for their constituents.

Thank you,
Caroline Pruett 4908 Finnegan Court

As a Virginia citizen and voter, I have serious concerns about the Republican nominees to assist in the redistricting process. Considering their involvement in other redistricting plans, I can't imagine that fairness and equality will be a priority. They are currently being paid by Republican organizations so whom would we expect them to be listening to or serving for that matter?

I question their allegiance, as well as their ability to draw fair maps in a transparent and inclusive manner. Please remember that Courts are supposed to be free of politics.

Respectfully,
Cheryl Dancy

I am writing today as a citizen of Prince George County, Virginia, and a legal Voter. I strongly OPPOSE the Republican nominees and request they be disqualified.

We should be appointing individuals who are highly qualified in their respected fields and whose focus is on fair representation, not partisan politics. The Republican nominees have a history of gerrymandering and should never participate in Virginia redistricting efforts.

Every Virginian should feel comfortable knowing their vote is equal to everyone else's. Politics, specific gerrymandering, has no place in the voting booth.

Sincerely,
Tammie Miller Jennings

November 10, 2021

Muriel-Theresa Pitney
Clerk of the Supreme Court of Virginia
Supreme Court Building
100 North 9th Street
Richmond, Virginia 23219

Pursuant to Rule 4(a) of the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A, I write to offer public comment on the Supreme Court of Virginia's selection of redistricting special masters.

As director of the Electoral Innovation Lab at Princeton University, I lead the work of the Princeton Gerrymandering Project, which has worked since 2013 to develop and apply scientific tools for nonpartisan fair districting. My team, composed of data scientists, legal staff, and technology developers, offers those resources at gerrymander.princeton.edu. In the current redistricting cycle, our work has been cited favorably by Republican, Democratic, and nonpartisan commentators. ${ }^{1}$

Our standards are based on nonpartisan criteria. Our analysis produces both numerical metrics and scores that fall on a "grading curve," analogous to the way grades might be assigned in a college course. Our metrics have identified extreme partisanship on the Democratic side in Illinois and Oregon, and on the Republican side in Texas, Ohio, and North Carolina.

For Virginia, our standards, as well as the information needed for a normally skilled expert to use them to evaluate new maps, are posted at https://github.com/PrincetonUniversity/PGP-Virginia2021. A detailed memo explaining how to apply these standards is also available at that link, and a copy is attached here. Normally skilled experts would be able to use these standards using

[^0]voting data available to them. In addition, we have also posted our own voting estimates of Virginia precincts. These estimates are based on official voting returns and are fully documented. These resources are all available free to the public under an MIT license and do not require any contact with us.

The Virginia Redistricting Commission's work illustrated the important role technical experts can play in implementing the standards of Virginia's new redistricting law. Staff on both sides of the Commission produced maps that were initially reasonable from a partisan fairness point of view, as indicated by our analytics. Our reports on the Commission's proposed maps are available here. It is unfortunate that the Commission was ultimately unable to achieve consensus.

Nominees for special master have been submitted to the Virginia Supreme Court in accordance with Rule 2 of the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A. Of the nominees submitted, we note that Bernard Grofman and Nathaniel Persily both have valuable recent experience as special masters in the 2011 redistricting cycle and subsequent litigation. Furthermore, Thomas Bryan and Professor Grofman have familiarity with Virginia, Mr. Bryan as a resident of the Commonwealth, and Professor Grofman as special master in two federal redistricting cases, Bethune-Hill v. Virginia State Board of Elections and Personhuballah v. Alcorn. These three nominees also have multiple peer-reviewed publications relating to redistricting. It is our sense that any of them would render high-quality service to the Court in the important work ahead.

Rigorous data-driven evaluation will be invaluable to the Supreme Court of Virginia as it seeks to adopt districting plans that give all Virginians a voice in state legislative and congressional elections. We thank the Court for the opportunity to comment on this important matter.

Respectfully submitted,

Director, Electoral Innovation Lab
Princeton University

To: Interested persons in Virginia
From: The Princeton Gerrymandering Project data team (Hannah Wheelen, Amanda
Kmetz, Ari Goldbloom-Helzner, and Sam Wang)
Date: November 10, 2021

This memo documents how to calculate the individual and final letter grades that the Princeton Gerrymandering Project's Redistricting Report Card would issue for a given plan in Virginia. These report cards have been cited favorably by both political parties across the nation. For implementations in Virginia, see gerrymander.princeton.edu for the redistricting commission's publicly released maps.

To use this memo, we assume that you are normally skilled in the ability to estimate district-level parameters: shape parameters, partisan tendency, and racial composition. We describe PGP's metrics for fairness and performance levels, and describe how to use those thresholds to calculate letter grades. Letter grades, while a simplification, can be used for rapid communication to nontechnical audiences.

For best results and the most meaningful grades, we highly recommend that you use the chamber-specific Python script with your hypothetical Virginia plan as input. The script aggregates this plan with a PGP-provided precinct shapefile and PGP chamber-specific precinct-level voting estimates, both of which are freely available on Github at https://github.com/PrincetonUniversity/PGP-Virginia-2021. The output is a JSON-format file which contains a variety of numeric scores.

It is also possible to score districts using your own evaluation tools (e.g. Maptitude or Dave's Redistricting). However, note that results may sometimes come out differently because of differences in precinct-level inputs. ${ }^{1}$ For example, the commission's state Senate map A5 gives 21 Democratic-leaning seats using PGP estimates, but 23 Democratic seats using Dave's Redistricting App composite election estimates. In this case, the likely reason is that three Republican-leaning districts have margins smaller than 2 percentage points.

[^1]Numeric scores (either in the JSON file or your own estimates) can be compared to these thresholds. Grading thresholds were generated by making comparisons to millions of computer simulated maps (an "ensemble") as well as maps drawn by a corps of experienced community mappers.

Note that this report-card approach does not include racial fairness, an area sufficiently complex that PGP has not established a grading scale. PGP's approach has been to calculate and display potential ability-to-elect districts as districts that are 30-40\%, $40-50 \%$, or $>50 \%$ Black Voting Age Population (BVAP), Hispanic (HVAP), Asian (AVAP), or total minority (MVAP, defining a potential coalition district). Example racial-minority metrics for Commission maps can be seen at gerrymander.princeton.edu.

## Competitiveness:

The "ActualCompetitive" entry gives the estimated number of competitive districts, defined as districts whose difference between Democratic and Republican vote share is less than 7 percentage points. The grade is determined using the following table.

| ActualCompetitive | "A" | "B" | "C" | "F" |
| :---: | :---: | :---: | :---: | :---: |
| Congress | 4 or more | 3 | 1 to 2 | 0 |
| State Senate | 10 or more | 8 to 9 | 4 to 7 | 0 to 3 |
| House of Delegates | 19 or more | 15 to 18 | 9 to 14 | 0 to 8 |

## Partisan Fairness:

The "DemWins" entry gives the estimated most-likely number of Democratic wins, defined as all districts where the Democratic candidate would be favored by any margin. The starting grade is determined using the following table.

| DemWins | "A" | "B" | "C" | "F" |
| :---: | :---: | :---: | :---: | :---: |
| Congress | $7-8$ | N/A | 6 | $0-5,9-11$ |
| State Senate | $24-26$ | $23,27-28$ | N/A | $0-22,29-40$ |
| House of Delegates | $59-62$ | $56-58,63-72$ | N/A | $0-55,73-100$ |

Next, modify the grade based on the Competitiveness score. If Competitiveness received an " F ", bump down the partisan fairness grade by one letter grade (e.g. " B " becomes " C "). If Competitiveness received an " A ", bump up the partisan fairness grade by one letter grade (e.g. " $B$ " becomes " $A$ "). Other Competitiveness grades do not affect this grade.

## Geography:

The Geography grade uses both geometric compactness and county splits. The "avgReock" entry is the average Reock score, a measure of geometric compactness. The starting grade is determined using the following table.

| avgReock | "A" | "C" | "F" |
| :---: | :---: | :---: | :---: |
| Congress | $\geq 0.4184$ | $0.3241 \leq$ avgReock $<0.4184$ | $<0.3241$ |
| State Senate | $\geq 0.4370$ | $0.3622 \leq$ avgReock $<0.4370$ | $<0.3622$ |
| House of Delegates | $\geq 0.4309$ | $0.4018 \leq$ avgReock $<0.4309$ | $<0.4018$ |

Using the "countySplits" entry to grade county splits", the grade is determined using the following table.

| countySplits | "A" | "C" | "F" |
| :---: | :---: | :---: | :---: |
| Congress | $\leq 5$ | 6 to 16 | $>16$ |
| State Senate | $\leq 16$ | 17 to 46 | $>46$ |
| House of Delegates | $\leq 42$ | 43 to 80 | $>80$ |

Finally, to determine the Geography Overall Grade:
" $A$ ": if both county splits and compactness received an " $A$ "
" B ": if one of county splits and compactness received an " A " and the other a "C"
" $F$ ": if both county splits and compactness received an " $F$ "
"C": otherwise

[^2]
## Final Letter Grade:

Take the partisan fairness grade (which incorporates any changes due to competitiveness as described above). This is the final letter grade unless the overall geography grade is an "F", in which case the final letter grade is bumped down by one letter grade.

Supreme Court of Virginia
100 N. $9^{\text {th }}$ Street, $5^{\text {th }}$ floor
Richmond, VA 23219

Dear Justices,
In November 2020, Virginia voters supported a constitutional amendment that would take redistricting out of the control of the majority party and put some of that power back into the hands of voters by giving citizens seats on the redistricting commission and giving citizens chairmanship of the commission. In addition, the new process allowed for transparency and public input in the form of comments at commission hearings, meetings, via email and via the commission website. Unfortunately, the commission deadlocked because of partisanship and gamesmanship and refusal to compromise and work fairly on behalf of voters.

Now that the public trust and potential for fair maps is in the hands of our Supreme Court Justices, adherence to the rules in the governing statute is imperative. Your job now is to choose two special masters who will take over the process and draw the maps that the commission could not. Virginia code, as established by SB203, lays out some of the qualifications for the special masters. For example, once the commission failed to submit plans, the legislative leaders of the two largest parties are each required to submit a list of three or more nominees to be special masters. The list shall include "a brief biography and resume for each nominee, including the nominee's particular expertise or experience relevant to redistricting."
The Court shall then choose one special master from each party. These special masters "shall have the requisite qualifications and experience to serve as a special master and shall have no conflicts of interest. In making its appointments, the Court shall consider any relevant redistricting experience in the Commonwealth and any practical or academic experience in the field of redistricting."

[^3]In addition, Virginia code stipulates:
8. A map of districts shall not, when considered on a statewide basis, unduly favor or disfavor any political party.

Virginians are not registered with a political party. Representative democracy means being able to elect someone to represent constituent interests - not the interests of the representatives or the parties to which they may belong. The best way for the court to protect the interests of voters is to ensure the process is transparent and that the most qualified people are selected to serve as special masters. According to law, these individuals should have redistricting experience and expertise and no conflict of interest. To ensure the maps do not unduly favor or disfavor a political party, the special masters should not be unduly influenced by either political party. Their duty and the court's duty is to represent all Virginians (whether they are eligible to vote or not) because that is what is prescribed in the taking of census data.

Sincerely,
Der Wake

I am writing today as a citizen of Prince George County, Virginia, and a legal Voter. I strongly OPPOSE the Republican nominees and request they be disqualified.

We should be appointing individuals who are highly qualified in their respected fields and whose focus is on fair representation, not partisan politics. The Republican nominees have a history of gerrymandering and should never participate in Virginia redistricting efforts.

Every Virginian should feel comfortable knowing their vote is equal to everyone else's.
Politics, specific gerrymandering, has no place in the voting booth.
Sincerely,
Chris Jennings

To: Justices of the Supreme Court of Virginia
I am a 78-year-old native of Virginia who grew up in Pittsylvania County but have spent most of my working life elsewhere (primarily in New Orleans and New York City). I am a graduate of the University of Virginia School of Law and, following my retirement from the practice of law in New York City, I moved back to Virginia and settled in Albemarle County (just outside the city limits of Charlottesville) in 2011.

I was not familiar with the local political landscape when I moved into the Charlottesville/Albemarle County area, and was very surprised to learn that the County I am living in is carved up so that parts of it are in four different House of Delegates districts! Three of those four segments of Albemarle County are in "safe" Republican districts, despite the fact that the County now leans heavily Democratic (with $62 \%$ of the vote in the recent election for Governor going to the Democratic candidate).

Thus it seems to me that most of the voters in Albemarle County are not able to have their views adequately represented in the House of Delegates because 3/4 of our Delegates are much more conservative than most of the people they are supposedly representing.

Consequently, I hope you will seriously consider keeping Albemarle County together as a single unit (or two at the most, if one is not possible), together with Charlottesville, which is surrounded on all sides by Albemarle County and which has similar political leanings.

I also hope that Albemarle County (and Charlottesville) can be placed in a new Congressional District other than the current monstrosity that is the highly gerrymandered 5th district, which extends from the North Carolina state line almost to the D.C. suburbs (over 200 miles). As the 5th District is currently constituted, there is no hope of electing a Congressman who represents the predominant local views of Charlottesville/ Albemarle County voters on major issues. From my perspective, I do not currently have a Congressman that I can reasonably expect to seriously consider my views on such issues.

Sincerely,
William C. Love, Jr.

Good afternoon,
The people of Virginia were sold on the Amendment using phrases such as "No Gerrymandering", "Bi partisan" and Citizen commissioners.

Since the beginning of the commission none of the ideals or promises came to pass.
I saw map after map drawn by Republicans that showed clear intent to politically gerrymander. I saw a bit of the same with Democrats (not so obvious).

I listened to all of the meetings. Things went wrong from the beginning -- two lawyers, two mapping teams and failure to compromise anywhere.

When I saw the proposed Congressional District maps, I signed up to testify. The map (also drawn by "citizen" Tom Davis") that the republicans were proposing joined
Western/Rural/White Va (frederick, clark, Fauquier) with the urban/suburban county of Prince William that has one of the most vibrant \& diverse populations that can be found in Virginia.

On the face of this map one could see issues galore -- the Appalachian Trail crosses through one side and the challenging transportation arteries of routes 28 and 95 through the other. There is no commonality in economy, transportation, life styles, religions, communities, backgrounds and voting history. It was a map designed to dilute and remove the influence of Prince William County. That's what my testimony would have been, including charts and tables of supportive data and social analysis.

But then, I received EMAIL from the commission -- they were cancelling all further meetings. And the mapping process would move to the SCOVA.

Please do not compound this debacle of partisan politics by being a partisan court. Please employ a master mapper from the community of expertise and not associated in the world of politics. Surely the Brennan Center or the Princeton Center could offer good unobjectionable candidates to fulfill this need.

The ugliness of the commission process exposes deep issues in Virginia. Please do not add to this; instead find a judicious solution that has no partisan cloud.

Thank you, Diana Smith

Dear Sir or Madam:

I write as a citizen of the Commonwealth and a taxpayer and civic activist in Albemarle County.

It is imperative that Albemarle/ Charlottesville should not be gerrymandered, split up again into four different legislative districts, as is the case currently. My delegate, for instance, lives in the Shenandoah Valley, which does not have the same common interests as Albemarle and the piedmont.

Albemarle/ Charlottesville should also be redistricted into a Congressional district that stretches to the east along I-64, taking in the Richmond suburbs. The current fifth lumps us into a New Jersey-sized monolith, meaning we have no common interests, too, with other parts of the district, including Southside and Fauquier.

Please listen to us in this process.
Thank you for your time and energy to make Virginia redistricting a success.
Sincerely,

To whom it may concern,
I have serious objections to the GOP nominees for what is supposed to be a non partisan redistricting committee. These nominees are on the Republican political payroll in one form or another and should not be viewed as non partisan. The point of the amendment being approved was to ensure non partisan, fair and transparent redistricting. This cannot occur with partisan nominees.

Please disqualify these nominees and enforce the non partisan part of the redistricting process.
Thank you

The citizens of Virginia passed the constitutional amendment establishing a redistricting commission because they wanted fair, unbiased drawing of district lines. Unfortunately, it now falls on the Court to do this. I urge you to reject the nominees proposed by the Republicans and direct them to submit new, unbiased nominees. These three nominees are partisan political operatives who have interests in creating maps that will unduly favor the Republican party. It is tremendously important that the Court set a precedent for the creation of fair, nonpartisan maps, in accordance with the wishes of the electorate.

To: Members of the Supreme Court of Virginia
From: Virginia M. Smith Citizen of the Commonwealth
It has come to my attention that the special master nominees submitted by the Republican legislators have a questionable history of drawing redistricting maps that demonstrate gerrymandering. Certainly, you are aware of the financial ties these special master nominees have with Republican organizations.

I am confident that your goal is to be free of the appearance of political influence. Please keep this reachable goal as your guidepost. Based on your goal for Virginia, I ask that you consider disqualifying the special master nominees submitted by members of the Virginia House and Senate.

Living in the Commonwealth of Virginia has so many benefits, but the one I enjoy most is that we aim high, especially, when it comes to fair representation and understanding the needs of our voters.
Earlier in the redistricting process, a map was presented that included a new senatorial district in Southside Virginia. That particular map reflected voters' needs in Southside Virginia. Please, let this new senatorial district become a reality for me and my fellow Virginia voters.

Best regards,
Virginia M. Smith

I agree with Senator Saslaw that the masters the Republicans have proposed are not neutral.
Our courts are supposed to be free of politics-which is why they enacted conflict of interest provisions in the enabling legislation for the nonpartisan redistricting constitutional amendment. These candidates backgrounds do not meet the provisions. Below is why I do not want these candidates presented as nominees.

Thomas Bryan was paid \$20,000 by Virginia Senate Republicans on 9/3/2021, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.

Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.

Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional maps.

All map masters must be nonpartisan and experts in their field. This initial Redistricting, following the adoption of the amendment sets an important precedent.

Please order the Republicans to engage 3 neutral, nonpartisan map masters who are acknowledged experts in their field.

Sincerely,
Lauren Robinson

```
From: Will Pace
To: Redistricting
Subject: Please support how Danville and Pittsylvania County were drawn for General Assembly Districts
Date: Wednesday, November 10, 2021 7:36:06 PM
```

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Dear Madam Clerk,
My name is Will Pace, and I am a resident of Pittsylvania County. I also serve as Mayor of Chatham, which is the county seat of Pittsylvania County. I have been following the efforts of the Redistricting Commission and have been anticipating how the City of Danville and Pittsylvania County would look like. While I am disappointed that the Redistricting Commission could not find a solution with the House of Delegates and Senate maps, I appreciate what both the Republican and Democrat mapmakers did in the end in the matter of how Danville and Pittsylvania County were drawn.

The Senate District maps proposed by the Republican and Democrat mapmakers (A5 and B5) are perfect for Pittsylvania County and Danville. Both maps created a Senate district that included Danville, Martinsville, Pittsylvania County, Henry County and Franklin County. None of these localities are split in different Senate districts. Leave this Senate district as was proposed by both the Republican and Democrat mapmakers as is.

I support how the House District maps (A7 and B7) were drawn. While it is not perfect, A7 and B7 were by far the best versions out of any maps proposed as they both keep our communities of interest intact. These maps split Pittsylvania County north and south (not east and west), which is the way it should be done. In addition, these maps maintain for the most part the communities of interest for Chatham, Gretna and Hurt all in one House district while maintaining the communities of interest (COI) for Danville in another House district. Both maps put northern and central Pittsylvania County in a House district with all of Franklin County while southern Pittsylvania County and Danville are in one whole district with a few precincts from Henry County including the town of Ridgeway in this House district. I have listed the towns and cities communities of interest below.

Hurt COI: Town of Hurt, Motley, Renan, Sycamore
Gretna COI: Town of Gretna, Mt. Airy, Pittsville, Sandy Level
Chatham COI: Town of Chatham, Callands, Dry Fork, Java, Riceville, Rondo, and
Tightsqueeze
Danville COI: City of Danville, Bachelors Hall, Berry Hill, Brosville, Kentuck, Laurel Grove, Mount Cross, Mount Hermon, Ringgold, Stony Mill, Tunstall, and Whitmell.

Finally, Danville City and Martinsville City should NOT be placed in the same House of Delegates district as these cities and their surrounding areas are NOT communities of interest. Putting the cities of Danville and Martinsville in the same House of Delegates district will split their respective communities of interest and will create a Gerrymandered House District. Martinsville's COI are Chatmoss, Collinsville, and Fieldale. A Gerrymandered Danville CityMartinsville City House District will keep Chatmoss, Collinsville, and Fieldale outside of a

House district with the City of Martinsville, and will keep Kentuck, Laurel Grove, Mount Cross, Mount Hermon, and Ringgold outside of a House district with the City of Danville. The Redistricting Commission was created to avoid the creation of Gerrymandered districts. Creating a Danville City-Martinsville City House District will result in a Gerrymandered district that will split communities of interest.

In closing, I hope that you will support what the Democrat and Republican mapmakers drew for the House of Delegates and Senate in regard to Pittsylvania County and Danville. Please do everything to keep these communities of interest intact and leave Senate District maps (A5 and B5) and House District maps (A7 and B7) as is for our region. Thank you.

Sincerely,

Will Pace
Mayor of Chatham

Dear Justices,
I would like to see Thomas Bryan serve as the Republican serving to redraw the new redistricting lines and Bernard Grofman to serve as the Democrat. Thank you.
Sincerely,
Karen R. Nuzzo

Dear Sirs,
i am frustrated that the non-partisan redistricting has turned out to be totally partisan with the current nominees. I request that you disqualify the GOP nominees as they have an agenda not to improve democracy, but to sway elections in a partisan direction. This is a very real concern in today's political environment.
Please disqualify Thomas Bryan, Adam Kincaid, and Adam Foltz. Here are my reasons

- Thomas Bryan was paid $\$ 20,000$ by Virginia Senate Republicans on 9/3/2021, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.
- Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.
- Adam Foltz is a long-time Republican operative who worked on the mapdrawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional districts.

Please consider the fair and right way to serve the all the people of Virginia.

Sincerely,
Martha M. Turner
Midlothian Va 23113

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Dear Members of the Supreme Court:
In choosing the special master, I hope that you will select a team who are experienced at drawing nonpartisan district lines based on the criteria of the given state. The failure of the process in the Redistricting Commission was due to adherence to party politics. The special masters should not be "stand-ins" for either political party. Other states do have nonpartisan redistricting so I know that there are professionals experienced in the art of drawing districts who are not partisan stand-ins.

I have written two separate comments at two different meetings of the Redistricting Commission and attach these to this email.

I especially ask that you direct the masters to seek to make the districts conform to "communities of interest." In the latest Commission draft map, our area of Charlottesville-Albemarle was once again divided into four districts, including districts that cross the mountain and thus are not a "community of interest." That is similar to the current situation in which our area is gerrymandered into numerous districts. My initial comments from last January made suggestions about how to discern communities of interest noting specifically the issues in Charlottesville.

Thank you for your consideration of my public comment.

[^5]Please stick to your idea of retaining communities of interest.
Do not gerrymander Albemarle County. The Republican plan divides it into three districts; the Democratic plan makes one of two districts cross the Blue Ridge to Augusta County - and while Augusta and Albemarle may share these beautiful mountains, they are not a community of interest.

Neither does Albemarle share interests with the Lynchburg area an hour to the south.
To get the additional population to complete any Albemarle district please add areas from Nelson, Fluvanna, or Greene, all counties adjacent to Albemarle and part of the Planning District 10: they have worked together on common issues. People in these counties and Charlottesville commute between them for work, family, medical care, cultural activities and shopping.
(Likewise Augusta over the blue Ridge is connected to communities in the Valley and Lynchburg to the areas of Amherst, Campbell and Bedford).

Please stick to your original guiding principles and do not gerrymander. This is the raison d'etre for the founding of your commission.

Kay Slaughter

To: Redistricting Commission
From: Katherine Slaughter, Former Charlottesville Mayor, former chair, Thomas Jefferson Planning District
Re: Virginia Planning District Boundaries as Basis for Redistricting; Opposition to Including Political Addresses in mapmaking.

$$
1 / 11 / 2021
$$

I am Kay Slaughter of Charlottesville, a former city councilor and Mayor and a retired environmental attorney who lobbied the General Assembly in the '90s and early 2000s.

I am here to urge commission members, despite your Republican or Democratic label, to reject political considerations in designing district boundaries. I request you utilize planning district boundaries AND exclude addresses of General Assembly members in the mapping criteria.

The criteria for voting districts should include compactness, contiguity, racial equity, and representation by communities of interest. I focus here on communities of interest.

Past gerrymandering has led to absurd results, for example our area is split into four separate Senate districts: two including western neighbors in the Shenandoah Valley, and one from Spotsylvania in the East, and Lynchburg to the south. Likewise, our area is split among five House districts, including two from the Valley and Richmond. Our Congressional District stretches from Fauquier to the North Carolina border. Across the state other glaring examples abound where the communities of interest are split up and not truly represented by a common legislator.

I urge you to correct this by adopting Planning Districts as your working template for legislative and congressional districts. PDs are special districts created by Virginia statute. The 23 planning districts provide the best basis for creating communities of interest.

The counties and cities in these PDs are contiguous, share a common geography, and have collaborated on common interests, such as housing, transportation, economic development, and waste management. Because the Planning Districts are creations of the state government, using their structure as a template for redistricting is most appropriate.

For example, Charlottesville and Albemarle County are part of the Thomas Jefferson Planning District 10, which also includes Nelson, Louisa, Fluvanna, and Greene. Neighboring Rappahannock-Rapidan District 9 encompasses Madison, Orange, Culpeper, Rappahannock, and Fauquier.

Congressional districts could be fashioned by combining some portions of adjacent planning districts. To reach the ideal size for congressional districts, some PDs would need to be combined in whole or in part with adjacent PDs

I hope you will adopt this model and that you will exclude political addresses in your redistricting mapping criteria. I am happy to answer any questions.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Voters did not think they were asking maps to be drawn by partisan operatives when they approved the nonpartisan redistricting constitutional amendment in 2020. All of the GOP's nominees are currently on the payroll of Republican organizations; how can they be trusted to draw fair maps in a transparent and inclusive way? The citizens of Virginia voted to depolitize the construction of legislative districts. Democracy is subverted when the democratic process is manipulated. For that reason, I ask that you disqualify the GOP nominees as they have an agenda not to improve democracy, but to sway elections in a partisan direction.

The Democrats have set an example in submitting special master nominees who are leading respected academics in the fields of political science, demographics, and law. We hope Republicans will do the right thing for the Commonwealth and choose new nominees whose participation in this important process will ensure Virginians have fair representation in state and federal government.

Below is a short background on the Republican nominees:
Thomas Bryan was paid $\$ 20,000$ by Virginia Senate Republicans on $9 / 3 / 2021$, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.
Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.
Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional maps."

Sincerely, Eleanore Rhoden

## Dear Madame Clerk,

My name is J ames Croll, a high school senior in Loudoun County. I write today to urge you to consider the Democratic motion to suspend the special masters nominated by the Republican Party, Mr. Bryan, Mr. Kincaid, and Mr. Foltz. All three have demonstrated partisan interest in previous redistricting ventures (Kincaid in Ohio, Foltz in Wisconsin, Bryan was paid 20k from the Virginia Senate Republicans) which I believe disqualifies them from being able to draw a fair map. The purpose of the commission was to draw fair districts that did not demonstrate partisan favoritism in any way, but if any of the three Republican nominees were to become the final cartographer, a non-representative and gerrymandered map would surely be the result. I do not want a Democratic map or a Republican map, simply a fair map that accurately represents the partisanship and communities of interest of the Commonwealth of Virginia.

As for the actual map itself, I have some suggestions about communities of interest that should remain together. Having three Northern Virginia districts is fair in my opinion (one for Arlington/I nner Fairfax, one for Greater Fairfax and parts of PWC, and one for exurban Loudoun and Clarke Counties). The first issue is in Norfolk. The commission repeatedly ignored the fact that a VRA district is required in that area for a majority-black congressional seat, something that must be implemented in the final version. Another issue lies with the drawing of the 5th congressional district, currently represented by Bob Good. This district stretches from Fauquier County to the North Carolina border, not representing any communities of interest and not providing adequate/representative government to individuals living in places like Charlottesville and Albemarle County. I ask that the Court investigate creating a congressional seat similar to the 7th district on commission draft C1-B, a seat that combines the southern exurbs of NoVa, Quantico, and Charlottesville/Albemarle County into a new district that represents both the population and the partisanship of this area. A side effect of the creation of this district is that (according to C1-B) a new Southside district will be
created that combines another community of interest into one congressional seat that is currently represented by four congresspeople. I also believe that the Shenandoah Valley and the SW panhandle require independent districts, as both have distinct cultural identities that need representation from the right people. The current VA-02 and VA-04 should be fine to mostly leave intact as they both fairly represent the communities of Virginia Beach/Eastern Shore/Hampton and Richmond (however I think that VA-04 should incorporate more of Mechanicsburg/suburbs but that is a minor detail).

Once again, I implore you to expel the Republican nominees in exchange for cartographers that hold fairness over partisanship. Thank you very much for your time.

J ames Croll

Hello,
Our courts are supposed to be free of politics. The Redistricting Map Masters the Republicans have proposed are not even close to neutral or nonpartisan experts in their field.

- Thomas Bryan was paid $\$ 20,000$ by Virginia Senate Republicans on $9 / 3 / 2021$, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.
- Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.
- Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering.

Please demand the Republicans to select 3 neutral, nonpartisan map Masters who are acknowledged experts in their field with no history of gerrymandering.

Kind Regards, Leigh Eicher

To Whom It May Concern,

I have read with dismay the backgrounds of three of the special master nominees to assist in the redistricting effort in Virginia. Thomas Bryan, Adam Kincaide, and Adam Foltz are clearly and demonstrably partisan and cannot be counted on to serve the will of Virginians in establishing as equitable a redistricting as possible. The whole purpose of the referendum was to make voting fairer in Virginia and this trio will do their best to skew those results. This is abominable, and not the will of the people.

I request these three be rejected, and hopefully the Republicans will show more integrity in nominating three others without the baggage and clear intent to cheat that these three have.

Thank you.

## To Whom It May Concern:

I am writing to express my concerns regarding redistricting in the Commonwealth and the Virginia Courts consideration of three partisan appointees in this process. Like our court system, redistricting must remain nonpartisan to ensure the rights of all Virginia citizens and to maintain confidence in decisions rendered.

Virginia enacted conflict of interest provisions to facilitate fairness through the nonpartisan redistricting constitutional amendment. Inappropriately, Republican caucuses now ask our Supreme Court to effectively sanction partisan map drawing with the appointments of three clearly partisan nembers:

1. Thomas Bryan was paid $\$ 20,000$ by Virginia Senate Republicans on 9/3/2021, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.
2. Adam Kincaid, Executive Director of the National Republican Redistricting Trust, has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.
3.Adam Foltz is a long-time Republican operative who worked on the map-drawing in various states where gerrymandering has occurred.

To ensure fair representation of all Virginia citizens and transparency in this important process, the Supreme Court must ensure this work is completed by the proffessional experts--not partisan operatives. Let Virginia's work serve as a model for other states.

Thank you for your consideration of this request.

