To the Clerk of the Supreme Court of Virginia,
I am writing in regards to the Supreme Court of Virginia's authority under the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia to consider the district maps put forward by the two Special Masters. In this consideration, the court has to follow the relevant laws setting out the requirements for redistricting set out in Va. Code §24.2-304.04. This section of the law requires a number of things to be taken into account when considering whether the districts are lawful. This includes requirements to meet Constitutional, especially Fourteenth Amendment, demands, as well as relevant federal law such as the Voting Rights Act of 1965. The Court must also meet requirements of preserving communities of interest, of compactness, of not unduly favoring one party or another, of contiguity, and of approximately (within 5\%) equal population. Therefore, neither the Court nor the Special Masters are legally empowered to do any of the following, all which have been proposed in the 450 pages of comments so far:
(1) Base districts on religious jurisdictions, such as Catholic dioceses, which would be an obvious violation of the Establishment Clause of the $1^{\text {st }}$ Amendment;
(2) Base districts on where people work, shop, or worship rather than where they live. Such districts would almost certainly violate a number of legal requirements. Many residents of Northern Virginia, for instance, commute far for work, either out-of-state to Maryland or the Capital. A substantial portion of the population is nonreligious, many of whom do not attend houses of worship. In addition, there are those people of faith who do not attend services. People increasingly shop online and non-locally. Where we work, where we shop, and where those who worship have their services are three completely different areas. Basing districts on these three criteria would be impossible, since they would generate contradictory boundaries or have to include boundaries outside the Commonwealth, discriminatory even if we could, since it would exclude representation for those who do not attend religious services and disproportionately benefit centers of economic activities e.g. cities, and even if weren't, it would be illegal since none of these criteria are contained in the relevant legislation;
(3) Ignore demographics, such as race, as this would violate §24.2-304.04, the Voting Rights Act of 1965, and would probably also engender challenges under the Fourteenth Amendment;
(4) Have the districts drawn purely by computer algorithm. Computers, although they have the appearance of objectivity, are not objective. Computers do exactly as they are told, to the irritation of many. Algorithms are made by humans, and like all things made by humans, such as laws, institutions, governments, corporations, and so on, suffer from human biases. Computational models might inform the recommendations made by the Special Masters, who are hopefully aware of that model's biases, but to rely solely on such models would not be wise. Further, there is nothing in the law expressly allowing computers to be the sole deciders of district lines, and it would seem to cut against the purpose of the law to allow that;
(5) Count the incarcerated population as part of the district in which they are incarcerated
rather than their previous address. This is expressly forbidden in the relevant statutes, and it is expressly stated that incarcerated individuals should be counted as living at their address previous to incarceration (if they were living in the commonwealth).

The court cannot and almost certainly will not make its decision on what the Special Masters present based on these criteria, regardless of personal preferences. Personally, I'd prefer we do away with this convoluted mess and move to proportional representation - you cannot gerrymander districts that do not exist - but that's a legislative not a judicial question. But even disregarding these proposals, the primary issue remains, which is that given so many criteria actually presented in law, how do we create a map that meets all of them? Inevitably, not all of the legal criteria will be met perfectly well. Trade-offs will have to be made between the criteria, necessitating that the court rank some criteria higher than others. Suppose, for instance, the maps generated by the Special Masters meets all the criteria except that in some cases it divides communities of interest; the map meets contiguity, not favoring any party, and so on but, for example, it maintains the division of Lynchburg, Albemarle, and Charlottesville that quite a number of residents have protested here. Should the court go forward with approving the map? Suppose, instead, that all criteria are met, except for that the districts are not as compact as they might be. Should the court reject that map? To what extent can each criteria be imperfectly met while still being legally met? Such trade-offs are inevitable. Further, the Court will have to make decisions about boundaries for which, assuming they read these comments, there have been multiple, contradictory suggestions. On what reasonable grounds will they accept some proposals but reject others? The Special Masters will present maps, but the Supreme Court gets to make the final decision; the plans are only submitted for consideration. The Justices will, therefore, have to decide which trade-offs are acceptable, which proposals have merit, and what the hierarchy of criteria will be; the question is what grounds for making these decisions are justified and whether or not the Court will make their reasoning about such grounds explicit.

Some of the criteria in the relevant law are hard requirements and cannot be traded-off. This includes following applicable Constitutional and federal law, the near equal population of districts, and where incarcerated individuals are counted for the purposes of determining that population. These are inflexible boundaries; they are either done or not and they must be done. So it is in the remaining criteria that the trade-offs will have to be made.

When deciding between competing goods - between multiple good criteria - it helps to have a guiding principle which takes priority and therefore helps sort out which criteria should take precedence. The foremost principle the Supreme Court considers is constitutionality. The Constitution, national then state, should always win out. That criteria is not helpful here, because each of the criteria is constitutional. The situation is not deciding constitutionality but balancing various constitutional goods - having compact districts, having contiguous districts, and so forth. These are only good, however, because they help ensure that the popular will is translated into law. After all, government only derives just power from the consent of the governed, or, as the Virginia Constitution puts it, "That all power is vested in, and consequently derived from, the people, that magistrates are their trustees and servants, and at all times amenable to them." That was the entire purpose of the constitutional amendment, at least initially - to have voters pick the elected officials that they want rather than the other way around.

It is this constitutional ideal to which the Court ought to defer when considering the trade-offs of different maps. Perfectly smooth districts might look pleasant enough on a map, but if greater representation of the will of the people can be achieved by a few serrated edges, then the trade-off is worth it. The problem, after all, with the gerrymandered districts that we have is that they thwart consent of the governed by artificially boosting one party and the preferences of its voters at the expense of everyone else. Their distorted proportions and boundaries are merely consequences of this. Compactness is no doubt a good thing and a legal requirement, and ceteris paribus should be sought, but if a small amount of compactness can
be sacrificed to better ensure that the will of the people is actually translated into law through our representatives, then that sacrifice ought to be made. Political maps are for political contests, not beauty contests. Contiguity is good because contiguous areas presumably share preferences and a lack of contiguity enables bizarre gerrymandering. In other words, contiguity is valuable insofar as it helps ensure consent of the governed. I cannot imagine a scenario under which any contiguity would have to be traded off against some other criteria in order to better secure the consent of the governed, but if somehow this trade-off existed, then it, again, might be worth it. In other words, rather than start with contiguity and compactness and then make corrections for the remaining criteria, I'd propose going the other way around; start with the districts that would reflect those criteria which are necessarily connected to the consent of the governed and then see where the possibilities are for other criteria only accidentally connected to it, such as greater compactness, contiguity, and so on.

Preserving the ability of groups to elect officials that represent them and preserving communities of interest are more directly connected to the consent of the governed and should receive greater weight. "Cracking" divides communities of interest. Lynchburg, Albemarle, and Charlottesville should probably not be divided as they are. The same is probably true for not dividing up college campuses, as some other commentators have mentioned. The risk with both of these, though, is that of "packing" one party's voters into one, solid district, giving the other party the advantage in multiple surrounding areas. Once again, this is an issue, because the will of the voters is being distorted to the advantage of one party. Consent of the governed should be the guiding principle in deciding whether or not the proper balance between these two is struck. Not unduly favoring one party or another is also particularly germane, since parties are omnipresent in elections. Likewise, not diluting or diminishing the ability of minority groups to elect candidates of their choice should receive higher weighting. Consent of the governed means consent of all the governed.

None of the criteria can be ignored; they are all good criteria and legally need to be met to some extent. The extent to which trade-offs are necessary is unclear to me as I have no experience with drawing such districts. Perhaps, all criteria can be met equally and perfectly. Perhaps the only trade-offs required are minute and would go unnoticed by the average citizen. I am skeptical, however. The Supreme Court will likely be in the position of determining which trade-offs are acceptable constitutionally. In determining this, Justices ought to look to consent of the governed as an animating principle of the amendment, the Virginia Constitution, and the U.S. Constitution.

Thank You For Your Time, Ryan Wesdock

Muriel-Theresa Pitney

Clerk of the Court
Supreme Court of Virginia
100 North Ninth Street
Richmond, Virginia 23219
RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A

To whom it may concern,

Pursuant to Rule 4(a) of the Rules and Procedures for Implementing the Requirements of Article II Section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting for the Virginia House of Delegates.

As a resident of South Arlington, I think the area south of Route 50 should be kept together as a community of interest. For a long time county officials, state government and local residents have used Route 50 as a natural line for delineation as the areas south of Route 50 have historically been home to many of Arlington's communities of color. Perhaps this could change in the far future but for now, it best serves the interest of this community to have a district that is united both north and south of Columbia Pike with the Pike being the main artery and business center of the district.

Thank you for your time.

Sincerely,
Praveen Meyyan

RE: Redistricting Virginia's Congressional Districts
DATE: December 4, 2021

## Memorandum on Congressional Redistricting

The Richmond area has been split up and divided by congressional districts for too many years. As someone who grew up in Chesterfield County, I ask that you keep the Richmond suburbs of Chesterfield and Henrico in their own district to provide the much-needed representation for central Virginia. The counties of Henrico and Chesterfield have a lot in common, which is why, for years, the majority of the two counties have been joined in a congressional district, and at the very least split between 2 congressional districts, of which they both share a part.

In addition to the numerous examples of case law out there, redistricting in Virginia is required to meet various criteria set by the United States Constitution, federal law (specifically the Voting Rights Act of 1965), the Constitution of the Commonwealth of Virginia, and the Virginia State Code. Most of the first three requirements have been since codified in the Virginia State Code, where it boils down the redistricting requirements to seven criteria for drawing districts: 1) drawn so that the population in each district is "proportional", defined as no more than a $5 \%$ deviation, 2) drawn to be in compliance with federal law, 3) "drawn to give racial and language minorities opportunity to elect candidates of their choosing," 4) drawn with consideration for communities of interest, defined as a group of people "who share similar social, cultural, and economic interests," and who live in a "geographically defined" area, 5) drawn in a manner that the districts are contiguous, 6) drawn in a manner so that the districts are compact, and 7) drawn in a manner so that when viewed statewide should not unduly favor or disfavor a political party. Va State Code §24.02-304.04.

The current proposed map by the commission has Chesterfield and Henrico split between 3 districts, the $1^{\text {st }}$, the $4^{\text {th }}$ and the $5^{\text {th }}$. By maintaining Chesterfield and Henrico in no more than 2 congressional districts 6 out of the 7 criteria will be met and the $7^{\text {th }}$ can be met, depending on the rest of the state.

## PROPORTIONAL - no more than a 5\% deviation

Chesterfield and Henrico County are two of the largest counties in the Commonwealth, with Chesterfield recording a population of 364,548 and Henrico at 309,550 . The two counties combined would
come in just under the required population of 786,776 . There are other criteria that need to be met that may require the county to be split off into an additional district, but the proportional criteria could easily be met by including most of Chesterfield and Henrico Counties, along with a piece from Hanover that all share a connection as a Richmond suburb.

## FEDERAL LAW - VOTING RIGHTS ACT OF 1965

The second and third criteria in the Virginia code refers to compliance with federal law and specifically outlines the need to create districts in compliance with the Voting Rights Act of 1965, "drawn to give racial and language minorities opportunity to elect candidates of their choosing" Id. It was to meet this criteria that the eastern section of Henrico was combined with the City of Richmond to create the $3{ }^{\text {rd }}$ Congressional District, and later, with the addition of the eastern/southern portion of Chesterfield, the creation of the $4^{\text {th }}$ Congressional District. As a result, Chesterfield and Henrico counties currently share two congressional districts, which helps the districts meet the requirements of the Voting Rights of Act of 1965. This split can, and should, be maintained with this year's redistricting to meet the requirement.

## COMMUNITIES OF INTEREST

Western/northern Chesterfield has grown so much down routes 360 and route 60 that it no longer has the rural feeling, as it once did, it is now solidly a Richmond suburb. It would be completely against any concept of communities of interest to combine the suburbs of western Chesterfield with the rural farmland of counties like Halifax, Pittsylvania and Henry counties. In order to maintain any semblance of communities of interest for the Richmond suburbs, western/northern Chesterfield and western Henrico must be the base of a district, with the surrounding counties of Hanover, Powhatan or Amelia making up the remaining constituents necessary to reach the proportional requirement.

## CONTIGUOUS AND COMPACT

By combining parts of Chesterfield and Henrico into 2 districts, rather than splitting into a $3^{\text {rd }}$, the counties will make up a significant portion of the proportional representation for congressional districts, so they will require the addition of fewer counties in each district to reach the necessary proportion. This will cause the districts to inherently be more compact and certainly be contiguous, respecting the natural configuration of the land.

Woodfin Law Offices, PLLC
3300 Acorn Street, Suite 319, Williamsburg, VA 23188
Ph: 757-808-5236.office@woodfinlaw-va.com

## NEITHER FAVOR NOR DISAFAVOR A POLITICAL PARTY

This is the one requirement where it may not automatically meet this requirement, but it certainly does not go against it. By allowing Chesterfield and Henrico to be split between two districts, as they currently are now, it would still create two districts where one has a voting tendency of Democrat and one Republican. This certainly meets the requirement of not favoring or disfavoring either party. The requirement is written on a statewide basis, but by allowing these two counties to split between both parties, it would allow the remainder of the state to continue along that pattern and meet the requirement without any problem.

## CONCLUSION

In conclusion, the communities of interest requirement and the requirement about not favoring any political party are a bit at odds with each other. The entire concept of communities of interest is communities "who share similar social, cultural, and economic interests," and who live in a "geographically defined" area. It is inherent that communities who share those things will also likely have the similar voting tendencies. So if the Commission, and now the Court, are to follow the communities of interest requirement, it does make it a bit more difficult to follow the final requirement about partisanship.

The general make-up of the Commonwealth stands to reason that the 3 western districts in the state are likely going to lean Republican. This isn't due to any bias or gerrymandering on behalf of the map drawers, but simply because as communities of interest they tend to vote similarly on various issues. Likewise, the 3 more northern Virginia districts are likely going to lean Democrat. Again, not due to any bias on the part of the map drawers, but because as communities of interest they tend to vote similarly. Those areas will make up 6 districts with an even partisan split, leaving 5 to be drawn in the rest of the state.

The Commission, and the Court, have been instructed to maintain the two minority majority districts to meet the requirements of the Voting Rights Act of 1965, while meeting the other requirements. Based off of past voting history, those districts will likely lean Democrat as far as their voting tendencies. Therefore, after meeting the Voting Rights Act requirement, and given the make up of the western and northern parts of the state, the map will likely consist of 3 Republican or lean Republican districts, and 5 Democrat or lean Democrat districts, leaving 3 districts left to be drawn.

In the end, with 3 districts left to be drawn, there would be 5 Democrat and 3 Republican districts, so if partisan parity is the goal, then 2 of those districts should lean Republican and 1 should be a true tossup. With that in mind, it would be easy for the commission to leave the Richmond suburbs mostly intact, only split between two districts, rather than three, and still meet all of the requirements as laid out by the Virginia State

Code. In viewing the state as a whole, with respect to all of the requirements, southern/eastern Chesterfield combined with eastern Henrico and the city of Richmond, should make up the bulk of one of the minority districts to allow for compliance with the Voting Rights Act of 1965 and western/northern Chesterfield combined with western Henrico should remain together and make up the bulk of a Richmond suburb centered district to allow the area to be properly represented.

My name is Lynn Pascoe. İ live at 5902 Mount Eagle Dr. in the Montebello Condominium which is located in Fairfax County at the north end of Richmond Highway. I am also CoChair of the Mount Vernon Council of Citizens Associations.

The Mount Vernon Council is a non-partisan citizens’ organization that has been working in support of the concerns of people in the Mount Vernon District for over fifty years. A current key issue of concern is working with our neighbors in Lee District and county and state officials to improve Fairfax County’s oldest highway (Route 1 or Richmond Highway) and transform it into the promised "Main Street" for this rapidly urbanizing area. We have also been fighting together for better schools, an up-to-date business climate, improved housing, a healthier natural environment, adequate storm-water management (we border the Potomac River), a safer and more equitable community, and an overall improvement in the quality of life of our people.

Indeed, if one were to judge by the number of community meetings, passed resolutions, official briefings, and letters to officials, our district would qualify for one of the top "communities of interests" in the state. Unfortunately, past gerrymandering or splitting off parts of our community to give adequate numbers to our neighbors have not left us with a unified representation in Richmond based on our existing Mount Vernon District. We need a political structure attuned to fight for our needs and to support our concerns whatever party is in power. We have great hope that this current redistricting effort will result in the drawing of boundaries that conform more closely to the Mount Vernon District.

Thus, for the state Senate, we support maps that keep our district together. Some other totally unacceptable maps treat the northern part of our district as appendages of Alexandria City where we have relatively little in common other than the same Post Office designation. (A case in point was the dispute over fixing Alexandria's decrepit waste water system.) Currently our district is divided up nonsensically presumably to serve some past gerrymandering aim or to make numbers add up. The current map runs totally against the law's demand that we keep "communities of interest" together.

The current districts for the House of Delegates also do not sufficiently keep our community together and dilute our voice in Richmond. We have great hope that the process will produce the fair and logical system of representation in Richmond. For us, the baseline should be Fairfax County's Mount Vernon District.

Thank you very much for your time and attention.

An observation about this procedure. It has certainly been a disappointing start, showing the need for politicians to be completely removed from the process. Yet legal necessity
( Federal law to protect minority representation) and a Virginia law which expresses a requirement not to disfavor either political party, complicate matters. The former law is unavoidable until we can put skin color based race behind us ( not likely for the foreseeable future ), while the latter, shocking in its arrogance and hubris, allows gerrymandering to drive a process promulgated to end it.

Until the "needs" of the politicians are ignored and districts are formulated based on commonalities of interests, compactness of geography and the like ( admittedly, details details details ), success is unlikely. While we must work to remove the cited latter law, I urge you to give as little attention as possible to political party needs. For once, let the politicians work for the position to which they aspire.

RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A
To Whom It May Concern,
Pursuant to Rule 4 (a) of the Rules and Procedures for Implementing the Requirements of Article II Section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting.

## Be Bold, Create a New Gold Standard in Redistricting

The Virginia Supreme Court is in the unique position to redefine and establish the new Gold Standard in Redistricting. This is a unique opportunity to respect the choices of a free people and create colorblind districts that keep those communities whole. Redistricting criteria consistently espouse the principle of compact, contiguous, and keeping communities of interest intact. Finally meeting this goal can now be done with very little effort. The Congressional A5 proposal by the Redistricting Commission is an almost perfect roadmap which can be perfected with two minor changes. First, eliminate ALL split precincts. Second, abandon the arbitrary and unrealistic attempt to make all districts exactly equal in population numbers. These two previous considerations unfailingly cause communities to be unnecessarily divided.

American people have the right and freedom to choose where they will live. With this choice, they establish communities. There are a plethora of reasons involved making this choice whether it be schools, work, family, or other factors such as the current representation or even the racial makeup of the neighborhood. They have the freedom to make that choice, whatever their reasons may be, their choice should be respected. Census blocks and Voting Precincts are, or should be, established to confirm these communities of interest. It should not be up to government political interests to arbitrarily tear apart the people's community of choice.

For example, in the Congressional A5 Map the $3^{\text {rd }}$ Congressional District keeps all of Hampton, all of Norfolk, and all of Portsmouth intact with no split precincts. Additionally, Newport News is intact except for 500 voters in the Saunders Precinct split into the $1^{\text {st }}$ District. The arbitrary desire to have an exactly equal number of voters in each district should not preempt the need to keep these 500 voters intact with their community of interest. Similarly, Chesapeake has several split precincts apparently for the sole reason of keeping a precise number of voters in the districts. By allowing a minor deviation from the ideal number of voters in the entire district, communities of interest could easily remain intact.

Expanding on the above example, the $2^{\text {nd }}$ District should include all precincts in Chesapeake not in the rd

3 District along with all of Accomack, Northampton, and Virginia Beach continuing along the North Carolina border to include all of Isle of Wight, Southampton, Suffolk, and Franklin. If Southampton, for example, would have to be split, all precincts should remain whole. Statewide, no city or county should be split more than once, and no individual precinct should ever be split.

This would put critics of the new districts in the unenviable position of justifying why an exactly equal number of voters is so important that it demands splitting and dividing many precincts and communities across the State. Establishing districts with the primary purpose to keep precincts intact would thereby also establish colorblind political districts since race is not considered. Similarly, critics would need to justify why dividing communities solely based on race is not in itself a racist concept.

This same criteria should also be used for redistricting the General Assembly.
Establishing colorblind districts that respect the citizen's free choice of communities could in fact become the Gold Standard for other states to emulate.

RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A
To Whom It May Concern,

Pursuant to Rule 4(a) of the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting for the Virginia House of Delegates.

I urge you to maintain the unique character of the Columbia Pike corridor and not split it along its most significant identity feature into two House of Delegates districts.

My name is Reid Goldstein and I'm writing about redistricting plans in Arlington, VA. I am a 36year resident of the Columbia Pike corridor in South Arlington and have held multiple positions with civic and governmental organizations during that time, all with the intent to represent and improve my community. I believe that community improvement is not a spectator sport and that the benefits of a healthy community come when we actively work for them. I have been the president of my neighborhood civic association; the President of the Board of the Columbia Pike Revitalization Organization; and I served for 8 years on Arlington County's Housing Commission, to name a few of my community engagement activities. I am currently an elected member of the Arlington School Board.

Columbia Pike is South Arlington's Main Street, which forms a focal point for the entire community both North and South of it. It is THE central corridor for commercial activity, transportation, housing, and the lifeblood of the economic community in South Arlington. Along with community roads of similar size and characteristics to its north (eg, Rt 29, Washington Blvd, and Wilson Blvd), Columbia Pike traverses the entire latitude of Arlington County - from the Pentagon on the east to the county line on the west. The most utilized bus line in the Commonwealth, the \#16 Metrobus, travels down Columbia Pike to and from the Pentagon, which as you know, is the world's largest office building.

Currently the Columbia Pike corridor, and nearly the entirety of South Arlington is contained in one House of Delegates district - the 49th. The proposal to split this district down the centerline of Columbia Pike unnecessarily divides a community whose cohesive feature is the Columbia Pike corridor. This proposal will separate those neighborhoods north of Columbia Pike from their neighbors south of Columbia Pike and combine them with the racially and socioeconomically dissimilar $47^{\text {th }}$ House district. Doing so will dilute the power of the $49^{\text {th }}$ district to
represent the concerns and interests of South Arlington residents. It will also divide the advocacy in the House of Delegates for the interests of residents of the $47^{\text {th }}$ with respect to housing, transportation, and economic livelihood-3 essential components of a healthy community.

- South Arlington is a vibrant, ethnically and culturally diverse community of interest.
- The Columbia Pike corridor is known as "the World in a Zip Code". Residents here hail from 135 countries.
- South Arlington is, and has historically been, the home of a majority of Arlington's lower-income communities and communities of color. They have faced disproportionate economic hardship compared to families in North Arlington and have specific infrastructure and public service needs that are unique to this area.
- The Columbia Pike corridor is disproportionately home to many of Arlington's poorest residents and has benefitted significantly from political cohesion in local and state affairs.
- Speaking as a School Board member, I can say that Arlington Public Schools has historically recognized the unique geography and demographics of South Arlington and the Columbia Pike corridor in its school boundary assignments, Capital Improvement Plans, and annual resource budgeting plans.

Thank you for your consideration of my request.

To whom it may concern,

Pursuant to rule 4(a) of the rules and procedures for implementing the requirements of article II section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting for the Virginia House of Delegates.

South Arlington is defined as anything below Arlington Boulevard. Maps that divide South Arlington by using Columbia Pike as a district boundary are egregious. The communities of interest in this area date back over 150 years and today comprise one of the most diverse communities in Virginia. It should be preserved, not cut in half.

Sincerely,
Steve Baker

December 6, 2021

TO: Justices of the Supreme Court of Virginia and Special Masters
Redistricting@vacourts.gov
The League of Women Voters of Arlington and Alexandria City urges the special masters to draw concise districts that represent established communities of interest (COI). COIs are defined in Virginia Statute as a "neighborhood or any geographically defined group of people living in an area who share similar social, cultural, and economic interests." Preservation of COIs was "extremely important to the Commission" per their guidelines and criteria. To that end, we suggest that districts affecting our area be drawn around the 4 major high schools in the area; WashingtonLiberty, Wakefield, Yorktown, and Alexandria High. These represent long established communities with many commonalities.

Members of The League of Women Voters of Arlington and Alexandria City took advantage of the transparency provisions and attended all the Commission meetings and hearings either in person or virtually. We invite you to read the LWV Virginia redistricting blogs which cover Virginia's redistricting process in detail beginning with the selection of Commission members in January 2021 to the latest information provided through the SCoVA website. We captured citizen comments which are not available from any other source unless one has the time to listen directly to the video transcripts of the meetings and hearings.

Thank you,
Joan Porte
President
League of Women Voters of Arlington and Alexandria City (VA), educating the County's voters since 1944

To whom it may concern,
Pursuant to rule 4(a) of the rules and procedures for implementing the requirements of article II section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting for the U.S. House, Virginia.

Regarding the issue of compactness, Culpeper and Nottoway counties should be removed from the 7th district to help alleviate a large increase in population there. Also, Eastern Henrico county represents an historic community of interest which has been severed from the rest of the county in the districting process. It is egregious to divide the county this way and that section should be restored to the rest of the county.

Sincerely
Steve Baker

Honorable Members of the Supreme Court of Virginia:
When considering the redistricting maps for the geographic area which currently makes up HOD 19, I ask that you please refrain from splitting Botetourt County into three separate House Districts, as was previously portrayed on one of the earlier maps. Botetourt certainly meets the criteria for a "community of interest" and a "community of place", and splitting it into three separate House Districts seriously undermines this precept.

I also ask that you consider the significant geographical challenges (i.e., the Blue Ridge Mountain range) that separate Botetourt and Bedford Counties, in any maps that pair these two disparate geographical areas into the same district. Combining Botetourt with it's neighbors to the north, and west of the Blue Ridge mountains would eliminate this significant geographic obstacle.

Thank you for your consideration,

Mary Bess Smith
Mayor, Town of Fincastle

Dear Ms. Pitney -
I appreciate the opportunity to comment upon the redistricting issue.
Our democracy is in trouble. It will not be extinguished by a big bang, but by the drip by drip undermining of peoples' faith in the democratic process and an undermining of the rule of law.

The redistricting process will be a vivid example of whether Virginia is able to draw the maps without any consideration of political implications, or whether the State will abet a descent into sham democracy, as I have seen vividly in other countries. I urge that we scrupulously take politics out of the redistricting process and draw maps that meet the established statutory criteria of Virginia. Our democratic system is more fragile than many think.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

In redrawing legislative districts, I urge you to strictly adhere to the principle to maintain the communities of interest in the state as required by Virginia law.

As a long-term resident of the Mount Vernon area of Fairfax County, I strongly urge you to not merge Fairfax County and Alexandria city districts or create a district with parts in both jurisdictions.

Many neighborhoods in the Mount Vernon area have an Alexandria postal address which creates confusion. Don't compound the confusion.

There are many factors that create a community of interest for our area, like the U.S. 1 corridor. Mount Vernon is a distinct community of interest and district lines should not cut out and separate communities on either side of the highway.

Mount Vernon and Lee magisterial districts have a natural boundary of Cameron Run and Hunting Creek and the Beltway/l-95/I-495.

Putting Fairfax County residents in an Alexandria district or vice versa creates much confusion about which elected officials represent whom.

Counties and cities are different and are treated differently under state law.

Thank you for considering my views.

To the Honorable Members of the Virginia Supreme Court,
I am a resident and voter in Fairfax County (Reston).
The intent of the voters who passed Amendment 1, was the expectation to end gerrymandering and allow voters to choose their representatives by ensuring their vote was equal to everyone else's.

I was against Amendment 1 as written. It preserved partisan politics in the commission make-up. The VA Redistricting Commission resulted in gerrymandered map submissions including an unnecessary reorientating of congressional district lines. The commission played out as expected with the maps being rejected, punting the redistricting process to the VA Supreme Court.

I appreciate the non-partisan role of SCOVA and thank you for rejecting the initial partisan Special Masters put forth. My hope is that the Judiciary will stay the course and the final product will adhere to fair district maps being produced.

Thank you for allowing the public to submit detailed comments and hope the Court (and Special Masters) will use them to inform their decisions.

Respectfully,
Joanne Collins

I am responding to a November 4 press release with:

## Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia

For the 7 酋 Congressional District, where I live, the current/old map is horribly disjointed. Almost anything would be better. Thank you for doing this!!!

I see map "B5 Statewide CD,"
(That title is on the top right, hope that is the correct way to refer to it. That is the one that has all of my county, Goochland. It includes Western Henrico, Western Chesterfield, and goes West to Charlottesville.)

This makes the most sense versus the others I've seen. The "B5" map groups a mixed area, not a guaranteed safe seat for either party, but these have far more in common than the deep rural areas that were previously used to dilute suburban representation.

Regarding VA House District 56, where I live...
-Currently, District 56 is a small piece of Henrico (Short Pump), Goochland (where I live), and a tiny corridor going North to the West side of Lake Anna. Clearly drawn to deny voters representation.

- I would prefer to have all of Goochland County together.
-Second choice would be for the Eastern third or half of Goochland to be joined with the close parts of Chesterfield and close part of Powhattan. (Or maybe third of Goochland with just Chesterfield.)

We are a suburban area and almost everyone I know is a swing voter. For the VA House, we all know we are in safe districts where the general election is of no importance.

Thank you for doing this incredibly complicated work.

Re: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A

## To Whom It May Concern,

Pursuant to Rule 4(a) of the rules and procedures for implementing the requirements of Article II Section 6-A of the constitution of Virginia, I'm submitting the following comments and suggestions regarding redistricting for the Virginia House of Delegates.

I submit these comments as a resident, since 2006, and active community member of the Columbia Pike Corridor in Arlington (zip code: 22204) and as the former Executive Director of the Columbia Pike Revitalization Organization (www.columbiapike.org, today: Columbia Pike Partnership) from 2009-2016.

Published preliminary maps showed Columbia Pike as the dividing boundary between a northern and a southern future district. Such division ignores the fact that Columbia Pike is, in reality, the historic and current central axis of Arlington's most culturally, socially and economically diverse community, the geographic extend of which is mostly congruent with ZIP code 22204. This community has all the characteristics of a "Community of Interest" as defined by Virginia Code and therefore it is important that it is included in one voting district and not divided in two or three as proposed.

Columbia Pike is Arlington's oldest main street (chartered by Congress in 1810). With its surrounding neighborhoods it forms a major South Arlington corridor. The arrival of a new federal workforce during the New Deal era and the construction of the Pentagon in 1941 were catalysts for vigorous urban growth along both sides of the Pike. Significant "Garden Apartment" complexes (a typical legacy multifamily housing type in Arlington) were constructed on both sides of the arterial street along with the corresponding neighborhood commercial areas. Still today, Columbia Pike ranks among the 2 or 3 highest ridership bus-transit corridors in the Commonwealth. The combination of available and affordable workforce housing, good transit, schools and other services attracted immigrant communities that began to arrive in the region. Columbia Pike soon became what the Brookings foundation described as "World in a Zip-Code", Northern Virginia's most diverse, multicultural neighborhood.

There are more than 85 languages spoken in Elementary Schools along Columbia Pike. Among others, we have vibrant Latinx, Ethiopian, Mongolian and Middle-Eastern communities rooted on both sides of the Pike. Dividing them politically will be detrimental to their community cohesion.

The unique Columbia Pike Documentary Project has been documenting these communities for 25 years. There is a current photographic exhibit at the Virginia Library in Richmond, documenting our community along the Pike.

Arlington County has planned Columbia Pike always as one district, especially since the late 1990s when the County Board adopted the "Columbia Pike Initiative" with the goal of revitalizing the corridor. As a citizen and, later, as the Executive Director of the Columbia Pike Revitalization Organization I was deeply involved with the multiyear community-lead planning efforts. In 2012, the Columbia Pike Neighborhoods Plan received the Benjamin Banneker Award for Outstanding Social Commitment and Community. As a member of the Committee that co-authored this plan I firmly believe that the proposed political division will be detrimental to the revitalization efforts of our community.

On Columbia Pike, we are one, very tightly knit set of neighborhoods. We face significant common challenges. We are much more diverse and less wealthy than Arlington neighborhoods north of Arlington Blvd (R50). We have experienced disinvestment and lagged economically behind the rest of the County. We are the last in line to see investment in schools, public infrastructure, facilities and services. Columbia Pike is still the largest repository of affordable housing in Arlington and home to a disproportionately high share of moderate and low-income residents.

The existence of long-standing community-institutions like the Pike-Presidents-Group (which is the standing conference of all Civic Association Presidents along the corridor) and the Columbia Pike Partnership (former Columbia Pike Revitalization Organization, founded in 1986), is a testimony to the fact that we stand and advocate for our community interests as one community.

It would be therefore appropriate to be represented as ONE district in the General Assembly.
Thank you for your consideration.
With kind regards,
Takis Karantonis
1401 S. Edgewood St.

I am a 17 year resident of Spotsylvania county and have enjoyed my time here. Unfortunately, each of the redistricting maps, US Congress, House of Delegates, and the state senate carve me away from the rest of the county. I live near the corner of Courthouse Road and Leavells Road in the NE part of the county. Each map takes that little slice of the county and removes it from the districts covering the rest. All 3 of my representatives will change under this plan.

I'd like to see Spotsylvania kept together as much as possible and not split between, in some cases, 3 districts.

Thank you

You did not even mention the Mount Vernon District. You split it all up and made a mess without referring to it or explaining it.

To Clerk of the Supreme Court, This is in reference to Procedures for Implementing the Requirements of Article II, Section 6-A. In order to keep the shapes "compact", would it be possible to limit to the number of vertices on the shape of each voting region? A triangle would have 3 vertices, a square 4. I realize it's difficult to follow the boundaries of the Western side of Virginia can cause odd shaped districts, perhaps the state edges can count as one side ( 2 vertices). The number would have to be determined, but it may be a helpful indicator when a shape is not concise.

## EXTERNAL EMAIL

## THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON

 ANY LINKS OR DOWNLOADING ANY ATTACHMENTSGood afternoon,
My name is Jacob Levy. I'm a Virginia Beach resident, lifelong Norfolk/Virginia Beach resident, and 3rd year student at Georgetown Law (where I've studied election law encompassing redistricting under Rick Hasen). I write in regard to the 2nd and 3rd congressional districts in the Virginia redistricting process - my community.

The redistricting commission's allocation of Chesapeake to the 2nd and 3rd is a commendable improvement. However, I write to voice that the northern half of Norfolk should remain in the 2nd district where it has historically been. In turn, Suffolk, Isle of Wight, Franklin, and the eastern sliver of Southampton should remain in the 3rd rather than be moved to the 2nd. These two changes entail virtually identical population sizes and would effectively "cancel each other out", with virtually no other changes necessary in response (This suggestion can be viewed in the image attached at bottom of this email, or at this link: https://davesredistricting.org/maps\#viewmap::118ae4b3-d87b-406c-b9df7611b85e383b)

This largely keeps the redistricting commision's Chesapeake changes intact, while better preserving communities of interest: The Suffolk/Franklin areas share more with Portsmouth and the rest of the 3rd, while the northern part of Norfolk is far more a community of interest with Virginia Beach. I speak from personal experience, having lived in various parts of Virginia Beach but always gone to school in, worshiped in, and visited friends and family in these relevant parts of Norfolk that have always been with us in the 2nd. Further, this proposal strengthens minority representation, keeping the 3rd district closer to its current state than the new redistricting proposal, which diminishes its Black representation. This proposal is also more geographically compact/clean (and as for partisan effect, if that's a consideration, it leaves the already-competitive 2nd district virtually unchanged and still very competitive for both parties.)

Perhaps most importantly, this change to the 2nd/3rd CDs in the redistricting proposal can be done without making any other changes to any other districts on the map. Redistricting is difficult when one change messes up the map somewhere else, and I understand that may leave the Supreme Court hesitant to make changes to the Special Masters' map. However, that is not a problem with this suggested change here: all other districts remain unchanged, and the 2nd/3rd CD's end up at even more equal population parity after this change.

Please feel free to reach out to me with any questions about this proposal to keep these designated parts of Norfolk with their communities of interest in Virginia Beach at 757-477-

2212 or jml437@georgetown.edu. I am more than happy to discuss further in writing, on call, or in person at your convenience.

Thank you for your time and service, Jacob Levy

Mr. Trende \& Dr. Grofman,

I hope this email finds you well. My name is John McAuliff and I live in Warrenton, Virginia. My comments are as follows:

In general, these maps are an immense improvement on the 2010 maps and the work of the commission. I have one suggestion, which is to include the Warrenton precincts in Senate District 31. Warrenton is the heart of Fauquier County, 50-50 politically speaking, and is a town whose economy hums on the tourism and wedding industry as does rest of the Northern Piedmont that this district is designed to include. We have very little in common with Southern Fauquier and points south (though nothing against them either). It also looks a bit odd with the little notch from where Warrenton is excluded.

Sincerely yours,

John

Virginia Redistricting Commission,
Thank you for your service on the historic first Virginia Redistricting Commission, and for your thoughtfulness and consideration during this difficult and complex process. I am writing today to express my support of your recommendation to separate the Virginia Route 123 Core Community. The communities along Route 123 in central Fairfax, including Fairfax City, the Town of Vienna and George Mason University, may very well have social, historic and cultural ties that constitute a community of interest, the reality is that I have never felt any connection to the town of Vienna or any community north of Fairfax City.

The fact of the matter and daily reality of being a resident of Fairfax (Kings Park West) since 2012 is that my family and I have much more of a connection with the neighboring communities of Springfield, Burke, Fairfax City, and George Mason University than any other communities in Fairfax. I see my neighbors in these communities as the ones that we share similar social, cultural, and economic interests with. For me, I have never considered the Route 123 Core community as having any significant effects on the lives of me and my family.

Sharing a main road such as Rte 123 may have in the past contributed to a broder common identity, however shifting demographics and home prices have changed that connection. I don't see where linking Fairfax with Vienna where home prices are significantly higher lends itself to a shared experience.

In conclusion, I support the breaking apart of the Route 123 Core Community. Best wishes, and thank you for your service.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Honorable Justices of the Virginia Supreme Court:
I write to submit a public comment regarding the redistricting maps proposed by the Special Masters. Having reviewed the Special Masters' maps and their explanatory notes, I observe:

1. All in all, this seems like a solid, non-partisan result that accomplishes the goals set out in the new redistricting law.
2. The Special Masters’ maps and the accompanying notes are impressive. Including notes on how they came up with each district and how they considered alternatives is a valuable communication of their logic, impartiality, and transparency. They appear to have been wholly non-partisan and professional. The notes show how and what they were thinking, and how they have tried to meet the competing goals of drawing districts. The rigor of their computational checks also shines through.
3. The interactive maps, with comments pinned to specific locations, are a great communication and transparency tool.
4. I have only one suggestion. The U.S. Congress and state Senate maps apparently would not produce a result to the unfair advantage of either party. However, on page 49 of the notes, the Special Masters explain that the state House of Delegates map could slightly favor the Republicans vs a hypothetically perfect result in the number of Delegates elected that would mirror the statewide proportion of votes in the most recent relevant election. The notes state "This gives Republicans a slight advantage. However, it is difficult to eliminate this advantage given Virginia’s political geography. ... overall, this map is well-balanced, does not unduly favor an[y] party and did not need to be adjusted." I encourage the Special Masters to elaborate on why it is difficult to eliminate this slight Republican "advantage given Virginia's political geography." Throughout the paper they have shown how they considered alternative approaches and why they made the choices they did. If they explain this House map result more thoroughly and how they considered addressing this slight advantage but determined they could not or should not do so, then they will have made it easier to understand and assess their analysis and choices.

To whom it may concern:
The Special Masters' decision to divide the Fredericksburg region into two separate Congressional Districts, and intersperse us with Northern Virginia counties is most disheartening. I do not believe Prince William voters will have our best interests at heart, nor will Loudoun voters have Spotsylvania in mind.

The southern exurbs of the DC metro do not consider themselves to be part of Northern Virginia. Please consider placing Loudoun and Prince William in their own districts, and allow Stafford and Spotsylvania to remain part of the same voting district.

I would express concern to my elected representatives, but given the process, this is my only hope of being heard.

Sincerely, Dustin Howard Stafford, VA

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Hello again,
I have just taken a look at the new maps drawn by the Supreme Court and I would like to make some comments.

My current district is the 36th Senate District. The new map has me as a resident of the 34th district. In my previous comments, I stated that I-95 should be the western boundary of this district. Fairfax County has much more in common than the areas south of Occoquan in Prince William County or West of I-95. Howeer, this map pairs the Mount Vernon District with Springfield. The Fairfax County Board of Supervisors just approved a new Magisterial District Map for our districts and they REMOVED a Springfield district because we do not share common interests. Here is a link to that map: https://www.fairfaxcounty.gov/redistricting/sites/redistricting/files/assets/documents/2021-adopted-redistricting-plan-map.pdf

The newly drawn Fairfax County magisterial district map is a much better representation than the Senate map as West Springfield and the communities east if I-95 are not communities of interest. An example is the Mount Vernon High School that is located on 8515 Old Mount Vernon Road that would be split in half with this map. See the map of the school boundaries on this map: https://www.fcps.edu/sites/default/files/boundary-maps/Mountvernon_HS.pdf The memo that states that the 34th district is anchored in West Springfield and Franconia is not true. Looking at the map of Fairfax County AND the school boundary of Mount Vernon High School will inform the Special Masters where the boundaries should be.

The Mount Vernon Community, which contains many communities of interest which cover the area from the southern edge of Alexandria City (Belle View) all the way south down to the Prince William County line. It goes from the Potomac River west to I-95. The development of the Route 1 corridor from Old Town to Fort Belvoir (EMBARK - details here: https://fairfaxcountygis.maps.arcgis.com/apps/MapSeries/index.html? appid=7e2f347f24bd4f7e909a92b3b2f274a9 ) is of concern to all of the residents who live along the corridor, but is not of interest to West Springfield or even Franconia.

The Mount Vernon Estate is the anchor of the Mount Vernon community. Please take note that Mount Vernon has a very strong community with organizations like the MVCCA (Mount Vernon Council of Citizens' Associations) - https://www.mvcca.org/ and VIC (Ventures in Community) - https://venturesincommunity.org/ - which both include members all along the Route 1 Corridor.

Mason Neck is also a part of the Mount Vernon District, as is Lorton who have nothing in common with the residents of Haymarket and Fredericksburg.

Please share the links above with the Special Masters, because I believe they need to know that the boundaries they have submitted do not recognize Mount Vernon as a community of interest, which we absolutely are.

Sincerely,
Cathy Hosek
Proud Mount Vernon Resident

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

To Whom It May Concern,

It is with some consternation that I have viewed the maps as drawn by the Special Masters for the Supreme Court of Virginia. I am most interested in the Northern Virginia portion of the maps, and thusly that is the area on which I will comment. Having lived in Northern Virginia since 1976, I would say that there are certain areas (the $8^{\text {th }}, 11^{\text {th }}$ and $7^{\text {th }}$ Congressional Districts on the proposed maps), that appear to have been drawn without much information on or consideration of the nature of the communities and flow of life and activities in those new districts. It appears that the Special Masters had no real knowledge or understanding that Mount Vernon et al is one community!

Specifically, the $8^{\text {th }}$ Congressional District, and the $11^{\text {th }}$ Congressional District are of major interest to me, as well as the $7^{\text {th }}$ District on the new map. It is most concerning that sections of the Mount Vernon Community (yes, community is exactly the right word), those land parcels geographically located contiguous with the property of Mount Vernon (Plantation), have been taken from those communities, and in fact from parts of the greater Mount Vernon Community, with which they are most aligned. "Westgate" is in fact the West Gate of the Mount Vernon Plantation, and is intimately involved with community life in the area. Many of the normal civic and life activities of residents are rather neatly and naturally divided on the south by Fort Belvoir. (These are folks who would naturally be talking with each other about how things are going, and what they thought of what the government was doing in their community. A pretty good indicator of common interests!) Additionally, although County governmental boundaries are not necessarily a major consideration, government resources provided to the new $7^{\text {th }}$ District would primarily come from Prince William and Stafford Counties, while the Mount Vernon section of the new district would receive resources from Fairfax County. These resources would necessarily be provided to address quite different priorities. Congressional representation is certainly quite different from County or State House and Senate representation, but I truly believe that when possible, those jurisdictions should be aligned so that the everyday concerns of citizens can be more efficiently and effectively addressed.

My primary suggestion for modifying the proposed maps would be to incorporate those parts of the Mount Vernon area existing between the Mount Vernon Plantation and extending to the northern boundary of Fort Belvoir at US Route 1, and the Northern neck immediately to the south of Fort Belvoir be included in the revised maps for Congressional Districts 8 and 11, allowing Occoquan Bay to be a natural boundary between the $8^{\text {th }}$, the $11^{\text {th }}$ and the $7^{\text {th }}$. I believe that the normal life interests, and thus the necessary representation of residents living in the Mount Vernon and Mason Neck areas more closely align with those residents in the new $8^{\text {th }}$ and $11^{\text {th }}$ than in the new $7^{\text {th }}$.

Respectfully
Bole Fasick

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Good evening,
Please keep Mount Vernon together. The Supreme Court choice of new maps cuts Mt Vernon in half and includes us with West springfield, which we do not have anything in common. Many of us have discussed and agreed on the following. These are some of many of the reason why Mount Vernon must stay together.

I am in the 36th Senate District. It only makes sense that I-95 should be the western boundary of this district. Fairfax County has much more in common than the areas south of Occoquan in Prince William County or West of I-95. Howeer, this map pairs the Mount Vernon District with Springfield. The Fairfax County Board of Supervisors just approved a new Magisterial District Map for our districts and they REMOVED a Springfield district because we do not share common interests. Here is a link to that map: https://www.fairfaxcounty.gov/redistricting/sites/redistricting/files/assets/documents/2021-adopted-redistricting-plan-map.pdf

The newly drawn Fairfax County magisterial district map is a much better representation than the Senate map as West Springfield and the communities east if I-95 are not communities of interest. An example is the Mount Vernon High School that is located on 8515 Old Mount Vernon Road that would be split in half with this map. See the map of the school boundaries on this map: https://www.fcps.edu/sites/default/files/boundary-maps/Mountvernon_HS.pdf The memo that states that the 34th district is anchored in West Springfield and Franconia is not true. Looking at the map of Fairfax County AND the school boundary of Mount Vernon High School will inform the Special Masters where the boundaries should be.

The Mount Vernon Community, which contains many communities of interest which cover the area from the southern edge of Alexandria City (Belle View) all the way south down to the Prince William County line. It goes from the Potomac River west to I-95. The development of the Route 1 corridor from Old Town to Fort Belvoir (EMBARK - details here: https://fairfaxcountygis.maps.arcgis.com/apps/MapSeries/index.html? appid=7e2f347f24bd4f7e909a92b3b2f274a9 ) is of concern to all of the residents who live along the corridor, but is not of interest to West Springfield or even Franconia.

The Mount Vernon Estate is the anchor of the Mount Vernon community. Please take note that Mount Vernon has a very strong community with organizations like the MVCCA (Mount Vernon Council of Citizens' Associations) - https://www.mvcca.org/ and VIC (Ventures in Community) - https://venturesincommunity.org/ - which both include members all along the Route 1 Corridor.

Mason Neck is also a part of the Mount Vernon District, as is Lorton who have nothing in common with the residents of Haymarket and

TWIMC:
Background: I've lived in Northern Virginia since 1964, all but 8 of those years in the Mount Vernon Magisterial District. I spent about 15 years as secretary on Mount Vernon Council of Citizens' Associations. [When I moved from Waynewood to Montebello, my Voting District changed to Lee but I remained in the Mount Vernon Magisterial District.)

It is my understanding that the Mount Vernon Voting District, under the proposed redistricting, would extend further to the west, incorporating areas that have nothing in common with the Mount Vernon area. Extending the MV Voting District into Springfield makes no sense except, perhaps, to "play with" the numbers.

In years past, Mason Neck, which abuts the Mount Vernon area, was part of the MV Voting District; this made sense due to proximity. Reinstituting that plus incorporating the area from Route One to North Kings Highway along the beltway (to correspond with MVMD boundary) would seem to me a more logical way of increasing the voter numbers in Mount Vernon Voting District.

Thank you for your consideration of this point of view.
Yours truly,
Carol Coyle-Shea

## Per your request

Virginia Redistricting Commission,
Thank you for your service on the historic first Virginia Redistricting Commission, and for your thoughtfulness and consideration during this difficult and complex process. I am writing today to ask that you keep the Virginia Route 123 Core Community together, at least as a State Senate district. The communities along Route 123 in central Fairfax, including Fairfax City, the Town of Vienna and George Mason University, have social, historic and cultural ties that constitute a community of interest. They are the 123 Core Community.

The Virginia Code defines communities of interest as a neighborhood or any geographically defined group of people living in an area who share similar social, cultural, and economic interests. Under this definition, the Route 123 Core constitutes one community. Historically, Route 123 has crossed Fairfax County from south to north, connecting Route One to the Chain Bridge. Along that route, Route 123 in central Fairfax is a distinct community, which has survived for generations.

For example, Fairfax City and Vienna are historic towns within Fairfax County, whose existence predate the Civil War. They share a main road (Rte 123), border a key regional Highway (I-66), co-host a METRO station (Vienna), have local historic societies and downtown districts, and share a common identity as small jurisdictions just outside the Beltway. Additionally, Fairfax City runs an independent bus service that connects George Mason University and parts of Fairfax County south and east of the City to the Vienna METRO.

A key part of central Fairfax's identity comes from George Mason University, Virginia's largest public university, and its 33,000 students, not to mention all the professors and staff who live in the area. The University is located partly in Fairfax City and partly in Fairfax County.
The University's neighboring precincts in the County are all part of the University community. In Villa, Woodson, Robinson, Laurel, Bonnie Brae and Sideburn, the community is centered around the University. This is where professors live, and where students rent homes and apartments. These same precincts even share Fairfax postal addresses which end at the VRE railroad tracks, where Fairfax becomes Burke.

In conclusion, please keep the Route 123 Core Community together. The precincts are linked economically, socially and physically and should stay together in redistricting.
Best wishes, and thank you for your service,

Richmond, Virginia 23218-1315

RE: The Rules and Prodecures for Implementing the Requirements of Article II, Section 6-A

Dear Justices:

I have looked at the redistricting maps that were released this week and I am writing to you regarding two considerations:

First of all, I was very pleased to see that none of the maps cross the Blue Ridge Mountains. It is extremely important to the integrity of our "communities of interest" that the Special Masters honored this natural boundary.

Secondly, I noticed the new districts were not renumbered as I and others have previously supported. It would be most beneficial to discussions of our electoral system if 1) each district were numbered in such a way as to be clearly identifiable as a Congressional, State Senate, or State House district while 2) giving each category of districts room for expansion in the event this is needed in the future.

This can be accomplished by preserving the current numbering system for Congressional districts (1-11), and by renumbering the Senate districts 100-139 and the House districts 200-299.

I strongly urge the Court to adopt this numbering system in order to clarify discussions of political districts. This would greatly increase accessibility to the political process for those Virginians not totally steeped in the politics of our great Commonwealth.

Thank you for your consideration of my suggestion.

Very truly yours,
Janet I. Trettner

Muriel-Theresa Pitney

Clerk of the Court
Supreme Court of Virginia
100 N Ninth St
Richmond, VA 23219
RE: rules and procedures for implementing the requirements of article
II, sec. 6-A
To whom it may concern,

Pursuant to rule 4a of the rules and procedures for implementing the requirements of article II section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting for the Virginia U. S. House Districts.

I applaud the panel of experts for working hard to adhere to the principles of compactness and keeping communities of interest together, however, in the case of the 4th District they have been too successful. The 4th CD is clearly racially packed, and as a result, ultimately restrains the voices of minority voters. The easiest way to resolve this issue without compromising compactness is for the 4th to cede a little turf to the 1st who cedes a little to the 5th who cedes a little back to the 4th. The intersection of these three districts near Richmond's west end make it the only plausible location for an adjustment. I would suggest moving all of Henrico County and Richmond north of Broad Street to the 1st CD as a minimal show of good faith in unpacking the 4th. Thank you.

Sincerely,
Steve Baker

Dear Clerk Pitney,
I am writing to request the VA Supreme Court consider mathematical and other non-partisan technical methods to redistrict. There are mathematicians and technology experts who have worked on this issue for many years. Wisconsin is looking at technical options, as well.

Given these advancements, there is no reason to continue with trying to make the redistricting fair with innate human biases.

Thank you for your consideration,
Sincerely,
Susan Perry

I think we should congratulate the special masters. The memo they wrote was like a manual that future commissions could use to do the job. Of course some individual incumbents will be out of jobs. Of course some voters will be in different districts. When things are done fairly, as I think is this case, that's what happens. The voters supported fair maps, and that's what was presented by the special masters. It is not about specific individuals. It's bigger than that. It's about the greater good. With these maps the voters of Virginia got what they voted for: the end of partisan gerrymandering.

I hope the Virginia Supreme Court is able to accept the maps as presented. I don't see how anyone could do a better job for the whole state.

Thank you.

Virginia Redistricting Commission,
The route 123 area is our community, our home. Please keep the district together so we have a voice for our community.

Thank you for your service on the historic first Virginia Redistricting Commission, and for your
thoughtfulness and consideration during this difficult and complex process. I am writing today to ask that you keep the Virginia Route 123 Core Community together, at least as a

State Senate district. The communities along Route 123 in central Fairfax, including Fairfax City, the Town of Vienna and George Mason University, have social, historic and cultural ties that constitute a community of interest. They are the 123 Core Community.

The Virginia Code defines communities of interest as a neighborhood or any geographically
defined group of people living in an area who share similar social, cultural, and economic interests. Under this definition, the Route 123 Core constitutes one community.
Historically, Route 123 has crossed Fairfax County from south to north, connecting Route One to the Chain Bridge. Along that route, Route 123 in central Fairfax is a distinct community, which has survived for generations.

For example, Fairfax City and Vienna are historic towns within Fairfax County, whose existence predate the Civil War. They share a main road (Rte 123), border a key regional Highway (I-66), co-host a METRO station (Vienna), have local historic societies and downtown districts, and share a common identity as small jurisdictions just outside the Beltway. Additionally, Fairfax City runs an independent bus service that connects George Mason University and parts of Fairfax County south and east of the City to the Vienna METRO.

A key part of central Fairfax's identity comes from George Mason University, Virginia's largest
public university, and its 33,000 students, not to mention all the professors and staff who live in the area. The University is located partly in Fairfax City and partly in Fairfax County.
The University's neighboring precincts in the County are all part of the University community. In Villa, Woodson, Robinson, Laurel, Bonnie Brae and Sideburn, the community is centered around the University. This is where professors live, and where students rent homes and apartments. These same precincts even share Fairfax postal addresses which end at the VRE railroad tracks, where Fairfax becomes Burke.

In conclusion, please keep the Route 123 Core Community together. The precincts are linked
economically, socially and physically and should stay together in redistricting.
Best wishes, and thank you for your service,

I am writing today out of concern for the new split of Kings Park West (KPW) along Commonwealth Blvd..

This neighborhood, while large, shares a good deal of common interests and should not be bifurcated in this way. Divisiveness already permeates society right now doesn't seem we need to/should in any way actually formalize it.

Please reconsider.

I would like to comment on the boundaries of the new Assembly District 44.

I believe the map makers missed some key communities of interest in drawing the new boundaries by not being familiar with the geography, school pyramid, and community adhesion in this area.

For example, the bulge in moving the northern Huntington area into the District while shifting the southern section into the western area misplaces key communities. The southern area takes away a distinct School pyramid section and introduces and odd mix of school pyramid into the 44th. Similarly the shift causes residents in the southern section, who are faced with geographic and transportation limits into a relatively inaccessible part of the District. The residents in the north can and do easily access the western area of that area while the residents of the southern portion have limited access to the western section due to a large park and limited through roads in that direction. This would mean that those residents would not readily visit the offices and primary jurisdiction of their assigned delegate.

I urge the Commission to relook at the movement of the respective precincts and realign the Northern and Southern bulges.

Thank you<br>Jay Jupiter

I would like to share an opinion with you.
I feel strongly that redistricting panels should ALWAYS, now and in the future, include an equal number of members of both political parties. That way, no matter who wins elections, redistricting will be as fair as possible. This would allow VA to be a leader in fairness and set an example for other states to follow.

Dear Redistricting Special Masters -
I have read through the redistricting proposals for my area and am in disagreement with the plans.
*Shifting voters who live in Fairfax County along Mt. Vernon Memorial Highway into a new Congressional District with Fredericksburg and Manassas? Instead of the present 8th Congressional District? Doesn't make sense to me, having the district go all the way to Fredericksburg.
*And the proposal to divide up some of the people in the 22303/22306/22307/22308/22309/22315 ZIP Codes? Why? why split up people who live in the same areas? Seems like they would have the same concerns.
*And then we come to the proposal to split in half the Mt Vernon High School Pyramid and Mt. Vernon Supervisor District. This proposal would split neighbors from people across the street, again a problem for this resident.
*The renumbering/re-drawing of Virginia Senate District 34 to 36 and of Virginia House District 16 to 44 and their associated changes...again, this doesn't make complete sense to me, the splitting up of neighborhoods etc.

Thank you for your time.

# Suggestions regarding Special Masters' Proposed Congressional District Map <br> James Call 12-11-21 

I appreciate the work of special masters Dr. Grofman and Mr. Trende. The process outlined in their memo to the court makes good sense and I am very pleased that the court is allowing a full week for citizens to provide direct input on their proposals. I tried to build on the approach of the special masters. My suggestions focus on several changes to their map which would better preserve communities of interest (COI) in Districts 1-5, 7 and 10, make these districts more compact and make them more competitive, while still keeping three "majority minority" districts.

My changes would reduce the number of split counties to five. I used District Builder's census blockgroups in splitting Prince William and Chesapeake. The special masters would no doubt want to use precinct boundaries to achieve such a split, but these were not available to me. No changes to the masters' map are proposed in the two solidly Republican districts (6 and 9) or the two solidly Democratic districts (8 and 11), including in the way the masters have split Roanoke, Bedford and Fairfax counties.

Here is a summary of my proposed changes:
-Richmond area: Divide the metro area into two districts, rather than three by putting all of Henrico in District 1 and putting all of Richmond and Chesterfield in District 4.
-Charlottesville: Keep all of Albermarle and Charlottesville together in District 5. Louisa, Fluvanna and Goochland also fit nicely into District 5 and presumably have more in common there, than with District 1.
-Districts 7 \& 10: Move northwestern Prince William into District 10 where residents have more in common with Loudoun and Fauquier. Place Spotsylvania, King George and Caroline in District 7 where there is a COI along I-95.
-Norfolk area: The way the masters drew District 2 creates a very spread-out district with a separate population west of the Great Dismal Swamp. My map puts Norfolk and a small adjoining area of northwest Chesapeake in District 2 with Virginia Beach, creating a more compact COI. Adding Suffolk, Isle of Wright, Franklin, Poquoson and the rest of Chesapeake to District 3 does not significantly dilute its majority minority character.

Attached is a link to my proposed map which was drawn with the District Builder app. I hope this can be considered as part of next week's public hearing and that it can be helpful to the court.

The proposed map for CD8 cuts off our neighborhood from the rest of the 8th Congressional District and the proposed 34th Senate District. We are all one proud community in Mount Vernon. We have the same Supervisor and School Board member. You have split our high school district, middle school district and even our elementary school district right in half. This map does not respect our community or the historic nature it represents. The area along Dogue Creek belongs with everything to the North and Alexandria. We do not have the same issues as Clifton, Lorton, or Springfield - WE ARE MT. VERNON. Please keep the Fairfax County precinct 613 - Westgate in the 8th Congressional.

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Hello,
My name is Luke Wills, and I am a current resident of Albemarle County. After reviewing the special masters' initial draft for Virginia’s Congressional Districts, I was pleased to see that this new map respects communities of interest and fixes many of the issues with split counties present in our current districts, while maintaining relatively equal distributions of population and ensuring a high level of compactness. As a previous resident of Williamsburg, I was particularly pleased to see that Williamsburg and other north Hampton Roads counties have been grouped with the rest of Eastern Virginia in District 1. This makes sense based on communities of interest I have observed during my time living there.

As a resident of Albemarle County, however, I was disappointed to see my county split between Districts 5 and 10. Albemarle County and Charlottesville make up one continuous community of interest, and in day-to-day life are not split along I-64 as in this current proposal. I hope that the court and the special masters will consider what I feel is a just and equitable solution to this issue: moving the entirety of Albemarle County and Charlottesville to District 10, and moving Louisa, Fluvanna, and Goochland Counties into the 5th District, which includes much of Southside and Piedmont Virginia, areas they have much more in common with than the eastern counties they are currently grouped with in District 1 . The portion of Spotsylvania County currently in District 10 could be transferred to District 1, aiding in compactness and population distribution. This change would also require some minor border adjustments in Henrico and Chesterfield Counties. The change would affect districts $1,4,5$, and 10 . I have included an example of what such a change might look like below:
https://www.virginiaredistricting.org/legdistricting/comments/plan/521/1
This change would allow the 10th District to contain all of Loudon, Fauquier, Rappahannock, Culpeper, Madison, Orange, Greene, and Albemarle Counties, as well as Charlottesville City, with no county splits and greater continuity for communities of interest. District 10 would remain the median district for the purposes of partisan analysis, coming in 2 points more Democratic than the state as a whole, rather than 2 points more Republican under the current plan. Other points of analysis would remain unchanged, except that District 5 would be expected to become 3 points more Republican.

I believe that this change would create a more compact, fair map that would respect my community of interest without upsetting the racial, political, or geographic balances the special masters have skillfully crafted under their current proposal. I hope they will consider this change.

Thank you, Luke Wills

To Whom It May Concern,
And I suspect it is of no real concern; except, of course, to the citizens who will be affected by yet another government farce.

I see the usual plan is to be enacted in Isle of Wight as well as many other counties. The plan of Divide and Conquer, while an old favorite of tyrants and those others who would care to gain control, should be outlawed in a land supposedly based on the God Given freedoms of man. Of course, the powers that be would never outlaw their devices, nor would they relinquish their control over the masses. Therefore, I'm sure I'm wasting my time in stating that the proper, just, and righteous endeavor for the Supreme Court of Virginia to undertake would be to scrap all Redistricting plans and set about to clean up the disaster that has stolen free and fair elections, true representative government, and implemented Communist rule while slowly stealing the rights of the people of Virginia.

Sincerely, Paula Buss

## EXTERNAL EMAIL <br> THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

This is the information I just received about the proposed redistricting:
[The proposed redistricting of] the district cuts off at Mt. Vernon Memorial Highway. Voters in 22308 will be grouped with voters on Rolling Road in Springfield instead of with their neighbors on Ferry Landing Road. The 8th Congressional District cuts off in approximately the same spot and puts George Washington's Mt. Vernon Estate in the same district as Quantico, Manassas, and Fredericksburg!

Voters in zip codes 22308 typically do not have any occasion to go to Rolling Road, much less vote with them. This is due to significant physical distance between the two areas. An extraordinary distance would be put to put the Mt. Vernon Estate in the same district as Quantico, Manassas and Fredericksburg.

Why is this being done? The Mt. Vernon area is diverse and its residents work tirelessly to connect on all levels. Voting is one great way we connect in our diverse community, no matter the party. To disassemble all the positive work we have seen over the 48 years we have lived in Mt. Vernon through redistricting, and thus put us further apart rather than closer, boggles our minds.

Please revisit the redistricting map for our area and make some small, but significantly needed adjustments.

Thank you,

Alexanddria, VA 22309

Having lived in the Wessynton community for over twenty years, we totally reject the redistricting of our neighborhood to be shunted south almost an hour away!
We live in the Little Hunting Creek watershed, shop here, attend schools here, seek medical care here, attend church here and find our friends among the people here. We drive these roads, walk these streets and are concerned with the taxes that maintain them. We have our mail delivered by the local post office, not Fredericksburg. Our vote should remain here, not fall on deaf ears 45 minutes away by interstate roads!! Perhaps we should consider voting in Maryland???

Special Masters and associated personnel,
It is with deep disappointment that I express my opposition to the proposed maps for Virginia's congressional districts. To split areas of Henrico and Chesterfield sharing common interests, to add minority voices to the already solidly Democratic district including the city of Richmond, and to delete a district served by a current congresswoman who has done so with a high level of effectiveness are unconscionable. Each of these gestures is a direct reflection of a desire to silence voices of activists, women, and minorities who have led our area in making progress around obtaining greater equity in representation.

Please reconsider these maps. A healthy democracy demands that each citizen's voice is heard. These maps seem to have the opposite effect.

Please go back and think again. The proposed redistributing splits up communities in ways that don't make any sense. Please do your due diligence and reconsider the plans. Splitting up school pyramids and splitting up Mt. Vernon-makes no sense from a representative standpoint.

You can do better.

To the honorable Virginia Supreme Court Judges/Justices,
I am writing to you after reviewing the proposed redistricting maps submitted to the court by your two appointed special masters. I am in utter shock at how transparent these maps are in favor of Democrat politicians and voters. Under the proposed maps, the Chesterfield County house of delegates and state senate seats are moving significantly to democrat advantages in the manner that south Richmond residents, Eastern Henrico, and Petersburg residents were carved up to dilute GOP and independent voter strength in the county. The districts will become significantly less competitive, not only in the house of delegates but also the state senate and especially the 4th congressional district for the US House. It seems Chesterfield was split between the 4th and 5th to provide incumbent protection. In addition to this, the proposed 7th congressional district is in fact a new district designed to deliver Democrats a safe seat.

Your honors, I implore you to review these areas of the state in all three of the special master submitted maps and carefully consider how best to address the lack of competition that is created by the special masters' partisan proposals. I honestly do not think the actual Democrat politicians in the house of delegates could have done a more efficient job than the special masters in submitting a clearly partisan array of maps, all to the advantage of the Democrat party.

And to finalize, I leave with you my final point for consideration. The maps were based on an Attorney General race from 2017, however, a much more recent election this year for the Attorney General race would have served the public interest by providing a much more competitive set of statistics that would be of benefit to all Virginia voters.

Please consider increasing the perceived competitiveness of the districts for house of delegates, state senate, and US House as what has been submitted to you is in fact a farce meant to grant electoral advantage to one party over the other.

Sincerely and with the utmost respect, Scott Mitchell Mann

We live in the Mount Vernon neighborhood along route 235.
The new proposed Congressional map carves us out of our community and puts us with faraway Fredericksburg. The new map cuts us off from our own high school just down the road.

Please don't split us off from our own community and put us in a district that isn't ours.

We live in Westgate precinct \#613 just west of Mt Vernon which is a part of the Mt Vernon magisterial district of Fairfax County and the Mt Vernon High School attendance area. The proposed maps for Virginia senate and house districts and congressional districts all separate us from the rest of the Mt Vernon magisterial district and put us into districts to the south from which we are effectively separated by Fort Belvoir.

Westgate precinct \#613 needs to be in the same districts as the rest of the Mt Vernon magisterial district of which we are a part. In short, Westgate precinct should be made part of House district \#16, Senate district \#34, and Congressional district \#8.

In general, the proposed maps do not reflect natural community boundaries and seem to needlessly divide magisterial districts and school attendance areas.

I fully support this redistricting. As my District Supervisor is planning on lying to and ignoring those he serves and wants to move a homeless shelter from a sparsely dense area (that will end up in another district after the redistricting) to a parcel of land in our residential neighborhood that was slated for a fire station only. If this redistricting helps in anyway to make our voices heard more, then please make this happen!

Gentlemen:
Mount Vernon, Virginia, is a historical area that has always identified itself as part of River Farm along the Potomac River. This unites it with the areas north of the district outline you currently propose. Changes to one area affect the other. Your separation goes against long standing sense of unity within that area and needs reconsidered. We live in the River Farm area and regularly participate in events at Mount Vernon itself, and we own property along Richmond Highway such that those areas need a unified approach to traffic solutions, schools, shopping and more. It is illogical to separate those areas.

To Whom it May Concern,

I understand that you have myriad considerations as you redraw districts in VA to correct gerrymandering. I do not envy you, but even so I have concerns about what I fear is a plan with lasting negative effects in our neighborhood.

Please consider in your planning that the Mount Vernon area has a strong community with a long and rich history of shared print and online media, public transportation infrastructure, schools and churches. 22308 belongs in this community rather than the one shared by Rolling Road in Springfield, quite far away. The Mount Vernon High School Pyramid would be split under your current plan (my home is not in the MVHS pyramid but I am concerned nonetheless), and our Mount Vernon Supervisor district would be split in half. Fort Belvoir area would also be split in half, which makes no community sense at all.

The Mount Vernon, and more specifically Fort Hunt area, has a very active and thriving close-knit community. Please consider redrawing your districting to reflect the existence of our district as an existing community.

Thank you for your consideration,
Leslye Barrett

Following are comments/criticism/suggestions for the new redistricted map.

- I-95 should be the western boundary. Everything East of I-95 in Fairfax County has much more in common than everything to the South of the Occoquan or West of I-95
- West Springfield and the communities East of I-95 are not communities of interest.
- Mt. Vernon High School pyramid is split in half
- Fort Belvoir is split in half
- The Greater Mount Vernon Community is not recognized or even mentioned.
- The Mount Vernon Estate \& communities along Mt. Vernon Memorial Highway are drawn in with Woodbridge and Lorton instead of Mt. Vernon
- The exact same southern boundary is used for the 8th Congressional District because there seems to be no recognition of Mt. Vernon's existence as a distinct community

Thank you.

Hello,
I just saw the rezoning map for the House of Delegates. It's really strange to me that you would want to separate the current district, especially in 22309. I think that the district should consist of the following zip codes and their dwellings their entirety. Zip codes 22306, 22307, 22308 and 22309. I do not understand why you would want to move the Frye/Pole Rd district to the Hayfield district and the Mt. Vernon Hwy district to the Lorton community. All of these communities are separated by Ft. Belvoir, the Coast Guard and a marsh. The Telegraph Rd people do not know the headaches of the Rte 1 constituents.
Please redraw your districts in accordance with the communities in mind.
Erika Kronstedt, 22306

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Dear Special Masters,
I am highly in favor of redrawing voting districts in Virginia in a fair and nonpartisan way. At this point, we the citizens have to trust the Special Masters to take on this task in a completely non-partisan way because this is what the citizens voted for. We expect no less.

However, I am disappointed that the Mt. Vernon Community is being divided in the new redistricting map proposals. I am also disappointed that there is no mention of $M t$. Vernon in the description as if our community does not exist or matter. My street in the Mt. Vernon community will be grouped with voters from an area much farther from me and having different needs and concerns. I don't see how this fits with the "communities of interest" rules. I don't feel that my vote will enable me to elect a representative who will be looking out for my concerns. I don't understand how our community can be divided this way. We are one of the older communities in Fairfax County and deserve to be treated as a community of interest.

I can understand the difficulty in drawing a map that makes everyone happy, but separating my Mt. Vernon neighborhood from the rest of Mt. Vernon is a bad idea. Already, my mailing address does not represent the actual community of Mt. Vernon in Fairfax County where I live. Please don't separate my Neighborhood's voting districts and stick us with completely different communities just to be fillers! Keep us together following the "communities of interest" rule.

I ask that you reconsider this aspect of both proposals.
Please don't divide the Mt. Vernon Community as you consider the redistricting map proposals.

Sincerely,

## Patricia Quick

We very much appreciate all of the hard work put in by the Special Masters. We realize that nobody will be 100 percent happy, and we won't quibble at all about a few oddities that we have noted. And in the scheme of things, the matter we mention below may seem minor, too. But we bring it to your attention nonetheless. Please note that we don't live in the affected area; we live in the adjacent Villages precinct and just noticed this as we were reviewing the maps.

We were surprised to see a random division of the Kingstowne precinct (421) in Fairfax County. At present, Kingstowne precinct is entirely in the 8th congressional district. The new map shows it divided between the 8th and 11th congressional districts.

Kingstowne precinct remains entirely within the Lee magisterial district, entirely within the new 17th House of Delegates district, and entirely within the newly reconfigured 34th Senate district. The very large planned community called Kingstowne has several major roads that divide it. Kingstowne precinct is just one of several precincts within the larger Kingstowne community, but major roads, like Kingstowne Village Parkway, are the dividing lines.

In this screenshot, the 11th district is bright green; the 8th district is purple. The area between Beulah Street and Kingstowne Village Parkway, south of Manchester Boulevard, is Kingstowne precinct. The diagonal border at the top of this map cuts across a series of parking lots (perhaps following some high power lines?). The jagged line follows Park Village Drive and Kingstowne Commons Drive, community roads within Kingstowne, not major thoroughfares. It not only divides a community of interest, it divides an actual community.

If you extended the purple area west along Manchester Boulevard and south along Beulah Street, you'd keep it entirely in the 8th.

Thank you again for all of your hard work on redistricting.

I live in Westgate precinct \#613 which should be included in Congressional district \#8 along with the rest of the Mt. Vernon magisterial district. The map puts us into Congressional district \#7 from which we are totally separated by Fort Belvoir.

The current recommendations will have a substantial negative impact on our community for the next 10 years, by separating key areas from Mount Vernon District cores in Mount Vernon and in Lorton. While the Special Masters' memo references the communities of Springfield and Franconia, there is NO mention or recognition of the existence of the Mount Vernon Community anywhere in their explanatory memorandum and their maps. This matters because what they've done ignores our area as long-standing "communities of interest" sharing print media, public transport infrastructure, and institutions such as schools and churches and, I believe as a result, are proposing to shift voters:

- Living along Mount Vernon Memorial Highway into a new Congressional District centered on Fredericksburg and Manassas instead of the existing 8th Congressional District and the rest of Mt. Vernon; and
- Living in Mason Neck or East of I-95 into a Virginia Senate District with people in Lake Ridge, Woodbridge, and Crosspointe, instead of with everyone else who lives in 22303, 22306, 22307, 22308, 22309, and 22315.

Please do NOT continue with the ill advised recommendations for redistributing of those of us living on land that was part of the original Mount Vernon estate.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Hello,
I am writing to oppose the proposed redistricting changes to District 36 of the Virginia Senate.

In its current form, Senate District 36 represents a distinct community along the Route 1 corridor. Our community from Alexandria to Fort Belvoir has suffered neglect from state and local politicians for decades. The state and Fairfax County has invested hundreds of millions of dollars in Northern Virginia from Fairfax to McLean, but they have neglected the Route 1 corridor.

It is only recently through the persistent leadership of the state representatives representing the Route 1 corridor that our area has begun to attract the transportation and other investments by state and local authorities.

The proposed redistricting would dilute the representation of the Route 1 corridor by dividing it up into smaller pieces among a larger number of districts.

It is absolutely essential that the redistricting preserve the geographic integrity of the Route 1 corridor, so our distinct community and interests can be effectively represented.

V/r,
Mateo Dunne

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Please note that I would like to have another committee look at the new redistricting proposals - they just don't make sense 1 . It seems that there is no consideration or mention of the existing Mount Vernon Community and keeping the 8th district in -tact including those living along Mount Vernon Memorial Highway it is closer to Northern Virginia so why would it be place in Fredericksburg and Manassas which are about 1 hour drive away. I'd like to propose that the Mount Vernon Community not be split up - it affects schools, churches, etc.
2. Also why won't those living in Mason Neck and East of I-95 remain where they are in Fairfax County? Just looking at the new proposed map shows them with Fredericksburg and Manasass - it doesn't make sense. Please reconsider.
Thank you for your help.
Sincerely,
Stephanie L. Shaefer, Ph.D.

## Hi,

I live at 8308 Winslow Ave in Springfield, VA 22152. Currently, the map cuts through our tiny, quiet street of 10 houses, splitting me from my neighbors across the street. This makes it hard to get a cohesive response when such a small neighborhood is cut in half. Fairfax County is looking are combining my side of Winslow (north) with my neighbors on the south for magistrate districts. I would like to propose that the commonwealth take the same borders or at least merge the neighborhood into one or the other. Again, it is such a weird way to split a quiet, small street, and it makes it more difficult for a neighborhood to be represented when split between two. I attached a photo. Thanks for considering!

Ashley

Hello Redistricting,
Current maps show the Mount Vernon Magisterial District being split in two ways that would be harmful to our close community. I, personally, live in Lorton and have far more in common with the Fairfax County community than the Prince William one I am proposed to be moved into. I also serve the Mount Vernon District through the Supervisor's office and splitting the long standing community in half would be detrimental.

While the Special Masters' memo references the communities of Springfield and Franconia, there is NO mention or recognition of the existence of the Mount Vernon Community anywhere in their explanatory memorandum and their maps. This matters because what they've done ignores our areas as long-standing "communities of interest" sharing print media, public transport infrastructure, and institutions such as schools and churches and, I believe as a result, are proposing to shift voters:
<!--[if !supportLists]-->• <!--[endif]-->Living along Mount Vernon Memorial Highway into a new Congressional District centered on Fredericksburg and Manassas instead of the existing 8th Congressional District and the rest of Mt. Vernon; and
<!--[if !supportLists]-->• <!--[endif]-->Living in Mason Neck or East of I-95 into a Virginia Senate District with people in Lake Ridge, Woodbridge, and Crosspointe, instead of with everyone else who lives in 22303, 22306, 22307, 22308, 22309, and 22315.

Both proposals basically split the Mount Vernon High School Pyramid and Mount Vernon Supervisor District in half. They've also drawn the renumbered 34th Senate District (formerly 36th) from Mount Vernon and Lee Districts over I-95 and into Springfield by Rolling Road. They've also redrawn a renumbered 16th House of Delegates District (formerly 44th) into Wilton Woods and Burgundy Farm instead of including the Mount Vernon Estate and the neighborhoods along Mount Vernon Highway. On the positive side, Belle View/ New Alexandria has been included in the $16^{\text {th }}$ House of Delegates District.

Please do not do this.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

When I moved to Virginia more than three decades ago, it was to the Mount Vernon area of Fairfax County. A place where I have raised a child, attended church, and given of my time, treasure, and talent to make this community better for all who reside on land that was once George Washington's. This is a unique place bordered by Richmond Highway on the west, the Beltway to the north, the Potomac River to the east, and Mount Vernon, our namesake, and Fort Belvoir to the south. This community is reinforced by our magisterial district, Supervisor and School Board member, and Senator and Delegate with similar boundaries.

The line proposed by the Special Masters for our 8th Congressional District and Senate District 34 cuts out our namesake, divides the boundaries for Mount Vernon High School in half, and splits Fort Belvoir in two - abandoning our community of natural interest.

We and our Lee District neighbors on the west side of Richmond Highway have worked together to use existing community structures to strengthen and support our natural community of interest. This is best highlighted and supported by the years of work that VDOT and Fairfax County have expended on the US 1 Bus Rapid Transit project that builds on our north/south community of interest. One need only look at the 2015 final report (link to it here). More appropriate would be using I-95 as the western boundary.

I acknowledge that a western boundary of I-95 creates a district that covers a significant area. However, Fort Belvoir has a lot of open land and the Mason Neck area is zoned for very low density. The result of using I-95 as our western border is a district that has approximately the same population as Springfield, even though Springfield is geographically much smaller.

The Special Masters propose to take our natural north/south community of interest, hack it in half, and convert it from north/south to east/west. Springfield is not part of our community. Including it makes a mockery of a natural community.

Thank you for your consideration.

To Whom it May Concern:

I am a resident in the Mount Zephyr Subdivision, within the Mount Vernon District, for 17 years. I am member of the Mount Zephyr Citizens Association, my husband has served as Treasurer. I am past President (2020) of the Whitman Middle School PTSA and actively engaged in the MVHS PTSA. Both my husband and I serve as adult volunteers in local BSA and Girl Scout Troops. Our children play or have played in Gunston soccer, Woodlawn Baseball and Fort Hunt Baseball/basketball. We use the Sherwood Hall library. Neighbors send their children to St. Louis Catholic school. Our lives take place in the Mount Vernon/Ft Hunt/Ft Belvoir area as is common with most of our neighbors. I understand that the current redistricting proposal would not affect boundary changes but would affect our School Board representative and Supervisor. The Mount Vernon Pyramid is one of FCPS most needed areas and our needs are specific. We would suffer further disruption to our schools should our school board member and Supervisor be split between our high school and elementary schools.

I am not sure how Mount Vernon was not considered as a community of interest when considering redistricting for the next 10 years. I cannot imagine how dividing my neighbors who use the same libraries, schools, shopping, RT 1 Hwy as I do would serve them. Fredericksburg and Manassas share no overlapping parks, school, shopping or transportation issues with Mount Vernon. I do not support any proposals which splits the Mount Vernon HS Pyramid or the Mount Vernon Supervisor's District in half.

Please reconsider these plans and listen to the comments from the people living in this district.

Sincerely,
Marie Zito-McCain

With the current districts being gerrymandered as they are--House, Senate and Congress--and you ignore incumbents and apply neutral principles, including the requirement of rough partisan parity with the past election, it is logical and almost inevitable that a host of incumbents will be paired and/or be removed from their districts. The problem isn't the drawing of the current map, it is the effect of the prior gerrymandered maps and absent major demographic changes over the next decade is unlikely to be repeated, if neutral principles continue to be applied 10 years from now. Please do not be influenced by the expected effect of past gerrymandering on these new districts. It is worth repeating that no district is $\qquad$ 's district (fill in an incumbent's name). They merely serve in office temporarily. Every district belongs to the people who reside in it. This shake-up was entirely expected, and the Special Masters were right to ignore incumbents. There may indeed be good reason to shift some boundaries but effects on current office holders is not one of them.

## To: The Honorable Members of the Supreme Court

We are writing to express our extreme dismay over the proposed boundaries of Proposed District 34 and to ask you to revise them.

We have lived in the Mount Vernon area (in the Waynewood subdivision), on land formerly owned by George Washington, for about 40 years. We love our community and are very active in its civic life, the schools and area non-profits that serve the community. The area and neighborhoods surrounding Mt. Vernon estate have been recognized as the community of Mt. Vernon for 200 some years. Your proposed map inexplicably splits our community in half, and excludes the Mason Neck area which has long been recognized as part of our community. We have one citizen's council that ably represents our community, two high schools, one school board member and one supervisor. Our community has been diverse voices and groups but we are all linked by long association, including our schools, our two school pyramids and our representatives. Your proposed map would split the Mount Vernon school pyramid in half and split Fort Belvoir in half. These divisions do not make sense and would injure the long established relationships that make the Greater Mount Vernon community a distinct and vibrant community.

Linking us with West Springfield, on the other side of I-95, does not make sense. Describing our Mount Vernon community as a "Springfield and Franconia District" does a grave disservice to the residents of the greater Mount Vernon area. We recommend that I-95 be the western boundary of our district. The neighborhoods east of I-95 have far more in common currently and historically than with the neighborhoods south of Occoquan and west of I-95.

We urge you to reconsider your boundaries. It is important to the greater Mount Vernon neighborhoods and community that we continue to be recognized as an important and distinct district and not one that is lost by being folded into Woodbridge, Lorton and West Springfield.

Thank you for your consideration.

Respectfully,
Elaine Kolish and David FitzGerald

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

TO: The Virginia Supreme Court
SUBJ: Communities of Interest, Redistricting

In redrawing legislative districts, I urge you to strictly adhere to the principle of
maintaining communities of interest in the state as required by Virginia law, especially in the Mount Vernon area of Fairfax County where I have lived for 50 years.

The Special Masters' memorandum and maps totally fail to recognize the longstanding existence of the Mount Vernon community and seem to create arbitrary lines that do not represent communities of interest.

Mount Vernon and Lee magisterial district are clearly-defined, Fairfax County districts which share print media, infrastructure and wellestablished institutions such as commercial districts, schools and churches.