Supreme Court of Virginia
100 N. $9^{\text {th }}$ Street, $5^{\text {th }}$ floor
Richmond, VA 23219

Dear Justices,
In November 2020, Virginia voters supported a constitutional amendment that would take redistricting out of the control of the majority party and put some of that power back into the hands of voters by giving citizens seats on the redistricting commission and giving citizens chairmanship of the commission. In addition, the new process allowed for transparency and public input in the form of comments at commission hearings, meetings, via email and via the commission website. Unfortunately, the commission deadlocked because of partisanship and gamesmanship and refusal to compromise and work fairly on behalf of voters.

Now that the public trust and potential for fair maps is in the hands of our Supreme Court Justices, adherence to the rules in the governing statute is imperative. Your job now is to choose two special masters who will take over the process and draw the maps that the commission could not. Virginia code, as established by SB203, lays out some of the qualifications for the special masters. For example, once the commission failed to submit plans, the legislative leaders of the two largest parties are each required to submit a list of three or more nominees to be special masters. The list shall include "a brief biography and resume for each nominee, including the nominee's particular expertise or experience relevant to redistricting." The Court shall then choose one special master from each party. These special masters "shall have the requisite qualifications and experience to serve as a special master and shall have no conflicts of interest. In making its appointments, the Court shall consider any relevant redistricting experience in the Commonwealth and any practical or academic experience in the field of redistricting."

[^6]In addition, Virginia code stipulates:
8. A map of districts shall not, when considered on a statewide basis, unduly favor or disfavor any political party.

Virginians are not registered with a political party. Representative democracy means being able to elect someone to represent constituent interests - not the interests of the representatives or the parties to which they may belong. The best way for the court to protect the interests of voters is to ensure the process is transparent and that the most qualified people are selected to serve as special masters. According to law, these individuals should have redistricting experience and expertise and no conflict of interest. To ensure the maps do not unduly favor or disfavor a political party, the special masters should not be unduly influenced by either political party. Their duty and the court's duty is to represent all Virginians (whether they are eligible to vote or not) because that is what is prescribed in the taking of census data.

Sincerely,
Der Wake

TO: Justices of the Supreme Court of Virginia and Special Masters
RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A

We are residents of southern Stafford County, just across the Rappahannock River from the City of Fredericksburg. We are currently in the ridiculously gerrymandered $28^{\text {th }}$ Virginia Senate District which includes portions of five counties. Stafford County is "represented" by three different state Senators.

Current Map of 28th Senate District

As you redraw state Senate maps, please consider -

Commission Map \#103 - Senate B3, September 18, 2021
This Commission map does an excellent job of keeping our "community of interest" together:

- Residents of this proposed Senate District 13 all have a Fredericksburg address and are connected economically, socially, and historically with Fredericksburg as the hub.
- It logically follows the North/South I-95 transportation corridor. Stafford County is the third fastest growing county in Virginia and many residents use I-95 to commute north to work. I95 is used for shopping and enjoying restaurants in downtown Fredericksburg or northern Spotsylvania.
- It does not group us with more rural King George County with which we have very little in common other than a state Senator.
- Stafford County is divided into only two Virginia Senate districts rather than three.
- Fredericksburg is kept whole.
- Other citizen comments can be read at the dots on the live map at https://www.virginiaredistricting.org/legdistricting/comments/plan/103/1

Another option would be a Commission map posted October 8, 2021 -

Commission Map \#255-B5 Statewide SD 10-8-2021
This more recent map keeps Stafford County and Fredericksburg whole and, a positive, doesn't include King George County. However, the part of northern Spotsylvania County that runs along Route 3 west should also be in the Fredericksburg "community of interest. " (See Map \#103 above.) Public comments for each dot may be seen at https://www.virginiaredistricting.org/legdistricting/comments/plan/255/1

Dear Honorable Members of The Virginia Supreme Court:
Pursuant to the Rules and Procedures for Imprementing the Requirements of Article II Section 6-A of The Virginia Constitution, I submit the following comments and suggestion.

While the designated members of the Commonwealth of Virginia Bi-partisan Redistricting Committee tasked with re-drawing the state's Congressional and state Legislative Boundaries has seemingly failed, and that task has now been re-assigned to you, I have to question how an even smaller body of ten of you along with two special Masters can actually do it better than whatever the Commitee tried to do much less what the over eight million people of Virginia could do for themselves if given the opportunity. So why can't we re-draw these same political lines or lean on the already 95 pre-existing county limit lines and 38 pre-existing independent city lines that surely should provide a better map of where these lines should permanently stay? For that matter, why can't the people of each county and city be tasked with this issue to decide for themselves what is in their best interest and be permitted, encouraged, or even instructed by this Court to hold individual referenda on this issue towards even becoming separate states altogether rather than continuing to be forced to remain in a large single "purple" state?

Rural voters and urban and suburban voters in Virginia do not always share the same values or political affiliations. Smaller county or city states would, and also better reflect the ole saying that "All politics are local."

Making each county and city into a separate state would also provide a more accountable and representative voice in both The House of Representatives and The United States Senate as well as add to the number of people who could finally be added to the number of Electors who select our President every four years for the first time since 1920 and the passage of The Permanent Reapportionment Act of 1929. Sdadly this single statute was never offered to the states as a proper constitutional amendment requiring ratification by them, yet has fundamentally limited and "consolidated the power of the people into the hands of too few"* by virtue of its imposing an artificial cap on the House of Representatives and The Electoral College, both of which were specifically created to base their representation on our growing population. Simarilarly I believe it has also directly led in large part to the huge growth of our administrative and regulatory states which now set their own rules and regulations with little or no Congressional oversight or law making in the matter.

Furthermore in contrast to the 30,000 person size our founding fathers envisioned a Congressional district size should be this statue has now directly lead to huge Congressional districts of over 610,000 people, like current state Iw as also created Senate districts of over 200,000 and state Legislative districts of over 70,000 often encompassing more than one single community of interest.

For this same reason most of the people in Greene County I know and talk to where I live would prefer not to be apart of any District or State with Albemarle County, The City of Charlottesville, much less Fairfax County, or City, or any of the 22 other independent "blue"cities, or larger "blue" counties in the Commonwealth. Yet remaining one single state threatens to continue "to hold hostage" the majority of our votes to those same near and distant larger polulation centers, especially during Presidential election years and in most statewide races with few exceptions since 1974 and this year also due in part to "the
state winner take all rule" in Presidential elections rather than allowing a "by district vote count."
My solution therefore would be to order every county Board of Supervisors and every city Council to hold separate referenda on statehood instead, as soon as possible to allow each locality to decide with whom they want to be associated. For when the people have a real choice their interest is better served, rather than having to depend only on the sole wisdom of appointed judges or two special masters to decide what is in their best interest.

Finally please advise when any future public hearings on this matter will be held or when any public deliberations will be open to the public.

Respectfully submitted,
Roger R. Schweikert
a resident and former Presidential Elector from
Greene County, Virginia

To Whom It May Concern:
As a Virginia voter, I was disappointed to learn that the GOP legislative members have nominated partisan operatives payrolled by Republican organizations whose goal is to gerrymander our districts. I, and my fellow Virginians, voted in favor of nonpartisan redistricting that would ensure fair representation for all voters in our Commonwealth. Virginia Senate and House Republicans, however, are disregarding the voters' will with their selection of nominees.

Thomas Bryan was paid $\$ 20,000$ by Virginia Senate Republicans on $9 / 3 / 2021$, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.

Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.

Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional maps.

I humbly ask that the Court disqualify these partisan GOP nominees. Please protect nonpartisan redistricting and uphold the right of all Virginians to participate in a fair electoral process.

Thank you,
Sonia Zawadski

## Testimony Before Redistricting Commission

## Sarah Dewees

Thank you for allowing me to speak to you. My name is Sarah Dewees and I live in Fredericksburg, Virginia. I vote in the $28^{\text {th }}$ House of Delegates in Virginia. I am also employed at the University of Mary Washington, where I work at the Center for Community Engagement. As part of my work at the Center for Community Engagement, I work with University of Mary Washington students to help them register to vote and to learn more about civic engagement. With permission, I am presenting this testimony on behalf myself and of some of the UMW students I work with. So I am presenting with University of Mary Washington, in Fredericksburg, Virginia, as my community of interest.

As part of our nonpartisan voter registration program, called UMW Votes, we have worked to educate University of Mary Washington students about how to register to vote and when to vote in Virginia, or when elections are being held. Some of the UMW students choose to register to vote in Fredericksburg, Virginia, at their campus address. They often do this because they are in Fredericksburg during fall elections, and find it easier to vote at their campus address. We try to educate UMW students regarding which candidates and issues are on the ballot. Unfortunately, the residence halls on the UMW campus are divided into two different State Delegate districts, District 28 and District 88. When I started in this job three years ago, I found out how complicated it can be to make sure that we give the right information regarding which candidates would be found on students' ballots, depending on where they lived.

The University of Mary Washington campus has a collection of residence halls, as can be seen in this map I am holding up. A new residence hall was built across Route 1 from the main UMW campus about 10 years ago. This new residence hall, and all the students who are registered to vote at that address, vote in a different House of Delegates district from all the other students who live in UMW residence halls on the rest of the UMW campus.

Now, UMW is a small college - around 4,000 students. We are not talking about a huge campus like VCU or JMU. So it was a big surprise to me to find that the UMW campus was split into two districts for the House of Delegates. So, not only is Fredericksburg a split district, but the UMW community is split too. I request that you not divide up our community of the University of Mary Washington and the residence halls on that campus.

Thank you for all your work on this commission, and for taking time to hear my comments today.

Dear Court Justices
I am writing today to request that you disqualify the Republican party's special master nominees to the Virginia redistricting process. Republican Delegate Todd Gilbert and Republican Senator Tommy Norment nominated partisan operatives, who are currently on the payroll of Republican organizations. It is clear that these individuals will make no effort to draw fair maps in determining future voting districts. The people of Virginia deserve fair voting maps that allow their votes to matter, and not be weakened through partisan gerrymandering. Accordingly, I hereby request that you disqualify the nominations of Thomas Bryan, Adam Kincaid, and Adam Foltz.

Sincerely,
Phyllis Berg

Good Day,
When I supported a non-partisan redisrrixting commission I wanted to see it free of partisan hacks. The Republican nominees have been critical in making heavily gerrymandered partisan maps for years.

Please reject their nominees.

To: [redistricting@vacourts.com](mailto:redistricting@vacourts.com)

Please use neutral people to redraw the district maps. Polarization is destroying this country.
Our courts are supposed to be free of politics-which is why they enacted conflict of interest provisions in the enabling legislation for the nonpartisan redistricting constitutional amendment. These candidates backgrounds do not meet the provisions. Below is why I do not want these candidates presented as nominees.

Thomas Bryan was paid $\$ 20,000$ by Virginia Senate Republicans on $9 / 3 / 2021$, a fact that the Senate Republican Caucus did not disclose to the Court in nominating him.

Adam Kincaid is the current Executive Director of the National Republican Redistricting Trust, and has previously worked for the Republican National Committee, the National Republican Congressional Committee, and the Republican Governors Association. A federal court found that he engaged in partisan gerrymandering in Ohio in 2010.

Adam Foltz is a long-time Republican operative who worked on the map-drawing in Wisconsin in 2010, where a federal court found that he engaged in partisan gerrymandering. He has also been retained this year in Texas as they draw their legislative and congressional maps.

As a permanent resident of Fairfax County VA, I am expressing my disgust at the republican operatives republicans have chosen to manipulate districts in Virginia. Republican operatives will manipulate the process to make it impossible for Democrats to have a fair chance at holding any power in Virginia politics. In my opinion Republicans are attempting to turn our democracy into a fascist, theocratic, authoritarian regime. They are making it so that our votes do not count and our voices are silenced. Republicans play dirty.
We will never be silent in the face of republican aggression and manipulation.
I hope my life will not be threatened as a result of this message.

Cordially,
D. B. Beck

I agree with Senator Saslaw that the masters the Republicans have proposed are not neutral. All map masters must be nonpartisan and experts in their field. This initial Redistricting, following the adoption of the amendment sets an important precedent.

Please order the Republicans to engage 3 neutral, nonpartisan map masters who are acknowledged experts in their field.

Sincerely,
Meghan Fitzgerald
Midlothian, VA

Sam Shirazi
6565 Washington Blvd.
Arlington, VA 22205
November 11, 2021
Muriel-Theresa Pitney
Clerk of the Supreme Court of Virginia
redistricting@vacourts.gov
Dear Madam Clerk,
Pursuant to the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, Rule 4(a), I write in my personal capacity of a citizen of Virginia living in Arlington to provide public comment. I previously participated at the Virginia Redistricting Commission by submitting maps and commenting on proposed maps.

While I have my own opinions about how best to draw the maps, I write instead to encourage the Court to embrace its role and not shy away from dealing with partisan realities. Based on my observations, the main reason the Commission could not agree on maps was an inability by some Commissioners to put aside partisan interests.

I understand that the Court may not want to wade into partisan waters and become accused of becoming too political. However, the reality is that the voters of Virginia entrusted the Court with an important role in the redistricting process given that the Commission did not agree to maps.

It is possible to draw maps that are fair to everyone based on commonsense principles of keeping communities of interest together, protecting minority voting rights, and maintaining competitive seats. While redistricting is by no means a simple process, it is also not an impossible endeavor with no way of creating objectively fair maps.

In terms of attempts by any party to gain partisan advantage in the process, I encourage the Court to use the most basic test of "I know it when I see it" as famously coined by U.S. Supreme Court Justice Potter Stewart. Based on my experience, it is possible to tell when maps are drawn with the goal of partisan advantage as opposed to fairness.

I once wrote in an article, "the judiciary is not simply a passive observer in the democratic process," but instead plays an important role in making sure "the guardrails of democracy stay up," and "it is the duty of judges to uphold the rule of law even if it would otherwise make them confront uncomfortable political issues. ${ }^{11}$ I encourage the Court to do what is necessary to make sure fair maps are produced, even when it requires making judgment calls that touch on partisan issues.

Ultimately, the Court is the last backstop in ensuring that all Virginians have fair maps for the next decade and keep faith in our democratic system of government. I wish the Court the best of luck in its work and know that it can rise to the moment.

Sincerely,
/s/ Sam Shirazi

## Re: Redistricting voice

Virginia Supreme Court,

It is essential that the Virginia State redistricting process is executed as independent with balanced input and ensure all negotiations have the best interest of the people of Virginia in mind as was the original legislations' intent. The primary purpose of creating this redistricting commission in the first place was to stop partisanship and gerrymandering that has occurred in the past and continues today. It was also to establish a system consistent with the inclusiveness of our constitution and to ensure fairness, equity, impartiality and justice.
At this very moment, you have the opportunity and good fortune as Virginia Supreme Court Justices, to show your citizens your good faith effort and establish our voting districts fairly and without bias.

We are asking that you honor the wishes of your fellow Virginians to act in a way that is in concurrence with the lawful responsibilities associated with your office and the constitution. We have entrusted you the privilege to make the maps of our state of Virginia impartial and unbiassed and stop all efforts to undermine this process. The Special Masters need to be free from bias and self-interest as Senator Saslaw had stated in his letter regarding this matter.

Our request is simple: that you reject the Republicans' choice of Special Masters and demand they resubmit impartial Special Masters that have all Virginians interests in mind and not simply those of their own party. Nothing short of the trust of all Virginians is on your shoulders.

Thank you for considering our comments.

Genie McCreery

Dear Honorable Members of the Supreme Court of Virginia (SCOVA):
The three individuals nominated to fill the Republican Special Master position for redistricting are patently unqualified because of massive conflicts of interest. Please reject them.

- Mr. Kincaid is a partisan hack through and through.
- Mr. Folz helped Wisconsin Republicans ruin any semblance of impartially drawn political districts during the Badger state's last redistricting and continues his infectious partisanship with the Texas redistricting effort.
- Mr. Bryan, according to the Richmond Times, "received \$20,000 in consulting fees from the Virginia Senate Republican Caucus." That is a conflict of interest the size of a barn door.

None of the above Republican nominees could remotely be deemed academicians. I'll also submit that appointing any of them will result in a reiteration of the Virginia Redistricting Commission's failure to produce political district maps.

Speaking of college professors, the spokesperson for the Virginia Republican Senate Caucus was openly contemptuous of the qualification criteria set forth by the Virginia Constitution, as amended, and the Supreme Court of Virginia's Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia which states that "the Court should consider any relevant redistricting experience in the Commonwealth and any practical or academic experience in the field of redistricting."

The folks at The Institute for Management Development (IMD) have described the four tiers of conflict of interest faced by board directors which, I believe pertains broadly to the Special Masters. Furthermore, I believe the Republican nominees will - not, could - violate tiers I, II, and III.

Failure to reject the Republican nominees could be interpreted as a tier IV conflict of interest on the part of SCOVA which could result in a lawsuit brought before one of Virginia's two federal district courts. This, I contend, would be an indelible stain on SCOVA's reputation.

Very respectfully,
Gregory H. Brandon
McLean, Virginia

To whom it may concern,

I am writing to share my opinion about the redistricting process that is underway in the Commonwealth of Virginia. It is my understanding that there is a possibility of combining Russell County with Washington County and the City of Bristol. Even though Russell County adjoins Washington County, Russell County does not share many natural relationships with Washington County and especially not with Bristol. Whether the consideration is for Community College opportunities, Health District guidance, economic relationships related to transportation, or regional educational partnerships, Russell County is a much more natural fit with Tazewell County, Buchanan County, etc. The current recommendation honors this ideal by aligning District 100 in a way that keeps LENOWISCO and Mountain Empire Community College counties together.

Some examples of the benefits of excluding Russell County from a District with Bristol and Washington County include:

- Throughout the pandemic the Mount Rogers Health District has provided guidance to their school divisions that has been different than the guidance from other Health District guidance based on community metrics and practices.
- Virginia Highlands Community College serves as an important partner with our school divisions and offers workforce development opportunities based on our communities' needs.
- The economy on the 1-81 corridor is very different than the economy that is accessed by Highway 19.
- School divisions on the 1-81 corridor have regional partnerships for Special Education, transportation, and mental health related services because of the natural collaborations that are afforded due to proximity, accessibility, and even similar weather patterns.

In summary, please consider the partnerships, relationships, and natural collaborations that students, schools, and industry currently enjoy as you finalize the redistricting process. This will ensure that the best interest of all communities are protected as legislative decisions are made.

Sincerely,

Keith Perrigan, Ed.D.

To: Clerk of the Supreme Court of Virginia
Re: Implementing the Requirements of Article II, Section 6-A
Virginians voted for a constitutional amendment that they believed would result in fair, nonpartisan redistricting.
Unfortunately, the Redistricting Commission was unable to agree on maps, so the issue is now before the Court. Republicans and Democrats each have nominated 3 masters, but the 3 Republican masters are Thomas Bryan, who worked as a consultant for the Virginia Senate Republican Caucus; Adam Kincaid, previous redistricting coordinator for the national Republican Congressional Committee; and Adam Foltz, who helped draw maps for the Wisconsin State Assembly Caucus that were later declared by courts to be unconstitutionally gerrymandered. The Democratic nominees for masters are all academics with no partisan affiliation who specialize and have vast experience in this work.

As a citizen I would have no confidence in the fairness of maps drawn by the Republican-nominated masters. It is certainly plausible that they will draw maps that would land Virginia back in court and keep our state election process unsettled for years. I urge the Court to work diligently toward fair, nonpartisan redistricting and to reject the Republican nominees. The reputation and legacy of this Court is on the line, too.

Good afternoon Commission Members:

I am submitting the below statement on behalf of our County Administrator, William L. Shepley:

During my time as County Administrator for Grayson County, I have come to understand and appreciate how close knit the localities in the Mount Rogers PDC are. We share so many interests and have worked collaboratively on many initiatives including economic development, broadband deployment an educational opportunities. Many of my counterparts in other planning districts of Southwest Virginia feel the same as I do and respectfully request that as you determine the final make up of house districts, you consider how well PDC localities work together to move the region forward and are natural friends and allies with like minded interests. For the Mount Rogers PDC in particular, breaking up these areas into more than 2 house districts could undermine decades worth of work and progress.
Respectfully,
William "Bill" Shepley
Grayson County Administrator

Thank you, Linda

4 November 2021
Clerk of the Court
Supreme Court of Virginia
P.O. Box 1315

100 North Ninth Street, 5th Floor
Richmond, VA 23219-1315
Dear Clerk Muriel-Theresa Pitney:
I am writing to you to express my opinion about the redistricting situation the Supreme Court of Virginia is now undertaking since the commission was unable to come to a consensus.

I serve as the Chief Election Official for the Newport News Kiln Creek Precinct (\#0218). Our precinct is what is known as a split precinct. For the State Senate and Congressional Districts, the residents of this precinct fall into 2 different State Senate districts and 2 different Congressional Districts.

During any of the elections for these seats and any statewide office (Governor, LT Governor, Attorney General, US Senator) our precinct has two different ballots to issue to the voters. The workers must look at the Congressional district indicated in the electronic pollbook and make sure they give the correct ballot to the voter. The workers can easily make a mistake during heavy voting times and during the long day.

Since we are a split precinct, we have to fill out two different sets of election results (one for each Congressional District/State Senate District). As you can imagine, it is easy to make a mistake on the forms after 13 hours of working at the polling place.

As you endeavor to draw the districting maps, I urge you to have one required constraint at the top of your list: Keep every precinct intact for the House of Delegate, State Senate and Congressional Districts. As you work on the districting, keep in mind the additional burdens you are placing on the poll workers and local registrars of any location with a split precinct.

I am available to discuss this with the court or any other persons involved with the map drawing.
Respectfully,

[^8]| From: | Norman Solowey |

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Your Honors,
I am writing to applaud your clarification of the requirements for the role of special master for redistricting, as cited in your opinion:
"Although the Special Master candidates are to be nominated by legislative leaders of a particular political party, the nominees - upon being
appointed by this Court as Special Masters - will serve as officers of the Court in a quasi-judicial capacity. Consequently, the Special Masters must be neutral and must not act as advocates or representatives of any political party."

This is clearly what the constitutional amendment intended to accomplish and I wanted to express my gratitude for clarifying and upholding that intent.

As has been stated many times, voters should have the right to choose their representatives, not the other way around.

With thanks, Norman Solowey

Honorable Justices,
Please do everything in your power to ensure that our redistricting is conducted in a nonpartisan manner. We voted for fair district lines when this process was established and now you are our last hope.

I worked in Congress for 22 years and was involved in three state redistrictings in California. I worked for a Democrat and the Democrats were in charge of the process. It was such a horribly distorted process, held in secret, without regard to the fair representation of the people. Elected representatives were punished for being in the "wrong" party or voting against the Democratic Party's interest. My boss was redistricted out of his district twice by his own party!

I was ashamed of my own party for this and am ashamed that both parties still engage in this practice.

Thank you for upholding an honest and fair redistricting process.
Regards,
Skip Stiles

Richmond, VA 23219-1315
VIA Email Only Redistricting@vacourts.gov
To the Chief Justice and Honorable Associate Justices of the Virginia Supreme Court

The Virginia Redistricting Commission got hijacked by the General Assembly. The members, well-meaning from the start, were redirected from what the public wanted and twisted to what those members of the commission who were also in the General Assembly wanted: safe districts.

As an active participant in One Virginia 2021, few of us wanted safe districts. We wanted competitive districts. We wanted districts where a "Sen Joe Manchin" type could be competitive in Southwest Virginia and a "Sen Mitt Romney" type had a chance in Northern Virginia.

Here's an idea: What if the Supreme Court would set up their own Special Committee? It would be composed of only the original citizen members of the Virginia Redistricting Commission (without the pols), plus five true independents chosen by the Supreme Court. This new transparent committee would work on the same original goals of the Virginia Redistricting Commission, including choosing Special Master, but under the supervision of the Supreme Court. This configuration could straighten out the mess the General Assembly created and fulfill the goals Virginia voters thought they were going to get.

I realize that no entity has the authorization to put this plan into place. But isn't it time to recognize the will of the electorate?

Respectfully,

Here is my suggestion. It may already be the goal, but if it isn't, please consider it. Thank you.

Redistricting every ten years should be designed to equalize both political parties as much as possible. The parties then "start from scratch" and the one that convinces voters they can govern the best should win consistently. At the end of ten years, redistricting returns everything to an equal status and the political parties have to start over with their efforts to prove their ability to govern. The advantage of this concept is that no one party has a lock on power for more than a decade unless they clearly win the right at the ballot box as opposed to controlling the redistricting process.

Dear members of the Supreme Court of Virginia,
Thank you for rejecting the nominees for Special Master in the redistricting process who showed partisan conflicts of interest. This gives me hope that the final district lines will be drawn without bias toward one or the other of the political parties.

Your Honors,

I was heartened to read you are serious and courageous about the integrity and transparency of the new Virginia redistricting process as reflected by the disqualification of the three Republican and one of the Democratic nominees. Had you allowed those inappropriate delegates, especially those with conflicts of interest all the hard work and amendment to the Virginia constitution would have been in vain.

Thank you for the good, honest work you are doing.

Sincerely,
M. Camille Alexander, M.D.

To whom it may concern,

I am appreciative for the opportunity to share my views about the Redistricting Commission's work to redraw district lines in the Commonwealth of Virginia. Washington County and the City of Bristol have long been served in the same district along with Smyth County and other localities along Interstate 81. Russell County does not always experience the same concerns that we have in our section of Southwest Virginia. When you consider the economy, infrastructure, transportation and geographic needs of our community, Russell County shares more in common with coalfield localities like Tazewell and Buchanan. Those counties have longstanding partnerships already developed through their Health District, Planning District, and Community College service area.

As you are drawing lines that will impact the way our rural communities are represented in Richmond, please consider the preexisting partnerships that are already established to ensure our community interests are better represented and protected.

Again, I appreciate the opportunity to weigh in on this important issue that will impact our region for years to come. The work you are doing is important and I am confident the input of stakeholders will be given careful consideration.

Sincerely,
R. Tyrone Foster

Given the events of Jan 6, 2021, when insurrectionists almost took control of our U.S. government, I am very concerned about a voting system that allows all citizens' voices to be heard in a balanced format. I urge you to appoint professional, non-partisan officials to help determine a fair redistricting of Virginia's congressional districts. Thank you for keeping a sense of integrity in Virginia's voting system.

Respectfully,
Mike Doyle
Alexandria, VA

## Redistricting Decision Matrix for Virginia's Congressional Districts

The primary data source used to develop the Decision Matrix was the most current data available from the US Census Bureau for zip codes/ZCTAs from the American Community Survey's 2019 5-year estimates.

Greetings justices of the Virginia Supreme Court:
It is with admiration that I note the court has chosen to weed out partisan candidates for the positions of Special Masters for the drawing of nonpartisan election maps. The voters of Virginia have strongly indicated that we want a nonpartisan redistricting process.

While disappointing that the appointed commission could not put the hopes and desires of the electorate above their party loyalty, I think we now have another opportunity for the creation of fair districts.

Thank you for taking petty politics out of the process by demanding nonpartisan Special Masters. Please stay vigilant to make sure we get the best, fairest voting district maps possible.

Yours sincerely, Christopher Pax

I live in Chesterfield County which encompasses part of the 7th Congressional District. The communities of interests need to be kept together because residents of Chesterfield County, Henrico County and the surrounding areas support each other. Many Chesterfield County residents work in Henrico County and vice versa. The same applies to shopping, medical care, etc. The 7th district, especially Chesterfield County and Henrico County need to remain part of the 7th district. The surrounding rural areas also do business in Chesterfield County and Henrico County and are a large part of our community. These areas are made up of Democrats, Republicans, and Independents who have the best interest of the community and the 7th district at heart. The 7th district isn't broken so please don't try to fix it.

TO: Justices of the Supreme Court of Virginia and Special Masters
RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A
SUBJECT: House Districts - Stafford County - Celebrate by Del Webb "Community of Interest"
Date: November 14, 2021

Our "Celebrate by Del Webb" community is in Stafford County to the west of I-95 and just south of Route 17. (Please see area within blue oval on the map.) We are in the $88^{\text {th }}$ House District (Purple) which was formed in 2001 to include parts of Stafford, Spotsylvania and Fauquier Counties and Fredericksburg City. In 2001, the area where Celebrate was built was undeveloped. Today, we have over 1,000 homes. Falls Run, another Del Webb community of almost 800 homes is just on the other site of Route 17. They are, however, in the $28^{\text {th }}$ House District (hot pink) in a section that was carved out of the $88^{\text {th }}$. Because of this "thumb," our two communities are divided among two Virginia House districts and three magisterial districts. Even though we are less than four miles from our "sister" Del Webb community, our representation depends on which side of Route 17 we live on.

## Current map of $88^{\text {th }}$ and $28^{\text {th }}$ House Districts

We share similar concerns about traffic congestion on Route 17 and I-95. Route 17 is the "main street" for both our communities but mainly serves trucks and through traffic accessing l-95 and there are way too many auto parts stores and fast-food restaurants. If we had the same representatives, our voices for improved development might be heard. It is important that you combine the $88^{\text {th }}$ and $28^{\text {th }}$ House Districts in this area and eliminate this carveout. It is hoped magisterial districts may then follow suit and be drawn more logically by Stafford County.

[^9]Please consider two possible solutions to bring our communities together -

Commission Map \#254 - B7 Statewide HOD, 10-7-2021

Commission Map \#198 - A7 Statewide HOD, 10-3-2021

Commission Map \#254 would no longer divide our "community of interest" because the "thumb" is eliminated and our communities on either side of Route 17 would be together.

Commission Map \#198 still divides our "community of interest" - two large "55+" developments - Falls Run by Del Webb and Celebrate by Del Webb - which are on either side of Route 17. Falls Run would be in District 33 and Celebrate in District 34. The "arm" of District 33 extends too far south toward Route 17. An easy fix would be to divide Districts 33 and 34 slightly more north. Stop at 652 (Truslow Rd.) or even out that area entirely with a line drawn along Potomac Creek.

Put a small population county in a single district.
No zig-jag lines

Each district representative of the overall population in terms of race and political leaning.
It's that simple.

Thank you for the opportunity to comment.

Hello-

I strongly urge the court to please read, or at least peruse, the previous comments that were submitted to the Redistricting Commission via their website to get a flavor of the concerns that people across the state were expressing. There was much more communication about how to comment on the maps and there were a lot of legitimate concerns expressed. It seems like a shame if those were completely lost at this stage.

In particular (but not exclusively) there were a *flood* of comments about splitting up Albemarle County (and to some extent its "sister county, Nelson) into 2 or more House districts to dilute it. Albemarle (Nelson) is clearly a single community. Nearly everyone works in the Charlottesville area/UVA, attends the same schools/places of worship, roots for the same teams, goes to the same shops, etc. We have been split up for years---unfairly, in what people here *know* is a gerrymander---and people here are expecting this process to fix this.

Please keep Albemarle or Albemarle/Nelson together in a single House District. Charlottesville City, being its own district makes sense given its population but the rest of Albemarle or Albemarle/Nelson is one community, as so many commenters pointed out.

Again, please see the comments on the earlier maps for this and so much more. You will really get a flavor for the most pressing concerns.

Thank you for your work.
-Kat Maybury

I am a resident of Holmes Run Acres, a historic neighborhood of 355 homes due south of Tysons Corner, in Fairfax County's Woodburn precinct (\#717).

We are part of the Merrifield/Falls Church area, at the intersection of three north-south arterials. Two of these roads are interstate highway facilities - the Capital Beltway and the I495 Express Lanes.

Woodburn is the southernmost precinct in Fairfax's Merrifield Suburban Center planning area.

Woodburn precinct has only $\mathbf{2 , 0 5 4}$ active voters but is an employment hub for medical and defense research - much of it federally funded. Our precinct includes the Inova Schar Cancer Institute, Inova Center for Personalized Health, the headquarters of General Dynamics Information Technology (GDIT), in addition to 21 lane-miles of interstate highway.

- Holmes Run Acres and Woodburn would benefit from remaining in the Eleventh Congressional District with:
- Mantua/Price precincts, where many neighborhood children, including mine, attend FCPS's Mantua Elementary
- The entire Dunn Loring-Merrifield area, home to our nearest transit and retail, as well as Luther Jackson Middle School, which our neighborhood children attend
- Pine Ridge precinct - a former section Woodburn precinct with which we share Gallows Road and the Inova campus
- We understand that General Assembly Districts are smaller. We wish to be in the same district as central Merrifield precincts on both sides of I-495, where our experience with VDOT road projects is most similar:
- We have a lesser interest in the east-west routes radiating from Arlington, Alexandria, and D.C. - distinguishing Holmes Run Acres and Woodburn from Annandale, Burke, Fairfax/Falls Church cities, Lake Barcroft, Mantua, Ravensworth/Braddock, Springfield, and Vienna.

Thank you,
David Hechtman

Clerk of the Supreme Court of Virginia
100 North Ninth Street, 5th Floor
Richmond, VA 23219-1315
RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A

Dear Ms. Pitney:
While many comments regarding the construct of redistricting maps are being considered, my appeal is rooted in my heritage. I am the great-great-granddaughter of Sergeant Alfred Pride, a Buffalo Soldier born in 1854 in Amelia Court, Virginia. A journey that began as a teenager in Amelia Court ended at Fort Myer (VA). His last assignment was in recognition of the contributions of the 9th Calvary, including a herculean effort to provide assistance to General Custer at Little Bighorn (reportedly riding horseback for almost 48 hours only to arrive too late to save the man who refused to command black troops), protecting the construction of the Pacific Railroad, and preserving Yosemite and Sequoia National Parks. All of the challenges and obstacles Sergeant Pride overcame were overcome because of his fierce belief that the American way of truth and justice would eventually apply to all Americans.

The Supreme Court has already demonstrated the depth of its commitment to truth and justice in the redistricting process. All Virginians are entitled to a redistricting process that places equity over the amassing of political power. Research of the caliber of that produced by Tufts University would be a blessing to the realization of that goal.

Like Sergeant Pride, many Virginians of all stripes and colors have sacrificed much to assure America is truly the home of the free. The way to acknowledge those sacrifices is to assure the vote of each and every Virginian matters ... regardless of their color.

Sincerely
/s/

Jacqueline Coachman

To whom it may concern:
Albemarle County is a community of interest and shares a cultural identity unique to Virginia, with Monticello, Highlands and the University of Virginia in its borders. Our residents, which includes the town of Scottsville, share similar concerns with agribusiness, housing development and tourism that makes having one unified voice in Richmond all the more important and productive.

I would encourage the special masters and justices to keep Albemarle as compact as possible for state House districts. The county is currently mapped into four different districts, and only one delegate lives in Albemarle.

One draft map split Albemarle into two districts: one that'd include Charlottesville and another that'd include Greene County. Such a map would accurately reflect the common interests of county residents, policymakers and stakeholders.

 ANY LINKS OR DOWNLOADING ANY ATTACHMENTSThis letter is in regards to the Supreme Court's request for input on how Article II, Section 6-A of the Virginia Constitution will be enacted for the 2022 election, how the VA-7 district as it is currently drawn, and the fact that only the B5 map is favorable to my current congresswoman, Abigail Spanberger.

Abigail is a good fit for this district, and the district currently leans against her by $5 \%$ as per the 538 analysis:
https://projects.fivethirtyeight.com/redistricting-2022-maps/virginia/commission_plan_b5/
Regardless of this lean, Abigail has been elected and re-elected, and she has been a successful congress member. Her bravery saved lives on January 6 when she defied an order from Capitol Policy to the press who were in the House chamber to have the press leave the safety of the chamber. Abigail showed valor. Her influence over legislation on rural broadband shows that she can serve a diverse district. Her passion and voice matters a lot in these times.

Meanwhile, the most likely challenger to this district, VA Delegate John McGuire, attended the January 6 insurrection, then lied about his attendance. He stated that he did not realize it had become violent until he returned home that evening. There are pictures clearly showing him within 50 yards of the police barricade at the point where the crowd at the barricade is hostile and 20-50 people deep. He did nothing other than join the crowd and move with the mob. I do not want that man in Washington making decisions for any of us.

Any district that rewards John McGuire with a safe seat is an abomination. Only one map works against that, and that map pulls in college educated populations from the University of RIchmond, through to the various community colleges and to University of Virginia. It may be a diverse district, but it also has a stake in this outcome. Given the trial that is ongoing in Charlottesville, it would send a deeply disturbing message to Virginians, state-wide, to set aside the B-5, VA-7 district for any other option.

I understand that achieving a balance across numerous factors is needed, and I don't expect the final VA-7 district to have $\mathrm{a}+5$ lean for Abigail. But I do expect fairness and that is why I voted for the bipartisan redistricting amendment, and why I volunteered to serve on the committee. Now that work falls to the Supreme Court of Virginia, and I appreciate the gravity of that work. I hope my words are read in the spirit with which the words are intended. These are troubling times, we need basic fairness, honesty, and goodwill. That is what Abigail Spanberger embodies, as well as valor and fierce friendship, please draw a fair district so that she can win re-election in a fair way.

Regards,

William Panak

Republicans as well as democrats need to be on the redistricting decisions.
I would like to get back into my district I live in because I feel like it is "Taxation without Representation" because if I complain in my voting district they tell me I have to go to the district I live in. If I go to the district I live in, they tell me to go to my voting district. It gets complicated and I do not like it.

Clerk of the Supreme Court of Virginia
Dear Sir/Madam:
First, thank you for the opportunity to comment on implementing the requirements of Article II, Section 6-A. My comments are mine alone and result from my concern that the Court needs to hear the views of those citizens who are most likely to be adversely affected by its decision, should it result in a dilution of our vote, not in the Commonwealth alone, but in selecting our representative in the 7th U.S. Congressional District in Virginia.

Second, it was readily apparent among reports of the day to day meetings of the Bipartisan Redistricting Committee, that efforts were made to gerrymander the 7th District in Virginia so that our sitting representative in Congress would lose the seat that she won in two elections. This is unacceptable and the Court needs to ensure that there is no interference with our ability to choose our representative in Congress.

Third, there is no reason for changing the balance of rural counties and suburban counties in the 7th District of Virginia. Voters in Orange, Culpeper and Madison Counties have been well-served by our elected representative, just as those suburban counties south of us. Please ensure that the Court hears and recognizes the need to maintain a rural and suburban balance in the 7th District.

Finally, the matter of redistricting has been passed to the Court by default. It is clear that members of the Bipartisan Redistricting Committee intended to redefine the 7th District, simply to remove a highly effective representative from political office. The Court must not let this happen.

Yours truly,
sgd/jpoole

As a resident of the 7th congressional district, I am hopeful that when redrawing Congressional districts, the court will address the important aspect of keeping Chesterfield, and Henrico counties together, along with the 64 west corridor, up to and including Charlottesville and greater Abermarle county. This contiguous 288/64 highway interchange corridor would preserve communities of interest as well as meet the requirements of contiguous borders. These three counties and their surrounding areas share common roadways via the 288 and 64 interchange, which provide everyday transportation infrastructure of highways, bridges, buses, and train services for employment, medical services and hospitals, public health and safety, educational access,shopping, emergency services,economic development, local environmental concerns, and parks and recreation .
The 288/ 64 corridor is a deeply intertwined, interconnected community . One needs only to see 288 north and south bound full of commuters each business day crossing the James River because, from both directions, they work in one and live in the other.
The same holds true for the 64 corridor between Henrico County and Charlottesville/ Abermarle County , including the rural swath between, whose residents also work, play and recreate between the connected urban/suburban areas that surround them.
Please keep Route 288 north and south and the Interstate 64 West corridor from Henrico County to Charlottesville/ Albermarle, top of mind in drawing a Congressional district of contiguous community interest.
Thank you,
Martin Davis

 ANY LINKS OR DOWNLOADING ANY ATTACHMENTSMuriel-Theresa Pitney
Clerk of the Virginia Supreme Court
100 North Ninth Street, 5th Floor
Richmond, VA 23219

To Whom It May Concern,

My name is Teresa A. Hickey. I am a resident of Albemarle County, Virginia. Pursuant to Rule 4 under the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, I am submitting my comments to you regarding redistricting.

House of Delegates Map: Please keep Albemarle County as unified as possible to maintain our community of interest and allow us to live in fair, compact House of Delegates Districts. Specifically, please include us in only 2 House Districts. One District should be Charlottesville and some portion of Albemarle. The second District should be the rest of Albemarle and our neighbor to the south, Nelson County, with whom we share a community of interest. This would be a fair treatment of our county. The citizens of Albemarle and Nelson share in the Blue Ridge Health District. We also share in the Jefferson Madison Regional Library. Unfortunately, for the past decade the people of Albemarle County have been fractured across 4 House Districts. This divides neighborhoods, separates families and friends, sows confusion among residents, breeds apathy, dilutes our ability to participate in the political process, and muzzles the voices of the people in state-level government. You can keep Albemarle County in 2 Districts in the way I have described above by doing something the Redistricting Commission was not able to do: compromise. Specifically, a compromise between proposed maps A7 and B6 offers a path forward for a fair treatment of Albemarle County. One negative aspect of Map A7 is that it slices Albemarle into 3 Districts. This would lead to the same negative results that we experience under the current map. That is simply not acceptable. In contrast, Map B6 keeps Albemarle in 2 compact Districts, thereby maintaining our community of interest. This is much better for the people here. However, Map B6 draws Albemarle County in with a piece of Augusta County. GOP Commissioners specifically objected to this proposal because there are mountains between Augusta and Albemarle. To address that concern directly, we can look to Map A7, which combines Nelson County with Albemarle County. This solution has the benefit that Nelson County has roughly
the same population as the portion of Augusta County included with Albemarle under Map B6. Thus, it should be a relatively easy fix in terms of map drawing. In sum, dividing Albemarle County into any more than 2 Districts would be a betrayal of the people here. Please draw a fair map for our area by keeping us into the 2 Districts I have described.
Congressional Map: With regard to the Congressional Map, our area is currently in the heavily gerrymandered, non-compact 5th District. The Congressional maps proposed by the GOP members of the Redistricting Commission were unfortunately egregious partisan gerrymanders. Please proceed in good faith in ensuring that we have an opportunity to choose our Representative in a compact, fairly-drawn District that maintains communities of interest and rejects bad faith partisan efforts to gerrymander us for another decade.

Thank you.

Muriel-Theresa Pitney
Clerk of the Virginia Supreme Court
100 North Ninth Street, 5th Floor
Richmond, VA 23219

To Whom It May Concern,

My name is Lauren Boggs Meslar. I am a ninth generation resident of Albemarle County, Virginia and I was grassroots leader of the Fifth Congressional District for Virginia for Pete (Buttigieg) in 2019-2020. Pursuant to Rule 4 under the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, I am submitting my comments to you regarding redistricting.

House of Delegates Map: Please keep Albemarle County as unified as possible to maintain our community of interest and allow us to live in fair, compact House of Delegates Districts. Specifically, please include us in only 2 House Districts. One District should be Charlottesville and some portion of Albemarle. The second District should be the rest of Albemarle and our neighbor to the south, Nelson County, with whom we share a community of interest. This would be a fair treatment of our county.

Unfortunately, for the past decade the people of Albemarle County have been fractured across 4 House Districts. This divides neighborhoods, separates families and friends, sows confusion among residents, breeds apathy, dilutes our ability to participate in the political process, and muzzles the voices of the people in state-level government. I have neighbors two miles away that are in a different district than myself, but can drive an hour and a half south to Rustville, Virginia and still be in the 59th District. You can keep Albemarle County in 2 Districts in the way I have described above by doing something the Redistricting Commission was not able to do: compromise. Specifically, a compromise between proposed maps A7 and B6 offers a path forward for a fair treatment of Albemarle County. One negative aspect of Map A7 is that it slices Albemarle into 3 Districts. This would lead to the same negative results that we experience under the current map. That is simply not acceptable. In contrast, Map B6 keeps Albemarle in 2 compact Districts, thereby maintaining our community of interest. This is much better for the people here. However, Map B6 draws Albemarle County in with a piece of Augusta County. GOP Commissioners specifically objected to this proposal because there are
mountains between Augusta and Albemarle. To address that concern directly, we can look to Map A7, which combines Nelson County with Albemarle County. This solution has the benefit that Nelson County has roughly the same population as the portion of Augusta County included with Albemarle under Map B6. Thus, it should be a relatively easy fix in terms of map drawing. Nelson also shares community programs with Albemarle (Jefferson-Madison Regional Library system and Blue Ridge Health District, for example) which make this combination a natural one. In sum, dividing Albemarle County into any more than 2 Districts would be a betrayal of the people here. Please draw a fair map for our area by keeping us into the 2 Districts I have described.

Congressional Map: With regard to the Congressional Map, our area is currently in the heavily gerrymandered, non-compact 5th District. When I was in charge of CD5 for Virginia for Pete, my responsibilities covered from Northern Virginia to the North Carolina line; an area larger than 6 states. There was no commonality to the constituents, no shared city or feature. As a lifelong Virginia resident, there were areas I traveled to and reached out to that I'd never even heard of. The Congressional maps proposed by the GOP members of the Redistricting Commission this year were unfortunately egregious partisan gerrymanders which perpetuate the issues of our current district. Please proceed in good faith in ensuring that we have an opportunity to choose our Representative in a compact, fairly-drawn District that maintains communities of interest and rejects bad faith partisan efforts to gerrymander us for another decade.

Thank you.

Lauren Boggs Meslar

I voted for the amendment that was designed to reduce gerrymandering. I had hoped that the commission would have been able to create fair districts that would lead to the legislature reflecting the desires of all Virginians. That did not happen. This task now resides with the Supreme Court of Virginia. I hope my faith is well-placed.

Congressional districts should represent common interests, needs, and issues faced by the represented community and have relatively equal populations. Creating districts by dividing urban and suburban areas into multiple districts and combining them with large swaths of rural areas does not meet this goal. The better strategy is to combine rural areas to meet the population goal and maintain shared concerns. Rural areas definitely need adequate representation; however, their needs should not completely subsume those of the greater number of citizens in urban and suburban areas. This unfortunately happens with many of our current districts. I support keeping Chesterfield and Henrico counties together and creating a corridor that includes Charlottesville as illustrated in map B-5. This map is the best representation of the goals of redistricting.

Regards,
Shelton Panak

## 1. Foundational Preliminaries

The United States was founded and made "more perfect" as an experiment, a democraticrepublic embracing the populations living within an area thousands miles square. It is a nation-state of choice, based on a common belief for inalienable rights for each individual of us all in the Declaration of Independence, and subscribed to in a political compact for political freedom with mutually beneficial equitable justice, peaceable public pursuits, common defense, and general welfare "for ourselves and our posterity", in the Preamble to the US Constitution.

It was at the time, and it remains, the largest in Western history's "modern era". The Articles of Confederation that served as a 'working document' of written constitution from 1776 was unanimously ratified by the original 13 states within six years. The US 1789 Constitution that replaced it was unanimously ratified within three, signed in Philadelphia and voted for in state legislatures by many of the same principle actors who had been a part of ratifying the Articles. The US Constitution was ratified in half the time, even without the pressure of on-going war to
 "get something done", perhaps because Founders believed it to be two times better than the first one.

- The 1776 first stab at "a perpetual Union" was, in their 1789 Preamble, made a "more perfect Union" on the second go-round. Unlike the predecessor regime under the Articles of Confederation, the US Constitution provided for improvement, amendment in its future governance of citizen and resident.

Today, the "Supreme Law of the Land" in the United States and in each of its 50 states and 6 territories ${ }^{1}$ is specified in Article VI, 2 ${ }^{\text {nd }}$ paragraph: (1) the 1789 US Constitution as amended to the present; (2) the Congressional statutes enacted by the US Congress and signed into law by the US president; and (3) Treaties ratified by two-thirds 'super-majority' in the US Senate. ${ }^{2}$ The judges in every state are bound by the US constitution, "any thing in the Constitution or laws of any state to the contrary notwithstanding". All state and federal elected officials and judges swear to support the US Constitution required in Article VI, $3^{\text {rd }}$ paragraph.
2. Redistricting to mirror living residents in the nation, in the states

[^11]Why is a democratic-republican legislature to mirror the people resident who are to be represented? - British: No rotten boroughs. 12 game wardens in the King's forest do not elect one Member of Parliament while a manufacturing or port city of 30,000 has one. Historical legacy does NOT represent the selfgoverning people who are to choose their own rulers in their legislator elections.

- American: One-man-one-vote. In Virginia since the 1960s, a county with 100,000 population does NOT get 2-Delegates, and one with 10,000 also get 2-Delegates; counties with equal representation does NOT mirror the living people resident in their settlement habitats, once family farms, now city neighborhoods.

Article I of the Constitution establishes the House of Representatives. The first article is for "The First Branch" of government closest to "the people" as the foundation of a democratic-
 republic, the largest number of people resident and voting in elections. In Section 2, the $1^{\text {st }}$ paragraph, the voters in each state for the US House of Representatives "shall have the qualifications requisite" for voters electing the "most numerous branch of the state legislature". That was and is, the Virginia Assembly House of Delegates. ${ }^{3}$

Section 2, the $3^{\text {rd }}$ paragraph provides for US representatives to be apportioned among the US states according to their respective numbers. The actual enumeration made every ten years. The Census Bureau of the presidential cabinet level US Department of Commerce makes a count of population in the year ending in zero (0).

The Virginia Constitution Article II, Section 6, "Apportionment", provides for reapportionment of its resident population into US Congressional districts in the year following the US

Population Census ending in one (1).
"Every electoral district shall be composed of contiguous and compact territory [with] representation in proportion to the [nearly equal] population of the district[s] as provided by law. ${ }^{4}$ Previous voting discrimination from gerrymandering by race is prohibited, "Districts shall provide, where practicable, opportunities for racial and ethnic communities to elect candidates of their choice." ${ }^{5}$

[^12]

## 3. Sequencing the Redistricting Process

First things first. Stephen R. Covey's best-seller The Seven Habits of Highly Effective People tells a variation on "the professor and the jar story". Given proportioned piles of 2 "-diameter rocks, $1 / 2$ " gravel, and a pile of sand, if someone puts all the little things in first, all the elements do not fit below the lip of the jar. But if the demonstration begins with the rocks, the pebbles can be shaken down through the loose rocks, and the sand can be poured into the jar last to fill in the air pockets between rocks and gravel. All three elements then fit below the lip of the jar, to audience surprise and applause.

The political borders of the Commonwealth of Virginia are like a jar that holds its population in three aspects, each one meant to ensure their citizenship with personal liberty and political freedom. Virginia is the given area of habitat settlement for the people who are to be represented in each case. One sequence for reapportioning people into every kind of legislator district can follow a three-step process, each step related to the next step as explained below. (1) Redistrict Virginian's legislator districts for the 11 state Congressional delegation, (2) redistrict the 100 districts for its House of Delegates, and (c) redraw the 40 for Virginia state Senate around the new compact Delegate districts.
(1) The biggest arena for representation for residents in their aspect of citizenship in the nation is for the US House of Representatives as required by the Supreme Law of the Land; state officers all swear to support the US Constitution first, and then the Virginia Constitution.

For 2021, the first task using the decennial US census report for Virginia, is to redraw the eleven Congressional districts away from the previous gerrymandering that was overturned in state and federal courts for "black packing" voters into one Congressional District. ${ }^{6}$ Most Virginians, 70\% of our residential settlement is census "urban". That "proportionality" found in neighborhood habitat statewide should be reflected in nearly the same proportion in each legislature chamber. In Congressional delegations, 8 of the 11 can be fairly expected to contain urban resident majorities at a summary review of any proposed redistricting plan.
(2) The second arena for representation is historically connected by self-same voting requirements for the House of Representatives in the Virginia House of Delegates, for representatives who are likewise elected every two years. This aspect of resident citizenship in the state is closest to the people voting the year following each Congressional election. The second task in redistricting Virginia is to reflect the Constitutional qualification for Congressional voters, but go further to make voters in each Delegate_district the same voters for

[^13]each member of Congress. That can be done in 2021 by nesting 8-9 compact Delegate districts within each of the 11 Congressional districts, minimizing the number of Delegates straddling two Congressionals. The habitat proportionality for Delegate districts can be fairly expected to be nearly 70 of 100 districts with urban-suburban resident majorities.
(3) The third arena for reapportionment every decade, is that of the Virginia state Senate, whose officers are elected every four years. They are more remote from the Founders' "sensibilities of the people" than either Virginia Delegates or US Representatives.

The third task is to combine two-and-a-half of the 100 compact Delegate districts into each of 40 state Senate districts, dividing every third Delegate district along locality lines of PreK-5 school attendance zones with compatible cultural communities. The habitat proportionality for state Senate districts can be fairly expected to be nearly 28 of 40 districts with urban resident majorities.

## 4. Partisan Gerrymandering

In a democratic-republic, the legitimate purpose for representing the "sovereign people" in the legislature is to mirror them in districts of their diverse voluntary settlement. That is the 'why' for single-member districts. In Virginia 90\% live above the poverty line. Home-renters relocate every 4-6 years on average, and homeowners relocate every 6-8 years, often for work or to school their children. ${ }^{7}$
Cracking for partisan gerrymandering is redistricting by an artificial division of communities, the same genuine settlement that a legislature legitimately wants to mirror. Virginians (70\%) live in urban areas for work, relationships, and lifestyle.

Packing for partisan gerrymandering is drawing many likevoters in different habitats into one district, regardless of their neighborhoods. It makes surrounding districts into other-party-majorities to "water-down" their fair statewide influence.

Tacking for partisan gerrymandering is adding adjacent populations of like-minded voters along some vector regardless of connecting thoroughfares or like settlement habitat, in order to achieve an partisan majority in the artificial district. ${ }^{8}$
5. Authoritative "communities of interest"

[^14]The US Census authoritatively defines communities of interest in MSAs. In the 'Age of the Automobile' these are tied by socio-economic commuting Virginians reported in 2020. Census reports reflect changes in work, shopping, schools, and voluntary associations. They are adjacent localities around one or more urban cores, with
 Micropolitan Standard Areas over 10,000 urban cores (Danville, Martinsville), and Metropolitan Standard Areas over 50,000 urban core population, such as NoVaWinchester, Hampton Roads on both sides of the James River and Richmond, Roanoke, Lynchburg and Charlottesville.

In Virginia, the urban population cores in MSAs can be graphically mapped by (1) a Mercator map of locality densities, (2) a map of census tract densities, or (3) an "anamorphic map" of
 locality density published by Maps4office. The Northern Virginia region in red and orange has population to support four Congressional districts (CDs).

- The next cluster of densely populated red and orange areas are in Central-west Virginia, the 3adjacent MSAs for Charlottesville-HarrisonburgAugusta. In Southwest Virginia, the historically drawn "Fighting Ninth" CD has a cluster of red in the Roanoke-Blacksburg-Bristol MSAs at Roanoke and Montgomery Counties in the Valley of Virginia, west of I-81.

Adjacent and to the east are the "Southside" Virginia areas densely populated in the Lynchburg-Danville-Martinsville MSAs. In central-east Virginia, the Richmond-north-SMA
 above the James River with Henrico and Hanover Counties supports a CD. In South-central-east Virginia a compact majority-minority district lies from suburban Chesterfield County and Petersburg, south of the James River eastward to Suffolk and Portsmouth Cities. South-Hampton Roads MSA with Virginia Beach-Norfolk-Chesapeake cities support a CD. Lastly, a CD can be centered on north-Hampton Roads MSA localities of the "Chesapeake Bay": Newport News, Hampton, the Eastern Shore and Bay-shore counties of the Middle Peninsula and the Northern Neck.

A "Chesapeake Bay" district reflects Virginia's 400-year historical community of interest among the residents along the shores of the Bay region. The DMV "Friends of the Chesapeake Bay" specialty license plates have sold 500,000 with recently 20,000 a year. They are everywhere along the Eastern Shore, Cape Charles (Bay-shore Virginia Beach and Norfolk), and throughout the localities with Bay shore on the Lower Peninsula, Middle Peninsula, and the Northern Neck.
6. Redistricting rules by law, by Commission resolution and hearings discussion

There have been five Commission imperatives in apportionment by population into US Congressional Districts.

The districts..
(1) have equal population: totals to range by $5 \%$ by courts = target goal average $+/-2.5 \%$. (2) are compact: test LENGTH-WIDTH v. 'sausage', POLSBY-POPPER v. 'juts', REOCK v. 'tendrilfingers'.
(3) are contiguous: adjacent like-habitats, within the same MSA, then 'spoke' localities remote from dense 'hub'.
(4) account for communities of interest: socio-economic settlement tied by commutes in MSAs: cities, towns, census-designated-places under 50 square miles; historical residential areas; PreK-5 school attendance zones for early childhood education.
(5) in summary view statewide account for Voting Rights Act requirements: racial minorities communities in coalition can elect their preference.

The Commission applied four additional redistricting conditions to be applied by statewide summary review of the total plan.

The districts...
(6) DO NOT take voting results into consideration for populations within each district.

BUT summary view must justify any non-competitive districts by compactness and adjacent like-habitat among urban, suburban, exurban, and rural settlements. Example: Southwest Virginia is compact, adjacent, without an alternative configuration; it has been solid Republican Congressional.
(7) DO NOT take racial goals into consideration for populations within each district.

BUT on summary view the plan must not reduce number of minority opportunity districts with greater than $40 \%$ total population.
(8) DO NOT take incumbency into consideration.

BUT recall that in Congressional districts, incumbents need not reside in the district elected. See Governor P. HENRY's attempt to deny J. MADISON a seat in the First Congress.
(9) DO start from scratch, without reference to previously drawn districts. DO meet the 8 previous criteria.

Two additional considerations can be kept in mind by mappers, as discussed during sessions by commissioners, both "citizens" and "electeds". Relevant comments were added from partisan legal council, mappers, and professional Virginia state senate legislative staff.
(10) Respect city, county, and town boundaries, so that most Virginians reside in localities are undivided, nesting within each kind of district that the residents are drawn into.

BUT some localities can be divided to balance district populations: those counties less than 20,000 population at the "spoke" end of a district, remote from its district urbansuburban "hub", those counties greater than a 50 square-miles area. Any division made must conform to respected locality school attendance zones the division along.
(11) Proportionality is not to be considered as a political goal, because redistricting apportionment is to be made of Virginian residents, not political parties for the coming decade.

BUT proportionality of residential habitat (urban-suburban-exurban-rural) is important to mirror the changes in Virginian resident population settlement in the 10 years since the last decennial US census. Virginian settlement is $70 \%$ in urban habitat, so to mirror the people in their places (and NOT to mirror the places of people for representation), most legislature districts should be drawn with mostly urban residents, $70 \%$ with urban resident majorities, so statewide, proportionately by the settlement of the people.

The map below is drawn on a US Census map of locality densities. It is an approximation of the Virginia Redistricting Commission citizen-drawn Map \#164 for 11-compact Congressional districts. It meets all publically available criteria to draw fair districts in 2021. Two districts require explanation for their length-to-width shapes, Plan-09 and Plan-07.

Plan -09 is constrained geographically by southwest state boundaries. Along the floor of the Valley of Virginia, turning northward, there are related highdensity adjacent localities making up adjacent Roanoke and Blacksburg MSAs along I-81 North.

Easterly Floyd County is adjacent to a like settlement habitat connected via the flat Highway-8 to "Southside" Patrick County and Plan-05.

Were Plan-09 to push out into Virginia's "Southside", the less urban region would have taken the district east in a way to lose its compactness, and place Roanoke into a northerly district. That would violate the commuting landscape, as most of Roanoke's out-commuters originate in settlements south of it, and it would lead to either separating adjacent Roanoke-Blacksburg MSAs, or a locality division of Roanoke City or County as proposed in other 2021 Maps.

The map to the left is reproduced from " 10 ways to map Northern Virginia" found on UVA's StatChat online, published by the Weldon Cooper Center for Public Service.

Plan-07 lies in primarily suburban and exurban habitat tied to Northern Virginia by Virginia's 2020 commuters into the DC Metro area as the map title shows. Its core densely populated areas are Fredericksburg connected north on US-17-US-15 to Warrenton, connected north on US-15 to Leesburg, connected west to Winchester on VA-7.

Commuter rail is available within fifteen minutes of Winchester, north along I-81, and commuter rail operates every 15-minutes at peak hours from downtown Fredericksburg into downtown Alexandria. Alexandria, Arlington, and Washington DC are connected by the Metrorail Blue Line. Three additional lines serve Fairfax County, north by the Silver Line, central by the Orange Line, and south by the Yellow and Blue Lines.

## 7. Guidelines for drawing a Congressional District map with notes for Delegate Districts and Virginia Senate Districts

District mapping starting points designated below are a combination of three elements:
(a) US Census Bureau urban and rural population counts administered by Republican political appointees, so they meet expressed reservations about federal government agencies and their reports. The majority of Virginian residents live in urban areas; people in urban settlements should be proportionately reflected in legislatures meant to represent Virginians. The turn-of-the-21 ${ }^{\text {st }}$ century "Center City" is described in, The Changing Shape of American Cities, by Luke Juday from the Weldon Cooper Center for Public Service at UVA.
(b) Commercial maps are used for "center city" designations by banks to invest, realtors to appraise, and commercial developers to finance real estate. Firms such as Neighborhood Scout online replicate (but do not copy) previous scholarly publications of "population-density heat-map" graphics. Each has been classified US Census "urban", or as "urban-suburban" by scholarly publications. These considerations answer questions about the trustworthiness of university professors in Virginia and their scholarship.
(c) PreK-5 school attendance zones mapped by our respected localities with the authority from the General Assembly to apportion our children in families from compatible cultures into schools that best promote their early childhood education. These considerations answer those who dismissed any authority beyond majorities voting in localities.

The general locations of each dense settlement of Virginians can be identified by independent inspection on (a) the locality resident Census-block map, (b) the locality-precinct map, drawn not for people, but for machines with parking lot access, (c) on commercially available redistricting map software.

In summary view, a majority of Virginians should live within their locality within the same district or in an adjacent same-habitat district. The goal is the most people in undivided localities, NOT the most undivided localities apportioning districts with urban minorities racial makeup in each urban population should not be a determining factor, but like habitat in the same MSA, or like habitat nearby adjacent should be.