Both proposals basically split the Mount Vernon magisterial district and the Mount Vernon High School pyramid in half. A district with a clear community of interest would not abruptly stop in the middle of Mount Vernon magisterial district nor split Fort Belvoir in half. The entire Fort Belvoir installation is an integral part of the Mount Vernon community, not just half of it. Stretching the $34^{\text {th }}$ (formerly 36 th) Senate district across I-95 into Springfield by Rolling Road is clearly not a community
of interest.

The U.S. 1 corridor is clearly a community of interest around which many institutions, much public infrastructure is built. Major transportation projects are underway along the Fairfax County portion of the U.S. 1 corridor, including new bus rapid transit stations. Mount Vernon is the anchor of the community of interest.

These maps also effectively split the Hayfield Secondary School District in half. Parents in that and the Mount Vernon pyramid areas would not be voting with parents of other students in the same schools under your proposals. All of the parents of a school would most likely have common interests.

Senate district 34 boundaries should respect natural, historic communities of interest and extend at least to the Occoquan River and keep Mason Neck in the district, as it is a longstanding part of the current Mount Vernon magisterial district, geographically, culturally and otherwise.

For Congressional district 8, the special masters split Kingstowne between two different congressional districts. Kingstowne is the largest homeowners' association in the area and should not be divided. It is a clear community of interest.

The boundaries of these districts should treat eastern Fairfax County as one compact community of interest in the state and federal districts you are mapping.

Thank you for considering my views.

Glenda Booth

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Special Masters and associated personnel,
It is with deep disappointment and much concern that I express my opposition to the proposed maps for Virginia's congressional districts. To split areas of Henrico and Chesterfield sharing common interests, to add minority voices to the already solidly Democratic district including the city of Richmond, and to delete a district served by a current congresswoman who has consistency led with a high level of effectiveness are unconscionable. Each of these gestures is a direct reflection of a desire to silence voices of activists, women, and minorities who have led our area in making progress around obtaining greater equity in representation. This is not a move that will strengthen Democracy, trust in government, or resolve the painful partisan divide that has been encouraged by those who would use that to maintain power.

Please reconsider these maps. A healthy democracy demands that each citizen's voice is heard. These maps seem to have the opposite effect.

Sincerely, Beth Hedquist 4671 C Four Seasons Ter. Glen Allen, VA. 23060

Muriel-Theresa Pitney<br>Clerk of Court<br>Supreme Court of Virginia<br>100 North Ninth Street, $5^{\text {th }}$ Floor<br>Richmond, Virginia 23219-1315

## Dear Madame Clerk:

My name is Tom Davis. Formerly, I represented Virginia's Eleventh Congressional District in the United States Congress for fourteen years, but today I write as an interested citizen to comment on the congressional map proposed by the Court's special masters on December 8, 2021. I applaud the effort of the Special Masters and this Court for conducting a process that is vastly improved over those of our neighboring states. The Special Masters generally did a good job with the information they had available and given the constraints and timeline under which they were operating. With that said, I would like to offer a few suggestions that I think will improve the map, particularly with regard to the traditional redistricting metric of compactness and overriding one person one vote concerns.

My first proposed change is to the northeastern boundary of the Ninth Congressional District. Congressman Morgan Griffith, a resident of Salem, Virginia, has ably represented this district for more than a decade in Congress, and yet the special masters' proposal places the City of Salem in the adjacent Sixth Congressional District. This writes Rep. Griffith out of his own district and moves him to a district with incumbent Congressman Ben Cline, creating an unnecessary primary election between the two when a slight adjustment would allow both to continue representing their current districts. I propose returning the City of Salem to the Ninth Congressional District where it currently resides, and offsetting the resulting change in population by shifting the portions of Roanoke County south and east of the City of Roanoke into the Sixth District.

My other suggested changes all involve the four Northern Virginia districts: the Seventh, Eighth, Tenth, and Eleventh. The special masters' proposal creates districts in this region that are not terribly compact; the Tenth District, which extends all the way from Leesburg to Charlottesville, is particularly unwieldy, but the Seventh District is also more dispersed than it needs to be due to a misguided attempt to follow county lines rather than communities of interest that reside below the county level. For example, I continue to firmly believe that Interstate 66 or Highway 50 form a more natural boundary between two districts than do the boundaries of Fairfax County. Therefore, I propose the following changes, all of which are depicted on the sample map I have submitted with this letter:

1. The borders of the Eighth District should be slightly adjusted so that it does not extend west of the Beltway, and so that it encompasses the area around Mount Vernon.
2. The Eleventh District should be shifted south. I understand that the special masters were trying to keep this district contained within the borders of Fairfax County, but the county itself does not really constitute a single cohesive community of interest. It makes more sense to combine the dense and diverse communities in Manassas, Manassas Park, and the I-95 corridor with the southern portion of Fairfax County (basically, everything south of Highway 50 and west of the Beltway) than it does to combine them with the more exurban parts of the county along Highways 7 and 267.
3. The Tenth District should constitute all of Loudoun County and the parts of Fairfax that are west of the Beltway and north of Highway 50. Suburban Loudoun County has more in common with the adjacent parts of Fairfax than it does with the rural counties that the special masters have placed within the district in their proposal. These changes make the Tenth District substantially more compact, moving from a 0.38 on the Reock scale and 0.25 on Polsby-Popper to 0.44 and 0.39 , respectively.
4. The Seventh District should encompass everything outside of Loudoun County that the special masters currently include in the Tenth, including Stafford County, the City of Fredericksburg, and the less dense parts of Prince William County west of the I-95 corridor. This creates a district that is substantially more compact than the special masters’ Tenth District and follows more natural boundaries on the basis of community density. This also improves the Seventh District's compactness scores, from 0.34 to 0.57 on Reock and 0.25 to 0.4 on Polsby-Popper.

The four changes to the Northern Virginia districts that I have proposed above result in a dramatically more compact map, moving from a statewide score of 0.384 on the Reock scale and 0.291 on Polsby-Popper to 0.411 and 0.321 , respectively. My changes also better reflect the underlying communities of interest in this part of the Commonwealth that I know and love. I hope that you will consider making these changes to create a better overall map.

Finally, the map and files I have attached here use the Commonwealth's adjusted population, and ensure that there is no more than a deviation of one person between the Congressional districts. I have serious concerns that the tentative map's proposed Congressional deviations would violate the U.S. Supreme Court's command that Congressional Districts be nearly as equal in population "as practicable."

Please do not hesitate to contact me if you require any additional information, and I look forward to presenting my proposal during the Court's public hearing next week.

From: Thomas E. (Ted) TThompson and Lynn C. Thompson: 93344 Brambly Lane, Alexandria, 22309
To: Chief Justice of the Virginia Supreme Court and Member Justices
Special Masters
Others who may be recipients on this email site

We offer the following comments on the redistricting maps presented for consideration by the Special Masters.

1. While the Special Masters' memo specifically references the communities of Springfield and Franconia which are rather sprawling large communities, there is absolutely NO mention or even recognition of the existence of the compact and closely knit Mount Vernon Community anywhere. The Special Masters completely ignore our areas as long-standing "communities of interest" sharing print media, public transport infrastructure, and institutions such as schools and churches and, I as an apparent result, are proposing to shift voters by:
o Shifting those voters Living along Mount Vernon Memorial Highway into a new Congressional District centered on Fredericksburg and Manassas instead of the existing 8th Congressional District and the rest of Mt. Vernon; and
o Shifting those voters living in Mason Neck or East of I-95 into a Virginia Senate District with people in Lake Ridge, Woodbridge, and Crosspointe, instead of with everyone else who lives in 22303, 22306, 22307, 22308, 22309, and 22315.
2. They have also redrawn a renumbered 16th House of Delegates District (formerly 44th) into Wilton Woods and Burgundy Farm instead of including the Mount Vernon Estate and the neighborhoods along Mount Vernon Highway
3. Moving George Washington's Mount Vernon Estate and the Mount Vernon Civic Association from Senate District \#34 and putting it in Senate District \#33 with Woodbridge and Manassas violates five redistricting requirements: we are split from our contiguous community, does not respect our natural boundaries, denies our participation with our larger community of interest in District \#34, removes us from an existing compact district and fails the equity test - many minority students from \#34 are taught in our community where we have historically provided Food for Thought packets for those students in greatest need and we raise funds for our community food banks among our Association Members to support the families in need along the Rt 1 corridor.
4. Moving George Washington's Mount Vernon Estate and the Mount Vernon Civic Association from Delegate District \#16 and putting it in Delegate District \#19 with Lorton, Gunston, and Woodbridge violates five redistricting requirements: we are split from our contiguous community, does not respect our natural boundaries, denies our participation with our larger community of interest in District \#16, removes us from an existing compact district and fails the equity test - many minority students from \#16 are taught in our community where we have historically provided Food for Thought packets for those students in greatest
need and we raise funds for our community food banks among our Association Members to support the families in need along the Rt 1 corridor.
5. Moving George Washington's Mount Vernon Estate and the Mount Vernon Civic Association from Congressional District \#8 and putting it in Congressional District \#7 with Prince William and Stafford Counties violates five redistricting requirements: we are split from our contiguous community, does not respect our natural boundaries, denies our participation with our larger community of interest in District \#8, removes us from an existing compact district and fails the equity test - many minority students from \#8 are taught in our community where we have historically provided Food for Thought packets for those students in greatest need and we raise funds for our community food banks among our Association Members to support the families in need along the Rt 1 corridor.
6. The proposed redistricting for our Congressional, Virginia Senate and Delegate Districts has unreasonably removed the Mount Vernon Estate and surrounding neighbors from the Mount Vernon District and requires that we be combined with Prince William and Stafford Counties and the towns of Woodbridge, Manassas, Lorton and Gunston. By not recognizing the Mount Vernon neighborhood we are unreasonably and split.
7. While Lynn and I recognize the necessity of redrawing the various districts to rid Virginia of Gerrymandering, these maps totally remove us from the Mt Vernon neighborhood area splitting and are unfair and uncalled for by the guidelines.
8. As a result, we are split from our contiguous community. The redistricting does not respect our natural boundaries, denies our participation with our larger community of interest.
9. We support the comments made by Mr. Thomas Russel and our District Supervisor Mr. Dan Stork.

Respectfully Submitted:
Ted and Lynn Thompson

To Whomever it May Concern;
Thank you so much for your work on this very important project; it is much appreciated.

However, I would like to direct your attention to the Mount Vernon area. My husband and I have lived for seven years in the Riverwood HOA, adjacent to the Mount Vernon Estate. Our neighbors are either retired, or work in government-affiliated jobs within the Military District of Washington, for the most part. Most of our areas of interest (shopping, etc) lie to the North. Politically and culturally, we are more similar to those in the $8^{\text {th }}$ District. Request your consideration to place the Mount Vernon areas omitted from the initial proposal within the $8^{\text {th }}$ District, it makes much more sense than the proposed configuration. I also concur with a comment proposing that the $8^{\text {th }}$ district boundary extend to the Occoquan River, which would better align the Ft Belvoir Community northward, as well. Thank you for your consideration in this matter.

Sincerely,
Lt. Col. Constance Graham, USAF, Ret

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Dear Special Masters,
First, I am highly in favor of redrawing voting districts in Virginia in a fair and nonpartisan way. At this point, the citizens of Virginia have to trust the Special Masters to take on this task in a completely non-partisan way because this is what the citizens voted for. We expect no less.

However, I am extremely disappointed that the Mount Vernon Community is being further divided in the new redistricting map proposals. Mount Vernon is a special community running from the city of Alexandria down and around George Washington's Mount Vernon -- the five farms that were originally part of that estate have an incredible history that should not be destroyed. I am also disappointed that there is no mention of Mount Vernon in the description as if our community does not exist or matter.

My street, Nomini Lane, in the Mount Vernon community will be grouped with voters from an area much farther from me and have different needs and concerns - e.g., we dine in Old Town Alexandria almost exclusively -- and feel that Alexandria, the City and the portion of Fairfax County, are bonded. I don't see how this fits with the "communities of interest" rules. I don't feel that my vote will enable me to elect a representative who will be looking out for my concerns. I don't understand how our community can be divided this way. We are one of the oldest communities in Fairfax County and deserve to be treated as a community of interest.

I can understand the difficulty in drawing a map that makes everyone happy, but separating my Mt. Vernon neighborhood from the rest of Mt. Vernon is a bad idea. Already, my mailing address does not represent the actual community of Mt. Vernon in Fairfax County where I live. Please don't separate my Neighborhood's voting districts and stick us with completely different communities just to be fillers! Keep us together following the "communities of interest" rule.

## I ask that you reconsider this aspect of both proposals.

Please don't divide the Mount Vernon Community as you consider the redistricting map proposals.

Sincerely,

Paula G. Lettice

Several years ago, we, the residents of the Mt. Vernon area, wanted to differentiate our geographical area from the City of Alexandria with which we are in many cases identified. Mt. Vernon, VA was thought to be the proper identity. That never happened.
Now we are being broken up and absorbed by other geographical areas.
Is there a way we can go back to the drawing board and define our boundaries and declare ourselves THE MOUNT VERNON, VA community?
That's what I want to see.

My address: 4817 Stillwell Ave, Alexandria, Virginia 22309
This address is in Fairfax county, my precinct is Westgate.
Generally, I think the redistricting of our location is much better than it has been. Specific comments follow:

1. Congressional District: Like the change. We are moved from the 8th district to the 7th. We are now grouped with Mason Neck, Woodbridge, Manassas, and Fredericksburg which is fine. While not all parts of any district are going to share specific issues, we have much more common with district 7 than Arlington and the City of Alexandria.
2. Senate District: Like the change. Our new area is much like the Congressional District and it is good to have some common boundaries. The old Senate District was insanely twisted. Again, we have more in common with Woodbridge and Mason Neck than Alexandria City.
3. Delegate District: Like the change. Again, the consistency of boundaries is refreshing and the issues we'd address with our Delegate would be common with those of our Senator and US Congressman. Excellent!

Well done in our case!

Thank you!

I live in Westgate precinct \#613. The proposed redistricting for our Congressional, Virginia Senate and Delegate Districts has removed the Mount Vernon Estate, the Mount Vernon Civic Association and our Westgate neighborhoods from the Mount Vernon District and requires that we be combined with Prince William and Stafford Counties and the towns of Woodbridge, Manassas, Lorton and Gunston. Moving George Washington's Mount Vernon Estate and the Mount Vernon Civic Association from Congressional District \#8 and putting it in Congressional District \#7 with Prince William and Stafford Counties violates five redistricting requirements: we are split from our contiguous community, does not respect our natural boundaries, denies our participation with our larger community of interest in District \#8, removes us from an existing compact district and fails the equity test - many minority students from \#8 are taught in our community where we have historically provided Food for Thought packets for those students in greatest need and we raise funds for our community food banks among our Association Members to support the families in need along the Rt 1 corridor.

These same concerns apply to Senate District \#34 and putting it in Senate District \#33 with Woodbridge and Manassas, and Delegate District \#16 and putting it in Delegate District \#19 with Lorton, Gunston, and Woodbridge. These moves violate five redistricting requirements: we are split from our contiguous community, does not respect our natural boundaries, denies our participation with our larger community of interest in Senae District \#34, and Delegate District 16 and removes us from an existing compact district and fails the equity test - many minority students from \#34 are taught in our community where we have historically provided Food for Thought packets for those students in greatest need and we raise funds for our community food banks among our Association Members to support the families in need along the Rt 1 corridor.

The current recommendations will have a substantial negative impact on our community for at least the next 10 years, by separating key areas from Mount Vernon District cores in Mount Vernon and in Lorton. While the Special Masters' memo references the communities of Springfield and Franconia, there is NO mention or recognition of the existence of the Mount Vernon Community anywhere in their explanatory memorandum and their maps. This matters because what they've done ignores our area as long-standing "communities of interest" sharing print media, public transport infrastructure, and institutions such as schools and churches.

How can Mount Vernon and its original Westgate lands be removed from the Mount Vernon District? Please do not continue with this ill-advised proposal.

Cordially,
Norman M. King

I strongly disagree with the splitting up of the Mt. Vernon district. We have lived here for 47 years, and have been completely satisfied with the community services and the representation. We live on Robertson Blvd, and our neighborhood would be impacted. Please reconsider this decision.

My comments relate to your maps for delegate and senator ( new senator district 34/ new delegate districts 16 and 19)

I want to remind you that George Washington - the father of our Country owned the land my community is on. He also lived at Mount Vernon Estate located just south of my community and owned a large swath of the districts you are now trying to tear asunder. An area we all care about.

I am shocked that your redistricting maps FAIL to even recognize that a Fairfax County Virginia has a historical area called Mount Vernon! You need to restore this "community of interest" ( educational, environmental, transportation)!

Senate 34th map: You need to redraw the map- this needs to include the following boundaries- The Potomac River on the east to Telegraph Road on the West and from the City of Alexandria boundary on the north to the Prince William county line to the south.

Delegate maps: They should also include the boundary lines mentioned above-
The communities within these natural and man made boundaries all care about education, land use development, the arts and recreation, transportation needs and environmental protections. We work, play and live in the same geographic areas and should not in any way be torn apart by number crunching without any consideration for us as individuals and our "common interests".

Hello,

I have just taken a look at the new maps drawn by the Supreme Court and I would like to make comments.

My current district is the 36th Senate District. The new map has me as a resident of the 34th district. The proposed map pairs the Mount Vernon District with Springfield

The Fairfax County Board of Supervisors just approved a new Magisterial District Map for our districts and they removed a Springfield district because we do not share common interests. The newly drawn Fairfax County magisterial district map is a much better representation than the Senate map as West Springfield and the communities east of I-95 are not communities of interest.

The Mount Vernon Estate is the anchor of the Mount Vernon community. Please take note that Mount Vernon has a very strong community with many established organizations. The Mount Vernon community covers the area from the southern edge of Alexandria City (Belle View) all the way south down to the Prince William County line. It goes from the Potomac River west to I-95.

Please share the links above with the Special Masters, because they should know that the boundaries they have submitted do not recognize Mount Vernon as a community of interest. It is.

Sincerely,

Allison Niedbala
Long Time Mount Vernon Resident

Thank you for accepting comments on the proposed maps drawn by the Special Masters appointed by the Supreme Court of Virginia. We are of the opinion that the maps should not split up or otherwise separate contiguous neighborhoods, schools, or magisterial districts.

Thank you.
Ruth \& George Driscoll-Lovejoy
Alexandria, VA 22306

The Honorable Muriel-Theresa Pitney, Clerk
Supreme Court of Virginia
P.O. Box 1315

100 N. Ninth Street
Richmond, VA 23219-1315

Re: Proposed Second Congressional District Map

Dear Ms. Pitney,
Pursuant to Rule 4a of the rules and procedures for implementing the requirements of article II section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting of the Second Congressional District of the U. S. House of Representatives. It appears that the map proposed by the Special Masters for this district is deficient in the following respects, and should be redrawn:

Compactness/Contiguity - The Special Masters have recommended a weird, sprawling Dr. Seuss-style "Crooked J" shaped map that skips around the heart of what should be the Second District: the northern portion or all of Norfolk, along with all of Virginia Beach. In addition to Norfolk and Virginia Beach, out of geographic necessity, the Second District must also include the Eastern Shore, since the Eastern Shore is a peninsula connected only by a lengthy bridge-tunnel to Virginia Beach, with no land connection to any other Virginia jurisdiction. The Second District should also arguably include the northern portion of Chesapeake, which would make a district that is contiguous, compact, and urban/suburban in nature.

In contrast, there is no reason whatsoever to include the largely landlocked and extremely rural Southside jurisdictions of Southampton County, City of Franklin, Isle of Wight, or City of Suffolk. Adding these jurisdictions to the Second Congressional District creates a district that is neither compact nor contiguous on even a cursory examination, as the Special Masters specifically acknowledged.

On its face, the odd meandering Crooked $J$ shape of this proposed district encircles and skirts contiguous jurisdictions that should have been included in the Second Congressional District, particularly Norfolk. The Crooked J map makes a large loop around nearby jurisdictions, then wanders miles away, deep into random unrelated, non-contiguous rural areas that have nothing whatsoever in common with the core South Hampton Roads cities of Norfolk and Virginia Beach. Unfortunately, the Crooked J shape provides instant visual evidence of unacceptable gerrymandering, and negates the contention that a fair and equitable process occurred.

Communities of interest - Norfolk and Virginia Beach are inextricable communities of interest. The prime geographic feature of these two communities of interest is the water - the Atlantic Ocean, the Chesapeake Bay, Hampton Roads (the waterway that connects the ocean to the bay), and the mouths of important rivers such as the Elizabeth River, Little Creek, the Lynnhaven, and the Lafayette River, as well as numerous smaller inland waterways. These prominent water features define both the shoreline and the inland areas around them, and have led to thriving military, industrial, and tourism uses in both of these adjoining cities.

Military bases include numerous huge U.S. Navy installations. The crown jewel of these military bases is in northern Norfolk: Naval Station Norfolk is the largest naval base in the world, headquarters of the U.S. Navy's Fleet Forces Command, with an adjacent airfield, aircraft
carrier strike groups, military sealift command, destroyer squadrons, a submarine squadron, six aircraft carriers, and amphibious assault ships.

Along its border with Norfolk, Virginia Beach hosts Joint Expeditionary Base Little Creek. Further inland, Virginia Beach features the huge Naval Air Station Oceana, where the fighter jets and pilots that are an integral part of the aircraft carriers from Naval Station Norfolk are housed and trained, as well as the 203rd Red Horse Squadron of the Air National Guard at Camp Pendleton. Further east are the Fort Story Army/Navy joint base and the Dam Neck Naval Base.

The pre-eminence of U.S. military bases in the neighboring cities of Norfolk and Virginia Beach leads to a large population of active duty military service members and veterans and their families, who live in the surrounding urban/suburban areas of both cities. In addition, many private companies of all kinds support the military, veterans, and their families. For example, the private shipbuilding/repair companies along the Norfolk waterfront of the Elizabeth River serve both military and private customers. At the nearby Waterside/Town Point Park area, water-themed tourism, restaurants, and offices predominate. Similarly, on the Chesapeake Bay and at the Virginia Beach Oceanfront and other beaches, the tourism industry also thrives, with restaurants, hotels and entertainment that complement the military presence in the area.

Norfolk and Virginia Beach are two sides of the same coin, interchangeable and intertwined communities of interest which should share and anchor the Second Congressional District.

In contrast, the largely landlocked and unrelated non-contiguous rural areas of Franklin, Southampton, Isle of Wight and Suffolk do not belong in the Second District. Their pointless inclusion in the Crooked J map smacks of political manipulation, not geographic or social necessity. In fact, while the Special Masters describe this Crooked J map as competitive, the Second District would reportedly go from currently competitive to +5 or more Republican if that skewed map were adopted.

Federal Court Case - On information and belief, the current boundaries of the Second and Third Congressional districts were set by a federal court case that spanned several years, culminating in the U.S. District Court's adoption of the present map at Personhuballah v. Alcorn, 155 F. Supp. 3d 552 (E.D.Va. 2016). The federal District Court found that the Third Congressional District had been racially gerrymandered in an unconstitutional manner. The Court relied on neutral principles such as land contiguity and compactness to alter both the Second and Third Congressional districts so that minority voters were not "packed" into a single tortuous district, diluting their influence and ability to elect other candidates of choice. Given the history of this litigation, the Special Masters and this Court should adhere to the Personhuballah precedent/map as closely as possible, as in its present non-compliant Crooked J configuration, the Second District map will most likely be litigated in federal court again.

Other Considerations - No doubt it will be argued that the meandering, odd-shaped Crooked J map was necessary to create a minority opportunity district for the current incumbent in the Third Congressional District, who has been in office since 1993. At best, that is a convenient and cynical fiction. The Crooked J map emanated from the Special Masters' inexplicable choice to map Districts $8,11,6,9$, and 3 , then to take up the Second Congressional District last in chronological order in the Hampton Roads area.

In the first instance, the Special Masters demonstrated little justification for changing the courtordered Third Congressional District, which they conceded "consistently elects the candidate of choice of the African-American population." Nevertheless, they shifted all of the adjacent City of Norfolk from the Second to the Third Congressional District, split Chesapeake between
the Second and Third Districts, and cut out the heart of the Second District, including the neighborhood and longtime home in the City of Norfolk of the current two-term female incumbent. To add insult to injury, they shifted Isle of Wight, Franklin, Suffolk, and a portion of Southampton County, all rural jurisdictions extremely far away from Virginia Beach/Norfolk, to the Second District.

The Special Masters claimed that the remapping of the Third Congressional District "left few options" for the Second District. However, they failed to explain why they found it necessary to drastically change the recently litigated and established boundaries of the Third District in the first place. The Special Masters admitted that the Second District "loses functional contiguity" in Suffolk and Chesapeake, a problem that was not present with the prior boundaries established by the federal District Court. Moreover, while emphasizing (or overemphasizing) compactness for the Third District, they completely abandoned any pretense of an attempt to create a compact Second District with their sprawling, ugly, disjointed Crooked J design.

Gender Equity - The Special Masters contend that they developed the Crooked J Second District Congressional map without any knowledge of the identity of the incumbents. Given the skewed results, that contention strains credulity. Two of the three female members of Congress in Virginia have had their hometown drawn out from under them by this all-male map-making team. None of the eight male members of Congress have suffered that arbitrary and unfair fate. The results speak for themselves, and should be remedied immediately.

The Second District incumbent is a retired U.S. Navy Commander who overcame many obstacles to graduate from the U.S. Naval Academy, become a nuclear engineer, and serve on active duty as a surface warship officer for two decades. She went on to achieve election to Congress twice, defeating the same male former member of Congress two times in a row, despite fraud and criminal conduct by his campaign. She is a brilliant Representative of the anchor cities of Norfolk and Virginia Beach, as well as the entire Hampton Roads area. Her decades-long public service and sacrifice should not be wiped out by the hasty and illinformed stroke of the Special Masters' pen.

Women and minorities in the Second and Third Districts should not be abandoned to fight over the leftover scraps of Hampton Roads geography. Each of these overlapping groups (overlapping in the sense that many women are also minorities) have complementary, not competing, equity interests that supersede the Special Masters' arbitrary and unreasoned insistence that the re-mapping of the Third District occur at all, and that it occur first before any consideration of a balanced, fair re-mapping of the Second District. These protected equity interests of minorities and women should be put front and center, considered first, not last, and resolved before the Special Masters address more mundane matters.

Like racial equity, gender equity is not an "issue," an interest, or an elusive, far off goal. It is an imperative, a constitutional and legal right. This map should be modified so that it does not discriminate against the few courageous representatives of over half of Virginia's population, women. To quote the late Justice Ruth Bader Ginsburg (quoting Sara Grimke), "I ask no favor for my sex. All I ask of our brethren is that they take their feet off our necks."

It is now 2021, soon to be 2022. In 2021, women deserve their rights, from the courts and from all branches of government. That includes the right and opportunity to elect candidates of their female gender, without arbitrary, unfair interference from the courts and the Special Masters. The electoral fate of the current two-term female incumbent in the Second District should depend on the will of the voters of the Second District, not on the whims of unelected Special Masters who report only to the court.

Conclusion - For the reasons set forth above, the City of Norfolk, or at least the northern portion of the City of Norfolk, should be returned to the Second District map. The Special Masters should be specifically instructed to re-design the Crooked J map so that the Second District is compact, contiguous, and recognizes communities of interest, with an equal emphasis on the rights of the affected communities and all of their voters to elect candidates who achieve the imperative of gender equity as well as racial equity.

Respectfully submitted,
Susan B. Potter, Esq.

Good Morning:
The Special Masters' memo references the communities of Springfield and Franconia, there is NO mention or recognition of the existence of the Mount Vernon Community anywhere in their memorandum and their maps.

This matters because what they've done ignores our areas as long-standing "communities of interest" sharing print media, public transport infrastructure, and institutions such as schools and churches.

I am writing to request that Gunston Manor Subdivision remain part of the Mt. Vernon District.

Sincerely,
Ann Marie Andrews

 ANY LINKS OR DOWNLOADING ANY ATTACHMENTSI live at 5122 Richardson Street, Chincoteague, VA 23336 and want to comment on the Masters' proposed redistricting of the $2^{\text {nd }}$ and $3^{\text {rd }}$ Congressional Districts. By intentionally placing Elaine Luria's home address outside the boundaries of the revised $2^{\text {nd }}$ District, the Masters appear to be targeting her in order to deprive her of reelection and to increase the number of Republican Congressional members who represent Virginia voters. Indeed, that conclusion is made obvious by how the Maters also propose to redistrict other female Democratic Congressional members.

In addition, the Masters have split between the $2^{\text {nd }}$ and $3^{\text {rd }}$ districts voters, such as active and retired military members, who live in Norfolk or Virginia Beach and clearly share common interests. By doing so, the Masters will dilute those voters' power to advocate effectively for issues that affect them.

Moreover, by removing Suffolk and the Isle of Wight from the $3^{\text {rd }}$ District, the Masters will create much less compact $2^{\text {nd }}$ and $3^{\text {rd }}$ Districts. That change will complicate Congressional members' ability to keep in touch with voters whom they represent, especially by meeting in person with them.

For those reasons, I urge the Masters to recommend district boundaries that properly address those issues.

Thank you.
Ralph Michael Smith

Please note my strong objections to the Special Masters' current redistricting recommendations which would separate key areas away from the Mount Vernon District core in Mount Vernon and in Lorton. If accepted, these recommendations will have a substantial negative effect on the Mount Vernon community.

The Special Master’s report fails to mention or recognize the existence of the Mount Vernon community, contrary to the interest of those of us who live in that community, and despite the fact that we are a long-recognized "community of interest." In addition, the plan would split the Mt. Vernon High School Pyramid, and groups the Mt. Vernon estate with voters on Rolling Road in Springfield instead of their neighbors on Ferry Landing Road.

Please do not accept the illogical and fact-blind redistricting plan which has been proposed by the Special Masters.

Dear Redistricting Committee:
I am glad that you are involved to make fair distributions of voters within the State. Unfortunately, somehow you overlooked the Mount Vernon District as an established entity which should not be torn apart. Not sure how the population count goes, but cutting up the District into so many parts does not seem proper or fair. Please look at that again and see if you can repair it. Thank you for your work and efforts!

PUBLIC COMMENTS Submitted By:<br>Holly Wyatt Herman<br>24th Senate District, 25th House District, and Augusta County Resident

Four comments of concern: 1) Augusta County should not be split; and its two independent cities within it should be maintained as a whole. There are many regional partnerships and communities of interest among the county and cities and they are strengthened by maintaining representation within one Senate district.
2) These seats are indeed the people's seats and no one individual should be given preference to maintain a seat. Institutional knowledge, however, is a highly valued trait to ensure an effective and prudent government (knowledge of policy, process and the history of both). It sincerely concerns me that both the Senate and House maps will certainly result in a loss of much institutional knowledge and though we may be making progress in improving our partisan mapping process, we will in fact, take some steps back in good governance with the loss of that institutional knowledge. 3) I do not believe nesting of the districts is helpful and it actually creates problems of splitting up communities of interest. For example, Rockingham Co and Augusta Co are number $1 \& 2$ in the state for an agricultural based economy. The nesting plan has broken up those two communities of interest. There are other nesting problems throughout the maps. 4) Had the maps started at another area of the state rather than the Winchester corner, the maps might look differently and not split where they do. I would suggest picking a few different corners or middle of the state to develop maps without nesting parameters and see if they can better reflect communities of interest.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

I live in Westgate precinct \#613. The proposed redistricting for our Congressional, Virginia Senate and Delegate Districts has removed the Mount Vernon Estate, the Mount Vernon Civic Association and our Westgate neighborhoods from the Mount Vernon District and requires that we be combined with Prince William and Stafford Counties and the towns of Woodbridge, Manassas, Lorton and Gunston. Moving George Washington's Mount Vernon Estate and the Mount Vernon Civic Association from Congressional District \#8 and putting it in Congressional District \#7 with Prince William and Stafford Counties violates five redistricting requirements: we are split from our contiguous community, does not respect our natural boundaries, denies our participation with our larger community of interest in District \#8, removes us from an existing compact district and fails the equity test - many minority students from \#8 are taught in our community where we have historically provided Food for Thought packets for those students in greatest need and we raise funds for our community food banks among our Association Members to support the families in need along the Rt 1 corridor.

These same concerns apply to Senate District \#34 and putting it in Senate District \#33 with Woodbridge and Manassas, and Delegate District \#16 and putting it in Delegate District \#19 with Lorton, Gunston, and Woodbridge. These moves violate five redistricting requirements: we are split from our contiguous community, does not respect our natural boundaries, denies our participation with our larger community of interest in Senae District \#34, and Delegate District 16 and removes us from an existing compact district and fails the equity test - many minority students from \#34 are taught in our community where we have historically provided Food for Thought packets for those students in greatest need and we raise funds for our community food banks among our Association Members to support the families in need along the Rt 1 corridor.

The current recommendations will have a substantial negative impact on our community for at least the next 10 years, by separating key areas from Mount Vernon District cores in Mount Vernon and in Lorton. While the Special Masters' memo references the communities of Springfield and Franconia, there is NO mention or recognition of the existence of the Mount Vernon Community anywhere in their explanatory memorandum and their maps. This matters because what they've done ignores our area as long-standing "communities of interest" sharing print media, public transport infrastructure, and institutions such as schools and churches.

How can Mount Vernon and its original Westgate lands be removed from the Mount

## Vernon District? Please do not continue with this ill-advised proposal.

Subject: State Redistricting

I live in Westgate precinct \#613 which should be included in Congressional district \#8 along with the rest of the Mt. Vernon magisterial district. The map puts us into Congressional district \#7 from which we are totally separated by Fort Belvoir.

The current recommendations will have a substantial negative impact on our community for the next 10 years, by separating key areas from Mount Vernon District cores in Mount Vernon and in Lorton. While the Special Masters' memo references the communities of Springfield and Franconia, there is NO mention or recognition of the existence of the Mount Vernon Community anywhere in their explanatory memorandum and their maps. This matters because what they've done ignores our area as long-standing "communities of interest" sharing print media, public transport infrastructure, and institutions such as schools and churches and, I believe as a result, are proposing to shift voters:

- Living along Mount Vernon Memorial Highway into a new Congressional District centered on Fredericksburg and Manassas instead of the existing 8th Congressional District and the rest of Mt. Vernon; and
- Living in Mason Neck or East of I-95 into a Virginia Senate District with people in Lake Ridge, Woodbridge, and Crosspointe, instead of with everyone else who lives in 22303, 22306, 22307, 22308, 22309, and 22315.
Please do NOT continue with the ill advised recommendations for redistributing of those of us living on land that was part of the original Mount Vernon estate.

Dear Special Masters,
I am highly in favor of redrawing voting districts in Virginia in a fair and nonpartisan way. At this point, we the citizens have to trust the Special Masters to take on this task in a completely non-partisan way because this is what the citizens voted for. We expect no less.

However, I am disappointed that the Mt. Vernon Community is being divided in the new redistricting map proposals. I am also disappointed that there is no mention of $M t$. Vernon in the description as if our community does not exist or matter. My street in the Mt. Vernon community will be grouped with voters from an area much farther from me and have different needs and concerns. I don't see how this fits with the "communities of interest" rules. I don't feel that my vote will enable me to elect a representative who will be looking out for my concerns. I don't understand how our community can be divided this way. We are one of the older communities in Fairfax County and deserve to be treated as a community of interest.

I can understand the difficulty in drawing a map that makes everyone happy, but separating my Mt. Vernon neighborhood from the rest of Mt. Vernon is a bad idea. Already, my mailing address does not represent the actual community of Mt. Vernon in Fairfax County where I live. Please don't separate my Neighborhood's voting districts and stick us with completely different communities just to be fillers! Keep us together following the "communities of interest" rule.

I ask that you reconsider this aspect of both proposals.
Please don't divide the Mt. Vernon Community as you consider the redistricting map proposals.

As a long-time resident of the Mount Vernon area, I am extremely concerned by the proposed maps breaking our historic community in two. Neighbors to the east/south of Mount Vernon Memorial Highway are being grouped into districts either centered in Springfield or with Fredericksburg, Manassas and Quantico.

The residents of the areas being severed from the Mount Vernon Community share our schools, parks, libraries, transportation, infrastructure and community activities for which they deserve to have a voice and a vote. The proposed maps that sever the historic Mount Vernon Estate and surrounding neighborhoods from our districts need to be corrected immediately.

I applaud the effort to approach redistricting in a non-partisan way, but the Special Masters were clearly uninformed about this historic community. Please remedy this error before the final draft maps are submitted for approval. Thank you for your attention.

Respectfully,
K. Hanrahan

Redistricting Public Comments
Submitted by Judith W Wyatt
Resident of Augusta County

* The splitting of Augusta County and the cities of Staunton and Waynesboro is a prime example that you have failed your task to keep local communities of interest together! These three communities have spent years building shared partnerships and they work best within one Senate District.
* Re institutional wisdom-I understand you were to give no thought to present incumbency representation. But, you have also given no thought to the loss of institutional wisdom made possible by the current proposals.
* Surely there are better choices for mapping than the one currently proposed. I suggest a new starting point that will hopefully address peoples’ concerns.

Thank you,
Judy Wyatt

VIA EMAIL TO Redistricting@yacourts.gov
Honorable Muriel-Theresa Pitney, Clerk of Court
Supreme Court of Virginia
P.O. Box 1315

100 North Ninth Street
Richmond, VA 23219-1315
Re: Decennial Redistricting Pursuant to the Constitution of Virginia, art. II, §§ 6 to 6-A, and Virginia Code § 30-399

Dear Ms. Pitney:
Pursuant to the Court's Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, I write on behalf of Frederick County and its Board of Supervisors (collectively, "Frederick County" or "the County") regarding the state legislative and congressional district maps proposed by the Court's Special Master. I write for two specific reasons, first, to request the opportunity to participate on behalf of Frederick County in the Court's December 15 public hearing, and, second, to include here full detail of slight adjustments that Frederick County requests to Special Masters' maps.

Frederick County last week completed its own local magisterial district redistricting, with the Board of Supervisors adopting new maps for the County's magisterial districts and precincts. Concerning the congressional and state legislative districts, Frederick County very much appreciates that the Special Masters' proposed maps leave the County intact within a single congressional district, a single State Senate district, and just two House of Delegates districts. I write now, however, to respectfully request two possible adjustments the Special Masters' proposed maps for House of Delegates Districts 31 and 32.

Frederick County seeks, if and to the extent possible, to have its precincts and, preferably as well, its magisterial districts, correspond with the House of Delegates districts. Most importantly, the County's two requested adjustments will help avoid the prospect of confusing and disfavored split precincts. See Va. Code § 24.2-307. With respect to the magisterial districts, the County's two requested adjustments would keep the entirety of three of its six magisterial districts within House District 32 and the entirety two other of its six magisterial districts within House District 31. Only one of the County's six magisterial districts would be split between two

Honorable Muriel-Theresa Pitney, Clerk of the Court
December 14, 2021
Page 2

House of Delegates districts, an outcome the County recognizes is inevitable, given the location of the City of Winchester, being wholly surrounded by the County, and given the combined population of the City and the County.

Taken together, the County's two requested adjustments will not increase the deviation in population totals between the two House of Delegates districts; in fact, the two adjustments will reduce the deviation in population totals. The currently proposed populations of the two districts are 87,054 for District 31 and 85,347 for District 32 ; the proposed populations of the two districts, with the County's revision, would be 86,680 for District 31 and 85,721 for District 32 Accompanying this letter are maps that illustrate the County's suggested adjustments: one overall map (Map 1), illustrating both changes together, and then four separate maps, two illustrating the subject areas without the County's requested changes (Maps 2 and 4) and two illustrating the subject areas with the County's requested changes (Maps 3 and 5).*

The County's first requested adjustment, identified as " $\# 2$ " on the accompanying overall map (Map 1), involves shifting an area bounded by, generally, Marlboro Road on the north, the Town of Stephens City, Interstate 81, and Route 11 on the east, Vaucluse Road on the south, and Hites Road on the west, from House of Delegates District 32 to District 31. Maps 2 and 3 accompanying this letter illustrate the area in greater detail. The specific census blocks involved, 13 in all, are as follows:

| 510690506002055 | 510690506002017 |
| :--- | :--- |
| 510690506002054 | 510690506002016 |
| 510690506002051 | 510690506002014 |
| 510690506002031 | 510690506002013 |
| 510690506002030 | 510690506002012 |
| 510690506002029 | 510690506002006. |

510690506002028
This shift would involve moving a population of 205 people.
The County's second requested adjustment, identified as "\#3" on the accompanying overall map (Map 1), involves shifting an area bounded by, generally, Sulphur Spring Road on the north, Opequon Creek on the east, and Route 50, Airport Road, and Victory Road on the southwest, from House of Delegates District 31 to District 32. Maps 4 and 5 accompanying this letter illustrate the area in greater detail. The specific census blocks involved, 32 in all, are as follows:

[^23]Honorable Muriel-Theresa Pitney, Clerk of the Court
December 14, 2021
Page 3

| 510690509001047 | 510690509001010 |
| :--- | :--- |
| 510690509001046 | 510690509001009 |
| 510690509001045 | 510690509001008 |
| 510690509001044 | 510690509001007 |
| 510690509001043 | 510690509001006 |

| 510690509001038 | 510690509001002 |
| 510690509001037 | 510690509001001 |
| 510690509001036 | 510690509001000 |
| 510690509001035 | 510690508051013 |
| 510690509001034 | 510690508051003 |
| 510690509001033 | 510690508051002 |
| 510690509001032 | 510690508051001 |
| 510690509001028 | 510690508051000 |

This shift would involve moving a population of 579 people.
Accordingly, Frederick County respectfully requests the foregoing adjustments to the Special Masters' proposed House of Delegates Districts 31 and 32. Should the Court or the Special Masters require further information, the County can readily provide it, upon request to the undersigned County Attorney. The County very much appreciates the Court's consideration of the County's concerns.

Respectfully submitted,

Roderick B. Williams
County Attorney

Do the Special Masters really need to cleave off 81 voters from the current HD 34 to glom onto the proposed HD7? It appears from the VPAP map - www.vpap.org/redistricting/plan/2021-house-vasupremecourt-statewide-1/district-7/ - that they have unnecessarily created a split precinct. Please avoid splitting precincts. I think it is unfair for localities to clean up the mess by healing the splits through the creation of additional precincts that may need new polling locations and definitely need additional staffing. Thank you for this consideration.

I would like the Special Masters to adjust the proposed SD35 to remove the 215 voters that were apparently taken from the current SD39. Please see this map: www.vpap.org/redistricting/plan/2021-senate-vasupremecourt-statewide-1/district-35/. It appears this would unnecessarily create a split precinct which should be avoided. I think it is unfair for localities to clean up the mess by healing the splits through the creation of additional precincts that may need new polling locations and definitely need additional staffing. I oppose the map that divides up Mt Vernon. This historic district should not cut up into areas, some of which are not compatible with historic areas in the current district. Please review the proposed splitting up of our district.

My name is Suchada Langley (at 2435 Flint Hill Rd, Vienna) and I am in new drawn district 12. My current HOD is Mark Keam. The new district 12 is expanded from Vienna to Tysons areas which unfortunately includes where Delegate Marcus Simon, another great delegate, lives.
Vienna and Tysons/Pimit have very different characteristics, both economically, socially, and culturally. In Vienna, we are mostly small businesses. We enjoy our Church street events of ViVA Vienna, Memorial Days, Taste of Vienna, Holidays, Oktoberfest, and so on. We line up Maple eve to watch Halloween Parade as well as July 4th Firework. We hang out at local brewery, bar, and coffee shops. We got our own neighborhood group chats on most things Vienna.
Please do not destroy this well balance of our community by adding the busy and commercialized Tysons areas.

Sincerely,
Suchada Langley
Vienna residence since 1991.

To whom it may concern,
I am extremely alarmed that the plans for redistricting would split the Mount Vernon community in half. My address is 4319 Ferry Landing Rd, Alexandria, VA 22309. I would no longer be in the district I am currently, with the rest of my Mount Vernon neighbors. It splits neighborhoods and communities apart. I live and work in this community. However, my residence and my place of employment would now be served in different districts, which is not something I want to happen. There is absolutely no reason that my neighborhood should share a district with Manassas and Fredericksburg, rather than with the rest of the community of which I am a part of. It splits the Mount Vernon High School pyramid in half. It splits the original land of George Washington's Mount Vernon into 2 very different districts with different needs. This needs to be adjusted to reflect that we are a long standing community of interest that shares infrastructure with the rest of the Mount Vernon neighborhood. Thank you for considering my feedback.
Sincerely,
Katie Cachine

## Goochland County Congressional and House of Delegates Concerns December 13, 2021

To the Honorable Supreme Court Justices, Thank you for the opportunity to share concerns regarding the recently released congressional and statewide district maps by the Special Masters. I am Wendy Hobbs, a resident of Goochland County with 24,727 residents, and of that population, only 3,900 are African Americans. I oppose the proposed Special Masters' maps, which eliminated the current Congressional District 7.

## The Opposition Concerns:

- Goochland County is an exurb of Richmond City, Henrico, Chesterfield, and Hanover Counties. Our residents work and shop in the Richmond Metropolitan Areas.
- The proposed Special Masters' Map assigns Goochland in Congressional District 1 with the Hampton Roads and Northern Neck areas.
- Goochland is in Central Virginia, and our community interests are different from those proposed areas, which concerns may be more focused on climate control and military efforts.
- Goochland serves on several Regional Boards and initiatives in the Richmond Metropolitan area. The county participation on regional boards and commissions assists residents with school, transportation, health, and other regional initiatives. Also, when federal funds are acquired, they are funneled to a district that impacts Goochland County.
- Goochland services are rendered primarily by Richmond City and surrounding counties. The resources these larger populated areas can get due to their population sizes directly ensures Goochland County receives its fair share of resources,
- In the proposed Special Masters' maps, Goochland will compete with other localities of similar sizes, resulting in the possible loss of federal and state resources for the most vulnerable populations.
- The map proposed by the state-appointed redistricting committee to keep the current congressional district intact and add Charlottesville and Albemarle County is a map that benefits the community interest of Goochland County.
- Goochland is one of the wealthiest counties in the state. However, of the 3,900 African American residents, a significant number of them live below the poverty level and struggle to have adequate medical and housing options. Studies have shown this population die at a higher rate than their white or economically stable populations. The resources gained at the federal and state levels are needed and would be further detrimental if the redistricting maps resulted in reducing the funding resources.

## On splitting communities of interest in Goochland County:

o The new maps for Goochland County do not meet the guidelines for redistricting regarding compactness. Congressional District 1 does not favor Goochland County community interest. Additionally, the CD-01 map assigning Goochland with the Northern Neck and Hampton Road results in communities with no real connections
and removes Goochland from a district where residents work, shop, and live every day.
o The Congressional map for District 1 includes the entire county, yet the House of Delegates maps split the county. The maps should not divide a county with 24,727 residents. A county this size should not rely on two House of Delegates members to represent the county's interest. Further, it results in logistical difficulties for our county to educate residents on who represents them or is campaigning.

- Goochland County is bound on the north by Interstate 64, and on the south, by Route 288 and Route 60. It makes sense to keep the county as a whole in the same House of Delegates and Senate districts.

Thank you for the opportunity to testify to keep Congressional District 7 intact and add Charlottesville and Albemarle County to CD-7. It is also requested to designate only one House of Delegates for Goochland County for a population of just under 25,000.

Respectfully submitted
Wendy S. Hobbs
Goochland County, Virginia

Hello,
I'm a mother of two sons and voter in the Mount Vernon area (Waynewood neighborhood). I also was a deputy campaign director on the successful campaign to pass Florida state constitution amendments to prevent gerrymandering back in 2010. I have seen first hand what splitting communities like the Mount Vernon area can do to sever local ties-- Florida was riddled with examples. In some cases, it can affect voter turnout, connection to or interest in local politics that deeply affect the community. At worst, it can develop estrangement from neighbors. In my current neighborhood, it would potentially bisect our community and I would hate for my sons to grow up with any barriers that divide our little Mayberry-like area.

I urge you to think again about creating boundaries that follow natural geographic or current sociopolitical divisions, rather than creating boundaries that have never existed before.

Thank you for your time,

The Mount Vernon Idea
I chose to live, teach and volunteer in Mount Vernon because of its unifying, local, "Town Hall" approach to government: I call it The Mount Vernon Idea.. Last week's Special Masters' redistricting proposal can negatively effect Fairfax County precinct changes and shows a lack of understanding of our community. For nearly 40 years, I have been a Virginia taxpayer and a resident of Mount Vernon District, Fairfax County, VA - George Washington's neighborhood. I also had a residence in Fairfax City in the 60s and 70s. I respect Virginia law, history and civic processes, very like Connecticut, the state of my birth. In fact the New England states and our Commonwealth share many of the founding principles that built and held together our democratic ideals. I was shocked to learn that our well-designed, County redistricting plan may be ignored and therefor disrespected by the new redistricting Masters. Mount Vernon has been recognized since Washington's day as the oldest, largest and most populace District in the County. This last census did not indicate any logical reason for the radical District splitting proposed by the Masters that may ultimately disrupt school assignments, VDOT and economic development, and safety and community services, especially along Mount Vernon's Route One Corridor. In the last 30 plus years from the Beltway through Lorton, commercial and residential development has strengthened the District, the County and the Commonwealth. The "Route One Corridor" built opportunity through community and raised economic and educational standards for all. And that success benefits all: in the Commonwealth and nation. Do not carve up Mount Vernon District!Stick with the Fairfax County Redistricting Plan. Respectfully Submitted, Lainge Bailey

To whom it may concern:
My name is Ahmad Fryar and I am sending this email to strongly oppose the redistricting of Virginia more specifically the Lorton area of Fairfax county which has been put forth. I have been a resident of Lorton for more than a decade and have watched my children grow here.

Lorton as well as the Mt. Vernon district is a very culturally diverse community with a great mix of all socioeconomic classes and a true treasure in the state of Virginia. The proposed redistricting will disrupt the growth and attractiveness of the area to potentially new residents and businesses negatively impacting the growth of Lorton by diminishing the diversity of this area.

In conclusion I strongly disagree with the proposed redistricting due to the impact it will have on the future of Lorton our children, community and a place I call home.

Court's Special Masters,

I strongly urge the Court's Special Masters to reconsider the move of the Hurt Precinct from Pittsylvania (48) to Campbell (51). Considering that Hurt Precinct (48) remaining in with Pittsylvania County it easily falls within the listed Deviation guideline. If you consider COI again Hurt Precinct (48) is obviously within the Communities of Interest intent. As example Town of Hurt, Renan, Grit and Motley are all rural communities with the same values and their residents intertwined. Moving Hurt (48) into Campbell (51) will be detrimental to the COI intent. Also, The Town of Hurt, Chatham and Gretna all work harmoniously together on issues and would destroy this as well making each a weaker community. Within the Town of Hurt limits, we are fortunate to have the Southern Virginia Multimodal Park. We are partnered with Pittsylvania County, City of Danville on this project. It offers a future to the Town of Hurt and even a more important reason that we stay in Precinct (48) within Pittsylvania County.

Gary Hodnett
Mayor, Town of Hurt

I agree with and support adding Falls Church City with Arlington for both the new House District 1 , and the new Senate District 40. It is a better fit from a community of interest perspective (i.e. older, established suburbs) than the current maps which include Falls Church City with newer suburban areas to the west.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

We are all residents of the Mt. Vernon community and are writing regarding the proposed redistricting of the Mt. Vernon area of Fairfax County. The Mt Vernon area is a community in the real sense of the word. Those of us who live here describe themselves as living in Mt Vernon. We are a community with schools, churches, transportation systems, ecological resources and media (Mt Vernon Gazette) that serve this area as a discrete portion of Fairfax County and Northern Virginia. We want legislators who know our community of Mt Vernon and will represent our interests.

First, in the explanatory memo to the proposed redistricting map, the southern boundary of CD8 is drawn along VA-235 because of inability to add population to CD8. "This version of the 8th had too many people, so we moved Springfield and Franconia into the Fairfax district, with a few precincts around Lorton moved into the Prince William County district (the newly created 7th district)."
This is problematic for a couple reasons:

- You should have included the entire Mt. Vernon Community all the way down to the Estate in the district instead of cutting it off from the rest.
- Second, you should not have divided Kingstowne - the largest HOA in the area in half.
- Third, in light of the fact that you only drew that line because you ran out of room to add people - it should not have been used as a boundary that governs the House and Senate Districts because it is not based in any community of interest.
- A series of other problems flow from that decision as detailed below.

First, here is what the proposed CD8/SD34 Line does to Fairfax County's Mt. Vernon

Here's what the proposed CD8/SD34 Line does to the original Mt. Vernon Estate that our

Here is what the proposed CD8/SD34 Line does to Mt. Vernon High School boundary:

Here's how the proposed CD8/SD34 Line divides Fort Belvoir Military Installation (in gray) in

VDOT and Fairfax County are currently in the process of condemning land and finalizing engineering plans for the U.S. 1 Bus Rapid Transit which will run from Huntington Metro to the Woodbridge VRE. This project was planned North/South not East/West because that is the natural community of interest.

The only people who see Springfield belonging in the same community with Mt. Vernon are the Special Masters of this Redistricting. The special masters state in their memo that travel arteries were important to communities of interest. The Route 1 corridor is such an interest: "We also were mindful of the Commonwealth's major metropolitan areas and the travel arteries that feed them: Northern Virginia,..." Those of us living here identify as a community with residents of the other side of VA 235 and down the length of Rt 1 into the Lorton areanot with the residents of Springfield.

When VDOT and Fairfax County planned out the project, the project is based around the U.S. 1 Corridor in Mt. Vernon which is the anchor of the community of interest. Here is how it was analyzed showing proposed bus transit stations and here is how the proposed CD8/SD34 boundary ignores our natural community of interest and divides it right in half:

The natural community of interest and most of our existing community structures are built up around Mt Vernon as a distinct historical and administrative entity. Any proposed revisions should respect existing local boundaries and anchor the newly numbered SD34 in Mt. Vernon and Lee (Franconia) communities and use I-95 as the boundary and look like this:

It might look like a lot of land to the south, but the military base has a lot of open land and Mason Neck is zoned for very low density so it is about the same population as the densely populated part of Springfield that is currently included in the proposal. The new SD33 to the south should extend further up the west side of I-95 where it has more in common with the citizens, high schools and political districts on the West side of I-95. This makes much more sense.

Likewise, the newly numbered HD16 and HD17 seem to have zero relationship to the actual communities in the area. They should follow our roads/community lines and take account of the obstruction created by largest park in Fairfax County (Huntley Meadows) as a natural
boundary:

Here is what HD17 should use I-95 as the western boundary, Fort Belvoir as the boundary to the south and Huntley Meadows to the east and should look like this:

The newly created HD19 should take up the remaining territory to the south and HD18 adjusted accordingly.

These changes will keep the Eastern part of Fairfax County as one consolidated community of interest and "nest" the delegate districts mostly within one senate district as was given as an objective in the redistricting effort.

The currently proposed dividing line cuts through the heart of an established and well-defined existing community. I strongly urge the redistricting masters to reconsider and redraw the boundaries as suggested above to protect the interests and cohesiveness of our community.

Thank you for considering this.

Although we're excited to have proposed maps, as they are currently drawn, we would lose Rep. Wittman, leaving Prince William County with no Republican representation in the Congress. The current proposed maps also do not present a district that would provide a fair contest for Republicans

To whom it may concern,
The easiest way to make the district more competitive/equitable is to recommend that the three Fairfax County precincts be removed from the 7th and replaced with the three northernmost precincts in Spotsylvania County (Riverbend, Elys Ford, and Wilderness School). The other recommended change would be to encourage the Supreme Court to simply use the originally agreed upon House Map "C1".

To Whom It May Concern:

My name is Don Polaski and I have served as a volunteer canvasser for the last several elections in Henrico County, working for candidates of the Democratic Party. I live in Richmond City. While I have political interests, I have tried to make these comments simply about the shape of the House of Delegates districts in Henrico with observations drawn from miles and miles of walking through western Henrico neighborhoods.

My largest concern about the proposed map is the "bite" of Henrico County taken by District 59. District 59 unites this section of Henrico with large sections of Hanover and Louisa counties. I do not see a clear community of interest between western Hanover, eastern Louisa, and the residents of the part of Henrico proposed to join the 59th.

Many of the neighborhoods share various matters in common with each other: house setback from streets, distance between houses, and size of lots. As a canvasser I tend to notice these matters. As one moves toward the border with Hanover, lots become larger and houses are spaced further apart. Townhome developments become fewer.

I believe using l-295 as a boundary would help better reflect common interests of the citizens of Henrico. It would also follow the pattern of using major thoroughfares seen, for example, in the use of Broad Street as the northern boundary of the proposed 58th district. I have avoided disturbing the 58th district as proposed.

I suggest, moving from east to west, that the southern boundary of district 59 run along l-295 from I-95 to Nuckols Road, north on Nuckols to Twin Hickory, west on Twin Hickory to Pouncey Tract (271), and north on Pouncey Tract (271) to the Goochland border. There may be a more elegant way to draw the western end of this border, but I wanted to keep all my alterations in Henrico, since I have never canvassed in Goochland, where other population shifts could occur.

I have assigned the territory lost by district 59 to districts 57 and 80 and made adjustments in order to reach proper population markers. District 57 would receive a portion of Glen Allen precinct and the entirety of the Staples Mill precinct from the 59th. Because of the population

District 80 gains from District 59, it gives the Dumbarton precinct to the 57th. This creates a sharp north-south boundary between 57 and 80 along the railroad, which then follows the less elegant precinct boundaries before reaching Broad Street.

I am attaching a spread sheet detailing the population transfers. Some of these figures are estimates since I have to grade papers right now instead of learning census software. Since I am also not possessed of knowledge of mapping programs, I'm attaching photos of maps that shows the boundaries. The Masters' boundaries are in black, mine are in bronze.

Cordially,

Don Polaski

I am very much opposed to breaking the Mt. Vernon area and the Mt Vernon Estate area south of Old Mill Road from the overall Mt Vernon area district, and putting it in with the Woodbridge/Lorton/Stafford areas in all 3 districts (House, VA House, and VA Senate). This is a very bad proposal. It ignores the reality of functional, close-knit communities and neighborhoods that currently exist.

We are part of the Alexandria to Mt.Vernon/River Village community - schools, businesses, culture - and should remain pare of those districts.
The proposal violates the five redistricting requirements.
We are NOT part of Manasas, Woodbridge, Stafford or even Fredericksburg. Please make adjustments.

Respectfully, Marc Bosch

Good afternoon my name is Jose Feliciano and I am a resident of Spotsylvania County. 1st of all, I would like to thank you for all the hard work you are doing. I know all to well the good the bad and the ugly of redistricting. I would also like to apologize, to you because you are undertaking what myself and the rest of the Virginia Redistricting Commission were supposed to do. Unfortunately, we failed at our task, and now it falls upon you to ensure fair maps for the people of Virginia. I am not speaking to you today as a member of the redistricting commission but rather as a resident of Spotsylvania County. After looking over the three proposed maps I have issues many issues, but I will stick to Spotsylvania County because that affects my neighbors and myself. In all three maps Spotsylvania County is divided into sections. Spotsylvania county is a community of interest so Spotsylvania should not be divided up. More so Spotsylvania county has nothing in common with Northern Virginia, Spotsylvania county is not Northern Virginia we do not claim to be Northern Virginia and we do not want to be part of Northern Virginia. The division of Spotsylvania county will dilute the vote of the residents of the county. Not only that but it will disenfranchise voters in the northern section of Spotsylvania county. In the US Congressional map, the northern section of Spotsylvania county is placed in the new 7th district. No part of Spotsylvania county should be in the 7th new! The new $7^{\text {th }}$ district should not go below the Rappahannock river or west of I 95. That section of Spotsylvania county should be placed in the new $10^{\text {th. }}$ District. In the State Senate map almost the same section as northern Spotsylvania county is placed in the 27 district, with the City of Fredericksburg and Stafford County. Again, this section of Spotsylvania county should not be separated from the rest of County. As stated, before that will disenfranchise voters in that section, we have nothing in common with either the City of Fredericksburg or Stafford County. The northern section of Spotsylvania county should be in the $28^{\text {th }}$ district. I would hope that you would see that Spotsylvania county is a community of interest completely different from the City of Fredericksburg and Northern Virginia. The I urge you; I implore you to reconsider the partitioning of Spotsylvania county. At a minimum please place the northern section of Spotsylvania county into the 10th. Congressional District, and the $28^{\text {th }}$ State Senate district. Thank you very much.

Jose Feliciano

The City of Williamsburg should be included in the 69th District where it shares a significantly greater community of interest. Extending a portion of the 69th District across the York River into Gloucester is clearly an aberration and should not even be proposed let alone approved.

I have lived in Gloucester County, worked in the City of Williamsburg and in James City
County where I was a city planner for many years. I now live in upper James City County and am familiar with all these areas.

I understand that current redistricting proposals dismember the area that we know as "Mount Vernon" and lump it with distant and strongly dissimilar areas such as Quantico, Manassas and Fredericksburg. This proposal lumps together the divergent interests of the areas affected, and more significantly the historic role of the current Mt. Vernon district. As currently defined, the Mr. Vernon district is centered on our first President's estate, and includes most of his extensive properties in the area, some of which extend a considerable distance northward of his home estate. Thus, the linkages of the present district with George Washington and Mr. Vernon are strong. The area between the present estate and Alexandria' southern boundary was frequently traversed by Washington, his colleagues and distinguished visitors, and comprises a historically significant unified national asset. Moreover, it is at present an increasingly unified area. Until quite recently, a "Mount Vernon" high school served most of the area, innumerable entities proudly carry the "Mount Vernon" name, and most of its inhabitants think of themselves as "Mount Vernon" citizens. Thus, I believe that the case for preserving the integrity of the current district boundaries is exceedingly strong. The dismemberment of the district as currently envisaged seems to reflect ignorance of both history and reality. We Mount Vernon residents treasure our identity and connection to our country's first President, and strongly oppose actions that threaten those values.

To the Court:

The new 7th District does not reflect the community interests of Prince William County as drawn. It is an improvement to have a district that is more contiguous, but I believe that it would be politically more fair if the Fairfax precincts were replaced by the three northern precincts of Spotsylvania County instead - Riverbend, Elys Ford, and Wilderness School. This would better balance the party registrations of the new 7th and give Republicans a fighting chance. In terms of commonality, the fast-growing areas of northern Spotsylvania are closer in common interest to Prince William County than they are to Fairfax anyway. Please consider this alteration as a more equitable way to draw this district..

Dear Redistricting Committee Members - Judges - Concerned Parties, I am very concerned that the new maps drawn will wipe out the progress women have made in Virginia. The Commonwealth was proud to elect 3 women to Congress these past few years. The maps put all three women in districts where it will be beyond difficult to get elected. Two of the candidates were drawn OUTSIDE of their home districts! It seems by disconnecting them from their neighborhoods and the communities where they served proudly, these Congresswomen will now be left on the losing side of the maps. District 10 includes Loudoun County that has gone mainly democratic now and deserves to have representation that celebrates diversity, inclusion, and believes in women's equality. Citizens should not be ruled by a minority voice in such a large population that desires leadership that reflects their values.

We hope you take a hard look at the map lines again, especially in District 2 and 10.

Thank you,
Katherine White
Annandale citizen

Muriel-Theresa Pitney
Clerk of Court
Supreme Court of Virginia

RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A
To Whom It May Concern,
Pursuant to Rule 4(a) of the Rules and Procedures for Implementing the Requirements of Article II Section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding redistricting for the Virginia House of Delegates.

The draft maps preserve the unity of Columbia Pike, a vibrant, multicultural community of interest that is currently being featured in a special exhibit at the Library of Virginia (https://www.lva.virginia.gov/news/calendar/?event=481). Notably, the draft map does not split the large and growing Latino population of Arlington that concentrates along the Pike. This is one of the most heavily concentrated Latino districts in the Commonwealth.

Virginia's Latino community has very little direct representation in the House of Delegates or in the State Senate. While there are many dedicated legislators committed to advancing the interests of all Virginians, including Latinos, the Latino community has particular needs linked to cultural, ethnic, linguistic, social, and immigration needs that distinguish it in special ways from other constituencies. These needs are best understood by those with direct lived experience and understanding. Any final version of the redistricting process must take those needs and concerns into consideration or risk accidentally creating circumstances where the Virginia Latino population - which now numbers over 850,000 - will not fully realize the promise of equal representation.

Virginia's Latino community has faced significant disparities in access to COVID-19 information and care during the pandemic, further highlighting the need to elect leaders from communities who can effectively serve under the worst and the best circumstances of public life.

I address this letter in my dual capacity as Chairman of the Virginia Latino Advisory Board (www.vlab.virginia.gov) and the Chairman of the Redistricting Advisory Committee (https://www.fairfaxcounty.gov/redistricting/2021-redistricting-advisory-committee) of Fairfax County, home to more Latinos than any other part of the Commonwealth. Thank you for the opportunity to provide these comments.

In service,

Paul Berry

I am concerned about the potential for losing Elaine Luria as my Congresswoman first and foremost. That being said I am curious how it happens that the redistricting strategically affects 3 women and their positions in office and seems, yet again, favor male politicians. By choice or by accident this is very unfair to women voters. So, I am opposed to the changes as given especially where the second district is concerned. Paula Nees

Hello:

It is our understanding that you have agreed to a redistricting proposal that will move the Mt. Vernon Estate and much of the Mt. Vernon Civic association community to other districts. I am including the following analysis of the situation by Tom Russell who is the President of the Mt. Vernon Civic Association. We agree with his assessment and object to the redistricting plan as formulated. His analysis is as follows:

Tom Russell Mount Vernon Union Farm • 4 hr ago
The Supreme Court of Virginia proposes the removal of George Washington's Estate and the 900 plus homes in Mount Vernon Civic Association Community from the Mount Vernon District and our now being combined with voters for Congressional, Virginia Senate and Delegate candidates in Woodbridge, Manassas, and in the Prince William and Stafford Counties. Below is the testimony I submitted opposing these changes. At the end of this post is a link you can use to submit your concerns. Tom Russell, MVCA Moving George Washington's Mount Vernon Estate and the Mount Vernon Civic Association from Senate District \#34 and putting it in Senate District \#33 with Woodbridge and Manassas violates five redistricting requirements: we are split from our contiguous community, does not respect our natural boundaries, denies our participation with our larger community of interest in District \#34, removes us from an existing compact district and fails the equity test - many minority students from \#34 are taught in our community where we have historically provided Food for Thought packets for those students in greatest need and we raise funds for our community food banks among our Association Members to support the families in need along the Rt 1 corridor. Moving George Washington's Mount Vernon Estate and the Mount Vernon Civic Association from Delegate District \#16 and putting it in Delegate District \#19 with Lorton, Gunston, and Woodbridge violates five redistricting requirements: we are split from our contiguous community, does not respect our natural boundaries, denies our participation with our larger community of interest in District \#16, removes us from an existing compact district and fails the equity test - many minority students from \#16 are taught in our community where we have historically provided Food for Thought packets for those students in greatest need and we raise funds for our community food banks among our Association Members to support the families in need along the Rt 1 corridor. Moving George Washington's Mount Vernon Estate and the Mount Vernon Civic

Association from Congressional District \#8 and putting it in Congressional District \#7 with Prince William and Stafford Counties violates five redistricting requirements: we are split from our contiguous community, does not respect our natural boundaries, denies our participation with our larger community of interest in District \#8, removes us from an existing compact district and fails the equity test - many minority students from \#8 are taught in our community where we have historically provided Food for Thought packets for those students in greatest need and we raise funds for our community food banks among our Association Members to support the families in need along the Rt 1 corridor. Link: https://www.vacourts.gov/courts/scv/districting/maps_special_masters.pdf? emci=5059a782-fc58-ec11-94f6-0050f2e65e9b\&emdi=7f2c7b31-1159-ec11-94f6\(\underline{0050 f 2 e 65 e 9 b \& c e i d=1917334}\)

Mt. Vernon is a community. We are neighbors. Please do not break us up. We have absolutely nothing in common with Woodbridge, Manassas, Lorton, Gunston, etc. This is a disappointing, purely political manipulation.

Respectfully,
Richard H. and Susan J. Schumacher

I am writing this to you regarding the lack of fair representation in my district where I love being represented by Mr Whittman. I feel the new lines leave the resulting district as a democratic strong hold not a competitive race. I already have no republican representation for the state now you take away a competitive district to make it another strong democratic win. I voted for redistricting to be done by a commission of both parties now I learn that the children can't do what the voters want. I find that unacceptable. I highly recommend that you not give this new district a 14 point lean to the left. This is unacceptable also.
Please do not fail to live up to our American values by delivering unfair advantages to one or the other party.
Sincerely
Sue Myers

The new maps put Williamsburg in the 71st District, which runs ail the way to Providence Forge. Williamsburg has always been part of Hampton Roads. This puts Williamsburg with other communities that extend up into the Richmond area instead of keeping it with other Hampton Roads communities. We should remain in the 69th district.

\section*{THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS}

I have just looked at the proposed map. I'm in the proposed 71st. It is a strange district - I lived in New Kent County for 25 years and it has no real connection with Williamsburg. Different school division; different library system; shopping focus on Providence Forge or Quinton, not Williamsburg; different judicial districts; completely different educational levels. Big outings take place in Richmond, departures head out from the airport in Richmond. Charles City County is even more remote. They are so dissimilar from where I live in Williamsburg. Lumping New Kent, Charles City, and the City of Williamsburg makes no sense.

My corner of Williamsburg should be with the rest of "cosmopolitan" James City County. Same school division, combined library system, shopping focus on Williamsburg, JCC and "down peninsula." Common judicial district, more commonality of income levels and education. Even the churches are different here - Williamsburg has a temple, a Greek Orthodox Church, etc. And many, many ethnic restaurants. That’s not New Kent or Charles City, I can guarantee you.

Why has Williamsburg been shoved into a district to which it does not belong? (For that matter, why has the 69th crossed the York to Gloucester, with which it has nothing in common?). If these maps are supposed to represent "communities of interest," then Williamsburg and JCC should be oriented toward NN and its several colleges and universities (and its blistering growth rate) not toward rural New Kent or Charles City County.

We who live in the Mt Vernon District reside in one of the most historic and oldest part of Fairfax County. We are a community and need to remain that way. Most of Mt Vernon residents live on one of the five original farms of George Washington. Putting us in a district with residents far removed from our area makes no sense. We support local food pantries, contribute to hyperthermia shelters, and our local high schools. It is important that we remain in our current state, house of delegates and Congressional district.
Thank you for attention to this important matter.

Please accept the following comments of concern regarding redistricting:
- I do not believe the communities of Augusta County, Staunton, and Waynesboro should be split. We have a long history of cooperation through city and county partnerships and organizations. I do not believe the proposed senate district keeps our community with similar communities of interest.
- Too many districts would face losing representative institutional wisdom all at once and would jeopardize good governance.

Thanks for consideration.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

This map would split the Mount Vernon Community and while I appreciate the need for redistricting, I do not see a reason to make this split because it adds the Rose Hill area and excludes our longtime neighbors to the south. This map would be inconsistent with school districts, community organizations and the historic property of our fist president, George Washington.Preserving alignment with existing boundaries helps to maintain a sense of community.

Moreover, in this age of never ending spam calls, I am disappointed that your system requires a phone number to post comments on the map (an address and email is not enough). I fear that any information provided will be available for unsolicited marketing, which is a disincentive to post comments on the map.

Finally, the maps would benefit from explanation and providing only 5 days for comment almost ensures that the voices of many concerned citizens will not be heard.

I appreciate that this is a difficult job but this map does not make sense to me.
Larry Zaragoza

Thank you very much for your hard work on the redistricting maps. Overall, they seem very good and fair. But there is one point that I would like to see changed. It doesn't make sense to me to divide Albemarle County and Charlottesville into two Congressional districts. We have a community of interests and I would like to see Albemarle and Charlottesville kept together. I also think we should be moved out of the 5th District, since our interests and very different from the southern part of the state.

Sincerely,
Victoria Metcalf

Williamsburg should be part of James City County, not Gloucester. Williamsburg and JCC rely on the same services, schools, hospitals, etc. Gloucester is a totally different population and is not even adjacent to the city of Williamsburg.

There is no reason to redistrict moving Mason Neck and Lorton out of its current district \#8. We belong where we are. I have lived here for almost 39 years now. This area is strong and works together with the Mt. Vernon communities which make an impressive district. There are no similarities between our area and Prince William County/Woodbridge just south of us. If I wanted to be a part of that area, I would be living there. The natural boundary is dividing point of the river/bay.
Please convene a new committee to review any redistricting along with public comment considered and not as an afterthought.

My name is Richard Hagen, I am a resident of Virginia Beach. I want to begin by thanking the Special Masters for an excellent job. I so hope that the maps are accepted with only minor changes. It is especially important to NOT consider where incumbents live or political party. As we all know in the past the number 1 criteria was incumbency and party lines. I was glad to hear that a lot of incumbents from both parties were drawn into different districts. Please continue to follow this criteria (or lack of criteria) of not even considering political party lines as stated in the Master's Memorandum
"Incumbency: The Statutory Criteria make no mention of protecting incumbents. We therefore maintained ignorance about the residences of incumbents. Even as we submit these plans to the Court, we do not know which incumbents have been placed in districts with other incumbents, with one exception described below. We plan on maintaining that ignorance until the maps are finally approved, unless otherwise instructed by the Court"

I thank the Court for being non-patrician and representing the citizens and not the party that appointed them. Looking forward to an early Christmas Present of Fair Maps. 2

Richard Hagen

I live in zip code 22308. The plans do not take into account that the Mt Vernon Area is a community. I live on one of the 5 farms of the Mt Vernon estate. Our area is also called the Friends \& Family of the Mt Vernon Estate. It also borders the 1st Freed Slave Community Gum Springs. As the new redistricting is planned Mt Vernon Estate will be separated from the rest of Mt Vernon as well as my zip code 22308. From what I understand I will no longer be able to vote along with other families @ our local grammar school where my granddaughter attends which is only \(11 / 2\) blocks from my home. It is dividing our community up. Please don't do this. It's history is of a really a close knit community of Friends \& Family of Mt Vernon.
Thanks,

I'm concerned that the redistricting plans for the Montgomery County area fail to support communities of interest. Having lived near major universities my whole life, I realize that I have a particular interest in higher education and the powerful sense of community these institutions encourage. To separate Blacksburg, Christiansburg, and Radford will undermine the special contributions our communities have made to the state through the years. Please re-unite us!

I used to live in Short Pump in Henrico Co. and now live in Chesterfield Co. Both areas are suburbs of Richmond. They have similar characteristics and similar problems such as traffic, public education, income distribution and types of employment. Both should be included in the same Congressional District.

\author{
Muriel-Theresa Pitney \\ Clerk of Court \\ Supreme Court of Virginia \\ 100 North Ninth Street, \(5^{\text {th }}\) Floor \\ Richmond, Virginia 23219-1315
}

Dear Madame Clerk:
My name is Ronald Taylor, and I am the current President of the Hampton Roads Black Caucus. I write on behalf of our membership to comment on the state legislative maps proposed by the Supreme Court's special masters on December 8, 2021.We believe that these maps, if adopted in their current form, would represent a step backwards for Black representation in the Commonwealth of Virginia, which has already declined in recent elections after previous rounds of court-ordered redistricting. In the interest of offering constructive criticism rather than empty complaints, we have included with this letter proposed maps that do a better job of meeting our representational goals (see attached).

First, some recent history might be in order. In the 2011 redistricting cycle, Virginia's Third Congressional District was drawn to include a Black voting-age population (BVAP) of \(56.3 \%\); after court-ordered redistricting in 2016, the Third District's BVAP was deliberately dropped to \(47.27 \%\) with the portions of the district containing the heavily Black cities of Richmond and Petersburg reallocated to the adjacent Fourth District (which increased to BVAP \(39.68 \%\), still well short of a majority). In other words, a congressional map that originally featured one Black-majority district after legislative redistricting became a map with zero Black-majority districts after the federal court intervened. Thankfully, this has not affected Virginia's Black representation in the U.S. Congress where Congressmen Bobby Scott and Donald McEachin still proudly serve. Nonetheless, we provide our map that shows it is eminently possible to have a majority black Congressional district in the Commonwealth. Representative Scott is 75 years old, and while we'd be really happy if he remained in Congress for many years to come, we know the reality is that someone other than Representative Scott may very well serve the people of that district during this coming decade. Without him seeking that seat, we have serious doubts about whether his district as configured would still elect a Black member.

Unfortunately, court-ordered redistricting had a more deleterious effect in the General Assembly. The General Assembly in 2011 adopted a redistricting plan featuring twelve Black majority House of Delegates districts, a portion that came remarkably close to matching the proportion of Virginia's population that is Black. After years of litigation, however, those twelve districts-all of which featured BVAPsover 50\%-were ordered redrawn by the same federal court that previously ordered a redo of the
congressional map. Under a plan developed by one of the same special masters this Court is using now, BVAP was deliberately lowered in each of the challenged districts-districts originally drawn with a BVAP high enough to preserve the ability of the Black communities in each to elect their favored representatives. What was publicized as an effort to help the Black community only made it harder to elect Black representatives.

At the time, "experts" reassured us districts didn't need a BVAP over \(50 \%\) to elect Black representatives. Any Black person who grew up in the American South could have told you that was a laughable claim then, but it is no laughing matter anymore. The 2019 redistricting plan designed by special master Dr. Bernard Grofman has had a predictable effect: Black delegates have lost elections in districts that were deliberately made less Black.

In the most recent state elections, four Black Members of the House of Delegates were defeated in their campaigns for reelection, three of them in districts that were redrawn in 2019. In this most recent election, four incumbent Black legislators, comprising nearly a quarter of the Black Caucus in the House, were defeated for reelection. Two of those legislators were in districts that the federal court specifically asserted would retain Black representatives, writing, "Based on the data in the record, we further conclude that black voters in Districts 63 and 75 will continue to have a reasonable opportunity to elect candidates of their choice." The Black legislators representing Districts 63 and 75 lost reelection in November. Is this what progress looks like?

It should be clear by now that the state of Black representation in Virginia in 2021 is not good, but the special masters' maps would make the problem even worse. Currently, only five State Senate districts are home to voting-age populations that are more than \(50 \%\) Black. Perhaps unsurprisingly, four of these five districts align almost perfectly with the four represented by Black Senators (District 16 is the only Black-majority district represented by a white Senator). The connection is clear for anyone willing to see it: Black candidates have a better chance of getting elected in Black-majority districts, thereby enabling them to better represent the interests of Black communities in the state legislature. The pathway to greater Black representation is through the creation of more Black-majority districts.

The special masters' proposed State Senate map, however, takes us backwards. It only has twoBlack-majority districts, Districts 13 and 23. That's right-two out of forty, a mere \(5 \%\), in a state that is nearly \(19 \%\) Black according to the 2020 Census. \({ }^{1}\) It is entirely possible that if the special masters' map is adopted by this Court, there would be no Black members left representing residents of this Commonwealth in the Virginia State Senate. Back when Section 5 of the Voting Rights Act was still enforced, a plan like this would have been illegal; now, it is merely disrespectful. We have fought so hard for a seat at the table, and this plan would callously show us the door.

The special masters' proposed House of Delegates map fares no better. It features only five Black-majority districts out of 100 , matching the proposed Senate map's embarrassing \(5 \%\). The congressional map might be the worst of all, preserving the current post-redistricting status quo of zero Black-majority districts. So, to reiterate, under the 2011 legislative maps, there existed twelve Blackmajority House of Delegates districts, five State Senate districts, and one Congressional district for a total of eighteen. After successive rounds of court-ordered redistricting and the special masters' newest

\footnotetext{
\({ }^{1}\) U.S. Census Bureau, Virginia Adds More Than 600,000 People Since 2010, (Aug. 25, 2021), https://www.census.gov/library/stories/state-by-state/virginia-population-change-between-censusdecade.html\#:~:text=Population\%20(up\%207.4\%25\%20to\%20331.4,or\%20More\%20Races\%2010.2\%25).
}
proposal, there would be five Black-majority House of Delegates districts, two State Senate districts, and zero congressional districts for a total of seven. From 18 districts with BVAPs sufficient to elect Black representatives to 7 in only five years!

Our maps actually move the ball forward in terms of Black representation. Our Senate map takes the number of Black-majority districts from four to five, none of which have a BVAP higher than \(53 \%\). Our House plan restores the same number of Black-majority districts, twelve, that we had after the 2011 redistricting cycle. Our plans demonstrate that it is possible to create up to seventeen Black-majority districts in the General Assembly, matching our previous peak. When better Black representation is possible, I don't know why we should have to settle for less.

The special masters apparently think that "opportunity districts," in which different minority group's aggregate to an outright majority of a district's voting population, are sufficient to protect Black representation. Their map does a pretty good job of creating such districts, but we know from history, both distant and recent, that the best way to protect Black representational gains is to create Blackmajority districts. The "opportunity district" experiment of the last decade has only resulted in backsliding. The current abysmal numbers in the General Assembly indicate we need to do more in our efforts to create districts where Black voters can elect people who will represent their interests, not less. The special masters' plans seem to see minority groups as interchangeable; we are not. Anyone who has paid the slightest attention to American politics knows that Black voters tend to vote more cohesively than Hispanics or Asians and often for different candidates, and yet these maps treat us as if we're all the same. There is sadly no guarantee that opportunity districts will result in the election of any Black representatives. This Court should revise the proposed plans to give Black voters representation commensurate with our voting strength.

To be clear, we are not asking the Court to create "safe" districts where Black voters constitute seventy or eighty percent of voters. We simply ask the Court to create more than five House of Delegates districts, more than two State Senate districts, and any congressional districts where Black voters constitute more than \(50 \%\) of the voting-age population (and ideally with BVAPs even higher than that, given the disappointing results of the most recent election indicate a bare majority is not always enough).We think a good target for the number of Black-majority districts would be 18 across all three maps, the highest number we had previously achieved in a state that has only grown more diverse in the years since.

Thank you for reviewing our proposed maps and taking our concerns seriously.

\author{
Sincerely,
}

To Whom it Concerns:
I disagree with the proposed redistricting. To make the 7th district more competitive, remove the three Fairfax County precincts and replace them with the three northernmost precincts in Spotsylvania County (Riverbend, Elys Ford, and Wilderness School). Or, simply use the originally agreed upon House Map C1.

Thank you for your time.
Sincerely,
Tim

Dear Special Masters,
My name is Nicole Medrano and I live at 3702 Riverwood Rd., Alexandria, VA 22309. My family and I are longtime residents of Mount Vernon and vehemently oppose the proposed redistricting of the small subset of the Mount Vernon community. This change splits our community in two and disregards the affected neighborhood's inherent interests in our local community. We live on the original Mount Vernon farm, our children go to the Mount Vernon pyramid schools and we support Mount Vernon area businesses. This proposed change makes no sense and must be remedied by redrawing the lines to ensure that Congressional District 8 , House of Delegates District 16 and Senate District 34 include the entirety of the Mount Vernon community.

Thank you,
Nicole Medrano

\section*{EXTERNAL EMAIL}

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

In my earlier submission (B. Lynn Pascoe, December 4, 2021) I emphasized the strong community of interest of the people of Mount Vernon District in Fairfax County. For over fifty years, we have fought together to improve the lives of our people along Route 1 (Richmond Highway) as the region rapidly urbanizes, to upgrade our schools and housing, and to develop a better environment and quality of life for our citizens. We have been extremely active as a community, reaching consensus on issues before us and lobbying officials and developers to get results. As I noted before, we probably have one of the more developed "communities of interest" in the state.