- Begin with Virginia's MSAs, Metropolitan/Micropolitan Statistical Areas. The US Census has authoritatively (non-partisanly) designated adjacent areas that redistricting intends to represent in each legislature. These have one or more core areas of 'urban population, plus adjacent territory' with substantial 'social and economic integration' as measured by the 'commuting tie'. Micropolitan areas exceed 10,000, Metropolitan exceed 50.000 people.
- Designate "center-of-density nodes" within each MSA comparable to "city core" or "center city" places. Three census blocks or precincts within a densely populated area -based on US Census population data -- can provide a starting point from which to begin drawing districts of concentrically.
- Draw districts compactly radiating from a "center-of-density node", acquire precincts of like density first. Adopt four categories that parallel "urban", "suburban", "exurban", and "rural" habitats of Virginian resident settlement to easily distinguish "like density". The individual's chosen habitat and lifestyle is a priority "community of interest" for each district drawn.
- Rotating through the nodes of population to be distributed into districts, add three to five census blocks or precinct "parcels" onto a growing draft-district along main thoroughfares, US highways, State Routes. Fill in gaps to maintain a compact regular shape, an equilateral or oval-like figure. Measures of compactness include PolsbyPopper and Reock. The Length-Width measure can avoid "sausage" districts.
- Refer to locality maps of PreK-5 schools attendance zones to keep them intact. These are areas of compatible cultural settlement that local authorities find conducive for early childhood education. Families with children are a priority "community of interest".
- Do not divide localities of less than $\mathbf{5 0}$ square miles, whether they are cities, counties, towns, or census designated places (CDPs). These settlements often are made up of home-renters moving every 4-6 years, or home-owners moving every 6-8 year. The first relocate there for their children's public education.

Notes for drawing compact

## DELEGATE DISTRICTS \& STATE SENATE DISTRICTS

- Nest 8-9 Delegate districts and divide 1-2 within each Congressional district following the same procedure. Starting with the previous starting points, such that on summary review, 100 compact Delegate districts are nested within 11 compact Congressionals.
- Aggregate 2.5 Delegate districts to each state Senate district, such that at summary review, 40 compact delegate districts compactly span 100 Delegate districts almost entirely nested within 11 compact Congressional districts.

## 8. Draft guide for redistricting by an automated intelligence decision tree

Based on the first three tutorials I found on YouTube for artificial intelligence AI decision trees, whose notes seem to have disappeared from my iMac. ${ }^{9}$ Use the US Department of Commerce, Census Bureau 2020 Census of Population data provided for the decennial reapportionment of population during redistricting in each state. ${ }^{10}$

- START each "draft district" in an MSA "urban core" with a three-census-block urban "hub". ${ }^{11}$

In each MSA region, choose the most densely population core reported by the Census is the beginning for map drawing. ${ }^{12}$

- Virginia Beach in South Hampton Roads, Newport News in North HR, Arlington "Inside the Beltway", Reston n. of US-50 in Fairfax Co., Springfield s. of US-50, Fredericksburg-Warrenton-Winchester in NoVa Metro Exurbia, Charlottesville in central-western Virginia, Lynchburg in Southside Virginia, and Roanoke in southwest Virginia.

In each MSA, EXTEND "spokes" along major thoroughfares to more remote areas. ${ }^{13}$
During map drawing at each step of extension, immediately at the next step, FILL IN any gaps formed to maintain compact, regular shapes as geography and population settlement allow. ${ }^{14}$

[^15]For simplicity and 'objectively unambiguous" (non-partisan) classification, use the National Geodetic Survey mapping of habitat 15 :

1-"built-up-denser" (dark-grey) -approximating Census "urban settlement";
2- "built-up-lesser" (light-grey) - roughly approximating "suburban settlement";
3-"military installation" (pink) - count for those in barracks, officer \& enlisted housing; 4-"not-built-up" (white) - census of population defined "rural, 5-"forested" (green).

CHOOSE the next adjacent census block, based on the highest numerical score.
At numerical score ties, draw districts from east to west, north to south except in three cases. At the two westernmost MSAs for Winchester and Bristol, draw them from west to east. For the Southside within the triangle of Portsmouth-Petersburg-Emporia, draw them south to north for compactness.

| CHART \#1. District mapping numerical weights attached to each Census Block |  |  |
| :--- | :---: | :--- |
| - feature - | - value - | - notes - |
| MSA Urban Core | 2 | The START of each Census SMA where 70\%+ <br> Virginians reside for their representation. |
| Adjacent urban block | 1 | Like settlement of residents, habitat and <br> neighborhoods chosen for work or their child's <br> schooling in PreK-5 attendance zones. |
| Same MSA <br> either urban or rural | 1 | Convey the "community of interest" extant in the <br> Age of the Automobile, those "tied by commuting". |
| Adjacent MSA | 1 | Connect Winchester to NoVa; Charlottesville to <br> Harrisonburg \& Staunton at I-64 \& I-81, and <br> Roanoke to Blacksburg-Montgomery Co. at I-81. |
| Adjacent rural block | 0 | Rural areas depopulated over time with less <br> population than centuries ago, or by forest parks, <br> man-made lakes, or military facilities |
| Adjacent block with <br> I-XX, US-XY, VA-XZ | 1 | Major thoroughfares, commuting ties of MSA <br> economic \& social 'community of interest' |
| Same locality <br> < 50 square mile area | 1 | The Lynchburg Rule from Commission hearings. <br> Maintain intact smallest cities and incorporated <br> towns with few divisions, and city- and town- <br> majority districts. |
| Adjacent block with <br> 2-adjacent in district | 2 | For compact districts, fill in gaps from previous <br> block-adds. |
| Chesapeake Bay shore | 1 | Maintain 400-year "community of interest" seen in <br> "Friends of the Chesapeake" DMV popularity. Same <br> MSA, Area Code 757, same region for State Police, <br> School Superintendents, Virginia Social Services. |

${ }^{15}$ These roughly approximate the US Census of Population categories "urban-rural" listed alongside below. Both are an alterative to other Federal agency, academic and commercial classifications including variations of categories defined as urban-suburban-exurban-rural.

APPENDIX B.

OVERVIEW view of Commission citizen-drawn Map \#164
Re: MAP \#164 @ "Congressional Districts" tab.https://www.virginiaredistricting.org/legdistricting/comments/plan/164/1
All eleven compact Congressional districts in Plan \#164 meet the NINE (9) Commission criteria, for each one and altogether, for 2021 redistricting plans. Below please find Appendix A, a compliance chart for Plan \#164 Voting Rights Act Plan, and Appendix B, a summary of Plan \#164 Commission website public comments and author replies.

Virginia Redistricting Commission citizen-drawn Map \#164
an approximation mapped onto a US Census locality density map

## DISCUSSION

(1) The districts have equal population, Plan \#164 ranges from target $+1.4 \%$ to $-1.8 \%$ of $+/-2.5 \%$ allowed.

- Every district has a margin of 5-6,000 population to "smooth" boundaries to maintain the cultural 'communities of interest' in the respected localities PreK-5 school attendance zones for early childhood education, a principle reason for Virginian family relocation, whether home-renters every 4-6 years, or home-owners every 6-8.
(2) The districts are compact.
- The Plan-06 "Virginia central-west" district is commended by a resident as compact, and an improvement over the 2021 sausage north-south gerrymander to the Carolina Line.
- Two public comments are "friendly amendments" to reapportion west-Prince William from a 3-way district split, see "Comment summaries and replies" below for a 2-way result realigning Plan-10 \& 07.
(3) The districts are contiguous.
- The Plan-01 "Chesapeake Bay district" is commended in 3 of 6 public comments on \#164. Residents in the Lower \& Middle Peninsulas, and on the Eastern shore, share the same North-Hampton-Roads MSA and 757Area Code. Plan-01 recognizes the historic "community of interest" persisting for over 400-years along the
shores of the Chesapeake Bay. The DMV "Friends of the Chesapeake Bay" plate-sets have been sold to over 500,000 Virginians since its 1996 first issue.
(4) The Plan districts account for communities of interest. While statewide "partisan proportionality" has been ruled indefensible in court, the "one-man-one-vote" doctrine place represents people in settlements rather than locality places. Most Virginians live in urban habitat.
(a) Urban habitat is "densely settled", with "residential, commercial and other non-residential" land use; it "does not follow city or county boundaries". The US HRSA refines that to "large area census tracts" of 400+ square miles and less than 35 people per square mile. * @ "Defining Rural Population" https://www.hrsa.gov/rural-health/about-us/definition/index.html
(b) The US Census defines MSAs as adjacent localities of urban area. Metropolitan Statistical Area MSAs have "at least one urban area of 50,000 or more", and Micropolitan Statistical Area MSAs have "at least one urban area of 10,000 or more".
(5) The Plan in summary view account for Voting Rights Act requirements. (a) There are no target racial proportions applied to any district. (b) The number of existing districts with minority (non-white) populations may not be arbitrarily reduced. Plans must apply consistent rules for compact districts of equal population.
(6) The districts drawn DO NOT take voting results into consideration for populations within each district. However, on summary inspection, they cannot allow undue weight to one party without mitigating circumstances as required by law. compact, contiguous community settlement by the residents alone must be represented. Plan \#164 districts are drawn independently of previous voting results.
(7) The districts drawn DO NOT take racial goals into consideration for populations within each district.
- However, on summary inspection, to conform to recent Voting Rights Act provisions and their US Supreme Court interpretations, they cannot allow loss of minority-opportunity districts over 40\%, -- a standard set by Court-order redistricting for VA-03 at $41 \%$, and VA- 04 at $46 \%$.
- In Plan-03 and Plan-04, black-multi-racial groups have competitive or opportunity districts.
- It has THREE (3) majority-minority $>50 \%$ constituents - including one Black-Multi-race opportunity $>40 \%$ and one Black-multi-race competitive $>30 \%$; - It has FOUR (4) minority opportunity $>40 \%$ constituents - including two Black-Multi-race competitive $>30 \%$ districts;
- It has TWO (2) minority competitive $>30 \%$ constituents.
- The Commission publicly defined the population to use for drawing 2021 districts in the linked software for redistricting on its website.
- The political standard used in public software is the "total resident population" in precincts and census blocks.
- The commission did NOT adopt the judicial "voting age population" standard in its publicly applied software used elsewhere in some aspects of legal proceedings (or any sidebar discussions that lawyers may have used for billable hours).
(8) The districts drawn DO NOT take incumbency into consideration.
- However, on summary inspection, avoid arbitrarily throwing two incumbents into the same newly drawn district without a rationale according to compactness, community of interest, or equal population apportionment.
(9) The redistricted boundaries start from scratch, without reference to previously drawn districts.
- However on summary inspection, districts should not arbitrarily draw a district outside of incumbent's current district constituency.
- Plan-01 situates incumbent BOBBY SCOTT of Newport News in the district population center of a Minority-opportunity district of $45.8 \%$, and that is black-multiracial competitive at $33.3 \%$.
- Plan-03 situates incumbent A. DONALD MCEACHIN of Richmond in the district population center of a Minority-opportunity district of $40.1 \%$, and that is black-multiracial participation at 27.4\%. McEachin has demonstrated a partisan coalition with Democrats who voted 54\% for Biden in 2020.
- Plan-06 situates incumbent ABIGAIL SPANBERGER of Henrico County in the Plan-03 district. - The Plan-06 district population center is Charlottesville-Albemarle MSA, the largest concentration of Democratic votes for Abigail Spanberger's Congressional election.

fluent speaker of Spanish, she can win substantial populations Spanish-speaking homes. Settlement boomed in the two Harrisonburg wards of US-33.

Many VMI graduates become Marine officers each year; all six 4-star Marine Generals left the Trump administration. The NC-Goldsboro AF base district elected a Democrat in 2020, and a majority of voters in the two Norfolk Naval Station voted for Joe Biden. Marine Gen. John Allen endorsed Hillary Clinton at the 2016 Democratic Convention.

## APPENDIX C.

Public comments \& author replies https://www.virginiaredistricting.org/legdistricting/comments/plan/164/1 COMMISSION CITIZEN-DRAWN Plan \#164

Virginia Redistricting Commission citizen-drawn Map \#164 an approximation mapped onto a US Census locality density map

## Comments of general agreement:

- J ustin Ranson, commends Plan-01 embracing the Chesapeake Bay: Eastern Shore-Middle Peninsula-Northern Neck, reservations about lines nearby HAYMARKET (see Plan-07 reply below). - Susan Katsarelis, of Burke. generally approves, but a reservation at PRINCE WILLIAM COUNTY on 3 -way split in Plan-07 first draft.( (AGREED to - see reply below.)
- J erry Saleeby, prefers compactness over "north-south run of the districts in the western/valley part of the state". It silenced the voice of the Charlottesville area.
- Nathan Alderman, locality dot at ALBEMARLE/ Augusta County, commends the "more coherent community-of-interest...a definite improvement over the current map", though he sees connections to the Richmond area, accepting of compactness with western counties as "better than current" within a district drawn south to "drown out our voices". [the north-south 2011 "sausage-district", presumably].

## Comments of general disagreement:

- Peggy Layne. Objects, FLOYD County is on the western side of "the mountain", so it belongs in the $-09^{\text {th }}$ with Montgomery, Pulaski and Carroll Counties. (Reference Rte-8 east in Plan-05 reply below.)
- J oshua Mayes. Critiques, a "nightmarish" plan for "eastern Virginia". Eastern Shore must pay a \$17 toll to cross onto Cape Henry, Virginia. There is only free passage to Maryland in this Plan. To be included in a Virginia Congressional district, Tidewater localities in the district must cross "major bridges" over water in this Plan. "Watermen, rural farmers" should be in their own Congressional District, they have no "community of interest" with any Virginian "inner city" adjacent to them. (See rebuttal for each asserted point in Plan-01 reply below.)
- The author is disagreed with the 3-premises put forward by Mr. Mayes.
(1) All districts drawn must use the $\$ 17$ toll bridge to Cape Henry, Virginia.
(2) Every plan requires Virginians to cross a 'major bridge'. (a) The two major bridges for north-south Richmond crossing the J ames River are required to keep that locality intact, and (b) the Rappahannock River crossing from Richmond City to the Northern Neck either by US-301 or by US-360 to connect north-Richmond MSA there.
(3) Virginians in localities within an MSA containing an "inner city" habitat do have "community of interest" with those same MSA localities containing 'water' or 'rural' habitat.
- Note: In our 2021 Virginia and now for over 60-years, there is no compactcontiguous expanse in Virginia comprised of watermen and farmers to make up a District of 780,000 excluding inner-city urban habitat. Current proposals submitted
to the commission that picture "great crescent roll" districts that wrap-around urban centers are not "compact" as required by law, statute and judicial rulings of our time.

## Plan-07.

- Per Comment: CULPEPPER should be entirely in -06 or -07, undivided.
- Reply: For district compactness, one narrow precinct fingerling of eastern-most Culpeper is apportioned to Plan-07, the fourth compact district within the NoVa MSA. Over 98\% of Culpeper's population remains in the same Plan-06 district.
- Per Comment: PRINCE WILLIAM should not be in three Congressional Districts, though Plan-08 "makes sense" to draw "eastern Prince William" in the same district as "lower Fairfax" County.
- Reply: AGREED. Prince William in Plan-07 can be apportioned to Plan-08, and that lost population to -07 can be made up with population taken from Plan-08 Loudoun County along the Potomac River, maintaining compactness in both districts.
- Per Comment: reservations about lines nearby HAYMARKET.
- Reply: AGREED to an adjustment from first draft. NoVa MSA town of HAYMARKET in northern Prince William County, can be apportioned with Plan-10 with the rest of northern Prince William with 30-30\% commuters into DC Metro, including BATTLEFIELD HIGH SCHOOL attendance zone-entire. That will allow the southern settlements with over 50\% commuters into DC Metro area in the City of MANASSAS-entire, and southern Prince William to be apportioned into Plan-08.

## Plan-05.

- Per Comment: "FLOYD COUNTY. across mountains from Franklin \& Patrick Co., belongs in 9th."
- Reply: Southwest Virginia's population loss requires Plan-09 to extent north of previous limits to embrace Roanoke County to meet population requirements. Immediately adjacent is a suburban settlement in Botetourt in the tens of thousands. Floyd County with a smaller population is more remote more remote from the Plan-09 population centers of greater settlement density. By the Commission-adopted map for cultural regions, Floyd County's population is akin to adjacent Franklin County in Plan-05, just to its north as the commenter did note.
- Per Comment: POWHATAN COUNTY, though some rural, is more aligned with Chesterfield and Henrico than Plan-05.
- Reply: For Congressional districts to be drawn both (a) compactly and (b) in equal populations, the smallest localities most remote away from dense district population hubs may be apportioned into districts other than an adjacent locality similar in some way. Despite its recent growth over 0.5\% greater than the state average, Powhatan is still in the bottom $20 \%$ for total locality populations.

## Plan-06.

- Per Comment: COMPACTNESS is commended, though connections east, accepts the substance of a "community of interest" west to the adjacent Valley MSAs of Harrisonburg and Staunton.
- Reply: Thank you. District boundary location still should not be a barrier to incumbent Abigail Spanberger's reelection with Charlottesville-Albemarle the same majority-urban center in both 2011 VA-06 and Plan-06.
- Per Comment: COMPACTNESS is commended, preferable to north-south sausage that silenced the electoral voice of the Charlottesville area.
- Reply: Thank you. Abigail Spanberger is fluent in Spanish and German so she can capably give voice to the constituents in the Spanish- and German-speaking homes in Plan-06.
Plan-01.
- Per Comment: A "nightmarish" plan for "EASTERN VIRGINIA".
- Reply: 'Chesapeake Bay' is not 'eastern Virginia', it is a compact district of (a) the Eastern Shore, (b) the Cape Henry shore, (c) the Lower Peninsula \& (d) eastern contiguous Bay-shore counties. The localities all lie within the same Hampton Roads MSA and 757 Area Code but for the three northernmost counties on the Bay with MSAll populations less than at their 1600s incorporation.
- The Bay district is a 'community of interest' with its own specialty DMV license plate "Friends of the Chesapeake Bay" - - - ubiquitous throughout the region in all shore localities, recently selling about 20,000 a year, and totaling over 500,000 since 1996.
- The Eastern Shore is connected to the Tidewater region with the Chesapeake Bay Bridge for every district that may be drawn. The district is continuously transited by (a) US-13 on the Eastern Shore, (b) US-60 on Cape Henry, (c) US-17 across the Lower Peninsula and Middle Peninsula, and (d) VA-3 across the Middle Peninsula and the Northern Neck.
- Per Comment: COMMENDING Plan-01 embracing the Chesapeake Bay: Eastern Shore-Middle Peninsula-Northern Neck, but reservations about lines nearby HAYMARKET.
- Reply: Thank you, see adjustment in Plan-07 above regarding the PRINCE WILLIAM district division separating Haymarket township looking north to Loudoun together in Plan-10, and Manassas City looking east and north to Fairfax County together in Plan-08.

Clerk of the Virginia Supreme Court
100 North Ninth Street, 5th Floor
Richmond, VA 23219

To Whom It May Concern,

My name is John C. Hickey. I am a resident of Albemarle County, Virginia. Pursuant to Rule 4 under the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, I am submitting my comments to you regarding redistricting.

My thoughts reflect the reasoning of my son, Tim Hickey, who ran for delegate in the 59th district of Virginia in 2019.

House of Delegates Map: Please keep Albemarle County as unified as possible to maintain our community of interest and allow us to live in fair, compact House of Delegates Districts. Specifically, please include us in only 2 House Districts. One District should be Charlottesville and some portion of Albemarle. The second District should be the rest of Albemarle and our neighbor to the south, Nelson County, with whom we share a community of interest. This would be a fair treatment of our county. The citizens of Albemarle and Nelson share in the Blue Ridge Health District. We also share in the Jefferson Madison Regional Library. Unfortunately, for the past decade the people of Albemarle County have been fractured across 4 House Districts. This divides neighborhoods, separates families and friends, sows confusion among residents, breeds apathy, dilutes our ability to participate in the political process, and muzzles the voices of the people in state-level government. You can keep Albemarle County in 2 Districts in the way I have described above by doing something the Redistricting Commission was not able to do: compromise. Specifically, a compromise between proposed maps A7 and B6 offers a path forward for a fair treatment of Albemarle County. One negative aspect of Map A7 is that it slices Albemarle into 3 Districts. This would lead to the same negative results that we experience under the current map. That is simply not acceptable. In contrast, Map B6 keeps Albemarle in 2 compact Districts, thereby maintaining our community of interest. This is much better for the people here. However, Map B6 draws Albemarle County in with a piece of Augusta County. GOP Commissioners
specifically objected to this proposal because there are mountains between Augusta and Albemarle. To address that concern directly, we can look to Map A7, which combines Nelson County with Albemarle County. This solution has the benefit that Nelson County has roughly the same population as the portion of Augusta County included with Albemarle under Map B6. Thus, it should be a relatively easy fix in terms of map drawing. In sum, dividing Albemarle County into any more than 2 Districts would be a betrayal of the people here. Please draw a fair map for our area by keeping us into the 2 Districts I have described.
Congressional Map: With regard to the Congressional Map, our area is currently in the heavily gerrymandered, non-compact 5th District. The Congressional maps proposed by the GOP members of the Redistricting Commission were unfortunately egregious partisan gerrymanders. Please proceed in good faith in ensuring that we have an opportunity to choose our Representative in a compact, fairly-drawn District that maintains communities of interest and rejects bad faith partisan efforts to gerrymander us for another decade.

Thank you.
John C. Hickey
Albemarle County, Virginia

## To: Clerk of the Supreme Court of Virginia

I am writing to express my concern that the redistricting in Virginia comply with the 'Rules and Procedures for Implementing the Requirements of Article II, Section 6-A' by the creation of compact, contiguous districts which maintain communities of interest and do not create safe seats for one party.

When Virginia Voters approved Amendment 1, they voted for a Bipartisan Redistricting Commission that would end unfair Gerrymandering so that Va. voters could choose their representatives rather than the reverse.. Voters did not expect the Commission to dilute their votes by spitting communities of interests into multiple, widely scattered pieces..

The map submitted by the Commission negates the voters desire to end Gerrymandering by, for example, dividing Charlottesville/Albemarle into more than 2 House Districts and by not keeping Henrico and Chesterfield community of interest in one Congressional District.

To accomplish fair non-gerrymandered, non-partisan districts , I suggest that the court be advised by professional demographers rather than partisan political operatives.

Thank you,
Opal Stroup
13402 Perimeter Dr.
Spotsylvania, Va. 22407
$7^{\text {th }}$ Congressional District

As a Charlottesville resident, I want to voice my strong support for a central Virginia congressional district stretching from Charlottesville and Albemarle to the West End of Richmond. This is a genuine community of interest. Many colleagues and friends who work in Charlottesville live in Richmond and commute along I-64 every day. Like many Charlottesville residents, I shop in Richmond, visit Richmond's museums and galleries, eat in Richmond's restaurants, and fly out of the Richmond airport on a regular basis.

For too long, Charlottesville has been stranded in districts designed to dilute its political influence by linking it with totally unrelated communities. Southside Virginia, stretching all the way to the North Carolina border, is far more rural and culturally conservative. So is the Shenandoah Valley on the other side of the Blue Ridge. Greater Charlottesville is a racially diverse mix of urban and suburban, with an economy built around government, higher education, and finance, much like Richmond and its western suburbs. I hope the new map will respect these connections.

Sincerely, Erik Linstrum

Clerk of the Supreme Court of Virginia:
I am so pleased and happy that the Supreme Court of Virginia has committed itself to a nonpartisan and apolitical redistricting process with its Nov 17th redistricting order. At a time when so many non-Virginians preemptively (and incorrectly) attacked our commonwealth's supreme court as unable to fulfill its obligations without supporting the Republican Party, this Court has proven them wrong. I sincerely and deeply thank this Court for committing itself to the rule of law rather than serving as an agent of any political party.

Best regards,
Darius Massoudi (1851 Stratford Park PL APT 105; Reston, VA 20190)

 ANY LINKS OR DOWNLOADING ANY ATTACHMENTSTO: Justices of the Supreme Court of Virginia and Special Masters

RE: "Rules and Procedures for Implementing the Requirements of Article II, Section 6-a"

We are Co-Coordinators of the League of Women Voters of Virginia Redistricting Committee. With other League members, we have spent many long, fruitful hours at the polls and community events speaking with voters about solutions to gerrymandering. In November 2020, over 65\% of Virginians agreed with our concerns and passed a Constitutional amendment that we hoped would bring fair maps to Virginia. This was a huge step forward for our democracy, and the transparency and opportunity for public input were welcome changes to the process. Unfortunately, the bipartisan structure of the Virginia Redistricting Commission created too much division to overcome. We hope this will not extend to the work which the special masters must do together and that, as Justices, you will ensure the maps are fair.

Representatives of the League took advantage of the transparency provisions and attended all the Commission meetings and hearings either in person or virtually. We invite you to read the LWV-VA blogs which cover Virginia's redistricting process in detail beginning with the selection of commission members in January 2021 to the most recent information provided through the SCoVA website. We captured citizen comments which are not available from any other source unless one has the time to listen directly to the video transcripts of the meetings and hearings.

Many of the comments from citizens focused on their "communities of interest" (COI). COIs are defined in Virginia statute as a "neighborhood or any geographically defined group of people living in an area who share similar social, cultural, and economic interests." Preservation of COIs was "extremely important to the Commission" per their "Redistricting Guidelines and Criteria".

The Commission also voted for wording in the "Redistricting Guidelines and Criteria" document that reads "The integrity and priority of existing political subdivisions should be preserved to the extent possible by avoiding unnecessary divisions of those subdivisions." 3.c.i.b. Citizens asked that their towns and cities be kept together as "communities of interest," e.g., Fredericksburg and Lynchburg. They asked that their cities and counties not be divided unnecessarily into multiple districts. This focus on COIs led to more compact maps that kept cities, towns, and even some counties together.

Many of the maps prepared by the Commission map drawers and those submitted by the public were also much more compact because, in response to a public outcry, they voted, 12-4 in a rare bipartisan vote, to start maps "from scratch" rather than using previously gerrymandered districts. This also served to keep "communities of interest" together.

Please take advantage of the extensive public input previously provided to the Commission in the form of maps and comments. We appreciate that a page on the Virginia courts website has already
been set up for public comment and we encourage this to be supplemented by public hearings both before and after the maps are drawn. We hope both the special masters and Justices will attend and listen to such hearings, which can be organized as Zoom meetings to allow Virginians across the Commonwealth to participate. It is also essential that language services allow non-English speakers to participate and provide public comment.

Thank you so very much,
Chris DeRosa (Arlington) and Fran Larkins (Stafford)

TO: Clerk of the Supreme Court of Virginia

SUBJECT: Redistricting of the State of Virginia Senate and House Districts, Article II, Section 6-A

REFERENCE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A

BACKGROUND: Virginia is divided into 11 Congressional districts, 40 state Senate districts and 100 State House districts. Each of these sets of districts is numbered sequentially beginning with the number 1 (one). The result is that there are three districts for each number from 1 through 11 (Congressional, state Senate and state House), and two districts for each number 12 through 40 (state Senate and state House).

ISSUE: The current numbering of districts causes significant confusion among the voters, including me, especially when trying to determine which state Senate or House district I'm in, and especially when referred to in discussions, new and political discussions. When referred to by number only it is hard to determine if it is a congressional, Senate or House district being referred to when only one of these lower numbers is used to reference a district.

RECOMMENDATION: Leave the Congressional districts as currently numbered. Renumber the Virginia state Senate districts to 100 through 139, and renumber the Virginia state House districts to 200 through 299.

Thank you for your attention to this matter, Robert W Peterson
1841 Glanzer Court
Harrisonburg, Virginia 22801

Muriel-Theresa Pitney
Clerk, Supreme Court of Virginia
100 North $9^{\text {th }}$ Street, Fifth Floor
Richmond, Virginia 23219
Dear Ms. Pitney:
The following comments are respectfully submitted according to Rule 4(a) of the Court's rules of February 23, 2021, related to redistricting. These comments make recommendations regarding a process that could be following in defining maps for the House of Delegates, Virginia Senate, and congressional districts, with particular emphasis on the criteria of communities of interest and compactness. These comments are submitted without partisan motivation. In addition to accepting written comments, I hope public hearings would be held according to Rule 4(b).

Use existing locality boundaries to define legislative districts and complete the process with House of Delegates districts before considering state Senate or congressional districts. Doing so would help meet the "communities of interest" and "compactness" tests. It should be noted the principles underlying these tests include the practical effect of making the day-to-day operation of government more efficient, especially in the administration of voting and elections. The number of different combinations of candidates on ballots is reduced, unnecessarily small "orphan" precincts are reduced, and local governments, school boards, and civic organizations would be better aligned with the state legislators who represent them.

In the case of localities in which the population approximates $1 / 100$ of Virginia's population (86,313, or the "target population"), the House districts should be drawn to the locality lines as much as possible, so the locality has a single House member.

In the case of localities that are smaller than the target population, House district lines should circumscribe whole adjacent localities to bring the total population as close as possible to the target population and with a portion of an adjacent locality added only to the extent necessary to meet the population target. In doing so, the principle of "communities of interest" should be extended to include regions of interest. As a hypothetical example, in defining a House district in Shenandoah Valley, such district should include Valley localities rather than drawing House district lines eastward across the Blue Ridge to include the Piedmont Region.

In the case of localities that are larger than the target population, the number of House districts in such localities should be maximized to minimize the number of House districts that cross the locality's boundary, which would help ensure compactness. For example, Fairfax County, which surrounds the entirety of Fairfax City, has a combined population with Fairfax City of 1,174,455. Thirteen (plus a fraction) House districts would "fit" into Fairfax County and City. This should be goal of drawing lines, with one House district including the entirety of Fairfax City plus adjacent areas of Fairfax County, with a fourteenth district straddling the Fairfax County boundary with an adjacent jurisdiction.

Muriel-Theresa Pitney
November 1, 2021
page two

Consistent with "communities of interest" principle, House districts should be drawn to encompass entire towns within a particular county, and common interest communities as defined in the Code of Virginia. Some common interest communities are quite large, such as Reston, South Riding, Ashburn, Brambleton among many others in Northern Virginia and elsewhere.

In addition, consideration should be given to defining "communities of interest" in large localities according to public high school attendance areas. High school education and extra-curricular activities, and that of their "feeder" elementary and middle schools, define as a practical matter much of what is considered "community." Encompassing these types of communities in single House districts would also contribute to the efficient operation of government as noted above.

In taking these considerations into account, one test of compactness that could be applied is the measure of the ratio of the physical area of a district to the length of its boundary. The larger this ratio, the more compact the district and vice versa. Once an initial map of House districts is defined, the additional tests to comply with racial, language, and other federal and state laws should be applied, and adjustments made accordingly.

In considering state Senate districts, I suggest the process borrow from Wisconsin. Wisconsin has 99 House districts and 33 Senate districts. Each Senate district is defined to encompass exactly three House districts. In Virginia, with 40 Senate districts and 100 House districts, application of the Wisconsin rule would define Virginia's Senate seats as encompassing the entirety of two House districts plus half of another. This would also further the efficient operation of government for the reasons stated above, and contribute to more effective governing, as 80 of the 100 House members would be pared with a single Senator in terms of constituency, with 20 House members paired with two Senators.

In taking this approach, defining Senate districts could be done more easily than "starting from scratch," since Senate districts would substantially meet the criteria of compactness, encompass communities of interest, and meet the other legal requirements because they would be based on the House districts defined to meet these requirements. In larger jurisdictions with populations at or greater than a target Senate district $(215,785)$ one or more entire Senate districts should be defined within the boundaries of the locality while minimizing the crossing of locality lines.

For these same reasons, a similar approach could be taken to defining congressional districts.
Virginia's 11 congressional districts could be drawn so each encompasses the entirety of nine House districts and three Senate districts plus fractions of a tenth House and fourth Senate district, while applying the "regions of interest" principle.