We were pleased that the Special Masters recognized this in drawing new suggested state districts that did not lump some of us with Alexandria and therefore weaken our voice in Richmond. We are appalled, however, that the current proposals lop off the southern part of our district to put it in a separate Congressional District. To add insult to injury, our namesake historical anchor -- Mount Vernon -- is now not even proposed to be in our district. As I read the map, the Mount District is the only part of Fairfax County that received this kind of treatment.

To make matters even worse, through the non-mandated "principle: of nesting, districts for state senator (District 34) and the House of Delegates (District 8) are similarly lopped off in the middle of our district, and areas that really have no "community of interest" with Mount Vernon are added in to make the numbers add up. Mount Vernon district is not even named, perhaps hoping no one will notice that it has been chopped up.

Mount Vernon District is a clear "community of interest" that runs from the Beltway (Alexandria City) to the Occoquan River. Congressional and state office district lines can easily be drawn that will preserve this area's cohesion and give it the political voice it deserves in Washington and Richmond. We ask that the boundary lines be revised to meet the intent of the redistricting law and the interests of the people of Mount Vernon.

To:
The Honorable Muriel-Theresa Pitney, Clerk
Supreme Court of Virginia
P.O. Box 1315

100 N. Ninth Street
Richmond, VA 23219-1315
While there are many issues with the CD-2 Congressional District in the proposed maps, the problem that stands out the most by far is that the City of Norfolk, or at least the northern portion of it, should be returned to the Second District map, as it is
historically, economically and geographically best connected to that District - as opposed to the rural areas that were added to CD-2 in the South of it which have no direct connections.

Please respectfully instruct the Special Masters to re-design the proposed odd-shapped CD-2 map so that the Second District is compact, contiguous, and recognizes communities of interest, with an equal emphasis on the rights of our Tidewater communities.

Thank you for your consideration and respectfully,

While I need to read further into this matter, I need to voice my concern with your plan if it will cause the split of the West Potomac pyramid school district into two separate senate districts. The reason for my concern is that it would likely dilute the advocacy for the school in Richmond, as well as create the potential for conflicting advocacy for the entire school community. If part of the goal of redistricting is to aim for greater equity and advocacy for all in our democracy, then this is not the way to do it. Further thought and effort needs to be given to the entire Mount Vernon area and in particular the area surrounding the West Potomac pyramid school district.

Thank you.

In my humble opinion, the map says it ail. Gerrymandering at its best. My advice is to change it to avoid getting in the National news (again !remeber the recent Yorktown boat fiasco)

1. Williamsburg has been separated from lower J ames City County, including Grove. The history of African Americans in the Historic Triangle links the City and Grove. For that reason, they should not be separated.
2. Lower James City County and Williamsburg rely on many of the same services in the Williamsburg area, such as transportation, healthcare, and social services.
2. The 69th takes a head-scratching jog across the York River and picks up a small portion of Gloucester. This is a very different community and should be part of a district that is on the other side of the York River with the rest of Gloucester County.
3. The new maps put Williamsburg in the 71st District, which runs all the way to Providence Forge. Williamsburg has always been part of Hampton Roads. This puts Williamsburg with other communities that extend up into the Richmond area instead of keeping it with other Hampton Roads communities.

Comments against removing us from the 16th District.
We live at 9004 Volunteer Drive, Alexandria, VA 22309 in the Westgate area of Mount Vernon and strongly object to being removed from the rest of our Mount Vernon Community in the16th House Delegate District and tacked on to the 19th District.

Our interests are better served by representatives that live and work in in the same community as we do. Splitting us off from District 16 and the rest of the Mount Vernon Community ignores our long-standing community of interest and relationship with District 16.

This proposal would separate us from our Mount Vernon Community of Interest where we live together, work together, go to school together and conduct business with. We have shared interests in public transportation, GW Parkway issues, northern Route 1 corridor development, infrastructure and other community interests. The proposed redistricting line literally splits our community off from Mount Vernon High School and Walt Whitman Middle School where we send our children to school and would severely dilute our opportunity to be fairly represented on a variety of local issues including noise pollution, air pollution, and development along the Route 1 corridor and adjacent areas near our home. This proposal moves us to a District along with Mason Neck, Woodbridge, and Marumsco where we share none of those common interests and violates your own guiding principles.

It appears that the Special Masters may have been too focused on the math as a priority rather than keeping communities together. Do not sacrifice our Community in order to make your numbers work...

We hope you will take our comments into consideration and incorporate them into a final decision that maintains our Mount Vernon community integrity.

Respectfully, Cheryl and Mike Bechtold

Dear Supreme Court Redistricting Masters,
1. As a decades-long resident of Goochland County, I have always felt the views of our county as a whole would be better represented if our county as a whole could be in the same district.
2. I also think that a district that follows the corridor of 164 makes sense as a home for Goochland as we do all of our business in Charlottesville or Richmond. We don't at all have connection with the counties east of Richmond. We do have great contact with counties such as Fluvanna, Louisa, and Hanover.

I appreciate that you have a difficult job, but please consider these two points in your decision.

Thank you,

To the Supreme Court of Virginia,
Looking at the maps as they are currently drawn, we would lose Rep.
Wittman, leaving Prince William County with no Republican representation in the Congress. The current proposed maps also do not present a district that would provide a fair contest for Republicans. This district must be fair and drawn in a way that makes it competitive and not a clear cut continuous victory for Democrats.
The easiest way to make the district more competitive is to remove the three Fairfax County precincts from the 7th District and replace them with the three northernmost precincts in Spotsylvania County (Riverbend, Elys Ford, and Wilderness School).

Or you could simply use the originally agreed upon House Map "C1".
Your thoughtful consideration of these alternatives is greatly appreciated in order to ensure Virginia is a safe place for all citizens with equal representation.

I am a resident of the Mount Vernon, VA community, and respectfully encourage you to KEEP MOUNT VERNON TOGETHER. I have been a leader at my daughter's public schools for the past six years, and the proposed maps will severely impact our community, and do not recognize our community interests. In addition, the Mount Vernon Estate is a critical anchor of our community, along with many other organizations along the route 1 corridor.

Thank you for your time and consideration.
Respectfully, --

I am very concerned about the proposed redistricting of Stafford and Fredericksburg.

The proposed New 7th District ignores the long-standing relationships that Stafford holds with the counties surrounding it in the Rappahannock
Region. Almost all of Stafford's regional interests and affiliations are with communities to the east, south, or west rather than to the north. Stafford County should not be attached to Northern Virginia simply because I-95 runs through it. Stafford is more than just a couple of exits off the highway. Please reflect our real world affiliations in the maps.

Thank you,
Michael and Lara Traylor

December 15, 2021
Muriel-Theresa Pitney
Clerk, Supreme Court of Virginia
100 North \(9^{\text {th }}\) Street, Fifth Floor
Richmond, Virginia 23219
Dear Ms. Pitney,
The current draft maps for the Virginia House of Delegates and Virginia Senate districts both divide the Kings Park West neighborhood of Fairfax County along its main thoroughfare--Commonwealth Boulevard. The northern half of the neighborhood is now drawn in House of Delegates District 15 and Senate District 35 along with voters in Burke, Annandale, and Springfield. The southern half of the neighborhood is drawn into HoD 10 and Senate District 36 along with voters in Fairfax Station, Clifton, Centreville, and Chantilly. Neither splitting large, tightly knit neighborhoods such as Kings Park West, nor combining residential areas that have very different interests are considered good practice for drawing voting districts.

Under the current draft maps, residents in the northern half of Kings Park West will be able to work with legislators in synergy with our neighbors in Burke, Springfield, and Annandale because we share very similar suburban housing styles and common transportation routes. In addition, our jobs, places of worship, libraries, shopping centers, and the offices where we seek professional services are frequently in those communities slightly to the north and east of Kings Park West. Neighbors in the southern half of the neighborhood will have none of these commonalities with other residents in their districts where the housing styles and transportation routes are much different, and the commercial sites are a much greater distance from Kings Park West. It is likely that the state legislators for the southern half of the neighborhood will not be oriented to the needs of a small group of residents with very different lifestyles from most of their constituents. This is the type of problem that Virginia's new redistricting process was designed to minimize.

Over the past half century, residents of Kings Park West have built a strongly unified community through our Civic Association, Kings Park West Herald newsletter, three neighborhood pools, multiple annual holiday celebrations, a soccer field with its own youth league, an annual college scholarship program, a block captain system, and many on-line groups dedicated to communication within the neighborhood. Voting districts that split Kings Park West will dilute votes from the southern half of our neighborhood into very dissimilar communities and hinder the entire neighborhood from working effectively with our legislators.

I respectfully ask that the Kings Park West neighborhood be reunited in House of Delegates District 15 and Virginia Senate District 35.

Sincerely,
JoAnn Kennedy Flanagan

To the Clerk of the Supreme Court of Virginia:

Please accept this as my comments on the proposed redistricting of the Ninth Congressional District in Virginia.

I am perplexed and nonplussed at removing the City of Salem and west Roanoke County from our district. Both are solid members of the Ninth and have strong ties to southwest Virginia, not to mention that the current Congressman from the Ninth resides in Salem. From the outside this looks like a gerrymander and is reminiscent of 1970 when redistricting put Sixth District Congressman Richard Poff and Ninth District Congressman William Wampler in the same district.

I understand that an argument is made that Salem needs to be lumped in with Roanoke because of some imagined valley commonality. Anyone who lives in the area would quickly contest this myth. These are distinct communities with separate lifestyles and for a large part the economic and employment situations distinct and unique.

The City of Salem and west Roanoke County have far more commonality with southwest Virginia than the City of Bedford, which is historically and practically a part of Virginia's Piedmont region.

Please correct this obvious error in the current plan.

Respectfully submitted,

\section*{Esteemed Special Masters:}

I am writing to express my heartfelt conviction that Albemarle County should not be divided between two congressional districts. I've lived in North Garden and other parts of southern Albemarle for decades. It's no secret that Charlottesville and, increasingly, Albemarle County, comprise a bright blue oasis right smack in the center of Virginia. I grew up in Lynchburg, where Jerry Falwell flourished and George Wallace had a large fan base. That's why I moved here in 1978 - I wanted to be in a community centered around a large university, where the populace tended to be educated, liberal, and supportive of the arts. I wanted to have my people around me, and I found them here. I am not surprised that we have a very high rate of vaccination. Nearly 79\% of Albemarle County's electorate voted Democrat in the November election. Albemarle County has endured decades of partisan gerrymandering, with the county being carved up three or four ways to water down or even eradicate our influence. That is why it is so distressing to yet again see us being carved up. It would be such a relief NOT to live in a district where the most extreme candidate can simply primary himself into a guaranteed win, and then disregard, to the extent possible, his constituents with dissenting views. (I am using the male gender intentionally, since I can remember no 5th District representative who was not a white male.) Fanatical elected representatives have no interest in working across the aisle. We have suffered through so many terrible congressmen, culminating with Bob Good, a Bible-thumping, race-baiting, homophobic, fascistic Neanderthal, who would undoubtedly love to establish a Christian theocracy ruled by President-for-Life Donald Trump. Please have mercy on us.

I understand that your purpose is not to concern yourselves with political ramifications; that you are trying to create districts of roughly equal populations, while also attempting to keep together communities of interest. I would argue that Charlottesville and Albemarle County are one of the most coherent communities of interest within the Commonwealth. If I knew the number of people in the portion of Albemarle County that you have mysteriously added to the proposed 5th District, it would be much easier for me to suggest a logical adjustment. Maybe the eastern portion of Loudoun County would be equally compatible with the 2nd or the 7th districts. I understand that it's not that simple. But I must reiterate that no part of Albemarle County belongs in the 5th District. All of Albemarle County belongs in the proposed 10th District.

Very sincerely yours,
Diana Mead

Fairfax County Public Schools

Chief Justice and Justices of the Virginia Supreme Court,
The proposed congressional map radially splits apart the largest community of shared interest in Central Virginia, namely the greater Richmond area. In my area, Henrico County and Chesterfield County, and the City of Richmond are proposed to be split between 3 different congressional districts, rather than 2 as in the current map, which marginalizes the voting power a diverse community of interest. A careful reading of the Special Masters' report, specifically pages \(3,6,16\), and 17 will show that although the Special Masters allude to taking communities of interest into account where practical, their method over-optimized on making populations within congressional boundaries as equal in headcount as possible. The over-optimization on headcount criteria is clearly reflected in the extremely forced narrow range of the "Pct Deviation" statistics listed on page 17, where less than 10 percent of the permissible range was used. The Special Masters then drew the congressional boundaries for the greater Richmond area last (see page 16), which effectively relegated the greater Richmond community of interest. It is in the report, we can all follow the description of the method that the Special Masters followed and see how we got to this flawed congressional map.

It may seem counter-intuitive, that making the population sizes as similar as possible was the wrong primary criteria. What I am saying is that an error of over-weighting that criteria is clearly what happened, and the Pct Deviation data on page 17 is prima facia evidence that communities of interest were not sufficiently considered by the quantitative approach used by the Special Masters. The array of numbers on that page seems to convey certainty, but it is also evidence of the flawed method. The headcount criteria then interacted with the compactness criteria, particularly because the greater Richmond area was last to be considered, and thus the greater Richmond community of interest was left out of the process, at least from what I can see. The Special Masters have latitude to make more accommodations for Central Virginia in the congressional map, and to start solving for the major issues in the congressional map from the center out.

Furthermore, here in Virginia, our state legislators are part-time state employees. State legislature maps that force so many boundary changes to optimize on an incomplete set of goals would places a great burden on citizen-legislators to move their households in order to compete for re-election. This at a time when home prices are high and inventory of available homes is low. In general, voters like their representatives and don't want their representatives to relocate. Both parties would agree to that, it is bipartisan. The Special Masters have agreed to be blind to this issue. Is that what the voters intended?

In closing, the Special Masters need clear guidance from and dialog with this Court, and the Special Masters have many degrees of freedom to improve all 3 maps. Only the Supreme Court of Virginia can guarantee that the intent of the constitutional amendment is fulfilled. This includes weighting communities of interest as well as the nature of a part-time state legislature. And the Court has the power to compel corrective action. Leaving the greater Richmond community of interest last to be considered needs remedy. I recommend that the revisions start at the top and center of the maps and move outward.

I applied to be a member of the redistricting commission. I am grateful for the transparency of this process and the opportunity to testify today.

Respectfully Submitted,
William Panak

To the Supreme Court:
I appreciate the task of the special masters and realize the difficulties that drawing lines entails. Still, I believe that this map could have been configured in a way that truly represents communities of interest. Like a puzzle, if you change one part, others must also change; while I am not a demographer and do not have all the population numbers in hand, I request a second look to be taken of the Charlottesville-Albemarle area, and its potential to be located intact within Congressional District 10.

Charlottesville and Albemarle share a common community in Central Piedmont, housing the University of Virginia and the Medical Center, which is a hub of jobs for people in our Planning District 10 region -- Nelson, Fluvanna, Greene, Louisa. Through the planning district, these counties have shared decades of planning for economic development, transportation, environmental and other services. To separate us politically makes no sense as we need representatives to serve our common interests.

To keep this community intact, Charlottesville-Albemarle or Cville-AlbemarleNelson could be added to Congressional District (CD) 10, which of course would entail further change to those districts as well as CD 5.

CD 5 is much more similar to most of CD 4 as both these districts (without Albemarle and Nelson) historically comprise Southside Virginia sharing cultural, economic, agricultural, and other ties and connected well by transportation corridors such as US 58, 95, and 29.

Charlottesville Albemarle could be appended to CD 10 while the northernmost parts of CD 10 -- Loudoun and/or Spotsylvania --join the adjacent 7th.

I realize that this is a complex endeavor, but I hope that the Court and the Masters will give some harder look at keeping the Charlottesville-Albemarle area together and connected to the rest of the Piedmont.

Ours is an important educational, medical, economic hub in the Central Piedmont and should not be appended to a largely Southside rural community.

Thank you.
Sincerely,
Katherine Slaughter

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

I am a teacher at school and we are unable to load the webex platform on our school internet system. I'm the Gloucester County Democratic Committee Chair, a Member of the DPVA's Central Committee, and a life-long resident of the 1st Congressional District. All I really wanted to say was a) Keep all of Gloucester County in one HOD district. My house and my child's school should not be in two House of Delegates districts and voters should not have to pay a toll to cross the bridge and meet with their elected representatives. We don't even have public transportation that goes over the Coleman Bridge. This disenfranchises some of our most vulnerable voters, violates the principle of not crossing rivers or mountains, and separates communities of interest from one another.
b) The Southern existing 1st Congressional District, and Gloucester County in particular, is not a community of interest with Short Pump, Fluvanna, and the Charlottesville suburbs. We're a rural coastal community with much more in common with the existing northern edge of CD1 than we have in common with those in the proposed redrawn district. I'm sure they're perfectly nice people, but this is not a useful solution.
Thank you for your time,
Respectfully submitted,
Dianne Carter de Mayo,
Gloucester

## Muriel-Theresa Pitney

Clerk of Court
Supreme Court of Virginia
100 North Ninth Street, 5th Floor
Richmond, Virginia 23219-1315
Dear Madam Clerk:
My name is Roy L. Perry-Bey, and I have been a resident of Virginia, for most of my life. During this time, I have served as a civil-right activist throughout Virginia, primarily with the Coalition for Equal Justice, Citizens of Hampton Roads March Against Poverty Campaign and the United Front for Justice. I have been on the front lines of issues like treatment of veterans, confederate statutes, housing discrimination, police brutality and voting rights throughout the Commonwealth.

I write to urge this Court to reject the voting mapssubmitted by the Special Masters because they sharply limit the number of majority-Black Senate and House Districts throughout Virginia. Since 2010, Virginia has had five majority-Black Senate Districts (out of forty) and ten majority-African American House Districts (out of ninety-eight). If approved, the Special Master's maps will reduce the number of Senate Districts to two, and the number of House Districts to five.

The harm to Virginia's African American communities that results from reducing majority-African American voting districts by more than half should be obvious. As those majority-minority Districts disappear, so too does the political power of Virginia's minority communities. And as someone who has devoted his life to ensuring equal justice for all, I must object to proposed maps that needlessly reduce these critical districts by greater-than fifty percent.

Virginia not only has a moral imperative to protect minority political power; it has a legal one as well. Section 2 of the Voting Rights Act prevents "a denial or abridgement of the right of any citizen of the United States to vote on account of race or color." 52 U.S.C. § 10301(a). Such a "denial or abridgment" occurs if "the political processes leading to nomination or election in the State or political subdivision are not equally open to participation" by members of a protected class
"in that its members have less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice." Id. § 10301(b).

Virginia’s African American communities almost certainly satisfy the criteria necessary to trigger Section 2. They are "sufficiently large and geographically compact to constitute a majority" in several of the non-majorityminority districts. See Thornburg v. Gingles, 478 U.S. 30, 50 (1986). They are "politically cohesive." Id. at 51. And the "the white majorit[ies]" in these non-majority-minority districts "vote sufficiently as a bloc to enable" them "to defeat the minority's preferred candidate." Id. Because this is the case, Virginia must include majority-minority districts.

In other words, there are great "reasons to believe" that more voting districts must have a greater percentage of minority population. See BethuneHill v. Va. State Bd. of Elections, 137 S. Ct. 788, 801-02 (2017). Compliance with the Voting Rights Act is a compelling interest. Id. at 801. To satisfy this compelling interest, the Court should reject the Special Master's proposed maps, thereby avoiding a likely Voting Rights Act violation.

Mr. Roy L. Perry-Bey<br>Political \& Civil Rights Activist<br>United Front For Justice

Redistricting@vacourts.gov

Muriel-Theresa Pitney, Clerk of Court
Supreme Court of Virginia
Post Office Box 1315
100 North Ninth Street, 5th Floor
Richmond, Virginia 23219-1315
Dear Ms. Pitney:
As members of opposing parties who have both represented the Northern Neck, we are putting aside occasional differences to beg consideration of keeping the Northern Neck in a whole and distinct State Senate district as it had been before the most recent redistricting in 2011 and thus mirroring the long-standing tradition of the House of Delegates maps.

The Northern Neck is a distinct geographic area with very distinct communities of interest. It is the Northern most peninsula in Virginia on the Eastern side of Virginia bounded by two rivers and the Chesapeake Bay: the Potomac on the North and the Rappahannock on the South, and yet, the Special Masters cut it in to three different districts.

One of the most historical areas in the country, three of the first five presidents were born there: George Washington and James Monroe in Westmoreland, and James Madison in King George. The Northern Neck and her people are intertwined from county to county adopting mutual aid agreements for fire, rescue, and police services. The Northern Neck Tourism Council at NorthernNeck.org boosts the history of the region and regionally promotes tourism throughout the Northern Neck.

There is an economic development partnership through the Northern Neck Planning District that promotes economic development through the Northern Neck. The Northern Neck faces special challenges due to its isolation by the rivers and its rural nature. It runs from the tip of Northumberland and Lancaster counties, where it meets the Chesapeake Bay all the way to Eastern Stafford County.

The Neck is comprised entirely of Northumberland, Lancaster, Richmond, Westmoreland, and King George Counties with its Eastern boundary being at Stafford County. All of these people enjoy much the same way of life, while it is anchored by the employment
center of the Dahlgren Naval Base in King George others, farm, fish, or work in service industries.

The Northern Neck is a very close-knit community and very much keeps unto themselves. It is truly a community of common interest and should not be divided into three Senate districts as the Special Masters have done. In particular, King George has no common interest with Hanover County where it would now lie in the newly drawn 25th district.
Additionally, the lower counties in the Northern neck have no common interest with James City County, where they would now lie in the newly drawn 26th district.

The Special Masters recognized in their memorandum that the public wanted to keep the Northern Neck whole, and for some reason the Masters thought they had, yet it was cut into three distinct districts. Perhaps the Masters did not understand the true boundaries of the Northern Neck.

One simple look at a map, shows a clear and distinct peninsula, which is the Northern most in our Commonwealth. We strongly believe that it is important to keep the Northern Neck whole, much as the Special Masters did with the Eastern Shore and Middle Peninsula.

We respectfully ask this Honorable Court to take our comments into consideration.
Very Truly Yours,

Richard H. Stuart
Member, Senate of Virginia
Twenty-Eighth District

I have only lived in Virginia for 3 years, but even I k ow that Williamsburg belongs in the Hampton Roads COI, not the Richmond one. Also why is Gloucester in 71 but not Williamsburg? Very strange. Please adjust so the groupings reflect the real communities as we who live here experience them.

## Virtual redistricting Hearing Comment Inbox

Muriel-Theresa Pitney<br>Clerk of Court<br>Supreme Court of Virginia<br>100 North Ninth Street, 5th Floor<br>Richmond, Virginia 23219-1315

## Dear Madam Clerk:

My name is Ronald M. Green, of whom works with Roy L. Perry-Bey, and I have been a resident of Virginia, for most of my life. During this time, I have also served as a civil-right activist throughout Virginia, primarily with the Coalition for Equal Justice, Citizens of Hampton Roads March Against Poverty Campaign and the United Front for Justice. I have been on the front lines of issues like treatment of veterans, confederate statutes, housing discrimination, police brutality and voting rights throughout the Commonwealth.

I write to urge this Court to reject the voting mapssubmitted by the Special Masters because they sharply limit the number of majority-Black Senate and House Districts throughout Virginia. Since 2010, Virginia has had five majority-Black Senate Districts (out of forty) and ten majority-African American House Districts (out of ninety-eight). If approved, the Special Master's maps will reduce the number of Senate Districts to two, and the number of House Districts to five.

The harm to Virginia's African American communities that results from reducing majority-African American voting districts by more than half should be obvious. As those majority-minority Districts disappear, so too does the political power of Virginia's minority communities. And as someone who has devoted his life to ensuring equal justice for all, I must object to proposed maps that needlessly reduce these critical districts by greater-than fifty percent.

Virginia not only has a moral imperative to protect minority political power; it has a legal one as well. Section 2 of the Voting Rights Act prevents "a denial or abridgement of the right of any citizen of the United States to vote on account of race or color." 52 U.S.C. § 10301(a). Such a "denial or abridgment" occurs if "the political processes leading to nomination or election in the State or political subdivision are not equally open to participation" by members of a protected class "in that its members have less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice." Id. § 10301(b).

Virginia's African American communities almost certainly satisfy the criteria necessary to trigger Section 2. They are "sufficiently large and geographically compact to constitute a majority" in several of the non-majorityminority districts. See Thornburg v. Gingles, 478 U.S. 30, 50 (1986). They are "politically cohesive." Id. at 51. And the "the white majorit[ies]" in these non-majority-minority districts "vote sufficiently as a bloc to enable" them "to defeat the minority's preferred candidate." Id. Because this is the case, Virginia must include majority-minority districts.

In other words, there are great "reasons to believe" that more voting districts must have a greater percentage of minority population. See Bethune-Hill v. Va. State Bd. of Elections, 137 S. Ct. 788, 801-02 (2017). Compliance with the Voting Rights Act is a compelling interest. Id. at 801. To satisfy this compelling interest, the Court should reject the Special Master's proposed maps, thereby avoiding a likely Voting Rights Act violation.

Once a decade we have Census: Based on the population shift the redistricting is done to have a proper representation of the population and voice to the table. Now after a major increase of Asian American and Hispanic population in Northern Virginia, the map drawers included no minority-majority Senate districts, while its clearly possible to draw at least one around South Riding, Chantilly, Centreville, Manassas area. I request the the Virginia Supreme Court to take this request into account while approving the final map.

Thank you,

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

To The Virginia Supreme Court:

On behalf of the Virginia House of Delegates Democratic Caucus, we are submitting two maps for the Court's consideration.

We urge the Court to adopt a House of Delegates map that reflects as many of the regional highlights as possible contained in our first map (Map 1). Map 1 reflects a balanced and fair approach. It was developed before the Court released the Special Masters' map and represents our model plan drafted in accordance with all applicable federal and state constitutional and statutory requirements. It properly reflects the population and demographic changes resulting from the 2020 federal decennial census and does so in a way that is least disruptive, by following the generally accepted redistricting principle that recognizes as a legitimate criteria not making unnecessary changes to current districts where it is possible.

The changes in the Commonwealth's ethnic and racial demographics are also reflected in Map 1.

Importantly, the map provides racial and minority group members with the opportunity to elect their preferred candidates of choice. Districts are all contiguous and compact without splitting precincts. Further, the plan provides partisan balance and does not unduly favor either major political party.

Key highlights of Map 1 include:

## Northern Virginia:

- Creating more geographically compact districts, eliminates winding, reaching districts
- Limiting the number of districts that cross county lines
- Preserving communities of interest, using Homeowners Association boundaries in places where there are no incorporated cities
- Splitting Arlington into fewer districts and keeping two districts entirely in the county. It follows the Route 50 dividing line that has been used for years in Arlington and by regional governments. Communities north of Route 50 are included in North Arlington and everything south is in South Arlington. The map keeps the neighborhoods
north and south of Columbia Pike together in the natural Columbia Pike corridor community of interest.
- Giving Alexandria one district entirely within the locality with only one other district taking up the remaining precincts, allowing its communities to stay together
- Prince William County has fewer districts that reach outside the county, keeping 6 of 7 districts entirely within county lines and keeping the cities of Manassas and Manassas Park whole

## Richmond:

- Eliminating the partisan gerrymandering in western Henrico County and creating more compact districts there, while keeping eastern Henrico communities of interest together
- Keeping Petersburg with suburban Chesterfield County, not with more rural Dinwiddie County
- Limiting the number of districts Richmond is cut into

## Hampton Roads:

- Providing more compact districts in the Peninsula, keeping Williamsburg with historical communities in James City County, Jamestown and the unincorporated community of Grove
- Newport News is condensed primarily into two districts with the northern precincts being included with the community of Grove where they make up a community of interest
- Norfolk has two districts entirely within the city limits
- Virginia Beach has 4 of its 6 districts entirely within city limits, rather than having multiple districts cross over city limits and keeps the regions of the city together

## Southside/Southwest:

- Drawing together the southside cities of Danville and Martinsville, as they are likely to have similar interests and issues
- Keeping the cities of Blacksburg and Radford together as a community of interest because of the two colleges there (Virginia Tech and Radford College)

All districts were drawn using 2020 federal decennial population data adjusted for prisoner reallocation as required by state law.

Should the Court not be inclined to adopt the suggestions contained in Map 1, we hope that it will, at minimum, take up the changes we suggest in Map 2, which is adapted from the Special Masters’ map.

Map 2 suggests several modifications to the draft map that would be less disruptive to voters who know and understand their districts. This map also provides for competitive districts. This plan keeps the cores of several current districts intact and attempts to avoid any unnecessary shifts in certain precincts to other districts. The map also follows the generally accepted redistricting principle that recognizes as a legitimate criteria not making unnecessary changes to current districts where it is possible. Since this map works from the Special Masters’ plan, we ask the Court to incorporate as many of these changes as possible in its final plan. These changes would not be difficult to make.

Key features in Map 2 include:

- HD 10/11: Moving the Sideburn precinct from HD 10 to HD 11 to keep the George Mason University area together, and balancing population deviation by moving the Villa precinct from HD 11 to HD 10.
- HD 14/15: Moving the Wakefield precinct from HD 15 to HD 14, to keep it with the rest of the Annandale community.
- HD 19/25: Moving the Cardinal precinct and Fitzgerald precinct from HD 25 to HD 19 to keep the Cardinal Drive community together.
- HD 78/79: The Ginter Park neighborhood has been split between proposed districts 78 and 79, as has the historic Jackson Ward neighborhood. Moving precinct 213 from 79 to 78 and moving precincts 307 and 308 from 78 to 79 would allow these communities to remain intact.

We are attaching supporting data charts for each map and shape files can be found at this link: VA House Democrats Maps. We thank the Court for considering these submissions as it prepares its final maps.

Sincerely yours,

Charniele Herring

I disapprove of the proposed redistricting plan.
VA02 and VA03 should not be redrawn to dilute the votes of the military and veterans, the minority representation in VA03 and what should be a shared federal representation of future environmental solutions for the contiguous waterfronts of Norfolk and VB.

Honorable Justices of the Virginia Supreme Court,
Virginia Congressional District 2 (VA-CD02) has long been viewed as the congressional district housing Virginia’s military region. The current district includes Naval Station Norfolk the largest naval installation in the world; and Naval Air Station Oceana, known as the Master Jet Base; Joint Base Langley Air Force Base and Fort Eustis, major installations for the Air Force and Army; and several smaller military installations. Our congressional representative is usually a member of the Armed Services Committee and a strong advocate for the military in general.

The newly drawn Virginia congressional districts submitted by the court-appointed masters removes the military voting block that VA-CD02 has traditionally maintained. Separating the installations into different districts would not increase political strength for our military population. Having different legislators for all the military installations in the Hampton Roads could unnecessarily pit Virginia districts against each other for precious funding in Congress.

I request another look at the lines for VA-CD02 and that the current military community be maintained in a single congressional district. I realize that VA-CD02 does not contain all the military installations in Hampton Roads or Virginia. However, it does consolidate a significant voting block of like-minded voters who have and continue to contribute to our nation.

Thank you for taking the time to review my comment on VA-CD02.
Submitted respectfully,
Susan Hippen

Dear Judges and Court Reviewers,
I am very opposed to the proposed redistricting lines that I have reviewed. Regardless of personal politics, this outline is heavily weighted to a Democrat majority and shows favoritism to a fault. This is not good for democracy. This is definitely not good for Virginia. It is most definitely not good for my family or my community.

I urge you to send the redistricting plan back to the drawing board and expect something in return that illustrates fairness, equality, and conscientious deliberation and thought. You are welcome to contact me.

Most sincerely,
Catherine Slusher

I am a long-term resident of Northern Virginia, in Prince William County (Bristow, VA).
I have reviewed the summary report on development of the newly released draft redistricting maps for the Virginia House of Delegates, Virginia Senate, and Virginia congressional districts in the U.S. House of Representatives.

From my vantage point as an independent voter, I believe the maps have accomplished their primary purpose: to reduce the influence of political gerrymandering on elections throughout the Commonwealth of Virginia. I know that some of the Democratic candidates (now incumbents) I recently have supported in the Virginia House and Senate will face more challenging races in 2022 and beyond. I suspect the same is true with respect to Republican incumbents. This project has been about fairness and a balancing of legitimate interests, not about protecting incumbents as has been the case in the past. I'm pleased that the map-drawers appear to have fairly applied the fair-voting redistricting standards set forth by enacted VA legislation, the constitutional amendment, and the courts.

## Congratulations!

Sincerely,
Chris Bates

The redistricting maps are objective and balanced. They tilt toward conservatives. I urge the Virginia Supreme Court to reject the maps and have the people they hired go back to the drawing boards and produce a truly fair set of maps. Abigail Spanberger's treatment is ugly and disgusting.

If Congresswoman Spanberger is drawn out of her district, then produce a map that does the same thing Delegate Margaret Ransone.

To the Supreme Court of Virginia
I want to congratulate the Supreme Court of Virginia for developing proposed new districts for the Virginia Senate, House of Delegates and U. S. House of Representatives which make sense and fulfill the will of the voters of Virginia when they passed the redistricting constitutional amendment. When I first reviewed the maps the the special masters had produced, the first word that came to my mind was"Integrity". I urge the Supreme Court to stand by these maps: I understand the issue regarding the Voting Rights Act and minority representation, and am confident that the Supreme Court can work this issue out.

You did a great job. Thank you.

Subject: Concerns Regarding the Proposed Maps in the Hampton Roads Areas
Date: Wednesday, December 15, 2021 2:58:49 PM
```

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

To whom it may concern,
My name is Owen Williams and I am a current student at the College of William \& Mary in Williamsburg, Virginia on Virginia's Lower Peninsula.

I and many other students have significant concerns regarding the special master's proposed maps as they affect Hampton Roads and the Lower Peninsula. My main concerns are as follows:

The City of Williamsburg has been separated from lower J ames City County, including Grove. The history of African Americans in the Historic Triangle links the City and Grove. For that reason, they should not be separated. These communities are intrinsically linked.

Lower J ames City County and Williamsburg rely on many of the same services in the Williamsburg area, such as transportation, healthcare, and social services. Splitting these communities of interest makes absolutely no sense. They should be represented by the same elected officials because the residents of both live and work in both areas.

The proposed 69th House District takes an incredibly confusing path across the York River and picks up a small portion of Gloucester. This is a very different community to Williamsburg and should be part of a district that is on the other side of the York River with the rest of Gloucester County.

The new proposed maps put Williamsburg in the new 71st District, which runs all the way to Providence Forge. Williamsburg has always been part of Hampton Roads. We are connected far more to the eastern end of the lower peninsula. Many William \& Mary students actively interact with Newport News, Hampton and Norfolk far more than they do with New Kent or other areas closer to Richmond or the other peninsulas. This puts Williamsburg with other communities that extend up into the Richmond area instead of keeping it with other Hampton Roads communities.

Given the dynamics above, we would like to see some significant changes in the House of Delegates districts on the Middle Peninsula. Thank you for considering our voices in this process, and please protect communities of interest.

Best,

## Owen R. Williams

December 15, 2021

Ms. Muriel-Theresa Pitney
Clerk of Court
Supreme Court of Virginia
100 N. $9^{\text {th }}$ St, $5^{\text {th }}$ Floor
Richmond, VA 23219
Dear Ms. Pitney:
Pursuant to the Court's Redistricting Rule 4, the Virginia Senate Democratic Caucus respectfully submits the following comments on, and proposed amendments to, the draft Senate map released by the Court's Special Masters on December 7, 2021.

To begin with, my colleagues and I want to thank the Special Masters for their diligent efforts thus far. The Redistricting Amendment, its implementing legislation, and this Court's rules place a premium on transparency and public input in the redistricting process. By releasing their draft maps early along with a detailed memorandum explaining their approach and data regarding the draft districts, the Special Masters have given the public, along with the parties specifically mentioned in Va. Code Ann. § 30-399(F), an opportunity to review and comment on the draft maps, including to propose amendments that will ensure the maps ultimately adopted by the Court comply with the governing laws and advance the goal of fair elections for Virginia voters. In addition, the Court has created a robust public comment process by providing multiple ways for the public to share their views on the important work of drawing new districts. It is in this spirit that we submit the comments and proposed amendments below.

In summary, in recognition of the Special Masters' reasonable approach in many areas, we are not proposing any wholesale overhaul of their draft Senate map. Instead, the Senate Democratic Caucus respectfully submits that certain districts in seven specific regions should be modified to better reflect important communities of interest and other significant considerations regarding the makeup of the Virginia Senate. Of particular note, the Special Masters' draft Senate map pairs the two longest-serving African American members of the General Assembly, including the current Senate President Pro Tempore, in a single district. While we understand that the Special Masters chose generally not to consider incumbent addresses or pairings, a map that effectively expels at least one of these historic African American figures and civil rights icons from the Virginia Senate will not help move the Commonwealth forward. We have
therefore proposed modifications to the draft Senate map that will avoid this unacceptable result while simultaneously improving the preservation of well-recognized communities of interest in the relevant regions. These and other proposed modifications, including to better preserve college and university communities, are detailed below.

## I. Hampton Roads

We appreciate the Special Masters' recognition that the Senate districts in the Hampton Roads region are "among the most difficult districts to draw in the commonwealth, as they require a careful balancing of competing considerations based upon geography, community, and race." Memo from Special Masters to Supreme Court (Dec. 17, 2021) (hereinafter "Special Masters Memo"). Respectfully, however, the Special Masters' draft districts in this region would do significant harm to African American representation and would divide, rather than unite, well-recognized communities of interest.

Our proposed amendments to the Hampton Roads districts, shown in Figure 1 below, are aimed primarily at unpairing two long-serving African American Senators who have overcome tremendous challenges and racial discrimination to become historic and consequential figures in our Commonwealth. Additionally, our amendments better respect the region's main communities of interest by uniting Norfolk with South Norfolk on the one hand and with the Eastern Shore on the other, as well as keeping whole the suburban area of Virginia Beach. These amendments recognize the historic connections binding the City of Norfolk to these two areas, as well as the unity of economic and political interests that exist between them.

Figure 1. Proposed Amendments to Hampton Roads Districts ${ }^{1}$

[^25]
## A. Senators Lucas and Spruill Should Not Be Paired in a Single District

Due to the Special Masters' decision not to consider incumbent addresses, the Special Masters' draft of the Hampton Roads districts inadvertently "double bunked" two heroes of Virginia's civil rights movement: Senator L. Louise Lucas and Senator Lionell Spruill, Sr. Specifically, the Special Masters' draft Senate District 18 combines northern portions of Chesapeake (where Senator Spruill resides) with the southern half of Portsmouth (where Senator Lucas resides).

Both of these respected legislators have overcome unimaginable hurdles in their personal lives and political careers, including invidious racial discrimination, and both have contributed immensely to improving the Commonwealth's record on civil rights. Pairing them in a single district, which would effectively expel at least one of them from the Senate, fails to respect the unique role that each of these iconic figures has played and continues to play in the troubling and evolving story of race relations in Virginia.

Senator L. Louise Lucas, the President Pro Tempore of the Virginia Senate, could not go to school when she was a girl because Portsmouth's school system was shut down by segregationists engaged in the strategy of "Massive Resistance." She became a mother at age 14, and even after the Portsmouth schools were reopened she was not able to complete high school. Despite these extreme obstacles placed in front of her as a result of racial discrimination, Senator Lucas persevered. In 1971, she became the first female shipfitter at Norfolk Naval Shipyard. From there, she rose to become the Command Federal Women's Program Manager at the Commander in Chief, U.S. Atlantic Fleet (CINCLANTFLT) and Equal Employment Manager at the Supervisor of Shipbuilding Conversion and Repair (SUPSHIP). Since leaving federal employment, Senator Lucas has been a business owner, a civic leader, and a college professor.

While Senator Lucas has been an activist all her life, her career in politics formally began in 1984 when she was elected as the first African American woman to serve on Portsmouth's City Council. She was elected to the Virginia Senate in 1991, where she has served with distinction ever since. As one of just three African American women in the chamber, Senator Lucas is a role model to generations of Virginians, especially African American women and girls. Senator Lucas is both the first woman and the first African American to serve as President Pro Tempore of the Virginia Senate. She serves as the Chairman of the Education and Health Committee and is third in seniority on the Finance Committee. Her loss in the Senate would deprive Virginia's African American community of significant influence on a statewide basis.

Senator Lionell Spruill, Sr. was born one of 16 children in the era of segregation, meaning his mother was denied access to a hospital. Because of a preventable mishap during birth, Senator Spruill was born with serious hearing problems and a speech impediment that rendered his speech unintelligible. He grew up in poverty, in a segregated school system with no resources to help him overcome his impediment.

Despite these hurdles, Senator Spruill obtained a job with the phone company, which paid for medical procedures that helped him hear and learn to speak. He began as a lineman and worked his way up to installer, then technician. He first entered politics when he realized that his hometown of South Norfolk was completely unrepresented in the leadership of the newly
merged City of Chesapeake. He ran and won as the first representative for South Norfolk on the Chesapeake City Council. In 1993 he won election to the House of Delegates, where he served with distinction until his election to the Senate in 2015. As the only African American man in the Virginia Senate, Senator Spruill is, like Senator Lucas, a role model to generations of Virginians. Senator Spruill is third in seniority among members in the majority on the Commerce and Labor Committee, and is chairman of its Energy Subcommittee.

While some pairing of incumbents may be unavoidable, this particular pairing is both harmful to minority representation in the Commonwealth and easily avoidable. By reuniting all of Portsmouth in a single district that connects with Suffolk and additional counties to the west, Senator Lucas would no longer be paired in the same district as Senator Spruill, giving both of them the opportunity to continue their historic representation of minority opportunity districts.

## B. Norfolk and Northeastern Chesapeake Form a Well-Recognized Community of Interest, and Portsmouth Should Be Kept Whole

In addition to unpairing Senators Lucas and Spruill, our proposed amendments to Senate Districts 17 and 18 better preserve communities of interest by undoing a jurisdiction split in Portsmouth and combining the southern portion of Norfolk proper with the South Norfolk community of City of Chesapeake. This is superior to the Special Masters' configuration, in which the southern portion of Portsmouth is lumped together with the northern portion of Chesapeake in one district, while the northern portion of Portsmouth is sheared off into a separate district.

Uniting the southern portion of Norfolk with the northeastern portion of Chesapeake in District 18 would preserve a well-known community of interest. Indeed, the northeastern portion of Chesapeake is officially known as "South Norfolk," rightly reflecting its longstanding ties to the City of Norfolk. See "South Norfolk Community," City of Chesapeake Official Website (accessed Dec. 14, 2021). ${ }^{2}$ This part of Chesapeake started as a "street car suburb" of Norfolk and was incorporated into the City of Chesapeake in 1963. See Suzy Looman, "History of South Norfolk,' HistoricSouthNorfolk.com (July 5, 2021). ${ }^{3}$ The Special Masters appear to have recognized the ties between Norfolk proper and South Norfolk in drawing House District 92, which straddles both areas.

Modifying Senate District 18 to include South Norfolk and Norfolk would allow the redrawing of District 17 to include the entirety of Portsmouth and undo a jurisdiction split, which was one of the Special Masters' primary objectives. Portsmouth, one of Virginia's oldest settlements, is a community of interest unto itself. Its residents have immense hometown pride. For instance, the City hosts the annual Portsmouth Invitational Tournament, where college basketball seniors play in front of NBA scouts. Many top basketball stars played in the Tournament before successful pro careers, including Jimmy Butler, Scottie Pippin, Dennis Rodman, and John Stockton. See Portsmouth Invitational Tournament, Wikipedia (accessed Dec. 14, 2021). ${ }^{4}$ The City is also home to the African American Historical Society of Portsmouth, which recently put up murals honoring the City's Black history at the Portsmouth

[^26]Welcome Center. J. Reyes, "Portsmouth group hopes murals in city's Welcome Center are first step toward a more prominent display of African American history," Virginian Pilot (Nov. 26, 2021). ${ }^{5}$ Keeping Portsmouth whole would also ensure that the entirety of draft House District 88 falls within Senate District 17, which better respects the "nesting" concept endorsed by the Special Masters for state legislative districts. Special Masters Memo at 9.

In order to equalize population, our proposed District 17 drops most of the City of Suffolk but retains the eastern portion of Southside, traveling along the Route 17 corridor. See "Route 17 Arterial Preservation Plan," VDOT (Sept. 1, 2020); ${ }^{6}$ see also Special Masters Memo at 7 (defining communities of interest with respect to "travel arteries").

## C. The Eastern Shore and Norfolk Form a Community of Interest

We further suggest that Senate District 20 be modified such that the Eastern Shore is joined with Norfolk, including just a small sliver of Virginia Beach where the Chesapeake Bay Bridge Tunnel makes landfall. This is superior to the Special Masters' configuration, in which the Eastern Shore is joined primarily with Virginia Beach, taking just a small sliver of Norfolk.

With this amendment, the map would preserve the strong community of interest that exists between the Eastern Shore and Norfolk. This community is reflected in the myriad economic and cultural ties that connect these two areas. For example, as amended, District 20 would follow the "Eastern Shore Corridor," which was designated a "Corridor of Statewide Significance" and is centered on U.S. Highway 13. See "Eastern Shore Corridor," VTrans2040 Multimodal Transportation Plan (2012). ${ }^{7}$ The Corridor centers on Norfolk as the "primary population center" and connects it with "the sparsely populated counties of Northampton and Accomack." Id. Norfolk serves as a major "employment center" for the Eastern Shore counties, as well as a transportation hub that is home to the region's airport. Id. And Norfolk's Old Dominion University has a special relationship with Eastern Shore Community College and with the Wallops Island Spaceport, both of which are important institutions on the Eastern Shore. See Old Dominion University Partnership, Eastern Shore Community College Official Website (accessed Dec. 14, 2021)"; "Wallops Spaceport partnership that includes ODU expected to have role in new space station resupply project," News@ODU (May 2008).. ${ }^{9}$

Norfolk and the Eastern Shore also share significant political interests. Both areas of the Commonwealth unfortunately have median incomes significantly below Virginia's statewide median. See Virginia Dep't of Health, "Income and Poverty" (accessed Dec. 14, 2021) (Statewide - \$74,222; Accomack - \$46,073; Northampton \$47,227; Norfolk - \$51,590). In contrast, Virginia Beach's median income is above the statewide median. Id. The poverty rates tell the same story: Accomack, Northampton, and Norfolk all have poverty rates in excess of $20 \%$ while Virginia Beach's poverty rate is less than $10 \%$. See Virginia Dep't of Health,

[^27]"Poverty" (accessed Dec. 14, 2021). Norfolk and the Eastern Shore also share similar challenges with respect to education, with high percentages of students receiving free and reduced-price school meals. See Virginia Public School Free/Reduced Lunch Participation Rate by County, ZipDataMaps (accessed Dec. 14, 2021). ${ }^{10}$ These communities would be best served by a representative in the Senate who can focus on their shared challenges, in particular on advocating for measures that will help bring residents out of poverty.

The historical connections between the Eastern Shore and Norfolk further support joining those communities rather than splitting them. For example, in the late $19^{\text {th }}$ century, Cape Charles, Northampton County's largest town, was "planned as a hub for traffic flowing via steamboat and barge to and from Norfolk." W. Thomas, B.M. Barnes, T. Szuba, The Countryside Transformed: The Eastern Shore of Virginia, the Pennsylvania Railroad, and the Creation of a Modern Landscape, Southern Spaces (July 31, 2007). ${ }^{11}$ Before the service was shut down, the Eastern Shore was connected to Norfolk by twice-daily ferry trips carrying "mail, freight, cars, and passengers." Clarence Lee Beebe, A History of the Chesapeake Bay Ferries to Virginia's Eastern Shore Prior to the Civil War (August 1954). ${ }^{12}$

For all these reasons, for the last 20 years, the Eastern Shore has been drawn with Norfolk in Virginia's Senate maps by caucuses controlled by both Democrats and Republicans, and we urge the Court to continue that practice today.

Finally, with this amendment District 20 would include the entirety of the Special Master's proposed House District 94 without changes, advancing the Special Masters' interest in "nesting" state legislative districts. Special Masters Memo at 9.

## D. Virginia Beach's Suburban Community of Interest Should be Preserved

The suburban portion of Virginia Beach is a community of interest that should be preserved in the Senate map. Our amended District 21 encompasses the entirely of Virginia Beach's more densely populated suburban zone. See Virginia Beach Comprehensive Plan, Planning Area 1-1 (Nov. 20, 2018). ${ }^{13}$ This is superior to the Special Masters' configuration, which splits the suburban zone, pairing the northern part with the rural Eastern Shore and the southern part of the suburban zone with the rural and undeveloped parts of Virginia Beach and southern Chesapeake.

In order to equalize population, our amended District 19 picks up the majority of the City of Suffolk, other than the Route 17 Corridor. This amendment preserves a community of

[^28]interest, as Suffolk is largely rural, and therefore a good match for District 19. See City of Suffolk 2026 Comprehensive Plan at Figure 3-1 (2018 ed.). ${ }^{14}$

## II. Greater Richmond

We commend the Special Masters for creating an additional minority opportunity district in the greater Richmond area. As we explain below, it was demonstrated during the Redistricting Commission proceedings that the Voting Rights Act of 1965 ("VRA") requires the creation of such a district. We respectfully urge the Court to recognize that the VRA requires the drawing in this region of an additional district in which African Americans have the opportunity to elect their candidate of choice, which the Special Masters have already done. ${ }^{15}$ And we suggest only modest amendments to the Special Masters' draft districts, namely minor adjustments to the border between Districts 14 and 16 to better reflect communities of interest, as shown in Figure 2 below.

Figure 2. Proposed Amendments to Greater Richmond Districts

## A. The Voting Rights Act of 1965 Requires the Creation of an Additional Minority Opportunity District in the Greater Richmond area

We commend the Special Masters for drawing an additional district in greater Richmond that will allow the region's African American citizens the opportunity to elect a candidate of their choice ("minority opportunity district"), increasing the number of minority opportunity

[^29]districts in this area from two to three. We write to emphasize that this feature of the Special Masters' draft map is in fact required by federal law.

The Supreme Court's landmark opinion, Thornburg v. Gingles, sets out the criteria that, if met, require the drawing of a district in which a minority population has the opportunity to elect a candidate of that population's choice. 478 U.S. 30 (1986). In particular, Section 2 of the VRA requires the drawing of a minority opportunity district " [1] where the minority group is sufficiently large and geographically compact to constitute a majority in a single-member district and [2] is politically cohesive, and [3] where the majority votes sufficiently as a bloc to enable it ... to defeat the minority's preferred candidate." Personhuballah v. Alcorn, 155 F. Supp. 3d 552, 565 (E.D. Va. 2016) (citing VRA and Gingles, 478 U.S. at 50-51).

Those criteria are met here. The Redistricting Commission received as part of public submissions a map demonstrating that greater Richmond's African American population is "sufficiently large and geographically compact to constitute a majority" in an additional singlemember district. Personhuballah, 155 F. Supp. 3d at 565 . We incorporate that map by reference here. Record of the Virginia Redistricting Commission (accessed Dec. 14, 2021). ${ }^{16}$ This evidence satisfies the first Gingles criterion. See, e.g., Wright v. Sumter Cty. Bd. of Elections \& Registration, 979 F.3d 1282, 1304 (11th Cir. 2020) ("The undisputed evidence presented showed that Sumter County's black residents could form a majority in at least one additional, singlemember district.").

The second and third Gingles criteria are also met because there is at least some measure of "racially polarized voting" within the Senate districts surrounding Richmond. See, e.g., Alabama State Conf. of Nat'l Ass'n for Advancement of Colored People v. Alabama, 2020 WL 583803, at *26 (M.D. Ala. Feb. 5, 2020) ("Racial bloc voting, also termed racially polarized voting, is the linchpin of a $\S 2$ vote dilution claim and the embodiment of the second and third Gingles preconditions."). The Redistricting Commission received evidence that racially polarized voting exists in parts of this region of the Commonwealth. M. Palmer \& B. Schneer, "Racially Polarized Voting Analysis for the Virginia Redistricting Commission," Record of the Virginia Redistricting Commission (Aug. 31, 2021) (accessed Dec. 14, 2021). ${ }^{17}$ The report on racially polarized voting submitted to the Commission found as much as a $20 \%$ gap between the voting of patterns of whites and racial minorities in parts of this region. Id. at 5.

Because the three factors are met, Section 2 of the VRA requires the drawing of an additional minority opportunity district in greater Richmond. We appreciate that the Special Masters' draft Senate map already satisfies this requirement, and we respectfully urge the Court to confirm their work in this regard.

[^30]
## B. The Boundary Between Districts 14 and 16 Should Be Amended to Better Reflect Communities of Interest

We propose adjusting the boundary between Districts 14 and 16 to keep the Hermitage High School attendance zone together in the north, and to keep whole the community of interest anchored on the University of Richmond in the south.

In the Special Masters' draft map, the Hermitage High School attendance zone is split between District 14 and 16. See Henrico School Locator, HCPS Official Website (accessed Dec. $14,2021) .{ }^{18}$ The southeastern portions of the attendance zone are in District 14, while the school itself and the attendance zone north of Parham Road are in District 16. Our amendment would move the southeastern portion of the attendance zone into District 16, with the exception of one precinct that is kept with District 14 in order to preserve the Chamberlayne community of interest. See "Chamberlayne," UVA Data, Map of Virginia Census Designated Places (accessed Dec. 14, 2017). ${ }^{19}$ Chamberlayne has been recognized by the federal government as a "closely settled, unincorporated community[y] that [is] locally recognized and identified by name." "Census Designated Places (CDPs) for the 2020 Census-Final Criteria," 83 Fed. Reg 56290 (Nov. 13, 2018). Keeping this attendance area is important, as in suburban environments, high schools are often the primary organizing and rallying point for community activity and a center of community organization, and significant research has validated that unified community schools build unified communities. See generally S. Bingler, et al., "Schools as Centers of Community," National Clearinghouse for Educational Facilities (2003). ${ }^{20}$ Hermitage High School in particular plays a central cultural role as one of the oldest high schools in greater Richmond, dating to 1936 when Virginia began to modernize its education infrastructure during the New Deal. "Hermitage High School," Wikipedia (accessed Dec. 14, 2021). ${ }^{21}$

Our adjustments to the border on the northern bank of the James River are designed to preserve the community of interest centered on the University of Richmond. Located on the border between Henrico and Richmond, the University is an economic and cultural hub for Virginians residing in both localities. For instance, the University of Richmond has undertaken detailed historical studies of the land to its west-the former Westham Planation-reflecting the deep ties that connect the University to that part of Henrico, forming a single community of interest. See L. Lee \& S. Driskell, "Knowledge of This Cannot Be Hidden: A Report on the Westham Burying Ground at the University of Richmond" at 8 (Dec. 2019). ${ }^{22}$ And the connections between the University and the Westham neighborhood directly north of it are well established. See, e.g., Westham Garden Club ("The Westham Garden Club was established on May 25,1943 , to preserve and enhance the natural beauty of Westham, a neighborhood adjacent to the University of Richmond and nestled in mature woodlands a short distance from the historic James River."). ${ }^{23}$ In this letter, the Senate Democratic Caucus is also requesting similar

[^31]changes that seek to consolidate communities of interest around Virginia's major universities in Blacksburg (Virginia Tech; Senate District 4) and Fairfax (George Mason; Senate District 37). The Special Masters appear to have recognized the significance of university communities by consolidating legislative districts around other major Virginia university communities such as the University of Virginia (Senate District 11; House District 54), The College of William and Mary (Senate District 24; House District 71), James Madison University (Senate District 2; House District 34), Radford University (Senate District 5, House District 42), Virginia Commonwealth University (Senate District 4; House District 78), Old Dominion University (Senate District 21; House District 92), and Washington \& Lee University (Senate District 3, House District 37).

## III. West Central Region

We appreciate the Special Masters' "attempt[] to place Roanoke, Salem and Blacksburg in the same district, to reflect what some have reported as a community of interest." Special Masters Memo at 21. In particular, there is a strong community of interest anchored on Roanoke/Salem at the eastern end and the Blacksburg suburbs on the western end. While the Special Masters reported that they were unable to preserve this community in a single Senate district "given equal population constraints," id., it is in fact feasible to do so by moving the Town of Blacksburg into District 4. As shown in Figure 4 below, our proposed amendments to Senate Districts 4, 5, and 7 preserve this community of interest while staying within equal population constraints. Our amendments also improve the compactness of these districts.

Figure 3. Proposed Amendments to West Central Virginia Districts

The single community of interest formed by the union of Roanoke/Salem and Blacksburg is long established and well recognized. The two communities are joined by I-81, and many residents commute between them each day. The region's airport recognizes the community of interest in its name: Roanoke-Blacksburg Regional Airport. See FlyROA.com (accessed Dec. 14, 2021). Virginia Tech has campuses in both Roanoke and Blacksburg, which are linked by Smart Way Express, a dedicated bus service run by Valley Metro, free for Virginia Tech students and staff. See Blacksburg-Roanoke Smart Way Shuttle, Virginia Tech Website (accessed Dec.

14, 2021). ${ }^{24}$ Virginia Tech's facilities in Roanoke include the Fralin Biomedical Research Institute at Virginia Tech, a Carilion partnership. And Virginia's 2021 state budget provided for $\$ 83.5$ million to extend intercity rail service from Roanoke to Montgomery County, where it will be used by many Virginia Tech students and staff. See E. Jones, "NRV to get Amtrak service; Roanoke to get 2nd daily train," WFIR News Talk Radio (May 5, 2021). ${ }^{25}$ In order to equalize population in our proposed configuration, Christiansburg, a town with far fewer connections to Virginia Tech than Roanoke, was moved into District 5.

Additionally, many of the region's citizens testified eloquently before the Redistricting Commission as to the web of connections that bind together these communities. See, e.g., Ex. Public Comment West Central Region at 24, Records of the Virginia Redistricting Commission (accessed Dec. 14, 2021), ${ }^{26}$ Testimony of Austin Pryor ("I am a resident of Roanoke City and work for Virginia Tech and commute almost daily to Blacksburg down in the New River Valley. I find great connection between the two areas of the Roanoke Valley and New River Valley ... These interest would be best represented by one State Senator to jointly represent both communities."); id. at 25, Testimony of James. B. McCloskey ("The Roanoke and New River Valleys shar[e] multiple shared resources and values. In addition to the colleges and universities, there [is] the huge medical community that blankets our region. Not just the Carilion and Lewis Gale health systems but the joint efforts of Radford University Carilion and Virginia Tech Carilion School of Medicine and Research Center the latter of which includes multi-disciplinary project active on both the Riverside and Blacksburg campuses. This proposed change also consolidates the entire Virginia Tech Community into one senate district similar to other universities as described above. And, don't forget the Roanoke-Blacksburg Regional Airport!").

Our proposed amendments in this region have the added benefit of eliminating the part of the Special Masters' draft District 7 that crosses the Blue Ridge. The Special Masters were correct to identify the Blue Ridge Mountains as "a natural dividing line for communities of interest." Special Masters Memo at 12. But in their draft Senate map, District 7 crosses the Blue Ridge by traversing the border from Carroll and Grayson Counties and splitting Wythe County. See "Wythe County," Geology Mineral Resources Webmap, Virginia Energy (accessed Dec. 14, 2021). ${ }^{27}$ Our proposed amendments eliminate the split of Wythe County and preserve the Blue Ridge Mountains as a dividing line, crossing them only at the Roanoke River Valley, one of the range's few "easy crossings." Special Masters Memo at 12.

## IV. Loudoun and Fauquier Counties

Districts 28,31 , and 32 should be modified to better reflect the region's communities of interest. As shown in Figure 4 below, we have adjusted the boundary between Districts 31 and 32 in two places to keep HOAs and school attendance zones together and to better reflect the divergent political interests of the eastern and western portions of Loudoun County. And we have adjusted the boundary between Districts 31 and 28 to keep Warrenton together with the

[^32]area directly to its south and to divide Fauquier County on a more intuitive line than the split suggested by the Special Masters.

Figure 4. Proposed Amendments to Loudoun and Fauquier County Districts

The first amendment to the north is aimed at preserving the Belmont Greene community of interest in a single district (District 31). Belmont Greene is a fast-growing and tightknit community of homeowners, anchored on Belmont Country Club to the north and walking distance to Stone Bridge High School to the south. It is part of the Stonebridge High School attendance zone. See Stone Bridge High School 2021-2022 Attendance Zone. ${ }^{28}$ It is also a Census Designated Place, meaning it is a "closely settled, unincorporated community[y] that [is] locally recognized and identified by name." "Census Designated Places (CDPs) for the 2020 Census-Final Criteria," 83 Fed. Reg 56290 (Nov. 13, 2018); see also "Belmont," UVA Data, Map of Virginia Census Designated Places (accessed Dec. 14, 2021). ${ }^{29}$

The Special Masters' draft Senate map divides this community in two: the bulk of the homes are in District 31, with Stonebridge High School, the Belmont Greene Community Pool, and the rest of the community in District 32. Our proposed amendment would keep Belmont Greene together in District 31, and generally better preserve the Stone Bridge High School attendance zone in a single district. Id.

Moving south, our second amendment is aimed at preserving the Brambleton community of interest by keeping it entirely within District 32. Numerous public comments submitted to the Court have requested this change. See, e.g., Comment of Ravi Balam, Interactive Proposed Map (accessed Dec. 14, 2021) ("Brambleton should not be divided. It makes most sense for all of it to be in 32 nd as it is most like its northern, southern and eastern neighbors like Ashburn, Sterling and S. Riding."). ${ }^{30}$

[^33]This amendment would better reflect the east-west division of Loudoun County, with eastern Loudoun being more suburban and western Loudoun being more rural. See Loudoun County Comprehensive Plan at 170 (2019). ${ }^{31}$ This rural-suburban division represents more than just a change in zoning policy-the two areas of the county have many divergent political interests. See, e.g., T. Baratko, "Chair Randall says people in eastern Loudon don't understand the west," Loudoun Times (Oct. 19, 2016) ${ }^{32}$; R. Nelson, "A Tale of Two Counties," Virginia Living (Feb 2017). ${ }^{33}$ In the Special Masters' draft map, District 31 is primary rural, except for where it crosses Northstar Boulevard, the dividing line in Loudoun's comprehensive plan between rural and suburban areas of the County. See Comprehensive Plan at 170. Our amendment would move the suburban precinct out of rural District 31 and unify it with District 32 , which shares its suburban character.

Our final proposed amendment in this region joins the area of Fauquier County south of the town of Warrenton with Warrenton proper in District 28. In addition to keeping Warrenton together with its immediate surroundings, this amendment uses Route 211 as the boundary of the jurisdiction split of Fauquier County. This "travel artery," linking Warrenton and New Market, is a more intuitive way to split Fauquier than the Special Masters' configuration, which followed Route 15 south and then Route 621 back north. See Special Master Memo at 7.

## V. Greater Fredericksburg

District 27 should be modified, as shown in Figure 5 below, so that it picks up the fast urbanizing areas around I-95 south of the City of Fredericksburg and gives up the rural areas in the southwest of the district around Chancellor.

[^34]Figure 5. Proposed Amendments to Greater Fredericksburg Districts

The area south of Fredericksburg along I-95 lies between I-95, U.S. 17, and a VRE Station, and has been zoned as "mixed use," meaning that it is a "compact, walkable community with a more dense development pattern." Spotsylvania Comprehensive Plan at 6 (mixed used definition), 19-20 (map) (amended 2018). ${ }^{34}$ This part of Spotsylvania, connected to the city by U.S. 17, is also similar to Fredericksburg in that its development is served and anchored by a VRE station that opened in November, 2015. K. Weir, "VRE to expand into Spotsylvania County," Washington Examiner (July 4, 2012). ${ }^{35}$ Before the opening of that station, 1,000 residents traveled from this area of Spotsylvania to Fredericksburg every day. Id. This station attracts a similar type of employment and development pattern as Fredericksburg, as it serves "commuters who [formerly] travel[ed] to Fredericksburg to catch the Washington-bound train." L. Lazo, "VRE Spotsylvania station to open Monday," Washington Post (Nov. 15, 2015) ${ }^{36}$

This section of Spotsylvania County is therefore more similar in character and in political interests to the City of Fredericksburg, and forms a community of interest, often referred to as "Greater Fredericksburg." But in the Special Masters' draft map, Districts 25 and 27 divide up this community of interest, with the urbanizing portion of Spotsylvania County included in District 25, a predominantly rural district. The parts of District 25 making up the southern portion of Greater Fredericksburg should instead be drawn into District 27 and included with Fredericksburg proper.

To offset the increase in population, District 27 should give up the sections of Spotsylvania County around Chancellor and the Chancellorsville Battlefield. These areas have been zoned "low density residential," "rural residential," and "agricultural and forestall," Spotsylvania Comprehensive Plan, supra, at 19, and are likely to remain so given the presence of the Chancellorsville National Battlefield and large sections of private land inside the battlefield

[^35]with development restrictions. They thus form a community of interest with the other rural areas included in District 25. The entire proposed District 25 has no VRE Stations, as VRE service ends at the Spotsylvania Station.

We note that many Virginians testified in favor of a district substantially similar to our amended District 27. See, e.g., Public Comment Northern Region at 39, Records of the Redistricting Commission (accessed Dec. 14, 2021) ${ }^{37}$; id. 43; id. at 58; id. at 60 ("I share similar concerns with the residents of the more developed Fredericksburg area, rather than those in rural Spotsylvania."); id. at 78.

## VI. Virginia Peninsula

On the Virginia Peninsula, District 23 should be redrawn to include the entirety of both Poquoson and Hampton, giving up portions of Newport News to District 24 to equalize population and reduce the split of that locality.

Figure 6. Proposed Amendments to Virginia Peninsula Districts

Drawing District 23 in this way would preserve the community of interest that exists between Hampton and Poquoson. This community is demonstrated by a shared geography, as Poquoson and Hampton are the Peninsula's two Atlantic facing localities. The two localities also sit on opposite banks of the Back River, an estuarine inlet of the Chesapeake Bay. The U.S. District Court for the Eastern District of Virginia recognized and validated this community of interest in 2019 by adopting a special master-recommended remedial House of Delegates district consolidating parts of Hampton and Poquoson together into one district. See Bethune-Hill v. Virginia State Bd. of Elections, 368 F. Supp. 3d 872, 889 (E.D. Va. 2019) (adopting Remedial Plan, Dkt. 355-3).

[^36]There are also economic similarities between Hampton and Poquoson. Because of their shared distinctive geography, for example, the two localities "developed as hubs for waterman fishing and shellfishing in the Atlantic Ocean, Chesapeake Bay, and tidal rivers," while other regional localities developed into a commercial waterfronts. Virginia Working Waterfront Master Plan at 71 (Sept. 2016). ${ }^{38}$ Today, in both localities, recreational boating plays a large economic role. See M. Pizer, "Study values annual impact of Hampton boaters at \$55M," Virginia Institute of Marine Science (Mar. 12, 2009); "Kayaking \& Boating in Poquoson," Poquoson Official Website (accessed Dec. 14, 2021).

Redrawing Districts 23 and 24 as we suggest would keep this community of interest together, and would allow more of Newport News to be in the same district, vindicating the interest in "minimizing splits in counties and cities." Special Masters Memo at 5. It would also allow for the District 23 to contain the entirely of proposed House District 86, advancing the Special Masters' interest in "nesting." Id. at 9 (Dec. 7, 2021). And, with this amendment, the Newport News/Williamsburg Airport would be, as its name suggests, in the same district as both Newport News and Williamsburg.

## VII. Fairfax County

Consistent with other amendments we have proposed, Districts 36 and 37 should be amended to preserve George Mason University as a community of interest, as shown in Figure 7 below and as advocated for other university communities above.

Figure 7. Proposed Amendment to Fairfax County

These minor change puts the entirety of George Mason University and its surrounding neighborhoods into District 37. To equalize population, the commercial area around Fair Oaks has been moved into District 36, which has the added benefit of keeping more of that Census

[^37]Designated Place together. See "Fair Oaks," UVA Data, Map of Virginia Census Designated Places (accessed Dec. 14, 2021); ${ }^{39}$ see also "Census Designated Places (CDPs) for the 2020 Census-Final Criteria," 83 Fed. Reg 56290 (Nov. 13, 2018) (a Census Designated Place is "closely settled, unincorporated community[y] that [is] locally recognized and identified by name.").

In closing, the Senate Democratic Caucus once again expresses our appreciation for the diligent efforts of the Special Masters to this point, the Court's adoption of a robust public comment process with public hearings, and the prompt publishing and indexing of public comments. Generally speaking, the Special Masters' draft Senate map presents compact districts that do a reasonable job reflecting the will of Virginia's voters. Inevitably, however, the Special Masters were not aware of certain local conditions unique to the Commonwealth, such as the importance of avoiding the pairing of two senior African American senators and civil rights icons, Senators Lucas and Spruill, in the same district. Nor were the Special Masters aware of every particular of Virginia's cultural geography. The Senate Democratic Caucus accordingly has proposed a modest number of targeted changes to ensure that the Senate map tracks Virginia's communities of interest to the greatest extent possible while still respecting the many other important factors that the Special Masters considered. We thank the Special Masters and the Court for giving due consideration to our comments and proposed amendments, and to the input of the public, following the release of the Special Masters' draft maps.

> Sincerely,
Rectand I Haslaw

Senate Majority Leader Richard L. Saslaw

CC: Speaker of the House of Delegates Eileen R. Filler-Corn
Senate Minority Leader Thomas K. Norment House of Delegates Minority Leader C. Todd Gilbert

Your honors,

My husband and I have lived in James City County, 69th district, for fifty years. We know that despite being two different political entities, the city of Williamsburg and James City county are in many, if not most, ways a single community. The unusual joint school division, WJCC, and my home address are clear evidence of that community. We are best served by keeping the districts as much intact as is currently the case.

Clearly, Gloucester does not belong in the 69th, having its own clear identity as one of the several small communities identified by being on the opposite side of the river and having its own customs, culture, and institutions.

Please take this letter into consideration as you redistrict so that our representatives can be just that, ie. people who know our community and can communicate its needs to the General Assembly.

Thank you for your work on behalf of the Commonwealth and its residents.
Sincerely,
Corinne W. Garland

 LINKS OR DOWNLOADING ANY ATTACHMENTSDear sirs,
I understand you are about to make decisions about changing the district lines here in Northern Virginia. You will violate a number of directives if you do this.

We have lived near Mount Vernon for a number of years and have a grave concern having heard that this area will be affected and drastically changed if your proceed with what I have heard your plan is. If this is put through it will effectively do away with the area we all have successfully and happily lived inmany many years. It will not be taken lightly. The community will
No longer exist. Is this what you are trying to accomplish?
The division of our community will be experienced in a number of ways. It will definitely have a most negative impact and will not bring forth good.

It is my hope that you will truly hear and respond appropriately by NOT CHANGING the district boundaries! Most sincerely,
(Mrs) Sue Casner

Albemarle County should NOT be divided between two districts as indicated in the current proposal. Albemarle County/ Charlottesville City function as an entity-dividing that entity in half along a division as random as an interstate highway is illogical, if the purpose of the new map is to keep communities of interest together. We are currently divided up into separate districts for the purposes of gerrymandering-the new maps are supposed to rectify that.

Greetings. I write to oppose this current map outline which completely removes Norfolk from CD 2. As a lifelong resident of Norfolk from a military family and veteran, I do not believe splitting Norfolk and Virginia Beach ensures both communities are represented in a way that ensures our military and veterans maintain advocacy in Congress. Further, Norfolk and Virginia Beach are communities with mutual interests which become diluted by not having a member of Congress speaking for our communities with one voice. The communities of Suffolk and Isle of Wight have little in common with the cities of Virginia Beach and Norfolk. However, Norfolk and Virginia Beach have mutual interests of great importance. As previously stated, the military is deeply imbedded in both our communities. Our communities' economic interests are joined together with jobs, services, and workforces all entwined. Norfolk and Virginia Beach share the same shoreline of the Chesapeake Bay. In part, the Chesapeake Bay as an environmental resource is why the Eastern Shore, Virginia Beach, and Norfolk are communities who should have a single voice representing those concerns instead of any dilution of advocacy. As the map has been created, all of Norfolk would fall into the boundaries of 3rd Congressional District. While Hampton and Newport News are members of the Hampton Roads community, they make up most of the district and needs specific to Norfolk would be severely diluted. Previously, Norfolk was served by two Congressional representatives. It made sense since part of our community needs are closely aligned with those of parts of Virginia Beach and part of our community needs are akin to the needs in Hampton and Newport News. Norfolk has been well served by that model and I encourage you to seek to ensure we get the representation which makes sense to all of Norfolk and the region generally.

Separating Blacksburg from Radford and Christiansburg violates the common interest factor in redistricting. Please reconsider.

Ms, Abernathy,
Per our previous email,here is the transcript of my testimony today. Thanks for all of your help. Merry Christmas and good health to you and your staff.

To: The Supreme Court of Virginia
From: Sarah E. Sussan, Midlothian/Chesterfield
RE: Redistricting Maps released to the public for input
Format: Transcript of Testimony given before the Court Weds. December 15.
Good afternoon, Justices, Masters Grofman and Trende, Clerk of the Court, fellow residents of the Commonwealth. Thank you for this opportunity to address the Court. My name is Sarah Sussan. I reside in Midlothian in Chesterfield County.

To me, the first step in a successful plan is a strong foundation. In the case of a redistricting map that strong foundation should be built around existing county and city entities where residents are bound by government, and communities of interest where people are joined by social, economic and cultural interests.

On page 5 of their memo, the Masters say they began by, among other things 'MINIMIZING SPLITS IN COUNTIES AND CITIES," yet across the Commonwealth counties and cities have been ripped apart, not just tweaked to accommodate changes in our population. Specifically impacting my area, Chesterfield County is split East to West, adding
Chesterfield's western split to the vast rural areas of the $5^{\text {th }}$ district. Not only does this dilute the vote of our suburban population, it also wrests Chesterfield County away from its Community of Interest to the north.

Since we moved here 32 years ago the Huguenot Bridge has been rebuilt, and the Willey Bridge and Route 288 arteries have been added, connecting Chesterfield County northward to Henrico. The James River, while a significant natural feature, is not a boundary between these two areas but rather a connector, between communities that share interests and concerns. Our economic, educational, and cultural bonds have been strengthened by the REGIONAL COOPERATION in this RICHMOND METROPOLITAN AREA.

We share the same concerns about clean water and the environment, about urban sprawl and its impact on our economy, and about affordable housing for our burgeoning populations. Our hospitals and medical care are interdependent. We share the Governors schools, sports facilities and responsibility for our infrastructure. WE need to be able to elect representatives who will address the concerns of our suburban county as a whole, and our community of interest. The residents of the more rural or agricultural areas deserve to have their significant needs and concerns addressed by representatives THEY elect who can concentrate on issues directly impacting them.

To deny that Chesterfield and Henrico are a COMMUNITY OF INTEREST is folly; to sever Chesterfield County from Henrico in Congressional representation and link it with the more
rural southern and western areas is to deny BOTH COMMUNITIES the representation they deserve, and could get, if a new, fair map were drawn. I urge the Court to instruct the Masters to go back to the drawing board, to pay attention to the counties, cities and communities of interest and to develop a map that does not pack districts thereby muting minority voices, that does not dilute suburban votes, and does not totally BLOW UP a map that could have been tweaked! Thank you for listening.

District lines should be drawn to create boundaries that are "compact and contiguous" establishing common bonds within each district for the most effective representation of its citizens. But the proposed map separating the City of Williamsburg from Lower James City County would break longstanding associations of these areas in terms of history, transportation, education, business and communications. These two neighborhoods should NOT be separated in your final map. They should both be a part of the Hampton Roads delegation and be planted together in the new 69th District.

Thanks for your consideration,
Mike Hatfield
James City County

I am a resident of Goochland County.
Thank you for being open to the views of the public.
I'm sure this is not an easy task but I am concerned that my community will be split according to the draft map presented.
Goochland County, for us, has been a part of the greater Richmond metro area. That is one of the reasons we love living in Goochland Co. The new CD map places us with communities that are not a part of the Richmond metro area. The Northern Neck is rather remote, with very different needs than our suburban/metro area. We commute via Route 288 to friends in Powhatan \& Chesterfield frequently. We all share the same economic \& social life of Richmond.
Is there a way to keep us united?
Thank you,
Maureen Kennedy

To Whom It May Concern:
I am very concerned about the proposed redistricting of Stafford and Fredericksburg.
The proposed New 7th District ignores the long-standing relationships that Stafford holds with the counties surrounding it in the Rappahannock Region. Almost all of Stafford's regional interests and affiliations are with communities to the east, south, or west rather than to the north. Stafford County should not be attached to Northern Virginia simply because l-95 runs through it. Stafford is more than just a couple of exits off the highway. Please reflect our real world affiliations in the maps.

Sincerely,
Lynne Gassner

Hello and good afternoon:

My name is Patricia Heidelmark and I live at 1216 Providence Knoll Drive in North Chesterfield. I am a retired public school administrator and currently serve as the HOA president in a community of 175 homeowners off of Reams Rd., which is snuggled between Courthouse Rd and Providence Rd. in North Chesterfield. I would say we are a typical suburban neighborhood, developed in 2005 and composed of villas, cottages and townhomes.

I am here today to address your draft map of the Congressional Districts, which has gutted my District, the 7th Congressional District and moved it to a completely new part of the state. The 7th District, or as we call it, the heart of Virginia, has literally disappeared! Why demolish the 7th as we now know it? What were the issues....problems that required, as they say, for you to "throw the baby out with the bath water"? As a constituent, I feel like we were just thrown one way or another haphazardly to meet some magic number close to 784,000 with NO thought as to who those 784,000 folks are and what their needs are. We as constituents need to understand, as none of this makes any sense! All we see is that you have decimated our "communities of interest".

It is interesting that when one types in my address and zip code when ordering on-line (23236) it comes up as Richmond. I bring this up because North Chesterfield is a suburb of the city of Richmond. As is Henrico, a suburb of the city of Richmond. I believe they are known as Metro Richmond and we have so much in common. The 288
corridor links us. We are your suburban voters, who have different needs than city and rural voters.

Your map seems to ignore such "communities of interest" and instead splits Metro Richmond (Chesterfield and Henrico) into 3 districts,.,,splitting up the suburbs. By doing such you have diluted our voters' voices and power, especially those individuals of color. Are you trying to silence the suburban voters?

Your memo stated you were going to try to keep "communities of interest" together. You have not! What happened?

In the proposed map, the current 7th district is cut up into four new districts. Why? For instance, some folks who reside in Goochland are now in the same District as the Northern Neck? Is that their communities of interest? NO!

In my case, my communities of interest are NOT Emporia or Petersburg. Do I ever travel to those cities for work, shopping, cultural events or recreation? NO! My communities of interest, living in North Chesterfield, remain Henrico, Short Pump, the city of Richmond, Carytown, Midlothian and Chesterfield. The social circle with whom I volunteer and work with is now in the 5th district. I am now in the 4th.

Central Virginia has had its own Congressional District for decades for a reason. It has its own identity, its own needs, its own strengths. We are a suburban community who will now be thrown into
districts that are largely rural and our voices will be lost. You are proposing to take away our identity.....the heart of Virginia. We deserve to have someone representing us who understands our needs. Please keep North Chesterfield and Henrico, as communities of interest together. Please re-examine your decision as to why it was necessary for the 7th to be cut up and thrown away.

One last comment and observation:

I find it interesting that the male incumbents seem to have been protected in this proposed map, while all female incumbents were negatively affected by this process. An observation that is unsettling for many reasons. I encourage you to re-examine such glaring mis-steps, so as to not be misconstrued as misogynistic.

Thank you for the opportunity to comment.

Thanks again for the opportunity to speak. Please find the copy of my remarks below.
Regards,
Vladyslav Valeriyovich Ovchynnikov
Sterling, VA

Honorable Justices,

Thank you for the opportunity to comment. My name is Vladyslav Ovchynnikov, I live in Loudoun County, have lived here for 20 years, and I'm serving on the county's Transit Advisory Board. I'm a first generation American, and I feel very at home here. Immigrants like me constitute almost a quarter of the population of the county. It is very diverse: $20 \%$ Asian, 14\% Latino, 8\% Black.

We are a part of the Northern Virginia region. Contrary to the masters' memo, the main direction of commute is West to East, towards Fairfax and District of Columbia. Many of my friends and coworkers live in Fairfax, Prince William Counties, or Arlington. I've commuted to Fairfax for years. We are in Prince William at least monthly. My dentist is in Reston. Our Russian grocery store is in Herndon. Our swimming league spans Loudoun, Prince William, and Fairfax Counties.

The way the map is drawn separates us from the rest of Northern Virginia, and joins us with counties all the way to Central Virginia. It's wrong. There is no community of interest that encompasses the district as drawn. I'm not proud of my ignorance, and I'm working to rectify it - but I couldn't name counties in the proposed district when I first saw the map. I have never been to Rappahanock, Madison, Greene or Orange Counties. I've only been to Albemarle once - as a tourist. I struggle to understand what logic puts us in one district. I don't know or understand the needs and concerns of people in these counties, and I doubt that they know or understand my needs and concerns. If we are represented by a single Congressperson, she or he will struggle to balance our interests, and one part will always feel unheard and ignored.

Also, why is Albemarle split and separated from Charlottesville? I'm certain they would
much rather stay a part of their region than be joined with Northern Virginia.
In closing, I strongly oppose the shape of the district as proposed. It spans regions, splits communities of interest, it dilutes the power of Asian and Latino vote. It dilutes the power of foreign-born voters. Loudoun county should be in a district that is entirely or mostly in Northern Virginia.

As a resident of the 22308 zip code in the Alexandria/Mount Vernon portion of Fairfax County, I urge you to reconsider the way the proposed redistricting maps have been drawn for the Mount Vernon area. This area is a long-standing area of interest whose communities are split in illogical ways on the proposed maps, dividing communities, school pyramids, and supervisory districts that share infrastructure and institutions. Mount Vernon is not named as a community of interest and stands to suffer substantially from redrawn maps that do not take into account our shared interests and needs. Please take the time to become informed about this community before making decisions that can work to our detriment.

Please heed the input you are receiving from us and make adjustments to preserve the integrity of this vibrant community.

Sincerely,
Lisa Richard

Ladies and Gentlemen:
It is my view that someone without any practical understanding of the geography or neighborhoods in my area placed my home in District 34. While my neighbor LITERALLY across the street from my home was place in District 35. If you look at my home (Carrleigh Parkway) on the map you can simply see a contrived carved out area. I request you put my home in the District that is most commonly aligned with Burke and West Springfield - NOT Mt. Vernon.

Here is a link to the map. Go to "District 34"

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Good afternoon Clerk and Special Masters,

Please accept this written comment from the Town of Scottsville, town staff writing on behalf of Mayor Ronald Smith and Vice Mayor R. Daniel Gritsko, with our apologies for delay and regret that the public hearing on Friday is fully booked. I am Matthew Lawless, town administrator.

Our comment concerns Congressional Districts 1 and 5, Senate Districts 10 and 11, and House Districts 55 and 56. The mapping and demographic concern is the same: that the Town of Scottsville not be divided, but rather preserved in one district as a community of interest.

The town limits are about 1.5 square miles, with a 2020 Census population of 524. Originally Monacan land and first called Scott's Landing by settlers, our town served as the first courthouse and seat of Albemarle County. The Town was chartered in 1818 and grew with the commerce along the James River. In 1830, a boundary adjustment took in 32 acres of Fluvanna County, but Fluvanna did not cede the land to Albemarle. Scottsville remains one of several Virginia towns with territory in multiple counties.

In the present district maps, the entire town is in CD-5 and HD-58, but the Fluvanna County line splits Senate districts.

The Fluvanna County portion of the town has only about 15 houses and perhaps 30 residents, negligible for the math of population deviation. The community of interest principle is most important here.

We claim a small point of privilege, that towns should be preserved in the same district and not split. The Special Masters' memo to the Court highlights one of the guiding principles of the work, that cities and counties ought not to be broken up by districts. The memo is silent on the subject of towns. A town is a community of interest, and we believe this interest justifies a small deviation of districts across the Albemarle/Fluvanna line.

In the proposed Congressional map, District 5 contains the larger part of Scottsville, and we urge the inclusion of the small Fluvanna portion into District 5, not District 1 as currently shown.

In the proposed Senate map, District 11 contains the larger part of Scottsville, and we urge the
inclusion of the small Fluvanna portion into District 11, not District 10 as currently shown.

In the proposed House map, District 55 contains the larger part of Scottsville, and we urge the inclusion of the small Fluvanna portion into District 55, not District 56 as currently shown.

We claim that the law supports maintaining the entire town in one district. Please consider assigning the small Fluvanna portion of Scottsville to the same district as the larger Albemarle portion.

Thank you for all of your diligent efforts on this special project.

Very respectfully,

Matt Lawless
Scottsville Town Administrator

Hello,
My name is Jackson Thomas, I live at 206 Nelson Avenue, Williamsburg, VA 23185, and I have comments on the proposed legislative districts for the state legislature, specifically house districts 69 and 71.

As a current and continuing resident of Williamsburg, this proposed map is directly opposed to the shared interests of Williamsburg and lower James City County. These two communities rely on each other for coordination among many government initiatives and agencies, and they share many of the same resources like Transportation and Health Care. Additionally, by splitting Williamsburg from Hampton Roads, the map takes a longstanding history of these two vital areas sharing the same district, and instead splits them apart to what will almost surely be negative repercussions across the communities. These two areas are far more alike than Williamsburg and the proposed addition of Gloucester. Therefore, I ask that Williamsburg be added back to the 69th district and that Gloucester be removed from the district.

Sincerely, Jackson Thomas

In the December 15 public hearing a number of those providing comments requested that lines be redrawn to ensure their elected representative could be reelected. I have followed Virginia's redistricting reform efforts for about 5 years, including virtual attendance at most of the proceedings of the Virginia Redistricting Commission. I have provided comments myself during this time.

One of the most potent arguments for an independent Redistricting Commission was to end the process of politicians choosing their voters by manipulating districts. Politicians are not entitled to "their" districts. They are not entitled to reelection by a minority of the electorate. Let them fight harder and fairer for the privilege of representing Virginians.

I ask that incumbency not be a consideration in creating maps, and that the requests to redraw maps for this purpose not be taken into account in any revisions the Court may undertake.

Thank you for the Court's efforts in this important matter,

Elaine Braverman

I live in the community called Mount Vernon Hills, just a mile from the Mount Vernon Estate. As you may know, there are Five Farms that are part of Historic Mount Vernon. My home is on the Muddy Hole Farm, and the street is called Vernon Avenue. Vernon Avenue is off of Maryland St. which joins Mount Vernon Highway (235) and Old Mount Vernon Road. The Mount Vernon High School also borders on Maryland Street. I have lived in the Mount Vernon area for over 35 years. It is with great pride that I can say I am from Mount Vernon. The properties on George Washington's Five Farms most definitely need to be together, we share educational institutions, shopping, parks, churches, recreation centers, etc. People on the Five Farms share none of these with other communities that are being contemplated to join with parts of Mount Vernon. I have much in common with my neighbors in Mount Vernon and no commonality with residents of other communities in Northern Virginia, such as Springfield. There was an attempt in the past to clarify our postal address by changing it from Alexandria to Mount Vernon. Please don't sever our historic community: one of the oldest if not the very oldest in Fairfax County. After all, we have historic roots to our first President dating back hundreds of years.

Please correct your inadvertent error by reuniting Mount Vernon.

\section*{Muriel-Theresa Pitney}

Clerk of Court
Supreme Court of Virginia
100 North Ninth Street, 5th Floor
Richmond, Virginia 23219-1315

\section*{Dear Madam Clerk:}

My name is Roy L. Perry-Bey, and I have been a resident of Virginia, for most of my life. During this time, I have served as a civil-right activist throughout Virginia, primarily with the Coalition for Equal Justice, Citizens of Hampton Roads March Against Poverty Campaign and the United Front for Justice. I have been on the front lines of issues like treatment of veterans, confederate statutes, housing discrimination, police brutality and voting rights throughout the Commonwealth.

I write to urge this Court to reject the voting mapssubmitted by the Special Masters because they sharply limit the number of majority-Black Senate and House Districts throughout Virginia. Since 2010, Virginia has had five majority-Black Senate Districts (out of forty) and ten majority-African American House Districts (out of ninety-eight). If approved, the Special Master's maps will reduce the number of Senate Districts to two, and the number of House Districts to five.

The harm to Virginia's African American communities that results from reducing majority-African American voting districts by more than half should be obvious. As those majority-minority Districts disappear, so too does the political power of Virginia's minority communities. And as someone who has devoted his life to ensuring equal justice for all, I must object to proposed maps that needlessly reduce these critical districts by greater-than fifty percent.

Virginia not only has a moral imperative to protect minority political power; it has a legal one as well. Section 2 of the Voting Rights Act prevents "a denial or abridgement of the right of any citizen of the United States to vote on account of race or color." 52 U.S.C. § 10301(a). Such a "denial or abridgment" occurs if "the
political processes leading to nomination or election in the State or political subdivision are not equally open to participation" by members of a protected class "in that its members have less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice." Id. § 10301(b).

Virginia's African American communities almost certainly satisfy the criteria necessary to trigger Section 2. They are "sufficiently large and geographically compact to constitute a majority" in several of the non-majorityminority districts. See Thornburg v. Gingles, 478 U.S. 30, 50 (1986). They are "politically cohesive." Id. at 51. And the "the white majorit[ies]" in these non-majority-minority districts "vote sufficiently as a bloc to enable" them "to defeat the minority’s preferred candidate." Id. Because this is the case, Virginia must include majority-minority districts.

In other words, there are great "reasons to believe" that more voting districts must have a greater percentage of minority population. See BethuneHill v. Va. State Bd. of Elections, 137 S. Ct. 788, 801-02 (2017). Compliance with the Voting Rights Act is a compelling interest. Id. at 801. To satisfy this compelling interest, the Court should reject the Special Master's proposed maps, thereby avoiding a likely Voting Rights Act violation.

Muriel-Theresa Pitney \\ Clerk of Court \\ Supreme Court of Virginia \\ 100 North Ninth Street, \(5^{\text {th }}\) Floor \\ Richmond, Virginia 23219-1315
}

Dear Madame Clerk:
My name is Ronald Taylor, and I am the current President of the Hampton Roads Black Caucus. I write on behalf of our membership to comment on the state legislative maps proposed by the Supreme Court's special masters on December 8, 2021.We believe that these maps, if adopted in their current form, would represent a step backwards for Black representation in the Commonwealth of Virginia, which has already declined in recent elections after previous rounds of court-ordered redistricting. In the interest of offering constructive criticism rather than empty complaints, we have included with this letter proposed maps that do a better job of meeting our representational goals (see attached).

First, some recent history might be in order. In the 2011 redistricting cycle, Virginia's Third Congressional District was drawn to include a Black voting-age population (BVAP) of \(56.3 \%\); after court-ordered redistricting in 2016, the Third District's BVAP was deliberately dropped to \(47.27 \%\) with the portions of the district containing the heavily Black cities of Richmond and Petersburg reallocated to the adjacent Fourth District (which increased to BVAP \(39.68 \%\), still well short of a majority). In other words, a congressional map that originally featured one Black-majority district after legislative redistricting became a map with zero Black-majority districts after the federal court intervened. Thankfully, this has not affected Virginia's Black representation in the U.S. Congress where Congressmen Bobby Scott and Donald McEachin still proudly serve. Nonetheless, we provide our map that shows it is eminently possible to have a majority black Congressional district in the Commonwealth. Representative Scott is 75 years old, and while we'd be really happy if he remained in Congress for many years to come, we know the reality is that someone other than Representative Scott may very well serve the people of that district during this coming decade. Without him seeking that seat, we have serious doubts about whether his district as configured would still elect a Black member.

Unfortunately, court-ordered redistricting had a more deleterious effect in the General Assembly. The General Assembly in 2011 adopted a redistricting plan featuring twelve Black majority House of Delegates districts, a portion that came remarkably close to matching the proportion of Virginia's population that is Black. After years of litigation, however, those twelve districts-all of which featured BVAPsover 50\%-were ordered redrawn by the same federal court that previously ordered a redo of the
congressional map. Under a plan developed by one of the same special masters this Court is using now, BVAP was deliberately lowered in each of the challenged districts-districts originally drawn with a BVAP high enough to preserve the ability of the Black communities in each to elect their favored representatives. What was publicized as an effort to help the Black community only made it harder to elect Black representatives.

At the time, "experts" reassured us districts didn't need a BVAP over \(50 \%\) to elect Black representatives. Any Black person who grew up in the American South could have told you that was a laughable claim then, but it is no laughing matter anymore. The 2019 redistricting plan designed by special master Dr. Bernard Grofman has had a predictable effect: Black delegates have lost elections in districts that were deliberately made less Black.

In the most recent state elections, four Black Members of the House of Delegates were defeated in their campaigns for reelection, three of them in districts that were redrawn in 2019. In this most recent election, four incumbent Black legislators, comprising nearly a quarter of the Black Caucus in the House, were defeated for reelection. Two of those legislators were in districts that the federal court specifically asserted would retain Black representatives, writing, "Based on the data in the record, we further conclude that black voters in Districts 63 and 75 will continue to have a reasonable opportunity to elect candidates of their choice." The Black legislators representing Districts 63 and 75 lost reelection in November. Is this what progress looks like?

It should be clear by now that the state of Black representation in Virginia in 2021 is not good, but the special masters' maps would make the problem even worse. Currently, only five State Senate districts are home to voting-age populations that are more than \(50 \%\) Black. Perhaps unsurprisingly, four of these five districts align almost perfectly with the four represented by Black Senators (District 16 is the only Black-majority district represented by a white Senator). The connection is clear for anyone willing to see it: Black candidates have a better chance of getting elected in Black-majority districts, thereby enabling them to better represent the interests of Black communities in the state legislature. The pathway to greater Black representation is through the creation of more Black-majority districts.

The special masters' proposed State Senate map, however, takes us backwards. It only has twoBlack-majority districts, Districts 13 and 23. That's right-two out of forty, a mere \(5 \%\), in a state that is nearly \(19 \%\) Black according to the 2020 Census. \({ }^{1}\) It is entirely possible that if the special masters' map is adopted by this Court, there would be no Black members left representing residents of this Commonwealth in the Virginia State Senate. Back when Section 5 of the Voting Rights Act was still enforced, a plan like this would have been illegal; now, it is merely disrespectful. We have fought so hard for a seat at the table, and this plan would callously show us the door.

The special masters' proposed House of Delegates map fares no better. It features only five Black-majority districts out of 100 , matching the proposed Senate map's embarrassing \(5 \%\). The congressional map might be the worst of all, preserving the current post-redistricting status quo of zero Black-majority districts. So, to reiterate, under the 2011 legislative maps, there existed twelve Blackmajority House of Delegates districts, five State Senate districts, and one Congressional district for a total of eighteen. After successive rounds of court-ordered redistricting and the special masters' newest

\footnotetext{
\({ }^{1}\) U.S. Census Bureau, Virginia Adds More Than 600,000 People Since 2010, (Aug. 25, 2021), https://www.census.gov/library/stories/state-by-state/virginia-population-change-between-censusdecade.html\#:~:text=Population\%20(up\%207.4\%25\%20to\%20331.4,or\%20More\%20Races\%2010.2\%25).
}
proposal, there would be five Black-majority House of Delegates districts, two State Senate districts, and zero congressional districts for a total of seven. From 18 districts with BVAPs sufficient to elect Black representatives to 7 in only five years!

Our maps actually move the ball forward in terms of Black representation. Our Senate map takes the number of Black-majority districts from four to five, none of which have a BVAP higher than \(53 \%\). Our House plan restores the same number of Black-majority districts, twelve, that we had after the 2011 redistricting cycle. Our plans demonstrate that it is possible to create up to seventeen Black-majority districts in the General Assembly, matching our previous peak. When better Black representation is possible, I don't know why we should have to settle for less.

The special masters apparently think that "opportunity districts," in which different minority group's aggregate to an outright majority of a district's voting population, are sufficient to protect Black representation. Their map does a pretty good job of creating such districts, but we know from history, both distant and recent, that the best way to protect Black representational gains is to create Blackmajority districts. The "opportunity district" experiment of the last decade has only resulted in backsliding. The current abysmal numbers in the General Assembly indicate we need to do more in our efforts to create districts where Black voters can elect people who will represent their interests, not less. The special masters' plans seem to see minority groups as interchangeable; we are not. Anyone who has paid the slightest attention to American politics knows that Black voters tend to vote more cohesively than Hispanics or Asians and often for different candidates, and yet these maps treat us as if we're all the same. There is sadly no guarantee that opportunity districts will result in the election of any Black representatives. This Court should revise the proposed plans to give Black voters representation commensurate with our voting strength.

To be clear, we are not asking the Court to create "safe" districts where Black voters constitute seventy or eighty percent of voters. We simply ask the Court to create more than five House of Delegates districts, more than two State Senate districts, and any congressional districts where Black voters constitute more than \(50 \%\) of the voting-age population (and ideally with BVAPs even higher than that, given the disappointing results of the most recent election indicate a bare majority is not always enough).We think a good target for the number of Black-majority districts would be 18 across all three maps, the highest number we had previously achieved in a state that has only grown more diverse in the years since.

Thank you for reviewing our proposed maps and taking our concerns seriously.

\author{
Sincerely,
}

\section*{Special Masters,}

Good evening. I live in the Stratford Landing Community and object to the decision to redistrict my community with the distant communities of Woodbridge and Springfield. These are urban communities, closely situated to I-95 with both small and large business interests. Mount Vernon is a quiet bedroom community with hardly any major businesses, industrialization, or heavy commerce. We are a quaint and diverse middle class community that will become voiceless if parceled with our southern neighbors.
Please reconsider your decision and keep us within the 34th Senate district.

Regards,

Amanda Hardgrave

I am against the redistricting proposal. The Fort Hunt and Stratford Landing communities and all in zip code 22308 need to stay together. I am against the proposal to split the Mt Vernon area, connecting the Mt Vernon estate with Quantico and Fredericksburg, and splitting school districts for Hayfield and Mt. Vernon.
I am against the proposal to make Springfield and Franconia the hubs.
I am 100\% AGAINST this proposal.
Sincerely-
Jeanne Kasai, Bradgate Road, 22308

Christopher B. Seaman \\ 7325 Millburn Court \\ Crozet, VA 22932 \\ cbseaman@gmail.com
}

December 16, 2021
Supreme Court of Virginia
c/o Muriel-Theresa Pitney, Clerk of Court
100 North Ninth Street, 5th Floor
Richmond, Virginia 23219-1315
Redistricting@vacourts.gov
Dear Chief Justice Lemons and Justices of the Supreme Court of Virginia:
My name is Christopher B. Seaman, and I am a resident of Albemarle County, Virginia. I am also a Professor of Law and Director of the Frances Lewis Law Center at Washington and Lee University School of Law in Lexington, Virginia, where one of my areas of teaching and scholarship is Election Law and Voting Rights. However, this letter reflects solely my own views.

Pursuant to Rule 4(b) of the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Virginia Constitution, I hereby offer the following public comments on the proposed redistricting map for Virginia's representatives to the United States House of Representatives prepared by Special Masters Bernard N. Grofman, Ph.D. and Sean Trende.

On balance, the Special Masters' proposed Congressional redistricting plan ("the Plan") appears to comply with relevant federal and state law, including Article I, § 2 and the Fourteenth and Fifteenth Amendments to the U.S. Constitution; the federal Voting Rights Act of 1965 ("VRA"), as amended, 52 U.S.C. \(\S 10101\) et seq.; Article II \(\S \S 6\) to 6 -A of the Constitution of Virginia; Virginia Code §§ 24.2-302.2 to 304.04 and § 30-399(E); and relevant court decisions interpreting these provisions. Regarding population equality, \({ }^{1}\) the Plan has a maximum population deviation of less than \(0.4 \%\) between districts, which seems acceptable in light of the Plan's compliance with statutory requirements and other legitimate objectives, including compactness, contiguity, preserving communities of interest, and consideration of political boundaries. \({ }^{2}\)

Considering racial and ethnic fairness and compliance with the federal Voting Rights Act, \({ }^{3}\) the Plan preserves two majority-minority districts (District 3 and District 4), which have a black

\footnotetext{
\({ }^{1}\) See Va. Code § 24.2-304.04(1) ("Districts shall be so constituted as to give, as nearly as practicable, representation in proportion to the population of the district."); see also Wesberry v. Sanders, 376 U.S. 1, 8, 18 (1964) (holding that "while it may not be possible to draw congressional districts with mathematical precision," the equal representation standard in Article I, \(\S 2\) of the U.S. Constitution requires district to be as equal in population "as nearly as is practicable"); Kirkpatrick v. Preisler, 394 U.S. 526 (1969) ("[T]he command of Art. I, § 2, that States create congressional districts which provide equal representation for equal numbers of people permits only the limited population variances which are unavoidable despite a good-faith effort to achieve absolute equality, or for which justification is shown.").
\({ }^{2}\) See Karcher v. Daggett, 462 U.S. 725, 740-41 ("We are willing to defer to state legislative policies, so long as they are consistent with constitutional norms, even if they require small differences in the population of congressional districts. Any number of consistently applied legislative policies might justify some variance, including, for instance, making districts compact [and] respecting municipal boundaries.... (citations omitted)).
\({ }^{3}\) See Voting Rights Act § 2, 52 U.S.C. § 10301; see also Va. Code § 24.2-304.04(3) ("No district shall be drawn that results in a denial or abridgement of the right of any citizen to vote on account of race or color or membership in
}
voting age population of \(44.5 \%\) and \(45.3 \%\), respectively. \({ }^{4}\) These districts are very similar to those adopted by a three-judge federal court in 2016 as a remedy to racial gerrymandering in the previously-drawn Congressional redistricting plan, \({ }^{5}\) and thus are likely to pass muster under any new challenge under the Equal Protection Clause of the Fourteenth Amendment and/or Section 2 of the Voting Rights Act. \({ }^{6}\)

On partisan fairness, the Plan, "when considered on a statewide basis," does not "unduly favor or disfavor any particular party." \("\) According to the nonpartisan Princeton Gerrymandering Project, the Plan receives a grade of A for Partisan Fairness. \({ }^{8}\) It projects that 5 districts are likely Democratic (Districts 3, 4, 7, 10 and 11); 4 districts are likely Republican (Districts 1, 5, 6, and 9), and two districts are in the competitive range of between \(46.5 \%\) and \(53.5 \%\) of the two-party vote share (Districts 2 and 10). This accurately reflects the overall statewide partisan balance from 2016 through 2020, where the Democratic Party's candidates have had an approximately \(10 \%\) advantage in statewide races compared to the Republican Party's candidates. \({ }^{9}\) Similarly, the nonpartisan Virginia Public Access Project (VPAP) organization finds that the Special Masters' Plan has 4 districts than are "strong Democratic," 1 district that is "lean Democratic," 1 district that is a "Tossup," 3 districts that are "lean Republican," and 2 districts that are "strong Republican." \({ }^{10}\) Again, this accurately reflects Virginia's status as Democratic-leaning but competitive between the two major political parties on a statewide basis.
a language minority group. No district shall be drawn that results in a denial or abridgement of the rights of any racial or language minority group to participate in the political process and to elect representatives of their choice. A violation of this subdivision is established if, on the basis of the totality of the circumstances, it is shown that districts were drawn in such a way that members of a racial or language minority group are dispersed into districts in which they constitute an ineffective minority of voters or are concentrated into districts where they constitute an excessive majority. The extent to which members of a racial or language minority group have been elected to office in the state or the political subdivision is one circumstance that may be considered. Nothing in this subdivision shall establish a right to have members of a racial or language minority group elected in numbers equal to their proportion in the population.").
\({ }^{4}\) Report of Special Masters Bernard Grofman, Ph.D. and Sean Trende to the Chief Justice and Justices of the Supreme Court of Virginia, at 17 (Dec. 7, 2021), available at https://www.vacourts.gov/courts/scv/ districting/memorandum_re_va_redistricting_2021.pdf (hereinafter "Special Masters' Report").
\({ }^{5}\) See Personhuballāh v. Alcorn, 155 F. Supp. 3d 552, 556 (E.D. Va. 2016) (adopting a plan drawn by Dr. Grofman that resulted in a black voting age population of \(45.3 \%\) in District 3 and \(40.9 \%\) in District 4).
\({ }^{6}\) I agree with the Special Masters' assessment that, given the supermajority of Democratic voters in both Districts 3 and 4 and that Black voters will likely comprise a majority of voters in the Democratic primaries, both of these districts will continue to offer Black voters the opportunity to elect the representatives of their choice to Congress and thus comply with Section 2 of the Voting Rights Act. See Special Masters' Report, supra note 4, at 14-15.
\({ }^{7}\) Va. Code § 24.2-304.04(8).
\({ }^{8}\) Princeton Gerrymandering Project, Redistricting Report Card - Virginia 2021 Special Masters’ Draft Congressional Map, https://gerrymander.princeton.edu/redistricting-report-card?planId=recOUnE4ZKjEyaVyJ (last modified Dec. 9, 2021).
\({ }^{9}\) Special Masters' Report, supra note 4, at 19. However, this figure is somewhat skewed by the 2018 U.S. Senate Race, where the Democratic candidate won by a historically large margin of \(16 \%\). See Va. Dep't of Elections, 2018 November General Official Results - United States Senate, https://results.elections.virginia.gov/vaelections/2018\%20November\%20General/Site/Congress.html (last visited Dec. 15, 2021) Excluding this result, the statewide margin of victory for Democratic Party candidates ranges from 10\% (2020 Presidential race) to less than 1\% (2013 Attorney General race).
\({ }^{10}\) Virginia Public Access Project, Latest Statewide - Special Masters, https://www.vpap.org/redistricting/ plan/2021-uscong-vasupremecourt-statewide-1/ (last visited Dec. 16, 2021). VPAP classifies a district as "strong" if the party had a greater than \(20 \%\) point margin in the 2016 Presidential vote, "lean" if the party had between a \(5 \%\) and

The Special Masters' proposed congressional map also largely preserves communities of interest, \({ }^{11}\) with one prominent exception that I discuss in detail below. Notably, the Plan recognizes the historical, geographical, and cultural divide of the Blue Ridge Mountains by keeping District 6 in the Shenandoah Valley, and the core of District 9 remains in Southwest Virginia. It also keeps Districts 2 and 3 in the Tidewater region, Districts 8 and 11 in the urban ring of Northern Virginia, and District 4 in the Richmond area. District 7 is a newly-created district in the outer suburbs/exurbs of Northern Virginia. Districts 1, 5, and 10 are less confined geographically, as each takes in multiple different regions of Virginia. \({ }^{12}\)

My major objection is the Plan's proposed division of a clear community of interest in the Charlottesville/Albemarle area, where I live. Specifically, the proposed Plan bisects Albemarle County-which surrounds the City of Charlottesville-into two districts, placing voting precincts to the north of Charlottesville into District 10, which runs up to Loudon County and the Maryland border, while Charlottesville and the rest of Albemarle County are in District 5, which travels down to Danville and the North Carolina border. "Communities that are split between districts often view their voice as diminished." \({ }^{13}\) In short, the Special Masters' Plan dilutes our community's voice by ripping it in half, with one joined to a Northern Virginia-centric district, while the other is lumped in with Southside Virginia-a region that has no economic, geographic, or cultural connections with our community.

The Special Masters' Report identifies factors such as "'shared broadcast and print media, public transport infrastructure, and institutions such as schools and churches' as part of its definition of a community of interest." \({ }^{14}\) Other courts have found "the existence of a community of interest where residents share substantial cultural, economic, and political ties." \({ }^{15}\) In contrast, the U.S. Supreme Court declined to find a community of interest in a Georgia congressional district that consisted of four discrete urban centers, connected only by hundreds of miles of rural counties and swamps. \({ }^{16}\)

By any and all of these measures, Charlottesville and Albemarle represent a community of interest. Notably, the University of Virginia ("UVA") plays a major role in both economic and cultural life within our community. UVA and its Health System is the largest employer in the

\footnotetext{
\(20 \%\) margin in the 2016 Presidential vote, and "tossup" if the margin was within \(5 \%\) in the 2016 Presidential vote. Id.
\({ }^{11}\) See Va. Code § 24.2-304.04(5) ("Districts shall be drawn to preserve communities of interest. For purposes of this subdivision, a 'community of interest' means a neighborhood or any geographically defined group of people living in an area who share similar social, cultural, and economic interests. A 'community of interest' does not include a community based upon political affiliation or relationship with a political party, elected official, or candidate for office.").
\({ }^{12}\) By "regions of Virginia," I refer to the demographic regions identified by the Weldon Cooper Center for Public Service at the University of Virginia. See Weldon Cooper Ctr., Virginia's Demographic Regions, https://demographics.coopercenter.org/virginia-regions (last visited Dec. 16, 2021).
\({ }^{13}\) Favors v. Cuomo, No. 11-CV-5632 DLI RR, 2012 WL 928216, at *12 n. 12 (E.D.N.Y. Mar. 12, 2012), report and recommendation adopted as modified, 2012 WL 928223 (E.D.N.Y. Mar. 19, 2012) (quoting affidavit of Dr. Nathaniel Persily).
\({ }^{14}\) Special Masters' Report, supra note 4, at 6 (quoting Bush v. Vera, 517 U.S. 952 (1996)).
\({ }^{15}\) Diaz v. Silver, 978 F. Supp. 96, 123 (E.D.N.Y. 1997), aff'd sub nom. Acosta v. Diaz, 522 U.S. 801 (1997) (citing Wilson v. Eu, 823 P.2d 535 (Cal. 1992)).
\({ }^{16}\) Miller v. Johnson, 515 U.S. 900 (1995).
}
area. \({ }^{17}\) Faculty, staff, and students who work or go to school at UVA live in both Charlottesville and Albemarle. In fact, the Plan would physically separate UVA itself by placing the UVA Research Park into the 10th District, \({ }^{18}\) while the Grounds and Medical Center would be located in the 5th District. On game days for football and basketball, it would be possible to park and tailgate in the 10th District, then walk to Scott Stadium or John Paul Jones Arena and cheer on the Wahoos in the 5th District.

There is also shared broadcast and print media in Charlottesville and Albemarle. The Charlottesville Nielsen DMA (Designated Market Area) consists of NBC (WVIR-TV), CBS and Fox (WCAV), ABC (WVAW), and PBS (WHTJ) affiliates that broadcast to Charlottesville and Albemarle, as well as two other nearby counties. \({ }^{19}\) The Daily Progress is the sole daily newspaper for Charlottesville and Albemarle and covers local news, politics, and events in the community. \({ }^{20}\) C-VILLE Weekly is a weekly newspaper that covers news, arts, politics, and cultural events, with over 23,000 copies delivered weekly in high-traffic areas all over Charlottesville and Albemarle. \({ }^{21}\)

Transportation and infrastructure also help create a community of interest in Charlottesville and Albemarle. Charlottesville Area Transit (CAT) runs numerous bus routes that connect Charlottesville and UVA with locations in Albemarle County, including shopping and employment centers like Stonefield, Fashion Square Mall, Albemarle Square, Rio Hill and 5th Street Station. \({ }^{22}\) Jaunt provides transit service from Albemarle communities like Earlysville, Crozet, Keswick, Scottsville, and 29 North to Charlottesville. \({ }^{23}\) The Charlottesville Albemarle Airport (CHO) is located in Albemarle County in the proposed 10th District, while the Charlottesville Amtrak Station (CVS) and Charlottesville Greyhound bus terminal are located in the City of Charlottesville in what would be the 5th District.

On an even more local level, the rapidly-growing bedroom community of Crozet, \({ }^{24}\) located in western Albemarle County just north of Interstate 64, is severed in two by the proposed Plan by placing the Crozet Precinct into the 10th District and the Brownsville and Mechums River Precincts into the 5th District. Crozet is a census-designated place that has been designated as a "growth area" by Albemarle County and has dramatically increased in population over the past two decades, from 2,820 in 2000 to 9,224 as of 2020. \({ }^{25}\) The Crozet Community Advisory Committee has promulgated a Master Plan that represents the community's 20-year vision for land

}
use, transportation, recreation, environmental protection, and capital improvement projects. \({ }^{26}\) Crozet has two elementary schools (Brownsville and Crozet), one middle school (Henley), and a high school (Western Albemarle) located within its boundaries. \({ }^{27}\) Crozet even has a free monthly community newspaper, the Crozet Gazette. \({ }^{28}\) But Crozet's community of interest is completely disregarded by the Special Masters' Plan, which cleaves it in half along State Route 240 (Three Notched Road), Crozet Avenue, and Jarman's Gap Road. \({ }^{29}\)

Fortunately, there is a straightforward solution that can unify Charlottesville and Albemarle into a single congressional district without making major changes to the rest of the Special Masters' Plan. First, I propose that the 10th District be extended southward to include Charlottesville and Albemarle County, with whom it shares closer ties than the 5th District. Notably, this would unify the U.S. 29 corridor between Charlottesville and Northern Virginia, which is the largest and most-used north-south route between Interstate 81 in the Shenandoah Valley and Interstate 95. In particular, a significant number of residents of Charlottesville and Albemarle travel at least periodically to Northern Virginia for work, to take advantage of cultural and other opportunities in the D.C. area, or to travel via Dulles International Airport. \({ }^{30}\) In contrast, Charlottesville and Albemarle have little economic or cultural connection with the rest of the 5th District, which is largely rural and agricultural. Second, to make up for the population loss to the 5th District caused by this change, \({ }^{31}\) Louisa County, Fluvanna County, Goochland County, and nine precincts in rural western Hanover County would be moved from the 1st District into the 5th District. \({ }^{32}\) These are all rural areas that have a good cultural and economic fit with the rest of the 5th District. Finally, to balance out the population, the portion of Spotsylvania County that is in the 10 th District under the Special Masters' Plan would be moved into the 1st District. \({ }^{33}\)

Thank you for your consideration of these comments.
Sincerely yours,

Christopher B. Seaman

\footnotetext{
26 Albemarle County, Crozet Master Plan Update, https://www.albemarle.org/government/community-development/planning-codes/master-planning/crozet-master-plan-update/crozet-master-plan (last visited Dec. 16, 2021).
\({ }^{27}\) Albemarle County Public Schools, Our Schools, https://www.k12albemarle.org/our-schools (last visited Dec. 16, 2021).
\({ }^{28}\) Crozet Gazette, About the Gazette, https://www.crozetgazette.com/about-the-gazette/ (last visited Dec. 16, 2021).
\({ }^{29}\) Indeed, the Plan boundary literally runs along my backyard, so that my neighbors across Jarman's Gap Road are in the 10th District, while my house is in the 5th District.
\({ }^{30}\) Notably, the UVA Health System has recently expanded into Northern Virginia with locations in Culpeper and Haymarket, which are also in the 10th District.
\({ }^{31}\) This is a nearly equal population switch, as it would transfer 100,258 people in Albemarle County from the 5th District into the 10th District, and 100,948 people from the 1st District into the 5th District.
\({ }^{32}\) The precincts in Hanover County that would be transferred to the 5th District are: Beaverdam, West Hanover, Montpelier, South Anna, Rockville, Shallow Well, Centerville, Manakin, and Blair Road.
\({ }^{33}\) This would result in moving 98,568 people from the 10th District-which would otherwise be overpopulatedto the 1st District.

I am very concerned about the proposed redistricting of Stafford and Fredericksburg.
The proposed New 7th District ignores the long-standing relationships that Stafford holds with the counties surrounding it in the Rappahannock Region. Almost all of Stafford's regional interests and affiliations are with communities to the east, south, or west rather than to the north. Stafford County should not be attached to Northern Virginia simply because I-95 runs through it. Stafford is more than just a couple of exits off the highway. Please reflect our real world affiliations in the maps.

Thank you,

Good morning, Honorable Supreme Court Justices,
I have reviewed the suggested maps created by your appointed special map makers and support their efforts. I believe they have created balanced maps and respected communities as best as possible.

As a school board member in the past, I know how difficult it was to create a fair and respectful school district map. It is a supreme challenge and process.

I support these maps based on their design and see them as a strong fair basis for the political future. Sometimes, after years of tinkering, maps can become restrictive and very contrived. I believe this is what has happened to the existing election districts in Virginia. The opportunity presented today is to restart the process and provide a solid basis for fair and equitable representation.

I commend the work produced to date and look forward to the issuance of the official redistricting.

Sincerely,
Bruce C Keener

Honorable Supreme Court of Virginia:
I am writing to the Court today to request the Court place the Town of Blacksburg, the Town of Christiansburg and the City of Radford in one House of Delegates district. Currently these localities have been split between HD41 and HD42 and this should not come to pass in the final redistricting.

These three urban/suburban areas constitute one community in the New River Valley and conveniently their combined populations fit within the target district size of 86,314. The similar level of land use intensity creates unique problems (and opportunities) that are not shared with the more rural areas added to the two proposed districts. Simply put, the community needs of suburban/urban areas are different from more rural areas and although there is some overlap in needs, the differences outweigh the commonalities.

In the case of the two Towns, they are members in a shared, consolidated drinking water system and a shared consolidated solid waste management facility. These are important local services provided to our community.

The two Towns are also members in a shared, consolidated 911 Emergency center created to serve the community and facilitate timely and efficient emergency response. The two Towns also have "mutual aid" agreements for response to emergencies. Public safety is an essential service to our community.

Blacksburg Transit provides essential and necessary transit service in the two Towns and the operational cost of this essential community service is shared between the Towns. The City operates its own transit service that runs between the two Towns as well. The fact that transit is needed, provided and supported indicates to me the strong link between these "communities of interest" to use an official term.

The two Towns and the City share the same regional employment centers of Virginia Tech and Radford University. As the primary economic drivers, the two Universities support many ancillary businesses as well. Because of the two universities, the two Towns and City share a large population of college age residents, a similar community demographic.

Please revise the redistricting maps to consolidate in a compact manner the Town of Blacksburg, the Town of Christiansburg and the City of Radford into one House of Delegate district.

\section*{EXTERNAL EMAIL \\ THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS \\ Hello,}

I currently live in the 7th VA district. The proposed redistricting map will change my district from 7 to 5 . My family moved to our current home in North Chesterfield/Bon Air from West Chesterfield several years ago because we felt the more urban area was a better fit to raise our children (both on the autism spectrum). The proximity to Richmond has indeed worked well for us, especially for our older, young adult son, who now has access to public transportation to get downtown to VCU where his doctors are located.

My concern with the proposed redistricting is that it would move us to a district that is much more rural and less in tune to the many health, educational, and therapy needs of our children. I ask that you take our concerns into account when making your final decision.

Thank you.
Sincerely,
Kate Flinn

Redistricting Officials:
The Mount Vernon area is a unified communited anchored by the historic Mount Vernon Estate and should not be broken up by political redistricting into areas that have nothing in common with the Mount Verno area. We have a pyramid school system that feeds the elementary and middle schools to the high schools, citizens shop and bank locally and provide continuing support to local churches and local historic sites like the Mount Vernon Estate, Washington's Grist Mill, Woodlawn Plantation, and Gunston Hall Estate. Citizens in our area have nothing in common with proposed political redistricting into the Fredericksburg or Manassas areas.

I live in Sulgrave Manor near the Mount Vernon Estate and my orientation since 1964 has been the Muunt Vernon Estate and Alexandria, not Fredericksburg or Manassas. I want to remain in the 8th Congressional District and in the same House of Delegates and State Senate Districts because our social and commercial activities are in the Mount Vernon-Alexandria areas, not in the FredericksburgManassas areas.

Redistricting hearing,
I've been a resident of the Mount Vernon area for the past 20+ years and raised my children in the Fairfax county schools, redistricting our area with Manassas or Woodbridge is not acceptable, we have our own communities which are long standing and finally getting some of the funds to build prosperous communities and amenities for the area to thrive, most of the residents in the community are minorities, which history has showed always get the least amount of assistances and support. The Mount Vernon area is a multicultural area which holds its own in being a productive working environment and deserves to remain in its own district.

Thank you,
Robin Chambers

I Disapprove of the map as drawn. Most of the Districts are tight sections in the same geographical area.

District 2 is a collection of stray cats and dogs. Northern Norfolk has much in common with Virginia Beach. Why not put Virginia Beach, north of Dam Neck and Oceana with northern Norfolk?

Portsmouth may have more in common with Franklin or Newport News. The minority representation was reduced in District 3.

Dear Virginia Supreme Court,
I am commenting on the new Senate and Delegate districts because I care a lot about the gerrymandering issue. The new state districts are definitely contiguous and compact, a significant improvement. Many of the old districts were not that contiguous. One small issue is that the districts are mostly favoring Democrats, since many are centered around cities and towns. Many people in urban areas would like these maps. They are very good overall because they are contiguous and very compact. After a few amendments to make the districts more fair, you should vote in favor of these districts, and it will make Virginia better by having gerrymander-free voting districts for the next 10 years.

Sincerely,
Sean Tobin
6th grade
Tandem Friends School
Charlottesville, VA

Members of the court

My name is Jon Taylor, and I've been a resident of Louisa County for 20 years. The ties which bind the people of this County into a community of interest are; farming, agriculture, small family owned businesses and a rural lifestyle, ties which they share with adjacent counties in the Central Virginia region (Goochland, Orange, Fluvanna, Madison, Albermarle and Louisa Counties)

I am asking this court to do everything they can to keep these communities of interest together and not toss them into a mixing bowl of Congressional and state districts.

The proposed congressional map moves all of Louisa County from the Seventh Congressional District into a redrawn First Congressional District, which stretches from the Eastern Shore all the way to Fluvanna County, hardly the definition of compact. Or connecting communities, which have no historical or cultural ties with each other.

While incumbent protection should never be the focus of any redistricting, the proposed maps for House of Delegates (59th, and 55th districts) and Senate (10th, and 11 th districts) severs Louisa County from their current representatives, and puts it's residents into districts where they have no meaningful connection with their new representatives.

Compounded by the fact only one of these four current state representatives for these new districts resides in the districts they were previously representing. A peculiar set of circumstances, which affects Nine Senate and twenty-four House of Delegates through out the Commonwealth.

When it comes to voting rights, political participation and neutrality; drawing Louisa's heaviest African American precinct into Virginia's \(11^{\mathrm{h}}\) Senate district will dilute their votes in a sea of partisanship.

For me, the biggest issue with these "nested districts," where state Senate districts were drawn to largely fit inside congressional districts, and House districts were drawn to fit within state Senate boundaries. Is that most House of Delegates and state Senate elections will be largely uncompetitive for one party or the other. https://bit.ly/3DXYF3H

While it's true, that drawing districts which are compact, contiguous and coherent and that are competitive are often conflicting goals, there are many districts where this is practical and achievable. https://bit.ly/33tWvfD

I don't believe that the people of Virginia voted twice for a constitutional amendment for fairness in the redistricting process, with the intent of seeing a handful of districts actually be competitive.

In closing, I am asking this court to do everything they can to keep communities of interest together and to make our state districts as competitive as possible.

Thank you for taking the time to listen to my testimony

December 15, 2021

The Honorable Donald W. Lemons
Chief Justice, Supreme Court of Virginia
Supreme Court Building
00 North Ninth Street
Richmond, VA 23219
Chief Justice Lemons,
The County of Nelson has completed it's 2021 Redistricting Plan and a public hearing on the subject was held on December 14, 2021. It is the intent of the Board of Supervisors to approve an amendment to he Code of Nelson County regarding voting district lines on January 11, 2021 following the close of the required 45 -day public comment period which concludes on December 31 , 2021. This amendment East Districts to provide for moving 119 individuals from the Central District into the East District in order to comply with Article VII, Section 5 of the Constitution of Virginia. This change will result in a deviation from the boundary shown in the Virginia Supreme Court's "SCV Draft 1 HOD" map that delineates the boundary between
Virginia's \(53^{\text {rd }}\) and \(55^{\text {th }}\) House of Delegates Districts. Nelson County respectfully requests that the final Supreme Court of Virginia House of Delegates map be adjusted to reflect this change.
The census blocks to be moved include the following:
911259501021018
911259501021011
911259501021012
911259501021073
A map of the area is shown below and results in this section of the boundary being shifted to State Route 29 and the Rockfish River.

Respectfully,
Stephen A. Carter
County Administrator

My name is Emily Knight. I live in Bon Air, North Chesterfield and have lived here for 20 years. I grew up in a home in Henrico county where my parents still live.

I am extremely upset to see Henrico and Chesterfield counties separated on the proposed map. Henrico and Chesterfield counties are a community of interest which share economic, social and cultural ties. On the proposed map Chesterfield is joined with very rural communities that have very different needs and interests for representation.

I have also noticed that these maps damage Virginia's only 3 Congress women and will benefit male incumbents. It appears that people drawing the maps want to remove women from Congress where they are not even fairly represented at \(50 \%\).

I am asking the court to reject these maps and to keep Chesterfield and Henrico counties together as a community of interest.

Thank you for making sure these maps represent central Virginia fairly.
Emily Knight

Virginia State Supreme Court \\ ATTN: Redistricting Decision \\ Members of the Supreme Court:
}

I am Greg Schumacher, Chairman of the Fauquier County Republican Committee. Thank you for the opportunity to comment on the proposed redistricting maps developed by the Special Masters.

As a general comment, the process is made overly complex and logic-defying on paper due to trying to accommodate multiple criteria that bear no relevance to county boundaries. The process would be much cleaner by working to meet the population parities while maintaining full county boundaries as much as possible. Split counties and split cities confuse citizens and complicate election processes.

That said, I want to register the following concerns and suggestions:
- The proposed congressional map has all of Fauquier County and other counties in the Piedmont sharing the Tenth District with all of Loudon County. The Loudon piece would make up more than half of the new Tenth District population wise and is overall more Northern Virginia centric than rural and Piedmont centric. This dilutes the voice of the more culturally distinct rural Piedmont area and gives more weight, along with three other Northern Virginia districts, to the more urbanized and culturally distinct Northern Virginia area. Please consider putting Loudon in a district with western Fairfax County, and putting an intact Fauquier in a District shared with western Prince William, Stafford and Fredericksburg, all areas with more cultural similarity to Fauquier.
- I share similar concerns with proposed Senate District 31. It splits Fauquier in half and combines it with the western two-thirds of Loudon County. Rural Fauquier shares much more culturally with Warren and Clarke Counties to the west. Grabbing the little hook with voters in the Potomac Falls area looks peculiarly out of place.
- As the Senate and House of Delegate maps are quite similar, my concern with the currently drawn HoD \(30^{\text {th }}\) and \(61^{\text {st }}\) Districts are as above. They represent quite a shift in cultural similarity and are confusing to citizens and the electoral process.

Sincerely,
Gregory Schumacher
Chairman, Fauquier County Republican Committee

Hi there,

Few notes on the redistricting. Not sure why these changes were made:

The district cuts off at Mt. Vernon Memorial Highway. Voters in 22308 will be grouped with voters on Rolling Road in Springfield instead of with their neighbors on Ferry Landing Road. The 8th Congressional District cuts off in approximately the same spot and puts George Washington's Mt. Vernon Estate in the same district as Quantico, Manassas, and Fredericksburg!

These maps effectively split the Mt. Vernon High School Pyramid in half and split the Hayfield Secondary School District so if you live in that area, you will not be voting with parents of other students in the same schools. It splits Fort Belvoir in half. The Congressional map splits Kingstowne between two different congressional districts.
- Living along Mount Vernon Memorial Highway into a new Congressional District centered on Fredericksburg and Manassas instead of the existing 8th Congressional District and the rest of Mt. Vernon; and
- Living in Mason Neck or East of I-95 into a Virginia Senate District with people in Lake Ridge, Woodbridge, and Crosspointe, instead of with everyone else who lives in 22303, 22306, 22307, 22308, 22309, and 22315.

Both proposals basically split the Mount Vernon High School Pyramid and Mount Vernon Supervisor District in half. They've also drawn the renumbered 34th Senate District (formerly 36th) from Mount Vernon and Lee Districts over I-95 and into Springfield by Rolling Road. They've also redrawn a renumbered 16th House of Delegates District (formerly 44th) into Wilton Woods and Burgundy Farm instead of including the Mount Vernon Estate and the neighborhoods along Mount Vernon Highway. On the positive side, Belle View/ New Alexandria has been included in the \(16^{\text {th }}\) House of Delegates District.

Thank you,
Susan Hall

Thank you for receiving comment on the proposed masters' maps.

I am very discouraged that Albemarle County and particularly the White Hall district which I represent on the Board of Supervisors, is divided between two congressional districts which proceed to the northern and southern boundaries of the commonwealth.

The dividing line goes through the middle of the unincorporated town of Crozet, population c. 8000, with two of its four precincts assigned to each of the Congressional districts.