Thank you for the opportunity to submit comments.

I would like to write to the Special Masters who have been appointed to draw the new voting districts in Virginia.

I have watched gerrymandering and partisan drawing of the voting maps for my entire residency in the Commonwealth of Virginia. I am imploring you to execute on the intention of the voters of Virginia when we twice voted for the establishment of a bi-partisan redistricting committee. I feel that Virginians want fairness to be the overarching concern when our political districts are apportioned. I do not believe that Virginia voters want a guarantee that whichever party we support will win. What's the point of that? There is no room for any meaningful discourse if the outcome of an election is largely predetermined. There is no room or incentive for compromise if there is no NEED to compromise.

I respect the credentials, experience and judgement of both Special Masters. I know that you will both do what is right, ethical and representative of the vote ratifying the Constitutional Amendment establishing the bi-partisan commission. Please prove me right.

Thank you for your service in this most important duty. Justin Shreve

# THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON 

 ANY LINKS OR DOWNLOADING ANY ATTACHMENTSHello,
My name is Ankit Jain and I grew up in Fairfax County. I've been following the redistricting process closely and I have two requests for Special Masters Grofman and Trende. First, I ask that you do not start your map-drawing from the current gerrymandered districts. Starting from a gerrymandered base will inevitably result in a worse final product, no matter how many changes you make. It is better to have a clean break from Virginia's history of gerrymandering. This request of starting from scratch was the main message sent to the redistricting commission by the public. I hope you will heed the public's desire here just as the commission did. I encourage you to look at the maps the Commission released, as well as those submitted by the public, to help you find a different base to start from.

My second request is that you consciously consider the partisan makeup of the maps you are drawing and ensure that the final product results in a seat share for each party about proportional to the party's vote share. You are in fact legally obligated to do this under Virginia law prohibiting the drawing of districts to favor or disfavor any political party. To meet this requirement, you must consciously consider partisanship when drawing maps rather than drawing maps without looking at partisanship at all. An essential element of drawing fair maps is to ensure the maps have partisan proportionality. Ensuring proportionality is just as important as protecting communities of interest, and I hope you take it seriously.

Best,
Ankit Jain

Clerk of the Virginia Supreme Court
Virginia Supreme Court
Subj: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A

## Dear Clerk:

For many years, I have found it difficult to make sense of the range of voting districts in Virginia. Specifically:

- Virginia is divided into 11 congressional districts, 40 state Senate Districts, and 100 state House districts. Each set of districts is identified numerically starting with the number one. This results in multiple districts identified by the same number. There are three districts for each number 1-11. There are two districts for each number 12-40.
- When referred to by number only, it is hard to know if it is a congressional, Senate or House district being referenced. If you have ever had trouble following a political discussion for this reason, you are not alone!
- Duplication has also resulted in some Rockingham County residents residing in two different districts numbered 26: House District 26 and Senate District 26.

Here is one proposed solution I am requesting that you consider:

- Leave the congressional districts as they are (1-11) and renumber the state districts as follows:
- Senate Districts would be numbered 100-139; and House Districts would be numbered 200299.
- Not only would this give each district a distinct number, but it would also immediately identify them as congressional, Senate, or House. It would give each category room for expansion.

Thank you for your consideration,

November 20, 2021
Dear Members of the Virginia Supreme Court:
As you deliberate on redrawing the voting districts of the Commonwealth of Virginia, please consider adding one basic consideration that will be of great value to the citizens of the Commonwealth. The way that legislative districts are identified at present has created undue confusion among those of us who would like to be able to identify which congressional, Senate, or House districts in which we live. This is particularly confusing when districts may overlap. I would ask that you identify a simpler system that relies on the use of just one number to precede all of one category (e.g., Senate vs. House vs. congressional district). This should obviate the need to use the same number for different categories of districts.

A simple solution would make the system more accessible to all voters and Commonwealth residents. Thank you for your consideration.

Sincerely,

Nancy Barbour 2610 Rising Rock Court

To Whom It May Concern:
With Roanoke City being slightly larger than a single house district, below is a list of Roanoke City precincts which best keeps communities of interest intact in my opinion for both what is the current 11th House District and the neighboring house districts:

1 Peters Creek
2 Grandview
3 Preston Park
4 Williamson Road
5 Hollins Road
6 Southeast
7 Lincoln Terrace
8 Highland
9 Old Southwest
10 Raleigh Court
11 Crystal Spring
12 Grandin Court
13 Deyerle
14 Lee-Hi
15 Summit Hills
16 Forest Park
17 Eureka Park
These 17 Roanoke City precincts are very close to the target population, keep several communities of interest relatively intact, and are compact \& contiguous.

Thank you,

Richmond, VA 23219
November 22nd, 2021

Dear Ms. Pitney:
Pursuant to the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A, the Virginia Counts Coalition submits the following as public comments. The Virginia Counts Coalition has spent the last year advocating in regards to redistricting on behalf of the many communities that our coalition represents. In this effort, we have consistently urged the Virginia Redistricting Commission to focus on equitably drawn districts, to ensure accessible and transparent meetings and documents, and to prioritize ensuring the protection of communities of interest and historically underrepresented communities.

In recognizing the responsibility of drawing district maps has now passed from the Virginia Redistricting Commission to the Supreme Court of Virginia, please accept and review the following (links and also attached) as written public comments to inform your work:

## -

Coalition Congressional Maps and Statement
-
Coalition State House Maps and Statement

。

## Coalition Map Shapefiles

## Letter to the VRC Regarding Language Access

## Testimony to the Commission on Behalf of State House Maps Delivered October 5th

- 

Public Statements
-

## Public Comments

We believe these attached maps illustrate a way to draw districts that ensure the preservation of communities of interest and keep together communities of color, better ensuring that these communities can successfully elect the candidates of their choice. The documents also explain the need for meaningful access to the comment process by disability and language minority communities so that they may also participate in the redistricting process.

We believe these statements and testimony ensure a more equitable and accessible process. The public input process built into Amendment 1 provided the Virginia Redistricting Commission with a record to ground and inform the mapmaking process with the experience and wisdom of everyday Virginians. This Court's special masters should not lose sight of this vital public testimony. Accordingly, we formally ask that the Clerk of the Court, under Rule 3 of the Rules and Procedures, request all records currently held by the Virginia Redistricting Commission. This would include, but is not limited to, any transcripts commission meetings, particularly where oral testimony was provided, written or oral public comment to the commission about communities of interest or district lines, including maps, postcards, etc. and any and all other records that the Commission may hold relating to public input on their communities or district lines

We ask that the commission take these efforts into consideration as the product of collaboration between many Virginians, community organizations, and experts. We thank you for your consideration.

Sincerely,
Virginia Counts Coalition, comprised of:

Dear Virginia Supreme Court,
To the Clerk of the Supreme Court of Virginia:
I am writing this letter, pursuant to the Supreme Court's Rules and Procedures for Implementing the Requirements of Article II, Section 6-A, to provide you with my input about redistricting in Virginia. These maps will be the basis for representation for the next decade and it's important that the maps fairly reflect our communities.

In addition to my written comment provided today, I look forward to the opportunity to present my testimony at a public hearing. I believe there must be a robust public hearing schedule to provide Virginians with ample opportunity to advocate for their communities.

While there are many interests that unite my community, one important shared interest is reducing splits in Northern Virginia. As a resident of Arlington County, I believe we share a strong economic and community bond with Alexandria County. We should remain in the same congressional district together.

Thank you for taking the time to read my public comment letter.

Sincerely,
Brianna Shamsuddoha

The public, including elected officials, may participate in the Court's redistricting deliberations through the submission of written comments. Any such comments must be provided in the form of a letter addressed to the Clerk of the Supreme Court of Virginia and reference the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A. All public comments must be sent toRedistricting@vacourts.gov and must be germane to the topic of Virginia redistricting.

Respectfully,

I am providing below a record of email with the Redistricting Commisson. My comments regard what appeared to be a breach of good faith effort - and perhaps a form of mal-practice by the Commission - by allowing incorrect uses of terms that were already legally defined. I observed that incorrect uses of legally defined terms - that was not corrected by the Commission were inflected with politically partisan bias, as well as offensive prejudices, that sometimes in some speakers approached racialist bigotry. This was very distressing.

Sincerely,
Edward Strickler

Subject: Keep working Redistricting Commission. You've failed - thus far - by failing to enforce the Code's meaning of 'communities of interest'

Dear Commissioners:

Keep working.

That is your sworn public service. Quitters - who are not quitting because of their own or family illness or crisis - are quitting on the public - all of us in the Commonwealth - that they claim to 'serve', contrary to their oath and commitment to serve faithfully. As I believe one of the Commissioners said in yesterday's meeting there is a moral dimension to your work: that moral dimension involves not to quit your public service until a higher authority (the Constitution, the Virginia Supreme Court, etc) tells you to quit or you reach the conclusion that you can reach.

It is incorrect to claim - as many 'progressive' media appear to be doing - that your morass is due to 'conservative' partisanship and racialist thinking. There has been that, sad to say, but, I believe also, sad to say, because of 'progressives' pushing their own racialist thinking and tribalist partisanship, frequently cloaked in prejudicial constructions of 'communities of interest'.

I tried this week to step in with comments that might help by re-focusing your lens on equity among metro and rural areas that are part of any 'community of SHARED interests, shared benefits and burdens of Constitutional governance! I heard too many times metro area commenters unwilling to consider SHARED interests other than shared politically partisan interests. Shame on them. But also shame on the Commission for not calling it out.

You will need to answer for allowing commenters to abuse the meaning given by Virginia Code, and in common morality, of

## 'communities of interest'. Commenters transgressed the specific definition cited at your Commission's website ( https://www.virginiaredistricting.org/2021/Data/Ref/2021\%20Redistricting\%20Guidelines\%20and\%20Criteria\%208-19-2021.pdf ). <br> 'Communities of interests' must be

- 'contiguous'. Many or most Virginia metro areas are contiguous with one of more rural areas. BUT metro area commenters frequently discussed their adjacent rural communities as foreigners, almost as if a different species, who were (implicitly or explicitly) inferior intellectually, behaviorally and morally, and thereby, to the metro area commenters, incompatible, or unworthy of association. Quite a display of 'progressive' tribalist high dudgeon 'drag' ("Whatever you proclaim as your identity here in the material realm is also your drag", RuPaul).
- 'avoiding unnecessary divisions of those subdivisions' (common sense \& common morality for good government)
- 'geographically defined group of people living in an area who share similar social, cultural, and economic interests shall be maintained to the extent possible'. Many Virginia metro areas - as described below - are dependent upon water resources, waste streams, food and agricultural production, and energy production that are in adjacent/contiguous rural areas, and most metro areas depend on labor markets coming in from rural areas (especially to do lots of the dirty dangerous work). YET I did not hear metro area commenters discuss these ESSENTIAL 'social, cultural and economic interests'! It was as if 'progressives' had taken a holiday from their 'progressive' ideals about diversity, equity and inclusiveness! And, rather, for the purposes of redistricting, become possessed by anti-ecological, anti-scientific, anti-working class, anti-'green' tribal spirits ... for the sake of political partisanship ... which of course, Virginia Code says they must not be:
"For purposes of this subdivision, a 'community of interest' means a neighborhood or any geographically defined group of people living in an area who share similar social, cultural, and economic interests. A 'community of interest' does not include a community based upon political affiliation or relationship with a political party, elected official, or candidate for office." Va. Code Ann. § 24.2-304.04(5)." [ emphasis added]

The good people of the Commonwealth - by a sound majority - informed you what to do. The Code of Virginia was/is a sufficient guide. And you had/have the high privilege of serving the public in this important matter. You failed, for a time. But Keep Working.

Thank you,
Edward Strickler

Subject: Comments today: Rural communities are communities of interest in relation to metro areas

May I respectfully point out a problem with many comments to you that I have noticed.

Many comments, particularly from metro areas, have discussed rural areas adjacent to their metro area as NOT part of their 'community of interest' BECAUSE 'they' 'don't vote like we do'. BUT this is defining a 'community of interest' based upon political affiliation or relationship with a political party and is disallowed by the Code of Virginia, as described on one of the Commission's webpages. How will Commissioners regard or disregard these comments that are contrary to provisions of the Code?

## Moreover,

many comments have portrayed rural areas adjacent to metro areas as populated by people who are described as if foreigners, or perhaps as intellectually, behaviorally and/or morally inferior. This sort of political tribalism is something you should draw lines to protect against, for the sake of our 'Commonwealth': the social bonds we share in common which is our greatest strength and 'wealth'.

Too many comments denying that metro areas have any 'community of interest' with adjacent rural areas destroys this 'Common-wealth'. Metro areas and adjacent rural areas have much in 'common interest'.

For example:

## Waste

How many Virginia metros keep their waste in city limits? Many, perhaps most, dump into rural areas, that are - not incidentally - very often in rural communities of color, and working class communities? Clearly, considering waste streams, many adjacent
rural areas ARE IN FACT in a social, cultural and economic 'community of interest' with metro areas, are they not?

## Labor

Similarly, metro areas have long been dependent on cheaply paid labor that migrates or commutes from adjacent rural areas. Are the people who do much of the dirty, hard work in metro areas - who commute in from rural areas - not part of these metro commentators' 'community of interest'?

## Food

And what about food production? Are the working class people doing dirty, dangerous and poorly compensated jobs of agricultural production, that provide for needs in growing metro areas, not worthwhile in metro commentators' assessment of their 'community of interest'?

## Energy

Today we see metro area interests - that need more and more and more energy - predating upon rural landscapes and communities to provide utility-scale solar production of electricity, externalizing the effects and costs of these vast acres of toxic e-waste pollution upon the rural jurisdictions. But we still hear metro area commentators denying any 'community of interest' with adjacent rural areas.

Many metro area commenters have expressed conceptions of 'community of interest' that are politically partisan - which is not allowed by the Code - and many have abstracted adjacent rural areas from their 'community of interest' apparently out of historical blindness, intellectual laziness, or moral indifference.

I propose that your map drawing should not be blind, lazy or indifferent to how, historically and presently, rural areas may be 'communities of interest' in relation to adjacent metro areas. commentators.

Respectfully,

Sent: Wednesday, October 6, 2021 6:31 PM
Subject: Rural communities are communities of interest in relation to metro areas

I am Edward Strickler. I live in Prince Edward county in the very rural Southside, and have lived in rural Albemarle County, and lived from birth to college age in a rural working class farming community of Rockingham County. My ancestors arrived to the Shenandoah Valley in the early decades of the 18th century escaping genocidal religious persecution in Europe. Some of them carried a rare 16th century family Bible from Switzerland to the Valley (it's in the very fine Luray Valley Museum in Luray).

I am a member and past chair of the Ethics Section of the American Public Health Association, am recently retired from the School of Medicine at UVA, and have served on many advisory commissions, committee, boards and other bodies with state, regional or local jurisdiction.

Throughout I have aimed to elevate needs, issues, and concerns of underserved and vulnerable rural populations, who, as anyone worth their salt should know, in Virginia, means many rural residents, and sometimes most households of a rural area census tract, zip code, or entire counties.

I am raising with you a moral imperative to repair the many disparities, inequities, and injustices endured, across generations in many rural areas of Virginia that have transpired, in part, through political line drawing. Line drawing should not disadvantage rural populations and instead should tend toward improved equity for rural populations. Here I briefly define equity as the fair sharing of benefits and burdens across society; and I define justice as the morally sound discernment of what fair sharing would be, that involves all stakeholders in conversation together.

I am sad - but not surprised - that your crushing schedule (I am sorry it has been so crushing but that is your public service and we thank you for that!) has poorly engaged concerns about equity and justice (in the terms above). It has been wonderful to hear many comments from persons speaking for themselves and/or for their communities of different colors, races, ethnicities, and cultures. Thank you for welcoming them. Many spoke about historical and ongoing problems from Virginia's wickedly racialized legal, political, and social histories and their legacies. That is a part of discovering justice (through their engagement in this conversation about redistricting). But, powerful and important, as that is, it gets us not very far regarding equitable sharing or benefits and burdens, across metro area and rural areas Virginia. This is in large part due to how, historically, metro-dominated politics created/s rural areas as subaltern. Subaltern?: subordinate to metro issues, needs, and concerns; because rural people are considered inferior (inferior intellectually, inferior in economic or cultural production, and inferior morally).

I have been advocating this summer with the Governor's Commission on Racial Inequity in Virginia Law ( https://www.governor.virginia.gov/racial-inequity-commission/ ). Fortunately I knew some members to breakthrough their crushing and important schedule. My aim was to encourage consideration of rural disparities, inequities, and injustices within their broader discussion, and to recommend out of that discuss, within their mission. I am glad that they appear to be completing a 'rural' chapter, with description and recommendations. I believe, from viewing meetings online, that some members were surprised to know how great, and how entrenched, disparities, inequities, and injustices are in much of rural Virginia.

Generally, in most such bodies that I've be part of, or advocated with, most appointees had not a clue that the Virginia jurisdictions with the largest proportions of residents of color are rural and very rural counties, not metro areas! Their discussions of racial equity failed to include seriously the disparities, inequities, and injustices across rural Virginia, because of the falsehood that rural Virginians are mostly 'White'. Which is easily disproved with a single map: https://www.indexmundi.com/facts/united-states/quick-facts/virginia/black-population-percentage\#map And comparing that map to another set - https://www.countyhealthrankings.org/app/virginia/2020/overview - where we see that much of rural Virginia - and especially Southside, Southwest, the Eastern Shore, and areas of the Middle and Northern Peninsulas - are counties, census tracts and zip codes where Virginians get sick more, stay sick (and disabled) longer, and die sooner, than other Virginians - we see another way to understand 'communities of interest', 'racial equity' and equitable sharing across the Commonwealth. And yet another map - https://www.vpap.org/visuals/visual/increase-multiracial-identity/ - showing growth in multiracial populations in rural Virginia helps us too.

Many rural jurisdictions in Virginia are communities of interest because of the prominent, and sometimes extreme, disparities, inequities, and injustices they endure - and have endured for generations - when compared to metro areas. Getting sick more, and staying sick (and disabled) longer are prominent disparities! Rural residents dying sooner are extreme inequities (wouldn't a rational person concur?, and wouldn't a moral person abhor?). Continuing the legal, political and social conditions that sustain these are grave injustices.

What can your Commission do about this? Your crushing schedule will not allow you to do much. But you can, when faced with the comments you've heard about linedrawing and 'communities of interest' recall these legal, political, and social legacies or disparities, inequities, and injustices across much of rural Virginia.

Too many times in the live and recorded public hearings I heard city dwellers and metro area advocates discuss adjacent rural communities as foreigners to their interests and values. I did fewer times hear rural dwellers discuss metro areas as foreigners. Language selected and emphasized by the metro area residents/advocates too frequently, distressingly, veered toward stereotypical and prejudicial belittling, devaluing, and even fear mongering stereotyping of rural voters, rural values, and rural communities.

I lived many years in rural Southern Albemarle County. I heard today many Charlottesville and metro-area Albemarle County speakers relate that they have nothing in common with Buckingham County. So, they appear not to know or not to care that many of the working class and skilled workers at the University, in the UVA Health System and Martha Jefferson Sentara Health Systems. And other workplaces - who do many of the dirty jobs - live in Buckingham County. And also in Augusta County (another county many metro-Charlottesville speakers considered foreigners. But I also heard a Buckingham County Supervisor -
who knows more about these strong ties. with Scottsville (in Albemarle County) as the central market, health care, and other center for much of Buckingham County - tell the opposite story: that many Buckingham residents have a common 'community of interest' with Albemarle County and Charlottesville, where so many work, so many get health care, and so many find services they need.

My impression - formed over decades of work with many advisory bodies - is that affluent metro elites' preconceptions and prejudicial appraisals of rural Virginia interests and values - as contrary to their interests - is not founded very much in fact but in selfish emotions. It was too hard, and too distressing, to consider that economic patterns that benefited/benefit metro areas for generations, while burdening rural areas for generations, were facts to deal with. Rather, instead, turn the situation around, emotionally, and consider, and sometimes publicly call rural Virginians 'racists', 'rednecks', 'White trash', 'trailer trash', 'country trash', and the like. Great and abundant public institutions, seated in larger and smaller metro areas, sparingly provide or seldom sustain economic development and outreach, clinics, practitioners, and specialists, educational enrichment and lifelong learning to advance along $21^{\text {st }}$ century career ladders, and other benefits of their abundance into underserved rural areas. Rural need is emotionally distant and easy to put out of mind. Economically, politically, and emotionally, it is very easy for many metro areas to ignore rural needs, concerns and values. While many rural areas, long ago, were economically captured/colonized by metro area economies, and politics, to suit their selfish interests.

I beg you, please, do not put rural Virginians out of mind. Rural Virginians are, in many ways, and in many places, a 'community of interest'/'communities of interest' IN RELATION historically, economically and politically with metro areas, that include generations-long concerns for communities of different colors, races, and ethnicities, residing in rural areas, who have been disempowered by economic and political arrangements that suite metro area elites.

I can share to any who ask my written presentation to the Governor's Commission on Racial Inequity in Virginia Law. But you already have enough read. And I thank you for your kindness and consideration for that! Thank you.

Respectfully,

Edward Strickler

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

The Rappahannock County Board of Supervisors previously voted unanimously to authorize me to submit comment to the redistricting commission regarding our local desire to remain in the same House District as northern Fauquier County. I am repackaging that comment for the benefit of the court.

We and northern Fauquier County, for all practical purposes, form a community of interest. There are many similarities that span the county line including: land-use values as evidenced by the significant presence of conservation easements and restrictive zoning; economic, social, and cultural factors revolving around the predominant agricultural business climate; and similar geographic features of the piedmont.

In addition, we have had a strong community relationship with Fauquier County for decades. Our citizens go to school in Fauquier County, including the Governor's School, Wakefield School, Highland School, and LFCC. Our citizens do business, shop, and engage in a wide range of recreational activities in Fauquier County.

We understand that redistricting is a difficult task with many variables at play. In reaching your decision, we respectfully request that you consider our desire to remain with northern Fauquier County in the same House District and to specifically not align our small community with only metropolitan areas or areas on the west side of the Blue Ridge.

Sincerely,

Debbie P. Donehey, Chair<br>Rappahannock County Board of Supervisors

COUNTY OF FREDERICK

VIA EMAIL TO Redistricting@yacourts.gov
Honorable Muriel-Theresa Pitney, Clerk of Court
Supreme Court of Virginia
P.O. Box 1315

100 North Ninth Street
Richmond, VA 23219-1315
Re: Decennial Redistricting Pursuant to the Constitution of Virginia, art. II, §§ 6 to 6-A, and Virginia Code § 30-399

Dear Ms. Pitney:
Pursuant to the Court's Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, I write on behalf of Frederick County and its Board of Supervisors (collectively, "Frederick County" or "the County") regarding the state legislative and congressional redistricting proceeding currently pending before the Court. Frederick County has diligently pursued its local magisterial district redistricting, with a Board of Supervisors public hearing on the County's proposed redistricting scheduled for December 8, 2021. This is in anticipation of the adoption of the proposed redistricting that same evening, as the proposed redistricting responds to public comments the Board of Supervisors received on November 8, regarding a prior version of the County's proposed redistricting.

The County's specific concern with the state legislative and congressional redistricting relates to geographic correspondence between state legislative and congressional districts and local magisterial districts and precincts. The County respectfully requests that, based on its modest population size, the County not be split between congressional or State Senate districts and, to the extent possible, the House of Delegates district lines conform to the precinct and magisterial district lines that the County ultimately adopts. Doing so would avoid the potential for split precincts. It would also avoid the possibility that residents of a County magisterial district - the median 2020 population of a magisterial district in Frederick County is just 15,236 - would be split between multiple state legislative and/or congressional districts.

Toward this end, I am including with this letter copies of the proposed County-wide map and individual maps of the proposed magisterial districts. Both the County-wide map and the individual magisterial district maps show the constituent precincts. I am also including a copy of
the County's proposed redistricting ordinance, which includes text descriptions of the boundaries of the proposed magisterial districts and precincts.

In particular, I note that, in the state legislative redistricting following the 2010 Census, despite the combined population of Frederick County and the City of Winchester (which the County wholly surrounds) being just 104,508 , a total that was not that much more than the target population for a single House of Delegates district, the County was divided among three House of Delegates districts. Two of those districts extend from the east into the eastern portion of the County, into some of the highest growth areas of the County.

Consequently, in undertaking the current redistricting exercise, the existing House of Delegates district lines did not provide a viable rubric for the local magisterial district redistricting. In this regard, I note that, in all or almost all of the draft maps prepared by the consultants to the Virginia Redistricting Commission, the maps divided the County between only two House of Delegates districts. The County proceeded with its redistricting process in anticipation of the County being divided between only two House of Delegates districts.

I further note that, based on the median 2020 population of 15,236 for the County's magisterial districts, the population of four magisterial districts, plus the City of Winchester's population of 28,120 , would total 89,064 . This would represent almost the ideal size for a House of Delegates district, being just $3.2 \%$ over the target size of 86,314 . Therefore, the County believes that four intact County magisterial districts, plus the City of Winchester, could constitute a single House of Delegates district, at worst requiring perhaps the placement of just a single precinct from them into the one adjacent House of Delegates district that could include the rest of the County. The County respectfully submits that there is no need for a more radical division of the County among House of Delegates districts.

The County can provide to the Court and its Special Masters further information regarding the County's proposed magisterial districts and precincts, including the listing of census blocks comprising each, upon request to the undersigned County Attorney. The County very much appreciates the Court's consideration of the County's concerns.

Respectfully submitted,

Roderick B. Williams
County Attorney

## Proposed Gainesboro Precincts

## Proposed Stonewall Precincts

## Proposed Redbud Precincts

## Proposed Shawnee Precincts

## Proposed Opequon Precincts

## Proposed Back Creek Precincts

## PROPOSED AMENDED FREDERICK COUNTY CODE

## CHAPTER 7 ELECTIONS

## Article I Magisterial Districts

## § 7-1 Districts created.

Pursuant to authority contained in Code of Virginia (1950), as amended, § 15.2-1211, the Magisterial Districts of Frederick County, Virginia, are hereby created and established as set forth in this article.

## § 7-2 Districts enumerated.

The magisterial districts with populations set forth are as follows:

| Magisterial District | Population (as of April 1, 2020) |
| :--- | :---: |
| Back Creek | 14,930 |
| Gainesboro | 14,944 |
| Opequon | 15,507 |
| Red Bud | 15,058 |
| Shawnee | 15,652 |
| Stonewall | 15,326 |

## § 7-3 Central Absentee Voting Precinct.

The Central Absentee Voting Precinct for all elections is to be held at 107 North Kent Street (County Administration Building), Winchester, Virginia, in a first-floor conference room.

## § 7-4 Boundaries.

The boundaries of the respective magisterial districts are set forth below:
A. Back Creek Magisterial District. Beginning at the southernmost edge of the county, at the intersection of the Interstate 81 southbound lanes and the boundary between Frederick County and Warren County, proceeding west along the boundary with Warren County until reaching Cedar Creek and the boundary between Frederick County and Shenandoah County. Thence following the boundary between Frederick County and Shenandoah County approximately northwest, then north, and then southwest again, following the boundary and roughly the trajectory of Cedar Creek. Thence departing Cedar Creek and continuing northwest along the county boundary until arriving at the border between Virginia and West Virginia, and the boundary between Frederick County and Hardy County, West Virginia. Thence proceeding northeast to the start of the boundary shared between Frederick County and Hampshire County, West Virginia. Thence continuing broadly northeast, following the county boundary, until arriving where Back Creek Road crosses the county border. Thence
following the centerline of Back Creek Road north-northeast to the intersection with Gore Road. Thence following the centerline of Gore Road northeast to the intersection with Route 50. Thence following the eastbound lanes of Route 50 east to the boundary of the City of Winchester. Thence proceeding in a roughly southerly fashion along the border with the City of Winchester until its terminus, near where Hoge Run passes under Interstate 81. Thence following the Interstate 81 southbound lanes until the point where the northern boundary of the Town of Stephens City runs perpendicular to Interstate 81. Thence following the boundary of the Town of Stephens City in a first roughly west, then roughly south direction, until the place where the southernmost boundary of the Town of Stephens City meets Family Drive. Thence following the centerline of Family Drive southeast to the intersection of Route 11, and thence southwest along the centerline of Route 11 until the intersection with Salem Church Road. Thence following the centerline of Salem Church Road east to its intersection with the southbound lanes of Interstate 81. Thence following the southbound lanes of Interstate 81 south to the boundary between Frederick County and Warren County, arriving at the starting point.
B. Gainesboro Magisterial District. Beginning at the intersection of the boundary of the City of Winchester and the eastbound lanes of Route 50. Thence proceeding west along the eastbound lanes of Route 50 to the intersection with Gore Road. Thence proceeding southwest along the centerline of Gore Road until the intersection with Back Creek Road. Thence proceeding south-southwest along the centerline of Back Creek Road to the boundary between Frederick County and Hampshire County, West Virginia. Thence following the boundary of Frederick County and Hampshire County roughly west and then roughly northnortheast to the intersection of boundaries of Hampshire County, West Virginia and Morgan County, West Virginia with Frederick County. Thence following the boundary of Frederick County and Morgan County, West Virginia in a southeasterly direction to the intersection with the boundary of Berkeley County, West Virginia. Thence following the boundary of Frederick County and Berkeley County, West Virginia in a southeasterly direction to the intersection with the Interstate 81 southbound lanes. Thence following the southbound lanes of Interstate 81 south-southwest to the overpass crossing at Rest Church Road. Thence following along the centerline of Rest Church Road west and south to the intersection with Welltown Road. Thence following the centerline of Welltown Road south to the intersection with the southbound lanes of Route 11. Thence following the southbound lanes of Route 11 southwest until the intersection with Route 37, and then proceeding along Route 37 south to its intersection with Route 50. Thence following the eastbound lanes of Route 50 east to the intersection with the boundary of the City of Winchester, arriving at the starting point.
C. Opequon Magisterial District. Beginning at the intersection of Route 277 and the boundary between Frederick County and Clarke County, following southsouthwest along the boundary between Frederick County and Clarke County to the intersection with the boundary between Frederick County and Warren County. Thence following the boundary between Frederick County and Warren County south-southwest, then turning west-southwest, to its intersection with the Interstate 81 southbound lanes. Thence following the Interstate 81 southbound lanes north until the intersection with Salem Church Road. Thence following the centerline of Salem Church Road west to the intersection with Route 11. Thence following the centerline of Route 11 northeast to its intersection with Family Drive. Thence following the centerline of Family Drive west to its intersection with the boundary of the Town of Stephens City. Thence following the boundary of the Town of Stephens City clockwise to its intersection with Interstate 81. Thence following the Interstate 81 southbound lanes north to the point where the interstate crosses Opequon Creek (watercourse). Thence following Opequon Creek briefly to the east, where it passes beneath Tasker Road. Thence following the centerline of Tasker Road southeast to the intersection with Aylor Road. Thence following the centerline of Aylor Road southwest to the intersection with Caroline Avenue. Thence following the centerline of Caroline Avenue south to Fredericktowne Drive. Thence following the centerline of Fredericktowne Drive south to the intersection with Westmoreland Drive. Thence following the centerline of Westmoreland Drive east to the intersection with Churchill Drive. Thence following the centerline of Churchill Drive briefly to the intersection with Warrior Drive. Thence following the centerline of Warrior Drive north to the intersection with Tasker Road. Thence following the centerline of Tasker Road east to the intersection with White Oak Road. Thence following the centerline of White Oak Road south to the intersection with Route 277. Thence following the intersection with Route 277 east to the boundary between Frederick County and Clarke County, arriving at the starting point.
D. Red Bud Magisterial District. Beginning at the intersection of Senseny Road and the Interstate 81 southbound lanes and proceeding northeasterly along the Interstate 81 southbound lanes, and parallel to the boundary with the City of Winchester. Thence proceeding north to the intersection between Route 7 and the boundary of the City of Winchester. Thence proceeding east along the westbound lanes of Route 7 to the boundary between Frederick County and Clarke County. Thence following the boundary between Frederick County and Clarke County in a southerly direction, arriving at the intersection with Route 50. Thence following the Route 50 eastbound lanes northwest to the intersection with Airport Road. Thence following the centerline of Airport Road northwest to the intersection with Victory Road. Thence following the centerline of Victory Road north to the intersection with Route 50. Thence following the Route 50 eastbound lanes west to the intersection with Sulphur Spring Road. Thence following the centerline of Sulphur Spring Road east to the intersection with Greenwood Road.