This is grossly unfair to the citizenry and removes the possibility that community of concern and common interest will be protected. Our community will have no one who really cares about it. We will not belong to anyone.

I ask you to direct the masters to remove this division in Albemarle County and assign our County to our much more frequent community of interest, the northern congressional district. Our economic development districts, highway planning districts, commuter districts are all partners north of Albemarle. Our citizenry travels to DC much more for work and for recreation than to Lynchburg.

I appreciate your effort on our behalf.

\section*{The Supreme Court of Virginia}

I am writing to you to protest the redistricting plan developed for you by the special masters. It appears the designers of this plan tried to paint a patina of bipartisanship on this plan by setting it up to appear as if each party was left with four districts the plan protected while opening three districts up to a fair competition. However, the facts show a totally partisan nature to this redistricting. Every 10 years we go through redistricting which is driven by the census numbers showing which districts have too many residents for the new target number and which have too few. In Virginia the tenth had to many and the ninth for example had to few requiring adjustments. This should be driven by a sense of fairness which was not displayed in their plan.

First, I believe it is important to point that the criteria for districts in Virginia are that they should be to the extent possible compact, contiguous, and share a common community of interests. The re-drawn tenth district is not compact and there is little common community of interests between the new additions and the northern Virginia area of the former tenth which remains.

Second let us examine the facts about the claim of equity because each party has four districts which were protected. The two democratic districts in northern Virginia are driven by the geography of the area. Alexandria, Arlington, Falls Church and Fairfax City are all totally surrounded by Fairfax County and since their combined populations are 1.6 million it would be impossible not to end up with two districts that are democratic. The other two democratic districts are represented by African Americans and to meet the civil rights requirements they are protected. Thus these four districts are protected not by the special masters plan but rather by geography and the law.

In looking at how to redistrict it was clear Fairfax and the jurisdictions it includes have over 1.6 million residents which meant it would make up two districts and some residents would have to go to another district logically the tenth. In turn the tenth included all of Loudoun county with over four hundred thousand residents and by joining those with residents of Prince William a compact and contiguous district with strong communities of interest would be created. In turn since the ninth was too small it would need to gain residents from the other republican districts next to the ninth. Those districts would in turn pick up some of those from northern Virginia. Since the second and seventh districts were already competitive and close to the correct number their changes needed to be small. This plan would have created five democratic districts three republican districts and three competitive districts and would best reflect the population changes.

Instead the masters made the tenth, the second and the seventh more likely to be competitive but leaning republican and all four republican districts were protected by your plan. This is clearly a biased suggestion. Stretching the tenth down the valley away from northern Virginia makes no sense just as pulling democratic areas out of the second makes no sense. Anyone looking at the map of Virginia should have seen the bias of the masters plan. It is also important to note that the proposed seventh district is described as leaning democratic. This is only true if you look only at the most recent elections for President when the state went democratic. Looking at other elections and the elected representatives in this area it is clear the area is more likely to lean republican particularly in nonpresidential years like 2022. Larry E. The 10th Congressional district should not include eastern Loudoun county. The district is rural except for that part. Eastern Loudoun has more in common with the 11th district than the 10th district.

Please accept this public comment on the proposed redistricting map. As a lifelong resident of Southwest Virginia, I want to continue to see Salem included in my congressional district. With all due respect, expanding the district east into Bedford, but excluding Salem from the 9th district makes no sense. I live in Wise County where we have far more in common with Salem than we do Bedford or Martinsville. So, please reconsider the map and please include Salem within the 9th district.

Sincerely,
Donna Lawson

To Clerk of the Supreme Court of Virginia,
I am writing to you today about the proposed maps that are before the court this week. I am a resident of Chesterfield county and work in Henrico county. I shop, work, and visit friends in both communities. They are both fast growing, busy communities that have much in common. The proposed map would split them up and pair them with rural communities which have few needs in common.
Western Chesterfield and Western Henrico face a growing and diversifying population in which education and transportation infrastructure is very important while the rural counties are more concerned with broadband access and agricultural issues. It would not be fair to either community to have a representative trying to advocate for all of those things.
The court could tweak the map by moving Goochland, Fluvanna, Caroline, Louisa, King George and Hanover west of Ashland onto VA-05 while taking western Chesterfield that's currently in VA-05 and move it to VA-01. The eastern part of Hanover would stay in VA-01. That part of Hanover is more suburban and shares common interests with Western Chesterfield and W. Henrico. All of the communities would benefit from a representative that could focus on their communities unique interests and needs.
Please consider changing the proposed map to more fairly represent the citizens of our great state.
Thank you,
Barbara Jean Smith

The proposed redistricting maps have a negative impact on our Mt. Vernon community regarding selection of delegates, Fairfax County Supervisor and Fairfax County School Board members. The Mount Vernon Community in my view includes. the Sherwood Hall Library, Whitman Middle School, Mt. Vernon Hospital, Mt. Vernon High School, George Washington's Mount Vernon, the Woodlawn Fire Station and the Route One transportation corridor from the Fairfax County Parkway to the Huntington Metro Station.

The proposed maps chop up this area so we no longer can select a delegate, senator and local elected officials (suupervisor, school board member, etc.) to represent our community.

It would be very helpful to see proposed maps with a link to an overlay that shows our current representation at all levels and any changes that the proposed map would make.
This may be challenging however current mapping software should make supervision of impact relatively simple to implement.

Thank you in advance for soliciting my view of the proposed redistricting. More needs to be done to achieve fairness in elections for the Mount Vernon Community.

Respectfully,
Harold (Hal) Barnett

Comment: I am horrified with the proposed redistricting maps which do not even mention and fail to recognize my community......Mt. Vernon...home of our first President. Mt Vernon is a long-standing community of neighborhoods sharing print media, public transport infrastructure, schools, churches, a hospital, library and many viable businesses. I believe these redistricting proposals are unfair, unjust, and inherently designed to weaken the strength of our vote by essentially chopping up our community.

Sincerely,
Mary A. Barnett

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

To Whom It May Concern:
My name is Suzy Mullins and I live in Roanoke, Virginia. I recently moved to Roanoke for my husband's job, but grew up in Wise County in the far southwest corner of the Commonwealth and - before moving - I spent my entire life living in the 9th congressional district.

When I moved to Roanoke, I was fearful of moving to the "big city." But I was shocked at how many of my friends and neighbors were either from the coalfields or had family in my corner of Virginia. I learned quickly that Roanoke to some degree and Salem to an even larger degree has a lot in common with my rural hometown of Coeburn. The values, the economic ties, the regional identity, and the cultural identity of the 9th district are unique. That is why I, as a resident of Roanoke, and as a lifelong resident of the 9th district, respectfully request that the maps be adjusted by the Court in order for the 9th district to include Salem.

It is illogical for Salem to be removed from the 9th district. Likewise, it is illogical for the district lines of the 9th to bypass Salem entirely and, instead, expand easternward to Bedford or Lynchburg. It is possible to draw maps that are fair to everyone based on commonsense principles of keeping communities of interest together. Southwest Virginia, as a whole, is a community of interest that spans from Salem to the Cumberland Gap. Salem is a community that has far more in common with Wise than Bedford has with Salem or Wise. I hope that you would redraw the map accordingly.

Thank you for your time in considering this request. Keep Salem in the 9th!
Very truly yours, Suzy Mullins

\section*{THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS}

Hello, I'm writing with feedback on the proposed new boundaries for VA CD-10. I have several areas of concern about the proposal submitted by the special masters.

Loudoun County, whose residents make up a large portion of the current and proposed district, is an exurb of DC and should continue to be a Northern Virginia district. Loudoun's interests are not that well aligned to the rural counties being proposed to be included in the new district. It makes much more sense to center VA CD-10 with an anchor in Loudoun (a fast-growing county) and branching into Prince William County, which is a much more similar county to Loudoun. "Communities of interest" don't seem to be well-reflected in the new map, since the issues faced by voters in Sterling would be quite different from the voters in Orange. Loudoun residents don't regularly travel to do business into Madison or Culpeper counties, but we do travel into Prince William County regularly.

Thank you for your consideration.
Lara Larson

December 16, 2021
Ms. Muriel-Theresa Pitney
Clerk of Court
Supreme Court of Virginia
100 N. 9th St, \(5^{\text {th }}\) Floor
Richmond, VA 23219
Dear Ms. Pitney:
On November 13, 2020, Sean Trende declared that application of "modest redistricting, combined with the demands of reapportionment, are likely to lead" Virginia to "no change" in its 7-4 party affiliation split among its congressional delegation, absent "aggressive gerrymander[ing]." One year later, this Court tasked Mr. Trende with redrawing Virginia's congressional map upon his promise to apply fair and neutral redistricting principles. \({ }^{2}\) This Court now has before it a map that the Special Masters claim produces a " \(6-5\) " party affiliation split, in which "Republicans could win a majority of the seats in Virginia's delegation" some years. \({ }^{3}\) Thus, upon the advice of Mr. Trende himself, this Court should view this map with some skepticism. By employing strict adherence to modest, traditional redistricting principles, this Court should reject the Special Masters' congressional map-and any aggressive gerrymander-that causes this unpredictable shift.

The memorandum accompanying the court-appointed Special Masters' congressional map released on December 8 (the "December 8 Map") is confounding. Over 55 pages, the Special Masters endeavor to paint a picture of maps drawn in a mindful and rigorous manner. Yet, upon engaging with the content, the vague reference to the constitutional principles that should dominate this court-ordered redistricting process gives way to a haphazard, unprincipled process that is unmoored from the history, tradition, and communities that form the Commonwealth. Indeed, the Special Masters' first point of order as they write to assure this Court and Virginians that they have performed their duty well is to declare that their "prime directive for drawing these maps comes not from the constitutional or statutory provisions described by this Court," but from the need to "behave in an apolitical and nonpartisan manner. \({ }^{, 4}\) It seems the Special Masters have misunderstood the purpose of their work, as appearances of bipartisanship are not a defense to unconstitutional maps.

The December 8 Map falls short on numerous traditional redistricting principles, even failing to achieve the population equality that is the singular driving force behind this entire decennial process.

\footnotetext{
\({ }^{1}\) Sean Trende, Part 2: What Redrawn House Maps Could Mean in 2023, Real Clear Politics (Nov. 13, 2020), https://www.realclearpolitics.com/articles/2020/11/13/part_2_what_redrawn_house_maps_could_mean_in_202 3_144651.html.
\({ }^{2}\) See Nov. 19, 2021 Redistricting Appointment Order at 1.
\({ }^{3}\) December 7, 2021 Memo from Bernard Grofman, Ph.D. and Sean Trende to the Chief Justice and Justices of the Supreme Court of Virginia re Redistricting Maps ("Memo") at 18-19.
\({ }^{4}\) Memo at 2 (emphasis added).
}

Worse, it does so to the detriment of minority populations, which constituted the whole of Virginia's population growth over the last decade, and to the detriment of Virginia's close-knit communities, which it dices and divides with a complete lack of precision. As the Special Masters are no doubt aware, the currently existing congressional map is the result of a years-long litigation dedicated to ensuring fair representation for certain of Virginia's minority communities while adhering to federal and state legal requirements. Rather than use this court-approved map as a starting point and building upon the redistricting principles it embodied, the Special Masters chose to start from scratch. While the December 8 Map may be, in the Special Masters' words, a "true joint effort," it departs significantly from the lessons learned by the Commonwealth and its leaders in the last decade. If adopted, the December 8 Map would likely suffer from the same fate as its 2011 predecessor-years of tumult in the courts.

Our client has a vested interest in avoiding such an outcome. We represent James Farkas, a Virginia voter who successfully challenged the General Assembly's unconstitutional racial gerrymander of the congressional map following the last census. The federal court reviewing Mr. Farkas's challenge found that the Virginia General Assembly unjustifiably packed Black voters in Congressional District 3, thereby diluting their voting strength elsewhere in the Commonwealth. As a plaintiff to that litigation, Mr. Farkas now seeks to ensure that the principles behind the federal court's ruling are preserved-and the errors underlying the General Assembly's 2011 congressional plan are not replicated-in the redistricting that is now taking place before this Court.

In light of the December 8 Map's failures, and pursuant to Virginia law and this Court's rules inviting public participation in the Court's redistricting deliberations, \({ }^{5}\) we submit the attached congressional map (the "Farkas Map") on behalf of our client for consideration by the Supreme Court of Virginia and its Special Masters. \({ }^{6}\) The Farkas Map satisfies all applicable provisions of federal and Virginia law. Importantly, it achieves strict population equality, preserves communities of interest, and ensures that the voting strength of Virginia's growing racial and ethnic minority population is not diluted. We strongly encourage the Special Masters and this Court to adopt the Farkas Map for Virginia's congressional districts.

\section*{I. Background}

\section*{A. The Virginia General Assembly enacted an unlawful congressional plan in 2011.}

During the one hundred years following Reconstruction, Virginia did not elect a single Black representative to Congress. \({ }^{7}\) That changed in 1992, when the U.S. Department of Justice, acting under the power of the federal Voting Rights Act, directed the Virginia General Assembly to draw a

\footnotetext{
\({ }^{5}\) Va. Code Ann. § 30-399(C) (2020); Sup. Ct. of Va., Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, R4(a) (Feb. 23, 2021), https://www.vacourts.gov/courts/scv/article_2_section_6a_rules_procedures.pdf.
\({ }^{6}\) Images of the Farkas Map are included in-line in this submission as well as in the attached Appendix. Several mapping files for the Farkas Map have been submitted to the Court alongside this submission, in a .zip file labeled "Farkas Map Mapping Files."
\({ }^{7}\) David Wasserman, Is it Time to Rethink Hyper-Minority Districts?, The Atlantic (Sept. 20, 2021), https://www.theatlantic.com/politics/archive/2021/09/it-time-rethink-hyper-minority-districts/620118/.
}
congressional district that provided Black voters an opportunity to elect a representative of their choice. \({ }^{8}\) As a result, District 3 was drawn as a majority-Black district in 1992 and voters in that district elected Representative Bobby Scott to Congress that same year. Representative Scott has represented District 3 continuously since then. He was the only Black member in Virginia's congressional delegation from 1992 through 2016.

Over time, what began with the Department of Justice's important effort to ensure that Black voters in Virginia were represented in Congress turned into the Virginia General Assembly packing Black voters into one congressional district, diluting their voting strength elsewhere in the Commonwealth. Although Black voters in District 3 had consistently elected their representative of choice by significant margins, ranging from 69 percent to 97 percent of the vote, the Republican-controlled General Assembly raised the Black voting age population ("BVAP") of District 3-from 53.1 percent to 56.3 percentfollowing the 2010 Census. \({ }^{9}\) To do so, the General Assembly moved "predominantly white" populations out of District 3 and moved "predominantly African-American" voters into the district. \({ }^{10}\)

Along with other residents of District 3, Mr. Farkas brought a lawsuit in federal court, arguing that the district was an unconstitutional racial gerrymander. In 2014, the majority of a three-judge panel agreed, finding that the General Assembly had violated the U.S. Constitution by unjustifiably packing Black voters into District 3. \({ }^{11}\) The court concluded, based on direct and circumstantial evidence, that "race was the predominant factor" in drawing District 3, as mapdrawers sought to ensure the district's BVAP exceeded 55 percent. \({ }^{12}\) Upon reconsideration, the court again declared the General Assembly's plan unconstitutional \({ }^{13}\) and appointed Dr. Bernard Grofman as a special master to advise the court on the appropriate redistricting remedy. \({ }^{14}\) In 66 pages analyzing two map configurations, Dr. Grofman explained the considerations that went into his map-drawing and why his proposed maps addressed the court's concerns, \({ }^{15}\) including that his "concern[] for contiguity and the avoidance of unnecessary splitting of existing political subunit boundaries, and [his] attention to compactness" led to a heavily minority District

\({ }^{12}\) Id. at 541-50. The General Assembly used this same 55 percent target when drawing districts for Virginia's House of Delegates following the 2010 census. A different panel of three federal judges struck down several of those districts as unconstitutional racial gerrymanders in 2018. See Bethune-Hill v. Va. State Bd. of Elections, 326 F. Supp. 3d 128, 180-81 (E.D. Va. 2018). The U.S. Supreme Court later dismissed an appeal of this decision, leaving the panel's ruling intact. Va. H.D. v. Bethune-Hill, 139 S. Ct. 1945, 1956 (2019).
\({ }^{13}\) Page v. Va. State Bd. of Elections, No. 3:13cv678, 2015 WL 3604029, at *18 (E.D. Va. June 5, 2015). Republican members of the Virginia congressional delegation appealed the decision to the U.S. Supreme Court, but the Court rejected the appeal and left the panel's decision intact. Wittman v. Personhuballah, 136 S . Ct. 1732, 1736-37 (2016).
\({ }^{14}\) See Letter to Couns. of R. from the Ct., Personhuballah v. Alcorn, 155 F. Supp. 3d 552 (E.D. Va. 2016) (No. 3:13-cv-00678-REP-LO-AD), ECF No. 236 ("Personhuballah Letter").
\({ }^{15}\) See Rep. of the Spec. Master, Personhuballah, 155 F. Supp. 3d 552, ECF No. 272 ("Personhuballah Rep.").
}

3 that did not reflect "in any way a predominant concern for race," but rather "naturally reflect[ed] the underlying demography of the state . . . ." \({ }^{16}\) Critically, Dr. Grofman explained that when the new District 3 was drawn in accordance with traditional districting principles alone, rather than predominantly focusing on race, a substantial minority population in District 4 arose "virtually automatically." \({ }^{17}\)

In adopting one of Dr. Grofman's maps, the court credited his approach to drawing the districts, concluding that Dr. Grofman was "guided by the neutral goals of compactness, contiguity, and avoiding unnecessary city or county splits, rather than any racial considerations." \({ }^{18}\) The court explained that Dr. Grofman's plan accorded with the principles of Section 2 of the federal Voting Rights Act because Black voters would not be deprived of the opportunity to elect their candidates of choice in either District 3 or District 4. \({ }^{19}\) The final, court-adopted plan lowered District 3's BVAP to approximately 45 percent and increased District 4's BVAP to about 41 percent. \({ }^{20}\) Each of these BVAP percentages has proven more than sufficient for the Black communities in those districts to elect the candidates of their choice, in coalition with others. Indeed, during the 2016 election, the newly redrawn District 4 elected its first Black member, Representative Donald McEachin, while the newly redrawn District 3 reelected Representative Scott. Both representatives were subsequently reelected in 2018 and 2020.

\section*{B. Virginia's voters demand an end to gerrymandering with the 2020 constitutional amendment.}

Following the unlawful and tumultuous redistricting process of the 2010 cycle, voters successfully placed a proposed amendment to the Virginia Constitution on the 2020 general election ballot, known as the Virginia Redistricting Commission Amendment (the "Amendment"). The Amendment sought to establish a new redistricting commission comprised of 16 members from across the political spectrum, including non-partisan citizens. The Amendment garnered overwhelming support, with almost 66 percent of the electorate voting in favor of adoption. \({ }^{21}\) Nearly every Virginia county showed majority support for the Amendment. \({ }^{22}\) The results demonstrated the intent of the majority of Virginians to ensure that the General Assembly's mapping manipulations that resulted in two unconstitutional redistricting maps last cycle would not be repeated.

\section*{C. The 2020 Census results reveal significant minority population growth.}

The 2020 Census results reveal that Virginia's population has grown significantly in both number and diversity. Virginia has experienced a nearly 8 percent increase in population over the past decade, adding more than 630,000 people. The majority of these gains are attributable to Virginia's racial and ethnic minority populations: the minority population increased by more than 7 percent since 2010, while

}
the Commonwealth's white population decreased by 5.1 percent during that same time period. \({ }^{23}\) Notably, Virginia's Black population, which is largely concentrated in the southeastern and northern portions of the Commonwealth, outpaced the general population growth rate, increasing by 8.9 percent to now account for 20.9 percent of the Commonwealth's population. \({ }^{24}\)

\section*{D. The Commission fails to adopt a map, triggering this Court's duty to redistrict.}

After the selection of members in the fall of 2020, the Virginia Redistricting Commission began meeting in early 2021. It held 38 meetings in Richmond and 16 public hearings across the state during which it considered public comment and proposed maps. \({ }^{25}\) Unfortunately, however, the Commission deadlocked during its final meetings in September and October and found itself unable to agree on either the process of drawing new redistricting plans or the substance of those plans. \({ }^{26}\) Without hope of bridging the impasse, the Commission disbanded without proposing maps for the General Assembly's consideration. The Commission's inaction triggered a constitutional failsafe by sending the task of drawing maps directly to this Court. \({ }^{27}\)

\section*{E. The Court's Special Masters produce a map that fails to comply with the law.}

On November 19, 2021, this Court selected two Special Masters, Dr. Bernard Grofman and Sean Trende, to assist in its mapdrawing duty, directing the Special Masters to work together to produce legally compliant maps within 30 days. \({ }^{28}\) Less than three weeks later, the Special Masters produced a draft congressional map-the December 8 Map-for the Court's and the public's consideration. Unfortunately, the December 8 Map violates governing legal and traditional redistricting principles.

\section*{i. The December 8 Map fails to achieve population equality while fully abandoning a modest change approach.}

The most apparent-and entirely unnecessary-violation is the December 8 Map's failure to equally apportion Virginia's population across the 11 congressional districts. Remarkably, it misses this baseline mark while not making any attempt to preserve current districts through modest adjustments.

}

When tasked with drawing maps, courts often employ a "least-change" approach, minimizing their impact on the lines drawn by concordant branches of government or affirmed by previous courts. \({ }^{29}\) The preparation of new maps, then, typically begins with an analysis of how the previous map can be updated to best reflect traditional redistricting principles and population equality. \({ }^{30}\) This is particularly important when the previous map-or some portion thereof-has gone through judicial review, as is the case here. \({ }^{31}\) Eschewing this principle entirely, the December 8 Map abandons the meticulous review of courts past in favor of a brazen reimagination that is both unfamiliar with and detached from the communities that will live under this congressional plan for a decade to come.

\section*{ii. The December 8 Map appears to impermissibly use race as a predominant factor.}

In disregarding the judicial history of Virginia's maps, the Special Masters fail to integrate the lessons learned with respect to constructing legally compliant districts that do not use race as a predominant factor and still permit Virginia's heavily minority districts to elect candidates of their choice in coalition with others. The Special Masters strenuously insist in their memorandum that they "simply drew districts without race as the predominant interest . . . by drawing districts that comply with traditional good government districting criteria . . . and considered race only after we had drawn a map fully subject to the constraints of those factors." \({ }^{\prime 32}\) But when explaining the process that the Special Masters followed to draw historically Black Districts 3 and 4, a different picture emerges.

The Special Masters report their process for drawing District 3 by starting with an overarching assertion that the "Hampton Roads area presently contains one district that consistently elects the candidate of choice of the African-American population." \({ }^{33}\) The Special Masters then assert that they drew the new district lines specifically to comprise "the four major cities in the Hampton Roads area," without regard for the surrounding communities of interest. \({ }^{34}\) Next, the Special Masters report that the new urban-concentrated District 3 that they have created "left few options for the \(2^{\text {nd }}\) District," which now creates an odd ' \(J\) ' shape to include portions of the military community, the Eastern Shore, and then clumsily wraps inland. Nonetheless, the Special Masters did not then re-examine their District 3 lines or

\footnotetext{

This is called the 'least change' or 'minimal change' method, which assumes that if the current district map complied with the redistricting criteria during the previous census, then a new map will likely comply with only limited changes."). Martin v. Augusta-Richmond Cty., Ga., Comm'n, No. CV 112-058, 2012 WL 2339499, at *3 (S.D. Ga. June 19, 2012) ("Keeping the minimum change doctrine in mind, the Court only made the changes it deemed necessary to guarantee substantial equality and to honor traditional redistricting concerns."); Below v. Gardner, 148 N.H. 1, 963 A.2d 785, 794 (2002) ("[B]y using the existing senate districts, we are able to ensure, to the greatest extent practicable, that each senatorial district contains roughly the same constituents as the last validly enacted plan.").
\({ }^{31}\) Crumly v. Cobb Cty. Bd. of Elections \& Voter Registration, 892 F. Supp. 2d 1333, 1345 (N.D. Ga. 2012) ("In preparing the draft map, the Court began with the existing map drawn by Judge Carnes in 2002.").
\({ }^{32}\) Memo at 5 (emphases added).
\({ }^{33}\) Id. at 14.
\({ }^{34} \mathrm{Id}\).
}
look to the prior court-approved map for guidance; rather they remained committed to a District 3 that pulled in as much urban population as possible.

Next, and more overtly, the Special Masters report that they proceeded to draw District 4 to purposefully increase the BVAP. Dr. Grofman found in 2016 that a constitutionally drawn District 3 would result "virtually automatically" in a substantial minority population in District \(4 .{ }^{35}\) And yet, the Special Masters now report that their initial lines for District 4, which aimed to create a "compact district that included only Richmond City and Henrico/Chesterfield counties," left Black voters comprising "a little more than a third of the population. \({ }^{, 36}\) Without any further examination or explanation of voting trends across coalitions, and without regard to the court-approved existing District 4, the Special Masters simply drew the District anew, employing their own standard of "reasonably compact," to divide Henrico and Chesterfield counties in a manner that inflated the BVAP by 15 percentage points to 45.3 percent. \({ }^{37}\)

The result of the Special Masters' approach to Districts 3 and 4 leaves each with BVAP populations that exceed the percentages that have proved more than sufficient for Black voters to have an opportunity to elect their preferred candidates. Notably, the Special Masters' approach to these minority-opportunity districts stands in sharp contrast to their deference to "Virginia's lengthy tradition of placing a district in Southside Virginia" \({ }^{38}\) to create the \(73 \%\) white District \(5,{ }^{39}\) and the lamenting concern of the pre- and post-Civil War deference to the Blue Ridge and Appalachian communities of Districts 6 and \(9,{ }^{40}\) which are over \(86 \%\) and \(90 \%\) white, respectively. Such racially disparate mapdrawing cannot stand.

\section*{iii. The December 8 Map fails to respect communities of interest.}

Finally, the December 8 Map sharply divides communities of interest across the state, with the notable exception of providing special care to keep Virginia's Appalachian communities united. \({ }^{41}\) From Northern Virginia's metropolitan D.C. communities, to the military communities on the Eastern Shore, to the affinity between the Albemarle and Richmond's Western exurbs, the December 8 Map does little to unite Virginians of common interest under common representation. The overwhelming commentary from Virginians during the public hearing on December 15 before this Court supports the fact that Virginians want to keep their communities together, and the December 8 Map fails to do so. Citizen after citizen informed this Court that the western exurb communities of Richmond are inextricably linked by social, educational, environmental, and economic common interests. Others pleaded for central Virginia to retain its representation and identity in District 7. And several Virginians highlighted the stark disparities in interest between Loudoun County and counties to the south. This failure to keep together the communities in which Virginians live their lives and find their common voice is nonsensical, as well as noncompliant. This Court and the Special Masters can and must do better.

\section*{F. The Farkas Map accounts for Virginia's population changes while ensuring compliance with federal and Virginia law.}

Mr. Farkas submits the Farkas Map for consideration by the Special Masters and the Court. For the reasons explained below, the Farkas Map provides equally apportioned districts that are compact, share common community interests, and protect the voting power of Virginia's increasing racial and ethnic minority populations, consistent with all applicable laws and legal precedent. We submit that the Farkas Map achieves these goals more fully and consistently than the Special Masters' December 8 Map.

\section*{II. Legal Standards}

\section*{A. Population equality}

To ensure every voter has an equal voice in government, districts must be evenly apportioned by population. " \([A]\) bsolute population equality is the paramount objective," \({ }^{42}\) as the Constitution unequivocally requires that elections for the U.S. House of Representatives must be based upon population, first and foremost, such that "one man's vote in a congressional election is to be worth as much as another's." \({ }^{43}\) Under federal law, therefore, U.S. congressional districts must be as nearly equal in population as is practicable. \({ }^{44}\) Moreover, a court-ordered redistricting plan must conform to a higher standard of population equality than a redistricting plan created by a legislature, permitting only negligible variance. \({ }^{45}\) Likewise, the Virginia Constitution requires that redistricting maps "be so constituted as to give, as nearly as is practicable, representation in proportion to the population of the district." \({ }^{36}\)

\section*{B. Contiguity and Compactness}

The Virginia Constitution requires that every "electoral district shall be composed of contiguous and compact territory." \({ }^{47}\) A district is not contiguous if it is connected only by "water running downstream or upriver . . .." \({ }^{48}\) "[L]and masses separated by water may[] satisfy the contiguity requirement in certain circumstances. \({ }^{,{ }^{49} \text { To comply with the compactness requirement, districts must be }}\) drawn "employing one or more standard numerical measures of individual and average district compactness, both statewide and district by district. \({ }^{, 50}\) While ease of travel within a district may be considered when evaluating its compactness, it should not be the controlling factor. \({ }^{51}\)

\({ }^{51}\) Wilkins, 571 S.E.2d at 109.
}

\section*{C. Preservation of Communities of Interest}

Virginia law requires that districts "be drawn to preserve communities of interest," which are defined as "a neighborhood or any geographically defined group of people living in an area who share similar social, cultural, and economic interests." \({ }^{52}\) The U.S. Supreme Court has recognized that "maintaining communities of interest" constitutes a "traditional districting principle[]." \({ }^{53}\)

\section*{D. Protection of Racial and Ethnic Minority Groups}

Both federal and Virginia state law protect the political rights of racial and ethnic minorities in the map-drawing process.

\section*{i. Federal law}

The Equal Protection Clause of the Fourteenth Amendment protects against the drawing of districts that "rationally cannot be understood as anything other than an effort to segregate citizens into separate voting districts on the basis of race without sufficient justification.. \({ }^{54}\) Courts apply a two-step analysis to racial gerrymandering claims. First, courts ask whether "race was the predominant factor motivating the legislature's decision to place a significant number of voters within or without a particular district." 55 "Second, if racial considerations predominated over others, the design of the district must withstand strict scrutiny." \({ }^{56}\) The burden shifts to the map-drawer "to prove that its race-based sorting of voters serves a 'compelling interest' and is 'narrowly tailored' to that end." \({ }^{57}\)

Separately, Section 2 of the Voting Rights Act prohibits any "standard, practice, or procedure" that "results in a denial or abridgement of the right . . . to vote on account of race." \({ }^{58}\) Section 2 protects against "vote dilution" brought about by the "dispersal of [a group's members] into districts in which they constitute an ineffective minority of voters." \({ }^{59}\) If a map-drawer invokes the Voting Rights Act to justify race-based districting, "it must show that it had 'a strong basis in evidence' for concluding that the statute required its action." \({ }^{60}\)

An "effective minority district" is generally understood as one that "contains sufficient population to provide the minority community with an opportunity to elect a candidate of its choice." \({ }^{" 1}\)

}

\section*{ii. State law}

The Virginia Constitution requires that redistricting occur "in accordance with the requirements of federal and state laws that address racial and ethnic fairness." \({ }^{.62}\) The Constitution further requires that "[d]istricts shall provide, where practicable, opportunities for racial and ethnic communities to elect candidates of their choice." \({ }^{, 63}\) Virginia also recently adopted a provision modeled after Section 2 of the federal Voting Rights Act, the Virginia Voting Rights Act, prohibiting maps containing districts that result in a denial or abridgment of "the right of any citizen to vote on account of race or color or membership in a language minority group" or "to elect representatives of their choice." \({ }^{64}\) A district map violates this provision if, "on the basis of the totality of the circumstances, it is shown that districts were drawn in such a way that members of a racial or language minority group are dispersed into districts in which they constitute an ineffective minority of voters or are concentrated into districts where they constitute an excessive majority." \({ }^{65}\) Furthermore, "[d]istricts shall be drawn to give racial and language minorities an equal opportunity to participate in the political process and shall not dilute or diminish their ability to elect candidates of choice either alone or in coalition with others." \({ }^{.66}\)

\section*{E. Political Fairness}

Virginia law prohibits maps that, "when considered on a statewide basis, unduly favor or disfavor any political party." \({ }^{67}\) This provision has not yet been interpreted by a Virginia court.

\section*{III. The Farkas Map Satisfies all Legal Requirements and Ensures Fair Representation for Virginians.}

\section*{A. Overview}

The Farkas Map takes the existing congressional map as its starting point but improves upon it in nearly all respects in a way that is more consistently compliant with the legal principles articulated above than the December 8 Map. It satisfies population equality requirements, increases district compactness, preserves communities of interest, and protects the voting strength of minority groups.

\footnotetext{

\({ }^{67} I d . \S 24.2-304.04(8)\).
}

Figure 1: Farkas Map

In the northern Virginia region, the Farkas Map places the entirety of District 11 within Fairfax County, thereby creating a more compact district with a cohesive community. The map also improves the compactness of District 10, which previously ran from the Capital Beltway to the West Virginia border, by instead anchoring it in the suburban Washington, D.C. area. In central and southwestern Virginia, the Farkas Map unites Charlottesville and the surrounding Albemarle County with the suburbs surrounding Richmond in District 7. This change unites communities of interest while also improving the compactness of District 5. The map also addresses population loss in District 9 by moving Roanoke into that district. And finally, in southeastern Virginia, the Farkas Map ensures that Black communities in Districts 3 and 4 maintain their voting strength, consistent with Dr. Grofman's remedial map and the findings of a Virginia federal court in our client's case, the Page litigation. The map also keeps the military community in District 2 whole by anchoring the district in Norfolk and including Virginia Beach City and Chesapeake City within it.

\section*{B. The Farkas Map satisfies traditional redistricting criteria, improving upon the current plan.}
i. The Farkas Map meets population equality requirements.

The Farkas Map creates districts of equal population. Six of the districts under the Farkas Map are exactly equal to the ideal population. The other five districts vary only by a single person. By stark contrast, the December 8 Map varies widely from district to district, assuring that the voice of voters in some districts, such as District 10, will carry less weight than voters in others, such as District 6.

\hline
\end{tabular}
U.S. congressional districts must be as nearly equal in population as is practicable. \({ }^{68}\) Indeed, the Supreme Court has declared that "[a] court-ordered plan should 'ordinarily achieve the goal of population equality with little more than de minimis variation." \({ }^{39}\) The federal court that approved remedial Virginia districts in the Page litigation strictly adhered to this requirement, as did Special Master Grofman when submitting his proposal to that court. \({ }^{70}\) Not only does the December 8 Map abandon Virginia's history of strict adherence to this principle, but, as is apparent from the near perfect equality achieved by the Farkas Map, the December 8 Map does not even achieve population equality as closely as is practicable. Far from it. This failure would subject the December 8 Map to an exacting standard upon review.
"With a court plan, any deviation from approximate population equality must be supported by enunciation of historically significant state policy or unique features." \({ }^{71}\) The Special Masters report that they "worked diligently to ensure that the congressional districts were reasonably close to equipopulous," \({ }^{72}\) but this is simply not the appropriate legal standard. The Special Masters make no mention of what, if any, historically significant state policy or unique features support these deviations in population.

Indeed, the December 8 Map cannot even survive the less exacting standard applied to districts drawn by state legislatures. The U.S. Supreme Court permits some flexibility to state legislatures to achieve exact population equity, requiring that a state "justify population differences between districts

\footnotetext{
\({ }^{68}\) Id.; see also Roman v. Sincock, 377 U.S. 695, 710 (1964) (same for state legislature districts).
\({ }^{69}\) Abrams, 521 U.S. at \(98-9\) (deeming a court-drawn map with a deviation of \(0.35 \%\) permissible due to the fact that the court-"in detail"-reviewed and accounted for specific historic preferences and unique features that demanded such a deviation).
\({ }^{70}\) Personhuballah Rep. at 11 ("Since the present map and all of the maps offered in briefs submitted . . . were either exactly at ideal district size . . or plus or minus one person, the illustrative maps I have offered to the Court also provide this level of strict population equality.").
\({ }^{71}\) Chapman, 420 U.S. at 26.
\({ }^{72}\) Memo at 3 (emphasis added).
}
that could have been avoided by a good-faith effort to achieve absolute equality. \({ }^{, 73}\) In such instances, courts should consider "the size of the deviations, the importance of the State's interests, the consistency with which the plan as a whole reflects those interests, and the availability of alternatives that might substantially vindicate those interests yet approximate population equality more closely." \({ }^{74}\) Here, there is an available alternative-the Farkas Map-that, as explained further below, substantially vindicates the other interests this Court must consider.

\section*{ii. The Farkas Map creates more compact, contiguous districts.}

The Farkas Map creates more contiguous and compact congressional districts than the current map provides. These improvements are evidenced by both improved mathematical compactness scores as well as comparison with the naked eye.

Virginia courts have relied upon two leading mathematical methodologies for measuring district compactness: the Reock method and the Polsby-Popper method. \({ }^{75}\) The Reock score "compares the area of a district to the area of the small circle that can be drawn around the district." \({ }^{76}\) The Polsby-Popper score "compares the area of a district to the area of a circle with the same perimeter." \({ }^{77}\) Both methods produce a score between 0 and 1 , with 1 being most compact. \({ }^{78}\) Thus, if a score increases from one map to another, that indicates an increase in compactness. The Farkas Map increases the statewide average Reock score over the current map-one that the federal district court already found adhered to principles of compactness \({ }^{79}\)-by over 20 percent and increases the statewide Polsby-Popper score by over 47 percent. The Farkas Map is thus even more compact on average than the current map adopted by a threejudge court.

\footnotetext{

\({ }^{74} \mathrm{Id}\). at 760 .
\({ }^{75}\) See, e.g., Bethune-Hill v. Va. State Bd. of Elections, 141 F. Supp. 3d 505, 535 (E.D. Va. 2015), aff'd in part, vacated in part, \(137 \mathrm{~S} . \mathrm{Ct} .788\) (2017) (discussing relative attributes of both the Reock and Polsby-Popper methods). The Special Masters report in their December 7 memorandum to the Court that they have utilized a third measure-"Dave's Redistricting App"-without explanation as to how this source calculates its scores or what the range of available scoring is. We are aware of no instance of a Virginia court, or any court for that matter, approving of "Dave's Redistricting App" as a reliable source with which to measure compactness. Quite the opposite: the Southern District of Ohio previously declined to credit maps that were drawn using Dave's Redistricting App, determining that "testimony that the application allows for the manipulation of districts [and] failure to establish the parameters . . . used to produce the maps is problematic" and ultimately that the evidence "is insufficient to establish the reliability of the methodology used to create the maps." \({ }^{79}\) Personhuballah, 155 F. Supp. 3d at 562, ("[Dr. Grofman's map] also vastly improves the Third District's compactness score and meaningfully improves the Plan's average compactness scores across all the affected districts.").
}

The same is true when evaluating compactness of the individual districts. In the vast majority of instances, the Farkas districts are more compact than the existing map whether measured by the Reock or Polsby-Popper methods.
\begin{tabular}{|l|l|l|l|l|}

\hline
\end{tabular}

These metrics confirm what is observable with the naked eye, particularly with respect to the northern Virginia region. Between Districts 8,10 , and 11 alone, the population increased by nearly 300,000 Virginians, which accounts for almost 50 percent of Virginia's overall growth since 2010. This growth necessitates more compact boundaries. The existing Districts 8,10 , and 11 -intentionally left untouched in Dr. Grofman's 2016 remedial map-currently sprawl across seven counties and five independent cities, collectively. The Farkas Map, by contrast, reduces this spread to just four counties and four independent cities. \({ }^{80}\) Specifically, while the existing District 11 winds from northern Fairfax County down to southeastern Prince William County, the Farkas Map keeps all of District 11 within Fairfax County's borders, giving it a much more compact shape with sensible boundaries. Similarly, while the existing District 10 runs from the Capital Beltway to the West Virginia border, across five counties and three independent cities, the Farkas Map reduces District 10 to three counties and two independent cities, concentrated in the suburban Washington, D.C. area. \({ }^{81}\) These changes improve upon traditional districting criteria to provide less sprawling and more sensible districts.

\footnotetext{
\({ }^{80}\) See App., fig. 2.
\({ }^{81}\) The Farkas Map leaves District 8 largely the same, with a nearly 90 percent overlap with the current District boundaries, given that District 8 saw only modest population gains. The Farkas Map does, however, significantly reduce the jigsaw nature of the current boundary line District 8 shares with District 11. See id.
}

Figure 2: Northern Virginia

Unlike the December 8 Map, the Farkas Map achieves increased compactness without sacrificing other critical considerations like population equality and preservation of communities of interest. Indeed, the Farkas Map and December 8 Map achieve comparable average Reock scores that are just 0.02 points apart. \({ }^{82}\) District-by-district, the Farkas Map outperforms the December 8 Map on Reock scores in six of the eleven districts. \({ }^{83}\)

\section*{iii. The Farkas Map reunites and preserves communities of interest.}

The Farkas Map reunites communities of interest that were torn apart by the General Assembly in the previous congressional map and which are similarly divided in the December 8 Map. The current map, using 2010 Census geographies, split 14 counties, 37 census-designated places, and 22 voter tabulation districts. The Farkas Map, using 2020 Census geographies, splits only ten counties, 25 censusdesignated places, and 14 voter tabulation districts. These political subdivisions represent common interests and ought to be kept whole to the extent possible. \({ }^{84}\)

\footnotetext{
\({ }^{82}\) The December 8 Map has an average Reock score of 0.383 , according to Princeton University's Gerrymandering Project. Princeton Gerrymandering Project, https://gerrymander.princeton.edu/redistricting-report-card?planId=recOUnE4ZKjEyaVyJ (last visited December 11, 2021).
\({ }^{83}\) Compare supra p. 13 with Memo at 18.
\({ }^{84}\) Miller, 515 U.S. at 916, 919-20.
}

Region by region, the Farkas Map responds to concerns raised by Virginians during both the Virginia Redistricting Commission's tenure \({ }^{85}\) and this Court's process. \({ }^{86}\) For example, numerous commenters emphasized that Charlottesville, home to the University of Virginia, and its surrounding Albemarle County have more in common with suburban Richmond County than the rural mountain areas in District 5. One Charlottesville resident urged this Court to "consider the cohesion of metropolitan areas" and to not "combine Albemarle County with a Congressional district in the Shenandoah Valley." 87 Another explained that the current District 5 "lumps [voters] into a New Jersey-sized monolith, meaning we have no common interests . . . with other parts of the district . . . ." \({ }^{88}\) Yet another commented that Albemarle has "no cultural, economic, or community connections" with the western portion of the state, but instead is "closely intertwined" with Richmond to the east. \({ }^{89}\) Numerous government metrics affirm this point. For example, the Metropolitan Planning Organization for Richmond-a regional divide utilized by both the Virginia Department of Transportation and the U.S. Department of Transportationincludes the regions to the West of Richmond stretching toward Charlottesville, including Goochland and Powhatan. \({ }^{90}\) The regions are also clearly linked by the I-64 corridor running East-West between the two metropolitan areas.

The December 8 Map, in contrast, exacerbates the splits problem by even further breaking up the Charlottesville and Albemarle County community of interest. The December 8 Map cleaves Albemarle County in half, splitting it between the Fifth District (extending all the way to Virginia's Southern border) and Tenth District (extending all the way to Virginia's Northern border). This does not improve on the currently existing map; it makes it worse. Indeed, in the days following the release of the December 8 Map, several Virginians have expressed concern about the split representation of Charlottesville and Albemarle County. \({ }^{91}\)

The Farkas Map addresses this issue, moving Charlottesville and Albemarle County to District 7 in order to unite it with the Richmond suburbs. This change also improves the compactness of District 5, which in its current form stretches all the way from Virginia's southern border, through Charlottesville, up to the edge of the Washington, D.C. metro area. In the Farkas Map, District 5 is anchored in the southcentral region of the state. It unites Martinsville and its suburbs, which are currently separated across two districts, and it also includes Lynchburg and its surrounding counties. Further west, the map addresses population loss in District 9 by moving Roanoke into the district. This change unites Roanoke and Salem, neighboring cities that were previously placed in separate districts.

Figure 3: Central Virginia

In the northern Virginia region, the Farkas Map unites communities in the Washington, D.C. metropolitan and suburban areas. These communities share similar social, cultural, and economic interests, as they house the metropolitan D.C. workforce. The Farkas Map recognizes this reality and ensures that Districts 8, 10, and 11 are focused in metropolitan and suburban Northern Virginia. This greatly improves upon the current map, which, for example, currently includes a northern district (District 10) that stretches all the way to the West Virginia border, tying the D.C. suburbs with rural communities that do not share common interests. The Farkas Map reduces District 10 to predominantly Loudon and Prince William counties, tracing the expanding D.C. suburban area and reducing county splits. By contrast, the December 8 Map carves Loudoun County out of the metropolitan D.C. districts, separating it from neighboring Fairfax County communities along Route 7 as well as from neighboring Prince William County. The splitting of communities that serve the Dulles Technology Corridor defies logic because they are all inextricably tied by common interests to the greater D.C. area. Indeed, recognizing the links of these communities to each other and D.C., the U.S. Department of Transportation has worked with local authorities to expand Metrorail service on the new Silver Line to Washington Dulles

International Airport and further west into Loudoun County in a project dubbed the "Dulles Corridor Metrorail Project. \({ }^{92}\)

In southeastern Virginia, the Farkas Map ensures that the community of veterans and active-duty military in and around Norfolk is kept whole by anchoring District 2 in that county and by including Virginia Beach City and Chesapeake City in the same district. This is not the case with the December 8 Map, which unnecessarily divides these closely linked military communities between Districts 2 and 3 . The populations of Norfolk and Virginia Beach share common federal and environmental concerns, and together form the socio-economic backbone of the Hampton Roads region; they should not be divided. As one commenter to this Court explained, "Norfolk and Virginia Beach are tied to the Norfolk Naval Base with all the active duty and veterans who reside here. . . . Please consider a Norfolk/VB district for [District 2]." \({ }^{93}\) Instead, the December 8 Map lumps Virginia Beach with Isle of Wight and Suffolk, despite those communities having more in common with Portsmouth than Virginia Beach.

Figure 4: Hampton Roads

For all these reasons, the Farkas Map thus reflects and significantly improves upon the preservation of communities of interest across the Commonwealth. The memorandum accompanying the December 8 Map expressed great solicitude for defining and maintaining communities of interest along
92 See U.S. Dep't of Transp., Dulles Corridor Metrorail Project, https://www.transportation.gov/buildamerica/projects/dulles-corridor-metrorail-project (last visited Dec. 11, 2021); see also Dulles Corridor Metrorail Project, Silver Line Stations, https://www.dullesmetro.com/silver-line\({ }_{93}\) stations/ (last visited Dec. 11, 2021).
\({ }^{93}\) Va. Sup. Ct. Comments at 166 (comment of Charles F. Stanton, Nov. 10, 2021).
the Blue Ridge and in Appalachia, which are predominantly white, rural communities. \({ }^{94}\) Similar care ought to be applied to preserving the communities described above, which are in many instances more diverse, urban and suburban communities. The Farkas Map fully accounts for those communities that the December 8 Map neglects.

\section*{iv. The Farkas Map protects racial and ethnic minority groups.}

The Court should ensure that the failures of the General Assembly, which required years of federal litigation to remedy, are not repeated this redistricting cycle. The Court should be guided by race-neutral districting principles and reject any map that unjustifiably overpacks Black voters within districts. This approach does not require significantly altering the Black voting age population in either of Virginia's effective minority districts, Districts 3 and 4, where Black voters have been able to elect their candidates of choice under the current congressional map. \({ }^{95}\)

The Special Masters' memorandum suggests that their first and predominant consideration in the Greater Richmond and Hampton Roads areas was race, resulting in an unjustifiable increase of the BVAP percentages in the effective minority districts in those areas. The Special Masters claim that they "considered race only after [they] had drawn a map fully subject to the constraints of [the] traditional" redistricting principles. \({ }^{96}\) But the district-specific descriptions tell another story. In discussing the Richmond and Southside regions, the Special Masters explain that they initially created "a compact district that included only Richmond City and Henrico/Chesterfield counties. \({ }^{997}\) However, the mapdrawers then observed that Black Virginians "would total a little more than a third of the population" of the district, and so altered the map. \({ }^{98}\) The map-drawers split both Henrico and Chesterfield Counties, in order to construct a district with a Black CVAP of \(45.3 \%\), higher than the \(40 \%\) Black CVAP in the current District \(4 .{ }^{99}\) The only justification they gave was that the high-BVAP district would "likely continue to elect the African-American population's candidate of choice. \({ }^{100}\) The Special Masters provided no analysis that would justify this assumption. Similarly, the Special Masters' rationale for drawing District 3 in the Hampton Roads area appears limited to ensure ability-to-elect by including as many urban areas as possible, without providing any justification that such an approach was necessary. \({ }^{101}\)

\footnotetext{

\({ }^{98}\) Id.
\({ }^{99}\) Id.
\({ }^{100} \mathrm{Id}\).
\({ }^{101} I d\).
}

Figure 5: Greater Richmond

The Farkas Map, in contrast, was drawn in accordance with race-neutral districting principles and still maintains the voting strength of Virginia's Black communities. As explained above, the Farkas Map ensures population equality, creates compact districts, and preserves communities of interest. Doing so results in a map that includes two effective minority districts and does not dilute minority voting strength.

The Farkas Map unites all of Norfolk and Virginia Beach into District 2 and all of Hampton in District 3. In so doing, the Farkas Map decreases the BVAP in District 3 from 47 percent to 41.9 percent, resembling the demographics and configuration of the remedial map proposed by Dr. Grofman in 2016 and adopted by a federal court while retaining the same general configuration and location. \({ }^{102}\) District 3 thus remains an effective minority district in which Black voters may continue to influence election outcomes in coalition with others. \({ }^{103}\) In the current configuration of District 3, Representative Scott won over 66 percent of the vote in 2016, over 91 percent in 2018, and over 68 percent in 2020. \({ }^{104}\)

The BVAP of District 4 rises only nominally to 40.1 percent in the Farkas Map from 39.7 percent in the current map while better adhering to traditional districting principles. Specifically, the Farkas Map removes the irregular arm of Suffolk and Chesapeake counties from District 4 and places them in a more

\footnotetext{
\({ }^{102}\) Personhuballah, 155 F. Supp. 3d at 565 (noting BVAP of 45.3 percent in District 3 and 40.9 percent in District 4 at time of adoption of existing maps in 2016).
\({ }^{103}\) See Bartlett v. Strickland, 556 U.S. 1, 13 (2009) (describing an effective minority district as one in which the minority population does not make up a majority of the voting-age population but "at least potentially . . . is large enough to elect the candidate of its choice with help from voters who are members of the majority and who cross over to support the minority's preferred candidate.") (plurality opinion).
104 Ballotpedia, Virginia's 3rd Congressional District, (last visited Oct. 20, 2021), https://ballotpedia.org/Virginia\%27s_3rd_Congressional_District.
}
contiguous and compact manner in District 3. District 4 of the Farkas Map also keeps Franklin City with neighboring Southampton.

While the Farkas Map hews closely to the versions of these minority-opportunity districts approved by the federal court in 2016, the Special Masters' December 8 map packs a greater percentage of Black voters into each district, particularly District 4.
\begin{tabular}{|l|c|c|c|c|}
\hline & \begin{tabular}{c} 
Enacted Map \\
BVAP (At \\
Adoption)
\end{tabular} & \begin{tabular}{c}

\end{tabular} & \begin{tabular}{c} 
Farkas Map \\
BVAP
\end{tabular} & \begin{tabular}{c} 
December 8 \\
Map BVAP
\end{tabular} \\
\hline District 3 & \(45.3 \%\) & \(47.2 \%\) & \(41.9 \%\) & \(44.5 \%\) \\
\hline District 4 & \(40.9 \%\) & \(39.7 \%\) & \(40.1 \%\) & \(45.3 \%\) \\
\hline
\end{tabular}

Dr. Grofman's 2016 analysis of the maps he proposed to the district court demonstrate that the higher percentages are not necessary to achieve adherence to legal standards. The 2016 percentages created "a realistic opportunity [for a Democratic candidate of choice] to win election in CD3 due to cohesive voting from within the African-American community and cross-over voting from non-black Democrats." \({ }^{105}\) The changes to BVAP proposed in the December 8 Map-taken together with the failure to abide by other principles such as population equality and not dividing communities of interest-raises significant concern that Black voters are being improperly packed into these two districts.

The changes made in the Farkas Map abide by all federal and state law imperatives while having the effect of preserving the opportunity of minority voters to elect candidates of their choice in coalition with others. The Farkas Map thus comports with the principles of Dr. Grofman's 2016 maps that remedied the unconstitutional gerrymander of the Virginia legislature following the 2010 census.

\section*{v. The Farkas Map does not unduly favor any political party.}

The Farkas Map offers a blueprint for fair, representative redistricting that properly and fully accounts for all legal requirements without unduly favoring any one political party over another. The Farkas Map ameliorates the partisan bias of the December 8 Map and existing map-both with a score of approximately -9.7 percent-to just -0.6 percent based on the turnout from the 2020 presidential race. \({ }^{106}\)

\section*{vi. The December 8 Map ignores important impacts on incumbents.}

The U.S. Supreme Court has held that states have a legitimate interest in preserving the constituencies of congressional incumbents. \({ }^{107}\) The Special Masters have reported that they created the December 8 Map without any knowledge as to "which incumbents have been placed in [congressional]

\footnotetext{
\({ }^{105}\) Personhuballah Rep. at 47.
\({ }^{106}\) Partisan bias is the difference between each party's seat share and \(50 \%\) in a hypothetical, perfectly tied election. Thus, the closer the partisan bias is to 0 , the lower the map's skew toward one party or the other. A negative partisan bias score indicates bias in favor of the Republican Party, while a positive partisan bias score indicates bias in favor of the Democratic Party.
\({ }^{107}\) White v. Weiser, 412 U.S. 783, 797 (1973).
}
districts with other incumbents." \({ }^{108}\) But they and this Court should be aware that the three incumbents whom the December 8 Map most threatens are the only three women in Virginia's delegation. Indeed, some of the most problematic changes that the December 8 Map seeks to make are precisely the changes that could lead to Virginia not having a single female incumbent. The December 8 Map's complete uprooting of District 7 can have only one effect on Representative Abigail Spanberger's tenure in Congress, whether one knows the precise town in which she currently resides or not. Likewise, detaching District 10 from the Washington D.C. metropolitan area to incorporate rural communities to the south threatens Representative Jennifer Wexton's position, without solving the problem of District 10's sprawling geographic reach. Finally, splitting the military communities in Norfolk and Virginia Beach directly threatens the incumbency of Representative Elaine Luria, who is well-known for her military service and connection with that community. Representative Luria is also double-bunked with Representative Scott, one of the delegation's only two Black members and the longest serving incumbent in the state.

Thus, the threat that the December 8 Map poses to the female and minority members-and only those members-of Virginia's delegation is apparent without detailed knowledge of each incumbent's residential address. As many Virginians explained to this Court during the December 15 public hearing, to turn a blind eye to such a result is hardly in the interest of Virginians.

\section*{vii. Nesting is not applicable to congressional maps.}

The December 8 Map was drawn to "carve[] . . Senate districts out of U.S. House districts" "to the extent practicable." \({ }^{109}\) The accompanying report acknowledged that this practice, known as "nesting," is not required by Virginia law, nor is it required by federal law. \({ }^{110}\) Moreover, if nesting is applied in redistricting at all, it is typically used when drawing state legislative districts, rather than congressional districts, which are much larger and often to do not correspond neatly to the number of state legislative districts. \({ }^{111}\) It is unclear how application of this non-statutory principle served to constrain or guide the Special Masters' drawing of the congressional districts, specifically. It is clear, however, that the Special Masters report that they employed nesting to keep communities of interest together despite previously acknowledging that they are not fully apprised of the communities of interest that exist in Virginia. \({ }^{112}\) As discussed above, the December 8 Map unnecessarily fractures multiple important communities of interest across the Commonwealth at the congressional district level. The Special Masters' application of nesting thus serves only to replicate this noncompliance across all maps. Indeed, there does not appear to be a principled basis for the December 8 Map's adoption of certain non-statutory criteria, such as nesting, and rejection of others, such as incumbency.

\footnotetext{
\({ }^{108}\) Memo at 10.
\({ }^{109}\) Id.
\({ }^{110}\) See id.
\({ }^{111}\) See Ballotpedia, Nesting, https://ballotpedia.org/Nesting (last visited December 11, 2021) (discussing nesting in the context of state legislative districts only); see also Bethune-Hill v. Va. State Bd. of Elections, 141 F. Supp. 3d 505, 538 (E.D. Va. 2015), aff'd in part and vacated in part, 137 S. Ct. 788 (2017) (discussing nesting in the context of state legislative districts); Davis v. Bandemer, 478 U.S. 109, 179 n. 18 (1986), abrogated in part on other grounds by Rucho v. Common Cause, 139 S. Ct. 2484 (2019) (J. Powell, concurring in part) (same).
\({ }^{112}\) Compare Memo at 7 (acknowledging lack of awareness of all applicable communities of interest) with Memo at 10 (reporting that nesting was used to align communities of interest under common representation).
}

\section*{IV. Conclusion}

This Court, with the help of the Special Masters, now has the duty to draw congressional districts that will govern elections over the next ten years. The Farkas Map offers fair, representative congressional districts that are fully compliant with federal and Virginia law. It apportions Virginia's population equitably; improves upon traditional districting metrics of contiguity, compactness, and political subdivision splits; and preserves and reunites long-split communities of interest. In so doing, it ensures that Virginia's growing racial and ethnic minority communities, which have been the main drivers behind Virginia's population growth, retain their opportunity to elect candidates of their choice in coalition with others, without diluting their voting strength by packing them within certain districts

Any map adopted by the Court must contend with these important considerations and requirements in order to comply with the law and the will of Virginia voters. Accordingly, Mr. Farkas respectfully requests that the Special Masters and ultimately the Court adopt the Farkas Map for Virginia's congressional districts.

\section*{FIGURE 5}

Greater Richmond

Good Afternoon Honorable Chief Justice and Justices of the Supreme Court, Court Clerks and Special Masters, Dr. Grofman and Mr. Trende. My name is Tina Winkler and I reside in Goochland County. I am here to address the issue of the lack of Central VA representation in the Congressional Map.

Goochland is a community of interest in Central VA represented by the current VA 07 Congressional District. It is imperative that Goochland remain with Henrico and Chesterfield counties. We are inextricably linked by social, economic, cultural and regional ties. One of the things that the special masters noted in their summary was their point of using Virginia's regional geography in mapping the congressional districts. If that is indeed the case, then it should be apparent that the Capital region is in the Piedmont and not Coastal VA region. I would encourage the special masters to look at the VA Redistricting Commission Map B5 that has Central VA running along 1-64 from Henrico to Charlottesville. B-5 map fairly groups Goochland with its central Virginia neighbors, sharing cultural and economic ties to Richmond suburbs as well as the Rt 64 corridor to Charlottesville. In addition, these district jurisdictions share the middle James River watershed, an economic and ecological resource.

The way the new CD1 map is drawn is not compact and not represent Goochland's community of interest. We do not have anything in common with the Northern Neck or Coastal VA. If you look at VDOT's Map 9, it illustrates Central VA as Goochland, Henrico, Chesterfield, Powhatan, Amelia, Louisa. On the Virginia.org website, Central VA includes the Capital Region. We need a Congressional District that includes these localities. Goochland and the greater Richmond area does not even share the same media market as the rest of the new CD 1 . I urge the special masters to re-examine the greater Richmond area and make sure we have representation that meets our unique needs in the Capital region.

To further illustrate my point, Goochland is included in the metro Richmond/Henrico/Chesterfield area for several cooperatives: Capital Region Land Conservancy, Central Virginia Waste Management Authority (CVWMA), Commodity Agriculture Training and Research, Henrico Regional Water Reclamation Facility, Henrico Water Treatment Facility and Regional Utilities Committee amongst others.

Furthermore, the transportation infrastructure of Route 288 also links Goochland to Henrico, Powhatan and Chesterfield. People that live in Goochland, work and play in Henrico and Chesterfield.

To split the present VA07 into 4 new Congressional districts does not make sense with regards to communities of interest outlined above. Packing Goochland, Louisa, Fluvanna and Western Henrico into a district that stretches from the depths of the Piedmont all the way to the outskirts of Hampton Roads leaves all of these communities without an advocate in Congress. Richmond, a midsized metro area, more than deserves its own district and Goochland needs to be included.

Regarding the House of Delegates map, I am extremely disappointed that Goochland is once again split in two with the precinct that is predominantly Black in the larger HoD 56 that stretches down to Cumberland thereby diluting their voice. I am also confused by the way the dividing line was drawn and what criteria was used to make that line. Interstate 64 and Route 6 unites Goochland and Goochland should be kept together in the HoD District as a community of interest.

To whom it may concern:
As a public employee who lives and works in Williamsburg and James City County, I'm concerned about the separation of Williamsburg from the communities it has historically and currently belongs to in the proposed redistricting maps. Williamsburg is part of Hampton Roads, and Williamsburg and lower James City County are functionally one community. Please return Williamsburg to the 69th district.

Sincerely,
Sara Meldrum

\section*{RE: Public Comment on proposed redistricting}

To Whom It May Concern:
Please accept this letter as public comment for the consideration of the Court concerning the redistricting maps proposed by the Court's Special Masters. I write in my personal capacity and in my capacity as Commonwealth's Attorney for Wise County and the City of Norton.

The Senate and House maps for far Southwest Virginia have clean lines, keep localities and communities of interest together to the greatest extent possible, and overall are more representative of our regional identity.

I am especially glad to see my jurisdiction wholly contained in one Senate District (the 6th) and one House District (the 45th). Wise County and the City of Norton are a tight-knit community, with a combined population of less than 40,000 residents. Notwithstanding, we are currently split between two state senate districts and two house districts. We love all of our legislators and the opportunity to work with them, but it just makes sense to unite this community of interest as shown in the draft maps currently before the Court.

Beyond my immediate jurisdiction, I am pleased that the maps reflect important economic ties between certain localities for the 6th and 45 th districts. For example, consider that we recently had a regional economic development announcement in the City of Norton that will create hundreds of jobs for Southwest Virginia. The new project was made possible because of regional collaboration and, specifically, through the formation of the Lonesome Pine RIFA (which benefits Dickenson, Lee, Scott, Wise, and Norton).

To illustrate further, consider that Wise, Lee, Scott and Norton are part of one 30th judicial circuit. Each of these jurisdictions are served by the same 30th judicial circuit drug court. We share a 30th judicial circuit multijurisdictional grand jury. We share a regional jail facility. We have common economic ties. Further, these localities are each served by Mountain Empire Community College and the University of Virginia's College at Wise.

RE: Public Comment on proposed redistricting
December 16, 2021
Page two

While I am pleased that the state legislative districts in far Southwest Virginia keep localities and communities of interest together to the greatest extent possible, it is my hope that the proposed district map for the 9th congressional district is reconsidered. The citizens of far southwestern Virginia share a common regional identity and close economic ties. It is for that reason that I am concerned and disappointed that the City of Salem and Craig County were both removed from the 9th District under the new maps. It is my respectful request that the historic, economic, cultural, and geographic interests of central Appalachia be unified in the "fighting 9th" and that it extends west of the Blue Ridge from Salem to the Cumberland Gap.

Thank you for your time and attention to this matter.

My name is Willian Dishon and I am an Instrumentation Technician. I live in Snowville and I am writing to offer public comment on the proposed redistricting map of the 9th Congressional District. I respectfully urge you to consider redrawing the map to include Salem in the 9th district. I have family members who reside in almost every corner of Southwest Virginia, from Lee County to Roanoke. I have traveled interstate 81 extensively and contributed professionally and financially to the economy of southwest Virginia. It is with this in mind that I write to offer my firm belief that Salem should be part of the 9th district. It just makes sense for it to be included in the district that also includes my home of Pulaski.

Sincerely,
William Dishon
Snowville Va
Pulaski Co.

I am a lifelong resident of Southwest Virginia. As you know, the 9th congressional district covers a very large geographic area, but the region as a whole and its culture is unique. Covered by mountains and the history of settlement of Virginia's frontier, the people are strong and independent, hardworking and proud. We are a community of interest that spans from Roanoke west to the Cumberland Gap. For that reason, I urge the Supreme Court to consider keeping Salem in the 9th district and keeping the 9th district as small (geographically) as possible. Do not attempt to expand it to the east into areas that are not historically, demographically, geographically, and economically tied to far southwest.

Sincerely,
Adrian Hall
Pulaski County, Virginia

Members of the Supreme Court and Special Masters,
I encourage you to consider drawing a House of Delegates district that encompasses both the cities of Danville and Martinsville. It is possible to create a district with both cities where the black vs white population is within single digits of each other. This would give minority voters a voice that they have not previously had. Danville and Martinsville are already intertwined via their economies and their residents. The district would be easily accessible to its delegate as the cities are linked by Route 58. As the two cities recover after decades of population loss and economic decline, it would be ideal for both to be represented by a single delegate who can deliver what is needed for their residents and help redefine southern Virginia.

Thank you, Brady Walker

Hello Special Masters,
I write all this as a lifelong resident of Virginia, born and educated in Fauquier County (specifically Warrenton), raised in Rappahannock County, and currently living in Arlington. I also have family connections to Charlottesville and Southeastern Virginia (specifically Portsmouth). I say all this to explain my experience in the state (and my biases).

I first want to say thank you for the work you have done. I was a big supporter of Amendment One that created the bipartisan redistricting commission and was very disappointed when the group failed to do its task. After reviewing your maps and the memo you wrote to the Virginia Supreme Court, I am convinced that you created them to the best of your abilities in accordance with the laws and what works best for the communities involved. At the very least, they are far better than the current gerrymandered ones we have now. That being said, I have a few comments for each one:
- US Congressional Map
o You mentioned in your memo that you wanted to be mindful of drawing the \(6^{\text {th }}\) and \(9^{\text {th }}\) districts (along with their corresponding Senate and House districts) in accordance to where they were located along the Blue Ridge Mountains. This was very smart and I generally approve (others might object to the specifics, but there is a limit to what you can do with the population loss in those regions).
o While this was the low hanging fruit in the process, you did the right thing by splitting up the ridiculously gerrymandered \(5^{\text {th }}\) district (and I say that as someone whose childhood lay mostly in that district). Most of the controversy around this seems to lie in the splitting of Albemarle County. Perhaps this can be remedied by giving the rest of the county to the new \(5^{\text {th }}\) district, then making up the difference by taking a small piece of the liberal-leaning \(4^{\text {th }}\) district and giving it to the \(5^{\text {th }}\) to avoid making it too titled to the right politically (since northern Albemarle tends to be more conservative than Charlottesville).
o I understand other people's concerns about the \(10^{\text {th }}\) district being anchored in Loudoun County (where my late father grew up - specifically Middleburg). However, after reviewing the matter, I cannot come up with a viable alternative; they would involve non-compact districts, splitting up more counties and/or causing a negative ripple effect for the other neighboring districts (including giving over all of Albemarle). I would also say that, while Loudoun may have differences from its southern neighbors in terms of politics and culture, those differences are less stark than those neighbors may like to admit. In other words, much of the negativity around this proposal likely has
much to do with the fear of "NOVA creep". That may be valid, but given the low populations of these areas and the need to make things fair for the state as a whole, this may just be a new reality they have to confront. So hear what they have to say - perhaps they have a better solution - but be mindful of where it is coming from.
- State Senate Map
o On the whole, this seems good - again, much more compact and in line with how the areas are situated. Like others, I question cutting up Fauquier, though as my previous comments imply, I understand it from a logistical and substantive standpoint. I would like to think there is a better way to do it, but I will not be the one to provide it.
- State House Map
o More of the same. Good overall in terms of compactness. District 61 is a bit crooked, but again, not sure where to make the alternative cut.

If my comments haven't made it clear, there is a reason why you both are doing it instead of me! Everything I just said you probably already know, and is more about personal observation and does not take into account important things you have already considered like population density, racial composition, etc. If there is anything this process has taught me it is that details matter and it has forced me personally to think about hard choices about what I want in a "fair map." Still, I am writing this little manifesto because I - like others in Virginia and around the country- want at least some control in who represents me and to get to a better political system than what we have now. So, as a longtime cynic of the political process, thank you for giving me hope.

Happy Holidays.
Sincerely,
Colin Achilles

Dear Virginia Redistricting Commission,
I am happy that Virginia voted for a nonpartisan Redistricting Commission. But now I am reminded of the saying "be careful what you wish for".

I would like to draw your attention to the following districts:
- Virginia's Senate District, old 36 new 34
- House of Delegates District, old 44 new 16

The maps as of December \(8^{\text {th }}, 2021\) show Senate and House of Delegates Districts that disregard our local life.

I live in the 22308 zip code. Our life is centered towards Mount Vernon; we have a postal address of Alexandria though we have nothing to do with Alexandria City. We would have preferred to have a postal address of "Mount Vernon", which was declined as the Mount Vernon Mansion holds the trade name.

Our Mount Vernon Community does not center toward Springfield or Franconia.
Our centers of life, including church, school and transportation are:

\section*{- Mount Vernon (including Woodlawn Estate),}
- the Route 1 Corridor as also highlighted in the current Multimodel Embark redevelopment supported by Federal, State and Local moneys,

\section*{- the Gerry Hyland South County Government center and Fort Belvoir.}

I am suggesting to include the Mount Vernon Mansion from our district and not to split the Mount Vernon High school district and its feeder Elementary school, Washington Mill, which are now moved into the Fredericksburg district.

The same goes for Fort Belvoir. Fort Belvoir should not be split and be in totality part of Mount Vernon district.

Sincerely,
Alix Kauffman

I do not understand the benefit of redistricting which will cut us off from our neighbors by dividing the Mount Vernon area and dividing Fort Belvoir. Those of us who live in Fort Hunt, area code 22308, have neighbors, schools, groups in common and should be able to vote our concerns with neighbors. It is ludicrous to have us join Fredricksburg and Manassas, areas that are far from our neighborhood.
I strongly object to the plan for redistricting Fort Hunt with distant neighborhoods.

To whom it may concern,
I am very concerned about the proposed redistricting of Stafford and Fredericksburg.
The proposed New 7th District ignores the long-standing relationships that Stafford holds with the counties surrounding it in the Rappahannock Region. Almost all of Stafford's regional interests and affiliations are with communities to the east, south, or west rather than to the north. Stafford County should not be attached to Northern Virginia simply because I-95 runs through it. Stafford is more than just a couple of exits off the highway. Please reflect our real world affiliations in the maps.

Thank you, Mrs.Erica Doyle

Please rethink the redistricting proposal for Virginia's CD-02. This district is already challenging because it stretches from parts of Norfolk to the Eastern Shore. To add the western areas of Suffolk and Isle of Wight defies any pretense of compactness. Second, the proposed map will split our military and retired military interests with meat-packing interests, thereby diluting the focus of the CD-02 congressperson. Furthermore, this map decreases the minority population in CD-03. Is that even legal?

I am writing to express my concerns about the redistricting map which would splinter the Richmond Metropolitan area into at least three different congressional districts.

I have been a resident of Chesterfield County for over 20 years. During my working years, I traveled daily to my job in Henrico County. Since retiring, I continue to "cross the river" on an almost weekly basis to take advantage of the cultural events, shopping, restaurants and medical facilities that Richmond has to offer. This is easy to do because there are multiple highways and bridges that connect the north and south parts of the Richmond area. When people ask me where I am from, I say "Richmond, VA" because I consider my home to be in the Richmond Metropolitan area.

As I look at the proposed Congressional redistricting map, I am most concerned that the Communities of Interest in urban and suburban Richmond have been split apart with no thought for how its residents will be affected. Under the proposed map, I will be separated not only from the Richmond Metro area, but also from part of my own county. The new map will put me in the \(5^{\text {th }}\) Congressional District, with such places as Crewe, Danville and South Boston... areas where I have never been and with which I have nothing in common. As a resident in a small suburban portion of a predominantly rural district, my vote will be diluted, and I will essentially be unrepresented.

I urge that the map be reconsidered so that all of Chesterfield is in the 4 th Congressional District along with the City of Richmond.

Thank you for time and consideration.
Elaine Fishman
Chesterfield, VA 23832

Regarding the draft map by the special masters:
Thank you to the special masters for doing a better job than the commission was able to do statewide, but the job is NOT DONE YET. Some areas are logically now in more condensed and reasonable districts, but a few are made worse by splitting communities of interest unnecessarily. I am sure there are others that must be dealt with also, but in Albemarle County, the map splits our community right down the middle. Northern and southern Albemarle do not function independently from each other, and people who live in Albemarle often travel in and out of Charlottesville, and Charlottesvillians to the County and back. Our community of interest is the entire County with Charlottesville surrounded within.
Across the state with this map, county lines have been respected in almost all locales, so why not for Albemarle? This work on this map is getting there but is simply not yet done. Its being better than a previous version is not an acceptable reason to stop work until it is the best it can be for all across the state. Splitting a jurisdiction, and in the case of Crozet, splitting a concise small community, in half devalues our citizens and adversely impacts our ability to advocate collectively for the needs of our community. I am sure that is not what you intend, so let's fix it. Please do not stop at this point and marginalize Albemarle and Charlottesville citizens unnecessarily.
This can be fixed. One alternative has already been drawn by another citizen and you can view it in the map submitted by Theodore Bloechle. Maybe other solutions exist also. Please keep the entirety of Albemarle, including the city of Charlottesville, together, and attach us to District 10. Thank you.

Having read the comments submitted by the Elias Law group (below), I agree with their rationale and conclusions, and support the Farkas Map:
https://www.democracydocket.com/wp-content/uploads/2021/12/Farkas-Submission2021.12.16.pdf
"It apportions Virginia's population equitably; improves upon traditional districting metrics of contiguity, compactness, and political subdivision splits; and preserves and reunites long-split communities of interest. In so doing, it ensures that Virginia's growing racial and ethnic minority communities, which have been the main drivers behind Virginia's population growth, retain their opportunity to elect candidates of their choice in coalition with others, without diluting their voting strength by packing them within certain districts".

Dear Honorable Justices:

I am impressed with the work of the Special Masters and especially appreciate their explanatory memorandum.

In my view, legislative districts should primarily allow for "communities of interest" to vote for and be represented by the same congressional representative, senator or delegate, respectively. For this reason, I would give priority to the larger communities of interest represented by urban areas (perhaps defined by SMSA's, media coverage areas and similar factors which tend to bind these areas together) and give lesser importance to respecting political boundaries, such as county lines. The effect is to keep cities and their suburbs together, but to split counties in more rural areas, where there is less community of interest almost by definition due to distances between small communities and residences.

Areas of the proposed congressional maps that follow this principle would be the Roanoke area and the Lynchburg area. Those that are contrary to this principle are the Richmond area, represented by three representatives; the Chesapeake area, represented by two representatives; and the Charlottesville area; represented by two representatives.

I would hope the Court would make revisions of congressional lines to allow the greater Richmond area to have a single congressional representative, and for the greater Charlottesville area to be included in the same congressional district. The Chesapeake split might be as good as you can do, given the geographic issue of the Great Dismal Swamp.

While I have not looked at senate or house districts closely, I believe the same analysis should be applied.

I do not claim the level of expertise demonstrated by the Special Masters, but I have traveled the Commonwealth widely both as a Cabinet secretary for Governor Wilder and as a practicing attorney representing clients in probably 75 counties/cities and their courts across the Commonwealth. Also this is one of the first times in 50 years that my political science major actually helps.

Thank you for your service and your consideration of my comments.

To the Supreme Court of Virginia an redistricting Committee.
Sent from Mail for Windows

As a resident of Louisa County for over 60 years, I have resided here all my life. I reside in the Trevilian Battle Field District on Poindexter Road. The closest school is Trevilian Elementary, which is also in Patrick Henry District.
Remember the original purpose, (to end fracturing communities) and to (increase electorial competition).
We dare anticipate, new and increase tax variations thru force compliance after the new lines are drawn. I am against and for go the redistricting proposal in order to marginalize taxes.

Let's not forget our founding fathers who pen the boundaries of our great state, it was good for them then and its good enough now for me. I am sure we are not alone, having lived and own my home in Louisa , and after this redistricting proposal, will probably be paying taxes to Albemarle County..

\section*{SAVE MOUNT VERNON MAGISTERIAL DISTRICT!}

RESCUE MOUNT VERNON MAGISTERIAL DISTRICT!

The Mount Vernon magisterial district in Fairfax County, Virginia is a unique and very special place. It is the home of George Washington's Mount Vernon Estate and its Presidential Library that was added to the location during the past recent 15 years.

You may not be familiar with the geography of Fairfax County. The eastern part of Fairfax County which includes Mount Vernon magisterial district and Lee magisterial district has a mailing address that says Alexandria, Virginia. The eastern part of Fairfax County, however, is not in Alexandria City. The Mount Vernon Community AREA is south of the Beltway. Alexandria City is to the north of the dividing line which is the Beltway. This naming and location clarification is very important.

Why does the eastern part of Fairfax County have an Alexandria, Virginia mailing address? Easy answer! The Alexandria name probably goes back to the Colonial history period of time. Before there was a George Washington in the neighborhood. Or, even, a Mount Vernon Estate. Yes, the residents of the Mount Vernon Community area do a careful explaining to visitors.

There are other reasons that Mount Vernon magisterial district is special. This area is like a small town. The Supervisor is like a "Mayor." Our current "Mayor," Supervisor Daniel Stork, is in his second fouryear term. The previous "Mayor," Supervisor Gerald Hyland, had multiple terms, for a longevity of 25 plus years.

From 1971 to 2011 I resided in a lovely home (22309) that backed on Little Hunting Creek, just one and one-half miles from George Washington's Mount Vernon. Now I am residing in a nearby Independent Living Retirement Community called The Fairfax (22060). When my husband and I needed to make the residential change, we wanted to continue to reside in the Mount Vernon magisterial district, this amazing place of history, geography, cordiality, and caring.

Everyone knows everyone. Everyone looks out for everyone, and cares about the welfare of our neighbors, our special history, the beautiful environment with the Potomac River as our forever view.

There is a cohesiveness, a sense of belonging, like no other place.
Please do not destroy this unique blessing. Please save Mount Vernon Magisterial District.
Sincerely,
Lois M. Passman

\section*{Introduction}

One of the criteria to be used in Virginia's redistricting initiative is to Incorporate the concept of communities of interest/communities of place when designing any new state election map. The National Conference of State Legislatures (NCSL) has also established this criterion for every state in the United States.

Time and again in yesterday's (12/15/2021) public hearing conducted by the Supreme Court of Virginia concerning the proposed election maps created by the Special Map Masters was the complaint that the Special Map Masters hadn't taken into consideration communities of interest. I believe this deficiency is due to the lack of a robust definition of communities of interest/communities of place.

\section*{Current Definition of Communities of Interest}

A community of place or place-based community is a community of people who are bound together because of where they reside, work, visit or otherwise spend a continuous portion of their time. Such a community can be a neighborhood, town, coffeehouse, workplace, gathering place, public space or any other geographically specific place that a number of people share, have in common or visit frequently.

Furthermore, Communities of interest share similar historical, cultural, or economic interests. However, they should not be defined by political affiliation.

\section*{Assessment of Current Definition of Communities of Interest/Place}

Among the deficiencies of the current definition are the following points:
1. Does not address preserving existing geographic boundaries of cities/towns and counties wherever possible.
2. Does not take into account religious affiliations and where people worship.
3. Does not address the concept of "socio-economic classes"; i.e. - people having the same social, economic, or educational status. For example, people engaged in the same profession.
4. Doesn't establish upper and lower boundaries in terms of size as regards a community of interest/place. Given the current definition the same deference or importance would be given to a HOA community with several hundred residents as opposed to a community of people working in a large factory employing thousands of people. Hence, an argument could be made that the current definition could potentially contribute to not having a state congressional district's population be within a 5\% +/- range of one-eleventh of Virginia's current population.
5. Doesn't address commuting patterns as regards to where people shop and are employed.
6. Does not address communities of race/ethnicity and/or minority voters as a community of interest.
7. Doesn't directly address the reality of state-defined school districts.

\section*{Proposed Expanded Definition of Community of Interest}

To help address the deficiencies of the current definition of communities of interest/place and to ensure well thought out and justifiable new state election maps the map drawers should incorporate the following concepts into the expanded definition:
1. Any existing Virginia city and county shall be considered a community of interest/place and a high priority should be given to not split these political entities among newly formed state election districts.
2. Places of worship in the aggregate can considered as candidates for communities of interest.
3. School districts should not be geographically divided among different state election districts.
4. Locales where a high large portion of residents work in the same industry or profession shall be considered a community of interest/place such a manufacturing factory employing thousands of people or a university/college town.
5. Distinctions should be made between urban population centers versus rural communities as to their placement in newly formed state election maps. It would seem that rural communities directly adjacent to an urban center or with-in a radius of 25 miles or less might be considered as candidates to link up as the same community of interest or place.
6. People of the same race or ethnicity living in the same geographic area should not be distributed geo-politically across multiple newly formed state election districts that significantly dilute their voting power as a bloc.
7. Commuting patterns as concerns driving to a place of employment or to major shopping centers should be taken into as a possible collection of residents comprising a community of interest.

\section*{Concerns about Redistricting Map of CD 2}

I am Mrs. Manjula Ambur, resident of Hampton Roads over the past 32 years. I am writing this email to express my serious concerns about the newly drawn Virginia maps for Congressional District 2. My main concerns are regarding Norfolk and Yorktown not being part of CD 2 and the details are given below. I very much appreciate your consideration of these issues and consider including Norfolk and Yorktown in CD2.

Norfolk and Virginia Beach have many things in common and they being in the same District 2 is critical to Hampton Roads socio economic success.
- Naval station and Fleet Forces in Norfolk and Air station in Oceana in Virginia Beach work closely together and have service members that live in both localities. Them having the same federal representative is important to better advocate their interests.
- In addition, the ocean view and waterfront parts of Norfolk and Virginia Beach would benefit environmentally being together having same federal representation to address the impacts from the impending sea level rise.
- Also Isle of Wight and Suffolk share more economically and culturally with Portsmouth in the 3rd District than with Virginia Beach which is in the 2nd District.

York County and Williamsburg are key communities in the Hampton

Roads area and all communities being together as part of CD 2 is critical to this area's socio economic success.
- York County is home to Naval Weapons Station and Fort Eustis, significant military facilities. Having Yorktown in the same district as Virginia Beach and having common Federal representation is very beneficial to both cities' constituents
- Being together with Virginia Beach and Chesapeake is beneficial for York County and Williamsburg residents since all have similar socio-economic interests.

Thank you for your consideration.

\section*{EXTERNAL EMAIL \\ THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS \\ Hello}

Please consider the Farkas Map. It vastly improves these maps - it does not cut Albemarle/Charlottesville area in half.

We in Charlottesville have been gerrymandered out of relevance for a decade. It's undemocratic and unconstitutional. We will not accept the current proposed maps, much of an improvement as they are. Charlottesville/Albemarle has precious little in common with Southside.

Thank you for all the work you do on this crucial issue.

\section*{INTRODUCTION}

The Virginia State Conference of the NAACP ("Virginia NAACP") submits this written comment and accompanying proposed maps to help inform the work of Sean P. Trende and Bernard N. Grofman, Special Masters appointed by the Supreme Court of Virginia under Article II, Sections 6 and 6-A of the Constitution of Virginia and Code § 30-399(F), for the development of proposed redistricting maps for the Virginia House of Delegates, the Senate of Virginia, and Virginia's representatives to the United States House of Representatives.

Virginia NAACP, founded in 1935, is the oldest and largest civil rights organization in the Commonwealth. It oversees more than one hundred NAACP local branches, youth councils, and college chapters. Virginia NAACP's core mission is to secure the political, educational, social, and economic equality of all persons, without discrimination based on race. To further this mission, Virginia NAACP has been actively involved in the 2021 redistricting cycle by educating the public, organizing its members, and vigorously participating in the Virginia Redistricting Commission's public processes. Virginia NAACP now submits this written comment prepared in consultation with its members, local branch leaders, and legal counsel.

As described herein, to create an equitable and constitutional redistricting plan, the mapmakers must consider the lingering legacy of slavery and continued
racial discrimination against Virginians of color and Black Virginians in particular. Simply put, Virginia has a long and reprehensible history of racism and racial discrimination, the effects of which persist to this day. Multiple federal courts have recognized and relied upon this history in invalidating past redistricting plans.

Virginia NAACP thus respectfully requests that the Court and Special Masters consider this written comment and recommendations when evaluating and making revisions to the initial maps presented on December 7, 2021, including and especially our statistical analysis of the Special Masters' initial maps and the contours of the Virginia NAACP-proposed district maps, discussed below and attached as appendices. \({ }^{1}\) Our proposed maps were generated in close collaboration and consultation with Virginia NAACP local branch leaders and members, and are designed to best represent the Black communities of interest located in these districts, while satisfying all other legal criteria.

Virginia NAACP further requests that the Court and Special Masters hold additional public hearings after presenting the next, revised versions of the December 7, 2021 maps, before voting on any map's adoption. It is crucial that the communities where opportunities hinge on the contours of these maps are able to provide feedback on the final versions of any maps before their adoption. And it is

\footnotetext{
\({ }^{1}\) Virginia NAACP has also provided shapefiles for its proposed districts to the Clerk of the Supreme Court of Virginia in order to enable the Special Masters to fully take these into consideration, and request that the Special Masters obtain these shapefiles from the Clerk if they have note already been transmitted.
}
particularly important that the Court hear and consider the views of Black communities and other communities of color who have long been disenfranchised, discriminated against, and excluded from meaningful participation in Virginia's redistricting process.

\section*{SUMMARY OF CONCLUSIONS AND RECOMMENDATIONS}
1. Virginia has a long history of racial discrimination in redistricting, voting, and in all aspects of its laws and society. The ongoing effects of this history must be considered in drawing redistricting plans to ensure that Black Virginians and other communities of color have an equal opportunity to participate fully in the political process.
2. The federal Voting Rights Act requires that districts be drawn in a way that does not dilute the voting power of Black Virginians and other communities of color, including by considering the extent of racially polarized voting in specific regions throughout the Commonwealth, which in turn requires an exacting and district-specific analysis.
3. Virginia law further requires that districts be drawn to preserve communities of interest, which includes Black communities of interest and other communities of color, and to create crossover coalition districts-districts that enable Black and other voters of color to vote
cohesively together and with white voters to elect their candidates of choice-wherever possible.
4. The Special Masters' use of American Community Survey ("ACS") data in conducting their analysis of whether Black voters would have the ability to elect candidates of choice in specific districts is flawed, because ACS data routinely and often significantly undercounts Black voting age population ("BVAP"), as reflected in the full 2020 Census count. See infra Section III. It is also unnecessary to use ACS data to determine Black citizen voting age population ("BCVAP") because the percentage of non-citizen BVAP is relatively low throughout the Commonwealth. This flaw has led the Special Masters to, in some cases, overestimate Black voting strength in specific districts, rendering these districts less effective in electing candidates of choice than asserted. See infra Section III. Recommendation: The Special Masters and the Supreme Court of Virginia must use 2020 Census data when determining Black voters' ability to elect candidates of choice under their proposed redistricting plans.
5. In order to fully analyze and accurately predict whether Black voters in a specific proposed district would have the ability to elect candidates of choice, it is necessary to conduct a precinct reconstruction analysis to
determine how the new district would have performed in past reference elections. However, it is unclear from the Special Masters' memorandum whether they have done this analysis, and, if so, which elections were used as a reference. Recommendation: The Special Masters must conduct a precinct reconstruction analysis when determining the ability of Black voters and other voters of color to elect candidates of choice in their proposed districts, and publicize this analysis, including which elections were used in conducting this analysis.
6. Virginia NAACP's proposed district maps, discussed below and attached as appendices, better represent the Black communities of interest in each region, can more consistently be relied on to elect Black voters' candidates of choice as required by the federal Voting Rights Act and Virginia law, and are generally more compact and with a lower population deviation than the corresponding Special Masters' maps. See infra Section III; Appendix D. Recommendation: The Special Masters should adjust their initial district lines to more closely represent the Black communities of interest in each region as reflected in the Virginia NAACP-proposed maps.
7. All Virginians, and in particular Black Virginians and other communities of color, must be given the opportunity to provide feedback on the final versions of any maps before their adoption. Recommendation: The Special Masters and the Supreme Court of Virginia should hold additional public hearings on the revised versions of the initial Special Masters maps, and any future revised versions, before their adoption by the Court.

\section*{I. HISTORY OF RACIAL DISCRIMINATION}

Virginia has a long history of racial oppression, including direct and indirect efforts to disenfranchise Black Virginians and other communities of color and to prevent them from building and exercising political power. Virginia's infamous history of targeting Black voters for mass disenfranchisement \({ }^{2}\) continued even after the Jim Crow era, with discriminatory voting practices and policies extending into recent decades. Black Virginians and other communities of color continue to face racial discrimination that prevents them from participating fully and equally in the political process. Racial gerrymandering and vote dilution in redistricting plans have

\footnotetext{
\({ }^{2}\) See, e.g., J. Douglas Smith, Managing White Supremacy: Race, Politics, and Citizenship in Jim Crow Virginia, 2428 (2002) (describing the 1901 Virginia Constitutional Convention and legal efforts to disenfranchise Black voters at the turn of the \(20^{\text {th }}\) century); Matt Ford, The Racist Roots of Virginia's Felon Disenfranchisement, The Atlantic (Apr. 27, 2016), https://www.theatlantic.com/politics/archive/2016/04/virginia-felon-disenfranchisement/480072/ (last visited Dec. 8, 2021); Daniel S. Goldman, The Modern-Day Literacy Test: Felon Disenfranchisement and Race Discrimination, 57 Stan. L. Rev. 611, 616 (2004) ("Starting with Mississippi in 1890, every state in the Deep South either adopted a new constitution or rewrote an existing constitution through 'disenfranchising conventions.' The purpose of these conventions was clear: 'Discrimination!' exclaimed Carter Glass, a delegate to the Virginia Convention of 1906. 'Why that is precisely what we propose; that exactly is what this convention was elected for.'").
}
extended this legacy and exacerbated racial disparities in Virginia's democratic process. See infra Subsection B. The U.S. Supreme Court's decision in Shelby County v. Holder, 570 U.S. 529 (2013), invalidated Section 4(b) of the Voting Rights Act of 1965 ("Voting Rights Act"), which had required Virginia to obtain preclearance for changes to its voting laws, enabling discriminatory voting changes to be implemented.

\section*{A. Virginia Has Long Used Discriminatory Voting Laws to Disenfranchise Black Voters.}

Both before and after passage of the Voting Rights Act, Black communities and other communities of color have faced legal obstacles and outright hostility when attempting to participate in Virginia's electoral process, as evidenced by a range of discriminatory voting measures enacted in a sustained effort to disenfranchise Black voters.

During Reconstruction, Black Virginians accessed the polls in large numbers. \({ }^{3}\) In 1867, 105,832 Black voters were registered to vote in Virginia and, of those registered, 93,145 (88\%) voted on October 22, 1867. \({ }^{4}\) Between 1869 and 1890, about 100 Black men served in the Virginia General Assembly. \({ }^{5}\) Hundreds more Black men were elected to office in city and county governments, as well as

\footnotetext{
\({ }^{3}\) Recognizing the African American members elected to the Virginia General Assembly during Reconstruction, S.J. Res. 89, Va. 2012 Regular Sess. (Va. 2012).
\({ }^{4} I d\).
\({ }^{5} I d\).
}
other federal governmental offices. \({ }^{6}\) At the end of Reconstruction, Virginia responded to this largely successful Black voter turnout by enacting discriminatory voting laws to disenfranchise Black voters.

After the 1901 Constitutional Convention, Virginia passed numerous measures designed explicitly to reserve the franchise for white voters and to ensure exclusive political power for white communities. \({ }^{7}\) For example, in reliance on a racially biased criminal justice system, the Commonwealth disenfranchised voters with felony convictions \({ }^{8}\); until the 1970s, Virginia imposed literacy tests demanding extensive memorization of the Constitution \({ }^{9}\); and the Commonwealth enacted a poll tax, requiring yearly payments and three years' payment up front for first-time voters. \({ }^{10}\) Virginia's multiple, deliberate efforts to disenfranchise Black voters worked: the literacy tests alone ensured that, of the roughly 147,000 Black Virginians of voting age in 1901, only \(21,000(14 \%)\) were able to remain on the

\footnotetext{
\({ }^{6}\) Id.
\({ }^{7}\) Many delegates to the 1901 Virginia Constitutional Convention openly discussed adopting suffrage restrictions, such as literacy tests and grandfather clauses, to eliminate the Black electorate. See Smith, supra note 2, at 25-26. State senator Carter Glass, whose leadership at the convention launched his very successful Virginia political career, proclaimed that "there stands out the uncontroverted fact that the article of suffrage which the Convention will to-day adopt does not necessarily deprive a single white man of the ballot, but will inevitably cut from the existing electorate four-fifths of the negro voters... This was the purpose of this Convention; that will be the achievement." Id. at 26.
\({ }^{8}\) Ford, supra note 2.
\({ }^{9}\) See Smith v. Bd. of Supervisors of Brunswick Cnty., 801 F.Supp. 1513, 1517 (E.D.N.Y. 1992) ("Until 1974, Virginia required proof of literacy in order to vote." (citing Virginia v. United States, 386 F.Supp. 1319 (D.D.C.1974)); Smith, supra note 2, at 25 (describing how the constitutional convention "adopted a number of literacy, understanding, and grandfather clauses that left open the possibility that generous registrars might allow illiterate whites to register while denying the privilege to black aspirants").
\({ }^{10}\) Marie Albiges, The poll tax kept black Virginians from voting. Half a century later, its finally being stripped from the books, THE VIRGINIAN-PILOT (Feb. 2020) https://www.pilotonline.com/government/virginia/vp-nw-poll-tax-20200221-dclwpj7hkreftgwqzyvj3xibvq-story.html.