Thence following the centerline of Greenwood Road north to the intersection with Senseny Road. Thence following Senseny Road west to the intersection with Interstate 81, arriving at the starting point.
E. Shawnee Magisterial District. Beginning at the border between Frederick County and Clarke County where it crosses Route 277, thence proceeding in a northwesterly direction along Route 277 to the intersection with White Oak Road. Thence following the centerline of White Oak Road north to the intersection with Tasker Road. Thence following the centerline of Tasker Road west to the intersection with Warrior Drive. Thence following the centerline of Warrior Drive south to Churchill Drive. Thence following the centerline of Churchill Drive briefly to the intersection with Westmoreland Drive. Thence following the centerline of Westmoreland Drive west to the intersection with Fredericktowne Drive. Thence following the centerline of Fredericktowne Drive north to the intersection with Caroline Avenue. Thence following the centerline of Caroline Avenue north to the intersection with Aylor Road. Thence following the centerline of Aylor Road northeast to the intersection with Tasker Road. Thence following the centerline of Tasker Road northwest until it crosses the path of Opequon Creek (watercourse). Thence following of Opequon Creek briefly to the west to the point where Interstate 81 crosses it. Thence following the Interstate 81 southbound lanes north, until intersecting Senseny Road. Thence following the centerline of Senseny Road east until it intersects Greenwood Road. Thence following the centerline of Greenwood Road south to the intersection with Sulphur Spring Road. Thence following the centerline of Sulphur Spring Road west until intersects Route 50. Thence following the Route 50 eastbound lanes east to the intersection with Victory Road. Thence following the centerline of Victory Road south to the intersection with Airport Road. Thence following the centerline of Airport Road southeast to the intersection Route 50. Thence following the Route 50 eastbound lanes southeast to the boundary between Frederick County and Clarke County. Thence following this boundary south until to where the boundary is crossed by Route 277, arriving at the starting point.
F. Stonewall Magisterial District. Beginning at the intersection of Route 7 where it meets the boundary of the City of Winchester, at the overpass crossing of Interstate 81. Thence proceeding in a roughly west-northwesterly direction, identical to the boundary of the City of Winchester and Frederick County, to where this boundary meets Route 37, southwest of the terminus of Margaret Lane. Thence following Route 37 north to its intersection with Route 11. Thence following the southbound lanes of Route 11 northeast until the intersection with Welltown Road. Thence following the centerline of Welltown Road north to the intersection with Rest Church Road. Thence following the centerline of Rest Church Road to the overpass crossing of the Interstate 81 southbound lanes. Turn following the Interstate 81 southbound lanes north-northeast until reaching the boundary between Frederick County and Berkeley County, West Virginia.

Thence following the boundary between Frederick County and Berkeley County, West Virginia southeast, until reaching the intersection between Berkeley County and Jefferson County in West Virginia, and Frederick County and Clarke County in Virginia. Thence following in a southerly direction along the boundary between Clarke County and Frederick County, along Opequon Creek, until the overpass where Route 7 crosses Opequon Creek. Thence following the westbound lanes of Route 7 west, to where Route 7 meets the boundary of the City of Winchester, arriving at the starting point.

## § 7-5 Election of Supervisors.

There shall be one Chairman elected at-large from all districts within the County, and one Supervisor shall be elected from each magisterial district created by this article.

## ARTICLE II Election Precincts

## § 7-6 Precincts created.

Pursuant to authority contained in the Code of Virginia (1950), as amended, §§ 24.2305 through 24.2-310.1, the precincts and their respective polling places for the County are hereby created and established as set forth in this article.

## § 7-7 Precincts and respective polling places enumerated.

The precincts for each magisterial district and the polling places for each precinct shall be as set forth below:
A. Back Creek Magisterial District

## Precinct <br> Polling Place

Cedar Creek
Gore
North Mountain Fire Hall
Kernstown
Middletown
Russells
Middletown Elementary School

Orchard View Elementary School
Middletown Elementary School
Round Hill Fire Event Center

## Polling Place

Stonewall Elementary School
Dowell J. Howard Center
Jordan Springs Elementary School
Redbud Run Elementary School
Apple Pie Ridge Elementary School

## § 7-8 Boundaries.

The boundaries of the respective precincts are as set forth below:

## A. Back Creek Magisterial District

(1) Cedar Creek Precinct. Beginning at the intersection of Middle Road and the boundary between Frederick County and Shenandoah County, proceeding northeast along the centerline of Middle Road until the intersection with Marlboro Road. Thence proceeding west along the centerline of Marlboro Road until arriving at the boundary of the Town of Stephens City. Thence following the boundary of the Town of Stephens City counterclockwise to where it intersects Family Drive. Thence following the centerline of Family Drive southeast until the intersection with Route 11. Thence following the centerline of Route 11 southwest until reaching the intersection with Salem Church Road. Thence follow the centerline of Salem Church Road southeast to the overpass crossing with Interstate 81. Thence following the Interstate 81 southbound lanes to the boundary between Frederick County and Warren County, but excluding the Town of Middletown, which constitutes a separate precinct. Thence following the boundary between Frederick County and Warren County to the point it meets Cedar Creek and the boundary between Frederick County and Shenandoah County. Thence following Cedar Creek and the boundary between Frederick County and Shenandoah County northwest to its intersection with Marlboro Road, arriving at the starting point.
(2) Gore Precinct. Beginning at the point where Mountain Falls Road meets Cedar Creek at the boundary between Frederick County and Shenandoah County, proceeding southwest along Cedar Creek and the boundary between Frederick County and Shenandoah County. Then departing Cedar Creek and continuing northwest along the boundary between Frederick County and Shenandoah County, until arriving at the boundary between Frederick County and Hardy County, West Virginia. Thence proceeding northeast to the start of the boundary shared between Frederick County and Hampshire County, West Virginia. Thence continuing broadly northeast, following the county boundary, until arriving where Back Creek Road crosses the county border. Thence following the centerline of Back Creek Road north-northeast to the intersection with Gore Road. Thence following the centerline of Gore Road northeast to the intersection with Route 50. Thence following the eastbound lanes of Route 50 east to the intersection with Back Mountain Road. Thence following the centerline of Back Mountain Road southwest, briefly joining Wardensville Grade heading southwest, and then following the centerline of Mountain Falls Road southeast to Cedar Creek and the boundary between Frederick County and Shenandoah County, arriving at the starting point.
(3) Kernstown Precinct. Beginning at the point where Marlboro Road departs the boundary of the Town of Stephens City, proceeding west along the centerline to the intersection with Middle Road. Thence following the centerline of Middle Road southwest to the intersection with Cedar Creek Grade. Thence following the centerline of Cedar Creek Grade north and then northeast to its intersection with the boundary of the City of Winchester. Thence following the boundary of the City of Winchester to the south until reaching Interstate 81. Thence following the southbound lanes of Interstate 81 to the south until reaching the northernmost boundary of the Town of Stephens City. Thence following the boundary of the Town of Stephens City to the west and south and east again to the point where it intersects Marlboro Road, arriving at the starting point.
(4) Middletown Precinct. The Middletown Precinct follows exactly the boundaries of the Town of Middletown.
(5) Russells Precinct. Beginning at the intersection of Middle Road and the boundary between Frederick County and Shenandoah County at Cedar Creek, following that boundary and Cedar Creek generally west to the point where Mountain Falls Road meets Cedar Creek at the boundary between Frederick County and Shenandoah County. Thence following the centerline of Mountain Falls Road northwest, briefly joining Wardensville Grade heading northeast, and then following the centerline of Back Mountain Road northeast to its intersection with Route 50. Thence following the eastbound lanes of Route 50 east to the boundary of the City of Winchester. Thence following the boundary of the City of Winchester south to its intersection with Cedar Greek Grade. Thence following the centerline of Cedar Creek Grade west and then south until it intersects with Middle Road, and thence along the centerline of Middle Road to the boundary between Frederick County and Shenandoah County, arriving at the starting point.
B. Gainesboro Magisterial District.
(1) Albin Precinct. Beginning the intersection of Apple Pie Ridge Road and Route 522, following the northbound lanes of Route 522 to the north to the point where Route 522 crosses Hogue Creek (a watercourse). Thence following Hogue Creek north to where Hogue Creek joins Back Creek. Thence following Back Creek north until reaching the boundary between Frederick County and Berkeley County, West Virginia, with any islands having no clear dominance by either bank therefore being within the Albin Precinct. Thence following the boundary between Frederick County and Berkeley County, West Virginia southeast to its intersection with Apple Pie Ridge Road. Thence following the centerline of Apple Pie Ridge Road south to its intersection with Route 522, arriving at the starting point.
(2) Gainesborough Precinct. Beginning at the point where Route 522 crosses Hogue Creek (a watercourse) and proceeding along the northbound lanes of Route 522 to the north, to its intersection with Bloomery Pike. Thence following the centerline of Bloomery Pike west to its intersection with the boundary between Frederick County and Hampshire County, West Virginia. Thence following the boundary of Frederick County and Hampshire County roughly west and then roughly north-northeast to the intersection of boundaries of Hampshire County, West Virginia and Morgan County, West Virginia with Frederick County. Thence following the boundary of Frederick County and Morgan County, West Virginia in a southeasterly direction until it meets Back Creek (a watercourse). Thence following Back Creek south to where Hogue Creek joins it, with any islands having no clear dominance by either bank therefore being within the Albin Precinct. Thence following Hogue Creek south to its crossing by Route 522, arriving at the starting point.
(3) Nain Precinct. Beginning the overpass where Route 37 crosses over Route 522, thence following Route 37 south to its intersection with Route 50. Thence following the eastbound lanes of Route 50 west to its intersection with North Hayfield Road/South Hayfield Road. Thence following the centerline of North Hayfield Road northeast to the intersection with Gainesboro Road. Thence following the centerline of Gainesboro Road east to its intersection with Route 522. Thence following the northbound lanes of Route 522 south to Route 37, arriving at the starting point.
(4) Redland Precinct. Beginning the intersection of North Hayfield Road/South Hayfield Road and Route 50 and thence following the eastbound lanes of Route 50 west to its intersection with Gore Road. Thence following the centerline of Gore Road southwest to its intersection with Back Creek Road. Thence following the centerline of Back Creek Road southsouthwest to the boundary between Frederick County and Hampshire County, West Virginia. Thence following the boundary of Frederick County and Hampshire County roughly west and then roughly north-northeast to the intersection with Bloomery Pike. Thence following the centerline of Bloomery Pike east to its intersection with Route 522. Thence following the northbound lanes of Route 522 south to its intersection with Gainesboro Road. Thence following the centerline of Gainesboro Road west until its intersection with North Hayfield Road. Thence following the centerline of North Hayfield Road southwest until reaching Route 50, arriving at the starting point.
(5) White Hall Precinct. Beginning at the point where Route 37 intersects Route 522, following the northbound lanes of Route 522 north to the
intersection with Apple Pie Ridge Road. Thence following the centerline of Apple Pie Ridge Road north to its intersection with the boundary between Frederick County and Berkeley County, West Virginia. Thence following the boundary of Frederick County and Berkeley County, West Virginia in a southeasterly direction to the intersection with the Interstate 81 southbound lanes. Thence following the southbound lanes of Interstate 81 south-southwest to the overpass crossing at Rest Church Road. Thence following along the centerline of Rest Church Road west and south to the intersection with Welltown Road. Thence following the centerline of Welltown Road south to the intersection with the southbound lanes of Route 11. Thence following the southbound lanes of Route 11 southwest until the intersection with Route 37, and then proceeding along Route 37 south to the crossing with Route 522, arriving at the starting point.

## C. Opequon Magisterial District.

(1) Aylor Precinct. Beginning at the intersection of Route 277 and Warrior Drive, following the centerline of Warrior Drive northeast to the intersection with Tasker Road. Thence following the centerline of Tasker Road east to the intersection with White Oak Road. Thence following the centerline of White Oak Road southwest to the intersection with Route 277. Thence following the centerline of Route 277 west to the intersection with Warrior Drive, arriving at the starting point.
(2) Bass-Hoover Precinct. Beginning at the intersection of Warrior Drive and Route 277, following the centerline of Route 277 west to the intersection with Interstate 81. Thence following the Interstate 81 southbound lanes north to the point where the interstate crosses Opequon Creek (watercourse). Thence following Opequon Creek briefly to the east, where it passes beneath Tasker Road. Thence following the centerline of Tasker Road southeast to the intersection with Aylor Road. Thence following the centerline of Aylor Road southwest to the intersection with Caroline Avenue. Thence following the centerline of Caroline Avenue to Fredericktowne Drive. Thence following the centerline of Fredericktowne Drive to the intersection with Westmoreland Drive. Thence following the centerline of Westmoreland Drive to the intersection with Churchill Drive. Thence following the centerline of Churchill Drive to the intersection with Warrior Drive. Thence following the centerline of Warrior Drive southwest to the intersection with Route 277, arriving at the starting point.
(3) Canterburg Precinct. Beginning at the point where Double Church Road intersects the boundary between Frederick County and Warren County, following the centerline of Double Church Road northwest to the intersection with Route 277. Thence following the centerline of Route 277 east until it crosses the boundary between Frederick County and Clarke

County. Thence following the boundary between Frederick County and Clarke County south-southwest, and then the boundary between Frederick County and Warren County, until turning west-southwest and following the boundary between Frederick County and Warren County to the intersection of Double Church Road, arriving at the starting point.
(4) Stephens City Precinct. The Newtown Precinct follows exactly the boundaries of the Town of Stephens City.
(5) Vaucluse Spring Precinct. Beginning at the point where Interstate 81 crosses the boundary between Frederick County and Warren County, following the southbound lanes of Interstate 81 south to the intersection with Salem Church Road. Thence following the centerline of Salem Church Road west to the intersection with Route 11. Thence following the centerline of Route 11 north to the intersection with Family Drive. Thence following the centerline of Family Drive northwest to where Family Drive meets the boundary of the Town of Stephens City. Thence following the boundary of the Town of Stephens City counterclockwise to the point where it meets Interstate 81. Thence following the Interstate 81 southbound lanes north to the intersection with Route 277. Thence following the centerline of Route 277 east to the intersection with Double Church Road. Thence following the centerline of Double Church Road southeast to the boundary between Frederick County and Warren County. Thence following the boundary between Frederick County and Warren County west-southwest to its intersection Interstate 81, arriving at the starting point.
D. Redbud Magisterial District.
(1) Ash Hollow Precinct. Beginning at the intersection of Senseny Road and Greenwood Road, following the centerline of Senseny Road west to its intersection with Interstate 81. Thence following the southbound lanes of Interstate 81 northeast to the intersection with Route 7 . Thence following the westbound lanes of Route 7 east to the intersection with Valley Mill Road. Thence following the centerline of Valley Mill Road southeast to the intersection with Greenwood Road. Thence following the centerline of Greenwood Road south-southwest to the intersection with Senseny Road, arriving at the starting point.
(2) Carpers Valley Precinct. Beginning at the intersection of Greenwood Road and Senseny Road, following the centerline of Senseny Road east until reaching the boundary between Frederick County and Clarke County. Thence following the boundary between Frederick County and Clarke County in a southerly direction, arriving at the intersection with Route 50. Thence following the Route 50 eastbound lanes northwest to the
intersection with Airport Road. Thence following the centerline of Airport Road northwest to the intersection with Victory Road. Thence following the centerline of Victory Road north to the intersection with Route 50. Thence following the Route 50 eastbound lanes west to the intersection with Sulphur Spring Road. Thence following the centerline of Sulphur Spring Road east to the intersection with Greenwood Road. Thence following the centerline of Greenwood Road north to the intersection with Senseny Road, arriving at the starting point.
(3) Greenwood Precinct. Beginning at the intersection of Senseny Road and Greenwood Road, following the centerline of Greenwood Road northnortheast until the intersection with Woodrow Road. Thence following the centerline of Woodrow Road southeast to its intersect with Charlton Road. Thence following the centerline of Charlton Road northeast to its intersection with Nassau Drive. Thence following the centerline of Nassau Drive southeast to its intersection with Channing Drive. Thence following the centerline of Channing Drive north to its intersection with Valley Mill Road. Thence following Valley Mill Road east to its intersection with Route 7. Thence following the westbound lanes of Route 7 east to its intersection with the boundary between Frederick County and Clarke County. Thence following the boundary between Frederick County and Clarke County in a southerly direction, arriving at the intersection with Senseny Road. Thence following the centerline of Senseny Road west to its intersection with Greenwood Road, arriving at the starting point.
(4) Millbrook Precinct. Beginning at the intersection of Valley Mill Road and Route 7, following the centerline of Valley Mill Road southwest to its intersection with Channing Drive. Thence following the centerline of Channing Drive south to its intersection with Nassau Drive. Thence following the centerline of Nassau Drive northwest to its intersection with Charlton Road. Thence following the centerline of Charlton Road southwest to its intersection with Woodrow Road. Thence following the centerline of Woodrow Road northwest to its intersection with Greenwood Road. Thence following the centerline of Greenwood Road north to its intersection with Valley Mill Road. Thence following the centerline of Valley Mill Road northwest to its intersection with Route 7. Thence following the westbound lanes of Route 7 east to its original intersection with Valley Mill Road, arriving at the starting point.
E. Shawnee Magisterial District.
(1) Armel Precinct. Beginning at the point where Route 277 intersects with the boundary between Frederick County and Clarke County, following west along the centerline of Route 277 to the intersection with White Oak Road. Thence following the centerline of White Oak Road northeast to its
intersection with Tasker Road. Thence following the centerline of Tasker Road west to its intersection with Warrior Drive. Thence following the centerline of Warrior Drive northeast to its intersection with Talamore Drive. Thence following the centerline of Talamore Drive east until it crosses the gully of the unnamed watercourse that runs roughly parallel to Auburn Hill Court, and which is ultimately a tributary of Opequon Creek (watercourse). Thence following said watercourse northeast to where Route 522 crosses it. Thence following along the southbound lanes of Route 522 north to the intersection with West Parkins Mill Road. Thence following the centerline of West Parkins Mill Road east to its intersection with Route 50 . Thence following the eastbound lanes of Route 50 east until arriving at the boundary between Frederick County and Clarke County. Thence following the boundary between Frederick County and Clarke County south to its intersection with Route 277, arriving at the starting point.
(2) Parkins Mill Precinct. Beginning at the intersection of Aylor Road and Tasker Road, following Tasker Road northwest, to the place where Opequon Creek (watercourse) crosses beneath Tasker Road. Thence following Opequon Creek west to the place where it passes beneath Interstate 81. Thence following the Interstate 81 southbound lanes north, until intersecting with Route 50 . Thence following the Route 50 eastbound lanes east to the intersection with Route 522. Thence following the southbound lanes of Route 522 southeast, to the point where Route 522 crosses the gully of the unnamed tributary watercourse that joins Opequon Creek. Thence following said watercourse southwest, continuing along the more northerly of the two paths where the tributary forks, until meeting Lakeside Drive. Thence following the centerline of Lakeside Drive southwest to the intersection with Oak Ridge Drive. Thence following the centerline of Oak Ridge Drive to the intersection with Tasker Road and Aylor Road. arriving at the starting point.
(3) Shenandoah Precinct. Beginning at the intersection of West Parkins Mill Road and Route 522, thence following the southbound lanes of Route 522 north to the intersection with Route 50. Thence following the Route 50 eastbound lanes west to the intersection with Interstate 81. Thence following the Interstate 81 southbound lanes north to its intersection with Senseny Road. Thence following the centerline of Senseny Road east to its intersection with Greenwood Road. Thence following the centerline of Greenwood Road south to the intersection with Sulphur Spring Road. Thence following the centerline of Sulphur Spring Road west to the intersection with Route 50. Thence following the eastbound lanes of Route 50 east to the intersection with Victory Road. Thence following the centerline of Victory Road south to the intersection with Airport Road.

Thence following the centerline of Airport Road southeast to the intersection with Route 50. Thence following the eastbound lanes of Route 50 southeast to its intersection with West Parkins Mill Road. Thence following the centerline of West Parkins Mill Road to its intersection with Route 522, arriving at the starting point.
(4) White Oak School Precinct. Beginning at the intersection of Warrior Drive and Talamore Drive, following the centerline of Warrior Drive southwest to its intersection with Churchill Drive. Thence following the centerline of Churchill Drive briefly to the intersection with Westmoreland Drive. Thence following the centerline of Westmoreland Drive west to the intersection with Fredericktowne Drive. Thence following the centerline of Fredericktowne Drive north to the intersection with Caroline Avenue. Thence following the centerline of Caroline Avenue north to the intersection with Aylor Road. Thence following the centerline of Aylor Road northeast through the intersection with Tasker Road, continuing as Aylor Road becomes Oak Ridge Drive, to the intersection with Lakeside Drive. Thence following the centerline of Lakeside Drive northeast until it meets the gully of an unnamed watercourse that is ultimately a tributary of Opequon Creek. Thence following said watercourse northeast to where it is joined from the south by a second unnamed tributary, and then following that second unnamed tributary southwest until it reaches Talamore Drive. Thence along the centerline of Talamore Drive west to its intersection with Warrior Drive, arriving at the starting point.
F. Stonewall Magisterial District.
(1) Clear Brook Precinct. Beginning at the intersection of Welltown Road and Route 11, following the centerline of Welltown Road north to the intersection with Rest Church Road. Thence following the centerline of Rest Church Road north and east to its intersection with Interstate 81. Thence following the southbound lanes Interstate 81 north to the intersection with the boundary between Frederick County and Berkeley County, West Virginia. Thence following the boundary between Frederick County and Berkeley County, West Virginia southeast, until reaching the intersection between Berkeley County and Jefferson County in West Virginia, and Frederick County and Clarke County in Virginia. Thence following in a southerly direction along the boundary between Clarke County and Frederick County, along Opequon Creek, following the boundary of Clarke County, to the point where High Banks Road abuts the banks of Opequon Creek. Thence following the centerline of High Banks Road northwest to its intersection with Jordan Springs Road. Thence following the centerline of Jordan Springs Road north and northwest to its intersection with Old Charles Town Road. Thence following the centerline
of Old Charles Town Road west to its intersection with Route 11. Thence following the centerline of Route 11 southwest to its intersection with Welltown Road, arriving at the starting point.
(2) Gibson School Precinct. Beginning at the intersection of Route 11 and the boundary of the City of Winchester, following the centerline of Route 11 north-northeast to the point that Route 37 joins Route 11, and continuing to follow the centerline of Route 11 north-northeast to its intersection with Interstate 81. Thence following the southbound lanes of Interstate 81 south to the intersection with Route 7 and the boundary with the City of Winchester. Thence following the boundary of the City of Winchester west-northwest to its intersection with Route 11, arriving at the starting point.
(3) Jordan Springs Precinct. Beginning at the intersection of Morgan Mill Road and Route 7, following the centerline of Morgan Mill Road north to its intersection with Redbud Road. Thence following the centerline of Redbud Road northwest to its intersection with Milburn Road. Thence following the centerline of Milburn Road north to its intersection with Old Charles Town Road. Thence following the centerline of Old Charles Town Road east, and then continuing onto Jordan Springs Road and following the centerline southwest and west to its intersection with High Banks Road. Thence following the centerline of High Banks Road southeast, to the point where it abuts the banks of Opequon Creek and the boundary between Frederick County and Clarke County. Thence following Opequon Creek and the boundary with Clarke County south to the intersection with Route 7. Thence following the westbound lanes of Route 7 to the intersection with Morgan Mill Road, arriving at the starting point.
(4) Neff's Town Precinct. Beginning at the intersection of Interstate 81 and Route 7, following the southbound lanes of Interstate 81 north to the overpass crossing above Route 11. Thence following the centerline of Route 11 northeast to its intersection with Old Charles Town Road. Thence following the centerline of Old Charles Town Road east to its intersection with Milburn Road. Thence along the centerline of Milburn Road south to its intersection with Redbud Road. Thence following the centerline of Redbud Road southeast to its intersection with Morgan Mill Road. Thence following the centerline of Morgan Mill Road south to its intersection with Route 7. Thence following the westbound lanes of Route 7 to the intersection with Interstate 81, arriving at the starting point.
(5) Sunnyside Precinct. Beginning at the point where Route 11 meets the boundary of the City of Winchester and following west along the boundary with the City of Winchester until arriving at the point at which it abuts Route 37. Thence crossing Route 37 and following north along
southbound lanes of Route 37 to the point at which Route 37 joins Route 11. Thence following the centerline of Route 11 south to the point at which it meets the boundary with the City of Winchester, arriving at the starting point.

## § 7-9 Changes in precinct or polling place.

The Secretary of the Electoral Board shall notify by mail, no later than 15 days prior to the next general, special, or primary election, all registered voters whose precinct or polling place has been changed by the provisions of this article.

Dear Clerk of the Supreme Court of VA Muriel-Theresa Pitney,
I am submitting this written comment in regards to the redistricting process currently underway. Please make all districts consistent with present geographical and governmental boundaries such as counties and neighborhoods. Our present state and federal districts are discontinuous. Our local civic league area is composed of two separate Va delegate districts!

Sincerely,
Robert Tuleya

Good morning --
The Virginia Coalition for Open Government - a non-partisan, nonprofit alliance that works to forward the public's right to know - writes to urge the Supreme Court of Virginia to immediately provide a modernized document management system for receiving and cataloguing public comment on the redistricting process to replace the current sporadically updated single PDF document now in use.

Many models for providing indexed, automatically updated document repositories already exist: From free or low-cost services like shared a folder on Google Drive, Dropbox, Sync, Evernote, Scribd, and others, to more sophisticated applications like those already in use by Virginia's Regulatory Town Hall.

These systems and others like them provide an easy-to-follow timeline of who has submitted comments and when, making it much more useful to citizens to zero in on comments of importance to them, without the endless scrolling of the current single-PDF system.

Further, the current approach being employed on the Supreme Court's website is one that must be manually updated, and -- based at least on today's schedule -- not on a consistent or timely basis. As of today, Nov. 24 at 11 a.m., 25 hours have passed since the last update (Nov. 24 at 10 a.m.), leaving the public to wonder whether anyone has submitted comments at all, much less knowing whether a response to those comments is warranted.

This is unchartered territory, and it is understandable that some things must be created and tweaked on the fly. This happened when the pandemic began and the Virginia Department of Health had to continually adapted its system to provide as much timely information as it could and to be responsive to the public's requests for additional information and/or different ways of presenting it.

The redistricting process has a finite window in which to operate. There is no time to waste. It is imperative that the public and the press has up-to-date and easily parsed information about who has submitted comments and when.

There is intense public interest in the process. Please dedicate time and resources immediately to ensure easy access to maximize transparency during that process.

Very truly yours, Megan Rhyne

# THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON 

 ANY LINKS OR DOWNLOADING ANY ATTACHMENTSThe following comment is submitted pursuant to the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A with respect to the redistricting of the Virginia General Assembly.

Introduction:
This note is to assist the map drafters retained by the Court to understand one important limitation of the political data, i.e., election results, produced by the Virginia Department of Legislative Services (DLS).
Presumably, DLS will be developing these datasets, as I believe they did for the recent commission process.
It was during the commission process, where I assisted the Republican line drawer and counsel in running statistical reports, that this shortcoming of the results was noted. These election results had a problem: they did not include all votes cast as they were frequently, and inconsistently, missing centrally reported absentee, and/or early-in-person votes.
While several states have, throughout the previous decade, redirected such non-precinct votes to the registration precinct for tabulation, Virginia is not one of these states, at least not for statewide offices.

## Discussion:

The lack of absentee votes was a relatively minor issue for some elections during the commission process because the number of such votes was not a very large percentage of the overall vote for the state.
For example, for both the 2013 and 2017 races for Governor, such non-precinct votes were less than $10 \%$ of the statewide vote.

However, for the recent 2021 election these non-precinct votes were more than a third (36.4\%) of all votes cast.

Moreover, the partisan break of these non-precinct votes differs substantially from the break of votes cast at the polls.
Reviewing the data released by the Virginia Department of State (DOS) following the November 15 certification results in the following summary.

The partisan break for all votes cast for Governor was 48.6 \%Dem to 50.5 \%Rep (as a percentage of all votes).
For the poll vote, the break was 42.4 \%Dem to 56.7 \%Rep;
for the non-precinct vote, the break was 59.4 \%Dem to 39.8 \%Rep.
Clearly, ignoring these non-precinct votes may skew the results for any review of partisan indicators for any proposed plans.

Alternative Data:
A related problem is that the data provided by the Department of State, albeit the official certified data, does not, apparently, include the best available data. A recent news item (see https://www.vpap.org/visuals/visual/fairfax-county-results-legislative-district/ ) indicates that Fairfax County did redirect votes to registration precincts. Alas, the data for Fairfax County provided by the Department of State does not.
For example, the VPAP.org website indicates that Fairfax County's vote system has the votes for Governor in House of Delegates district 35 as:
McAuliffe: (Democrat) 23,791, 67.3\%;
Youngkin: (Republican) 11,350, 32.1\%;
Blanding: (Liberation Party) 176, 0.5\%; a total of 35,317 votes,

Yet, the votes, as tabulated for this district in the DOS file, are
McAuliffe: (Democrat) 12,121, 60.5\%,
Youngkin: (Republican) 7,776, 39.8\%,
Blanding: (Liberation Party) 136, 0.6\%, a total of 20,033 votes.

The unaccounted for 15,284 votes are commingled with other non-precinct votes for the county.
(See
https://results.elections.virginia.gov/vaelections/2021\ November\ General/Site/Statewi de.html ).

Summary:
Stakeholders interested in this process will likely devise their own means by which they can incorporate these absentee votes into their own analysis; something that time did not allow during the fast-paced commission process. It is unclear exactly how much time is to be allocated to the court's experts to work on these plans but, because rectifying this situation with respect to these missing votes will take some time, it seemed important to simply alert the court and their experts as they sift through the numerous tasks before them.

Sincerely,
Clark Bensen, Polidata LLC

I am writing you on behalf of myself and 10 other Fredericksburg residents (named below) to repeat the comments which we offered on July 27, 2021, to the Redistricting Commission. We urge the Court to make the City of Fredericksburg one voting district for the Virginia House of Delegates, the Virginia Senate and the U.S. House of Representatives.

Fredericksburg is a distinct community of interest. Here are elements that make it so:

- We are a relatively small city, and our City government is not remote from us. There is a shared civic culture.
- We have our river and our riverfront, shared by all. We take pride in, and work to preserve, our distinctive environment..
- We have our university, and there is a real sense of shared community between the University of Mary Washington and the City.
- We have our shared history. Not everyone agrees on how to interpret that history, but it's a presence in our lives today--as an attraction for business and tourism, a source of interest and learning, and of scenery and recreational opportunities.

This small community of interest should not be split between districts. Please keep the City of Fredericksburg intact as you establish the new voting district boundaries. Thank you for your essential service.

From the following residents of the City of Fredericksburg: Rebecca Hanmer, 138 Caroline Street; Frank and Maureen Widic, 119 Caroline Street; Paula Chow and Ed Sandtner, 132 Caroline Street; Constance Smith, 143 Longstreet Avenue; Katherine Pecka, 227 Charles Street; Anne and Carl Little, 726 William Street; Ann and Steve Jurczyk, 1434 Buckner Street

To whom it may concern,
I understand a proposal is being floated to redistrict placing Williamsburg and the historic district with the Eastern Shore and Virginia Beach. Doing so is a flagrant attempt to change the representation of those areas (in which I live).
Anyone looking at a map would easily conclude that combining those geographic areas makes no sense, unless there is an underlying political move that is working towards undermining the will of the voters in those areas.
I most strongly reject this attempt and hope we can hold those who are propagating it accountable.

I urge the Special Masters to restore Lynchburg to the single legislative districts in which it was found before 2011. Our city is a single community of interest, but it is currently split between two House of Delegates districts and two Senate districts. Because of the unusual way that Virginia allows totally separate jurisdictions for independent cities and the counties that surround them, the interests and concerns of Lynchburg and its contiguous counties diverge more often than they align.

The argument is sometimes made that having four legislators in Richmond and not just two gives Lynchburg extra clout. That doesn't really hold up when you look at the numbers. In House District 22 for example, Lynchburg citizens comprise roughly a quarter of the district's total population. In a House district that included all of Lynchburg, our citizens would make up nearly all of that district's constituents. The elected representative would of necessity represent those constituents more strongly.

Senate districts are of course larger. But in Senate District 23, Lynchburg represents less than a fifth of the total population. Putting our city in a single district would bump that figure up to more than 35\%--again, increasing our influence and more closely reflecting our interests in Richmond.

The current map is a historical anomaly. I ask that you restore Lynchburg as a single community of interest.

ATTN: Clerk of the Supreme Court of Virginia
Per the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A, I would like to submit a comment regarding Virginia's redistricting.

This comment is in regard to the interpretation of Code of Virginia, § 24.2-304.04. Standards and criteria for congressional and state legislative districts, paragraph 7: "A map of districts shall not, when considered on a statewide basis, unduly favor or disfavor any political party." I would like to offer an interpretation, based on the work done by the Duke Quantifying Gerrymandering Project: https://sites. duke.edu/quantifyinggerrymandering/. 1. The districts of every redistricting map should be responsive in that, as the proportion of votes received by one party increases, its number of seats increases. 2. There should be no firewall, a supermajority share of the vote such that only when a minority party that receives this vote does it receive a majority of seats of the body for which the map has been created.

I further suggest that that any proposed reapportionment's districts' partisanship be compared to those of an ensemble of maps created to satisfy the criteria of Code of Virginia, § 24.2-304.04. The above mentioned Quantifying Gerrymandering site has several examples of how this can be done.

Respectfully Yours, Charles Coleman 5811 Governors View Ln. Alexandria, VA 22310

Ms. Muriel Theresa Pitney, Clerk of Court<br>Supreme Court of Virginia<br>100 North Ninth Street<br>Richmond, Virginia 23219

via email

Dear Ms. Pitney:
I am writing to comment on Virginia redistricting in accordance with the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia. My comment is as follows:

According to the Virginia Code, "Districts shall be drawn to preserve communities of interest." I live in an area with rural zoning. While I do not live on a farm, there is one just up the road, and there is a vineyard just beyond that. To lump my area in with the Charlottesville urban ring is just wrong and is inconsistent with the statute I quoted.

Thank you for considering my comment.
Sincerely,

Thomas M. Strassburg

To the Supreme Court of Virginia:
I am a resident of Mecklenburg County and I write to request that the Supreme Court decline to approve any final map that splits our county. Mecklenburg is not an exceptionally populous county like Fairfax or other places in Northern Virginia, so there is no rational reason it should need to be divided. It could easily be included in a single district, and I would have serious questions about the rationale if it is not.

Good Evening,

As a longtime resident of the Commonwealth of Virginia and as a thirty-year veteran of the United States Navy I would like to offer my input concerning the prposed reallocation prisoners to their last-known address for redistricting. From my perspective this does not make fiscal sense nor is in keeping with the spirit or intent of a representative democracy envisioned by our Founding Fathers .

Nevada is one of eleven states that reallocates inmates to their preprison addresses during redistricting. State law requires prison officials "compile the last known residential address of each offender immediately before the offender was sentenced" and send the information to the state demographer -- the process has proven to be cumbersome and ineffective. It simply does not work.

For the duration of their confinement these individuals that are incarcerated they are physically present in a different community than their last know address and thus the people who live in that community support the institution in which they are housed through both property and sales taxes. Those districts where prisons are located would receive less aid from the state if this change would take effect.

I highly recommend that this change not be implemented in our fair state.

Best Regards,

J ames R Poplar III

Dear Dr. Grofman and Mr. Trende, Special Masters for VA Redistricting,

I am an 18-year resident of the City of Lynchburg and I urge you to please do the following as you re-draw Virginia's state House, Senate, and Congressional House districts:

1) Please carefully review and consider the written and verbal citizen input the VA Redistricting Commission has received since last July through emails, letters, and public hearings. This feedback from Virginia residents should inform ALL your decisions on maps.
2) I trust that you will do \#1 above thoroughly and therefore, I will not restate the details of my prior feedback to the commission here. However I will reiterate the gist of my prior feedback: I implore you to please keep the City of Lynchburg, with a population size of about 80,000, residents, as ONE COMMUNITY OF INTEREST as your draw all our maps.
3) Simply put, for all practical purposes, the City of Lynchburg is a small urban city with urban needs and urban issues, and it must be represented by legislators who understand and want to serve this urban profile of strengths and challenges, and Lynchburg's unique set of social, cultural and economic interests. For this reason, please keep Lynchburg WHOLE within ONE state House district and ONE state Senate district.
4) Given the size of our city and its population profile, I also urge you to please keep Lynchburg intact within ONE Congressional House district. (The last iteration of Congressional House maps from the Redistricting
commission released in October had most of Lynchburg with the $6{ }^{\text {th }}$ Congressional House district, and a small sliver of two precincts, mainly a predominantly African-American area, appended on to the $5^{\text {th }}$ Congressional House district. Please know that this racial gerrymander will NOT do!).

Thank you for keeping Lynchburg intact as the one community of interest that we are in ALL maps.

Sincerely,

Niro Rasanayagam
Lynchburg, VA

November 28, 2021
Dear Clerk of the Supreme Court of Virginia:
Per the Rules and Procedures for Implementing the Requirements Article II, Section 6-A I am submitting this letter.

Thank you to the Justices of the Supreme Court of Virginia for insisting on appropriate people to act as special masters in the redistricting process.

I supported the legislation and Constitutional amendment that established the current re-districting process and was proud that Virginians voted for a fair process that avoided gerrymandered districts. The abject failure of the Virginia Redistricting Commission was a betrayal of Virginia's residents. I respectfully urge the Supreme Court to continue its work in the same fair manner it has shown with selection of the special masters as spelled out in the law.
With respect to Powhatan County, where I reside, some of the draft maps have, I believe erroneously, included Powhatan in districts that border North Carolina and include only counties that are nearly totally rural. While Powhatan is rural, it is not strictly so and, along with Goochland County, is contiguous to Richmond suburbs and shares important economic and transportation interests. While Powhatan residents support our county's businesses, many people travel east to work, dine and recreate; not many travel south.

Respectfully,
Eileen Barthelmy

To Whom It May Concern,

My name is Chris Magnus. I am a resident of Albemarle County, Virginia. Pursuant to Rule 4 under the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, I am submitting my comments to you regarding redistricting. House of Delegates Map: Please keep Albemarle County as unified as possible to maintain our community of interest and allow us to live in fair, compact House of Delegates Districts. Specifically, please include us in only 2 House Districts. One District should be Charlottesville and some portion of Albemarle. The second District should be the rest of Albemarle and our neighbor to the south, Nelson County, with whom we share a community of interest. This would be a fair treatment of our county.
Unfortunately, for the past decade the people of Albemarle County have been fractured across 4 House Districts. This divides neighborhoods, separates families and friends, sows confusion among residents, breeds apathy, dilutes our ability to participate in the political process, and muzzles the voices of the people in state-level government. You can keep Albemarle County in 2 Districts in the way I have described above by doing something the Redistricting Commission was not able to do: compromise. Specifically, a compromise between proposed maps A7 and B6 offers a path forward for a fair treatment of Albemarle County. One negative aspect of Map A7 is that it slices Albemarle into 3 Districts. This would lead to the same negative results that we experience under the current map. That is simply not acceptable. In contrast, Map B6 keeps Albemarle in 2 compact Districts, thereby maintaining our community of interest. This is much better for the people here. However, Map B6 draws Albemarle County in with a piece of Augusta County. GOP Commissioners specifically objected to this proposal because there are mountains between Augusta and Albemarle. To address that concern directly, we can look to Map A7, which combines Nelson County with Albemarle County. This solution has the benefit that Nelson County has roughly the same population as the portion of Augusta County included with Albemarle under Map B6. Thus, it should be a relatively easy fix in terms of map drawing. In sum, dividing Albemarle County into any more than 2 Districts would be a betrayal of the people here. Please draw a fair map for our area by keeping us into the 2 Districts I have described.
Congressional Map: With regard to the Congressional Map, our area is currently in the heavily gerrymandered, non-compact 5th District. The Congressional maps proposed by the GOP members of the Redistricting Commission were unfortunately egregious partisan
gerrymanders. Please proceed in good faith in ensuring that we have an opportunity to choose our Representative in a compact, fairly-drawn District that maintains communities of interest and rejects bad faith partisan efforts to gerrymander us for another decade.

Thank you.

Christopher Magnus

November 29, 2021

Dear Special Masters Grofman and Trende:

I submit this letter on behalf of the Sikh American Legal Defense and Education Fund (SALDEF). We thank you for the opportunity to provide comments on the issues that you should take into consideration as you complete the task for which you have been appointed. Specifically, we share our concern about the way the maps could impact AAPIs, other communities of color, immigrant communities, and other communities of interest. Any maps you submit to the Supreme Court of Virginia should not sacrifice the integrity of communities of interest, as defined by identical bills SB717/HB1255 passed into Virginia law in 2020 as well as the federal Voting Rights Act, in favor of compactness or other political consideration.

SALDEF is a national Sikh American media, policy, and education organization based in Washington, DC. Founded in 1996, SALDEF's mission is to empower Sikh Americans by building dialogue, deepening understanding, promoting civic and political participation, and upholding social justice and religious freedom for all Americans.

Given our longstanding presence in the DC/Maryland/Virginia area, and deep relationships with our fellow local advocacy organizations, SALDEF is strongly positioned to advocate for South Asian and broader AAPI communities of interest in Virginia in the redistricting process. In fact, it is on those terms that we engaged with a coalition of advocacy
organizations and constituents across Virginia to produce a unity map, submitted by the Virginia Counts Coalition for your consideration. It is our hope that you draw insights from the coalition's work and outreach into diverse communities to prevent the dilution of and division of communities of interest in Virginia, thereby undoing much of the progress those communities have made since the most recent redistricting process in 2011.

## Asian Americans and Pacific Islanders in Virginia

Per the 2020 U.S. Census, seven percent of all Virginia residents identify as AAPI, with heavy concentration in northeast Virginia. ${ }^{1}$ The population of NoVA continues to grow much faster than the population of the rest of the commonwealth, and AAPI residents are a key pillar in that trend. ${ }^{2}$ Three counties have AAPI populations of at least ten percent. Fairfax and Loudoun counties exceed 20\% AAPI. Arlington is around 11\% AAPI; between the 2010 and 2020 Censuses, self-identifying Asians were the largest growing group in Arlington County. ${ }^{3}$ Prince William and Henrico counties both have AAPI populations around $9 \%$ of their total population. Montgomery, York, and Albemarle counties have at least 5\% AAPI residents. Among independent cities, very high concentrations of AAPI residents occur in Fairfax (17\%), Manassas Park (10.8\%), and Falls Church (10.1\%). These localities are areas of focus for SALDEF's activities in Virginia, not just because they are among the largest in the state. These counties tend to elect the representatives who have begun to create an AAPI imprint in the Virginia Assembly - including the very recently formed Asian American and Pacific Islander

[^17]Caucus. Empowering these representatives is critical to the elusive dream of moving Asian Americans in Virginia beyond the 'underrepresented' label.

Proportional representation has never been attained by Asian Americans and Pacific Islanders in Virginia. Per our partners at APIAVote, Asian American voters now constitute 7.8\% of the Virginian electorate. ${ }^{4}$ For truly proportional representation, approximately 11 members of the General Assembly should identify as AAPI across the two houses. Today, the number stands at less than half of that. This state of play persists despite the $112 \%$ growth rate the AAPI community has posted in Virginia since 2000, and is a persistent area of concern for SALDEF and for our AAPI partners.

Compounding the lack of representation is the lack of language access for AAPI Virginian voters: per APIAVote, $76 \%$ of Asian Americans in Virginia speak a language other than English at home, and $38 \%$ of that group speak English less than "very well." SALDEF is one of many signatories to a separate letter to the Supreme Court of Virginia's public comment address highlighting the English-only redistricting website, lack of interpretation services for languages beyond Spanish, and systemic minimization of the testimony of Virginians using translators. These problems are not new for the AAPI community, and it is disappointing that we continue to be overlooked.

The phenomenon of AAPI voters being ignored despite their increasing electoral influence extends beyond language access services and includes the national political apparatus, both parties and media. The AAPI vote surged across the country in 2020, with a $47 \%$ increase in voting among our communities from 2016 compared to an overall average increase of just $12 \%$, per Targetsmart. ${ }^{5}$ This spike in engagement came despite more than half of AAPI registered voters in Virginia reporting little to no engagement from either political party in APIAVote's 2018 Asian American Voter Survey. This pattern repeated itself in the 2021

[^18]Virginia gubernatorial race: major polls by respected outlets like the Washington Post grouped all data on AAPI voters into 'other'. ${ }^{6}$ It would be problematic to simply group South, East, and Southeast Asian voters into one AAPI group, but that state of play would actually represent a major improvement over how AAPI voters are treated in the present day by political and media stakeholders across the political spectrum. Given the historical barriers outlined here, which themselves represent the very tip of an iceberg of erasure, SALDEF places even greater importance on a fair and transparent redistricting process that protects and promotes the communities of interest that define the country's fastest growing ethnic voting bloc, and indeed all other communities of interest in Virginia.

## Principles That Should Guide the Process

Per the Princeton Gerrymandering Project, redistricting in Virginia must be conducted in accordance with the federal requirements of one person, one vote, and it must be compliant with the Voting Rights Act. ${ }^{7}$ In addition, Article II section 6 of Virginia's state constitution requires that state legislative and congressional districts be compact and contiguous. Furthermore, the two houses of the Virginia Legislature passed two bills (SB717 ${ }^{8}$ and $\mathrm{HB} 1255^{9}$ ) into law in 2020 that include state-level Voting Rights Act language, protections for communities of interest, and an explicit prohibition on partisan gerrymandering when considering a map on a state-wide basis as you are doing. Finally, the two bills end prison gerrymandering in Virginia by requiring prisoners be counted at their last-known residence and not their location of incarceration.

From the perspective of the Virginian AAPI community, the most critical aspects of the redistricting mandate revolve around the preservation of communities of interest. In Article II, Section 6 of the Constitution of Virginia, this is articulated: "Districts shall provide, where

SALDEF 5
November 8, 2021
practicable, opportunities for racial and ethnic communities to elect candidates of their choice."10 The Virginia code expands further: section 24.2-304.04(3) states that "no district shall be drawn that results in a denial or abridgement of the rights of any racial or language minority group to participate in the political process. ${ }^{11}$ Unfortunately, our analysis of most of the proposed maps considered by the Commission before its final concession of failure suggests the current redistricting process is poised to achieve the opposite of many of these mandates.

## Concerns with Maps Being Considered

It is indisputable that as NoVA's population grows, powered by communities like ours, southwest Virginia's population continues to shrink, particularly west of Montgomery County. ${ }^{12}$ The present-day Virginia district map is imperfect, but does respect the differences inherent to the different regions of the commonwealth. In a fair and data-driven redistricting process that prioritizes communities of interest, we should therefore see maps that acknowledge and accommodate the vast differences between east and west Virginia in carving new districts that have similarly sized populations as the districts in the existing map.

We instead saw deliberate contortion of the redistricting mandates in order to artificially preserve parity between the two political parties' voting bases, in brazen defiance of the shifting demographics of Virginia. ${ }^{13}$ Article II of the Virginia state constitution states that each electoral district shall be composed of contiguous and compact territory. However, in many of the maps over which the Commission deadlocked before sending control of the redistricting process to the Supreme Court of Virginia, the notion of compactness was used to reorient many districts from primarily north-south orientation to east-west orientation. As outlined earlier, an east-west

[^19]SALDEF 6
November 8, 2021
orientation in new districts allows for the dilution and cracking of AAPI communities' vote by mixing them with regions of Virginia that are vastly different ethnically and economically. Urban areas like greater Richmond and Falls Church must be kept intact and drawn into districts that are culturally similar, but several late-stage proposals by the Republican half of the Commission pointedly carved these regions into multiple districts and diluted AAPI voting power in each by mixing in heavily rural, heavily white areas of Virginia. These districts maintained the appearance of compactness but with a fundamental shift away from Virginia's redistricting mandate to draw each district "in accordance with the requirements of federal and state laws that address racial and ethnic fairness" in Article II, Section 6 of the Constitution. To shift the electoral map of Virginia in this fashion is to effectively punish AAPI voters for their increased civic engagement. SALDEF considers this outcome to be unacceptable. However, while the Commission attempted to conduct its work, we aligned ourselves with a coalition that seeks the same thing we do: fair representation for all Virginians.

## Recommendations

We encourage you, the Special Masters, to preserve the current north-south orientation of the present-day electoral maps in Virginia in all maps produced based on the 2020 U.S. Census. As the eastern and western halves of Virginia continue to diverge in their development and demographics, the importance of allowing those communities to vote alongside people like them only gains more weight. It is our hope that you draw on the work of the Virginia Counts Coalition to honor your mandates while preserving AAPI voting power. The VCC unity map incorporates input from SALDEF, other AAPI advocacy organizations, Latinx advocacy organizations, and Black American advocacy organizations, as well as legal and academic support. The unity maps produced by the coalition play by the same rules as the Commission and now the Supreme Court. Districts are compact, contiguous, and compliant with both population size requirements and federal and state statutes mandating fairness and
preservation of communities of interest. Communities of interest have weighed in directly, and the result is a map where districts are based on accurate racial/ethnic delineations, language enclaves, and locality lines. VCC's Congressional districts unity map is available here.

It is SALDEF's hope that the VCC unity map is carefully considered. Virginia has changed enormously in the past ten years. The new electoral maps must fairly and accurately reflect those changes.

Thank you for your attention to this matter and your consideration of AAPI voting power as you draw new district lines that will impact Virginian civics for a decade. Should you have any further questions please feel free to contact me at kiran@saldef.org, or my colleagues Navdeep Singh at navdeep.singh@saldef.org and Jyot Singh at jyot.singh@saldef.org.

Sincerely,

Kiran Kaur Gill
Executive Director

Dear Chief Justice Donald Lemons,

I am writing to you to express concerns over minority representation on Virginia's potential new maps.

I am aware of discussions about redrawing districts to reduce the minority voting population below $50 \%$, assuming that this would result in more "opportunity districts" for minority voters.

I question whether that is true - look at how many minority delegates lost in the most recent election in these "opportunity districts" drawn by the Democrat's special master a few years ago.

I would feel more certain about the future of all voters' representation in Virginia if we preserved districts where minority voters constitute a majority of the population (and maybe even create more).

Thank you for your time and consideration.

Best regards,

Carey Allen

While reading about your involvement in redistricting, it seems odd that the court would become involved in a political matter. Many democrat legislators are trying to create a problem where there is none.
Are people actually arguing that black interests will be better represented if black voters are redistributed into majority-white districts? Seems to me that this would only make it harder for black voters to elect the representatives that they want. I look at how many black areas of Southside and Hampton Roads are now represented by Republican delegates and I just wonder how anyone could come to that conclusion.

Thank you!

Special Masters,
Thank you for taking on the task of drawing legislative maps for the Commonwealth of Virginia.

As you know, the Virginia Code requires that state senate and house maps be approximately equal in population, compact, contiguous, and respect communities of interest.

The City of Lynchburg is a community of interest with one governing body that provides ALL residents with EMS, fire, police, water/sewage, and trash collection services, public schools, and public recreation facilities and community centers. City Councilors, representatives to the General Assembly, and the voting public alike have publicly stated that the City and its residents will be best served if it is represented in the G.A. by a single delegate and single senator. To excise a few census tracts and add them to an adjacent county which does NOT offer the above listed services to Lynchburg residents will not serve those residents well and, further more, will dilute their voices in the G.A.

Respectfully, Carla W. Heath 339 Sumpter ST Lynchburg,

Muriel-Theresa Pitney, Clerk of the Virginia Supreme Court
Dear Ms. Pitney:
In accordance with Rule 4 (included below) of the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, I submit the following comments to the court regarding the House of Delegates map.

Rule 4. Public Participation. (a) Comments - The public may participate in the Court's redistricting deliberations through the submission of written comments. Any such comments must be provided in the form of a letter addressed to the Clerk of the Supreme Court of Virginia and referencing these rules and procedures.

I made the following remarks on House of Delegates (HOD) map B6 (plan 186 in the link above above) during the Virginia Redistricting Commission's (VRC) October $6^{\text {th }}$ virtual meeting which covered the Commonwealth's central district. After the October $6^{\text {th, }}$ meeting, the VRC's Democratic map drawer did reflect the changes I and other citizens recommended in his HOD map B7 (pan 254 in the link above). Both HOD maps B6 and B7 are included as links in this e-mail. In drawing the HOD maps, I hope the special masters will consider the four reasons I list below for proposing that Greene County be include in HOD district 81 as shown as HOD map B7. Thank you. Pete Costigan
"Good afternoon Commissioners,
My name is Pete Costigan and I live in Ruckersville in Greene County.
I'd like to comment as a private citizen on HOD map B6.
Regarding HOD map B6, l'd like to propose that the northeast corner of Augusta County be swapped out of HOD district 81 and replaced by Greene County. Since that northeast portion of Augusta County borders Rockingham County, I believe it makes more sense to attach that portion of Augusta to Rockingham County as part of HOD district 69.
Here are my four reasons for making this proposal.
First, HOD map B6 currently includes all of Greene County, much of Rockingham County and part of Page County in district 69. The bulk of the proposed district's land is in Rockingham and Page Counties, both of which are separated from Greene by the Blue Ridge Mountains. I object to this grouping for the same reasons the

Commission has heard many other residents of counties on both sides of the Blue Ridge object to being grouped with residents in counties on the mountain's opposite side. Greene County residents have more common interests with Albemarle County than they have with either Page or Rockingham.
Specifically, Greene County residents regularly drive to Albemarle for shopping and medical care. In addition, every day, many Greene residents drive into Albemarle to their jobs at the National Ground Intelligence Center in northern Albemarle, to State Farm and to various UVa facilities in Albemarle among other employers. In fact, a significant percentage of Greene County's employed residents work in Albemarle. In contrast, relatively few drive the 30-35 miles west over the Blue Ridge to jobs in Rockingham or Page.

Second, Greene is a small county with about $55 \%$ of its 20,000 residents living in two of its five voting precincts. Those two precincts - Ruckersville and Midway - are located mostly south, east and west of the intersection of east-west route 33 and north-south route 29. Route 29, a major highway, reaches the Greene/Albemarle border in less than four miles south of this intersection.

Third, Greene County, along with Albemarle, are among the counties served by the Thomas Jefferson Planning Commission. Through the Commission's Legislative Services program, the interests of the region's localities are represented before the state legislature and other state policymakers. Much of this effort occurs at the General Assembly during the January-March session each year. Augusta County is not served by the Thomas Jefferson Planning Commission. Augusta County is served by the same planning district that serves Rockingham County.

Fourth. Like Rockingham and Page Counties, all of Augusta County is on the western side of the Blue Ridge and on the opposite side from Greene and Albemarle.
As always, I thank you for considering my proposal and for the difficult but important work you are doing.
Pete Costigan
Ruckersville, Va, 22968
434-466-2384"

[757] 532-3555
Apologies for the bizarre double listing of addressees, and the omission of commas between their names. Both are the result of the quarreling of Microsoft and Apple for the control of this iMac desktop computer, a problem beyond my ken.

[^20]The difficulties the Redistricting Commission has encountered in establishing maps for the various governmental units were predictable. They stem from the Commission's failure to first establish a process by which the task should be accomplished.

It would be wise to start with some rules to guide the process - even now for the week remaining, or for the consideration of the Supreme Court, if that is the body which ultimately makes the decision. Once, settled, the rules should be incorporated in legislation (not the Virginia Constitution.)

The problem to be solved is the same for any governmental unit which holds elections. Districts should be compact and represent areas the citizens taxes support and with which they identify in their activities and allegiances. Districts should have reasonably equal populations. (Yes, you vote on behalf of your kids - and other folks' kids.)

Rule 1. There is no point in attempting to achieve nearly equal populations as of the start of the decade. We should not be tinkering with these boundaries again until 2031. Districts which have been strongly gaining population for 10 years or more, as indicated by interim Bureau of the Census estimates, will continue to gain residents at a rate above statewide averages. Limit the differential in population between the lowest and highest numbers allocated to $5 \%$.

Rule 2. Boundaries should reflect those for voting jurisdictions included within the district to be delimited. Never, ever split a voting precinct. Never partition a governmental unit unless it is entitled by population to more than one representative of the kind being dealt with. (Example: For Congressional Districts, for which the national average is upwards of 750,000 people, only Fairfax County should be split, and none of it should be parceled out to more than one abutting city or county. For House of Delegates Districts, several cities and counties would be entitled to more than one delegate. But no locality should be divided into more pieces than one more than the whole number of delegates for which the last decennial Census entitled it.)

Rule 3. Computer mapping should be employed as a tool for assessing district compactness - not for creating designer districts to benefit a party or candidate. For proposed Congressional Districts, any of the 180 lines which could be drawn through the center of population of the district (at one degree intervals from north) which is two times or more longer than the shortest such line is prima facie evidence that the proposed district is not compact. An additional test of reasonableness of the contours of a proposed district is whether all parts of it can be reached by roadway from other parts of the district. Eastern Shore and Virginia Beach must be in the same Congressional District. Period. (Any inhabited islands can be accommodated case-by-case.)

Obviously, computer mapping could generate an infinite number of district maps. But human minds cannot handle an infinite number of alternatives. A limited number of alternatives could be achieved by calling for the maps to be generated starting from Virginia's points around its periphery opposite where two other states abut each other, the District of Columbia, or a body of water. By this writer's count that would produce six maps.

So this outlines a process and some rules to guide it, leaving the decisions up to the humans who are charged with making them. Ladies and gentlemen, let's go!

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

My name is Cathy Hosek. I live at 1906 Rampart Drive near the Mount Vernon Estate in the Fort Hunt area along the Potomac River. I have been working on the local Fairfax County Magisterial redistricting for Fairfax County and have learned some important things about communities of interest.
Our community of interest starts at 495/95N at the northern most edge and goes south along the Richmond Highway Corridor (Route 1) all the way down to Fort Belvoir/the Fairfax County Parkway.

Most of the families in this area fall into 2 high schools attendance areas - West Potomac and Mount Vernon High School. It also includes neighborhoods on both sides of the corridor in both Mount Vernon and Lee Districts of Fairfax County.
We have several projects happening in our community. One of these is the EMBARK project which is a plan to upgrade the Richmond Highway Corridor/Route 1. This plan will add density as well as improve transportation while keeping a Main Street feel.
On the east side of our community is the George Washington Parkway which is another item of interest. We are working with the Park Service to make this vital connector in our community safer.

It is imperative that the communities along the Potomac River from Alexandria City south to Fort Belvoir remain in one block, especially at the House of Delegate level. It makes no sense to put any part of Fairfax County with the City of Alexandria as we have entirely different school systems and revenue streams. Alexandria and Arlington both have a meals tax, but we do not in Fairfax County.
We need a political structure attuned to fight for our needs and to support our concerns. We are hopeful that this current redistricting will result in the drawing of boundaries that conform more closely to the Mount Vernon District and keep our entire community intact. Our current map is very gerrymandered and one community Hayfield Farms is totally surrounded by our current 36th District. Please consider making the 36th District more compact and reflective of the communities within the boundaries.
Do not look specifically at post office names and addresses as those do not adequately represent the communities of interest.

For example, the city of Alexandria uses Alexandria, but so does the eastern edge of Fairfax County. These two areas do not share the same interests and it would be a disservice to both the representative and the constituents of this district if they were to be in the same District.

Thank you for your time,
~Cathy Hosek
Fairfax County Resident and member of the current 36th and 44th Districts

Per the enclosed Letter to the Editors in the Daily News Record, Thursday. Nous, thin really in a very confusing numbering system for legislative Districts.
Thank you for your consideration.

## Letters To The Editor

## Wouldn't It Be Nice ...

... If each voting district in Virginia had a unique name so there would be no confusion?

Virginia is divided into 11 congressional districts, 40 state Senate Districts, and 100 state House districts. Each set of districts is identified numerically starting with the number one. This results in multiple districts identified by the same number. There are three districts for each number 1-11. There are two districts for each number 12-40.

When referred to by number only, it is hard to know if it is a congressional, Senate or House district being referenced. If you have ever had trouble
following a political discussion for this reason, you are not alone!

Duplication has also resulted in some Rockingham County residents residing in two different districts numbered 26 : House District 26 and Senate District 26.

One solution would be to leave the congressional districts as they are (111) and renumber the state districts as follows:

Senate Districts would be numbered 100-139; and House Districts would be numbered 200-299.

Not only would this give each district a distinct number, it would immediately
identify them as congressional, Senate, or House. It would give each category room for expansion.

If you agree, now is the time to contact the Virginia Supreme Court, which is currently redrawing voting districts. Your comments should be in letter form, addressed to the clerk of the Supreme Court of Virginia, and emailed to Redistricting@vacourts.gov. It should reference the Rules and Procedures for Im plementing the Requirements of Article II, Section 6-A.

Dear sir/madam,
I wish to present to you a redistricting plan that best reflects the various "Communities of Interest" across Virginia, its population growth, minority representation, competitiveness and partisan fairness. It is also much more compact, and has fewer county and town splits than the current map.
My plan is in the attached pictures and the geojson file and can also be found here (https://davesredistricting.org/join/89eb4b13-6142-4b40-8395-210ec796286b).