}
voter rolls in 1902. \({ }^{11}\) By 1905, the poll tax halved that number. \({ }^{12}\) In part because of these racist voting restrictions, Virginia did not elect another Black representative at either the state or federal level until \(1967 .{ }^{13}\)

While literacy tests became unlawful with the Voting Rights Act and poll taxes were ruled unconstitutional, \({ }^{14}\) Virginia continues to disenfranchise voters with felony convictions. \({ }^{15}\) Because of the over-policing of Black communities \({ }^{16}\) and the racially discriminatory nature of the criminal justice system, \({ }^{17}\) as expected, this practice disproportionately disenfranchises Black Virginians. Despite the restoration of voting rights of almost 200,000 Virginians since 2016, \({ }^{18}\) as of 2020, more than one in seven-over \(14 \%\)-of Black Virginians remain disenfranchised due to a felony conviction. \({ }^{19}\)

\({ }^{19}\) Id.
}

Until 2020, \({ }^{20}\) the Commonwealth further diluted the effect of votes by voters of Black and Brown communities through "prison gerrymandering," a redistricting practice in which the state counts incarcerated individuals at the location of their correctional facility instead of their home address. As of 2017, 53\% of incarcerated Virginians were Black, a rate almost three times the state's 20\% Black population. \({ }^{21}\) This practice artificially inflated the total population numbers in the overwhelmingly white, rural communities where Virginia's correctional facilities are predominantly located, while simultaneously deflating the population of the communities from which these incarcerated individuals came and are likely to return, reducing the number of representatives in all levels of government from Black and Brown communities. \({ }^{22}\)

Until 2013, the Voting Rights Act's preclearance requirement provided some protection for Black Virginians and other voters of color from discriminatory voting laws. Between 1982 and 2006, the U.S. Department of Justice ("DOJ") blocked 15 voting changes Virginia submitted for preclearance on the basis that they would have had a discriminatory impact on voters of color. \({ }^{23}\) But in 2013, soon after the

\footnotetext{
\({ }^{20}\) The Virginia General Assembly passed a law in 2020 mandating that incarcerated Virginians be counted at their home addresses for purposes of redistricting. See Va. Code § 24.2-304.04(9).

}

Supreme Court struck down the preclearance coverage formula in Shelby County v.
Holder, Virginia purged almost 40,000 voters from its voter rolls, many of whom were later revealed to have been eligible voters removed in error. \({ }^{24}\) Because Black Americans are statistically more likely to share a name with another person than white Americans, \({ }^{25}\) eligible Black voters are more likely to be incorrectly purged from voter rolls than their white counterparts. \({ }^{26}\) Additionally, in 2013, Virginia enacted an unduly restrictive voter identification ("ID") law, eliminating the use of utility bills, pay stubs, bank statements, government checks, and Social Security cards as acceptable identification, and allowing only drivers licenses, voter ID cards, student IDs, or concealed handgun permits. \({ }^{27}\) It has been widely shown that restrictive voter ID laws cause disproportionate burdens on voters of color, who are less likely than white voters to possess the required forms of ID and less likely to be

\footnotetext{

}
able to afford to obtain them. \({ }^{28}\) Together with new restrictions on third-party voter registration, \({ }^{29}\) these changes contributed to Virginia being ranked as one of the most difficult and costly states to vote in as recently as 2018. \({ }^{30}\)

\section*{B. Virginia Continues to Disenfranchise Black Voters Using District Maps that Dilute the Black Vote.}

After the 2010 Census, Black Virginians saw the concerns of their communities largely ignored by mapmakers who sought to dilute Black voting strength across the Commonwealth. These mapmakers did so both by "packing" Black voters into a smaller number of districts and by "cracking" Black voters across multiple districts. "Packing" dilutes the Black vote by districting the majority of Black voters into a single district or a small number of districts, thus decreasing the number of representatives preferred by Black voters that could be elected. "Cracking" dilutes the Black vote by doing just the opposite: splitting Black voters into many districts, resulting in a Black voting age population in each of those districts that is too small for Black voters to elect a candidate of their choice. Indeed, courts have relied on evidence of these discriminatory practices in invalidating Virginia's redistricting plans three times since the last census.

}
1. A Federal Court Held that Virginia's 2011 Congressional Maps Violated the United States Constitution by Packing Black Voters to Dilute Their Electoral Power.

In 2011, the divided state legislature deadlocked on a congressional plandisagreeing mainly on the creation of majority-minority districts-with the Virginia State Senate and Virginia House of Delegates approving competing redistricting plans. \({ }^{31}\) These plans were ultimately passed under a unified legislature in 2012. \({ }^{32}\)

However, the enacted plan, despite being precleared by the DOJ, \({ }^{33}\) packed Black voters unconstitutionally into the Third Congressional District, a district originally created in 1992 after the DOJ directed the Virginia legislature to draw a Black-majority district, following the 1990 census, in order to ensure fair representation for Black voters in Virginia. \({ }^{34}\) Since its creation, the Third District had been represented by Representative Bobby Scott, who was, at the time, the only Black member of Virginia's U.S. congressional delegation. \({ }^{35}\) Despite the consistent

}
reelection of Rep. Scott, the 2012 plan increased the BVAP from \(53.1 \%\) to over \(56.3 \%{ }^{36}\)

In Page v. Virginia State Bd. Of Elections, 58 F. Supp. 3d 533 (E.D. Va. 2014),
Black voters filed suit in 2013 challenging the 2012 plan, alleging that they had been packed into the Third District diluting their vote and constituting an unconstitutional racial gerrymander in violation of the Equal Protection Clause of the Fourteenth Amendment. The U.S. District Court for the Eastern District of Virginia agreed, striking down Virginia's 2012 congressional map, finding that (1) the plan unconstitutionally packed Black voters in a single district; (2) race predominated the legislature's drawing of the Third District; and (3) the redistricting plan's \(55 \%\) BVAP "floor" as applied to the Third District was not narrowly tailored to achieve non-retrogression in compliance with the Voting Rights Act. Id. at 545-53. \({ }^{37}\) The court considered direct evidence of legislative intent, including statements made by the author of the 2012 map, as well as circumstantial evidence, including the Third

\({ }^{37}\) Defendants appealed to the Supreme Court of the United States, which, on March 30, 2015, remanded the case back to the trial court for reconsideration in light of its March 25, 2015 decision in Alabama Legislative Black Caucus \(v\). Alabama, 575 U.S. 254 (2015). Cantor v. Personhuballah, 575 U.S. 931 (2015). In the Alabama case, the Court ruled 5 to 4 on a number of legal standards for determining whether race predominated in a redistricting plan, including that racial gerrymandering must be considered on a district-by-district basis, not statewide. See generally Alabama Legislative Black Caucus, 575 U.S. 254. On remand, the Eastern District of Virginia again ruled that an unconstitutional racial gerrymander had occurred in the drawing of Virginia's Third Congressional District, holding that race predominated in the creation of its boundary lines and that the legislature had no justification that satisfied strict scrutiny. Page v. Virginia State Bd. Of Elections, No. 3:13cv678, 2015 WL 3604029, *19 (E.D. Va. Jun. 5, 2015). The court ordered that the Third District be redrawn in light of this ruling. Id. at *18.
}

District's shape, non-contiguousness, and splits in political subdivisions. Id. at 541-
47.

Although the challenged map remained in effect for the 2014 election, the court ordered the legislature to draw new districts for later elections in order to ensure fair representation for Black Virginians. \({ }^{38}\) When the legislature then failed to do so, a panel of federal judges was assigned to redraw the map. \({ }^{39}\) The new map centered the Third District in Hampton Roads and added Richmond and Petersburg to the Fourth District. \({ }^{40}\) This redrawing dispersed the concentration of Black voters more fairly across the Third and Fourth Districts, increasing the overall influence of Black voters and enabling Black voters to elect a candidate of their choice in the Fourth District in 2016. \({ }^{41}\) These remedial maps were later upheld in Personhuballah v. Alcorn, 155 F. Supp. 3d 552 (E.D. Va. 2016), where the court held that the "unpacking" of the Third District from \(56.3 \%\) to \(45.3 \%\) BVAP did not lead to Black voters losing their ability to elect candidates of their choice. \({ }^{42}\)

}
2. A Federal Court Held that Virginia's 2011 General Assembly Maps Violated the United States Constitution by Packing Black Voters to Dilute Their Electoral Power.

During the same cycle, the 2011 General Assembly redistricting plan redrew the boundaries for twelve House of Delegates districts, packing Black voters into these districts such that each district had a BVAP of at least 55\%. \({ }^{43}\) In Bethune-Hill v. Virginia State Board of Elections, 141 F.Supp. 3d 505, 523-24 (E.D. Va. 2015), Black voters from each district sued the Board of Elections in 2014, alleging that the new maps diluted their voting power and were racially gerrymandered in violation of the Equal Protection Clause of the Fourteenth Amendment. \({ }^{44}\)

The U.S. District Court for the Eastern District of Virginia once again struck down Virginia's maps as racially discriminatory. \({ }^{45}\) The Court held that the Commonwealth used an "arbitrarily applied . . . mechanical 55\% racial threshold" to compress Black voters into only a few districts and thus limited Black Virginians' electoral power. \({ }^{46}\) An expert report submitted on behalf of plaintiffs conducted an analysis of the racial composition and voting patterns of the challenged districts and found that the districts did not require a BVAP of \(55 \%\) or higher in order to elect

\footnotetext{
\({ }^{43}\) Bethune-Hill v. Virginia State Bd. Of Elections, 141 F.Supp.3d 505, 523-24 (E.D. Va. 2015). The plan was subsequently precleared by the DOJ, https://redistricting.lls.edu/wp-content/uploads/VA-preclear-20110617-stateleg.pdf, and went into effect.
\({ }^{44}\) Id.
\({ }^{45}\) Bethune-Hill v. Va. State Bd. of Elect., 326 F. Supp. 3d 128, 180 (E.D. Va. 2018).

}
minority voter-preferred candidates. \({ }^{47}\) The Commonwealth's plan also "substantially reduce[d] geographic compactness" among the challenged districts and resulted in the split of counties and cities. \({ }^{48}\)

The Eastern District decision followed a Supreme Court order to engage in a "holistic analysis" of the use of race in Virginia's redistricting \({ }^{49}\) rather than simply accept the Commonwealth's argument that legislators believed that the twelve districts needed to contain a BVAP of at least \(55 \%\) to remain Black opportunity districts. \({ }^{50}\) The Supreme Court additionally held that Plaintiffs were not required to establish, as a threshold matter, that the challenged districts were inconsistent with traditional redistricting principles. \({ }^{51}\) Rather, a variety of direct and circumstantial evidence could sufficiently show race improperly predominated in a redistricting plan, even if a district otherwise complied with traditional redistricting principles.

\footnotetext{
\({ }^{47}\) Bethune-Hill v. Va. State Bd. of Elections, Report of Dr. Stephen Daniel Ansolabehere, No. 113CV00949, 2015 WL 6673859 (Mar. 11, 2015), •10.
\({ }^{48}\) Id.
\({ }^{49}\) Bethune-Hill v. Va. State Bd. of Elections, 137 S. Ct. 788, 800 (2018). The district court had initially held that the plaintiffs did not establish that race was the predominant factor in the creation of eleven of the twelve challenged districts. Bethune-Hill v. Virginia State Bd. of Elections, 141 F.Supp.3d 505, 510-11 (E.D. Va. 2015). The court additionally held that, although race was the predominant factor in the creation of one of the districts, House District 75 , the use of race was nevertheless constitutional, as the "General Assembly was pursuing a compelling state interest, namely, actual compliance with federal antidiscrimination law, and....used race in a manner narrowly tailored to achieve that interest." Id. at 511. Plaintiffs appealed to the Supreme Court. On March 1, 2017, the Supreme Court issued a ruling, holding that the district court had employed an incorrect legal standard in determining that race did not predominate in eleven of the twelve districts. Bethune-Hill, 137 S . Ct. at 796-801 (2017). The Court, however, agreed with the district court that the twelfth district was constitutional, , writing that a state need merely show that it had "good reasons to believe it must use race in order to satisfy the Voting Rights Act" to meet strict scrutiny. Id. at 801. The Court remanded the case and instructed the district court to re-evaluate the eleven districts under the correct legal standard. In June 2018, a three-judge panel ruled 2-1 that the eleven challenged House districts were unconstitutionally racially gerrymandered and ordered the General Assembly to draw a remedial map by October 30, 2018. The new plan went into effect in time for the 2019 elections.

}
"The ultimate object of inquiry is . . . the legislature's predominant motive for the design of the district as a whole., \({ }^{52}\)
3. Federal Courts Have Held that Recent Local Redistricting Plans in Virginia Violated the Voting Rights Act.

Applying these same principles, courts have likewise struck down Virginia's local redistricting plans. For example, just this year, the U.S. District Court for the Eastern District of Virginia struck down Virginia Beach's City Council plan because its discriminatory impact on voters of color combined with other aspects of societal discrimination to "den[y voters of color] equal access to the electoral and political process, in contravention of Section 2 of the Voting Rights Act." \({ }^{53}\) The court noted that voters of color struggled to elect their preferred candidates \({ }^{54}\) despite making up a sufficiently large and cohesive community, \({ }^{55}\) in part because white voters consistently voted against Black candidates of choice. \({ }^{56}\)

\section*{C. Racial Inequality Persists in Virginia, and the Commonwealth's Politicians Continue to Win Elections Through Appeals to Racial Prejudice.}

Beyond discriminatory voting laws and racial gerrymanders, Virginians of color continue to struggle with racial inequality and discrimination in a range of other ways. The Governor's Commission to Examine Racial Inequity in Virginia

\footnotetext{

}

Law, established by Governor Ralph S. Northam, \({ }^{57}\) issued a 2020 report laying out in great detail the continuing and devastating effects of Virginia's "history of racial inequities and racially-discriminatory laws" in the areas of housing, education, criminal justice, health, and environmental justice, among other aspects of society. \({ }^{58}\) Courts consider "the extent to which minorities . . . bear the effects of discrimination in education, employment, and health," as evidence of continued barriers to "the ability to participate effectively in the political process" for voters of color. \({ }^{59}\) Persistent racial disparities throughout nearly all aspects of society combine to weaken Black electoral strength in Virginia.

Nationwide, Black American households, which amount to more than \(13 \%\) of the country, hold just \(4 \%\) of the nation's wealth. \({ }^{60}\) Meanwhile, median white household wealth is almost eight times that of Black households. \({ }^{61}\) This persistent inequality of opportunity translates to education as well, where Black students are more likely to attend underfunded schools, have poorer educational opportunities,

}
and face discriminatory disciplinary enforcement while in school. \({ }^{62}\) These trends have only worsened during the pandemic. \({ }^{63}\) Black Americans are more likely than white Americans to have "poor health" and have the highest cancer mortality rate of any racial or ethnic group. \({ }^{64}\) Compounding this factor, Black Americans are less likely to be insured or have adequate access to insurance coverage. \({ }^{65}\)

Unfortunately, the hardships faced by Black Virginians largely parallel these national trends. Since the 1970s, Virginia's Black communities have trailed the Commonwealth's median wealth by about \(30 \% .{ }^{66}\) Virginia's schools are increasingly segregated, \({ }^{67}\) and continued racial discrimination has caused disproportionately negative health outcomes for Black Virginians. \({ }^{68}\) Ingrained poverty due, in part, to limited educational opportunities and low-wage employment make it difficult to impossible to take time off from work to vote and overcome other

}
obstacles to voting. Together, these factors make it far more difficult for Black voters to participate in Virginia's democracy.

Racial animus sadly remains a factor in Virginia's elections. The use of racist imagery and language in Virginia's campaigns over the last few years is well documented, \({ }^{69}\) but the 2021 General Assembly races were notably awash with racist ad campaigns and "dog whistles" meant to rile up white resentment towards people of color.

Specifically, in 2021, several Black members of the General Assembly were targeted with ad campaigns utilizing racist imagery. Mailers evoked the history of Black lynching by depicting each representative as a puppet hung from ropes held by House Speaker Nancy Pelosi, with Congresswoman Alexandria Ocasio-Cortez standing over her shoulder. \({ }^{70}\) One representative, Alex Askew, was even shown with the hue of his face artificially darkened and an image of his face set ablaze. \({ }^{71}\) When these mailers were called out for trading in lynching imagery, only one white opponent in these three races even acknowledged the mailers' existence. \({ }^{72}\) These racist tactics continue to affect election results and diminish electoral opportunity

}
for Black voters. Each of the candidates in the campaigns that used these racist tactics succeeded. In all three General Assembly races, the white challenger unseated the Black incumbent.

None of these systems operates independently. Rather, they intersect and reinforce each other such that Virginia's democracy continues to be disproportionately inaccessible to Black voters. Whatever recent softening has occurred in Virginia's historically harsh voting landscape, the burdens experienced by voters of color in Virginia persist.

\section*{II. LEGAL STANDARDS}

Redistricting is fundamentally about ensuring that voters, and their communities, are adequately and fairly represented. The legal structures that guide this process reflect that goal. In its Redistricting Appointment Order, the Court instructed Special Masters Trende and Grofman to "fully comply with federal and state law" in drawing maps. \({ }^{73}\) As explained in this Section, these laws impose rigorous redistricting requirements. First, the federal Voting Rights Act serves as a "stern and powerful remedy" against the denial or dilution of the vote of Black and other voters of color. See Briscoe v. Bell, 432 U.S. 404, 410 (1977). Second, Virginia's own laws offer even greater protection: in the last year, Virginians

\footnotetext{
\({ }^{73}\) Redistricting Appointment Order, In Re: Decennial Redistricting Pursuant to The Constitution of Virginia, art. II,
 https://www.vacourts.gov/courts/scv/districting/redistricting_appointment_order_2021_1119.pdf
}
amended the Constitution and passed two new laws that expand on the federal Voting Rights Act's already-robust protections. Finally, new legislative maps must not abridge the rights afforded to Virginians by the Constitution of the United States, especially those enshrined in the Equal Protection Clause of the Fourteenth Amendment. To comply with these stringent legal standards, the Commonwealth must adopt maps that preserve, secure, and empower the voting rights of the people it has for so long disenfranchised.

\section*{A. Under Section 2 of the Voting Rights Act, Virginia Must Not Dilute the Voting Power of Black Voters in Regions of the State That Exhibit Racially Polarized Voting}

Under Section 2 of the Voting Rights Act, a state cannot pass any voting law that causes "a denial or abridgement of the right of any citizen . . . to vote on account of race or color." 52 U.S.C. § 10301(a). A state violates the Voting Rights Act when it draws maps that cause voters of color to "have less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice." Id. § 10301(b). In essence, the law aims to proscribe any "electoral law, practice, or structure [that] interacts with social and historical conditions to cause an inequality in the opportunities enjoyed by [minority] and white voters to elect their preferred representatives." Thornburg \(v\). Gingles, 478 U.S. 30, 47 (1986); Holloway, 531 F. Supp. 3d at 1044.

Among other things, Section 2 prohibits "vote dilution," which occurs when an electoral practice-including the lines drawn in redistricting-combines with social and historical conditions to result in a weakening of the voting strength of a racial or language minority group. Any state with a significant racial minority population, such as Virginia, must conduct a vote dilution analysis as part of its redistricting process to ensure compliance with the Voting Rights Act. In short, Virginia must ensure it is neither "packing" Black voters into "excessive majorit[ies]" in too few districts, or "cracking" Black voters into "ineffective minorit[ies]" across many districts. Gingles, 478 U.S. at 46 n. 11 .

In Gingles, the Supreme Court instituted a two-step framework to analyze whether a particular redistricting plan would illegally dilute minority voting power. 478 U.S. 30. It first outlined three preconditions that, together, establish both the existence of "racially polarized voting," the phenomenon at the heart of vote dilution, and the possibility of drawing an effective district (i.e., a "majorityminority" district, a district with fifty-percent-plus-one minority voting age population) that would afford racial minority voters the opportunity to elect candidates of choice despite the presence of extreme or maximum racially polarized voting. Id. at 50-51; see also Collins v. City of Norfolk, 816 F.2d 932, 936 (4th Cir. 1987). These preconditions are established where a racial minority group is both sufficiently compact that it could constitute a majority in a given district and
politically cohesive enough that this district would elect candidates of their choice, but where the white majority votes sufficiently as a political bloc such that voters of color are usually unable to elect candidates of choice. Gingles, 478 U.S. at 50-51. If those conditions are met, one must next determine if, "based on the totality of circumstances, . . . the political processes leading to . . . election in the State . . . are not equally open to participation" by the electoral minority (emphasis added).

52 U.S.C. § 10301(b). If established, there exists a Section 2 vote dilution violation.
This framework has significant implications for Virginia's current redistricting process. The effect of racially polarized voting is particularly dangerous to voters of color because it "deprives . . . [them] of their preferred representative . . . and allows . . . elected [officials] to ignore [their] interests without fear of political consequences." Gingles, 478 U.S. at 48 n. 14 (quotations omitted). To be sure, Virginia exhibits significant racially polarized voting only in certain of its regions. \({ }^{74}\) In some districts, Black voting age population must approach or exceed fifty percent in order for Black voters to have an equal ability to elect candidates of their choice; in other districts, a lower percentage of Black voting age population may be effective in electing candidates of choice. It is therefore imperative that the

\footnotetext{
\({ }^{74}\) For example, Dr. Stephen Ansolabehere, in his 2015 expert report for Bethune-Hill v. Virginia State Board of Elections, found diversity in voting bloc habits even among only twelve challenged Virginia House of Delegates districts. Of the twelve, six exhibited significant racially polarized voting behavior, four lacked significant racially polarized voting, and two exhibited low levels of White cohesion and therefore moderate levels of racially polarized voting. Report of Stephen Ansolabehere, at \| 10.
}

Court and Special Masters consider potential vote dilution under the Section 2 framework on a region-to-region and district-to-district basis, in order to create effective Black opportunity districts without unnecessarily packing Black voters into fewer districts.

Additionally, the "totality of the circumstances" prong of Section 2 requires Virginia to carefully consider its own history of racial discrimination, and to draw maps that account for the continuing effects of that history on political participation by racial minority voters. This inquiry may include past legalized discrimination; evidence of racial disparities in education, employment and health; racial appeals in campaigns; the responsiveness of elected officials to the interests of the Black community; and the frequency with which Black and other candidates of color are elected to office, among other factors. Gingles, 478 U.S. at 36-37 (quoting S. Rep. No. 97-417, at 28-29).

In Gingles itself, for example, North Carolina drew maps that made Black voters the minority in several multimember districts, effectively "submerging [Black Voters] in a white majority." Id. at 46. The Supreme Court held that these maps violated the Voting Rights Act. Id. at 80. In reaching this holding, the Court noted several factors which helped perpetuate the state's unequal and discriminatory political system, including North Carolina's "legacy of official discrimination" in voting, education, housing, employment, and healthcare. Id. at 80. The Court
likewise noted that state politicians continued to appeal to racial prejudice on the campaign trail, and that North Carolinians often voted along racial lines. Id. Making matters worse, rather than countering this unequal environment, the state's voting maps "acted in concert" with these factors, causing a political process "not equally open" to Black North Carolinians. Id.

Many of the discriminatory hallmarks identified by the Gingles Court persist in Virginia today. Here, as in Gingles, the Commonwealth has a legacy of discrimination in voting, education, housing, employment, and healthcare. \({ }^{75}\) Here, as in Gingles, modern politicians appeal to racial prejudice to win elections. Virginia must therefore do today what North Carolina failed to do in Gingles: it must take these factors into account and draw districts that provide Black voters and other voters of color an equal opportunity to participate in its political process and elect candidates of their choice. This is especially true in the regions of the state in which voting is significantly racially polarized, and thus where the Voting Rights Act mandates such consideration. In sum, Virginia's final maps must scrupulously avoid packing and cracking Black voters. They must empower-not dilute-the Black vote.

\footnotetext{
\({ }^{75}\) See infra Section I.C. See also Report from The Commission to Examine Racial Inequity in Virginia Law, Identifying and addressing the vestiges of inequity and inequality in Virginia's laws (Nov. 15, 2020), https://www.governor.virginia.gov/media/governorvirginiagov/governor-of-virginia/pdf/2020-Commission-Report---Inequity-and-Inequality-in-Virginia-Law.pdf.
}

\section*{B. Virginia State Law Provides Even Greater Protection for Black Voters than the Voting Rights Act.}

While federal law requires vigilant protection of the voting rights of people of color, Virginia law requires even more. Indeed, just last year, the people of Virginia amended the Commonwealth's Constitution to require districts that "provide, where practicable, opportunities for racial and ethnic communities to elect candidates of their choice." Va. Const. art. II, § 6. And since passing that amendment, the people have enacted two laws expanding and reaffirming legal protections for voters of color: Va. Code § 24.2-304.04 (the "Statutory Criteria") and Va. Code § 24.2-126 (the "Voting Rights Act of Virginia").
1. The Voting Rights Act of Virginia Reaffirms and Extends the Protections Guaranteed Under Federal Law.

Earlier this year, the Commonwealth passed the Voting Rights Act of Virginia. Va. Code § 24.2-126. This statute reaffirms the protections of the federal Voting Rights Act. It bars any voting law that "that results in a denial or abridgement of the right of any citizen of the United States to vote based on race or color[.]" Id. It goes farther with respect to local redistricting, prohibiting any map for a local governing body or elected school board that causes "retrogression in the position of members of a racial or ethnic group with respect to their effective exercise of the electoral franchise." Id. Va. Code § 24.2-129(C). This was an essential element of
redistricting in Virginia under the preclearance regime of the Voting Rights Act prior to the 2013 Shelby County v. Holder decision.

While not directly applicable to the statewide redistricting plans at issue here, Va. Code § 24.2-129 demonstrates a clear intent under Virginia law to ensure continued, fair, and adequate representation for communities of color by preventing the diminishment of already established electoral gains made by these communities. Any new maps should follow this same principle and ensure continued, adequate representation for communities of color. As evidenced herein, the road to something approaching adequate representation for Black Virginians has been long and hard, and it is essential that any new maps do not erase what gains have been made.
2. The Statutory Criteria Expand the Federal Voting Rights Act's Already-Robust Protections by Explicitly Barring the Packing and Cracking of Minority Voters, and by Securing Black Voters' Right to Form Coalitional Districts.

In 2020, Virginia passed the Statutory Criteria, a statute updating its redistricting process. Va. Code § 24.2-304.04. The Statutory Criteria establish nine requirements for voting districts, three of which relate to Virginia NAACP's interests here.

First, mirroring the federal Voting Rights Act, Va. Code § 24.2-304.04(3) states that "no district shall be drawn that results in a denial or abridgement of the right of any citizen to vote on account of race or color[.]" It likewise bars the Commonwealth from drawing districts "in a way that results in a denial or
abridgement of the rights of any racial . . . minority group to participate in the political process and to elect representatives of their choice." Id.

But this part of the Statutory Criteria also goes further than the federal Voting Rights Act-it explicitly prohibits the packing and cracking of communities of color. It bars the Commonwealth from "dispers[ing] [communities of color] into districts in which they constitute an ineffective minority of voters," and from "concentrate[ing] [people of color] into districts where they constitute an excessive majority." Va. Code § 24.2-304.04(3). This requirement directly mirrors the Supreme Court's reasoning in Gingles, where the Court used the same language to explain that the Voting Rights Act prohibits the packing and cracking of Black Voters. \({ }^{76}\) In other words, the Statutory Criteria makes explicit and affirmative what the text of the Voting Rights Act left implicit: The Commonwealth cannot dilute the Black vote by packing too many Black voters into one district or by separating them into multiple districts.

Second, Va. Code § 24.2-304.04(4) bars the Commonwealth from "dilut[ing] or diminish[ing] [voters' of color] ability to elect candidates of choice either alone or in coalition with others." This provision expands legal protection for "coalitional districts"-districts which enable racial minority voters to vote cohesively together

\footnotetext{
\({ }^{76}\) See Thornburg, 478 U.S.at 46 n .11 ("Dilution of racial minority group voting strength may be caused by the dispersal of blacks into districts in which they constitute an ineffective minority of voters or from the concentration of blacks into districts where they constitute an excessive majority.").
}
with other voters of color in sufficient numbers so as to elect their preferred candidates-to also include districts which enable voters of color to vote cohesively together with white "crossover" voters in sufficient numbers so as to elect their preferred candidates. This means that many more Black and other racial minority opportunity districts can be created in Virginia-and indeed that they must be created where failing to do so would have the effect of diluting or diminishing the ability of voters of color to elect candidates of their choice. See also Special Masters Mem. ("SM Mem.") at 27 ("The Statutory Criteria do require that we draw districts where minority groups are able to elect their candidates of choice, either alone or in coalition with other groups.").

Thus, in Virginia, Black and other voters of color have a protected right to coalesce not only together with other voters of color, but also with white voters with whom they vote cohesively, in order to form districts in which they can elect their preferred candidates. \({ }^{77}\) In drawing new district lines, the Commonwealth cannot impair Black Virginians' ability to form and preserve such coalitions.

\footnotetext{
\({ }^{77}\) The Statutory Criteria, thus, appear to go beyond the plurality opinion in Bartlett v. Strickland, which construed the Voting Rights Act as not applying to claims for the creation of "crossover" districts comprised of voters of color and white voters who "cross over" to vote cohesively with those voters of color. 556 U.S. 1, 13 (2009). See also Special Masters Mem. at 27 ("The Statutory Criteria do require that we draw districts where minority groups are able to elect their candidates of choice, either alone or in coalition with other groups. This follows the approach of a majority of federal circuits, which require such coalition districts." (citing Campos v. City of Baytown, 840 F.2d 1240 (5th Cir.), reh'g denied, 849 F. 2 d 943 (1988), cert. denied, 492 U.S. 905 (1989). But see Nixon v. Kent County, 76 F.3d 1381 (6th Cir. 1996) (en banc) (concluding that coalition districts are not required by the VRA)).
}

Third, under Va. Code § 24.2-304.04 (4), "[d]istricts shall be drawn to preserve communities of interest." A community of interest ("COI") is "a neighborhood or any geographically defined group of people living in an area who share similar social, cultural, and economic interests." Id.

Here, too, the Statutory Criteria may in certain instances go beyond the federal Voting Rights Act in providing additional protections for the Black and other communities of color that so often comprise local communities of interest. The Supreme Court has interpreted the Voting Rights Act to require that a state "take[s] [COIs] into account[.]" League of United Latin American Citizens ("LULAC") v. Perry, 548 U.S. 399, 434 (2006) (quotation omitted). But under the Statutory Criteria, districts "shall" be drawn to preserve COIs. Va. Code § 24.2-304.04 (4) (emphasis added), thus requiring their preservation where possible. Centering COIs in this way supports district cohesion and a sense of shared interests and identity among voters, and reflects a concern for ensuring that Virginians are represented by individuals who actually speak for their community and understand their community's needs.

Special Masters Trende and Grofman correctly note in their Memorandum that COIs can be defined by factors such as "media, public trans[it], . . and
institutions such as schools and churches. \({ }^{38}\) But under federal and state law, other factors define COIs as well. Indeed, under the Statutory Criteria, a community of interest includes people "who share similar social, cultural, and economic interests." Va. Code § 24.2-304.04 (4). This language fits federal court precedent defining COIs "by economic, social, cultural, and historical ties." Backus v. South Carolina, 857 F. Supp. 2d 553, 562 (D. S.C. 2012). \({ }^{79}\)

Applying these broader factors, federal courts have recognized COIs using more than just geography, topography, media markets, public transit systems, schools, and churches. For example, in Diaz v. Silver, a federal court recognized an Asian-American COI in two separate New York neighborhoods, Sunset Park and Chinatown. 978 F. Supp. 96, 123-24 (E.D. N.Y. 1997). The court noted that these neighborhoods' voters "work together, attend the same health clinics, . . . shop in the same stores[,] . . . and speak the same dialect." Id. at 124. The same community organizations likewise serve both neighborhoods. Id. at 102. While the court struck down the district containing this COI on other grounds, the state redrew maps that

\footnotetext{
\({ }^{78}\) Special Masters' Memorandum to the Chief Justice and Justices of the Supreme Court of Virginia (Dec. 7, 2021), https://www.vacourts.gov/courts/scv/districting/memorandum re va redistricting_2021.pdf.
79 See also Bethune-Hill v. Virginia State Bd. of Elections, 326 F. Supp. 3d 128, 142 (E.D. Va. 2018) ("[A] district that is drawn with some consideration of communities of interest links voters who share . . . social . . . [and] economic interests."); Graham v. Thornburgh, 207 F. Supp. 2d 1280, 1286 (D. Kan. 2002) (When identifying communities of interest, "common social, cultural, racial, ethnic, and economic interests should be considered."); King v. State Bd. of Elections, 979 F. Supp. 619, 625 n. 4 (N.D. Ill. 1997) (the Voting Rights Act permits states to consider the "preservation of cultural, social, and economic communities of interest") (quotation omitted).
}
preserved the COI—maps the Supreme Court summarily affirmed. Diaz v. Silver, 55 U.S. 801 (1997), aff'd mem. \({ }^{80}\)

Diaz shows that a state can preserve a COI centered around a community of color without having race predominate redistricting in a way that violates the Equal Protection Clause, see infra Subsection C. In Diaz, the state no doubt considered race: it drew a district containing a COI with voters "mostly of Chinese background." Diaz, 978 F. Supp. at 124. But the state also considered other social, cultural, and economic factors, including the industries in which the COI's voters worked, the stores in which they shopped, and their common dialect. Id. Applying this holistic approach, a state can preserve a minority COI without letting race necessarily predominate.

Similarly, in Rodango v. Illinois State Bd. of Elections, a federal court held that race did not predominate Illinois' decision to increase Black voting power by drawing a district that joined two majority-Black residential areas into one COI. 836 F. Supp. 2d 759, 761-65 (N.D. Ill. 2011). There, the court noted that these areas' voters work in similar industries, have similar recreational activities, use similar social services, and have family ties. Id. at 764. Thus, even though the state

\footnotetext{
\({ }^{80}\) See also Favors v. Cuomo, 39 F. Supp. 3d 276, 295 (E.D. N.Y. 2014) (noting that the Court "ultimately adopted a map that included districts that maintained the integrity of . . . [the] Asian-American communities [recognized as COIs in Diaz]").
}
recognized a COI that merged two majority-Black areas, race did not predominate. Id. at 766-70.

These same principles apply to Virginia's Black communities of interest. Thus, just like the communities of interest in Diaz and Radogno, Virginia's Black communities of interest must be preserved.

\section*{C. The Special Masters' Use of Race to Ensure Compliance with the Voting Rights Act After Drawing Their Initial Maps Is Constitutional}

The Equal Protection Clause of the Fourteenth Amendment prohibits Virginia from "separat[ing] its citizens into different voting districts on the basis of race" without sufficient justification. Bethune-Hill, 137 S. Ct. at 797; Miller v. Johnson, 515 U.S. 900, 911 (1995). Strict scrutiny is triggered whenever "circumstantial evidence of a district's shape and demographics or more direct evidence going to legislative purpose, that race was the predominant factor motivating the legislature's decision to place a significant number of voters within or without a particular district." Bethune-Hill, 137 S. Ct. at 797. This can include evidence that a state's use of race in drawing district lines predominated over or conflicted with other traditional redistricting principles. See id. at 797-99.

Nevertheless, as correctly highlighted in Special Masters Trende and Grofman's Memorandum of December 7, 2021, "[t]he U.S. Supreme Court has assumed, without deciding, that compliance with the [Voting Rights Act] reflects a
compelling governmental interest" and that "when the [Voting Rights Act] preconditions established in Thornburg \(v\) Gingles . . . are met and the totality of the circumstances would demand race-conscious drawing, the 14th Amendment would allow it." \({ }^{81}\) Thus, race may-and indeed must-be considered for the drawing of districts in the Virginia jurisdictions that exhibit racially polarized voting, insofar as it is used to protect voters from vote dilution. Additionally, preserving communities of interest-a requirement under Virginia law, see infra Subsection B.ii.-is a traditional redistricting principle that, while often correlated with race, can be accomplished without allowing race to predominate. See, e.g., Diaz, 978 F. Supp. at 124; Rodango, 836 F. Supp. at 761-70; see also infra notes 83, 84.

Special Masters Trende and Grofman's use of race in their map-drawing process appears to be entirely consistent with Supreme Court precedent, and will continue to be as they continue to ensure compliance with the Voting Rights Act and the preservation of communities of interest in accordance with this and other public comments.

Underlying all of these laws is one touchstone principle: in drawing voting maps, Virginia must actively counter its pervasive record of racial discrimination and disenfranchisement, and in particular that of Black voters. Virginia's recent

\footnotetext{
\({ }^{81}\) Supra note 78.
}
failures to draw a permissible map compound on its lengthy history of racial inequality and show that, rather than facing this discriminatory past, the Commonwealth continues to ignore it or, worse, embrace it. Virginia's long and shameful record of denying, diluting, and devaluing the Black vote must end-and federal and state law require that it does.

\section*{III. ANALYSIS OF SPECIAL MASTERS INITIAL DISTRICT MAPS AND VIRGINIA NAACP PROPOSED DISTRICTS}

Virginia NAACP has worked with our counsel to analyze the initial maps and accompanying memorandum presented to the Court by the Special Masters on December 7, 2021. While many of the Special Masters' proposed districts appear to continue to provide Black voters with equal opportunities to elect their candidates of choice, others do not. The primary factor underlying many of our concerns is that the Special Masters needlessly relied upon ACS estimates in constructing their districts instead of the more accurate complete-count 2020 Census data, despite the relatively small Black non-citizen population across the Commonwealth. \({ }^{82}\) That error has led the Special Masters to overestimate-and thereby dilute-Black voting strength in a number of districts, as more fully laid out below.

The Special Masters also acknowledge in the brief overview of both their

\footnotetext{
\({ }^{82}\) The total Black population of Virginia is 97.2 percent citizen and 2.8 percent non-citizen. The Black VAP is 96.8 percent citizen and 3.2 percent non-citizen. See Citizen Voting Age Population (CVAP) Special Tabulation from the 2015-2019 5-Year American Community Survey (ACS), available at https://www.census.gov/programs-surveys/decennial-census/about/voting-rights/cvap.2019.html.
}
proposed House of Delegates and Senate plans that "we do not have as many minority-majority districts as the existing plans." SM Mem. at 26, 41. The Special Masters contend that "this is the incorrect inquiry under both Virginia and federal law." Id. Their conclusion is partially correct.

Fewer majority-minority districts can be indicative of a reduction in the ability of Black voters to have equal opportunities to elect candidates of their choice. This standard, known as "retrogression," has been well established in the Voting Rights Act since its enactment in 1965. Retrogression, or backsliding, simply means that the voting change "will make members of such a group worse off than they had been before the change." 28 C.F.R. § 51.54(b); Beer v. United States, 425 U.S. 130, 14042 (1976). Our analysis of the Special Masters' proposed House of Delegates and Senate districts takes into consideration both whether those proposed districts make Black voters worse off than they are under the existing plan, and whether those districts provide them with equal opportunities to elect their candidates of choice.

Virginia NAACP has also worked closely with NAACP local branch leaders and community members from across the Commonwealth over the past several months in generating our proposed district maps for the Virginia House, Senate, and US congressional delegation. These maps are designed to best represent the Black communities of interest in each region and proposed district, as reflected by input from members of those communities, as well as to best protect the ability of Black
voters to elect candidates of their choice in each district. We also took great care in ensuring our proposed districts satisfy Virginia's other redistricting criteria-and many cases do a better job of this than the Special Masters' maps. See Appendix D.

We chose not to propose statewide maps, but rather to focus on the areas with the largest Black communities of interest and thus the highest concentration of Black voters. This should not be seen as an endorsement of districts not addressed herein, but rather an effort to focus the attention of the Court and Special Masters on the areas of greatest importance to maintaining Black political representation in the House of Delegates, the Senate, and Virginia's US congressional delegation, as required by the federal Voting Rights Act and Virginia law.

\section*{A. State House Districts}

Our focus is on the six regions of the Commonwealth where Black voters currently have the ability to elect or influence House districts: Hampton/Newport News; Norfolk/Portsmouth; Richmond/Petersburg; Fredericksburg; Dale City/Quantico; and northern Virginia. See Appendix A, NAACP-Proposed Maps of House of Delegates Districts.

\section*{1. Hampton/Newport News}

The Hampton/Newport News area has two proposed districts, HD 85 and HD 87, with significant Black populations. According to the 2020 Census, \({ }^{83}\) proposed

\footnotetext{
\({ }^{83}\) For all references to Black VAP herein, see 2020 Census State Redistricting Data (Public Law 94-171) Summary File-Virginia Prepared by the U.S. Census Bureau, 2021.
}

HD 85 has a BVAP of 44.48 percent and proposed HD 87 has a BVAP of 56.57 percent, slightly lower than the 2019 CVAP estimates provided by the Special Masters. See SM Mem. at 45. Although we have shown that two compact majorityBlack House of Delegate districts can be drawn in this area (our proposed districts HD 92 and 95), it appears the two districts proposed by the Special Masters continue to provide Black voters with equal opportunities to elect their candidates of choice. The most significant difference between the Special Masters' proposed map and ours is that their proposed HD 87 does not include the area around Langley Air Force Base.

\section*{2. Norfolk/Portsmouth}

In the Norfolk/Portsmouth area, the Special Masters have combined much of the Black community of interest in our proposed HDs 79 and 80 into a single district, their proposed HD 88. That choice has a cascading effect on all of the districts in the region, resulting in fewer Black opportunity-to-elect districts statewide. The Special Masters' proposed House of Delegates districts also are less compact than our proposed districts, using the Reock and Polsby Popper metrics employed by the Special Masters. \({ }^{84}\) In addition, the Special Masters' decision to "maintain[] ignorance about the residence of incumbents," SM Mem. at 10 , resulted in the elimination of the cores of two Black ability-to-elect districts, and places two Black

\footnotetext{
\({ }^{84}\) See Appendix D, Figure 2.
}
incumbents in the same district, Special Master proposed HD 88. The substantial, but unneeded, changes made by the Special Masters in this area strongly support our recommendation to use the proposed House of Delegates districts we have drawn.

\section*{3. Richmond/Petersburg}

In the Richmond/Petersburg area, the Special Masters' and our plans propose four House of Delegates districts drawn around Black communities of interest. The Special Masters' proposed HD 82 is significantly different from what we have recommended. In our proposed HD 63, we have shown that a majority-Black district (50.31 percent BVAP) can be readily drawn from the core of Petersburg to include the Black community of interest extending northwards toward the area just outside of Chester. In contrast, the Special Masters' proposed HD 82, this greater community of interest is split and the BVAP is reduced to 45.51 percent. Their proposed HD 82 includes rural areas east, west, and south of Petersburg that are predominately non-Hispanic white, with little in common with the Black community of interest in and around Petersburg. Given the presence of racially polarized voting that is generally present in the rural areas of Virginia, it appears that Special Masters' proposed HD 82 may be insufficient to allow Black voters to continue to be able to elect their candidates of choice. Of the Special Masters' remaining proposed House of Delegates districts in and around Richmond/Petersburg, proposed HD 79 is the
only majority-Black district with a BVAP of 57.7 percent. The other two proposed districts, HD 80 and 81 , have BVAPs of 46.84 percent and 47.91 percent.

We recommend using our proposed districts in this region (our proposed HDs \(63,70,71\) and 74 ) because they are more compact and preserve core Black communities of interest while maintaining a BVAP in each exceeding 50 percent, except for our proposed HD 71 in Richmond, which has a BVAP of 44.54 percent.

\section*{4. Fredericksburg}

In Fredericksburg, we have proposed a House of Delegates district, HD 28, which maintains more of the Black of community of interest to improve Black voters' ability to influence the election with a BVAP of 21.89 percent. The Special Masters' district in this area, proposed HD 65, is less compact and includes areas to the north and east of Fredericksburg, resulting in a BVAP of just 17.26 percent. We are concerned about the Special Masters' unnecessary dilution of Black voting power in a district that for the first time elected a Black candidate of choice in close elections in 2019 and again in 2021.

Directly to the north, we propose the creation of a new influence district around a Black community of interest which has increased dramatically in population over the past decade, with our proposed HD 88 increasing in BVAP from 9.89 percent in 2010 to 23.09 percent in 2020. This is a compact district that runs
along I-95 and unifies the Black community of interest between Fredericksburg and Quantico.

\section*{5. Dale City/Quantico}

In the Dale City and Quantico region, we have proposed preserving the core Black community of interest within three districts (our HD 2, 51, 52) while the Special Masters' plan splits it among four (SMs’ HD 19, 23, 24, 25). While the BVAP in our proposed House of Delegates districts in the Dale City and Quantico region are comparable to those in the Special Masters' plan, our districts are far more compact, and center more closely around the core of the Black community of interest.

\section*{6. Northern Virginia}

Finally, in northern Virginia, Special Masters' proposed HD 3 and our proposed HD 49 are very similar. Generally, the BVAP in the remaining northern Virginia districts is the same between the two plans despite substantial differences in their configurations. The differences do not appear to be significant because there are no influence districts in which the BVAP exceeds 30 percent.

In South Alexandria, we propose a new influence district, HD 44, around a Black community of interest that has increased significantly in population over the past decade, up from just 15.36 percent BVAP in 2010 to 24.46 percent in 2020.

\section*{B. State Senate Districts}

Among the six regions of Virginia described by the Special Masters in their proposed State Senate redistricting plan, there are two regions that are the focus of our comments and our proposed districts: "Southside and Richmond" (Special Master SDs 8-17) and "Hampton Roads" (Special Master SDs 18-24). See SM Mem. at 21-22; Appendix B, NAACP-Proposed Maps of Senate Districts.

\section*{1. Southside and Richmond}

We have significant concerns with the Special Masters' proposed districts in the Southside and Richmond areas. Those proposed districts unnecessarily dilute the voting power of the geographically compact and politically cohesive Black community of interest in and around Petersburg and Richmond. That result is concealed by the Special Masters' use of less reliable Black CVAP data drawn from the 2019 five-year ACS estimates, which in this region in particular severely overestimate Black population compared to the actual BVAP reported in the 2020 decennial Census data.

For example, the Special Masters describe their proposed SD 13 as a majorityBlack district with an overestimated Black CVAP of 51.85 percent, \(i d\). at 29 , when in fact their proposed district has a BVAP of just 48.37 percent according to the 2020 Census. Similarly, the Special Masters describe their proposed SD 14 as a strong Black ability to elect district with an overestimated Black CVAP of 45.97 percent,
id., while 2020 Census data reveals a BVAP of just 37.97 percent. The Special Masters' proposed SD 15 likewise uses an overestimated Black CVAP of 42.97 percent, compared to 2020 Census data identifying a BVAP of only 36.73 percent. The Special Masters needlessly rely upon ACS estimates for these districts instead of more accurate complete-count 2020 Census data, despite the relatively small Black non-citizen population. That error has led the Special Masters to dilute Black voting strength by choosing to create three lower-performing Black opportunity districts instead of the two strong majority-Black districts.

The Special Masters' proposal also does not respect natural boundaries, needlessly splitting proposed SD 14 across the James River. Their proposed SD 13 unnecessarily crosses the James River to include Charles City, Highland Springs, and Montpelier to comply with equal population requirements. In the process, their proposed SD 13 joins together unrelated communities and splits the Black community of interest in Petersburg with their proposed SD 12. The combination of unrelated communities with little in common, spread out over a vast distance in SD 13, makes it more difficult for Black voters to elect their candidates of choice than under the existing Senate Districts and in our proposed districts.

In contrast, we recommend creating two effectively performing districts (our proposed SD 9 and SD 16), in the Southside and Richmond area, that have a BVAP of just over 50 percent according to 2020 Census data. Unlike the Special Masters’
proposed districts, our proposal respects the natural boundary that the James River forms between districts.

\section*{2. Hampton Roads}

Turning to the Hampton Roads region, we begin by observing that the Special Masters' proposed SD 23 generally appears to provide Black voters with the ability to elect their candidates of choice. The Special Masters' use of ACS data overestimates Black CVAP at 50.95 percent, compared to BVAP of 47.57 percent reported in the 2020 Census. It appears that by including the core Black community of interest in Hampton and Newport News, the Special Masters' proposed SD 23 preserves this community of interest and will provide Black voters with an equal opportunity to elect their candidate of choice.

However, the same is not clear with respect to the other three proposed districts in this area, Special Masters' proposed SDs 17, 18, and 21. The use of Black CVAP overestimates Black voting power in all three districts, although only marginally for proposed SD 17. Comparing the ACS estimates with 2020 Census data reveals: proposed SD 17 has an estimated CVAP of 41.84 percent and a VAP of 40.31 percent; proposed SD 18 has an estimated CVAP of 44.79 percent and a VAP of 42.59 percent; and proposed SD 21 has an estimated CVAP of 44.33 percent, and a VAP of 40.55 percent. In summary, none of the three proposed Senate Districts in this region has a BVAP greater than 42.59 percent. That raises
considerable questions about the ability of Black voters to elect their candidates of choice, taking into consideration higher levels of racially polarized voting in the area.

Our proposed districts for this region (our SDs 5 and 18) preserve Black communities of interest in two Senate Districts that maintain the ability to elect of Black voters.

\section*{C. Congressional Districts}

The Special Masters acknowledge that under the current congressional districting plan, there are two districts in which Black voters have an equal opportunity to elect their candidates of choice, CD 3 and CD 4. See SM Mem. at 14-15, 17. The Special Masters' proposed plan represents that it maintains CD 3 and CD 4 as "ability to elect" districts for Black voters, drawing districts in which "Black voters represent \(44.5 \%\) and \(45.26 \%\) of the populations, respectively." Id. at 17. According to the Special Masters, the percentages of Black voters are "sufficient to elect a Black candidate of choice in both districts" and parallel the "minority proportions" under the existing districting plan drawn by the federal court. Id.

The Special Masters have dramatically altered the boundaries of CD 3 in their proposed plan. They began by deviating from the existing boundaries drawn by Dr. Grofman and adopted by the federal court to create what they describe as "a compact district comprised of the four major cities in the Hampton Roads area: Norfolk,

Newport News, Hampton and Portsmouth. We then split the City of Chesapeake roughly at the Hampton Roads Beltway in order to maintain the district's compactness while achieving population equality." Id. They acknowledge that their choices "left few options for the 2nd District," which was redrawn to incorporate much of the existing Black community of interest in Isle of Wight County in the current CD 3. Id.

The Special Masters have overemphasized compactness and preserving the integrity of the four major cities in Hampton Roads, with the latter priority not present in the existing CD 3. They propose eliminating the CD 3 remedial district drawn by Dr. Grofman and imposed by the federal court in Personhuballah v. Alcorn, unnecessarily removing the western half of the district. Furthermore, they ignore the greater weight that Virginia law places on providing Black voters with equal opportunities to elect, Va. Code § 24.2-304.04, and preserving existing communities of interest, including those currently in the western portion of CD 3. Va. Code § 24.2-304.04(5). In the process, the Special Masters acknowledge that their changes have not improved the compactness of CD 2, and indeed have caused that district to "lose[] functional contiguity in the cities of Suffolk and Chesapeake...." SM Mem. at 14.

It is unnecessary to deviate from Personhuballah's remedial CD 3 by adding into the district Navy Station Norfolk and neighborhoods in northern Norfolk such
as Algonquin Park, Bel-Aire, Camelia Shores, East Ocean View, Larrymore Lawns, North Camelia Acres, Oceanair, Suburban Acres, and Willoughby Terrace. Instead, the Special Masters should continue to follow Personhuballah's inclusion of the Black community of interest from the existing CD 3 including: Deanes, Driver, Huntersville, Magnolia, Oakland, Red Top, and communities in the Quaker Neck and Sandy Bottom areas of Portsmouth County; Isle of Wight County; and the Independent City of Franklin. See Appendix C, NAACP-Proposed Maps of US Congressional Districts.

Under the Personhuballah remedial plan, the Black community of interest in the areas removed under the proposed CD 3 have had an equal opportunity to elect their candidate of choice. Joining with other Black voters in the Hampton Roads area, those voters have secured representation to address their common needs including depressed socio-economic status and disparities in educational and employment opportunities. The Black community of interest in CD 3 has worked together to form a politically cohesive group of voters with common ties that would be severed under the Special Masters' proposed CD 3. Regardless of the similar demographics, the proposed changes to Personhuballah's remedial CD 3 would make it more difficult for Black voters to elect their candidates of choice because it would effectively remove the western portion of the Black community of interest and replace it with a large group of voters who have had no ties to CD 3. The
unnecessary changes to CD 3 would make it more expensive and difficult for a Black candidate of choice to be elected because of the costs of reaching out to an entirely new constituency.

We strongly recommend that the Special Masters maintain, to the greatest extent possible, the contours of Personhuballah's remedial CD 3. Our proposed CD 3 illustrates the viability of continuing to include the entire Black community of interest in the district, while preserving the cores of both districts in the Hampton Roads region (CD 2 and CD 3).

CD 4, which currently provides Black voters with equal opportunities to elect their candidate of choice, appears to continue to have those opportunities under the Special Masters' plan. We nevertheless recommend that the Special Masters consider our alternative, which has some differences in the neighborhoods and communities proposed for CD 4, particularly around Richmond City and Henrico Counties, that better represent the greater Black community of interest in CD 4.

\section*{CONCLUSION}

For the reasons stated herein, the Virginia State Conference of the NAACP respectfully requests that the Special Masters and the Supreme Court of Virginia carefully consider this written comment, including and especially our analysis of the Special Masters' initial district maps and our proposed districts, and adjust future maps to be considered by this Court accordingly.

Respectfully submitted,
Robert N. Barnette Jr.

I live in Richmond (the city of) It seems ridiculous to chop[ up the Richmond metro area, especially the western edge of Henrico County and the eastern portion of Goochland County, which have much more in common with Richmond than rural areas to the south of Richmond all the way to the North Carolina border. The same thing occurs in District 5, which includes parts of Chesterfield County, the residents of which consider themselves to be living in Richmond. Also District 5 goes all the way to the North Carolina border. The rural southern part of Virginia has more commonality with its counties than the cities of Charlottesville and Lynchburg.

Also, District 1 puts much of Henrico County (also residents of which consider themselves to live in Richmond) with rural counties along the Eastern Shore.

It would make much more sense to include Richmond and its surrounding counties as one district and possibly Colonial Heights and Petersburg as one district. The southern rural districts should be combined into far west, middle and eastern districts.

Thank you for your consideration.

Greetings
I am writing to voice my support of the Farkas congressional redistricting map as opposed to the maps created by the Special Masters. While the Special Master map appears, at first glance, to eliminate gerrymandered districts, it decimates all 3 districts held by women, and does not keep communities of interest cohesive.

In contrast, the Farkas map retains the current congressional split, keeps communities of interest together, and protects minority interests, all while creating a near perfect population division.

Please consider and support the Farkas congressional redistricting map.
Thank you
Barbara Nielsen

}

Good Morning!
I am emailing to let you know that I am opposed to the proposed Congressional maps for Virginia. I request that you adopt the Farkas map instead.

I am a native of Virginia, and have voted in every election since I became eligible.
Respectfully,
--
Leslie Rubio
Activist/Advocate for Women
she/her
Commonwealth of Virginia Notary Public \#7278454 (804) 484-9884

December 16, 2021
Ms. Muriel-Theresa Pitney
Clerk of Court
Supreme Court of Virginia
100 N. 9th St, \(5^{\text {th }}\) Floor
Richmond, VA 23219
Dear Ms. Pitney:
On November 13, 2020, Sean Trende declared that application of "modest redistricting, combined with the demands of reapportionment, are likely to lead" Virginia to "no change" in its 7-4 party affiliation split among its congressional delegation, absent "aggressive gerrymander[ing]." One year later, this Court tasked Mr. Trende with redrawing Virginia's congressional map upon his promise to apply fair and neutral redistricting principles. \({ }^{2}\) This Court now has before it a map that the Special Masters claim produces a " \(6-5\) " party affiliation split, in which "Republicans could win a majority of the seats in Virginia's delegation" some years. \({ }^{3}\) Thus, upon the advice of Mr. Trende himself, this Court should view this map with some skepticism. By employing strict adherence to modest, traditional redistricting principles, this Court should reject the Special Masters' congressional map-and any aggressive gerrymander-that causes this unpredictable shift.

The memorandum accompanying the court-appointed Special Masters' congressional map released on December 8 (the "December 8 Map") is confounding. Over 55 pages, the Special Masters endeavor to paint a picture of maps drawn in a mindful and rigorous manner. Yet, upon engaging with the content, the vague reference to the constitutional principles that should dominate this court-ordered redistricting process gives way to a haphazard, unprincipled process that is unmoored from the history, tradition, and communities that form the Commonwealth. Indeed, the Special Masters' first point of order as they write to assure this Court and Virginians that they have performed their duty well is to declare that their "prime directive for drawing these maps comes not from the constitutional or statutory provisions described by this Court," but from the need to "behave in an apolitical and nonpartisan manner. \({ }^{, 4}\) It seems the Special Masters have misunderstood the purpose of their work, as appearances of bipartisanship are not a defense to unconstitutional maps.

The December 8 Map falls short on numerous traditional redistricting principles, even failing to achieve the population equality that is the singular driving force behind this entire decennial process.

\footnotetext{
\({ }^{1}\) Sean Trende, Part 2: What Redrawn House Maps Could Mean in 2023, Real Clear Politics (Nov. 13, 2020), https://www.realclearpolitics.com/articles/2020/11/13/part_2_what_redrawn_house_maps_could_mean_in_202 3_144651.html.
\({ }^{2}\) See Nov. 19, 2021 Redistricting Appointment Order at 1.
\({ }^{3}\) December 7, 2021 Memo from Bernard Grofman, Ph.D. and Sean Trende to the Chief Justice and Justices of the Supreme Court of Virginia re Redistricting Maps ("Memo") at 18-19.
\({ }^{4}\) Memo at 2 (emphasis added).
}

Worse, it does so to the detriment of minority populations, which constituted the whole of Virginia's population growth over the last decade, and to the detriment of Virginia's close-knit communities, which it dices and divides with a complete lack of precision. As the Special Masters are no doubt aware, the currently existing congressional map is the result of a years-long litigation dedicated to ensuring fair representation for certain of Virginia's minority communities while adhering to federal and state legal requirements. Rather than use this court-approved map as a starting point and building upon the redistricting principles it embodied, the Special Masters chose to start from scratch. While the December 8 Map may be, in the Special Masters' words, a "true joint effort," it departs significantly from the lessons learned by the Commonwealth and its leaders in the last decade. If adopted, the December 8 Map would likely suffer from the same fate as its 2011 predecessor-years of tumult in the courts.

Our client has a vested interest in avoiding such an outcome. We represent James Farkas, a Virginia voter who successfully challenged the General Assembly's unconstitutional racial gerrymander of the congressional map following the last census. The federal court reviewing Mr. Farkas's challenge found that the Virginia General Assembly unjustifiably packed Black voters in Congressional District 3, thereby diluting their voting strength elsewhere in the Commonwealth. As a plaintiff to that litigation, Mr. Farkas now seeks to ensure that the principles behind the federal court's ruling are preserved-and the errors underlying the General Assembly's 2011 congressional plan are not replicated-in the redistricting that is now taking place before this Court.

In light of the December 8 Map's failures, and pursuant to Virginia law and this Court's rules inviting public participation in the Court's redistricting deliberations, \({ }^{5}\) we submit the attached congressional map (the "Farkas Map") on behalf of our client for consideration by the Supreme Court of Virginia and its Special Masters. \({ }^{6}\) The Farkas Map satisfies all applicable provisions of federal and Virginia law. Importantly, it achieves strict population equality, preserves communities of interest, and ensures that the voting strength of Virginia's growing racial and ethnic minority population is not diluted. We strongly encourage the Special Masters and this Court to adopt the Farkas Map for Virginia's congressional districts.

\section*{I. Background}

\section*{A. The Virginia General Assembly enacted an unlawful congressional plan in 2011.}

During the one hundred years following Reconstruction, Virginia did not elect a single Black representative to Congress. \({ }^{7}\) That changed in 1992, when the U.S. Department of Justice, acting under the power of the federal Voting Rights Act, directed the Virginia General Assembly to draw a

\footnotetext{
\({ }^{5}\) Va. Code Ann. § 30-399(C) (2020); Sup. Ct. of Va., Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, R4(a) (Feb. 23, 2021), https://www.vacourts.gov/courts/scv/article_2_section_6a_rules_procedures.pdf.
\({ }^{6}\) Images of the Farkas Map are included in-line in this submission as well as in the attached Appendix. Several mapping files for the Farkas Map have been submitted to the Court alongside this submission, in a .zip file labeled "Farkas Map Mapping Files."
\({ }^{7}\) David Wasserman, Is it Time to Rethink Hyper-Minority Districts?, The Atlantic (Sept. 20, 2021), https://www.theatlantic.com/politics/archive/2021/09/it-time-rethink-hyper-minority-districts/620118/.
}
congressional district that provided Black voters an opportunity to elect a representative of their choice. \({ }^{8}\) As a result, District 3 was drawn as a majority-Black district in 1992 and voters in that district elected Representative Bobby Scott to Congress that same year. Representative Scott has represented District 3 continuously since then. He was the only Black member in Virginia's congressional delegation from 1992 through 2016.

Over time, what began with the Department of Justice's important effort to ensure that Black voters in Virginia were represented in Congress turned into the Virginia General Assembly packing Black voters into one congressional district, diluting their voting strength elsewhere in the Commonwealth. Although Black voters in District 3 had consistently elected their representative of choice by significant margins, ranging from 69 percent to 97 percent of the vote, the Republican-controlled General Assembly raised the Black voting age population ("BVAP") of District 3-from 53.1 percent to 56.3 percentfollowing the 2010 Census. \({ }^{9}\) To do so, the General Assembly moved "predominantly white" populations out of District 3 and moved "predominantly African-American" voters into the district. \({ }^{10}\)

Along with other residents of District 3, Mr. Farkas brought a lawsuit in federal court, arguing that the district was an unconstitutional racial gerrymander. In 2014, the majority of a three-judge panel agreed, finding that the General Assembly had violated the U.S. Constitution by unjustifiably packing Black voters into District 3. \({ }^{11}\) The court concluded, based on direct and circumstantial evidence, that "race was the predominant factor" in drawing District 3, as mapdrawers sought to ensure the district's BVAP exceeded 55 percent. \({ }^{12}\) Upon reconsideration, the court again declared the General Assembly's plan unconstitutional \({ }^{13}\) and appointed Dr. Bernard Grofman as a special master to advise the court on the appropriate redistricting remedy. \({ }^{14}\) In 66 pages analyzing two map configurations, Dr. Grofman explained the considerations that went into his map-drawing and why his proposed maps addressed the court's concerns, \({ }^{15}\) including that his "concern[] for contiguity and the avoidance of unnecessary splitting of existing political subunit boundaries, and [his] attention to compactness" led to a heavily minority District

}

3 that did not reflect "in any way a predominant concern for race," but rather "naturally reflect[ed] the underlying demography of the state . . . ." \({ }^{16}\) Critically, Dr. Grofman explained that when the new District 3 was drawn in accordance with traditional districting principles alone, rather than predominantly focusing on race, a substantial minority population in District 4 arose "virtually automatically." \({ }^{17}\)

In adopting one of Dr. Grofman's maps, the court credited his approach to drawing the districts, concluding that Dr. Grofman was "guided by the neutral goals of compactness, contiguity, and avoiding unnecessary city or county splits, rather than any racial considerations." \({ }^{18}\) The court explained that Dr. Grofman's plan accorded with the principles of Section 2 of the federal Voting Rights Act because Black voters would not be deprived of the opportunity to elect their candidates of choice in either District 3 or District 4. \({ }^{19}\) The final, court-adopted plan lowered District 3's BVAP to approximately 45 percent and increased District 4's BVAP to about 41 percent. \({ }^{20}\) Each of these BVAP percentages has proven more than sufficient for the Black communities in those districts to elect the candidates of their choice, in coalition with others. Indeed, during the 2016 election, the newly redrawn District 4 elected its first Black member, Representative Donald McEachin, while the newly redrawn District 3 reelected Representative Scott. Both representatives were subsequently reelected in 2018 and 2020.

\section*{B. Virginia's voters demand an end to gerrymandering with the 2020 constitutional amendment.}

Following the unlawful and tumultuous redistricting process of the 2010 cycle, voters successfully placed a proposed amendment to the Virginia Constitution on the 2020 general election ballot, known as the Virginia Redistricting Commission Amendment (the "Amendment"). The Amendment sought to establish a new redistricting commission comprised of 16 members from across the political spectrum, including non-partisan citizens. The Amendment garnered overwhelming support, with almost 66 percent of the electorate voting in favor of adoption. \({ }^{21}\) Nearly every Virginia county showed majority support for the Amendment. \({ }^{22}\) The results demonstrated the intent of the majority of Virginians to ensure that the General Assembly's mapping manipulations that resulted in two unconstitutional redistricting maps last cycle would not be repeated.

\section*{C. The 2020 Census results reveal significant minority population growth.}

The 2020 Census results reveal that Virginia's population has grown significantly in both number and diversity. Virginia has experienced a nearly 8 percent increase in population over the past decade, adding more than 630,000 people. The majority of these gains are attributable to Virginia's racial and ethnic minority populations: the minority population increased by more than 7 percent since 2010, while

}
the Commonwealth's white population decreased by 5.1 percent during that same time period. \({ }^{23}\) Notably, Virginia's Black population, which is largely concentrated in the southeastern and northern portions of the Commonwealth, outpaced the general population growth rate, increasing by 8.9 percent to now account for 20.9 percent of the Commonwealth's population. \({ }^{24}\)

\section*{D. The Commission fails to adopt a map, triggering this Court's duty to redistrict.}

After the selection of members in the fall of 2020, the Virginia Redistricting Commission began meeting in early 2021. It held 38 meetings in Richmond and 16 public hearings across the state during which it considered public comment and proposed maps. \({ }^{25}\) Unfortunately, however, the Commission deadlocked during its final meetings in September and October and found itself unable to agree on either the process of drawing new redistricting plans or the substance of those plans. \({ }^{26}\) Without hope of bridging the impasse, the Commission disbanded without proposing maps for the General Assembly's consideration. The Commission's inaction triggered a constitutional failsafe by sending the task of drawing maps directly to this Court. \({ }^{27}\)

\section*{E. The Court's Special Masters produce a map that fails to comply with the law.}

On November 19, 2021, this Court selected two Special Masters, Dr. Bernard Grofman and Sean Trende, to assist in its mapdrawing duty, directing the Special Masters to work together to produce legally compliant maps within 30 days. \({ }^{28}\) Less than three weeks later, the Special Masters produced a draft congressional map-the December 8 Map-for the Court's and the public's consideration. Unfortunately, the December 8 Map violates governing legal and traditional redistricting principles.

\section*{i. The December 8 Map fails to achieve population equality while fully abandoning a modest change approach.}

The most apparent-and entirely unnecessary-violation is the December 8 Map's failure to equally apportion Virginia's population across the 11 congressional districts. Remarkably, it misses this baseline mark while not making any attempt to preserve current districts through modest adjustments.

}

When tasked with drawing maps, courts often employ a "least-change" approach, minimizing their impact on the lines drawn by concordant branches of government or affirmed by previous courts. \({ }^{29}\) The preparation of new maps, then, typically begins with an analysis of how the previous map can be updated to best reflect traditional redistricting principles and population equality. \({ }^{30}\) This is particularly important when the previous map-or some portion thereof-has gone through judicial review, as is the case here. \({ }^{31}\) Eschewing this principle entirely, the December 8 Map abandons the meticulous review of courts past in favor of a brazen reimagination that is both unfamiliar with and detached from the communities that will live under this congressional plan for a decade to come.

\section*{ii. The December 8 Map appears to impermissibly use race as a predominant factor.}

In disregarding the judicial history of Virginia's maps, the Special Masters fail to integrate the lessons learned with respect to constructing legally compliant districts that do not use race as a predominant factor and still permit Virginia's heavily minority districts to elect candidates of their choice in coalition with others. The Special Masters strenuously insist in their memorandum that they "simply drew districts without race as the predominant interest . . . by drawing districts that comply with traditional good government districting criteria . . . and considered race only after we had drawn a map fully subject to the constraints of those factors." \({ }^{\prime 32}\) But when explaining the process that the Special Masters followed to draw historically Black Districts 3 and 4, a different picture emerges.

The Special Masters report their process for drawing District 3 by starting with an overarching assertion that the "Hampton Roads area presently contains one district that consistently elects the candidate of choice of the African-American population." \({ }^{33}\) The Special Masters then assert that they drew the new district lines specifically to comprise "the four major cities in the Hampton Roads area," without regard for the surrounding communities of interest. \({ }^{34}\) Next, the Special Masters report that the new urban-concentrated District 3 that they have created "left few options for the \(2^{\text {nd }}\) District," which now creates an odd ' \(J\) ' shape to include portions of the military community, the Eastern Shore, and then clumsily wraps inland. Nonetheless, the Special Masters did not then re-examine their District 3 lines or

\footnotetext{

This is called the 'least change' or 'minimal change' method, which assumes that if the current district map complied with the redistricting criteria during the previous census, then a new map will likely comply with only limited changes."). Martin v. Augusta-Richmond Cty., Ga., Comm'n, No. CV 112-058, 2012 WL 2339499, at *3 (S.D. Ga. June 19, 2012) ("Keeping the minimum change doctrine in mind, the Court only made the changes it deemed necessary to guarantee substantial equality and to honor traditional redistricting concerns."); Below v. Gardner, 148 N.H. 1, 963 A.2d 785, 794 (2002) ("[B]y using the existing senate districts, we are able to ensure, to the greatest extent practicable, that each senatorial district contains roughly the same constituents as the last validly enacted plan.").
\({ }^{31}\) Crumly v. Cobb Cty. Bd. of Elections \& Voter Registration, 892 F. Supp. 2d 1333, 1345 (N.D. Ga. 2012) ("In preparing the draft map, the Court began with the existing map drawn by Judge Carnes in 2002.").
\({ }^{32}\) Memo at 5 (emphases added).
\({ }^{33}\) Id. at 14.
\({ }^{34} \mathrm{Id}\).
}
look to the prior court-approved map for guidance; rather they remained committed to a District 3 that pulled in as much urban population as possible.

Next, and more overtly, the Special Masters report that they proceeded to draw District 4 to purposefully increase the BVAP. Dr. Grofman found in 2016 that a constitutionally drawn District 3 would result "virtually automatically" in a substantial minority population in District \(4 .{ }^{35}\) And yet, the Special Masters now report that their initial lines for District 4, which aimed to create a "compact district that included only Richmond City and Henrico/Chesterfield counties," left Black voters comprising "a little more than a third of the population. \({ }^{, 36}\) Without any further examination or explanation of voting trends across coalitions, and without regard to the court-approved existing District 4, the Special Masters simply drew the District anew, employing their own standard of "reasonably compact," to divide Henrico and Chesterfield counties in a manner that inflated the BVAP by 15 percentage points to 45.3 percent. \({ }^{37}\)

The result of the Special Masters' approach to Districts 3 and 4 leaves each with BVAP populations that exceed the percentages that have proved more than sufficient for Black voters to have an opportunity to elect their preferred candidates. Notably, the Special Masters' approach to these minority-opportunity districts stands in sharp contrast to their deference to "Virginia's lengthy tradition of placing a district in Southside Virginia" \({ }^{38}\) to create the \(73 \%\) white District \(5,{ }^{39}\) and the lamenting concern of the pre- and post-Civil War deference to the Blue Ridge and Appalachian communities of Districts 6 and \(9,{ }^{40}\) which are over \(86 \%\) and \(90 \%\) white, respectively. Such racially disparate mapdrawing cannot stand.

\section*{iii. The December 8 Map fails to respect communities of interest.}

Finally, the December 8 Map sharply divides communities of interest across the state, with the notable exception of providing special care to keep Virginia's Appalachian communities united. \({ }^{41}\) From Northern Virginia's metropolitan D.C. communities, to the military communities on the Eastern Shore, to the affinity between the Albemarle and Richmond's Western exurbs, the December 8 Map does little to unite Virginians of common interest under common representation. The overwhelming commentary from Virginians during the public hearing on December 15 before this Court supports the fact that Virginians want to keep their communities together, and the December 8 Map fails to do so. Citizen after citizen informed this Court that the western exurb communities of Richmond are inextricably linked by social, educational, environmental, and economic common interests. Others pleaded for central Virginia to retain its representation and identity in District 7. And several Virginians highlighted the stark disparities in interest between Loudoun County and counties to the south. This failure to keep together the communities in which Virginians live their lives and find their common voice is nonsensical, as well as noncompliant. This Court and the Special Masters can and must do better.

\section*{F. The Farkas Map accounts for Virginia's population changes while ensuring compliance with federal and Virginia law.}

Mr. Farkas submits the Farkas Map for consideration by the Special Masters and the Court. For the reasons explained below, the Farkas Map provides equally apportioned districts that are compact, share common community interests, and protect the voting power of Virginia's increasing racial and ethnic minority populations, consistent with all applicable laws and legal precedent. We submit that the Farkas Map achieves these goals more fully and consistently than the Special Masters' December 8 Map.

\section*{II. Legal Standards}

\section*{A. Population equality}

To ensure every voter has an equal voice in government, districts must be evenly apportioned by population. " \([A]\) bsolute population equality is the paramount objective," \({ }^{42}\) as the Constitution unequivocally requires that elections for the U.S. House of Representatives must be based upon population, first and foremost, such that "one man's vote in a congressional election is to be worth as much as another's." \({ }^{43}\) Under federal law, therefore, U.S. congressional districts must be as nearly equal in population as is practicable. \({ }^{44}\) Moreover, a court-ordered redistricting plan must conform to a higher standard of population equality than a redistricting plan created by a legislature, permitting only negligible variance. \({ }^{45}\) Likewise, the Virginia Constitution requires that redistricting maps "be so constituted as to give, as nearly as is practicable, representation in proportion to the population of the district." \({ }^{36}\)

\section*{B. Contiguity and Compactness}

The Virginia Constitution requires that every "electoral district shall be composed of contiguous and compact territory." \({ }^{47}\) A district is not contiguous if it is connected only by "water running downstream or upriver . . .." \({ }^{48}\) "[L]and masses separated by water may[] satisfy the contiguity requirement in certain circumstances. \({ }^{,{ }^{49} \text { To comply with the compactness requirement, districts must be }}\) drawn "employing one or more standard numerical measures of individual and average district compactness, both statewide and district by district. \({ }^{, 50}\) While ease of travel within a district may be considered when evaluating its compactness, it should not be the controlling factor. \({ }^{51}\)

\({ }^{51}\) Wilkins, 571 S.E.2d at 109.
}

\section*{C. Preservation of Communities of Interest}

Virginia law requires that districts "be drawn to preserve communities of interest," which are defined as "a neighborhood or any geographically defined group of people living in an area who share similar social, cultural, and economic interests." \({ }^{52}\) The U.S. Supreme Court has recognized that "maintaining communities of interest" constitutes a "traditional districting principle[]." \({ }^{53}\)

\section*{D. Protection of Racial and Ethnic Minority Groups}

Both federal and Virginia state law protect the political rights of racial and ethnic minorities in the map-drawing process.

\section*{i. Federal law}

The Equal Protection Clause of the Fourteenth Amendment protects against the drawing of districts that "rationally cannot be understood as anything other than an effort to segregate citizens into separate voting districts on the basis of race without sufficient justification.. \({ }^{54}\) Courts apply a two-step analysis to racial gerrymandering claims. First, courts ask whether "race was the predominant factor motivating the legislature's decision to place a significant number of voters within or without a particular district." 55 "Second, if racial considerations predominated over others, the design of the district must withstand strict scrutiny." \({ }^{56}\) The burden shifts to the map-drawer "to prove that its race-based sorting of voters serves a 'compelling interest' and is 'narrowly tailored' to that end." \({ }^{57}\)

Separately, Section 2 of the Voting Rights Act prohibits any "standard, practice, or procedure" that "results in a denial or abridgement of the right . . . to vote on account of race." \({ }^{58}\) Section 2 protects against "vote dilution" brought about by the "dispersal of [a group's members] into districts in which they constitute an ineffective minority of voters." \({ }^{59}\) If a map-drawer invokes the Voting Rights Act to justify race-based districting, "it must show that it had 'a strong basis in evidence' for concluding that the statute required its action." \({ }^{60}\)

An "effective minority district" is generally understood as one that "contains sufficient population to provide the minority community with an opportunity to elect a candidate of its choice." \({ }^{" 1}\)

}

\section*{ii. State law}

The Virginia Constitution requires that redistricting occur "in accordance with the requirements of federal and state laws that address racial and ethnic fairness." \({ }^{.62}\) The Constitution further requires that "[d]istricts shall provide, where practicable, opportunities for racial and ethnic communities to elect candidates of their choice." \({ }^{, 63}\) Virginia also recently adopted a provision modeled after Section 2 of the federal Voting Rights Act, the Virginia Voting Rights Act, prohibiting maps containing districts that result in a denial or abridgment of "the right of any citizen to vote on account of race or color or membership in a language minority group" or "to elect representatives of their choice." \({ }^{64}\) A district map violates this provision if, "on the basis of the totality of the circumstances, it is shown that districts were drawn in such a way that members of a racial or language minority group are dispersed into districts in which they constitute an ineffective minority of voters or are concentrated into districts where they constitute an excessive majority." \({ }^{65}\) Furthermore, "[d]istricts shall be drawn to give racial and language minorities an equal opportunity to participate in the political process and shall not dilute or diminish their ability to elect candidates of choice either alone or in coalition with others." \({ }^{.66}\)

\section*{E. Political Fairness}

Virginia law prohibits maps that, "when considered on a statewide basis, unduly favor or disfavor any political party." \({ }^{67}\) This provision has not yet been interpreted by a Virginia court.

\section*{III. The Farkas Map Satisfies all Legal Requirements and Ensures Fair Representation for Virginians.}

\section*{A. Overview}

The Farkas Map takes the existing congressional map as its starting point but improves upon it in nearly all respects in a way that is more consistently compliant with the legal principles articulated above than the December 8 Map. It satisfies population equality requirements, increases district compactness, preserves communities of interest, and protects the voting strength of minority groups.

\footnotetext{

\({ }^{67} I d . \S 24.2-304.04(8)\).
}

Figure 1: Farkas Map

In the northern Virginia region, the Farkas Map places the entirety of District 11 within Fairfax County, thereby creating a more compact district with a cohesive community. The map also improves the compactness of District 10, which previously ran from the Capital Beltway to the West Virginia border, by instead anchoring it in the suburban Washington, D.C. area. In central and southwestern Virginia, the Farkas Map unites Charlottesville and the surrounding Albemarle County with the suburbs surrounding Richmond in District 7. This change unites communities of interest while also improving the compactness of District 5. The map also addresses population loss in District 9 by moving Roanoke into that district. And finally, in southeastern Virginia, the Farkas Map ensures that Black communities in Districts 3 and 4 maintain their voting strength, consistent with Dr. Grofman's remedial map and the findings of a Virginia federal court in our client's case, the Page litigation. The map also keeps the military community in District 2 whole by anchoring the district in Norfolk and including Virginia Beach City and Chesapeake City within it.

\section*{B. The Farkas Map satisfies traditional redistricting criteria, improving upon the current plan.}
i. The Farkas Map meets population equality requirements.

The Farkas Map creates districts of equal population. Six of the districts under the Farkas Map are exactly equal to the ideal population. The other five districts vary only by a single person. By stark contrast, the December 8 Map varies widely from district to district, assuring that the voice of voters in some districts, such as District 10, will carry less weight than voters in others, such as District 6.

U.S. congressional districts must be as nearly equal in population as is practicable. \({ }^{68}\) Indeed, the Supreme Court has declared that "[a] court-ordered plan should 'ordinarily achieve the goal of population equality with little more than de minimis variation." \({ }^{39}\) The federal court that approved remedial Virginia districts in the Page litigation strictly adhered to this requirement, as did Special Master Grofman when submitting his proposal to that court. \({ }^{70}\) Not only does the December 8 Map abandon Virginia's history of strict adherence to this principle, but, as is apparent from the near perfect equality achieved by the Farkas Map, the December 8 Map does not even achieve population equality as closely as is practicable. Far from it. This failure would subject the December 8 Map to an exacting standard upon review.
"With a court plan, any deviation from approximate population equality must be supported by enunciation of historically significant state policy or unique features." \({ }^{71}\) The Special Masters report that they "worked diligently to ensure that the congressional districts were reasonably close to equipopulous," \({ }^{72}\) but this is simply not the appropriate legal standard. The Special Masters make no mention of what, if any, historically significant state policy or unique features support these deviations in population.

Indeed, the December 8 Map cannot even survive the less exacting standard applied to districts drawn by state legislatures. The U.S. Supreme Court permits some flexibility to state legislatures to achieve exact population equity, requiring that a state "justify population differences between districts

\footnotetext{
\({ }^{68}\) Id.; see also Roman v. Sincock, 377 U.S. 695, 710 (1964) (same for state legislature districts).
\({ }^{69}\) Abrams, 521 U.S. at \(98-9\) (deeming a court-drawn map with a deviation of \(0.35 \%\) permissible due to the fact that the court-"in detail"-reviewed and accounted for specific historic preferences and unique features that demanded such a deviation).
\({ }^{70}\) Personhuballah Rep. at 11 ("Since the present map and all of the maps offered in briefs submitted . . . were either exactly at ideal district size . . or plus or minus one person, the illustrative maps I have offered to the Court also provide this level of strict population equality.").
\({ }^{71}\) Chapman, 420 U.S. at 26.
\({ }^{72}\) Memo at 3 (emphasis added).
}
that could have been avoided by a good-faith effort to achieve absolute equality. \({ }^{, 73}\) In such instances, courts should consider "the size of the deviations, the importance of the State's interests, the consistency with which the plan as a whole reflects those interests, and the availability of alternatives that might substantially vindicate those interests yet approximate population equality more closely." \({ }^{74}\) Here, there is an available alternative-the Farkas Map-that, as explained further below, substantially vindicates the other interests this Court must consider.

\section*{ii. The Farkas Map creates more compact, contiguous districts.}

The Farkas Map creates more contiguous and compact congressional districts than the current map provides. These improvements are evidenced by both improved mathematical compactness scores as well as comparison with the naked eye.

Virginia courts have relied upon two leading mathematical methodologies for measuring district compactness: the Reock method and the Polsby-Popper method. \({ }^{75}\) The Reock score "compares the area of a district to the area of the small circle that can be drawn around the district." \({ }^{76}\) The Polsby-Popper score "compares the area of a district to the area of a circle with the same perimeter." \({ }^{77}\) Both methods produce a score between 0 and 1 , with 1 being most compact. \({ }^{78}\) Thus, if a score increases from one map to another, that indicates an increase in compactness. The Farkas Map increases the statewide average Reock score over the current map-one that the federal district court already found adhered to principles of compactness \({ }^{79}\)-by over 20 percent and increases the statewide Polsby-Popper score by over 47 percent. The Farkas Map is thus even more compact on average than the current map adopted by a threejudge court.

\footnotetext{

\({ }^{74} \mathrm{Id}\). at 760 .
\({ }^{75}\) See, e.g., Bethune-Hill v. Va. State Bd. of Elections, 141 F. Supp. 3d 505, 535 (E.D. Va. 2015), aff'd in part, vacated in part, \(137 \mathrm{~S} . \mathrm{Ct} .788\) (2017) (discussing relative attributes of both the Reock and Polsby-Popper methods). The Special Masters report in their December 7 memorandum to the Court that they have utilized a third measure-"Dave's Redistricting App"-without explanation as to how this source calculates its scores or what the range of available scoring is. We are aware of no instance of a Virginia court, or any court for that matter, approving of "Dave's Redistricting App" as a reliable source with which to measure compactness. Quite the opposite: the Southern District of Ohio previously declined to credit maps that were drawn using Dave's Redistricting App, determining that "testimony that the application allows for the manipulation of districts [and] failure to establish the parameters . . . used to produce the maps is problematic" and ultimately that the evidence "is insufficient to establish the reliability of the methodology used to create the maps." Ohio Org. Collaborative v. Husted, No. 2:15-CV-1802, 2016 WL 8201848, at *8 (S.D. Ohio May 24, 2016).

\({ }^{78}\) Id.
\({ }^{79}\) Personhuballah, 155 F. Supp. 3d at 562, ("[Dr. Grofman's map] also vastly improves the Third District's compactness score and meaningfully improves the Plan's average compactness scores across all the affected districts.").
}

The same is true when evaluating compactness of the individual districts. In the vast majority of instances, the Farkas districts are more compact than the existing map whether measured by the Reock or Polsby-Popper methods.

\end{tabular}

These metrics confirm what is observable with the naked eye, particularly with respect to the northern Virginia region. Between Districts 8,10 , and 11 alone, the population increased by nearly 300,000 Virginians, which accounts for almost 50 percent of Virginia's overall growth since 2010. This growth necessitates more compact boundaries. The existing Districts 8,10 , and 11 -intentionally left untouched in Dr. Grofman's 2016 remedial map-currently sprawl across seven counties and five independent cities, collectively. The Farkas Map, by contrast, reduces this spread to just four counties and four independent cities. \({ }^{80}\) Specifically, while the existing District 11 winds from northern Fairfax County down to southeastern Prince William County, the Farkas Map keeps all of District 11 within Fairfax County's borders, giving it a much more compact shape with sensible boundaries. Similarly, while the existing District 10 runs from the Capital Beltway to the West Virginia border, across five counties and three independent cities, the Farkas Map reduces District 10 to three counties and two independent cities, concentrated in the suburban Washington, D.C. area. \({ }^{81}\) These changes improve upon traditional districting criteria to provide less sprawling and more sensible districts.

\footnotetext{
\({ }^{80}\) See App., fig. 2.
\({ }^{81}\) The Farkas Map leaves District 8 largely the same, with a nearly 90 percent overlap with the current District boundaries, given that District 8 saw only modest population gains. The Farkas Map does, however, significantly reduce the jigsaw nature of the current boundary line District 8 shares with District 11. See id.
}

Figure 2: Northern Virginia

Unlike the December 8 Map, the Farkas Map achieves increased compactness without sacrificing other critical considerations like population equality and preservation of communities of interest. Indeed, the Farkas Map and December 8 Map achieve comparable average Reock scores that are just 0.02 points apart. \({ }^{82}\) District-by-district, the Farkas Map outperforms the December 8 Map on Reock scores in six of the eleven districts. \({ }^{83}\)

\section*{iii. The Farkas Map reunites and preserves communities of interest.}

The Farkas Map reunites communities of interest that were torn apart by the General Assembly in the previous congressional map and which are similarly divided in the December 8 Map. The current map, using 2010 Census geographies, split 14 counties, 37 census-designated places, and 22 voter tabulation districts. The Farkas Map, using 2020 Census geographies, splits only ten counties, 25 censusdesignated places, and 14 voter tabulation districts. These political subdivisions represent common interests and ought to be kept whole to the extent possible. \({ }^{84}\)

\footnotetext{
\({ }^{82}\) The December 8 Map has an average Reock score of 0.383 , according to Princeton University's Gerrymandering Project. Princeton Gerrymandering Project, https://gerrymander.princeton.edu/redistricting-report-card?planId=recOUnE4ZKjEyaVyJ (last visited December 11, 2021).
\({ }^{83}\) Compare supra p. 13 with Memo at 18.
\({ }^{84}\) Miller, 515 U.S. at 916, 919-20.
}

Region by region, the Farkas Map responds to concerns raised by Virginians during both the Virginia Redistricting Commission's tenure \({ }^{85}\) and this Court's process. \({ }^{86}\) For example, numerous commenters emphasized that Charlottesville, home to the University of Virginia, and its surrounding Albemarle County have more in common with suburban Richmond County than the rural mountain areas in District 5. One Charlottesville resident urged this Court to "consider the cohesion of metropolitan areas" and to not "combine Albemarle County with a Congressional district in the Shenandoah Valley." 87 Another explained that the current District 5 "lumps [voters] into a New Jersey-sized monolith, meaning we have no common interests . . . with other parts of the district . . . ." \({ }^{88}\) Yet another commented that Albemarle has "no cultural, economic, or community connections" with the western portion of the state, but instead is "closely intertwined" with Richmond to the east. \({ }^{89}\) Numerous government metrics affirm this point. For example, the Metropolitan Planning Organization for Richmond-a regional divide utilized by both the Virginia Department of Transportation and the U.S. Department of Transportationincludes the regions to the West of Richmond stretching toward Charlottesville, including Goochland and Powhatan. \({ }^{90}\) The regions are also clearly linked by the I-64 corridor running East-West between the two metropolitan areas.

The December 8 Map, in contrast, exacerbates the splits problem by even further breaking up the Charlottesville and Albemarle County community of interest. The December 8 Map cleaves Albemarle County in half, splitting it between the Fifth District (extending all the way to Virginia's Southern border) and Tenth District (extending all the way to Virginia's Northern border). This does not improve on the currently existing map; it makes it worse. Indeed, in the days following the release of the December 8 Map, several Virginians have expressed concern about the split representation of Charlottesville and Albemarle County. \({ }^{91}\)

The Farkas Map addresses this issue, moving Charlottesville and Albemarle County to District 7 in order to unite it with the Richmond suburbs. This change also improves the compactness of District 5, which in its current form stretches all the way from Virginia's southern border, through Charlottesville, up to the edge of the Washington, D.C. metro area. In the Farkas Map, District 5 is anchored in the southcentral region of the state. It unites Martinsville and its suburbs, which are currently separated across two districts, and it also includes Lynchburg and its surrounding counties. Further west, the map addresses population loss in District 9 by moving Roanoke into the district. This change unites Roanoke and Salem, neighboring cities that were previously placed in separate districts.

Figure 3: Central Virginia

In the northern Virginia region, the Farkas Map unites communities in the Washington, D.C. metropolitan and suburban areas. These communities share similar social, cultural, and economic interests, as they house the metropolitan D.C. workforce. The Farkas Map recognizes this reality and ensures that Districts 8, 10, and 11 are focused in metropolitan and suburban Northern Virginia. This greatly improves upon the current map, which, for example, currently includes a northern district (District 10) that stretches all the way to the West Virginia border, tying the D.C. suburbs with rural communities that do not share common interests. The Farkas Map reduces District 10 to predominantly Loudon and Prince William counties, tracing the expanding D.C. suburban area and reducing county splits. By contrast, the December 8 Map carves Loudoun County out of the metropolitan D.C. districts, separating it from neighboring Fairfax County communities along Route 7 as well as from neighboring Prince William County. The splitting of communities that serve the Dulles Technology Corridor defies logic because they are all inextricably tied by common interests to the greater D.C. area. Indeed, recognizing the links of these communities to each other and D.C., the U.S. Department of Transportation has worked with local authorities to expand Metrorail service on the new Silver Line to Washington Dulles

International Airport and further west into Loudoun County in a project dubbed the "Dulles Corridor Metrorail Project. \({ }^{92}\)

In southeastern Virginia, the Farkas Map ensures that the community of veterans and active-duty military in and around Norfolk is kept whole by anchoring District 2 in that county and by including Virginia Beach City and Chesapeake City in the same district. This is not the case with the December 8 Map, which unnecessarily divides these closely linked military communities between Districts 2 and 3 . The populations of Norfolk and Virginia Beach share common federal and environmental concerns, and together form the socio-economic backbone of the Hampton Roads region; they should not be divided. As one commenter to this Court explained, "Norfolk and Virginia Beach are tied to the Norfolk Naval Base with all the active duty and veterans who reside here. . . . Please consider a Norfolk/VB district for [District 2]." \({ }^{93}\) Instead, the December 8 Map lumps Virginia Beach with Isle of Wight and Suffolk, despite those communities having more in common with Portsmouth than Virginia Beach.

Figure 4: Hampton Roads

For all these reasons, the Farkas Map thus reflects and significantly improves upon the preservation of communities of interest across the Commonwealth. The memorandum accompanying the December 8 Map expressed great solicitude for defining and maintaining communities of interest along
92 See U.S. Dep't of Transp., Dulles Corridor Metrorail Project, https://www.transportation.gov/buildamerica/projects/dulles-corridor-metrorail-project (last visited Dec. 11, 2021); see also Dulles Corridor Metrorail Project, Silver Line Stations, https://www.dullesmetro.com/silver-line\({ }_{93}\) stations/ (last visited Dec. 11, 2021).
\({ }^{93}\) Va. Sup. Ct. Comments at 166 (comment of Charles F. Stanton, Nov. 10, 2021).
the Blue Ridge and in Appalachia, which are predominantly white, rural communities. \({ }^{94}\) Similar care ought to be applied to preserving the communities described above, which are in many instances more diverse, urban and suburban communities. The Farkas Map fully accounts for those communities that the December 8 Map neglects.

\section*{iv. The Farkas Map protects racial and ethnic minority groups.}

The Court should ensure that the failures of the General Assembly, which required years of federal litigation to remedy, are not repeated this redistricting cycle. The Court should be guided by race-neutral districting principles and reject any map that unjustifiably overpacks Black voters within districts. This approach does not require significantly altering the Black voting age population in either of Virginia's effective minority districts, Districts 3 and 4, where Black voters have been able to elect their candidates of choice under the current congressional map. \({ }^{95}\)

The Special Masters' memorandum suggests that their first and predominant consideration in the Greater Richmond and Hampton Roads areas was race, resulting in an unjustifiable increase of the BVAP percentages in the effective minority districts in those areas. The Special Masters claim that they "considered race only after [they] had drawn a map fully subject to the constraints of [the] traditional" redistricting principles. \({ }^{96}\) But the district-specific descriptions tell another story. In discussing the Richmond and Southside regions, the Special Masters explain that they initially created "a compact district that included only Richmond City and Henrico/Chesterfield counties. \({ }^{997}\) However, the mapdrawers then observed that Black Virginians "would total a little more than a third of the population" of the district, and so altered the map. \({ }^{98}\) The map-drawers split both Henrico and Chesterfield Counties, in order to construct a district with a Black CVAP of \(45.3 \%\), higher than the \(40 \%\) Black CVAP in the current District \(4 .{ }^{99}\) The only justification they gave was that the high-BVAP district would "likely continue to elect the African-American population's candidate of choice. \({ }^{100}\) The Special Masters provided no analysis that would justify this assumption. Similarly, the Special Masters' rationale for drawing District 3 in the Hampton Roads area appears limited to ensure ability-to-elect by including as many urban areas as possible, without providing any justification that such an approach was necessary. \({ }^{101}\)

\footnotetext{

\({ }^{98}\) Id.
\({ }^{99}\) Id.
\({ }^{100} \mathrm{Id}\).
\({ }^{101} I d\).
}

Figure 5: Greater Richmond

The Farkas Map, in contrast, was drawn in accordance with race-neutral districting principles and still maintains the voting strength of Virginia's Black communities. As explained above, the Farkas Map ensures population equality, creates compact districts, and preserves communities of interest. Doing so results in a map that includes two effective minority districts and does not dilute minority voting strength.

The Farkas Map unites all of Norfolk and Virginia Beach into District 2 and all of Hampton in District 3. In so doing, the Farkas Map decreases the BVAP in District 3 from 47 percent to 41.9 percent, resembling the demographics and configuration of the remedial map proposed by Dr. Grofman in 2016 and adopted by a federal court while retaining the same general configuration and location. \({ }^{102}\) District 3 thus remains an effective minority district in which Black voters may continue to influence election outcomes in coalition with others. \({ }^{103}\) In the current configuration of District 3, Representative Scott won over 66 percent of the vote in 2016, over 91 percent in 2018, and over 68 percent in 2020. \({ }^{104}\)

The BVAP of District 4 rises only nominally to 40.1 percent in the Farkas Map from 39.7 percent in the current map while better adhering to traditional districting principles. Specifically, the Farkas Map removes the irregular arm of Suffolk and Chesapeake counties from District 4 and places them in a more

\footnotetext{
\({ }^{102}\) Personhuballah, 155 F. Supp. 3d at 565 (noting BVAP of 45.3 percent in District 3 and 40.9 percent in District 4 at time of adoption of existing maps in 2016).
\({ }^{103}\) See Bartlett v. Strickland, 556 U.S. 1, 13 (2009) (describing an effective minority district as one in which the minority population does not make up a majority of the voting-age population but "at least potentially . . . is large enough to elect the candidate of its choice with help from voters who are members of the majority and who cross over to support the minority's preferred candidate.") (plurality opinion).
104 Ballotpedia, Virginia's 3rd Congressional District, (last visited Oct. 20, 2021), https://ballotpedia.org/Virginia\%27s_3rd_Congressional_District.
}
contiguous and compact manner in District 3. District 4 of the Farkas Map also keeps Franklin City with neighboring Southampton.

While the Farkas Map hews closely to the versions of these minority-opportunity districts approved by the federal court in 2016, the Special Masters' December 8 map packs a greater percentage of Black voters into each district, particularly District 4.
\begin{tabular}{|l|c|c|c|c|}

\hline District 4 & \(40.9 \%\) & \(39.7 \%\) & \(40.1 \%\) & \(45.3 \%\) \\
\hline
\end{tabular}