Here is a character outline of the various districts:

- 1st: Successor of current 2nd, it now consists of Jamestown and the entire Eastern shore. A competitive district won by Biden \& Youngkin.
- 2nd: Successor of current 3rd, it continues to be plurality black mandated by the VRA.
- 3rd: Successor of current 4th, it also continues to be plurality black mandated by the VRA.
- 4th: Successor of current 7th, it now becomes a very competitive Trump-won district (by 1.4 points) to achieve partisan proportionality in the 54-44 Biden state.
- 5th: Sheds most of the Northern portions that are better suited for other districts.
- 6th: Successor of current 9th, it consists of Southwest VA, and unites Roanoke Valley and with it Craig county (as per a COI submitted to the commission).
- 7th: Successor of current 6th, it consists of the Shenandoah Valley and takes in some of the rural parts of Loudon, and counties to its south.
- 8th: Successor of current 1st, it takes in some minority areas of Prince William to make up for the loss of minorities in the neighbouring 1st (current 2nd). May (or may not) become more competitive later in the decade.
- 9th: Successor of current 11th, it remains majority-minority but has significantly altered geography to respect the COIs submitted to the commission.
- 10th: Consisting of eastern Loudon \& western Fairfax, the new 10th has a $26.4 \%$ Asian VAP, $49.4 \%$ minority VAP, and $52.1 \%$ non-white population. It has the potential to be majority-minority VAP later in the decade reflecting minority growth in the state. It also becomes a safe Democratic district. Some parts of this district are specifically drawn to respect the COIs submitted to the commission.
- 11th: Successor of current 8th, it consists of immediate neighbours of DC. This district is specifically drawn to respect the COIs submitted to the commission.

This map produces a 6-5 Biden split, and a 6-5 Youngkin split accurately reflecting partisanship of the state. Minority representation is also significantly improved, and county/city/town splits are minimized.

In this map I have numbered the various districts in a sequential manner, the way the Pennsylvania Supreme Court did in 2018. Many citizens have to switch district numbers regardless, so it would be great if Virginia does the numbering in sequential manner giving the map a much cleaner look.
The new 1st now consists of Jamestown, the first permanent English settlement in the New World, colloquially making it the new "America's first district". The numbers then go clockwise and reach NoVA. The districts extending into NoVA are given higher numbers because if Virginia ever gets a 12th district, it would be here, and the numbers in the rest of the state no longer need to be changed.

Hopefully this plan would be considered by the Court for a fair redistricting process.
Thank you.
Yours faithfully,
Soukarya Samanta

I'm a resident of the 36 th Senatorial District in Virginia. I have yet to provide any comments on the process of redistricting. Now that a new phase has begun involving experts that may not be familiar with Virginia, now seems a good time to do so.

It is a certainty that the boundary lines of the 36th Senatorial District will not remain as they are now. They will either get better or get worse.

How can the boundaries get better? This is pretty easy. The current map treats communities poorly as the border meanders about like an old river. In the northern end of the district, the Groveton community is cut to pieces as is Fort Hunt and many others. The Edison, West Potomac and Mount Vernon High school attendance areas are carved up. In the southern end of the district, parts of the district are contiguous - by water - there being no continuous land access within the district. So to improve the district, minimize the wandering boundaries we have now and make the district more compact.

The positives of the current district are that the currently included areas share concerns about 1) transportation and 2) the quality of the Potomac River as we all live downstream from the cities of Alexandria, Arlington and Washington, DC. Also, all of the district is located in counties and not independent cities. Virginia counties and independent cities are rather different in the powers they have and the things they need from the state legislature..

How can the boundaries get worse? This is also pretty easy. It can get worse by ignoring the natural, physical and community boundaries of Cameron Run and the Capital Betway and including even more of Fairfax County south of the City of Alexandria in a Senate District dominated by the City. Don't be fooled by the "Alexandria area of Fairfax". We live in Belle View or Hybla Valley or Waynewood or Mount Vernon. etc. and not in the City of Alexandria.

Muriel-Theresa Pitney
Clerk of Court
Supreme Court of Virginia
100 North Ninth Street
Richmond, Virginia 23219
RE: Rules and Proceduares for Implementing the Requirements of Article II, Section 6-A

To Whom It May Concern,
Pursuant to Rule 4(a) of the Rules and Procedures for Implementing the Requirements of Article II Sectio 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting of the Virginia House of Delegates.

I urge the Court to recognize in its redistricting of the House of Delegates the historic communities of interest in Arlington County. That is especially true of "South" Arlington, generally thought of as the part of the County south of U.S. 50 (Arlington Boulevard).

South Arlington is historically home to residents so varied in racial, ethnic, and economic backgrounds and conditions that the area is known as Virginia's "World in a Zip Code." It would seem consummately unwise to use pieces of South Arlington to bring up pieces of white, wealthier, and more politically connected North Arlington to the required population for a House of Delegates district.

Central to South Arlington is the Columbia Pike Corridor, essentially the "Main Street" from the Pentagon to Arlington County's border with Fairfax County. New district boundaries should not break up the well-established cultural and social communities along and on both sides of Columbia Pike.

Sincerely,
Cragg Hines

RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6A

To Whom It May Concern
Pursuant to Rule 4(a) of the Rules and Procedures for Implementing the Requirements of Article II Section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting for the Virginia House of Delegates.

Columbia Pike in Arlington is a unique neighborhood in Virginia. It is home to immigrants from all over the world. Economically, it is much less affluent than neighborhoods in North Arlington. To divide these neighborhoods in different districts will seriously reduce the voices of our immigrant population, which is primarily Latino. This would not be in the interest of the state of Virginia. For these reasons I consider Columbia Pike to be a Community of Interest that should be protected. Other thoughts about Columbia Pike to reinforce keeping the neighborhoods together are:

1. Columbia Pike is the area with the highest bus use in Virginia. We have no metro stops, but our neighbors make heavy use of the buses to get to the Metro stations.
2. The area south of Arlington Blvd in Arlington historically has been the less affluent side of the county. Today, the Columbia Pike area is disproportionately populated by some of the poorest residents in NOVA.
3. The African American population of Arlington centers around the Columbia Pike neighborhoods. This is a remnant of our history since Reconstruction in the late 1980s, as former slaves and their descendants were red-lined out of most areas in North Arlington.
4. The Columbia Pike area is often called "the world in a zip code," reflecting the diverse cultures that live here. We do not have ethnic
neighborhoods in Arlington, we have one area where everyone lives together. It's rare and it needs full representation in our government.
5. Latinos in particular, are the largest cohort of immigrants, and they are often the poorest. They live in substantial numbers along Columbia Pike. In Virginia, they comprise $10.5 \%$ of Virginia's population. They need their voices heard and breaking Columbia Pike up will greatly reduce their voices. Do not draw them out as they are an important block of Virginians.

In summary, keep the Columbia Pike neighborhoods together in one district.
Sincerely,
Maria Durgan

Muriel-Theresa Pitney<br>Clerk of Court<br>Supreme Court of Virginia<br>100 North Ninth Street<br>Richmond, Virginia 23219<br>To Whom It May Concern:<br>Pursuant to Rule 4(a) of the Rules and Procedures for Implementing the Requirements of Article II Section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting for the Virginia House of Delegates:

I live in south Arlington one block off of Columbia Pike. Columbia Pike runs from the Air Force Memorial to the County line and is a dynamic and diverse community.

I am concerned that this redistricting is going to mess up our diverse community that thrives south from Arlington Boulevard.

Due to excellent representation we have something special and we have something that is working and has been working for a long time.

I want to make sure we have strong representation to watch over south Arlington. We have for so long got short changed by "other priorities" in North Arlington. It smacks of a north Arlington privilege. I well remember how the North Arlington folks worked to kill the Columbia Pike streetcar project because they didn't want to have to pay for it. I was told that specifically many times. It is an us or them mentality.

Bottom line here is please preserve strong representation for our south Arlington and Columbia Pike corridor so we have an advocacy voice speaking up for some of the poorest and some of the most diverse populations in Arlington.

To the Court
I would like to see that districts be drawn based on county and city boundaries without regard to voter makeup of the district. Where it is needed to expand or contract the size of the district based on population, lines should not be drawn in illogical ways with jutting fingers but with a maximum of 5 straight lines to form only convex shapes. These districts could combine or divide adjacent localities.

I would like to address the Redistricting issues affecting State Senate District 36 to highlight what I believe are important aspects of this Districts Communities of Interest.

Non residents of this area may be unfamiliar with the cohesive qualities of this Mt. Vernon, VA community.

One of the most focused interests in this Community is the Route 1 , Richmond Highway, influence. This road not only is the main thoroughfare in the community, the road also delimits the focus of community activities in its access to activities, schools, commerce, and diversity. Extending the redistricting bounderies away from the corridor places those outlying communities outside of the focused community of interest.

Another focus of the Community is the governmental boundaries in the area. The bulk of the District is within Fairfax County and should remain so. Extending the District North into the City of Alexandria and South into Prince William County creates jurisdictional tensions and even some conflicts with those other governing bodies which a representative would have a difficult time reconciling. The Governmental boundaries focus the Communities of Interest on the practical functions of the existing Government structure such as Schools, Public Safety, Parks and Recreation, and local Government authority. Any necessary extension of redistricting into those Northern and Southern areas should be minimized to avoid government conflict. Encompassing the Alexandria City communities is especially disruptive in my view. The Alexandria City adjoining areas have very separate, strong Community affiliations which generally isolate themselves from Fairfax County interests. To the extent necessary to accommodate redistricting I believe westward expansion within Fairfax County is more condusive to Community adhesion then Northern or Southern diversions

RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A

## To Whom It May Concern,

Pursuant to Rule 4(a) of the Rules and Procedures for Implementing the Requirements of Article II Section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting for the Virginia House of Delegates.

As a resident of South Arlington, I am concerned about the future representation if South Arlington, particularly the Columbia Pike Corridor, does not stay whole, in one district. The Columbia Pike Corridor is South Arlington's Main Street. It needs representation with political cohesion to benefit the shared socio-economic status of those living along the Pike. It is imperative that South Arlington not be divided up for representation along with affluent North Arlington neighborhoods. South Arlington has unique needs that will be neglected if it does not have it's own representation.

Sincerely,
Sherry Skinner

Muriel-Theresa Pitney
Clerk of Court
Supreme Court of Virginia
100 North Ninth St
Richmond VA 23219
RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A
To Whom It May Concern,
Pursuant to Rule 4 (a) of the Rules and Procedures for Implementing the Requirements of Article II Section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting for the Virginia House of Delegates.

I am writing to urge that the Court keep the Columbia Pike Corridor as a community of interest. The region includes highly diverse neighborhoods along Columbia Pike. Long neglected due to WMATA's refusal to serve the area with a Metro line, the Corridor's many socioeconomically disadvantaged residents ride to work on Virginia's busiest bus route. Columbia Pike serves as South Arlington's "Main Street," with retail serving a racially and ethnically varied clientele. The area's diversity and relative deprivation give it needs that are not always met by Arlington County. Residents of North Arlington have often voted as a bloc to halt projects in South Arlington, such as the Columbia Pike streetcar.

Please consider keeping the neighborhoods south of Arlington Boulevard (Route 50) and on either side of Columbia Pike as one community of interest within South Arlington. It has long been our tradition and practice to keep these neighborhoods together in one district.

Muriel-Theresa Pitney

Clerk of Court
Supreme Court of Virginia
100 North Ninth Street
Richmond, Virginia 23219

May It Please The Court:
Pursuant to Rule 4(a) of the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, I am submitting the following comments regarding the Commonwealth's political redistricting effort. In particular, I respectfully take issue with comments by map drawers that have referred to the Mt. Vernon District of Fairfax County as part of the Alexandria postal code area and, therefore, suited to be a part of legislative districts encompassing the City of Alexandria. Forensic examination and my personal experience living in these two communities belie that conflation.

For the first four years of my elementary school education, my family lived in the City of Alexandria. Because we lived in a city, we could walk almost everywhere-to the bakery on the corner of Prince and West Street or to the old Charles Houston elementary school, where my mother taught students.

When I entered the fourth grade, my family moved to the Mt. Vernon District of Fairfax County. Our mailing address stayed the same-Alexandria, Virginia-but Mt. Vernon was worlds apart from Alexandria. There were no stores within walking distance. Mt. Vernon was, and remains, the suburbs. Further, Mt. Vernon is not just separated from Alexandria in terms of urban density. It is physically cut off from the City of Alexandria by Huntington Creek and Camron Run tributaries that pour into the Potomac River. The two areas are also separated by the 495 Interstate Highway and have different school boards, library systems and other local administrative bodies.

In light of the above facts, I urge the Court to recognize the distinct communities of interest that characterize and distinguish Fairfax County from the City of Alexandria. I am also requesting that the election map be redrawn to reflect these important distinctions.

Sincerely,

Jube Shiver, Jr.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

## Good morning -

Congratulations on your appointment as Special Masters for Virginia redistricting! We realize you have a limited time frame of thirty (30) days to complete the arduous task of drawing new Congressional, Virginia Senate, and House of Delegate lines. All of this while taking in new census data population changes and preventing gerrymandering.

When considering redrawing of districts, you also must consider Senate Bill 740 effective 7/1/2020 that remedies split precincts:

## CHAPTER 1268

An Act to amend and reenact § 24.2-307 of the Code of Virginia, relating to county and city precincts; required to be wholly contained within election districts; waiver for administration of a split precinct.

Approved April 22, 2020

Be it enacted by the General Assembly of Virginia:

1. That § 24.2-307 of the Code of Virginia is amended and reenacted as follows:

## § 24.2-307. Requirements for county and city precincts.

The governing body of each county and city shall establish by ordinance as many precincts as it deems necessary. Each governing body is authorized to increase or decrease the number of precincts and alter precinct boundaries subject to the requirements of this chapter.

At the time any precinct is established, it shall have no more than 5,000 registered voters. The general registrar shall notify the governing body whenever the number of voters who voted in a precinct in an election for President of the United States exceeds 4,000 . Within six months of receiving the notice, the governing body shall proceed to revise the precinct boundaries, and any newly established or redrawn precinct shall have no more than 5,000 registered voters.

At the time any precinct is established, each precinct in a county shall have no fewer than 100 registered voters and each precinct in a city shall have no fewer than 500 registered voters.

Each precinct shall be wholly contained within-any a single congressional district, Senate district, House of Delegates district, and election district used for the election of one or more members of the governing body or school board for the county or city. In each year ending in one, the governing body of each county and city shall establish the precinct boundaries to be consistent with any congressional district, Senate district, House of Delegates district, and local election district that was adopted by the appropriate authority by June 15 of that year. If congressional districts, Senate districts, House of Delegates districts, or local election districts have not been adopted by the appropriate authority by June 15 of a year ending in one, the governing body may use the congressional districts, Senate districts, House of Delegates districts, or local election districts as such districts existed on June 15 of that year as the basis for establishing the precinct boundaries to be used for the elections to be held in November of that year. Such governing body shall establish precinct boundaries to be consistent with any subsequent changes to the congressional districts, Senate districts, House of Delegates districts, or local election districts. If a governing body is unable to establish a precinct with the minimum number of registered voters without splitting the precinct between two or more congressional districts, Senate districts, House of Delegates districts, or local election districts, it shall apply to the State Board for a waiver to administer a split precinct. The State Board may grant the waiver or direct the governing body to establish a precinct with fewer than the minimum number of registered voters as permitted by § 24.2-309. A governing body granted a waiver to administer a split precinct or directed to establish a precinct with fewer than the minimum number of registered voters may use such a precinct for any election held that year.

The governing body shall establish by ordinance one polling place for each precinct.

[^21]Specifically:

1. Precinct 101: Granby - House Districts 79 \& 100
2. Precinct 104: Titustown - Congressional Districts 2 \& 3
3. Precinct 106: Second Presbyterian - House Districts 79 \& 89
4. Precinct 218: Willard - House Districts 79 \& 89
5. Precinct 305: Lafayette-Winona - House Districts 79, 89 \& 90
6. Precinct 503: East Ocean View - House Districts 83 \& 90

We also currently have split Senate Districts in the following precincts:

1. Precinct 203: Ghent Square - Senate Districts 5 \& 6
2. Precinct 218: Willard -Senate Districts 5 \& 6
3. Precinct 509: Tarrallton - Senate Districts 6 \& 7

Attached are copies of our current Congressional, Senate and House District maps for the City of Norfolk to assist with your redistricting in the hopes of remedying precincts with split districts.

Should you have any questions or concerns, please call or email.
Thank you for your consideration and attention in this matter.

I reside in what is currently VA senate district 36.
I believe our districts should be non-partisan and aligned by communities as much as possible.
In my opinion, the current bounds of Senate district 36 do not represent communities well at all.

I am in SUPPORT of the last "Consensus" map presented by the VA Commission. (State Senate - Statewide C2)

Ladies and Gentlemen:

The only way to establish a fair and equitable redistricting map is to eliminate humans from the actual district assignment process. The best and preferred method for each Virginia citizen to be assigned to a specific district is to use a computer-aided grid system. There are current grid systems and applicable charts that at are available today. Have members of the Redistricting Committee select a viable grid system and get on with it.

As long as humans are directly involved in any type of district selection process, personnel opinions, prejudices, and preferences will interfere with a fair process. A computer-aided grid system will eliminate personnal priorities and place citizens into population balanced districts without regard to the influences of gerrymandering. A computer program directed grid based on East-West and North-South construction can be developed to ensure districts are of equal population without any sort of political favoritism. District boundary lines will go through cities, small towns, mountain ares and bodies of water without regard to political influence. Let the boundry lines fall where they may and the result will be fair districts where each citizen's vote will count toward equitable representation.

A grid system eliminating human involvement is the only way to defeat gerrymandering and achieve fair redistricting for all Virginians.

## EXTERNAL EMAIL <br> THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS <br> Hello,

As the Supreme Court of Virginia begins to consider redistricting maps for the Commonwealth, I wish to convey my thoughts as a citizen of Fairfax County.

Please do the minimum necessary to achieve the prescribed district-level variances. I think the variances should be the same for state house, state senate, and congressional districts - 10 percent.

This will avoid the likelihood of splitting precincts with lower variances. The onus will be on localities to heal the split precincts which will mean finding additional polling locations and recruiting and hiring more Election Officers.

Greg Brandon
McLean, Virginia

Muriel-Theresa Pitney,
Clerk of Court
Supreme Court of Virginia
100 North Ninth Street
Richmond, VA 23219
Dear Ms. Pitney:
I am submitting the following public comments for the special masters tasked with drawing new congressional district boundaries for the Commonwealth pursuant to the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia.

I am a native of and resident of Amelia County, located 35 miles southwest of Richmond. We are a rural county that is considered an exurb in the Richmond region. We border the counties of Chesterfield and Powhatan, which have experienced substantial population growth over the past decade as the Richmond suburbs have moved further west.

For almost 40 years Amelia County has been part of congressional districts that included counties to our east and north. As such, I am writing to you to advocate for keeping Amelia in a district with geographic communities of interest. Amelia is currently in the 7th congressional district. Prior to 2017 we were in the 4th district, which ran east to the Tidewater region. I have seen several draft maps that propose moving Amelia into the 5th district, which includes most of Southside Virginia. The last time Amelia was part of the 5th district was 1982 and it would not be respecting communities of interest to put the county in a Southside-anchored district now.

Most Amelia residents travel east to Richmond and its suburbs to work, shop and do activities. Also, our population is growing and has even more potential to do so over the next decade as more people relocate to the Richmond area, unlike most of Southside where population is declining. Therefore we have more in common with the communities and our neighbors to the north and east than we do with the Southside localities to our west. I ask that you take this into consideration as you draft the new congressional district boundaries.

Sincerely,
Lauren Whittington

Muriel-Theresa Pitney,
Clerk of Court
Supreme Court of Virginia
100 North Ninth Street
Richmond, VA 23219
Dear Ms. Pitney:
I am submitting the following public comments for the special masters tasked with drawing new congressional district boundaries for the Commonwealth pursuant to the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia.

I am a native of and resident of Amelia County, located 35 miles southwest of Richmond. We are a rural county that is considered an exurb in the Richmond region. We border the counties of Chesterfield and Powhatan, which have experienced substantial population growth over the past decade as the Richmond suburbs have moved further west.

For almost 40 years Amelia County has been part of congressional districts that included counties to our east and north. As such, I am writing to you to advocate for keeping Amelia in a district with geographic communities of interest. Amelia is currently in the 7th congressional district. Prior to 2017 we were in the 4th district, which ran east to the Tidewater region. I have seen several draft maps that propose moving Amelia into the 5th district, which includes most of Southside Virginia. The last time Amelia was part of the 5th district was 1982 and it would not be respecting communities of interest to put the county in a Southside-anchored district now.

Most Amelia residents travel east to Richmond and its suburbs to work, shop and do activities. Also, our population is growing and has even more potential to do so over the next decade as more people relocate to the Richmond area, unlike most of Southside where population is declining. Therefore we have more in common with the communities and our neighbors to the north and east than we do with the Southside localities to our west. I ask that you take this into consideration as you draft the new congressional district boundaries.

Sincerely,
Lauren Whittington

November 3, 2021
Muriel-Theresa Pitney
Clerk, Supreme Court of Virginia
100 North $9^{\text {th }}$ Street, $5^{\text {th }}$ Floor
Richmond, Virginia 23219

Dear Honorable Members of the Supreme Court of Virginia,
Fair Lines America is a non-partisan, not-for-profit organization based in Virginia dedicated to educating the public about the redistricting process and advocating through public education and litigation efforts for fair and constitutional redistricting. We write to the Court to express our concerns over the ongoing exclusion of central absentee votes in the election results data being used for redistricting purposes. In Virginia's 2021 election, 1,201,153 voters casted their vote via absentee ballots, ${ }^{1}$ and as the process stands today, the political composition reports the Court and its special masters will use to draw and assess new congressional and legislative districts will act as though those voters do not exist. If these central absentee votes are not reallocated back to their originating districts and precincts in some form, then the election data being used for redistricting will be an incomplete and distorted version of the official election results as reported by the Virginia Department of Elections, and such errors will materially impede the court's ability to enact lawful redistricting plans using the best data available.

Attached to this letter is a data file containing statewide and district-based election results from 2016 to 2021 in Virginia, with one set of results excluding central absentee votes and one set of results reallocating central absentee votes back to their originating district and precinct. (See "Attachment C"). The discussion below will explain the methodology used to reallocate the central absentee votes in the accompanying data file and will highlight the anomalies and risks that come with using incomplete data when redistricting.

## I. Methodology

In Virginia, votes cast prior to election day (Early Voting), by mail (Absentee Voting), and provisional votes are reported by electoral district within each jurisdiction, rather than by precinct. Elections for statewide and federal offices summarize these categories of votes by congressional district within each jurisdiction, while State Senate and House of Delegate elections are summarized by their respective district types within each jurisdiction. For example, Candidate A running for Governor received 1,000 early, absentee, or provisional votes in the portion of Fairfax County falling within the boundaries of the $8^{\text {th }}$ Congressional District.

[^22]FAIR LINES AMERICA FOUNDATION

Votes cast on election day at polling places are reported by district and precinct, with the district type again depending on the office. Using this election day data, one can calculate the share of the vote that each district portion of a precinct contributes to a candidate's jurisdictionwide election day vote total within that same district. For example, if Candidate A running for Governor received 10 votes in the portion of Precinct 01 falling within the boundaries of the $8^{\text {th }}$ Congressional District and received 100 votes in the portion of the jurisdiction falling within the boundaries of the $8^{\text {th }}$ Congressional District, that precinct portion contributed $10 \%$ to the candidate's election day vote total.

That same ratio can then be used to estimate how many "centrally-reported" votes should be allocated to that precinct portion. Using the example above, $10 \%$ of the 1,000 early, absentee, or provisional votes that Candidate A received would be allocated to the portion of Precinct 01 falling within the boundary of the $8^{\text {th }}$ Congressional District, or 100 votes. This would result in an estimated 110 total votes for Candidate A coming from that precinct portion. This process is then repeated for each candidate, precinct, and jurisdiction.

## II. Discussion

Failing to properly account for and reallocate "central absentee precinct" votes back to their appropriate districts and precincts produces election results which are substantially and materially inaccurate when compared to those officially reported by the Virginia Department of Elections. These discrepancies range in magnitude from small differences in the final vote percentages received by candidates in a given race to large numbers of votes remaining uncounted, sometimes in such substantial quantities that it changes the winning candidate in a given election.

The general impact of failing to reallocate central absentee votes to the appropriate precincts can be seen when examining the 2020 and 2021 statewide races in Virginia. In the 2020 U.S. Presidential election, when central absentee votes are excluded from the district-bydistrict statewide election results, Donald Trump would appear to have won the state with $61.81 \%$ of the vote over Joe Biden's $35.62 \%$. But the Virginia Department of Elections' official results, with central absentee votes included, show that Joe Biden received $54.08 \%$ of the vote, while Donald Trump received $43.98 \%$. A similar trend appears in the 2021 Gubernatorial Election as well. With central absentee votes excluded, Glenn Youngkin would appear to have won the state with $56.72 \%$ over Terry McAuliffe's $42.44 \%$, but the official election results with central absentee votes included show that Youngkin's true statewide margin of victory was far smaller, receiving 50.57\% to McAuliffe's 48.64\%.

The risks associated with not properly accounting for central absentee votes are even more pronounced in the context of district-based elections. For example, in Virginia's 2020 U.S. Congressional elections, central absentee votes were outcome determinative in four of the eleven races: Congressional Districts 2, 4, 7 and 10. If one were to look at election results for these
races without properly accounting for central absentee votes, the Republican candidates would incorrectly appear to win all four, with margins of victory above $20 \%$ in three out of the four races. The official results with central absentee votes included, however, reveal the Democratic candidates won all four of those races. Although not outcome determinative, central absentee votes also significantly impact the final margins of victory in all of the remaining congressional races, causing changes of at least $27 \%$ or more in every district other than the $9^{\text {th }}$ Congressional District.

These inaccuracies are even more numerous and widespread in the context of the 2021 Virginia House of Delegates elections. Central absentee votes were outcome determinative in nine House of Delegates races: Districts 10, 21, 31, 40, 51, 72, 73, 76, and 93. Without accounting for central absentee votes, the Republican candidates in each of these races would appear to have won, with margins of victory ranging from $\sim 1.5 \%$ to $\sim 11.5 \%$. But including central absentee votes reveals that all of these races were actually won by the Democratic candidates, with margins of victory of at least $3 \%$ or more in all but one of the districts.

In addition to impacting the overall outcomes of certain races, failing to account for central absentee votes will also significantly misrepresent how competitive several of the House of Delegates races really were. The Virginia Department of Elections' official 2021 elections results show that the Democratic candidates won in House Districts 13, 34, 50, 68, and 94 by relatively comfortable margins ( $\sim 8.5 \%, \sim 14 \%, \sim 9.5 \%, \sim 6.5 \%$, and $\sim 12 \%$, respectively). But if these races were viewed without accounting for central absentee votes, the Democratic candidates' margins of victory drop to $\sim 1 \%, \sim 2.5 \%, \sim 0.5 \%, \sim 1 \%$, and $\sim 1.5 \%$, respectively, and one would believe these races were far more competitive than they really were on Election Day. And this distortion of competitiveness goes both ways. In 2021, Republican candidates won in House Districts $27,28,63,83,85$, and 91 , and if these races were considered without reallocated central absentee votes, the margins of victory in each would appear to be relatively safe at $9.5 \%$ or more. After including central absentee votes, however, the Republican candidates' true margins of victory are revealed as ranging from $\sim 0 \%$ to $\sim 3.5 \%$.

Issues stemming from improperly allocated central absentee votes are not limited to changing the ultimate winners of races or inaccurately representing a district as competitive or not competitive; any inaccuracies in the final vote numbers and percentages for individual candidates across districts and precincts, even seemingly minor ones, will have compounding effects when used for redistricting purposes. Discrepancies in election results at the precinct level, even if small individually, add up when those precincts are joined together to form districts, and, in the absence of central absentee vote reallocation, could result in maps being adopted or districts being drawn which do not actually achieve the real-world result that the mapdrawing authorities intended. Relatedly, if map drawers conduct analyses on newly drawn congressional or legislative districts using election results data that fail to repatriate central absentee votes to their appropriate precincts, the resulting reports will not be an accurate

FAIR LINES AMERICA FOUNDATION
representation of those districts' true political composition because the underlying preferences of central absentee voters residing therein are wholly excluded and the overall voting preferences of remaining voters will be improperly distorted.

## III. Conclusion

Overall, when comparing election results without reallocated central absentee votes to those which do include them, a clear trend emerges - failing to reallocate central absentee votes to the appropriate districts and precincts has the effect of artificially inflating the level of Republican support in districts and precincts across the state while artificially deflating the level of Democratic support in those districts and precincts. Proceeding with the use of such erroneous data would have direct and serious implications on the accuracy of plan reports and the efforts of map-drawers to comply with Virginia's redistricting criteria, including the prohibition on undue favoring or disfavoring of political parties.

In the interest of providing data to this Court and its special masters, we have attached hereto a data file that uses the methodology described in Attachment A to allocate central absentee votes to precincts. (See compressed file "Attachment D").

While there may be other entirely reasonable methods available to make an appropriate allocation of central absentee votes to precincts for the purposes of redistricting political analysis, we are not taking the position that the specific methodology described in the attachment or included in the data files we submitted are the only reasonable method. Rather, this is the data allocation method we have selected and implemented on data provided to this Court, its special masters and the public with which to evaluate maps under consideration.

We urge the Court to direct its Special Masters to either utilize the data we are providing or to conduct their own reallocation of central absentee votes to their originating districts and precincts in some form to ensure Virginia's redistricting process and resulting maps accurately reflect the Commonwealth and its voters.

Sincerely,

Drew C. Marvel<br>Counsel to Fair Lines America

## ATTACHMENT A

## Virginia Central Absentee Allocation Methodology

In Virginia, votes cast prior to election day (Early Voting), by mail (Absentee Voting), and provisional votes are reported by electoral district within each jurisdiction, rather than by precinct. Elections for statewide and federal offices summarize these categories of votes by congressional district within each jurisdiction, while State Senate and House of Delegate elections are summarized by their respective district types within each jurisdiction. For example, Candidate A running for Governor received 1,000 early, absentee, or provisional votes in the portion of Fairfax County falling within the boundary of the $8^{\text {th }}$ Congressional District.

Votes cast on election day at polling places are reported by district and precinct, with the district type again depending on the office. Using this election day data, one can calculate the share of the vote that each district portion of a precinct contributes to a candidate's jurisdictionwide election day vote total within that same district. For example, if Candidate A running for Governor received 10 votes in the portion of Precinct 01 falling within the boundaries of the $8^{\text {th }}$ Congressional District and received 100 votes in the portion of the jurisdiction falling within the boundaries of the $8^{\text {th }}$ Congressional District, that precinct portion contributed $10 \%$ to the candidate's election day vote total.

That same ratio can then be used to estimate how many "centrally-reported" votes should be allocated to that precinct portion. Using the example above, $10 \%$ of the 1,000 early, absentee, or provisional votes that Candidate A received would be allocated to the portion of Precinct 01 falling within the boundary of the $8^{\text {th }}$ Congressional District, or 100 votes. This would result in an estimated 110 total votes for Candidate A coming from that precinct portion. This process is then repeated for each candidate, precinct, and jurisdiction.