Dr. Grofman's 2016 analysis of the maps he proposed to the district court demonstrate that the higher percentages are not necessary to achieve adherence to legal standards. The 2016 percentages created "a realistic opportunity [for a Democratic candidate of choice] to win election in CD3 due to cohesive voting from within the African-American community and cross-over voting from non-black Democrats." \({ }^{105}\) The changes to BVAP proposed in the December 8 Map-taken together with the failure to abide by other principles such as population equality and not dividing communities of interest-raises significant concern that Black voters are being improperly packed into these two districts.

The changes made in the Farkas Map abide by all federal and state law imperatives while having the effect of preserving the opportunity of minority voters to elect candidates of their choice in coalition with others. The Farkas Map thus comports with the principles of Dr. Grofman's 2016 maps that remedied the unconstitutional gerrymander of the Virginia legislature following the 2010 census.

\section*{v. The Farkas Map does not unduly favor any political party.}

The Farkas Map offers a blueprint for fair, representative redistricting that properly and fully accounts for all legal requirements without unduly favoring any one political party over another. The Farkas Map ameliorates the partisan bias of the December 8 Map and existing map-both with a score of approximately -9.7 percent-to just -0.6 percent based on the turnout from the 2020 presidential race. \({ }^{106}\)

\section*{vi. The December 8 Map ignores important impacts on incumbents.}

The U.S. Supreme Court has held that states have a legitimate interest in preserving the constituencies of congressional incumbents. \({ }^{107}\) The Special Masters have reported that they created the December 8 Map without any knowledge as to "which incumbents have been placed in [congressional]

\footnotetext{
\({ }^{105}\) Personhuballah Rep. at 47.
\({ }^{106}\) Partisan bias is the difference between each party's seat share and \(50 \%\) in a hypothetical, perfectly tied election. Thus, the closer the partisan bias is to 0 , the lower the map's skew toward one party or the other. A negative partisan bias score indicates bias in favor of the Republican Party, while a positive partisan bias score indicates bias in favor of the Democratic Party.
\({ }^{107}\) White v. Weiser, 412 U.S. 783, 797 (1973).
}
districts with other incumbents." \({ }^{108}\) But they and this Court should be aware that the three incumbents whom the December 8 Map most threatens are the only three women in Virginia's delegation. Indeed, some of the most problematic changes that the December 8 Map seeks to make are precisely the changes that could lead to Virginia not having a single female incumbent. The December 8 Map's complete uprooting of District 7 can have only one effect on Representative Abigail Spanberger's tenure in Congress, whether one knows the precise town in which she currently resides or not. Likewise, detaching District 10 from the Washington D.C. metropolitan area to incorporate rural communities to the south threatens Representative Jennifer Wexton's position, without solving the problem of District 10's sprawling geographic reach. Finally, splitting the military communities in Norfolk and Virginia Beach directly threatens the incumbency of Representative Elaine Luria, who is well-known for her military service and connection with that community. Representative Luria is also double-bunked with Representative Scott, one of the delegation's only two Black members and the longest serving incumbent in the state.

Thus, the threat that the December 8 Map poses to the female and minority members-and only those members-of Virginia's delegation is apparent without detailed knowledge of each incumbent's residential address. As many Virginians explained to this Court during the December 15 public hearing, to turn a blind eye to such a result is hardly in the interest of Virginians.

\section*{vii. Nesting is not applicable to congressional maps.}

The December 8 Map was drawn to "carve[] . . Senate districts out of U.S. House districts" "to the extent practicable." \({ }^{109}\) The accompanying report acknowledged that this practice, known as "nesting," is not required by Virginia law, nor is it required by federal law. \({ }^{110}\) Moreover, if nesting is applied in redistricting at all, it is typically used when drawing state legislative districts, rather than congressional districts, which are much larger and often to do not correspond neatly to the number of state legislative districts. \({ }^{111}\) It is unclear how application of this non-statutory principle served to constrain or guide the Special Masters' drawing of the congressional districts, specifically. It is clear, however, that the Special Masters report that they employed nesting to keep communities of interest together despite previously acknowledging that they are not fully apprised of the communities of interest that exist in Virginia. \({ }^{112}\) As discussed above, the December 8 Map unnecessarily fractures multiple important communities of interest across the Commonwealth at the congressional district level. The Special Masters' application of nesting thus serves only to replicate this noncompliance across all maps. Indeed, there does not appear to be a principled basis for the December 8 Map's adoption of certain non-statutory criteria, such as nesting, and rejection of others, such as incumbency.

\({ }^{110}\) See id.
\({ }^{111}\) See Ballotpedia, Nesting, https://ballotpedia.org/Nesting (last visited December 11, 2021) (discussing nesting in the context of state legislative districts only); see also Bethune-Hill v. Va. State Bd. of Elections, 141 F. Supp. 3d 505, 538 (E.D. Va. 2015), aff'd in part and vacated in part, 137 S. Ct. 788 (2017) (discussing nesting in the context of state legislative districts); Davis v. Bandemer, 478 U.S. 109, 179 n. 18 (1986), abrogated in part on other grounds by Rucho v. Common Cause, 139 S. Ct. 2484 (2019) (J. Powell, concurring in part) (same).
\({ }^{112}\) Compare Memo at 7 (acknowledging lack of awareness of all applicable communities of interest) with Memo at 10 (reporting that nesting was used to align communities of interest under common representation).
}

\section*{IV. Conclusion}

This Court, with the help of the Special Masters, now has the duty to draw congressional districts that will govern elections over the next ten years. The Farkas Map offers fair, representative congressional districts that are fully compliant with federal and Virginia law. It apportions Virginia's population equitably; improves upon traditional districting metrics of contiguity, compactness, and political subdivision splits; and preserves and reunites long-split communities of interest. In so doing, it ensures that Virginia's growing racial and ethnic minority communities, which have been the main drivers behind Virginia's population growth, retain their opportunity to elect candidates of their choice in coalition with others, without diluting their voting strength by packing them within certain districts

Any map adopted by the Court must contend with these important considerations and requirements in order to comply with the law and the will of Virginia voters. Accordingly, Mr. Farkas respectfully requests that the Special Masters and ultimately the Court adopt the Farkas Map for Virginia's congressional districts.

Regarding the map for Patrick County, clearly the interests of the county are with Henry and Martinsville. Pairing it with Floyd and Carroll makes no sense to anyone who has lived here and understands the demographics of the region.

Good Morning,
I am a \(75+\) year old retired teacher of 35 years. I have lived in Chesterfield for 44 years and beg you to keep the districts that share common needs together.
Western Chesterfield and Henrico have too many similarities to divide them.
Thank you for your kind attention,
Donna Granski

Please keep Mount Vernon together! The Super Masters' choice of new maps cuts Mt Vernon in half and includes us with West Springfield, which we do not have anything in common. Many of us have discussed and agreed on the following. These are some of many of the reason why Mount Vernon must stay together.

We are now in the 36th Senate District which would become the 34th which says we are anchored in Franconia and Springfield. It only makes sense that I-95 should be the western boundary of this district. Fairfax County has much more in common than the areas south of Occoquan in Prince William County or West of I-95. However, this map pairs the Mount Vernon District with Springfield. The Fairfax County Board of Supervisors just approved a new Magisterial District Map for our districts and they REMOVED a Springfield district because we do not share common interests. Here is a link to that map: https://www.fairfaxcounty.gov/.../2021-adopted...
The newly drawn Fairfax County magisterial district map is a much better representation than the Senate map as West Springfield and the communities east if I-95 are not communities of interest. An example is the Mount Vernon High School that is located on 8515 Old Mount Vernon Road that would be split in half with this map. See the map of the school boundaries on this map: https://www.fcps.edu/.../boundary-maps/Mountvernon_HS.pdf The memo that states that the 34th district is anchored in West Springfield and Franconia is not true. Looking at the map of Fairfax County AND the school boundary of Mount Vernon High School will inform the Special Masters where the boundaries should be.

The Mount Vernon Community, which contains many communities of interest which cover the area from the southern edge of Alexandria City (Belle View) all the way south down to the Prince William County line. It goes from the Potomac River west to I-95. The development of the Route 1 corridor from Old Town to Fort Belvoir (EMBARK - details here:
https://fairfaxcountygis.maps.arcgis.com/.../index.html... ) is of concern to all of the residents who live along the corridor, but is not of interest to West Springfield or even Franconia.

The Mount Vernon Estate is the anchor of the Mount Vernon community. Please take note that Mount Vernon has a very strong community with organizations like the Mount Vernon Democratic Committee, http://mvdemocrats.com/, MVCCA (Mount Vernon Council of Citizens' Associations) https://www.mvcca.org/ and VIC (Ventures in Community) - https://venturesincommunity.org/ Indivisible Below the Beltway (https://www.facebook.com/indivisiblebelowthebeltway/) all of which include members all along the Route 1 Corridor.

Mason Neck is also a part of the Mount Vernon District, as is Lorton, who have nothing in common
with the residents of Haymarket and Fredericksburg. For example: Gunston Hall Elementary is a part of our region 3 Pyramid school system and this area will become the 7th Congressional district instead of the 8th, where both are communities of interest and is where they belong.

Please consider these comments, as this affects our everyday lives.

Sincerely,

Kathleen Mullen

Members of the Court,
Thank you for listening to the concerns of citizens in regards to redistricting maps proposed by the "masters". Please consider replacing the "masters" map with the Farkas map. The Farkas map keeps communities of interest together. Those of us living in Chesterfield and Henrico have much in common. We cross Route 288 to go to work, shop, doctors appointments, events........ Separating these communities will leave us without representation that is important to us.

Thanks again for listening to our concerns.

\[
\text { RE: } \frac{\text { Rules and Procedures for Implementing the Requirements of Article II. }}{\text { Section 6-A --- Including Buchanan County in Proposed Senate District } 5}
\]

Dear Ms. Theresa-Pitney, Special Masters, and Justices of the Supreme Court of Virginia:

I am writing you today to express my concerns regarding the proposed redistricting of Virginia's Senatorial Districts, particularly the inclusion of Buchanan County into proposed district 6 as opposed to district 5 . I applaud all the effort and hours of hard work that many people have dedicated to creating what each believes to be the best map that can be drawn, and I understand that no map will ever be perfect. With that being said, I sincerely believe that it is in Buchanan County's best interest to be included in the \(5^{\text {th }}\) district.

As a citizen there are many reasons that I could provide you as to why Buchanan County should be included in the district. Those reasons include the sharing of the US 460 corridor, the shared mining industry (there are multiple mines that exist in both counties even though the entrance is in one county or the other) our joint ventures through the regional IDA, and so many others.

Today, I write you as the Commonwealth's Attorney for Buchanan County and want to focus on my concerns with the splitting of Buchanan and Tazewell Counties into two separate districts. While I could write pages as to all the reasons and rationale, I will focus on trying to put forth some of the most important reasons as succinctly as possible.

First, from a law enforcement perspective, Buchanan County is uniquely situated geographically. We are bordered by Kentucky on the western side of the county, West

Virginia on the northern side of our county, and Tazewell County on the eastern side. On its face, this doesn't seem particularly notable, but it is quite significant for many reasons. US 460 by way of the Mountain Parkway runs from Lexington, Kentucky through Pike County and the city of Pikeville, Kentucky into Buchanan County, Virginia. This route is used to transport illegal narcotics from Lexington, Kentucky into Buchanan County and Virginia as a whole. US 460 runs through both our county seat, Grundy, and Tazewell's county seat, Tazewell, and ends in Virginia Beach, Virginia.

In addition to sharing the US 460 corridor, both Buchanan and Tazewell Counties share their northern borders with West Virginia. Our bordering counties in West Virginia have some of the nation's most affected counties when it comes to illicit drug use. McDowell County has led the nation in the past with the most overdose deaths per capita. Buchanan and Tazewell Counties, unfortunately, have led Virginia in overdose deaths per capita in years past. Again, we have similar concerns and interests from a law enforcement perspective. Narcotics regularly come across the borders through the "backwoods" but we also see a significant quantity of illegal drugs coming into Buchanan County out of West Virginia's cities of Princeton and Bluefield, which are both on US-460 and those narcotics are transported through Tazewell County into Buchanan County.

Second, from a judicial efficiency perspective, Buchanan and Tazewell Counties comprise the majority of the \(29^{\text {th }}\) Judicial Circuit. Tazewell leads the four-county circuit with the most significant number of cases with Buchanan County and Russell County typically seeing a similar case load. I believe that whenever possible, a judicial circuit should share the same legislators given their duty and authority to appoint the judiciary that serves the circuit.

Finally, I believe that it is important for both Buchanan and Tazewell County to share the same legislators. There are many reasons for this that are unrelated to law enforcement, but this sharing is beneficial to law enforcement and public safety. We currently, and as drawn, will continue to share the same representative in the House of Delegates. By sharing the same Senator, it allows our counties to combine our efforts to talk with our shared representatives about public safety concerns. These discussions range from concerns for police officers' safety while working the streets to Commonwealth's Attorneys seeing legislative "fixes" that need to be enacted to further protect public safety or to ensure that citizens' rights are not infringed upon.

In sum, as Commonwealth's Attorney for Buchanan County I truly believe that our shared interests with Tazewell County are so interwoven that it would be devastating to split our counties into two separate Senatorial Districts. Thank you for your time, your consideration, and all your hard work.

Ms. Muriel-Theresa Pitney
Clerk of the Supreme Court of Virginia
Dear Ms. Pitney,
It is my understanding that through redistricting in the State Senate, that Buchanan County will be moved from Senate District 5 to Senate District 6. The proposed change will move Buchanan County's Senator to Todd Pillion instead of Travis Hackworth. Although we feel that Todd Pillion is an excellent State Senator, Travis Hackworth was born and raised in Buchanan County. His native roots give him a leg up on understanding the county and its people. I feel that it would be a disadvantage for Buchanan County to lose Travis Hackworth as its State Senator. Please consider leaving Buchanan County as part of Senate District 5 during the redistricting process.

Sincerely,

Pete Savage

\section*{SENT VIA EMAIL TO Redistricting@vacourts.gov}

Re: Decennial Redistricting Pursuant to the U.S. Constitution, the Constitution of Virginia, and the Code of Virginia

\section*{December 15, 2021}

Honorable Muriel-Theresa Pitney, Clerk of Court
Supreme Court of Virginia
P.O. Box 1315

100 North Ninth Street
Richmond, VA 23219-1315

To the Clerk of Court and the Justices of the Supreme Court of Virginia,

\section*{I write to extend several insights on the Special Masters Draft redistricting plans.}

I have no partisan affiliation or interests, nor any personal connections to a party, interest group, elected official or candidate with an interest in the Virginia redistricting process. I am a faculty member in the Department of Politics at the University of Virginia. For the past 31 years, my research, publication and teaching areas have included GIS, the U.S. Census, the history of Virginia elections, and the topics of apportionment, redistricting, and electoral administration. I regularly teach GIS-related courses at the University of Virginia, including a course on redistricting. In 2011, my UVA students won most of the awards in the Virginia university public redistricting competition, and a former UVA student of mine served as an appointed member on the 2021 Virginia Redistricting Commission. In addition, in 2011 I served as a GIS and election expert on the Charlottesville Reprecincting Committee that redrew the City's precinct boundaries to align with the requirements of the Virginia Code. Finally, between 2000 and 2007, I directed an exploratory effort involving hundreds of UVA students who helped to create the first online historical database of Virginia elections, election districts and elected officials from 1776 to the present. The initial form of this historical database remains available online, but its final form and much (but not all) of the collected data is now housed and curated by the Virginia Board of Election Historical Database.

My first concern regarding the Special Masters draft plans relates to the Special Masters assumption that the Prisoneradjustment process required by the VA Code (§ 24.2-314) has been correctly "implemented in [the Division of] Legislative Services' data." The highlighted prison-adjustment datafiles from the Commission, however, contain both a serious error and a problematic omission.

Virginia Redistricting Commission

\section*{Data Downloads}

Statewide 2020 geodatabase containing Counties, VTDS, and Blocks with prison adjusted population and election results and selected primary election results (zip)
Statewide 2020 Geopackage continining Counties, VTDS, and Blocks with prison adjusted population and election results (zip file)
Statewide 2020 geodatabase containing Counties, VIDs, and Blocks with prison adiusted populiation and election results (zip file

As indicated in the screenshot below, the Redistricting Commission's prison-adjusted data erroneously reports there are 21 Virginia Census blocks with negative (!) populations. Unlike a typographical mistake, an error like this typically indicates a systemic data-processing problem. If left uncorrected, this datafile will undermine the Court's effort to comply with the U.S. and Virginia constitutional expectation for election district population equality.

\hline 23 & 1 & 0 & 0 & 43 & -100 & -2 \\
\hline 0 & 0 & 0 & 0 & 0 & 0 & 0 \\
\hline
\end{tabular}

My second concern relates to the apparent fact that the Redistricting Commission's datafiles do not readjust Virginia's 2020 Census block populations to reflect "the race and ethnicity" of Virginia's incarcerated persons in the population count of the locality in which he is deemed to reside" (§ 24.2-314 D.). According to the Virginia Redistricting Commission data, 41,855 incarcerated persons in 103 Census blocks were reassigned to 24,035 home residency Census blocks and yet the race/ethnicity of these individuals was not adjusted in either the original or new home residency Census blocks. Before authorizing any new Virginia redistricting plans, the Virginia Supreme Court needs to inquire if the Redistricting Commission prison-adjusted data is in compliance with the expectations of the Voting Rights Act.

My third concern is that in the wake of the Virginia Redistricting Commission's wholesale failure the Special Masters draft plans will be accepted without a clear or public demonstration that they best satisfy the constitutional and statutory criteria governing the creation of election districts in Virginia. To test the possibility that the Special Masters plans are not providential or optimal, I offer 6 alternative U.S. House District plans, which I assess and compare against the Special Masters plan. Four constitutional and statutory criteria highlighted by the Special Masters are adopted as the benchmarks by which each plan is assessed. These four benchmarks are:
1) District population equality,
2) Protection and promotions of voting rights,
3) District Compactness, and
4) Minimization of Locality Splits.

As the tables below reveal, the Special Masters Congressional District Plan clearly are suboptimal in three benchmark categories (1,3,4), with one category (2) open to interpretation by the Court and others.

\section*{1) District Population Equality}

In Karcher v. Daggett (1983), the U.S. Supreme Court interpreted the "as nearly as practicable" population equality standard for Congressional districts as requiring a good faith effort to achieve the smallest possible district population deviations. The Special Masters Congressional Plan clearly fails to meet this standard. As Table 1 reveals, each of the 6 alternative plans more closely satisfies the Karcher minimalist standard at both the individual district levels and at the level of a plan's average deviation.

\section*{Table 1}
\begin{tabular}{|l|c|c|c|c|c|c|c|}
\hline \(\mathbf{1 1}\) \\
Congressional \\
Districts
\end{tabular}

\section*{2) Protection and promotions of voting rights}

The federal Voting Rights Act prohibits discriminatory voting practices against racial/ethnic minorities, including election districts that create an "ineffective minority" or an "excessive majority." When required remedially and where possible spatially, the VRA affirmatively promotes state creation of election districts that afford underrepresented minority voters the "opportunity to elect candidates of their choice." Virginia State law extends these protections and opportunities by recognizing minority "Coalition" opportunity districts in which the "white" population is less than \(50 \%\) (Va. Code Ann. §24.2-304.04(4)).

Although federal and state courts are the final arbiters of how a redistricting plan best advances the protection of voting rights, this should not preclude a clear and public assessment and comparison of the Special Masters draft plans relative to other alternative plans. Table 2 affords this opportunity for the Court and others to review. What seems evident is that none of the 7 evaluated plans yields a conventionally-understood VRA "majority minority" district, and the Special Masters plan creates two "coalition opportunity" districts whereas the other plans create 4-5 similar districts.

\section*{3) District Compactness}

The third evaluative benchmark is "District compactness." There are many different mathematical ways of measuring the property of "compactness" and all offer only partially adequate measurements of the highly irregular spatial boundary properties of U.S. states, localities, and the hierarchical scale of U.S. Census block geographies. The Special Masters employ the two most conventional methods for measuring district compactness. Table 3 reports the Polsby-Popper Compactness scores for the 7 evaluated plans, clearly revealing that the Special Masters Plan is not the most compact plan possible.

Table 3
\begin{tabular}{|c|c|c|c|c|c|c|c|}

\hline Most Compact & 40\% & 44\% & 43\% & 43\% & 51\% & 51\% & 51\% \\
\hline
\end{tabular}

\section*{4) Minimization of Locality Splits}

The fourth evaluative benchmark is "Minimization of Locality splits." The Special Masters should be commended for their efforts to protect the integrity of the 133 local political communities that are legally recognized in the state of Virginia. Residents of a state may or may not decide to participate in or to self-identify with other super or sub-local "communities of interest," but every resident is directly affected by the shared interests, institutions and decisions of their local governments. Locality-first redistricting offers a rationality that corrects many of the worse self-interested abuses of redistricting processes controlled by political elites, parties and incumbents. As the Special Masters mention several times in their narrative, their draft plan is a great improvement over the existing set of Congressional districts. How much of an improvement is not reported, nor it seems is the final number of locality splits specified in their draft plan narrative: is it 10 or 11? As reported in Table 4, the 6 alternative plans demonstrate that compact, population equal, VRA-compliant Congressional districts can be formed in Virginia without dividing more than 12 of Virginia's localities. Table 4 also indicates that this multi-dimensional goal can be achieved with as few as 8 locality divisions.

Table 4

\hline
\end{tabular}

In closing, I hope this brief assessment deepens the capacities of the Virginia Supreme Court to evaluate the Special Masters draft plans and the set of possibilities available for the selection of Congressional and General Assembly districts that will best serve the residents of Virginia until the next decennial Census in 2030. As important, I want to encourage the Court to see their role in 2021 as a first important contribution to fixing the broken and dysfunctional partisan-based redistricting process that led to this highly unusual moment in which a set of unelected judges are required to create and to impose a new set of election district boundaries for the residents and voters of the state.

Sincerely,
Charles A. Kromkowski, Ph.D.

Redistricting Committee,

I am writing to petition the redistricting courts to not divide the Mount Vernon community of Northern Virginia in half. The maps that have been drawn for the Congressional District 8 and the Senate District 34 seem to do just that. Congressional District 8 map is especially bad, as citizens of Mount Vernon are now split, with the part split away going into a district that contains both Haymarket and Fredericksburg, which are communities with very different focuses.

It is more logical to continue to maintain the area north of the Occoquan River as a part of the Mount Vernon District, and also to maintain the Mount Vernon Estate in this district. All of our children attend Fairfax County Schools, and we should all be represented in the State Senate as one. I realize that this change will require a rebalancing of Districts 7,8 and 11, but I think that this could be accomplished, while still not ripping apart long standing communities of interest in any of those Districts.

Regards,

Dan Hosek

VA Redistricting concerns about House of Delegate Districts 69 and 71

I am Mrs. Manjula Ambur, resident of York County over the past 32 years. I am writing this email to express my serious concerns about the newly drawn Virginia maps for House of Delegates Districts 69th and 71st.

I am very concerned about Williamsburg and lower James City county not being part of District 69 and the details are given below. I very much appreciate your consideration of these issues and consider including Williamsburg and James City county in District 69.
- Williamsburg has always been part of Hampton Roads and should be considered to be part of Delegate District 69 as it has more in common socio economically with this District. Now it is being proposed to be in the District 71 with Richmond extended areas that does not seem to have that much in common.
- Williamsburg and lower James City County rely on same services such as Transportation, Healthcare, and Social services thar are in Williamsburg. So it is very beneficial for both to be in the same House Delegate District 69.
- Small part Gloucester is included in House Delegate District 69 and it should be part of the district with the rest of the Gloucester on the other side if the York River.

Thank you for your consideration
Mrs. Manjula Ambur

RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A --- Including Buchanan County in Proposed Senate District 5

Dear Ms.Theresa-Pitney, Special Masters, and Justices of the Supreme Court of Virginia:

I am writing you today to express my concerns regarding the proposed redistricting of Virginia's Senatorial Districts, particularly the inclusion of Buchanan County into proposed district 6 as opposed to district 5 .

As a citizen of Buchanan County there are many reasons that I could provide you as to why Buchanan County should be included in district 5 . I will try to keep my letter short and focus on some of the most important.

First, and maybe foremost, is our shared economic interests. Both Buchanan and Tazewell Counties are coal mining economies. In fact, multiple coal mines run across county lines despite the mine entrance being in one county or the other. This generates taxes and revenue for both counties as well as providing good paying jobs to citizens of both counties.

Despite having the coal industry, both counties have determined that we must diversify our economy. Both counties have begun aggressive tourism campaigns that share many similar offerings and opportunities for joint ventures. These range from traditional outdoor activities such as fishing, kayaking, and camping to the development of a trail system for ATVs ("four-wheelers") and UTVs ("side by sides") to travel through our rugged mountains.

Not only do we share these economic interests, but they also distinguish Buchanan County from many of the counties that are in the proposed \(6^{\text {th }}\) district. For example, Washington county has a very diversified economy as a result of its historic preservation, its hospitals and medical facilities, and its location on Interstate I-81. Its location in proximity to the interstate puts its economic interests much more in line with its neighbor Smyth County, which is also located in the I-81 corridor, than Buchanan County. Similarly, while our neighbor, Russell County, shares some coal interests, much of its industry is farming and cattle ranching. Further, a significant portion of Russell County's residents work in Washington County or the City of Bristol. Again, our economic interests with Tazewell County are much more similarly aligned. Finally, our other neighbor, Dickenson County, again shares some interest in the coal industry, but its proximity to Wise County results in more traffic and commerce between those
counties than what exists between Buchanan and Dickenson County. For these reasons, I believe that our interests are more commonly aligned with Tazewell County and many of the rural counties in the proposed district 5.

Second, Buchanan and Tazewell Counties have come together to begin several joint ventures through a regional IDA which will allow the creation of jobs and generation of revenue that will serve the citizens of both counties. Project Jonah, an aquaculture venture (or "fish farm" as we like to call it), is presently being constructed in Tazwell County. Due to the unique arrangement, despite its location in our neighboring county, Buchanan County will receive a significant portion of the revenue. This not only helps generate much needed income for our county, but also more job opportunities for the citizens of Buchanan County. This is one of the first of what we hope to be many joint ventures with Tazewell County.

Finally, Buchanan and Tazewell Counties share the US 460 corridor. This highway is the lifeline of rural far southwest Virginia and is used by our citizens, businesses, and suppliers to access I-75 in Tazewell County. Because of this corridor, businesses in each county serve customers from both counties. Families often live in one county and work in the other because we both have easy access to jobs in the other county due to the convenience of a major four lane highway (as opposed to the narrow and curvy roads that Buchanan Countians must use to access other counties). Also because of a significant common border and shared economies, families are often split by the county lines with some family members living in Buchanan County while others live in Tazewell County.

In sum, as a citizen of Buchanan County I truly believe that our shared interests with Tazewell County are so interwoven that it would be devastating to split our counties into two separate Senatorial Districts. Thank you for your time, your consideration, and all your hard work.

Sincerely,

Latasha N. Hagerman

Similarly, while our neighbor, Russell County, shares some coal interests, much of its industry is farming and cattle ranching. Further, a significant portion of Russell County's residents work in Washington County or the City of Bristol. Again, our economic interests with Tazewell County are much more similarly aligned. Finally, our other neighbor, Dickenson County, again shares some interest in the coal industry, but its proximity to Wise County results in more traffic and commerce between those counties than what exists between Buchanan and Dickenson County. For these reasons, I believe that our interests are more commonly aligned with Tazewell County and many of the rural counties in the proposed district 5.

Second, Buchanan and Tazewell Counties have come together to begin several joint ventures through a regional IDA which will allow the creation of jobs and generation of revenue that will serve the citizens of both counties. Project Jonah, an aquaculture venture (or "fish farm" as we like to call it), is presently being constructed in Tazwell County. Due to the unique arrangement, despite its location in our neighboring county, Buchanan County will receive a significant portion of the revenue. This not only helps generate much needed income for our county, but also more job opportunities for the citizens of Buchanan County. This is one of the first of what we hope to be many joint ventures with Tazewell County.

Finally, Buchanan and Tazewell Counties share the US 460 corridor. This highway is the lifeline of rural far southwest Virginia and is used by our citizens, businesses, and suppliers to access l-75 in Tazewell County. Because of this corridor, businesses in each county serve customers from both counties. Families often live in one county and work in the other because we both have easy access to jobs in the other county due to the convenience of a major four lane highway (as opposed to the narrow and curvy roads that Buchanan Countians must use to access other counties). Also because of a significant common border and shared economies, families are often split by the county lines with some family members living in Buchanan County while others live in Tazewell County.

I also believe personally, that this initially started as a political gerrymandering ploy, before Virginia recently turned Red. We are Fine, the way we are. Please leave it be.

In sum, as a citizen of Buchanan County I truly believe that our shared interests with Tazewell County are so interwoven that it would be devastating to split our counties into two separate Senatorial Districts. Thank you for your time, your consideration, and all your hard work.

Sincerely,
John Taylor

My wife and I have lived in our house in Burke Centre since July, 2006. I have Delegate Eileen Filler Corn and Senator Dave Marsden as my representatives to the General Assembly. Under the new maps I will not be there in their district. There are some residents of Burke Centre who will have two members of the House of Delegates and two State Senators in their district. My suggestion is to have all the Burke Centre residents to have the same Delegate and State Senator.

Thanks

Michael Gropman

I represent the Braddock District on the Fairfax County Board of Supervisors and live in the Wakefield Precinct. First, I want to thank the special masters for their work in developing these proposed maps and to the court for creating an opportunity for public engagement. I recognize the immense challenge in drafting maps that meet the various legal requirements while balancing the oft-competing goals of population equalization, preservation of communities of interest, compactness, etc. That said, I would like to express some concerns with the division of some communities of interest in the Braddock District.
1. Wakefield Precinct should move from the proposed 15th House of Delegates District to the proposed 14th House of Delegates District. This change would not have a significant effect on population deviation and would ensure that both districts remain "nested" within the 35th State Senate District. Wakefield Precinct shares school attendance boundaries, commuting patterns, and public facilities like recreation centers with the neighborhoods in the proposed 14th HOD district. It is more logically located there.
2. Kings Park West (Robinson and Laurel Precincts) is one of the most established, cohesive neighborhoods in Fairfax and is clearly a community of interest. Unfortunately, it is divided in both the House and Senate maps. This should be remedied.
3. The Burke Centre Conservancy (Fairview, Burke Centre, and Terra Centre Precincts) is one of three Planned Residential Communities (PRCs) in Fairfax County. PRCs are unique zoning districts established to encourage innovative design for land use and ample open space. Their unique zoning status and management by the Burke Centre Conservancy contribute to the cohesion of the community. Its 5,862 homes make it larger than many towns and it is a clear community of interest that should not be divided.
4. The neighborhoods within the Cardinal, Keene Mill, and Irving precincts are a community of interest with the same school boundaries, commuting patterns, and concerns regarding traffic calming needs and preservation of Lake Accotink. Division of those precincts between two Board of Supervisors' districts has caused confusion for residents and was addressed in the redistricting plan recently adopted by the Board of Supervisors. The division of these neighborhoods in both the HOD and State Senate maps will cause unnecessary confusion and should be remedied.
5. The Fairfax County neighborhoods and precincts surrounding George Mason University (Sideburn, Robinson, Woodson Precincts) are part of a community of interest that includes the City of Fairfax and George Mason University. They are most directly impacted by the
growth in student population and activities taking place on the George Mason University campus. Separating those neighborhoods from George Mason University will diminish their voice on that, and other, important issues.

Members of the Committee:
I believe the effort to redistrict is sound and there appears to be some gerrymandering, but that is bound to happen given human beings are involved. What is most revealing are some incumbents bellyaching about there district being rearranged. That gives me comfort knowing that the effort is probably on track to accomplish the intended purpose of electoral equilibrium.

Thank you and have a nice holiday.

Very Respectfully, John R Feroldi

Members of the Court and Special Masters,
We believe the currently proposed \(41^{\text {st }}\) House of Delegates District (HOD) to violate rationale outlined and described by the Special Masters within their memo sent to the Supreme Court of Virginia on December \(7^{\text {th }}, 2021\). We argue the two following points are not met within outlined criteria:
1. The Community of Interest (COI) of Blacksburg, Christiansburg, and Radford is not recognized under the currently proposed draft (see below).
2. The proposed 41st House of Delegate District fails to meet the component of functional contiguity. Functional contiguity effectively requires that a representative be able to travel between any two points within a district without leaving the district. We understand this to not be an explicit requirement under contiguous guidelines outlined within the memo, as proposed districts were drawn "somewhere in between" census and functional contiguity; however, the proposed district fails to meet functional contiguity within a large portion of the proposed \(41^{\text {st }}\) district.

Blacksburg, Christiansburg, and Radford: The 'True' 41 st Community of Interest
The Community of Interest that is Blacksburg, Christiansburg, and Radford are currently spilt between the \(41^{\text {st }}\) and \(42^{\text {nd }}\) HOD districts as drawn and require rearrangement to fulfill the proper political representation this community deserves. The three areas currently meet multiple criteria within said memo.
1. The Federal Government has defined these areas as an economic nucleus: Blacksburg, Christiansburg, and Radford are defined by the Federal Office of Management and Budget (OMB) as a Metropolitan Statistical Area (MSA). The three cities are the population nucleus of said MSA. This statistical measurement generates from the clear knowledge that nucleus areas have a high degree of economic and social integration with one another.
* According to MSA data, residents within the City of Radford are statistically as likely to commute for work to Montgomery County as they are to work within the city. For those in the city of Radford, Montgomery County is the most commuted-to area of work (https://www.census.gov/data/tables/2015/demo/metro-micro/commuting-flows-2015.html).
* The Aquatic Center in Christiansburg was partially funded by Virginia Tech and is the training center for the Virginia Tech Swim and Dive teams (https://www.cacpool.com/148/Our-Mission-Vision).
* Educational services are the leading industry of employment for all three communities. Almost 66\% of the area's employment came from Radford University and Virginia Tech in 2017. Virginia Tech is located in Blacksburg, which extends to the beginning of Christiansburg, and Radford University lies within the City of Radford (https://nrvrc.org/wp-content/uploads/2018/09/NRVRC-CEDS-Update-2018-19.pdf)
* The Town of Christiansburg provides the central retail shopping for the surrounding communities of Radford and Blacksburg (https://www.christiansburg.org/DocumentCenter/View/13878/2021-Audit).

\section*{2. These areas include Supreme Court of the United States broader definitions as to what constitutes a Communities of Interest, which are "shared broadcast and print media, public transport infrastructure, and institutions such as schools and churches."}
* Shared Educational Institutions:
- Blacksburg and Christiansburg reside in the same educational district within Montgomery County.
- Virginia Tech and Radford University share multiple joint degree programs and are a singular U.S. Army ROTC program
* Shared Public Transport Infrastructure:
- Radford Transit (bus service) has joint stops in both Christiansburg (the area retail center) and on the Virginia Tech campus in Blacksburg. The Blacksburg Transit System extends to Christiansburg as well.
- All personal rail travel will be centered in the future Amtrak station set for Christiansburg.

\section*{Recommendation}

We respectfully recommend redrawing the proposed district to reflect the work of Michael Moriarty (House Plan 412). Moriarty's' hypothetical draft preserves the Community of Interest that is Blacksburg, Christiansburg, and Radford while simultaneously honoring the criteria listed within the redistricting considerations. Moriarty's 49th district, this brief's argued COI, is attached below.

RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A --- Including Buchanan County in Proposed Senate District 5

Dear Ms.Theresa-Pitney, Special Masters, and Justices of the Supreme Court of Virginia:

I am writing you today to express my concerns regarding the proposed redistricting of Virginia's Senatorial Districts, particularly the inclusion of Buchanan County into proposed district 6 as opposed to district 5 .

As a citizen of Buchanan County there are many reasons that I could provide you as to why Buchanan County should be included in district 5 . I will try to keep my letter short and focus on some of the most important.

First, and maybe foremost, is our shared economic interests. Both Buchanan and Tazewell Counties are coal mining economies. In fact, multiple coal mines run across county lines despite the mine entrance being in one county or the other. This generates taxes and revenue for both counties as well as providing good paying jobs to citizens of both counties.

Despite having the coal industry, both counties have determined that we must diversify our economy. Both counties have begun aggressive tourism campaigns that share many similar offerings and opportunities for joint ventures. These range from traditional outdoor activities such as fishing, kayaking, and camping to the development of a trail system for ATVs ("four-wheelers") and UTVs ("side by sides") to travel through our rugged mountains.

Not only do we share these economic interests, but they also distinguish Buchanan County from many of the counties that are in the proposed \(6^{\text {th }}\) district. For example, Washington county has a very diversified economy as a result of its historic preservation, its hospitals and medical facilities, and its location on Interstate I-81. Its location in proximity to the interstate puts its economic interests much more in line with its neighbor Smyth County, which is also located in the I-81 corridor, than Buchanan County. Similarly, while our neighbor, Russell County, shares some coal interests, much of its industry is farming and cattle ranching. Further, a significant portion of Russell County's residents work in Washington County or the City of Bristol. Again, our economic interests with Tazewell County are much more similarly aligned. Finally, our other neighbor, Dickenson County, again shares some interest in the coal industry, but its proximity to Wise County results in more traffic and commerce between those
counties than what exists between Buchanan and Dickenson County. For these reasons, I believe that our interests are more commonly aligned with Tazewell County and many of the rural counties in the proposed district 5.

Second, Buchanan and Tazewell Counties have come together to begin several joint ventures through a regional IDA which will allow the creation of jobs and generation of revenue that will serve the citizens of both counties. Project Jonah, an aquaculture venture (or "fish farm" as we like to call it), is presently being constructed in Tazwell County. Due to the unique arrangement, despite its location in our neighboring county, Buchanan County will receive a significant portion of the revenue. This not only helps generate much needed income for our county, but also more job opportunities for the citizens of Buchanan County. This is one of the first of what we hope to be many joint ventures with Tazewell County.

Finally, Buchanan and Tazewell Counties share the US 460 corridor. This highway is the lifeline of rural far southwest Virginia and is used by our citizens, businesses, and suppliers to access I-75 in Tazewell County. Because of this corridor, businesses in each county serve customers from both counties. Families often live in one county and work in the other because we both have easy access to jobs in the other county due to the convenience of a major four lane highway (as opposed to the narrow and curvy roads that Buchanan Countians must use to access other counties). Also because of a significant common border and shared economies, families are often split by the county lines with some family members living in Buchanan County while others live in Tazewell County.

In sum, as a citizen of Buchanan County I truly believe that our shared interests with Tazewell County are so interwoven that it would be devastating to split our counties into two separate Senatorial Districts. Thank you for your time, your consideration, and all your hard work.

Sincerely,

Christie Stiltner
Buchanan County Citizen
1710 Red Dirt Road
Vansant, VA 24656

\section*{December 17, 2021}

Ms. Muriel-Theresa Putney, Clerk
Supreme Court Building
100 North Ninth Street
Richmond, VA 23219

Dear Ms. Putney,
The Stafford County Board of Supervisors is concerned about how the proposed Congressional and General Assembly election district maps could impact Stafford County. Members of the Board wish to provide the following concerns for Justices' consideration:
- Congressional - Proposed House District 7 groups the entirety of Stafford County into a district with Prince William County and parts of Fairfax and Spotsylvania Counties. Members believe this arrangement is problematic as it could diminish the representation and voting interests of Stafford County residents in favor of those of other localities.
- Virginia Senate - The proposed Senate District Maps divide Senate Districts 27 and 29 at Garrisonville Road north of Aquia Creek. Members believe Garrisonville Road should remain the district boundary north of Aquia Creek. Communities north of Garrisonville Road should be included Senate District 27 and communities south should be included in Senate District 29.
- Virginia House of Delegates - Proposed House Districts 23 and 64 are similarly divided at Garrisonville Road north of Aquia Creek. Members believe Garrisonville Road should remain the district boundary north of Aquia Creek. Communities north of Garrisonville Road should be included in House District 23 and communities south should be included in House District 64.

Thank you for taking the time to read this letter and for providing us the opportunity to comment on this maps. Members of the Board feel Stafford County's representation and voting interests should be maintained to the extent practical and strongly object to proposed maps which could serve to diminish the voting interests of our residents in order to benefit other localities

Sincerely,

Crystal Vanuch, Chairman
Stafford County Board of Supervisors
Rock Hill District

To whom it may concern,
I strongly urge you to heed the comments from the Lawyers' Committee for Civil Rights Under Law that Virginia must do more to protect fair representation for Black voters in their new statewide redistricting maps. They point to the extensive research conducted by the Virginia NAACP, and their maps which uphold fair representation for Black Virginians. Virginia's Black voters deserve fair and equal representation, and it is imperative that these concerns be incorporated into the new maps after generations of misjustice.

Thank you for your attention to this matter, Andrew Green

I live in Augusta County at 530 Barnhart Road, Fort Defiance.
I am concerned of the proposal to divide Augusta County. The County has two neighboring cities (Staunton and Waynesboro) with which we have various partnerships and communities. Our needs are for unity in our services to the residents of the County and adjoining Cities, not in division. And for unity in our communities. Communities of interest should remain together, not be divided. This is a concern for many areas throughout the Commonwealth, particularly in rural areas.

No one individual should be given preference to maintain a seat in the Senate or House. And yet we need to be aware of the need for institutional knowledge and experience for the citizens of the Commonwealth.

I would like to see further options for the redistricting proposals.

To: Supreme Court's Special Masters
Re: Redistricting
I have two major concerns with the redistricting as it impacts Virginia Beach and Norfolk. Both cities are home to our large military contingency, men and women who enrich our community as they serve our country. They are one entity that should not be split when it comes to their representation. Secondly, environmental issues affecting Virginia Beach and Norfolk share common causes and should be handled with common goals. In either case, dividing up this population could dilute the effectiveness of their representation, and consequently not provide the best solution.

We have an incredible woman representing our district. Elaine Luria is a centrist who has worked both sides of the aisle and I have every confidence she will continue to do so. If it ain't broke, don't fix it!!

Respectfully submitted,
Mary "Cathy" Combs

RE: Rules and Procedures for Implementing the Requirements of Article II. Section 6-A --- Including Buchanan County in Proposed Senate District 5

Dear Ms. Theresa-Pitney, Special Masters, and Justices of the Supreme Court of Virginia:

I am writing you today to express my concerns regarding the proposed redistricting of Virginia's Senatorial Districts, particularly the inclusion of Buchanan County into proposed district 6 as opposed to district 5 .

As a citizen there are many reasons that I could give you as to why Buchanan County should be included in the district. Those reasons include the sharing of the US 460 corridor, the shared mining industry (there are multiple mines that exist in both counties even though the entrance is in one county or the other) our joint ventures through the regional IDA, and so many others.

Today, I write you as the Sheriff for Buchanan County and want to focus on my concerns with the splitting of Buchanan and Tazewell Counties into two separate districts.

First, from a law enforcement perspective, Buchanan County is uniquely situated geographically. We are bordered by Kentucky on the western side of the county, West Virginia on the northern side of our county, and Tazewell County on the eastern side. On its face, this doesn't seem particularly notable, but it is quite significant for many reasons. US 460 by way of the Mountain Parkway runs from Lexington, Kentucky through Pike County and the city of Pikeville, Kentucky into Buchanan County, Virginia. This route is used to transport illegal narcotics from Lexington, Kentucky into Buchanan County and Virginia as a whole. US 460 runs through both our county seat, Grundy, and Tazewell's County seat, Tazewell, and ends in Virginia Beach, Virginia.

In addition to sharing the US 460 corridor, both Buchanan and Tazewell Counties share their northern borders with West Virginia. Our bordering counties in West Virginia have some of the nation's most affected counties when it comes to illicit drug use. McDowell County has led the nation in the past with the most overdose deaths per capita. Buchanan and Tazewell Counties, unfortunately, have led Virginia in overdose deaths per capita in years past. Again, we have similar concerns and interests from a law enforcement perspective. Narcotics regularly come across the borders through the "backwoods" but we also see a significant quantity of illegal drugs coming into Buchanan County out of West Virginia's cities of Princeton and Bluefield, which are both
on US-460 and those narcotics are transported through Tazewell County into Buchanan County.

Second, from a judicial efficiency perspective, Buchanan and Tazewell Counties comprise the majority of the \(29^{\text {th }}\) Judicial Circuit. Tazewell leads the four-county circuit with the most significant number of cases with Buchanan County and Russell County typically seeing a similar case load. I believe that whenever possible, a judicial circuit should share the same legislators given their duty and authority to appoint the judiciary that serves the circuit.

Finally, I believe that it is important for both Buchanan and Tazewell County to share the same legislators. There are many reasons for this that are unrelated to law enforcement, but this sharing is beneficial to law enforcement and public safety. We currently, and as drawn, will continue to share the same representative in the House of Delegates. By sharing the same Senator, it allows our counties to combine our efforts to talk with our shared representatives about public safety concerns. These discussions range from concerns for police officers' safety while working the streets to Commonwealth's Attorneys seeing legislative "fixes" that need to be enacted to further protect public safety or to ensure that citizens' rights are not infringed upon.

In sum, as Sheriff for Buchanan County I truly believe that our shared interests with Tazewell County are so interwoven that it would be a tragedy to split our counties into two separate Senatorial Districts. Thank you for your time, your consideration, and all of your hard work.

All,
In accordance with my testimony advocating for a slightly revised federal map, please see the attached images with details of my map proposal as well as corresponding demographic information for each district. Additionally, you can view my map proposal in detail at the following link:
https://davesredistricting.org/maps\#viewmap::066e4976-0187-498a-b29e-4020db3040c6
Again, I want to stress that these changes are only possible if the Court is willing to move the precincts in the western City of Richmond to the 1st. This allows Richmond Metro to be split into 2 more compact districts and Charlottesville/Albermarle to remain whole in VA-05.

Thank you,
--

RE: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A --- Including Buchanan County in Proposed Senate District 5

Dear Ms.Theresa-Pitney, Special Masters, and Justices of the Supreme Court of Virginia:

I am writing you today to express my concerns regarding the proposed redistricting of Virginia's Senatorial Districts, particularly the inclusion of Buchanan County into proposed district 6 as opposed to district 5 .

As a citizen of Buchanan County there are many reasons that I could provide you as to why Buchanan County should be included in district 5 . I will try to keep my letter short and focus on some of the most important.

First, and maybe foremost, is our shared economic interests. Both Buchanan and Tazewell Counties are coal mining economies. In fact, multiple coal mines run across county lines despite the mine entrance being in one county or the other. This generates taxes and revenue for both counties as well as providing good paying jobs to citizens of both counties.

Despite having the coal industry, both counties have determined that we must diversify our economy. Both counties have begun aggressive tourism campaigns that share many similar offerings and opportunities for joint ventures. These range from traditional outdoor activities such as fishing, kayaking, and camping to the development of a trail system for ATVs ("four-wheelers") and UTVs ("side by sides") to travel through our rugged mountains.

Not only do we share these economic interests, but they also distinguish Buchanan County from many of the counties that are in the proposed \(6^{\text {th }}\) district. For example, Washington county has a very diversified economy as a result of its historic preservation, its hospitals and medical facilities, and its location on Interstate I-81. Its location in proximity to the interstate puts its economic interests much more in line with its neighbor Smyth County, which is also located in the I-81 corridor, than Buchanan County. Similarly, while our neighbor, Russell County, shares some coal interests, much of its industry is farming and cattle ranching. Further, a significant portion of Russell County's residents work in Washington County or the City of Bristol. Again, our economic interests with Tazewell County are much more similarly aligned. Finally, our other neighbor, Dickenson County, again shares some interest in the coal industry, but its proximity to Wise County results in more traffic and commerce between those
counties than what exists between Buchanan and Dickenson County. For these reasons, I believe that our interests are more commonly aligned with Tazewell County and many of the rural counties in the proposed district 5.

Second, Buchanan and Tazewell Counties have come together to begin several joint ventures through a regional IDA which will allow the creation of jobs and generation of revenue that will serve the citizens of both counties. Project Jonah, an aquaculture venture (or "fish farm" as we like to call it), is presently being constructed in Tazwell County. Due to the unique arrangement, despite its location in our neighboring county, Buchanan County will receive a significant portion of the revenue. This not only helps generate much needed income for our county, but also more job opportunities for the citizens of Buchanan County. This is one of the first of what we hope to be many joint ventures with Tazewell County.

Finally, Buchanan and Tazewell Counties share the US 460 corridor. This highway is the lifeline of rural far southwest Virginia and is used by our citizens, businesses, and suppliers to access I-75 in Tazewell County. Because of this corridor, businesses in each county serve customers from both counties. Families often live in one county and work in the other because we both have easy access to jobs in the other county due to the convenience of a major four lane highway (as opposed to the narrow and curvy roads that Buchanan Countians must use to access other counties). Also because of a significant common border and shared economies, families are often split by the county lines with some family members living in Buchanan County while others live in Tazewell County.

In sum, as a citizen of Buchanan County I truly believe that our shared interests with Tazewell County are so interwoven that it would be devastating to split our counties into two separate Senatorial Districts. Thank you for your time, your consideration, and all your hard work.

Sincerely,

\author{

I respectfully urge the Court to resist the temptation to revise the maps proposed by the Special Masters. The proposed maps are not perfect. But attempts to improve them are likely to make them worse and damage the reputation of the Court, for the following reasons:
1) Dr. Grofman and Mr. Trende scrupulously followed the instructions of the Court. Both Special Masters have considerable expertise and experience with redistricting issues. The members of the Court cannot duplicate their expertise and experience, and so any maps devised by the members of the Court are more likely to reflect errors, misjudgments, and simple ignorance of potential consequences than the maps produced by the Special Masters. Neither Grofman, nor Trende, based on their experience and publications, appears to be motivated by partisan considerations, particularly when compared to other redistricting experts, and the maps that they have jointly produced are probably as free of bias and partisanship as is realistically possible.
2) The maps proposed by the Special Masters may not be perfect, but in redistricting perfection is unattainable, and should not be the objective of the Court. The Statutory Criteria that must be applied are sometimes inconsistent with each other and require subjective judgments, and no statutory guidance is provided as to the degree of weight to be given to each criterion. Any improvement that the Court might make to conform the maps more closely to one of the Statutory Criteria is likely to result in less conformance to another criterion. If you squeeze the balloon in one place, it will bulge in another. "Communities of interest" are a particular quagmire. Everyone is a member of multiple different communities of interest, and many people do not share social, cultural, and economic interests even with their closest neighbors. If the Court attempts to redraw the proposed maps based on a different assessment of "communities of interest" it will be stepping upon the slipperiest of slopes.
3) Underlying much of the criticism of the Congressional District maps is the assumption that dividing a city, county, or metropolitan area among more than one district is somehow disadvantageous to the residents of that city, county, or metropolitan area. Yet of course some splitting is unavoidable. The Richmond metropolitan area must be divided between districts because it is much too large to fit into any one district. But in addition, my experience working for Congress leads me to believe that the Richmond metro are will actually have more influence in Congress if it is represented by more than one Congressperson, and the same is true at the state level. Many of the comments seem to confuse local government with representation in Congress and the General Assembly. If a local government boundary does not respect communities of interest it can result in a significant loss of governmental efficiency. The same is not true of legislative districts.
4) Any changes to the proposed maps made by the Court, regardless of its actual reasons, will be seen through a partisan lens. Any changes will inevitably be viewed as being to the advantage of some interest groups, parties, or individuals, and to the disadvantage of others. No matter how disinterested the Court attempts to be, it will be assumed that the Court's ultimate motivation is to influence the outcome of elections. The Court will take a hit in terms of its public image as being above politics. In addition, if the Court takes over drawing district lines, rather than leaving this task to the Special Masters, future General Assemblies will be encouraged to appoint more political justices to the Court. Partisanship caused the Virginia Redistricting Commission to fail. Above all else, the Supreme Court should strive not only to avoid
partisanship in its handling of redistricting, but even the hint of partisanship. The people of Virginia amended the Constitution in an attempt to take politics out of redistricting. The success of that effort depends on the Court exercising judicial restraint and deferring to the recommendations of the Special Masters which it wisely appointed.

These comments reflect my views as a citizen of the Commonwealth, and are not submitted on behalf of any group or entity, or for the benefit of any current or potential future officeholder.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

\section*{Military}
-
Military and veteran populations that are essential to the socio-economic strength of Hampton Roads should not be split in the congressional districts.

Naval Station Norfolk, Fleet Forces in Norfolk, as well as Air Station Oceana in Virginia Beach work so closely together and have active duty servicemembers who live in both localities. They deserve to have the same federal representation in order to best advocate for their interests.

\section*{Environmental}
-
The ocean view and waterfront parts of Norfolk and Virginia Beach specifically should be together in federal representation due to their shared environmental concerns.

Reports by leading environmental scientists that the sea level could rise by several feet along our shores by the end of the century should be raising serious alarm.
Beyond the human cost of that disastrous possibility, the economic and infrastructural damage such a change could inflict on these communities is unthinkable.

\section*{Contiguity/Compactness}

The district is shaped like a "crooked J" that is not functionally contiguous. Due to the Great Dismal Swamp, constituents would have to drive through a majority of the 3 rd district to get from one end of the 2 nd to the other.

By putting Suffolk/Isle of Wight back in the 3rd, you get a more compact district in the \(2 n d\) and don't disrupt the compactness of the 3 rd.

The Honorable Members of Virginia's Supreme Court,

It appears that the Special Masters you appointed to develop a redistricting plan for Virginia's congressional districts have developed a plan that may be technically correct but is absent any sense of voter preference. I call it a "nerd's plan" that is politically insensitive. The plan as currently presented may treat the two major political parties equitably, but it fails to provide for equitable representation of protected classes of voters.

Voting rights laws for the Commonwealth of Virginia and for our federal government acknowledge past inequities in the representation of both ethnic minorities and women, and any redistricting plan should ensure that the rights of these groups are not further reduced. Unfortunately, the plan put forth by the Special Masters fails to address the voting rights of African Americans, Latinos and women. The most obvious evidence of this would be the impact of redistricting on the three female Representatives to the U.S. Congress.

I urge you to require the Special Masters to revise the plan they have presented to ensure that women, African Americans and Latinos have at least an equal opportunity to be elected in multiple congressional districts. The virtual elimination of the current 7th congressional district is particularly unfortunate as it eliminates one of the most competitive congressional districts in the Commonwealth and places counties in Richmond's western suburbs and exurbs in a districts with counties with whom the voters will have nothing in common. It may benefit those running for office as Democrats, but it eliminates from contention one of Virginia's most popular and effective members of Congress. While a satisfactory redistricting plan should not be designed to preserve incumbency, it should acknowledge the interests of voters that have been provided for more than three decades.

Please require that the Special Masters return to you a redistricting plan that is not only politically neutral but is one that recognizes the interests of women and ethnic minorities and acknowledges the differences between urban-suburban communities and those that are primarily rural in nature.

Thank you very much for your consideration of these concerns.

\title{
Statement to the Supreme Court of Virginia regarding the proposed districts by the Special Masters. Specifically effecting Westmoreland County, Virginia
}

December 17, 2021

\section*{This statement is in support of the proposed districts, with one suggested change}

I extracted the relevant pages from the proposed district pdfs and combined them into one file, for your convenient reference. The file is attached.

\section*{CD 1= proposed Congressional District 1 \\ SD 26 = proposed Virginia Senate District 26 \\ HOD 67 = proposed Virginia House of Delegates District 67}

I propose the following change:

\section*{For Proposed Virginia Senate District 26:}

Please include King George and Caroline counties instead of parts of New Kent and James City counties in proposed senate district 26.

\section*{This change would accomplish the following non-partisan representational goals:}
1. Improves the "nesting" quality of the proposed senate district with both the proposed HOD 67 and proposed CD 1.
2. Including King George and Caroline Counties in Senate District 26 adds representation up to the fall line of this geographically important watershed region of the Northern Neck and Middle Peninsulas. The Rappahannock River, which is a designated wild river, flows between Caroline and King George Counties. This change would provide representation of both sides of this important river in senate district 26, from the fall line to the mouth.
3. Provides single district representation for two important highway corridors, Highway 3 and Highway 17, and three important bridge connections to the nearest medical, judicial, airport, and other services used by many Northern Neck residents. Hwy 3 and Hwy 360 intersect at the town of Warsaw. Seven miles away at Tappahannock, the Hwy 360 bridge across the Rappahannock River intersects with Hwy 17. Farther south, The Highway 3 bridge across from the White Stone area in Lancaster County to the Saluda area in Middlesex County connects to
highway 17. The third important bridge is the 301 bridge across the northern part of the peninsulas, connecting south to Richmond and north to Maryland via the Nice Bridge across the Potomac River.
4. Improves the competitiveness grade of the proposed senate district, which, according to the Princeton Gerrymandering Project's interactive map, is presently rated F for competitiveness.
5. Frees the proposed areas of New Kent and James City counties for use in other senate districts.

Thank you very much for your very difficult work, and for considering this requested change to proposed Virginia Senate District 26.

Sincerely,
Linda Boatman, Resident, COI Westmoreland County, VA

Ms. Muriel-Theresa Pitney
Clerk of Court
Supreme Court of Virginia
100 N. 9th St, 5th Floor
Richmond, Virginia 23219
Dear Ms. Pitney:
Drawing lines for redistricting is a thankless task. There is no way to get a perfect map. I
know, been there, tried that.
But the voters of Virginia changed the process and now they are counting on you. The burden is yours even though you did not want or seek this burden.

The appointed Special Masters gave you some maps to help guide you all. I will address only Congressional maps and specifically the deficiencies as they relate to how the Special Masters drew the \(9^{\text {th }}\) district.

I encourage the Court to use the Tom Davis map as a starting point for further line drawing. It is better in many respects - it improves the \(9^{\text {th }}\) and \(10^{\text {th }}\) districts and follows federal requirements for Zero Deviation.

However, like any map, it can be improved upon.

As the 9th district has grown over the decades, parts of west Roanoke County have been in the 9th for 30 years. Salem was added 10 years ago as was the remainder of West Roanoke County.

Salem and West Roanoke County belong in the 9th.
Population growth, or the lack thereof, requires the Roanoke Valley be divided in some fashion. On this point the Special Masters’ division lacks an understanding of the region.

As I speak to my constituents, many are shocked that Salem and West Roanoke County are out of the \(9^{\text {th }}\) and Bedford is now in the 9th. The Special Masters did not just put a precinct or two of Bedford in the \(9^{\text {th }}\). Their map includes the town of Bedford, all the way to the community of Big Island and Highway 501. Highway 501 is the connector road between Buena Vista, located in Rockbridge County, in the \(6^{\text {th }}\) district and Lynchburg in the \(5^{\text {th }}\).

Additionally, the main road from Roanoke to the town of Bedford is US460. Traversing that road from Montgomery County to Bedford, one must go through West Roanoke County, Salem, Roanoke City and finally Botetourt County. If you traveled on Interstate 81, you would pass through West Roanoke, Salem, North Roanoke County and Botetourt County.

Bedford is a great place, and if it were absolutely necessary it be placed into the 9th, people would understand.

But it is not necessary to add Bedford County and thus bring a new region into the 9th. Frankly, it is unfair to Bedford, Salem and Roanoke.

Bedford is in the Lynchburg Metropolitan Statistical Area (MSA). It is not in the Roanoke MSA. Its community of interest is oriented to the east toward Lynchburg, not toward Roanoke.

Contrast that with Salem, Roanoke, Botetourt, Franklin and Craig, all of which are in the Roanoke MSA.
The 9th district has never before even been close to the Lynchburg MSA.
Including Bedford in the 9th violates the Special Masters’ stated criteria as well!
Bedford County is both east of the Blue Ridge Mountains and not part of the Appalachian region (using the same definitions as the Special Masters used).

Salem, West Roanoke County, more of Roanoke, and even long-time 9th district Craig County are a better fit for the 9th.

The Special Masters mistakenly believe that the cities of Salem and Roanoke must be together. They do not!

The two cities have vastly different histories. I could write a book, but briefly, Salem was founded in 1802. The town leaders were instrumental in having Roanoke County formed in 1838. In the late 1870s, Salem and West Roanoke County leaders backed one railroad company to come into Southwest Virginia. The leaders in Eastern Roanoke County around Big Lick backed the Norfolk and Western Railroad. The Norfolk and Western Railroad was given economic incentive money by its Big Lick supporters. Obviously, the Norfolk and Western Railroad won the race to serve Southwest Virginia. Big Lick became Roanoke City within a year much to the consternation of the leaders of Salem and West Roanoke County. A rivalry between the two communities has existed in varying degrees ever since.

Salem became a city in 1969 to prevent being annexed out of existence by Roanoke City. Virginia's annexation moratorium was created by Members of the House of Delegates representing Salem and West Roanoke County to prevent encroachment by Roanoke City.

While the Redistricting Commission failed, the one map Republicans and Democrats agreed on was a good map for the 9th district. It included Salem, West Roanoke County and more of Roanoke.

The Special Masters divided Elliston and Shawsville in Montgomery County from their historical ties to West Roanoke County and Salem.

Lastly, while living in Salem, I was elected to represent the \(9^{\text {th }}\) from outside the district in 2010.

In a hotly contested race, one of the major issues was, could or should Salem be part of the \(9^{\text {th }}\) ?

A majority of the voters (nearly a 100,000 ) said, Yes!
This was their decision!

Since the 9th has to grow, this Supreme Court should respect the will of the voters who said Salem and West Roanoke County should be in the \(9^{\text {th }}\).

Sincerely,
H. Morgan Griffith

\section*{RESOLUTION IN OPPOSITION TO STATE'S REDISTRICTING PLAN THAT PLACES BUCHANAN COUNTY INTO THE NEW \(6^{\text {TH }}\) SENATORIAL DISTRICT INSTEAD OF THE NEW \(5^{\text {TH }}\) SENATORIAL DISTRICT}

WHEREAS, the current \(38^{\text {th }}\) Senatorial District includes the following Bland, Buchanan, Dickenson, Pulaski, Russell and Tazewell Counties; the cities of Norton and Radford; and parts of Montgomery, Smyth and Wise Counties; and

WHEREAS, the proposed redistricting for senatorial districts places Buchanan County, in a newly named \(6{ }^{\text {th }}\) Senatorial District; and

WHEREAS, it is the understanding of the Buchanan County Board of Supervisors that redistricting guidelines provide for including "communities of interests" in the same electoral districts; and

WHEREAS, furthermore "communities of interests" are communities with shared cultural, social and economic interests;

WHEREAS, the current \(38^{\text {th }}\) Senatorial District includes the coalfield counties of Tazewell and Buchanan both of which have economies based on the extraction of coal and gas; furthermore Buchanan and Tazewell counties are contiguous to each other which has generated mutual aid agreements in law enforcement and fire and rescue; more recently Buchanan County, Tazewell County along with Russell County have entered Participation and Revenue Sharing Agreements in two major regional economic projects, including Project Jonah; additionally Buchanan County, Tazewell County along with Russell Counties created the Cumberland Industrial Facilities Authority(CIFA) to further facilitate regional economic development project; and

WHEREAS, it is respectfully submitted that Buchanan County along with Tazewell County should be included in the new \(5^{\text {th }}\) Senatorial District while placing Smyth County in the new \(6^{\text {th }}\) Senatorial District; and

WHEREAS, it is respectfully submitted the above suggested adjustments to the new proposed \(5^{\text {th }}\) and \(6^{\text {th }}\) Senatorial Districts would keep communities of interests with shared cultural, social and economic interests together in the same Senatorial District; and

NOW THEREFORE, BE IT RESOLVED that the Buchanan County Board of Supervisors hereby confirms its opposition to the proposed \(5^{\text {th }}\) and \(6^{\text {th }}\) Senatorial Districts and recommends in the alternative that Buchanan County be included in the \(5^{\text {th }}\) Senatorial District with Tazewell County and that Smyth County be moved into the new \(6{ }^{\text {th }}\) Senatorial District; BE IT FURTHER RESOLVED that a certified copy of this Resolution be tendered upon Hon. James W. Morefield; Hon. T. Travis Hackworth; the Clerk of the Virginia House of Delegates; the Clerk of the Virginia Senate; and the Clerk of the Virginia Supreme Court.

It is so RESOLVED this \(17^{\text {th }}\) day of December, 2021 with ratification on the \(21^{\text {st }}\) day of December 2021..

Drew Keene, Chairman

\title{
RE: Rules and Procedures for Implementing the Requirements of Article II. Section 6-A --- Including Buchanan County in Proposed Senate District 5
}

Dear Ms.Theresa-Pitney, Special Masters, and Justices of the Supreme Court of Virginia:

I am writing you today to express my concerns regarding the proposed redistricting of Virginia's Senatorial Districts, particularly the inclusion of Buchanan County into proposed district 6 as opposed to district 5 .

As a citizen of Buchanan County there are many reasons that I could provide you as to why Buchanan County should be included in district 5 . I will try to keep my letter short and focus on some of the most important.

First, and maybe foremost, is our shared economic interests. Both Buchanan and Tazewell Counties are coal mining economies. In fact, multiple coal mines run across county lines despite the mine entrance being in one county or the other. This generates taxes and revenue for both counties as well as providing good paying jobs to citizens of both counties.

Despite having the coal industry, both counties have determined that we must diversify our economy. Both counties have begun aggressive tourism campaigns that share many similar offerings and opportunities for joint ventures. These range from traditional outdoor activities such as fishing, kayaking, and camping to the development of a trail system for ATVs ("four-wheelers") and UTVs ("side by sides") to travel through our rugged mountains.

Not only do we share these economic interests, but they also distinguish Buchanan County from many of the counties that are in the proposed \(6^{\text {th }}\) district. For example, Washington county has a very diversified economy as a result of its historic preservation, its hospitals and medical facilities, and its location on Interstate I-81. Its location in proximity to the interstate puts its economic interests much more in line with its neighbor Smyth County, which is also located in the I-81 corridor, than Buchanan County. Similarly, while our neighbor, Russell County, shares some coal interests, much of its industry is farming and cattle ranching. Further, a significant portion of Russell County's residents work in Washington County or the City of Bristol. Again, our economic interests with Tazewell County are much more similarly aligned. Finally, our other neighbor, Dickenson County, again shares some interest in the coal industry, but its proximity to Wise County results in more traffic and commerce between those
counties than what exists between Buchanan and Dickenson County. For these reasons, I believe that our interests are more commonly aligned with Tazewell County and many of the rural counties in the proposed district 5 .

Second, Buchanan and Tazewell Counties have come together to begin several joint ventures through a regional IDA which will allow the creation of jobs and generation of revenue that will serve the citizens of both counties. Project Jonah, an aquaculture venture (or "fish farm" as we like to call it), is presently being constructed in Tazwell County. Due to the unique arrangement, despite its location in our neighboring county, Buchanan County will receive a significant portion of the revenue. This not only helps generate much needed income for our county, but also more job opportunities for the citizens of Buchanan County. This is one of the first of what we hope to be many joint ventures with Tazewell County.

Finally, Buchanan and Tazewell Counties share the US 460 corridor. This highway is the lifeline of rural far southwest Virginia and is used by our citizens, businesses, and suppliers to access I-75 in Tazewell County. Because of this corridor, businesses in each county serve customers from both counties. Families often live in one county and work in the other because we both have easy access to jobs in the other county due to the convenience of a major four lane highway (as opposed to the narrow and curvy roads that Buchanan Countians must use to access other counties). Also because of a significant common border and shared economies, families are often split by the county lines with some family members living in Buchanan County while others live in Tazewell County.

In sum, as a citizen of Buchanan County I truly believe that our shared interests with Tazewell County are so interwoven that it would be devastating to split our counties into two separate Senatorial Districts. Thank you for your time, your consideration, and all your hard work.

Sincerely,

Carmela Michelle Roark Buchanan County Resident 1160 Whitewater Drive Big Rock, VA 24603

I believe that the City of Falls Church (CFC) is much more aligned with Fairfax County as Communities of Interest than with Arlington. There are several reasons:
CFC sits on an economic corridor between Tyson's Corner and Bailey's Crossroads, both in Fairfax County.
CFC shares services with Fairfax County such as the Health
Dept. and water company
CFC is embarking on a major economic development project in collaboration with Fairfax County and WMATA at the West Falls Church metro area.
A CFC elementary school sits on land that is in Fairfax County and requires permission from FFX County Board if Supervisors for alterations to the school.
Please redistrict the CFC to align with Fairfax County!

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

\section*{Dear Supreme Court of Virginia and Special Masters,}

Please keep Mount Vernon together! The Special Masters' choice of new maps cuts the Mt Vernon District in half and includes West Springfield, with which we have nothing in common. Many of us have discussed and agreed on the following. These are many of the reasons why Mount Vernon must stay together.

We are now in the 36th Senate District which would become the 34th which the Special Masters characterize as being anchored in Franconia and Springfield. For this community, the core of this Senate district has always been the Mount Vernon, Fort Belvoir and Lorton areas. It only makes sense that I-95 should be the western boundary of this district and that it be anchored in Kingstowne, Lorton and Mount Vernon. Although Springfield is not part of this community, this map pares Mount Vernon District with Springfield. It should be noted that, the Fairfax County Board of Supervisors just approved a new Magisterial District Map. In this map they specifically removed a Springfield precinct because it does not share commonalities with the Mount Vernon district. Here is a link to that map: https://www.fairfaxcounty.gov/redistricting/sites/redistricting/files/assets/documents/ 2021-adopted-redistricting-plan-map.pdf

The newly drawn Fairfax County magisterial district map is a much better representation than the Senate map as West Springfield and the communities east if I95 are different communities of interest.
Another problem with the proposed map is that the students who attend Mount Vernon High School would now reside in two different Senate districts. See the map of the school boundaries on this map: https://www.fcps.edu/sites/default/files/boundarymaps/Mountvernon_HS.pdf

The Mount Vernon Community contains many communities of interest which cover the area from the southern edge of Alexandria City (Belle View) all the way south down to the Prince William County line. It goes from the Potomac River west to I-95. The planned development of the Route 1 corridor from Old Town to Fort Belvoir (EMBARK details here: https://fairfaxcountygis.maps.arcgis.com/apps/MapSeries/index.html? appid=7e2f347f24bd4f7e909a92b3b2f274a9 ) is of concern to all of the residents who
live along the corridor, but is not of interest to West Springfield or Franconia. The significant development that will occur as part of the Embark project, will add substantial population in this area over the next decade, further anchoring this Senate district to this community.

The Mount Vernon Estate and Gunston Hall are the focal points of the Mount Vernon and Lorton communities and many community members volunteer at these historic sites. We have strong community organizations that interact together such as MVCCA (Mount Vernon Council of Citizens' Associations) - https://www.mvcca.org/ and VIC (Ventures in Community) - https://venturesincommunity.org/ , Mason Neck Citizen Association, https://masonneck.org, The Federation of Lorton Communities, https//Southcountyfederation.com now know as the South County Federation, The Lorton Community Action Center. https://Lortonaction.org, Rising Hope Mission Church in Mount Vernon, https://risinghopeumc.org, The volunteer community in the Lorton/ Mount Vernon area work together to support these groups up and down the Route 1 Corridor.

We also want to point our the Mount Vernon/Lorton community has always been part a been a part of the 8th or 11th Congressional District, and has more in common with Alexandria and Fairfax county than the rest of the proposed 7th congressional district.

We hope you take these comments seriously as our representation has an impact on our sense of community.

Sincerely,

Please keep Mount Vernon together! The Super Masters’ choice of new maps cuts Mt Vernon in half and includes us with West Springfield, which we do not have anything in common. Many of us have discussed and agreed on the following. These are some of many of the reason why Mount Vernon must stay together.

We are now in the 36th Senate District which would become the 34th which says we are anchored in Franconia and Springfield. It only makes sense that I-95 should be the western boundary of this district. Fairfax County has much more in common than the areas south of Occoquan in Prince William County or West of I-95. However, this map pairs the Mount Vernon District with Springfield. The Fairfax County Board of Supervisors just approved a new Magisterial District Map for our districts and they REMOVED a Springfield district because we do not share common interests. Here is a link to that map: https://www.fairfaxcounty.gov/.../2021-adopted...

The newly drawn Fairfax County magisterial district map is a much better representation than the Senate map as West Springfield and the communities east if I-95 are not communities of interest. An example is the Mount Vernon High School that is located on 8515 Old Mount Vernon Road that would be split in half with this map. See the map of the school boundaries on this map: https://www.fcps.edu/.../boundary-maps/Mountvernon HS.pdf The memo that states that the 34th district is anchored in West Springfield and Franconia is not true. Looking at the map of Fairfax County AND the school boundary of Mount Vernon High School will inform the Special Masters where the boundaries should be.

The Mount Vernon Community, which contains many communities of interest which cover the area from the southern edge of Alexandria City (Belle View) all the way south down to the Prince William County line. It goes from the Potomac River west to I-95. The development of the Route 1 corridor from Old Town to Fort Belvoir (EMBARK - details here: https://fairfaxcountygis.maps.arcgis.com/../index.html... ) is of concern to all of the residents who live along the corridor, but is not of interest to West Springfield or even Franconia.

The Mount Vernon Estate is the anchor of the Mount Vernon community. Please take note that Mount Vernon has a very strong community with organizations like the Mount Vernon Democratic Committee, http://mvdemocrats.com/, MVCCA (Mount Vernon Council of

Citizens' Associations) - https://www.mvcca.org/ and VIC (Ventures in Community) - https://venturesincommunity.org/ - Indivisible Below the Beltway
(https://www.facebook.com/indivisiblebelowthebeltway/) all of which include members all along the Route 1 Corridor.

Mason Neck is also a part of the Mount Vernon District, as is Lorton, who have nothing in common with the residents of Haymarket and Fredericksburg. For example: Gunston Hall Elementary is a part of our region 3 Pyramid school system and this area will become the 7th Congressional district instead of the 8th, where both are communities of interest and is where they belong.

Please consider these comments, as this affects our everyday lives and our neighborhoods.

Thanks so much!

To the Honorable members of the redistricting committee,
As a citizen of Virginia I think that the Special Masters have done an excellent job with these maps, however as the Mayor of Warrenton in Fauquier County, I have some concerns with the way our town is divided by Senate Districts 31 and 28. The Northern Piedmont, a unique cultural area stretching from Warrenton to Lovettsville is correctly districted into SD 31, but it should include the Town of Warrenton's precincts of Courthouse and Warrenton, which comprise our downtown and business district. I encourage the Special Masters to include these precincts in HD 31, as our economy largely depends on the relationships to the North, and Warrentonians often commute northward and eastward, but rarely to the South. Warrenton is considered part of the Washington-Baltimore Statistical Area, meaning that our policy decisions, economic drivers, and general vision of the town will always be more heavily influenced by activities to our North and East. As such, we would be at a severe representational disadvantage should our legislative team be focused on the more rural issues that are distinct to the district we are currently drawn into. Furthermore, the town is currently in negotiations with Fauquier County on a boundary line adjustment, which could potentially divide representation between residents in the town. I sincerely thank the Special Masters for their diligent work on our behalf.

Thank you for your consideration
Carter Nevill
Mayor
Town of Warrenton

I find no logic in your proposal to eliminate Norfolk from this district and add Isle of Wight. The east side of Norfolk has common interests with Virginia Beach: heavy military
presence, coastal areas important for tourism, areas subject to the ravages of climate change and flooding. I find no similarities with Isle of Wight, an inland, rural area. Please reconsider your map.
Thank you,
Carolyn Lempert

My name is Corey Salyers. I live in Gate City, which is in Scott County and the 9th congressional district. I recently reviewed the redistricting map proposed by the Court's Special Masters and was shocked at the new 9th. As someone who resides in the far southwestern corner of the Commonwealth, it is important for our "region" to speak with one voice in the United States Congress. By region, I mean Southwest Virginia.

Regardless of how the district lines are drawn, Southwest Virginia differs from the rest of the Commonwealth. Its history, its cultural ties to rural central Appalachia, its recent economic struggles, and its creative new economic development strategies are unique. From coal mining to farming or from manufacturing to outdoor recreation, the mountains of Appalachia form the identity of the 9th district, its economy, its people, and its future.

That's why it makes far more sense for Salem, Craig, Covington, and Allegheny to be in the 9th district than Bedford, Franklin, and Henry. Either way, I - as a resident of far Southwest Virginia - believe Salem is far more representative of my home community than Bedford or Lynchburg. If the new districting prevails the "true members of Southwest Virginia" would not be represented, in actuality the new lines are geared more towards central Virginia.

Finally, it is my respectful request and sincere hope that you would keep Salem in the 9th district when you finalize the district maps.

All the best, Corey Salyers

To the Supreme Court of Virginia:

I fundamentally disagree with the alignments of Robert Scott and Donald McEachin's specially carved districts, otherwise known as the 3rd and 4th. Why can Portsmouth and Norfolk not be joined with their surrounding suburbs to unify the Hampton Roads area's racial groups under a common representative? They have nothing in common with Hampton and Newport News other than race. This stokes racial division and ruins our country.

What does Southside rural Virginia have more in common with urban Richmond than Richmond's suburbs do, other than race? This Reconstructionist philosophy to amplify racial discrimination in politics does not actually yield racial equity, but promotes an ability for the well-established members of society to "divide and conquer."

The draft maps would finally allow me to live in a competitive district (2nd), but the problems described above have caused my votes in the 3rd and 4th to not be meaningfully cast for 18 years of voting in my home state of Virginia. This is a basic deprivation of democracy in the name of de jure racial separation.

Sincerely, Mark Donner

\section*{THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS}

We wish to object to portions of the redistricting plan proposed by the Virginia Supreme Court.
On behalf of the 17000 members of the South County Federation, a citizens representation organization found in southeastern Fairfax County, the proposed alignment of the House of Delegates, State Senate and finally Congressional representation seem to fly in the face of existing natural boundaries that have been used for decades (and into centuries.)

The Occoquan River has been a firm boundary in separation of Fairfax and Prince William counties. To throw that aside and move the Mason Neck area into a congressional boundary stretching past the City of Fredericksburg also stretches the credibility of your efforts.

The split of the proposed 18th and 19th districts has torn asunder long established precincts, neighborhoods and facilities located in those areas that were hard earned by community involvement and effort.

If you look farther west you see tremendous discrepancies in terms of majority/minority percentage of population. I am not speaking of 5-7 points difference; I mean 30 points of difference. A much closer reexamination of those percentages is in order, at least in those areas of Fairfax County.

Your split of the Mount Vernon Magisterial district, placing the Mount Vernon Estate into a congressional district touching Ferry Farm might be "clever" for some history buffs, but it does nothing for support of the area in terms of representation, let alone tourism.

While this could be seen as a good first draft, it is hardly ready for real political representation, especially in these fractious times of polarized party discontent. New boundaries should project a sense of new excitement about potential connections, not alarm or dread.

We urge you to take the above into consideration and engage the public in drawing boundaries that both represent AND respect.

Cordially,

\section*{Dale Rumberger President, South County Federation}

Finale Norton
4542 Peaceful Shores Dr
Jamesville, Va
757.769.1835

Disapproval of Map for CD2
The Honorable Muriel-Theresa Pitney, Clerk
Supreme Court of Virginia
Dear Ms Pitney,
The Special Masters have recommended a crooked "J" shaped map that skips Norfolk. I live on the Eastern Shore, and with it comes it's own complications, As part of a rural community it is difficult to get a fair shot at all voices being heard, Rural communities are not monolithic. Here's why Norfolk is so important:
1. It gives a more fair opportunity for communities of color to be heard...already in the map drawn for House District 100 consolidated with Va Beach, communities of colors voices have all been primarily silenced. Norfolk gives us a shot.
2. The Eastern Shore separated by the Chesapeake Bay Bridge Tunnel has all the coastal challenges with Norfolk as well as Virginia Beach, they should all be addressed by one congressional representative for continuity so we get the best and most consistent results possible.
3. Wallops Island, US Naval installations in both Va Beach, and Norfolk, the commonality is for military veterans, active duty, and support systems to remain together is the greatest benefit for the best outcomes in services with consistent representation.

Whatever our race and background we all deserve the best and most consistent representation we can get. This is the occasion where zip codes matter. I hope you will take the action of putting CD2 back the way that is most beneficial to all of its constituents.

Respectfully,
Finale Norton

Hello,
I am a resident of Yorktown, Virginia and I was
shocked to see the new redistricting maps.
How does taking Norfolk out of the 2nd district make any sense?
The military populations need to be together and have the same federal representation in order to best advocate for their needs.
There are also similar environmental needs for Norfolk and Virginia Beach and keeping them together in the same district makes a lot more sense.

Please consider keeping Norfolk in the 2nd district.

Thank-you,
Ivelisse

I am a voter in the 2nd district and am concerned and distresses about the proposed redistricting plan.
Militarily, the veterans and active duty population should not be split. They are vital to the socio-economic strength of Hampton Roads. Air Station Oceana in Virginia Beach and Norfolk’s Naval Station, Fleet Forces personnel work closely together and reside in both cities. They deserve to have the same federal representation to advocate for their interests.

Environmentally, Ocean View and waterfront
parts of Norfolk and Virginia Beach specifically require to have federal representation together because of their shared concerns.

Contiguity is another issue for our 2 nd district. People would need to drive through the majority of the 3rd district to get from one end of the second district to the other due to the Dismal Swamp! That is a disconnect.

Thank you for reading and taking the time to consider my concerns.

To whom it may concern:
The women in Virginia, which is to say a majority of Virginians, are taking note of the fact that the only House of Representatives incumbents given a more difficult path to reelection are women.

Perhaps if one of the map masters had been a woman, it would have given her pause pause to create a map with the potential to eliminate all three Virginia women serving in the House of Representatives.

Perhaps if one of the map masters had been a woman, communities would have been kept together, rather than split down the middle of a large road in the county.

Perhaps if one of the map masters had been a woman, a woman representing the 7th District of Virginia would not have been written out of her district.

It is 2021 and women are tired of not having a seat at the table where decisions such as this are made. Those choosing map masters need to think a little harder about how they have silenced the majority of Virginians. Those chosen as map masters need to ensure their results do not appear to discriminate based on the sex of incumbents. While it is not yet constitutionally protected in the same way as race, it impacts a majority of us and should weigh heavily on the conscience of those shaping our futures.

Sincerely,
Kati Hornung

\section*{THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS}

As a forty five year resident of Fairfax City and Fairfax County, I have to express my dismay at the proposal I have just seen, particularly in regard to changing the 37th delegate district to the 11th.

Looking at the map, I can see the geographic appeal of the proposal, but there are several local issues that bear consideration. George Mason University, and their 30,000 students have a huge impact on the entire area of the former 37th District, and a substantial financial impact on the county. I have seen the town-gown relationship go from contentious to collegial, and to replace the southern area of Burke-Fairfax and replace it with Oakton seems to ignore the commonality of interests the areas around GMU share.

Braddock District has always been the most heavily residential, and least commercial, of the districts in Fairfax County. I had to research to learn the identity of the County Supervisor for Oakton. I was shocked to learn that the Providence supervisor, who represents Oakton, also represents Tysons. I am simply unable to wrap my brain around serving the interests of GMU, the Braddock suburban neighborhoods, and the urban sprawl which is Tysons Corner.

Fairfax City, in particular, has a particularly involved electorate. When our representatives in Richmond come home and hold a Town Meeting mid-session, folks know to arrive thirty minutes early, because they are standing room only. (This was pre-pandemic, of course.). I'm afraid that redrawing the district to respect geography rather then common interests will will have a negative impact on voters interest in often murky world of Richmond.

Gail Wade
Fairfax City

Delegate Vivian Watts - Revision to reflect actual census data to replace comment posted 12/14/21 based on estimates.
Wakefield Precinct should be moved from proposed HD15 to the proposed HD14 and the portion of Woodburn Precinct inside the Beltway should be moved from the proposed HD14 to the Proposed HD13:
(1) The deviation for HD15 under the proposed plan of \(+2.01 \%\) would tighten to \(-1.62 \%\). The deviation of HD14 would tighten from \(-0.86 \%\) to \(+0.76 \%\). Although the deviation for HD13 would increase from \(+0.16 \%\) to \(+2.16 \%\), it still would be less than 9 other proposed House districts.
(2) The nesting of 5 House districts within 2 Senate districts would not be breached: HD15 remains wholly within SD35. HD14 also remains wholly within SD35 within the exception of a precinct in SD37 already assigned to it. HD13 remains split between SD35 and SD37.
(3) Compactness of HD13, HD14 and HD15 would not change because Wakefield Precinct and Woodburn Precinct are at a corner of the districts involved. In addition, the identifiable borders of HD13 and HD14 will be significantly improved by using the Beltway, which will divide the current Woodburn Precinct as proposed by Fairfax County in their redistricting. Furthermore, HD13 and HD14 will be defined by the entire length of Gallow Rd inside the Beltway.
(4) HD14 and HD13 would remain solidly majority-minority districts:
\begin{tabular}{rrrrrrrrr} 
& Deviation & Adj Pop & White & Hispanic & Asian & Others & Black & HWA/PI \\
proposed HD14 & \(-0.86 \%\) & 85,572 & 32,568 & 22,663 & 19,704 & 12,796 & 8,822 & 47 \\
Wakefield & & 3,132 & 2,140 & 254 & 507 & 84 & 102 & 1 \\
Woodburn (pt) & & \(-1,734\) & \(-1,106\) & -140 & -353 & -48 & -34 & 0 \\
revised HD14 & \(0.76 \%\) & 86,970 & 33,602 & 22,777 & 19,858 & 12,832 & 8,890 & 48 \\
& & & & & & & & \\
proposed HD13 & \(0.16 \%\) & 86,448 & 35,215 & 28,662 & 15,849 & 16,333 & 5,810 & 53 \\
Woodburn (pt) & & 1,734 & 1,106 & 140 & 353 & 48 & 34 & 0 \\
revised HD13 & \(2.16 \%\) & 88,182 & 36,321 & 28,802 & 16,202 & 16,381 & 5,844 & 53
\end{tabular}
(5) Community of interest will be served. Wakefield Precinct residents are in the Annandale 22003 zip code which is dominant zip code of HD14 but is only barely represented in HD15. Wakefield Precinct shares school attendance areas with essentially the same number of households in either HD14 or HD15. A recorded citizen comment about shopping patterns of Fairfax County's proposed Woodburn Precinct divide would be echoed in many border precincts of districts throughout Northern Virginia's suburban sprawl.
(6) If the critical redistricting principles in 1-5 have been satisfied, I am not aware of established court precedent for not considering where current elected officials reside. HD15 has two incumbents; HD14 has none. At this point in Virginia House history, un-justified loss of legislative experience is particularly serious to the complexity of shaping public policy. Both incumbents have more than 10 years of experience, while two-thirds of the 2022 House has less than 10 years and almost half have less than 5 years.
(7) Moving Wakefield Precinct into the under-populated HD14 gives more flexibility to address numerous public concerns about HD15 regarding splitting the Kings Park West community, as well as addressing the awkward hook of Cardinal Precinct in HD15's border.

As a citizen of Virginia Beach for the past 35 years, I am very concerned about the proposal to redraw the Second Congressional District. Military orders brought us to Virginia Beach in 1986. The proposal will split the Hampton Roads military constituency and remove the voting bloc that CD2, which includes Naval Station Norfolk, Joint Base Langley/Eustis, Naval Air Station Oceana, and Joint Expeditionary Base Little Creek/Fort Story, has traditionally maintained. By separating these very important military installations into different districts and replacing them with rural localities the political strength of our military population would almost certainly be diluted. The plan would result in different districts which serve the military competing witheach other for critical Congressional funding and would not serve the interests of our nation, our state or our distinctly military-centric region. For as long as I can recall, CD2 has been recognized as the "Virginia military district," and its representative has served on the Armed Services Committee. All of the bases work closely together to support our national interest. Active-duty service members live in most of the localities and commute to work. Active duty and retired military members deserve to have the same federal representative advocate for their mutual interests in Congress. I would join those concerned citizens asking you to leave the current area of Norfolk which lies in the second district intact.

Sincerely,
Linda Franzitta

TO WHOM IT MAY CONCERN:

Please keep Staunton and Waynesboro in the Senatorial district with the rest of Augusta County and the central Shenandoah Valley.

The proposed redistricting map that would split Augusta County and send Staunton and Waynesboro into a district that far south and west makes no common sense on the ground and would be very detrimental to citizen interests of not just the area split off but also the remaining area of common interest. This split would directly harm our ability to be well represented in the General Assembly. Staunton and Waynesboro are central to Augusta County and to the central Shenandoah region. We have strong common interests also with Rockingham County, particularly on economic and land use issues, and are the primary hub for Highland County residents as well.

I know these communities well as a resident and also as a land use planner working at the Central Shenandoah Planning District Commission and other regional jobs throughout my career. Splitting these cities off to the be the satellite of a distant region would make us potentially irrelevant and unheard in the new district as well as gut the remaining Augusta north district. This split would go against our entire history of interwoven ties of shared interest, economies, land use issues, institutional partnerships, and alliances in the county. It also cuts against most of the regional groupings for state agencies and programs.

Thank you for your consideration.

Virginians are tired of the politics of gerrymandering and party attempts to control power not through the ballot box but through controlling the districts. Please follow the constitution, not your party affiliation in setting districts. Virginians deserve better than the attempts of Democrats to gerrymander districts in their favor. Just do what is right and proper, not what is party desired.--

The town of Vinton is within Roanoke County but with the proposed redistricting will be separated from most of Roanoke County and much of the valley. I encourage you to keep communities of interest together with redistricting. Also avoid gerrymandering of our districts.

Dear fellow Virginians,
In redistricting Virginia, I understand it is a huge task on your part. I do however feel it would be a huge disservice to SWVA, New River Valley especially Radford to remove Blacksburg from our district. We work together, live together and have church together. We need funding in our area to increase not decrease. Removing Blacksburg and also Salem from these Senate and Congressional Districts takes teacher and community funding, infrastructure and transportation funding, Health care and community awareness funding from me, my family and the families I serve. I am a Doula and HypnoBirthing \({ }^{\circledR}\) Childbirth Educator. I serve families in the New River and Roanoke Valleys. These families depend on funding and decision to be made with them in mind. The redistricting proposed does not support this. Please keep Radford, Blacksburg and Montgomery County together.

Sincerely,
Anna Whetsel Rucker

Just in case you weren't able to open the attachment ...
Chief Justice and honorable members of the court, thank you for this opportunity to tell you why I'm opposed to the map of congressional districts that has been proposed. My name is Candace Graham and I live in Western Chesterfield County, in the Richmond Metro Area of Central Virginia. Many of those testifying on Wednesday demonstrated that Chesterfield and Henrico are a community of interest and should not be separated. Access to healthcare, shopping, business and recreation is shared by both counties, via Interstates 288 and 64 and the Chippenham Parkway. Western Chesterfield and Henrico are developing rapidly. We share common challenges in infrastructure, education and transportation. Chesterfield County has much more in common with suburban Henrico (In the proposed 1st CD) than it does with any of the rural counties south and west of us (in the proposed 5th CD).

Others who have testified listed the agencies that provide services to the entire Central VA region. This is the region the map masters should start with, instead of treating it as an afterthought. Henrico County was established in 1611. This region is the birthplace of the nation. How can this important region be adequately represented by 4 different representatives?
On a related note, I am a member of a national organization whose purpose is to elect more women to office. There are currently 3 Congresswomen representing Virginia. Instead of creating districts that are more competitive, the proposed map decimates the district of one of the women incumbents, draws another woman incumbent out of her district, and makes the district of the third a toss-up. It feels like we're going backwards. These women have been elected and re-elected
because the majority of their constituents feel well-represented. Their existing districts are already competitive and challenging.
I am asking the court to instruct the map masters to adopt the Farkas map, instead. It would preserve this historic community of interest in Central Virginia, and it would retain the districts of the 3 women incumbents.

Thank you so much for your consideration.
Sincerely,
Candace Graham
Midlothian, VA

To of Virginia Supreme Court,
Districts in the Roanoke and New River valley should be compact not gerrymandered all over the valley.

I am an engineer and surveyor whose company, Anderson \& Associates, pioneered GIS and GIS based redistricting in western Virginia in the 1970's and 1980's.

I don't know the current issues with any districts but I would be extremely leery of complaints by political organizations as I understand there is in the Roanoke-Blacksburg area.

I also served as Co-Chair of the New Century Council which involved Roanoke and the New River Valley.

I would be happy to provide input based on my experience. I do, however, have my bias as a Republican.

I believe communities of interest need to be drawn together in redistricting plans.
It is hard to avoid politicization of this process but the court should look for any potential manipulations which might separate and/or isolate some towns (like Vinton, which would be better as part of Roanoke valley instead of being drawn with Staunton).
Our elections are important and drawing districts in funky ways can be devastating.
Thank you for exercising your powers carefully.

Voting districts in Virginia should be compact, not serpentine.

Supreme Court of Virginia
Public Comment
17 December 2021
Brandon Thurner
Fairfax County, VA

I want to thank members of the Supreme Court of Virginia for your time in hearing public comments to these proposed maps. My name is Brandon Thurner, and I am offering my public comment on the congressional maps as a longtime resident of Fairfax County. While these maps are more compact than the current gerrymandered districts, they require a significant rework so as not to separate communities of interest, as well as to make the districts more competitive.

While the proposed congressional maps look more compact, the approach is inconsistent. It is not fair to allow some regions to keep their communities of interest while breaking up others, such as the l-64 corridor in Central VA.

In the proposed maps, the three current congressional districts that largely populate my region of Northern VA - districts 8, 10, and 11 - retain their population load centers of Fairfax, Arlington, and Loudon Counties as related communities of interest. It is common for residents - myself included - to live in one of these three counties, but work and socialize in one or both of the other two.

Unfortunately, this level of respect is not afforded to all regions of the Commonwealth, particularly Central VA. Specifically, Henrico County and Chesterfield County are now split in multiple directions and into three congressional districts \(-1,4\), and 5 . I often drive through and visit friends in different counties in Central VA. Henrico and Chesterfield are clearly related communities of interest. Further, why not draw Albemarle County in with the Richmond suburbs of Henrico and Chesterfield? Albemarle has more in common economically and socially with the Richmond suburbs than it does with the two rural districts into which it would be cleaved. Unfortunately, the proposed maps split up Central VA and the Richmond suburbs like spare parts of a car at an auto auction.

From my visits, I recognize that just like back home in Fairfax, Arlington, and Loudon Counties, the people of Henrico, Chesterfield, and Albemarle Counties often live in one county and cross into the other two Counties as well as Richmond proper for work and socializing. But where I jump on the Fairfax County Parkway or the DC Metro system to traverse Fairfax County, residents of Central VA hop on I-64 and the Chippenham Parkway, which also serve as physical infrastructure boundaries of the region.

Additionally, most of the proposed congressional districts look absurdly safe for one political party or the other - for example, VA08 is \(\mathrm{D}+50\) and VA09 is \(\mathrm{R}+46\). One would expect this level of packing from partisan gerrymandering, but not from a bipartisan redistricting commission. We need more chances to meet and speak with neighbors who may not see matters the same way as we do - conversation often leads to mutual understanding.

My request for the Special Masters and the Supreme Court of Virginia is twofold. First, revisit these congressional maps and make substantial changes toward reuniting natural communities of interest, specifically in the Richmond suburbs. Second, rework the boundaries which leave districts far less competitive, perhaps by integrating Prince William County into the proposed VA10. Said another way, the proposed Farkas Map would reunite communities of interest in Central VA as well as ensure Northern VA also remains together making it preferable to the proposed maps.

I thank members of the Court for the opportunity to address you today.

I have been a resident of Virginia Beach for 25 of the past 42 years. I have come to appreciate its distinctive geographical, economic and social attributes and love interacting with its great variety of residents from all over the country. Few localities combine a flourishing tourist industry with critical military operations as do Virginia Beach and Norfolk. Because of these unique features, Virginia Beach and Norfolk share many critical interests that necessitate preserving their coastlines and waterways. Sea level rise is projected to impact our region far more than most in the United States and it is imperative that our representatives in Congress present a strong, united front on climate change and military issues. Certainly, Virginia Beach and Norfolk share many more common concerns in these areas and others than do Virginia Beach and Isle of Wight or Suffolk. Military operations, base development and resource usage, veterans' care and support for military families are far more significant issues for these two coastal localities than they are for inland communities with no notable military presence. The same is true for environmental concerns such as coastal erosion, off-shore energy production and encroachment of the seas on military bases and resort areas.

If the purpose of drawing congressional districts is to provide effective representation in Congress for communities with distinctive needs, the creation of the proposed 2nd District makes little sense at all. It is emblematic of the grotesque gerrymandering that has plagued redistricting for centuries and makes a mockery of the claim that the special masters have created districts that are compact and contiguous as well as representative of people with similar interests and concerns. It is imperative that you create districts that allow representatives to focus on the major issues of their region, not a plethora of unrelated concerns that people in a far-flung district might have. Virginia Beach and Norfolk must share representation.

Thank you for your consideration of these matters that will impact our region for generations to come.

This is a major improvement compared to what previously existed. I'm in favor of districts being geographically compact, so I'm glad to see that the "snake districts" which stretched across many miles and multiple jurisdictions are gone.

To the maximum degree possible, I believe it's important to vote and pay taxes with the same group of people. We're more likely to have shared concerns even if there's an urban, suburban, and rural population mix in a district. Yet like it or not, as populations grow, urban areas will have more and more impact on election outcomes. Historically, they tend to vote for Democrats.

What's most important to me is that districts be drawn so that the people choose their representatives and not the other way around.

Re: Redistricting Comments
Dear Special Masters:
I am writing to comment on your draft proposed redistricting map in the area of Fairfax County that represented for 28-years.

First, I commend you on your efforts to redistrict the Congressional and Legislative Districts in a nonpartisan manner. The existing districts often lack a cohesive basis other than political interests and often divided our existing communities in a manner that was confusing to our residents. In general, your draft proposed maps did a much better job of keeping communities together, but I also understand how given your time constraints and unfamiliarity with communities why you might miss some of the nuances that defines how Eastern Fairfax County residents identify with their community.

\section*{Eastern Fairfax County and Mount Vernon}

The Mt. Vernon Community is the oldest part of Fairfax County and contains communities that have the oldest English settlements in Virginia. As Fairfax County grew, it settled from East to West over the following century. Our nation's first General of the Army and first President, George Washington, settled in Fairfax County at his home of Mt. Vernon and the when the General Assembly created our local form of government, the Mt. Vernon Magisterial District was formed covering all of the land effective east of I-95 and has retained that name for over 100 years. Today, the land east of I-95 is covered by two Supervisor Districts representing approximately 200,000 people - Mt. Vernon and Lee District. I was honored to serve as the Mt. Vernon District Supervisor for 28 years from 1987 until 2015.

There are several major geographical obstacles that define our community. First, the Capital Beltway or I-495/I-95 and I-95 serve as major barriers that keep our community separate from the communities North and West. The City of Alexandria to the north is a different jurisdiction, has a different form of government, has completely different zoning rules given its urban density and is a difference place. While we share an "Alexandria" post office appellation, the community of Mt. Vernon is a markedly different place and there have even been campaigns to rid ourselves of the "Alexandria" post office appellation that the U.S. Postal Service has forced upon us.

The community of Springfield lies to the West of I-95. Springfield has different post offices, different commuting patterns, and markedly different demographics. Given that it was built out much later than the areas East of I-95, it developed different demographics and residents who tend to commute more to the west to Tyson's Corner rather than North. Interstate 95 tends also tends to divide the high school pyramids, planning communities and is served by a different police substation. It is a different community.

Within the Mt. Vernon and Lee Communities, Fort Belvoir is a major geographic obstacle. Since 2001, local residents cannot enter the base without military identification so it is a nearly 9,000 acre. In addition, Fairfax County's largest park, Huntley Meadows is attached to Fort Belvoir on the east and is nearly 1,500 acres. The two of these geographic obstacles obstacles total over 10,000 acres and create a major East-West and North-South obstacle to travel and define separate communities within our area. The only way to cross the obstacles are four roads - U.S. 1, the Fairfax County Parkway, Jeff Todd Way, and Lockheed Boulevard/Harrison Lane. This divides Mt. Vernon and Lee into two distinct communities. Here is a map:

Any maps in this area need to be drawn with these obstacles in mind.

\section*{Congressional District Problems}

First, while I understand your efforts are limited by population constraints, your memo seems to indicate that you simply made a judgment to split the Mt. Vernon and Lee Communities instead of the much more recently developed "Orange Line Corridor." I do not believe it is better to split an older, more diverse, and more established community than a newer one. Most Mt. Vernon residents commute North through the City of Alexandria to Washington, D.C. The Mount Vernon Community has belongs in the \(8^{\text {th }}\) Congressional District with Alexandria and Arlington. In fact, the first "modern" Democratic Congressman for the \(8^{\text {th }}\) District Congressional District was Herb Harris who was elected in 1974 and lived 50 feet from the boundary of the Mt. Vernon Estate. In addition, your present line splits Eastern Fairfax County's largest homeowner's association, Kingstowne literally right in half in Lee District.

The proposed boundary for CD8 (and SD34 and HD16) also splits the historic Mt. Vernon Estate.

If there are population constraints, you should first draw the \(8^{\text {th }}\) Congressional District along the Potomac to the Occoquan River, capture the entire U.S. 1 Corridor and Mt. Vernon, and only then start to move to the East. This would put Mt. Vernon in the \(8^{\text {th }}\) Congressional District and the Lee area of Eastern Fairfax County which lies West of Fort Belvoir and Huntley Meadows Park into the \(11^{\text {th }}\) Congressional District.

\section*{State Senate}

Next, before extreme gerrymandering came more potent in 2001, the Senate District (known today as the \(36^{\text {th }}\) District) representing our area basically encompassed the area between I-95, I-95/I-495 the Occoquan and the Potomac River. It looked like this using your map:

This basically captured the entire community East of I-95 and south of the City of Alexandria and consolidated Mt. Vernon and Lee Supervisor Districts into one Senate seat. This is the configuration you should aim for today.

Instead, the draft proposed map uses the poorly placed \(8^{\text {th }}\) Congressional District line along VA235 which cuts off the Mount Vernon Districts namesake - Mt. Vernon - from the rest of Mt. Vernon. It cuts Fort Belvoir into two separate senate districts. It cuts the attendance area of one of Fairfax County's oldest high schools - Mt. Vernon High School - in half and leaves a part of the Hayfield Secondary School District isolated in the proposed \(33^{\text {rd }}\) Senate District. It is also important to remember that in suburban areas like Fairfax County, our high school pyramids often serve as centers of community organization.

It incorporates the area West of I-95 - Springfield - which has different high schools, a third supervisor district, a third police station, different commuting patterns, and people who simply do not identify with anyone in Eastern Fairfax County. This area identifies with communities who live in Greater Springfield, Burke or Laurel Hill to the South. Interstate 95 may as well be a canyon. These areas should not be drawn together, and you should draw the Mt. Vernon and Lee Communities from Alexandria to the County Line (the Occoquan River) into one district.

\section*{House of Delegates}

Finally, the proposed House of Delegates map seems to disregard to the boundaries of our existing communities, local district lines, or geographic obstacles. As I mentioned above, Fort Belvoir and Huntley Meadows Park constitute a 10,000-acre obstruction in the middle of Eastern Fairfax County. The people east and west of this area in separate magisterial districts ( Mt . Vernon and Lee) and attend separate school districts (West Potomac H.S. or Mt. Vernon H.S. versus Hayfield Secondary School, Edison H.S. or Justice H.S.). Here is the proposed House of Delegates map showing with Fort Belvoir (GREEN) and Huntley Meadows (GRAY) highlighted.

There are three changes that should be made:
(1) The Mt. Vernon Estate (Westgate Precinct) should be consolidated with the rest of Mt. Vernon in HD16 and moved from HD19.
(2) The proposed maps have stranded the residents of the southern part of U.S. 1 in an island of precincts in HD17 stuck between Fort Belvoir, Huntley Meadows Park and HD16. These precincts should be placed in HD16.
(3) The precincts north and west of U.S. 1 after it intersects with North and South Kings Highway along I-495 should be placed with HD17 and the remaining voters of Lee District.

This would create one delegate seat for the Mt. Vernon Community and a separate delegate seat for the Lee Community (you call it "Franconia" in your memorandum) and much better aligns the delegate seats with the communities that actually exist and would looks like this:

These changes would allow our community to be properly represented by officials who represent entire communities with similar interests and fulfill your mission of creating true communities of interest. Thank you for all of your work and for considering my comments.

Very Truly Yours,

Gerald W. Hyland
Retired Mt. Vernon District Supervisor

The district is shaped like a "crooked J" that is not functionally contiguous. Due to the Great Dismal Swamp, constituents would have to drive through a majority of the 3rd district to get from one end of the 2nd to the other.

By putting Suffolk/Isle of Wight back in the 3rd, you get a more compact district in the 2nd and don't disrupt the compactness of the 3rd.
-
It takes longer to drive from Southampton County to the Virginia Beach District Office than it does to a District Office in Newport News.
-
The special masters intended to adhere to functional congruity however they focused more in minimizing county splits. There should be a balance that doesn't disenfranchise voters in the Hamptons Roads districts.

Comments for Public Hearing on 2021 Proposed Redistricting

My name is Mary Kranz and I live in Louisa County.

Thank you for this opportunity to speak on the proposed redistricting maps. Its been an understandably difficult process and the outcome overall looks fair to me. I have lived in Louisa County for 50 years and so my concern is with Louisa County, both the Congressional and State maps.

I'll start with the Congressional map. -District 1

Louisa is kept whole and I am pleased with that. However, it is placed on the extreme western edge of the newly drawn District 1. This district extends eastward to the Chesapeake Bay. The map places us with other 'rural' counties. Yes, these are 'rural' counties, but Louisa County is very different from these other rural counties. Louisa is squeezed between three urban centers, Fredericksburg, Charlottesville and Richmond. Our concerns are different. We are faced with uncontrolled development. We have very different kinds of hopes of attracting good jobs. We are in the Piedmont, they are tidewater. Even our agriculture is different. When I drive through these counties, I see vast fields of cotton and peanuts. Forestry is primary in Louisa.

People who live in Louisa have connections with Henrico, Chesterfield, and Albemarle. That's often where our children have chosen to live. That's where our jobs are. That's where we shop and eat. We have little common interest or personal connection with New Kent or Charles City county.

I ask you to take another look to see if Louisa might be placed more within its community of interest.

Now I would like to talk about the state maps.

District 59 for the House of Delegates and District 10 for the Senate. Both state maps divide Louisa County.

As a 50 year resident of Louisa County, my community of interest is aligned with the boundary of Louisa County. Our County government works with our state government. It is as a County that we deal with the development along 164 that extends from Zion Crossroads to Shannon Hill.

The HOD map -59, places us with another 'rural' county, Hanover, with which we do not actually have common interests, in spite of both being rural. Louisa's interests are tied with Fluvanna and Goochland by our common border with I64. It is with Fluvanna and Goochland that we work with our state agencies, most recently in working with the Monacan Tribe on the proposed line to obtain water from the James River.

In closing, I ask you to take another look to see whether there is a way that Louisa can be kept whole on these two state maps, and whether the HOD map can better group our county with those with similar regional concerns.

Dear all,
I write today concerning the Supreme Court's initial drafts for redistricting. I am concerned that once again, politics is pushing a gerrymandered outcome, especially regarding the Roanoke and New River Valleys, I strongly believe that the districts should be compact.
The map makers are clearly listening to comments and I urge you to make your voice heard. I shared some comments with WFIR this week and plan to provide extended comments to the map makers. I hope you will also share your thoughts with the Supreme Court on the websiteor by email.

Please do not hesitate to contact me for further comment and clarification of my concerns.
With warmest regards, Pat Hughes

\section*{Good evening:}

As a long-time resident of the New River Valley, I feel compelled to express my unmitigated displeasure with the way the so-called "non-partisan" group of amateur cartographers has decided to redraw the voting districts here in Southwest Virginia for our House of Delegates. I can only imagine the contortions they had to endure to end up with the convoluted demarcations they created in order to find every single way possible to divide the voters in this part of the Commonwealth.
Frankly, it looks to me like they had no idea what the meaning of the term "compact" means on terms of determining district boundaries! The monstrosity submitted by this group looks more like a work by Jackson Pollock than a map, and I can only say that it would require far less expertise to devise a better and less partisan layout. Perhaps a group of first-graders could be given the opportunity of creating an alternative re-districting proposal.
Got crayons?

Ok, this does not pass the idiot test. I live in eastern Spotsylvania County and have no connection or like interest with Loudon County which is more than 50 miles north. It's ludicrous to think we or they would be adequately represented. This needs to go back to the drawing board and be resubmitted.

Dear Special Masters:
I am writing to comment on your draft proposed redistricting maps for the Mount Vernon and Lorton areas of Fairfax County
that I currently represent on the Fairfax County Board of Supervisors. Thank you for your efforts to redistrict the Congressional and Legislative Districts in a nonpartisan manner. While "Mount Vernon" is unmentioned in your narrative and Lorton not truly addressed, Mount Vernon and Lorton are long-standing "communities of interest" sharing print media, public transport infrastructure, and institutions such as schools and churches and voters.

While generally your proposed maps did a better job of keeping the Mount Vernon and Lorton communities together, there are several aspects of the proposed maps that are essential to change to adequately keep together these southeastern Fairfax County communities of Mount Vernon and Lorton. On behalf of our communities, I urge you to make these changes:
1. The Mt. Vernon Estate (Westgate Precinct) should be consolidated with the rest of Mt. Vernon in House District16 and moved from House District 19.
2. The proposed maps have isolated the residents of the southern part Fairfax County along U.S. 1 in an island of precincts in House District 17 stuck between Fort Belvoir, Huntley Meadows Park and House District 16. These precincts should be placed in House District 16.
3. The precincts north and west of U.S. 1 after it intersects with North and South Kings Highway near I-495 should be placed with House District 17 and the remaining voters of Fairfax County's Lee District.

Your existing proposals both basically split the Mount Vernon High School Pyramid and Mount Vernon Supervisor District in half. With the limited changes recommended above, you can dramatically improve upon your maps while providing more diverse inclusion, population balance and intact communities of interest.

We urge you to take the above into consideration and respect the long-standing connections and ethnic diversity while understanding the military base (Fort Belvoir) and large natural park area (Huntley Meadows) geographical impact on keeping our communities separate from others and true communities of interest. Thank you.

Respectfully yours in public service,

Supervisor

To whom it may concern:
I am very concerned about proposed changes to the District 2 Map.
I feel very strongly that Norfolk and Virginia Beach should be represented by the same representative. Their interests are very co-mingled.

So many residents of these cities are Military - either active duty or retirees. It is important to these military constituents interest's that their representation not be diluted. They should be in the same district.

Their shared coastal location and environmental concerns also demands shared representation.

Please respect the unique needs of the Norfolk / Va Beach area in regards to the effectiveness of their congressional representation.

Do not split up District 2.

This new 7th district ignores the long standing relationships that Stafford holds with the counties surrounding it in the Rappahannock region. Further harm comes from these maps because the new state senate district and new house of delegates districts are designed to nest in to the new congressional districts
. Stafford county should not be attached to northern Virginia simply because I 95 runs through it. Stafford is more than a couple of exits off the high way , and these maps need to reflect that. We must weigh in with the Virginia Supreme Court.

Honorable Court,
I urge you to ignore, best you can, partisan calls. I know it's hard when incumbents are lumped, especially if they are one party and even one gender.
I hope you will ignore past voting.
As best you can, I hope you will design compact districts by population only, that follow historic or natural borders and to the extent possible avoid splitting municipalities. I understand you are required to pay some attention to race.
After that, let the chips fall where they may.
Not an easy task, but they gave it to the right people. .
Thank you for your service.

I have been following redistricting for over 50 years. It seems that it became very controversial when we decided to base the maps on race. There was less representation of African Americans 50 years ago but that is no longer the case. I would imagine that most Americans now want a representative who represents their interests and don't care about the color of his/her skin. It's time to get back to basing the maps on communities.
Thanks for taking on this difficult task.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Dear Sir and Madame:
Thank you for providing this redistricting response opportunity, to the residents of VA.

I understand the request given to Special Masters Sean P. Trende and Bernard N. Grofman. But, when the map was recreated and the districts compacted, it causes two of our minority senators to compete against each other. Those Senators are Lionell Spruill, Sr. and Louise Lucas.

If this map were accepted it would diminish minority (Black) representation in the Senate and localities by race and gender. Black representation in the Senate presently, four Black Senators. The compacting of this map would reduce representation to three Black Senators and the gender representation might reduced our female representation to two females and even more importantly, possibly eliminate our only Black male Senator - Lionell Spruill, Sr.).

My request is to allow Senator Lionell Spruill, Sr. and Senator Louise Lucas, to retain districts that allow diversity and gender to be represented. This would allow these two Senators, to vie for their seats against other competitors instead of each other.

Respectfully submitted,
Gale A. Lee, Chesapeake, VA resident

Virginians across the state voted in favor of redistricting reform in the belief that doing so would prevent incumbents from ensuring reelection by drawing their own districts. One of the very best things about the plan put forward by the court appointed experts is that it was done with no regard for impact on current office holders. In that sense, it is absolutely consistent with the will of the voters.

I also like that to the extent possible, district lines conform with those of existing political jurisdictions - cities, towns and counties - that will allow elected representatives to better represent the interests of those communities. No longer does the map feature a district that stretches from the Potomac and the Washington suburbs to the tobacco fields along the North Carolina border.

It is also my understanding that the plan increases the number of districts with majority minority populations when all minorities are considered.

It should be approved without additional change.

December 17, 2021

To the Honorable Chief Justice and Justices of the Supreme Court of Virginia:
I am writing to express concerns that Crewe Town Council and I have over the proposed House of Delegates redistricting map submitted to the Court by the Special Masters. The proposal would move Nottoway County from the current \(61^{\text {st }}\) district composed of Amelia, Cumberland, Mecklenburg, Nottoway, and part of Lunenburg Counties into the new \(72^{\text {nd }}\) district composed of Amelia, Nottoway, Powhatan, and part of Chesterfield Counties.

Our concerns are:
1. The proposed change does not adequately address the Communities of Interest requirement with regard to Nottoway County, specifically as it relates to economic and demographic factors; and
2. The proposed change could adversely impact any influence Nottoway County voters have in state house races and divide our representative's attention to the detriment of Nottoway.

To the first point, though Nottoway, Powhatan, and Amelia Counties are all considered "rural", Nottoway differs from the latter two economically and demographically. Nottoway (along with Cumberland, Mecklenburg, and Lunenburg) are considered "nonmetro" counties by the USDA, a designation which takes into consideration the economic influence of major population centers \({ }^{1}\). Counties within a major metropolitan area like Amelia, Powhatan, and Chesterfield face different needs and challenges, and have different levels of access to resources than those in non-metro areas.

Additionally, data show a significant disparity in income when comparing Nottoway County residents to our current \(61^{\text {st }}\) district and Nottoway County to the proposed \(72^{\text {nd }}\) district. Using Median Household Income (MHI) as a metric, Table 1 illustrates these disparities by comparing Nottoway County's data to that in each of the counties in the proposed and current districts. Given Nottoway County's MHI of \(\$ 45,900\), Chesterfield County's MHI is nearly \(78 \%\) over that of Nottoway, and Powhatan's is more than double at \(\$ 94,300\). \({ }^{2}\)

\hline County & Median Household Income & Difference & \% \\
\hline Amelia & \$60,100 & \$14,200 & +30.9\% \\
\hline Powhatan & \$94,300 & \$48,400 & +105.4\% \\
\hline Chesterfield & \$81,600 & \$35,700 & +77.8\% \\
\hline \multicolumn{4}{|c|}{Current 61 \({ }^{\text {st }}\) District} \\
\hline County & Median Household Income & Difference & \% \\
\hline Amelia & \$60,100 & \$14,200 & +30.9\% \\
\hline Cumberland & \$52,000 & \$6,100 & +13.3\% \\
\hline Lunenburg & \$44,900 & -\$1,000 & -2.2\% \\
\hline Mecklenburg & \$43,100 & -\$2,800 & -6.1\% \\
\hline
\end{tabular}

Economic factors are not our only concern regarding Communities of Interest. According to the memo from the Special Masters, the White, Black, and Hispanic racial makeup of the proposed new \(72^{\text {nd }}\) district is as follows: Non-Hispanic White, \(77.78 \%\); Black, \(18.21 \%\); Hispanic, \(1.77 \%\). Table 2 shows an estimated racial makeup of our current \(61^{\text {st }}\) district and Nottoway County based on 2019 and 2020 data. Nottoway County has a diverse, heterogenous population. To move Nottoway into a district where nearly fourfifths of the population are white could disenfranchise the minority voting population.

Table 2: Racial Makeup of Districts and Nottoway
\begin{tabular}{|l|c|c|c|}
\hline & Proposed 72 \({ }^{\text {nd }}\) District & Current 61 \({ }^{\text {st }}\) District & Nottoway County \\
\hline Non-Hispanic White & \(77.78 \%\) & \(62 \%\) & \(55 \%\) \\
\hline Black & \(18.21 \%\) & \(32 \%\) & \(37 \%\) \\
\hline Hispanic & \(1.77 \%\) & \(3.6 \%\) & \(4.9 \%\) \\
\hline
\end{tabular}

Finally, we believe the proposed change could adversely impact any influence Nottoway County voters have in state house races and divide our representative's attention to the detriment of Nottoway. As a non-metro area, Nottoway County faces different challenges than others in the proposed new \(72^{\text {nd }}\) district. We need significant attention within the General Assembly in order to address our complex challenges. But given the estimated population of the new proposed \(72^{\text {nd }}\) district at 88,033 and Nottoway County's population at under 15,000 , Nottoway would account for less than \(17 \%\) of the \(72^{\text {nd }}\) district's population. This, along with the income and racial disparities, creates a district divided by community interests and needs, with Nottoway County in the extreme minority. Our political influence would be lessened, and it is likely our challenges-those of the minority - are set aside in order to address the needs of the majority of the district.

In conclusion, we strongly encourage the Court to reconsider the proposed House of Delegates map and take into consideration additional factors related to Communities of Interest, including economics and demographics; and to consider the impact the proposed change will have on each locality.

Thank you for your service to the people of the Commonwealth of Virginia.

Chief Justice and Justices,

My name is Melissa Dart and l've lived in Henrico County for 25 years in the \(7^{\text {th }} \mathrm{CD}\) for 15 . I understand that new maps are a necessity coming out of the Census. I do not understand how or why a conservative, serious and an august body such as the Virginia Supreme Court would even consider maps such as these that effectively blow up the \(7^{\text {th }}\) Congressional District as it currently exists. By so doing you would be separating Henrico and Chesterfield, two massive suburban communities of interest. In some cases you would completely minimize if not destroy voices of people of color as well as centrist and independent voters. Black voters from the \(7^{\text {th }}\) are being packed into the \(4^{\text {th }} \mathrm{CD}\) which effectively dilutes their representation. It reeks of redlining. I appreciate the work and experience of the Special Masters. That said, they are not from Virginia so cannot understand that the James River makes no sense as a district dividing line. With the transportation infrastructure (288/Chippenham pkwy) Henrico and Chesterfield are effectively one community sharing economic, social and cultural ties. We work hard together as one region. Lumping me in Short Pump with Zions Crossing/Williamsburg and the Northern Neck is illogical in terms of demography and geography. That said at the end of the day this is not about me or my family. No matter who represents us in local/state/federal government we are in a great position of privilege. I'm here today to give voice to the rural voters, people of color. They do not have the time or resources to learn about these proposed maps. Those are constituents in the \(7^{\text {th }}\) who are currently actively represented; their needs being met. They have the most to lose in these new districts. We cannot rest until they are taken care of.

Based on the masters' memorandum, the \(7^{\text {th }}\) appears to have been
drawn last. The way it was drawn and quartered, it looks like an afterthought where pieces were just thrown anywhere there was a spot. This strategy disenfranchises an enormous voting block. Is there another current district on these maps that is obliterated the way the \(7^{\text {th }}\) is? There couldn't be less of a connection between Richmond and Tidewater. No matter how it might appear on a map it makes no other practical sense if you are in any way familiar with either area.

I would be remiss if I didn't mention that of the 11 congressional districts in the Commonwealth, 3 seats are currently held by women. These proposed maps just so happen to weaken the 3 incumbent women and bolster the 8 men. Gender was not considered explicitly. That said I'm not a believer in coincidences and I cannot help but think as far as we've come in almost 2022, misogyny is still baked in the cake. There must be a way to draw fair maps that does not dilute the women or the voters of central Virginia.

The maps under consideration are not only inviting local scrutiny and criticism but are attracting national attention from voter rights advocates. Virginia has been a bastion of fairness and good representation for a long time. None of us want this type of attention. The good news about this attention is that the Elias Group took notice and created what are now known as the "Farkas maps". I would encourage you to seriously considering adopting these maps as they check all of the boxes on the list of criteria for fair, non-partisan maps.

Thank you, Chief Justice \& Justices, for your time and consideration. I pray that the voices you hear this week are listened to and make a difference.

Regards, Melissa M Dart

To whom it may concern,
Below is the written testimony that I gave today before the Court. Thank you again for the opportunity to share my concerns with the current maps.

Good afternoon Chief Justice, Justices, Special Masters and Clerk of the Court,

My name is Sara Johnson-Ward and I live in the Roseland Precinct 517 in Chesterfield County. I am a lifelong Virginian.

Continuity of government is important for a stable, functioning society, but lifelong incumbency is not necessary to achieve this. Imagine my surprise to find that I, in the Richmond Metro area, have been redistricted into the \(5^{\text {th }}\) that borders the county where I grew up and is three hours from here! I am sure the Special Masters have noted that the Piedmont region is the largest region in Virginia and is very diverse. The new \(5^{\text {th }}\) includes Amherst - an agricultural community; South Boston known for growing tobacco; Charlottesville home of one of Virginia's founding fathers and recently renowned for the Unite the Right Rally; and Pittsylvania County where the show "Tickle" is filmed for the Discovery Channel. In my Midlothian neighborhood, my neighbors are employed by Capitol One, MCV, CarMax, Dominion, DuPont, the State of Virginia, Chesterfield County, and various local nonprofit cultural organizations. None of them grow tobacco, make moonshine, or farm. Pittsylvania County has more in common with Franklin County than the suburbs of Richmond and Mr. Tickle deserves fair representation too.

Princeton has rated the partisan fairness of the Congressional Maps A, Senate Maps B, and House maps A. They have rated the Competitiveness of the Congressional maps C, Senate Maps F, and House maps B. Finally, they have rated the Geographic features C for all maps. I and other members of Precinct 504 in Chesterfield concur with these ratings for our new districts. They will be submitting comments in writing. The districts are not competitive or compact. For example, House district 72 now has an odd finger that dips below Midlothian Turnpike and divides the neighborhood Walton Park in half. This was the exact issue that I had hoped would be fixed moving forward so that voters voices matter to those seeking office. None of the districts that I am now assigned to will be competitive, not Congressional District

5, Senate District 12 or House District 73. They are all 10-point districts. It is my belief that Virginians want fair, competitive seats where representatives must listen to their constituents no matter which party affiliation they share.

Additionally, I am concerned that 50 percent of the General Assembly will turnover in 2 years. Businesses reorganize often, but a business ridding itself of \(50 \%\) of its staff in 2 years is rare. Although I am not a fan of multi decade incumbency, I am worried that this much change at once will cost institutional memory and create instability. Finally, the minority population in Virginia grew over the last 10 years but this map reduces the number of minority held seats.

I have spent time reviewing the Farkas Map. Care and time were taken with it to solve many of these issues and comply with the law. I ask this court to consider the Farkas Map as an alternate solution because the map is fair, competitive, geographically compact, and preserves minority and female leadership.

Good luck in this endeavor and thank you for the opportunity to speak with you today.

Sincerely,
Sara Johnson-Ward

Dear Virginia Supreme Court:

I believe the Special Masters did great representing communities of interest in Arlington while keeping our representation compact. Keeping communities of interest together such as the R-B Corridor, Halls Hill, and Green Valley will keep our diverse community strong and represented. In addition, including Falls Church City along with Arlington also makes sense given we already share our judicial functions and several constitutional officers. Both the House and Senate maps accomplish this goal.

In conclusion, I urge the Supreme Court to adopt without change the proposed House and Senate maps that respect the unique and individual communities of interest in Arlington and Falls Church.

Respectfully, Theodore Kramer

Dear map masters,
Please put Williamsburg back in the 69th district where it belongs. And remove Gloucester from the 69th district.
Gloucester is on the Middle Peninsula and belongs to that county. Williamsburg shares a multitude of services and schools with James City County and should remain together. Also, Williamsburg is part of the historic triangle and is connected to the Hampton Roads communities.
The map seems very partisan and it is sad that Virginia can't be above that and care about everyones vote.

\section*{EXTERNAL EMAIL \\ THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS \\ Dear Folks,}

Thank you for the opportunity to comment on our reactions to the redistricting plan to date. In my opinion, redistricting should include the following components:
1. It should protect geographic cohesion. Communities should be kept together as much as possible.
2. This geographic cohesion should be balanced with some incumbent protection - especially to ensure minority representation. Elaine Luria should not have to compete with Bobby Scott for a seat. Politics, as seen clearly in this example, while inevitable, should not be that blatant.

Again, the opportunity to share input is appreciated.

Vinton is in the Roanoke Valley and should be represented with the area.
In northern Virginia rural areas should be separate from urban and suburban areas. Rural areas' needs are vastly different from urban/suburban areas and need their own representation.

All Virginians deserve to be represented in a manner that serves their distinct needs and those needs should be equally represented.

Thank you for the opportunity to comment. Thank you for your service to the Commonwealth.

Current redistricting law's intent was to eliminate politics from redistricting in VA.
I can understand why the current law's bipartisan committee failed because the is no provisions within the committee for impartial arbitration.
Even though the current VA. Supreme Court plan earns high grades, it does not meet the intent of the law which the VA Supreme Court is most qualified to accomplish.
The plan does the following:
1. removes Incumbent Representative Elaine G. Luria from the district that she represents.
2. Puts Lucas and Spruill in same district which dilutes experienced political representation within Tidewater.
3. Limits representation for minorities and women.

The current proposed plan does not meet the intent of the law and no one id happy. At least under the old system one party was happy.

I request that we put some human input into plan.
Thank you,

James A. Cervera

1797 Grey Friars Chase Virginia Beach, Virginia 23456
Redistricting Map of 2nd Congressional District
JCervera60@aol.com
757-621-6754

Comment:
Please accept my comments to the proposed redistricting map of the Second Congressional District. I submit my comments as a long time resident of Virginia Beach, a forty-two year public servant and a staunch Independent voting citizen. I do find a major flaw with the new redistricting proposal for the 2nd Congressional District. I believe the proposal, while attempting to maintain cohesion in some cities, has done so at the expense of splitting the "Communities of Interest " of Virginia Beach and Norfolk.

Through the new proposal we will weaken the economic, social, environmental, and military cohesion of Virginia Beach and Norfolk through separate representation in our nation's capital. There is absolutely no question that residents of Virginia Beach work, visit, shop, attend cultural events and attend institutions of higher learning in Norfolk. The same is also true of the residents of Norfolk who flock to Virginia Beach for the same myriad reasons. The economic, educational and social viability of both cities are dependent upon a single representative who understands the interoperability of the two cities into one regional effort. This has worked to the citizens advantage for a number of years and has proven that the region is an successful example for many parts of the country to copy.

There is absolutely no questioning the strategic importance of the military presence in both of our cities and the need to maintain a strong system to support their operational viability. The fact that Norfolk is home to the largest naval fleet and aircraft carriers in the free world (something I am proud to distinguish every time I speak publicly throughout the United states) and the aircraft, amphibious fleet and other warfare units are housed in Virginia Beach, is the logical reason to keep the continuity of our area under one Congressional District.

I remain hopeful that you will have a deeper understanding of the overarching need to maintain a seamless congressional influence between our cities, as the only distinguishing difference between Norfolk and Virginia Beach is a dividing line drawn on a map many decades ago.

Respectfully, James A. Cervera

As a five-year resident of James City County, I strenuously object to the proposed redistricting boundaries for House of Delegates Districts 69 and 71. It is ludicrous, in my opinion, to artificially separate the City of Williamsburg from the rest of Hampton Roads. This action ignores the transportation, tourism, economic, cultural, and historical ties that Williamsburg has long had with the rest of Hampton Roads and appears to be a blatant act of gerrymandering for purely partisan reasons. The Historic Triangle of Yorktown, Williamsburg, and Jamestown is important to all of the entities involved and should be honored in our representation in the House of Delegates. Furthermore, adding a small PART of Gloucester to the 71st District-by crossing the York River, a natural boundary that separates two very different areas-defies all logic and common sense. Please add Williamsburg back into the 69th District and remove the portion of Gloucester from the 71st.

I am a constituent in the current 2nd congressional district, \& am NOT in favor of the changes made by the masters.

The waterfront areas in Norfolk \& Virginia Beach should be represented TOGETHER due specifically to their shared environmental concerns. Sea level rising should have a coordinated plan, with a shared representative spearheading this joint effort.

In addition, both Norfolk \& Virginia Beach have military bases \& should have the same person representing their concerns, not split representation. The military is essential to Hampton Roads as a whole. Don't split us up.

\section*{THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS}

I would like to thank the Supreme Court justices, the court staff, the Special Masters and the many Citizens who gave testimony at the 2 public hearings. I was extremely impressed with the coherent and well researched presentations of the Citizens.

I would like to add my voice to the discussion of Incumbents. There were several presenters who wanted their current Legislators included in their district. In the Sunday Virginian Pilot the Editorial Staff also wanted maps redrawn to include Incumbents. I have volunteered with OneVirginia2021 for 5 years and every time Legislators discussed maps the number one issue was where the Incumbents live. I should add that my current Representative, who I campaigned for, will not be in my district based on the current maps. I believe she can still run in the district, but it is a real handy cap. I do not want the map redrawn with the sole purpose of putting her in my district.

I believe the Special Masters got it right when they said in their support document that they only knew where one Legislator lived. I would ask that Legislator addressed NOT be considered. I also assume that the Justices will not consider the party that elected them to their position. Our country is in dire need of people who are non partisan.

This entire process has proven that partisan Legislators should have no place in drawing district maps. We need to try to get a Nonpartisan commission to draw the maps in 2031.

Thanks again for all the hard work. I am looking forward to seeing the final product.
Happy Holiday's
Richard Hagen
Virginia Beach

\section*{EXTERNAL EMAIL}

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Dear Madam Clerk,
My name is Will Pace. I am a resident of Pittsylvania County and the Mayor of Chatham. I spoke before the Virginia Supreme Court on December 17 to share my thoughts on the districts that Dr. Grofman and Mr. Trende (the Mapmakers) developed, specifically where I reside. Below are the written remarks of what I said on December 17.

\section*{House District 48}

Overall, House District 48 is a decent House district. It keeps Chatham, Gretna, and Martinsville communities of interest intact. It is very important to keep Chatham, Gretna, and Martinsville's Communities of Interest intact, so please do not make any changes to the western, southern and eastern boundaries of House District 48. I say this also because the Mapmakers kept Danville's communities of interest intact within House District 49.

However, as mentioned during the Supreme Court public hearing on December 15 by Hurt Mayor Gary Hodnett, the town of Hurt and its communities of interest are not intact as the town of Hurt is in House District 51 (Campbell County and southern Bedford County), not in House District 48 with the rest of Pittsylvania County. The towns of Chatham, Gretna, and Hurt should be in the same House district.

The town of Hurt is located on the northern tip of Pittsylvania County within the Hurt precinct. Hurt's communities of interest include Motley, Renan, and Sycamore. These communities are in House District 48, unlike Hurt. Hurt shares many similarities and interests with the rest of Pittsylvania County such as the Staunton River Regional Industrial Facility Authority, which was established to improve the economic base of Hurt by developing the Southern Virginia Multimodal Park in Hurt. No locality in House District 51 has a partnership with this and by adding Hurt in a House District with Campbell County may jeopardize and/or create obstacles to accomplish the final touches to this industrial park.

There is a way to resolve this. I understand that Dr. Grofman and Mr. Trende used a 2.5\% deviation, but as they stated in their memo, the deviation can go as high as 5\% (the Redistricting Commission drew maps that had a 5\% deviation). According to the proposed House district maps developed, House District 48 has a deviation of \(-2.17 \%\) while House District 51 has a deviation of \(-0.61 \%\). By adding the Hurt precinct into House District 48 and not touching any other parts of this district, the deviation becomes \(1.64 \%\). Removing the Hurt precinct from House District 51 and not touching any other parts of this district, the deviation becomes \(-4.42 \%\), outside the \(2.5 \%\) deviation set by the mapmakers, but within the statutory required \(5 \%\) deviation. It is possible to add the Hurt precinct into the House District 48 and out of House District 51 without deviating outside of the required \(5 \%\) deviation. I hope that you will add the Hurt precinct into House District 48 without making any other changes to House

\section*{District 48.}

\section*{Senate District 9}

Please leave Senate District 9 as it is a good Senate district that keeps much of Southside Virginia's localities.

\section*{Fifth Congressional District}

The Fifth Congressional District is not perfect, but it is decent and compact. While there are some things that I personally don't like about how the Fifth District looks (such as how Bedford County was split within this district), time is not on our side and these Congressional Districts need to be approved very soon. Remember that Party Primary filings begin in March. Furthermore, every Congressional District in Virginia must have a population of 784,672, while the Mapmakers used a deviation of \(0.25 \%\). Nevertheless, this is a very low deviation compared to General Assembly Districts.

I would like to direct the Mapmakers to look at the recent historical boundaries of the Fifth Congressional District and you will see that recent history is on your side. For example, in the 1990s, Albemarle County was split between two Congressional Districts. During the 1970s, portions of Chesterfield County were in the Fifth Congressional District. What Dr. Grofman and Mr. Trende drew for the Fifth Congressional District is not out of the ordinary by any means.

The bottom line is that if you make any changes to the Congressional Districts with such low deviation, you will open up to new and more criticism. As such, leave the Fifth Congressional District as is.

\section*{Conclusion}

While I support how Senate District 9 and the Fifth Congressional District are drawn, I hope that you will consider adding the Hurt precinct into House District 48 without making any other changes to this district as this can be done under \(5 \%\) deviation. Thank you very much.

Sincerely,

Will Pace
Mayor of Chatham

\section*{Re: Requested Minor Correction to Boundary of House of Delegates District 96/ House of Delegates District 98 at Elbow Road and Indian River Road}

Dear Ms. Pitney,
Pursuant to Rule 4a of the rules and procedures for implementing the requirements of article II section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions requesting a minor correction to the boundary between House of Delegates District 96 and House of Delegates District 98.

I am a retired lawyer and a 30 year resident of the City of Virginia Beach. I write to request that the Hillcrest Farms neighborhood be included in proposed House of Delegates District 96, not House of Delegates District 98, for three reasons.

First, the proposed district line between draft HD 96 and draft HD 98 runs from the southeast corner of Stumpy Lake along the present alignment of the oddly configured intersection of four roads: Indian River Road (Route 603) headed west, Elbow Road headed south and then southwest, and Elbow Road headed northeast, which immediately again crosses Indian River Road (Route 603), now headed south along the Hillcrest Farms neighborhood. (See maps 1,2, and 3 .)

This is the current version of several realignments of this disjointed intersection, none of which successfully resolved the confusion caused by an odd historical configuration, with multiple repeating/conflicting road names in an extremely small area around the southeast corner of Stumpy Lake.

To solve this problem, the City of Virginia Beach has imminent plans to realign Elbow Road in the immediate area that the Special Masters have tentatively designated as the dividing line between draft HD 96 and draft HD 98. (See map 4). The new alignment of Elbow Road will run directly through the Hillcrest Farms neighborhood, then intersect with Indian River Road (Route 603) to the south of the present alignment of the confusing four road intersection described above. The Hillcrest Farms Homeowners' Association has already conveyed the land to the City, so this road project should start very soon.

Given these imminent changes to the alignment of Elbow Road, it makes sense to include the Hillcrest Farms neighborhood in HD 96 rather than HD 98. The dividing line between the two districts is Elbow Road, which will soon run directly through the Hillcrest Farms neighborhood. Obviously, the entire Hillcrest Farms neighborhood, and arguably the entire Hillcrest precinct (VB precinct number 87) should be included in HD 96 as a key community of interest. This correction will avoid further compounding any confusion in voting locations or House of Delegates representation that these pending road changes in this small but complicated area will otherwise inevitably cause.

Second, the suburban character of the Hillcrest Farms neighborhood further argues for its inclusion in HD 96. Most of draft HD 98 beyond this proposed far northwest corner is quite dissimilar to suburban Hillcrest Farms. Draft HD 98 is centered around the large rural/farmland area of Pungo and the beach area along the Sandbridge strip, culminating in the uninhabited

Back Bay National Wildlife Refuge and False Cape State Park. In contrast, most of draft HD 96 is exclusively suburban in character like the Hillcrest Farms neighborhood and precinct. These compact, contiguous, similar suburban communities of interest should be included together in House of Delegates District 96.

Third, the current incumbent in HD 21 (the forerunner district to draft HD 96) has significant ties to the Filipino community in current HD 21/future draft HD 96 and throughout the City of Virginia Beach. Historically, both Republican and Democratic Delegates in this House of Delegates District have ably represented the local Filipino community, the largest Filipino community in the United States. These capable Filipino-American Delegates have done so in a bipartisan fashion, without any regard to party affiliation. They continue to work in concert to advance this beloved local community. It would be a shame to deprive the large, vibrant, cohesive and important Filipino community of Virginia Beach of its chosen representative, who lives less than a mile from Elbow Road in the Hillcrest Farms neighborhood, because of a simple, easily correctable mapping fluke understandably but incorrectly based on the current, soon-to-be changed alignment of the various intersections now labeled Indian River Road and Elbow Road.

For these reasons, I respectfully request that the Hillcrest neighborhood (and perhaps the entire Hillcrest precinct) be included in House of Delegates District 96.

Thank you very much for your consideration and action on this request.
Respectfully submitted, Susan B. Potter, Esq.

I am writing in support of keeping Williamsburg in HD-69.

It is important for our community that Williamsburg be kept in the same district with the surrounding geographic locations in James City County because we share so many services (schools and school boards, roads and infrastructure, tourism).

Williamsburg should be included in the the newly proposed HD-69. Please reconsider the decision to separate Williamsburg from the surrounding locales in HD-69 as you continue the redistricting efforts.

Thank you.

Hello,
My comment: I have a great deal of concern regarding the proposed 69th and the 71 st districts, specifically with respect to the City of Williamsburg.

I work in a profession that involves a lot of connecting individuals to various social services in the area. I know first-hand that residents and workers in Lower James City County and Williamsburg rely on many of the same services in the greater Williamsburg area, such as transportation, healthcare, education, and social services.

Of greatest concern to me is that, under the proposed map, Williamsburg would be in a district (the 71st) that runs all the way to Providence Forge. Williamsburg is and has always been a part of Hampton Roads. Please don't put Williamsburg in a district that runs all the way into the Richmond area. Williamsburg is a part of Hampton Roads in every way - in services, in sharing of residents and workforce, in infrastructure, and in identity. Please keep Williamsburg with other Hampton Roads communities.

Kind regards, Stacy Kern-Scheerer
Resident of Hampton Roads (City of Williamsburg)

To the Honorable Members of the Virginia State Supreme Court. I submit the following items to be considered about the proposed redistricting of the 69th and 71st districts. I am opposed to the new changes being proposed for the following reasons:
1. Williamsburg has been separated from lower James City County, including Grove. The history of African Americans in the Historic Triangle links the City and Grove. For that reason, they should not be separated.
2. Lower James City County and Williamsburg rely on many of the same services in the Williamsburg area, such as transportation, healthcare, and social services.
3. The 69th takes a head-scratching jog across the York River and picks up a small portion of Gloucester. This is a very different community and should be part of a district that is on the other side of the York River with the rest of Gloucester County.
4. The new maps put Williamsburg in the 71st District, which runs all the way to Providence Forge. Williamsburg has always been part of Hampton Roads. This puts Williamsburg with other communities that extend up into the Richmond area instead of keeping it with other Hampton Roads communities where the majority of us live, work and play.

Respectfully submitted,
Patricia Condle Boyd

I've been a very happy constituent of Patrick Hope, who I will lose if the map goes forward as drawn. That said, I think the map does nicely for Arlington, the districts make sense and the new District 2 should provide a good representation for Ariington's many apartment dwellers. On the Senate, it makes FAR more sense for Barbara Favola (or whoever is elected) to represent Arlington, rather than the district stretching out to Loudoun which has existed. So, count me a supporter. Dave Schutz 900 North Ivy Street Arlington VA 22201

Richmond, VA 23219

\section*{Sent via electronic mail to redistricting@vacourts.gov}

Dear Ms. Pitney,
After recent written and public testimony before the Court regarding the pending redistricting map submitted by the two Special Masters, I felt compelled to make a comment about the \(3^{\text {rd }}\) congressional district.

Several comments have suggested that the \(3^{\text {rd }}\) congressional district should, at a minimum, maintain its current Black Voting Age Population (BVAP) of 47 percent in order to comply with the federal Voting Rights Act. Some have even argued that further unpacking the \(3^{\text {rd }}\) district would dilute minority voting strength. I am troubled that some of my fellow Virginians misunderstand the Voting Rights Act, the importance of maximizing minority voter influence, and the appropriate methods and remedies to achieve this goal. If the Special Masters' map is in violation of the Voting Rights Act, it is only because the draft continues to overpack minority voters in the \(3^{\text {rd }}\) congressional district.

While I am concerned that the Special Masters unnecessarily drew incumbents into the same district, I commend them for their efforts to continue to unpack Virginia's \(3^{\text {rd }}\) congressional district by lowering the district's BVAP from 47.2 percent to 44.5 percent. However, even a BVAP of 44.5 percent still makes the \(3^{\text {rd }}\) congressional district unnecessarily overpacked thus diluting minority voting strength in the adjacent congressional districts in violation of the Voting Rights Act.

The \(3^{\text {rd }}\) congressional district can still be an effective minority district with a lower BVAP. In establishing this number, the Court should consider the voting coalitions that minority communities can form in order to elect the candidate of their choice. For some communities, this may require a higher BVAP but for others a lower BVAP can be sufficient and strengthen minority voting influence in additional districts.

I strongly encourage the Court to adjust the Special Masters' map to further unpack the \(3^{\text {rd }}\) congressional district. The Commonwealth is an incredibly diverse state, and it is critical that legislative and congressional district lines reflect this diversity to ensure that minority communities have the strongest voice possible in who they send to Richmond and Washington.

Very truly yours,

ROBERT C. "BOBBY" SCOTT
Member of Congress

I'm writing to put in a good word for the map proposed by former Congressman Tom Davis. I thought that the districts looked very compact, with none of the weird tendrils that gerrymandered districts often have. Even the districts in Northern Virginia had solid geometric shapes, which we rarely see in that region. I would like to see something very similar to the Davis map be adopted by the Court.

Thanks,

Jeff Bolander
540 421-9275
Rockingham County, VA

Dear Chief Justice Lemons, Justices and Special Masters
My name is Pete Costigan and I live in Ruckersville in Greene County.
I'd like to commend and congratulate the Chief Justice and other Justices for appointing Prof Grofman and Mr. Trende as Special Masters and the Special Masters themselves for their thorough and transparent work on Virginia's proposed Congressional, State Senate and House of Delegates maps. Although, as many have observed already, no set of maps could ever satisfy all interested parties, I suspect most Virginians agree that these proposed maps are a significant improvement over the current maps.

That said, l'd like to propose the following changes regarding the Special Masters' proposed maps for HOD and State Senate. First, in the HOD map, I propose that Greene Country be taken out of district 62 and be made part of district 55 . Second, in the State Senate map, I propose that Greene County be taken out of district 28 be made part of district 11. Albemarle County, which borders Greene County to its south, is part of both proposed HOD district 55 and State Senate district 11.

As the Special Masters state in their comprehensive memo accompanying their proposed maps, " we followed the Court's command and prioritized federal constitutional and statutory requirements, as well as those in the Virginia Constitution." As the memo also clearly states, recognizing Communities of Interest is one of those statutory requirements. I believe the community of interest Greene County forms with Albemarle County is well established for the following reasons.

First, Greene County residents regularly drive to Albemarle for shopping and medical care. In addition, many Greene residents drive to Albemarle every day to their jobs at the National Ground Intelligence Center in northern Albemarle, to State Farm and to various UVa facilities in Albemarle among other employers. In fact, a significant percentage of Greene County's employed residents work in Albemarle. In contrast, relatively few drive the 30-35 miles north to shop or work in Madison, Culpeper or Orange Counties which are in proposed HOD district 62 and State Senate district 28.

Second, Greene is a small county with about \(55 \%\) of its 20,500 residents living mostly south of the intersection of east-west route 33 and north-south route 29, two major state highways. Since the Greene/Albemarle border in less than four miles south of this intersection, Route 29 provides easy access for Greene County residents shopping and working in Albemarle.

Third, Greene County, along with Albemarle, is among the counties served by the Thomas Jefferson Planning Commission (Planning District 10.) Through the

Commission's Legislative Services program, the interests of the counties are represented before the legislature and other state policymakers. Much of this effort occurs in the General Assembly during the January-March session each year. Amherst County, which is currently part of proposed State Senate district 11, is not served by the Thomas Jefferson Planning Commission. Amherst County is in Planning District 11 along with Campbell, Bedford and Appomattox Counties and the city of Lynchburg.

For these reasons, I believe Greene and Albemarle Counties should be in the same HOD and State Senate districts.

I recognize that in shaping the districts, the Special Masters adhered closely to another statutory requirement: equal representation based, as practicably as possible, on equal population. Therefore, if the Court were to implement my proposals for the HOD and State Senate districts in question, the Special Masters would be required to make other adjustments to the affected districts to maintain that equal representation. I suggest the following for their consideration.
1. If Greene County's 20,500 residents were removed from HOD district 62 and placed in HOD district 55 as I propose, district 62's remaining population could be equalized by adding all or some of the residents of Orange County that are not currently included in district 62. This change would also address the preferences of others who posted on the interactive maps and spoke at the hearings. Their preferences were to keep all or most of Orange, Madison, and Culpeper Counties in the same HOD district.
2. If Greene County's 20,500 residents were added to HOD district 55 as I propose, the Louisa County residents currently included in district 55 could be reunited with those Louisa County residents currently included in district 59. At least one comment on the interactive map from a Louisa County resident opined that Nelson County residents have more in common with Albemarle than Louisa County residents and at least one Nelson County resident agreed.
3. If Greene County's 20,500 residents were removed from State Senate district 28 and placed in State Senate district 11 as I propose, district 28's remaining population could be equalized by adding those residents, currently in State Senate district 27, who live along Route 3 in western Spotsylvania County. Several district 27 residents, reacting to the interactive map, seemed to support this change.
4. If Greene County's 20,500 residents were added to State Senate district 11 as I propose, all or some of the residents of Amherst County could be removed. As I mention above, Amherst County is in planning district 11 while both Albemarle and Greene Counties are in the Thomas Jefferson Planning district (district 10).

Thank you for considering my proposals and for the difficult but important work you are doing.

To the Virginia Supreme Court:
One of the things the Virginia voted for when passing the recent amendment was to reduce or end gerrymandering as much as possible and ensure that districts are reasonable regarding such issues as the likelihood of voters to have access to media that would keep them informed about issues and candidates in their area so as to make them more informed voters. A gerrymandered Senate district that would include the Town of Vinton in a district extends as far north as Staunton would put the citizens of Vinton at a huge disadvantage both geographically and informationally. Vinton does and will get its news from Roanoke. I do not think Vinton can logically be included in a district stretching to Staunton. That would defeat the purpose of the amendment.
For these same reasons it would not be reasonable to include Roanoke County with Radford. Please keep the Roanoke Valley intact as much as possible. It will lead to better representation, better informed voters and, therefore, better government. That, I believe, is what the voters were hoping for when they passed the recent amendment.
Thank you,
Gene Rose

Re: 69 \& 71
Williamsburg and James City County, along with Hampton Roads share common socio-economic interests and would be best served in the same district.
It would be difficult for a representative to address the needs of his constituents if those interests are so varied to make a compromise impossible.
Extending geographic boundaries to include multiple urban, suburban, and rural areas does not lend itself to a community of interest.

Please keep Salem in the 9th district. For that matter, compacting the districts in general would be better. The proposed 6th district takes over three hours to traverse and covers more than half the length of the state. My local representative should be well, local - not splitting attention between Salem and the exurbs of Washington.

- Please redraw these districts and include the entirety of the BATTLEFIELD District of Spotsylvania county with DISTRICT 27 and Fredericksburg. Our interests as a growing and competitive suburb are more aligned with the City of Fredericksburg. Battlefield, Fredericksburg and District 27 share similar socio political and economic interests, diversity and growth patterns and community relations than those communities in the rural areas. Districts aligned with similar interests is more beneficial and advantageous than focusing on serving the needs of rural Virginians. Redrawing these lines would be a gross mistake and disservice to Battlefield District citizens.
- Redrawing district lines would significantly impact and cripple legislative representation and more importantly funding for infrastructure growth, public school needs and local government sponsored goods and services.

Sent from my iPhone

Members
Virginia Supreme Court

Dear Justices of the Supreme Court,

I have just finished up my \(18^{\text {th }}\) year in the current \(43^{\text {rd }}\) House of Delegates district. I commend the Special Masters for creating a new House of Delegates map that comes with many surprises but is a very good start. The citizenry will be better served with more competitive districts. Politicians should not draw their own districts.

On the other hand, if the Commonwealth were to have drastic changes dropped on it every ten years like this, I am convinced it would lead to poorer, less effective governance. There are good reasons to take a cautious approach, building off, or from, what came before, when possible, consistent with competition, and obviously consistent with the Voting Rights Act. Legislatures are run largely by seniority for many reasons-importantly, one needs to learn the job and the people to be effective. Further, if we have maps like this again in ten years, Virginia members of the 435 -member U.S. House of Representatives will be much less likely to chair an important committee considering the extreme gerrymandering (leading to stability) underway across the USA.

With this type of change every ten years, our part-time citizen Virginia House would likely be less functional or efficient given our crazy eight-week and six-week dashes-a freshman runs for re-election with 14 weeks of legislative experience under her/his belt. The 'permanent government' would enjoy more power as new member education would be constant, e.g, what is the COPN fight all about? Obscure but highly debated policies are rarely known to new Members and must be learned upon taking and serving in office.

With these concerns in mind, I urge you to adopt minor and easy changes to the Virginia House plan that do not change the balance and competitiveness sought by the Special Masters. The changes I recommend below for proposed districts 16 and 17 are not as existential to the communities as others are that I hope you will make around the Commonwealth. But the changes will not impact the performance of proposed districts 16 and 17, and I offer them as a clear and simple improvements to the two draft districts.

\section*{REQUEST}

As referenced, my request today for the proposed \(17^{\text {th }}\) district (the heart of the current \(43^{\text {rd }}\) ) is less urgent but is nonetheless fully justified. Please reconsider the unnecessary shifting of precincts between current \(44^{\text {th }}\) district ( 16 in proposed map) and district 43 (17 in proposed map). The proposed map splits high school attendance areas and splits the Greater Wilton Woods Citizens Association (by taking Clermont (423) and Mt. Eagle (408)) out of the proposed \(\left.17^{\text {th }}\right)\). Switching these precincts BACK to existing lines does not change the electoral performance of either the proposed 16th or 17th.

In our suburban communities, sometimes the only sense of community comes from the school pyramids. The Edison High School pyramid is in the current \(43{ }^{\text {rd. }}\). Unfortunately, five Edison HS precincts (Grosvenor (621 not in current 43), Huntington ( 607 where I live), Cameron (402), Mt Eagle (408), Clermont (423) were placed in the new \(16^{\text {th }}\) ( \(44^{\text {th }}\) ) district). Concurrently, none of the Edison HS attendance area is currently in the \(\mathbf{4 4} \mathbf{4}^{\text {th }}\left(\mathbf{1 6}^{\text {th }}\right)\) District. In leveling population lost to the \(17^{\text {th }}\left(43^{\text {rd }}\right)\), the Special Masters placed three Mt Vernon HS precincts of similar overall population in the \(17^{\text {th }}\) (Fairfield (413), Pinewood (428) and Woodlawn (627)). There was previously no Mt Vernon HS attendance area in the \(\mathbf{4 3}^{\text {rd }}\). Furthermore, making this switch as requested allows the map makers to use Route 1 (Richmond Highway) as an obvious dividing line at I-95, then South Kings Highway, rather than using Fairfax County precinct lines in Clermont and Mt. Eagle that run right through the community on residential streets (Florence Lane and Clermont Rd). Note: for communities-of-interest purposes, a precinct line does not divide a community unless it is used to divide an electoral district, as done in this proposal. Florence Lane and Clermont Road are main streets in their communities with the same style housing on both sides of the street.

In summary, the population of the five "new" district 16 precincts and the three "new" district 17 precincts is comparable. . Please reconsider the unnecessary precinct shifting between current district 44 (16 in proposed map) and district 43 (17 in proposed map). There is no public policy reason to split these two high school attendance areas and the Wilton Woods Community. I am grateful for your attention to this matter of importance to these communities. Thank you very much for your consideration.

Mark D. Sickles
Member, District 43
Virginia House of Delegates

To whom it may concern,
I have lived in both the Roanoke Valley and New River valley and while both areas share a wide range of political ideas, there is vast difference of values that separates liberals in Roanoke and Blacksburg that support baby infanticide from the conservatives in the surrounding counties of Floyd, Pulaski, Montgomery etc.. You know the ones that like to read their bibles, go to church and raise their families...These differences are a good thing because when folks share values with whom they live closer to they are strengthened. This is a natural way of settling differences that our state allows, so consider keeping these districts compact or risk a tangling of opinions that aren't true to their localities.

Also, keeping them compact paints clear picture of the values of Southwest Virginians.
Thank you for your diligence,
Will Holladay

Communities should stay together and be compact along the lines of redistricting. Example: The town of Vinton is in Roanoke County but will be separated from it in the proposed redistricting. Please keep our communities together.

Thank you for your time and consideration of this most important matter.

I would like to make the following comments about the aforementioned map.
1. Williamsburg has been separated from lower James City County, including Grove. The history of African Americans in the Historic Triangle links the City and Grove, and so they should not be separated.
2.The 69th makes a bizarre move across the York River and picks up a small portion of Gloucester. This is a very different community and should be part of a district that is on the other side of the York River with the rest of Gloucester County.
3. The new maps put Williamsburg in the 71st District, which runs all the way to Providence Forge. Williamsburg has always been part of Hampton Roads. This puts Williamsburg with other communities that extend up into the Richmond area instead of keeping it with other Hampton Roads communities. Bizarre again to

My comments are below and attached.
December 19,2021

Muriel-Theresa Pitney
Clerk of Court
Supreme Court of Virginia
100 North Ninth Street, 5th Floor
Richmond, Virginia 23219-1315
Dear Madam Clerk:
My name is Shaun Brown, I am a lifelong resident, born and raised in Virginia, attending Brown University, The London School of Economics and St.Hilda's College, Oxford University. I urge this Court to reject the voting maps submitted by the Special Masters because they sharply limit the number of majority-Black Senate and House Districts throughout Virginia.

My first experience with speaking out and fighting the lawsuits and backroom negotiations to dilute the vote of Black Virginians started when I graduated and returned home from Brown University in 1980 soon becoming one of the youngest members of the Democratic Party's Central Committee representing Newport News. On the Peninsula, the City of Newport News, led the way for single member districts at the local level. That set the tone for a single member district fight for House of Delegate seats that would insure not just Black representation but Black representation that reflected the neighborhood, socio-economic and class issues of the community. More than just securing a Black face, the neighborhood and community consensus, was to insure a Black face that was tied to the community. At that time there were several vibrant civic and community organizations throughout the City of Newport News, not just in the Black community. This issue
of the type of Black representation was a problem for the House of Delegate, State Senator, now Congressman Bobby Scott who fought against us in favor of multimember House of Delegate Districts. The thinking was that there was a need for a Black representative that could better serve the Black communities' interest by using leverage by negotiating an agenda, and placing the needs of all, over the specific needs and issues of the Black community. Congressman Scott intervened and derailed an agreed-upon plan for the drawing of City Council districts in Newport News, under the Department of Justice purview at that time. The City of Newport News was one of the last cities in the United States to integrate its school system.

The local NAACP, former Councilwoman and Mayor, Virginia Democratic Party's Vice Chair Jessie Rattley's public hearing consensus and the Newport News Republican Party all agreed on six single member districts in Newport News with the mayor elected at large. At the time, the mayor was selected by the council. The intervention resulted in three districts (south, central and north) with 2 members each with the mayor elected at large in Newport News which has not always served the Black communities' interest, as anticipated in the 1980s. Congressman Bobby Scott, former Councilmember Charles Allen (now deceased), and local civil rights Attorney Oscar Blayton, we were told, met with the Justice Department officials who were waiting for the public hearing and community meeting outcome. They derailed the agreed on single member district plan.

Today's maps remind us of that same fight from the 1980s, in Newport News and around Hampton's school board seats district lines. Asking the Black community to once again place our issues behind and aside,
reminds me of when I was told early on that the Virginia Democratic Party would concentrate on the needs of the middle-class White Virginians. It was the impact of the then Democratic Leadership Council that
was not in the Democratic Party, but an unofficial effort formed outside of the Party to move the Party to the center. Much of that strategy in moving the Party to the center to break the Republican stronghold
then as it is now undermines the needs of Black Virginians and other protected groups.

During the 1980s until now, I have served as a member, executive committee member, founder or President of many organizations including Newport News' Neighborhood Council 24-34A Inc, (civic organization); Hampton's Coalition for Justice, (statewide civil rights); YWCA of the Virginia Peninsula, board member under 30 and in the 2000s; Candidate for Democratic Nomination, 2nd Congressional District, Virginia 2018, (Certified as a Independent-Ballot Controversy); Democratic Nominee, \(2^{\text {nd }}\) Congressional District, Virginia (2016); Progressive Democrats of America 2016; 2016 Bernie Sanders for President National Delegate the Democratic National Convention; Rev. Al Sharpton's National Action Network, Virginia Representative ; Founding Board Member of The Newport News Community Free

Clinic; Save Our Southeast; Restore Inner City Peace (cease fire); as well as continuing to work with numerous candidates for local, state, and national office, including my own runs for city council, the Virginia House of Delegates, \(95^{\text {th }}\) District and Congress. I have been on the frontline fighting child hunger, gentrification, police shootings, coal dust environmental racism, police brutality, mass incarceration and fighting for voting rights, small businesses, entrepreneurs, inner city and rural economic development, real local police accountability commissions for each city or county, industrial development, removal of Confederate monuments, jobs, prison reform and affordable housing. These are all issues along with kitchen table issues that can be directly impacted by like minded neighborhood and community focused elected representatives in Virginia at all levels of public office. This is not a new fight. It is an important fight for the very essence proclaimed by the Emancipation Proclamation that took until the 1960s to reach much of Hampton Roads.

Section 2 of the Voting Rights Act prevents "a denial or abridgement of the right of any citizen of the United States to vote on account of race or color." 52 U.S.C. § 10301(a). Such a "denial or abridgment" occurs if "the political processes leading to nomination or election in the State or political subdivision are not equally open to participation" by members of a protected class "in that its members have less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice." Id. § 10301(b).

If approved, the Special Master's maps will reduce the number of Senate Districts to two, and the number of House Districts to five. Reducing majority-African American voting districts by more than half harms Virginia's Black Americans. But again, members of the Court, this is not a new story for Black Virginians.

Yes, I have highlighted the City of Newport News. But again, let us now forget the Emancipation Proclamation some 158 years ago and the harm of not freeing all Black Virginians in now West Virginia, including Berkley, Accomac, Northampton, Elizabeth City, York, Princess Ann, and Norfolk, including the cities of Norfolk and Portsmouth in 1863.

Transcript of the Proclamation

January 1, 1863

A Transcription

By the President of the United States of America:
A Proclamation.

Whereas, on the twenty-second day of September, in the year of our Lord one thousand eight hundred and sixty-two, a proclamation was issued by the President of the United States, containing, among other things, the following, to wit:
"That on the first day of January, in the year of our Lord one thousand eight hundred and sixtythree, all persons held as slaves within any State or designated part of a State, the people whereof shall then be in rebellion against the United States, shall be then, thenceforward, and forever free; and the Executive Government of the United States, including the military and naval authority thereof, will recognize and maintain the freedom of such persons, and will do no act or acts to repress such persons, or any of them, in any efforts they may make for their actual freedom.
"That the Executive will, on the first day of January aforesaid, by proclamation, designate the States and parts of States, if any, in which the people thereof, respectively, shall then be in rebellion against the United States; and the fact that any State, or the people thereof, shall on that day be, in good faith, represented in the Congress of the United States by members chosen thereto at elections wherein a majority of the qualified voters of such State shall have participated, shall, in the absence of strong countervailing testimony, be deemed conclusive evidence that such State, and the people thereof, are not then in rebellion against the United States."

Now, therefore I, Abraham Lincoln, President of the United States, by virtue of the power in me vested as Commander-in-Chief, of the Army and Navy of the United States in time of actual armed rebellion against the authority and government of the United States, and as a fit and necessary war measure for suppressing said rebellion, do, on this first day of January, in the year of our Lord one thousand eight hundred and sixty-three, and in accordance with my purpose so to do publicly proclaimed for the full period of one hundred days, from the day first above mentioned, order and designate as the States and parts of States wherein the people thereof respectively, are this day in rebellion against the United States, the following, to wit:

Arkansas, Texas, Louisiana, (except the Parishes of St. Bernard, Plaquemines, Jefferson, St. John, St. Charles, St. James Ascension, Assumption, Terrebonne, Lafourche, St. Mary, St. Martin, and Orleans, including the City of New Orleans) Mississippi, Alabama, Florida, Georgia, South Carolina, North Carolina, and Virginia, (except the forty-eight counties designated as West Virginia, and also the counties of Berkley, Accomac, Northampton, Elizabeth City, York, Princess Ann, and Norfolk, including the cities of Norfolk and Portsmouth[)], and which excepted parts, are for the present, left precisely as if this proclamation were not issued.

And by virtue of the power, and for the purpose aforesaid, I do order and declare that all persons held as slaves within said designated States, and parts of States, are, and henceforward shall be free; and that the Executive government of the United States, including the military and naval
authorities thereof, will recognize and maintain the freedom of said persons.
And I hereby enjoin upon the people so declared to be free to abstain from all violence, unless in necessary self-defence; and I recommend to them that, in all cases when allowed, they labor faithfully for reasonable wages.

And I further declare and make known, that such persons of suitable condition, will be received into the armed service of the United States to garrison forts, positions, stations, and other places, and to man vessels of all sorts in said service.

And upon this act, sincerely believed to be an act of justice, warranted by the Constitution, upon military necessity, I invoke the considerate judgment of mankind, and the gracious favor of Almighty God.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.

Done at the City of Washington, this first day of January, in the year of our Lord one thousand eight hundred and sixty three, and of the Independence of the United States of America the eighty-seventh.

By the President: ABRAHAM LINCOLN
WILLIAM H. SEWARD, Secretary of State National Archives
I ask that you reject these maps in the name of a just life that can only be defined for me by Bible law, because of a liberation theology that was ingrained in me early at age nine when I recall playing hopscotch on my grandmother's sidewalk on 31st Street in Newport News, Virginia. I ran in the house for a cool glass of water passing the television reporting that Dr. Martin Luther King had been killed. I looked up at my grandmother more than once who was seasoning the chicken to fry in the brown paper bag and making hot rolls. Seemingly not phased, the First Gravel Hill Baptist Church Deaconess, Caroline Melinda Rowlett Hill, simply said to me "remember he said that he may not make it there with us". My grandmother had boarded the bus in Newport News, Virginia to attend the "March on Washington in 1963". She had heard Dr. King's " I Have a Dream Speech." As a kid that day in April 1968, I became a part of the "us" in the movement and understood that others had to carry on the fight. We are our brother's keeper and we must possess a righteous anger when people are not treated fairly. This practical wisdom involves what I call a "perpetual sensitivity" to what a situation requires even when it is important to speak to the unequal use of government policies.

Is the promise of a promised land the same for all people? And who are the people? Your decisions in accepting or rejecting these maps will determine who the people are. Do we not have a right to be represented by people who are among us. It is beyond a civil right, it is a human right.

My Virginia Powhatan Confederacy family sought refugee in Black Virginia houses of worship so as not to perish, as a result of the creation of the British Proclamation and line of demarcation in the Western part of the State of Virginia in 1763. That too was a line drawn to "choose the people", a line that was drawn to keep the colonists east and Native Americans west. This Royal Proclamation of 1763 was very unpopular and angered the colonists. They felt the British wanted to keep an eye on them. By 1840, tens of thousands of Native Americans had been driven off of their land in the southeastern states and forced to go West in the Trail of Tears including my ancestors.

Finally, I ask that this Court recognize the relevance of ancient biblical laws, the foundation of our legal system, dating back to the "chosen people" in the Old Testament and the promise of a promise land in the covenant theology of the Book of Genesis and the Book of Deuteronomy. You will determine the "chosen people" and control the promise of the promise land for Black Virginians in your decision here in the State of Virginia, the home of the first representative government in British North America in what came to be known as the "new world".

My hope is that you follow the 563 Commandment. Judge righteously. (Leviticus 19:15).

Miss Shaun Brown

On December 11, I submitted comments and a congressional district map which built on the work of the special masters. Today I would like to submit a second CD map (12-19) which takes a slightly different approach. It is my hope that one or both of these maps can be helpful to the court and the special masters.

Both maps use the District Builder app and have good compactness scores. They were drawn to better create Communities of Interest (COI)s while preserving "majority minority" districts. They keep the Richmond area in two rather than three districts and keep Charlottesville and all of Albermarle together in District 5. The 12-19 map also keeps Roanoke, Roanoke Co and Salem together in District 9. A significant feature of the 12-19 map is that it keeps all 11 incumbent representatives in their home districts with a majority of their old voters. While this should never be a major goal of redistricting, I view it as a good thing when voters have the chance to vote for or against their current representatives-as long as redistricting is done adhering to legal requirements and without sacrificing other goals such as preserving COIs.

Following is a link to my 12-19-21 map:

To whom it may concern,
I write in opposition to separating the Grove area of James City County from the City of Williamsburg. Lower JCC and the City have a long history dating back to the foundation of Middle Plantation (Williamsburg's earliest name).

The 69th includes a portion of Gloucester County, which should not be separated from the rest of the county. There are no commonality between the western side of the York River and the eastern side.

The 71st puts the City of Williamsburg in the same district of Providence Forge and extremely rural area running up Route 5 towards Richmond. Again, the City has no commonality with this region.

The Commonwealth has 95 counties and 38 independent cities. There are 100 delegates. Why is it so hard to merge the cities with a nearby county into 100 districts? These folks already are sharing services and governance.

Thank you for the opportunity to comment.
Sincerely yours,
Linda L. Cole

To whom it may concern:
I am writing in opposition of including the City of Poquoson into District 24 instead of District 23. Poquoson has more in common with Hampton than with James City County and the City of Williamsburg. Many people living in Poquoson work at the NASA facility in Hampton. The citizens of Poquoson shop mostly along Victory Blvd not Merchants Square. Poquoson and Hampton both have issues with recurring flooding. Please include Poquoson in Senate District 23.

Also, there are 95 counties and 38 independent cities in the Commonwealth. There are 40 Senate Districts. Why can't 3-4 counties and cities be combined in one district were there is commonality among the citizenry?

Thank you for the opportunity to comment.
Sincerely yours,
Linda L. Cole

The Honorable Muriel-Theresa Pitney, Clerk
Supreme Court of Virginia
P.O. Box 1315

100 N. Ninth Street
Richmond, VA 23219-1315

\section*{Re: Proposed Second Congressional District Map}

Dear Ms. Pitney:
I have been a strong proponent of nonpartisan redistricting to counter the negative effects of partisan gerrymandering and to bring rationality to the drawing of political maps. That said, the rationality of the proposed Second Congressional District Map is lacking. It violates both the Compactness/Contiguity and the Community of Interest Principles.

I see no reason to include the mainly landlocked and rural southside jurisdictions of Southampton County, City of Franklin, Isle of Wight, or City of Suffolk. Adding these jurisdictions to the Second Congressional District creates a district that is neither compact nor contiguous. For example, the distance from Captains Cove, Virginia 23356 on the Eastern Shore, to Great Bridge in Chesapeake, VA, to Suffolk, to Franklin, to Ivor and to Rushmere, Virginia 23430 is more than 200 miles and would take more than 4 hours of driving time. The \(J\)-shape of the proposed district resembles a gerrymandered map. The unrelated, non-contiguous rural areas have little in common with the core, interdependent of Norfolk and Virginia Beach.

Norfolk and Virginia Beach are interdependent communities of interest in terms of geography, their economies, military bases and threats from climate change. The water is the prime geographic feature of these two communities of interest - the Atlantic Ocean, the Chesapeake Bay and rivers such as the Elizabeth, Little Creek, Lynnhaven, Lafayette and many inland waterways. All of these waterways link the area and their thriving military, industrial, and tourism uses in both of these adjoining cities. Military bases include huge U.S. Navy installations - Naval Station Norfolk, Joint Expeditionary Base and Naval Air Station Oceana; the Air National Guard at Camp Pendleton; Fort Story Army/Navy joint base; and the Dam Neck Naval Base. The military bases in Norfolk and Virginia Beach bring a large population of active-duty military members and veterans and their families who live in
both cities. In addition, many private companies support active military, veterans, and their families. For example, the private shipbuilding/repair companies along the Norfolk waterfront of the Elizabeth River serve both military and private customers. Furthermore, tourism attracted to Waterside/Town Point Park, the zoo, the Chesapeake Bay and at the Virginia Beach Oceanfront and other beaches, supports restaurants, hotels, retail and entertainment venues. If there is any question about the interdependency of Norfolk and Virginia Beach, simply attempt to navigate the morning and evening rush hours between the two cities. Norfolk and Virginia Beach as interdependent communities of interest should share and anchor the Second Congressional District.

In addition, sea-level rise caused by global warming is affecting the entire region with special urgency for both military installations and residential neighborhoods in Norfolk and Virginia Beach. These cities, along with the Eastern Shore, need to be represented with a single voice in Congress.

In contrast, the largely landlocked and unrelated non-contiguous rural areas of Franklin, Southampton, Isle of Wight and Suffolk do not belong in the Second District. Their inclusion in the crooked J-map is not geographically, commercially or socially necessary. The proposed map is regressive and would do little to advance Congressional representation for the citizens of the current Second Congressional District.

Thank you for your consideration.

Respectfully yours,
William Banis

TO: Virginia Supreme Court
RE: Move Blacksburg, VA to Senate District 4
Redistricting occurs only once every ten years, so the results of how communities are assigned for political representation impact citizens' lives for a long time. Thank you for all your hard work on this redistricting effort. I appreciate how difficult this task has been, but difficulty does not obviate the need to make the best decisions possible for Virginia citizens.

I live in Montgomery County just outside Blacksburg, VA. From past experiences with redistricting, I know how it feels to be gerrymandered into a district where my political needs are not met. It disenfranchises a person to be placed with communities that are dissimilar as for as legitimate and tangible needs. I am humbly asking for maps to be drawn so that I will have a state senator who will represent the needs of real people who live and work in communities that have similar interests.

I am respectfully requesting that you move the town of Blacksburg into District 4 which reflects the strong community of interest by Roanoke/Salem and Blacksburg. Doing so will allow population equality among the district as well as increasing compactness.

Blacksburg and Roanoke/Salem form a community of interest in several important ways, specifically medical, educational, and transportation. Virginia Tech is the driver of education and research in what would otherwise be the small town of Blacksburg, and in many ways, this makes Blacksburg similar to the much larger cities of Roanoke/Salem. VT has campuses in both Roanoke and Blacksburg, in effect turning the region into a large metropolitan area. Virginia Tech's Fralin Biomedical Research Institute is part of the Carilion partnership and is located at Roanoke's medical facilities. Already in place in the I-81 corridor is the Smart Way Express, a bus service for students and faculty. Also, the airport in Roanoke has Blacksburg in the name, identifying it as a transportation hub for the aforementioned BlacksburgRoanoke/Salem metropolitan area. Soon, there will also be train service between the New River Valley and the Roanoke Valley.

For all these reasons, it is clear that Blacksburg and Roanoke/Salem are a community of interest. In the future, they will be even more closely aligned. Therefore, their political representation should match the interests of the citizens who live here.

Respectfully,
Dianna Richardson

\section*{To: Virginia Supreme Court}

Re: House of Delegates District 41
Redistricting occurs only once every ten years, so the results of how communities are assigned for political representation impact citizens' lives for a long time. Thank you for all your hard work on this redistricting effort. I appreciate how difficult this task has been, but difficulty does not obviate the need to make the best decisions possible for Virginia citizens.

I live in Montgomery County just outside Blacksburg, VA. Please allow me a few sentences about my past bad experiences with district planning. I know how it feels to be gerrymandered into a district where my political needs are not met. Even though I am less than a quarter mile from the Blacksburg town line heading toward Giles County, my community was lopped from the surrounding area and placed in a district with Salem, VA with which I have few or no common interests. One of my HOD representatives even told me that my Blacksburg community issues were of little importance to him because he mainly represented Salem and Roanoke County. I have included this background information because I am afraid I will be in danger of something similar happening for the next ten years if the maps are adopted as presented.

The two towns of Christiansburg and Blacksburg and the city of Radford are the heart of the New River Valley. If you lived here, you would realize that they form a community of interest. Blacksburg and Christiansburg are growing together along U.S. Route 460, and in a few years, the entire eight-mile stretch from Blacksburg to Christiansburg will be one massive community. More and more housing is being built all the time and the shopping area currently extends along the entire 460 route. There are three institutions of higher education, namely Virginia Tech, Radford University, and New River Community College-Christiansburg campus located in the three population centers. There is much cooperation and sharing of programs among these institutions, and their educational objectives, challenges, and needs are very much in sync. These educational institutions truly are communities of interest for the students attending, and those students' interests do not need to be divided. In the same vein, these three institutions are employment centers, and the Virginia Tech Corporate Research Center additionally hires people who live in Radford and Christiansburg as well as Blacksburg. In terms of transportation, these three communities are tied together by bus services currently, but soon, will also be served by Amtrak that will
have a station halfway between Blacksburg and Christiansburg and a short distance from Radford.

It makes no sense to separate Blacksburg from Christiansburg and Radford, putting it into a very rural district with Craig County and a large part of Roanoke County. The aspirations and needs of these rural areas are not congruent with Blacksburg. I respectfully request that you reassess your map drawing for District 41.

Thank you,
Dianna Richardson

Congressional- Thank you for not lumping any portion of Chesapeake, which is firmly part of Hampton Roads, in with Richmond. The current split in Chesapeake between the 2nd and 3rd makes sense however, it would be better if you could move the Greenbrier Middle, Cypress, and Westover precincts into the second. This would unite the Greenbrier section of Chesapeake and eliminate the current neighborhood splits between the 2nd and 3rd.

State Senate- Swap the Parkways precinct and the Deep Creek precinct between SD 18 and SD 19. This would eliminate split neighborhoods while helping to better preserve communities of interest. The Chesapeake portion of SD 18 should be split with the Eastern portion being in a district with Norfolk rather than Portsmouth.

State House- Both the South Norfolk and Indian River communities in Northeast Chesapeake are unnecessarily split between HD 91 and HD 92. South Norfolk and Indian River should both be kept whole in a Delegate District.

Thank you,

Dear Ladies and Gentlemen,.
We don't need long, nonsensical districts to achieve some racial, ethnic, religious, age, height, or weight constituent "balance". Districts should be tightly compact. We choose to live in an area because we like the area and generally posses the same values and interests.

While Roanoke and Blacksburg (where I was fortunate enough to attend college) may be geographically close, the interests of a now liberal college town and clear-thinking Roanokers are dissimilar. We don't need any district modeled after one extending from Richmond to the Chesapeake Bay area.

Please stop the nonsense. Thanks.

Dear Virginia Court Representative,
My name is Catherine Fletcher and I am a voter from Norfolk. I am writing regarding the redistricting maps drawn by the Special Masters and presented on Dec. 8.

First let me say that, as a citizen, I have been pleased by the greater transparency in the redistricting process offered by the commission than in the previous method where the maps were drawn by the General Assembly. I thank the commission for their efforts.

Regarding the maps drawn by the court-appointed Special Masters, I realize these maps have come about due to deadlock in the commission. I respect the expertise of Dr. Grofman and Mr. Trende. However, I am concerned about several issues with the new maps:
--They split up communities of common interest across the commonwealth-e.g. the military community was split into US House District 2 and 3 in Hampton Roads; suburban communities in Chesterfield County were redrawn into rural communities to their south and west (proposed District 5) rather than paired with similar communities in Henrico; this works in opposition to previous public comments, in which Virginians voiced interest in keeping our communities together.
--They place two Black state senators, L. Louise Lucas (D-Portsmouth) and Lionell Spruill (D-Chesapeake) in the same new district and may be a violation of the Voting Rights Act.
--They create disadvantages and undercut minority representation in areas in Northern Virginia and southeastern Virginia where the census notes the commonwealth’s population grew most, chiefly non-white voters.
--They leave Reps. Spanberger and Luria out of their own districts and threaten the incumbency of Rep. Wexton. This creates the possibility of leaving Virginia with no female incumbents in Congress. As a woman, this worries me greatly in the current political climate.

I voice my support for the proposed Farkas Map, outlined in the materials by the Elias Law Group, as an alternative. That map apportions our population equitably and preserves communities of interest. It also preserves the incumbency of the congresswomen.

Thanks very much for your time. Should you need to reach me, please contact me at the above email address.

Sincerely,
Catherine Fletcher

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

I would like to express my disagreement about the proposed redistricting of districts 69 and 71 for the following reasons. My husband and I believe people vote because they feel vested in the issues of the communities and surrounding geographic areas where they live. If as they say "you don't have any skin in the game," you may lose many voters who will feel that their votes don't matter if you split these districts as the proposed changes indicate. Williamsburg is tied to the Peninsula culturally, economically, academically, socially, historically, and environmentally. To tie us to Richmond and Gloucester through arbitrary political districting does not make a strong case unless this decision is based on something sinister and underhanded. It is deplorable to me as a retired political science teacher to watch this happen. Shame on the proposers of such a plan. It doesn't make sense.

Respectfully submitted,
Patricia Condle Boyd and Donald Boyd

Public comments submitted by Tamara Hinton, Staunton City resident to redistricting@vacourts.gov

I strongly oppose breaking Augusta County in half and separating its two independent cities from District 2. Staunton, Waynesboro, and all of Augusta County should be retained in District 2 as communities of interest, public school districts, regional school divisions, watersheds, economic development partnerships, cultural heritage and agriculture. These communities are strengthened by sharing representation in one Senate district and it would represent a significant loss to change that. Senator Hanger has represented this area well and has been a great champion for our communities.

\section*{Sincerely,}

\section*{Tamara Hinton}

Comments submitted to the Virginia Supreme Court regarding redistricting
December 19, 2021
By Tony DeTora, Stafford County voter

This comment responds to three of the newly proposed districts:
- New Congressional District 7 (all of Prince William, Manassas, Manassas Park, Fredericksburg City, Stafford and parts of Fairfax County and Spotsylvania),
- New State Senate District 29 (parts of Stafford and Prince William), and
- New House of Delegates District 23 (parts of Stafford and Prince William).

These districts do not represent communities of interest, and include a significant physical barrier, Marine Corp Base Quantico, creating a discontinuity between Prince William County in Northern Virginia to the north, and Stafford County in the Rappahannock Region to the south.

These districts should be cut at the Prince William-Stafford border, and the northern areas and southern areas redrawn into districts that better align with the interests on either side of that border.

\section*{Background}

The Special Masters inherited the eight regions identified by the University of Virginia's Weldon Cooper Center as a starting point. These regions presumably serve the Weldon Cooper Center well for their work, but for properly analyzing the communities of interest for these counties and cities, they fail to capture both the everyday lived experiences of people and boundaries shaped by a man-made feature, Marine Corp Base Quantico (MCBQ).

In some ways Stafford, Fredericksburg, and Spotsylvania share qualities with Northern Virginia, but not in the ways that most fundamentally matter to the communities on either side of the Prince WilliamStafford border, and specifically not in actual shared interests, programs, and services.

Pairing Prince William and points north with Stafford and points south, may be understandable, given the inherited starting material, but drawing them into the same districts is an error and should be corrected before the maps are finalized. These districts should be cut at the Prince William-Stafford border, which gives due respect to each county and its jurisdiction, and the northern areas and southern areas should be redrawn into districts that better align with the interests on either side.

The New 7th Congressional District presents a significant change for Stafford, Fredericksburg, and Spotsylvania from the current districts and from maps previously under consideration by the Commission. This new district fails to consider the long-standing relationships these localities hold with the counties surrounding them in the Rappahannock Region. As for Stafford's regional interests and affiliations, almost all are with communities to the east, south, or west rather than to the north.

The original error of lumping these localities into Northern Virginia for the New \(7^{\text {th }}\) Congressional District is compounded by the nesting feature, which is intended to consolidate representation of communities of interest. In this case, the nested Senate Districts and House of Delegates Districts deepen the error, multiplying the impact on these disconnected communities.

\section*{Contiguity and Geographic Barriers}

Prince William County and Stafford County are separated by a large Federally Managed Military Base known as Marine Corps Base Quantico (MCBQ). While this type of facility is not the typical geographic barrier, it is a very real one.

MCBQ runs almost the entire length of the border between Prince William and Stafford counties and provides more than 50,000 acres of separation between them. MCBQ inhibits many of the normal interactions between counties that cause them to have communal interests.

MCBQ is not generally accessed by the general public and offers the general public no traversing roads through the base. Therefore, naturally, this barrier has resulted in the development of significant differences in the culture and interests. MCBQ is a formidable social, cultural, and lifestyle barrier, preventing the kinds of interaction that can create a real shared community

\section*{Communities of Interest}

To be sure, there are interactions between the people of these counties and regions. I-95, Route 1 and the VRE trains connect the two counties like a bridge, or a mountain pass connects two areas across a mountain or large body of water. While some connections exist, they are much weaker and less important to Stafford and Prince William than their links with other neighboring counties and cities.

When Stafford works with its regional counterparts, it does not look north. And Prince William does not look south.

Stafford's "community of interest" is shared with Fredericksburg, Spotsylvania, Caroline, King George, sometimes Fauquier, Culpeper, and other counties in the Rappahannock Region. We share libraries, landfills, service districts, planning organizations, and a chamber of commerce with these other localities, but not with Prince William.

While Stafford is near Northern Virginia, and many of our citizens commute into Northern Virginia locations, Stafford is not part of the Northern Virginia culture. Stafford generally does not share Northern Virginia's regional interests, and Northern Virginia does not share Stafford's.

Most of the stable Stafford population is either those who grew up here, or those who moved here specifically to get away from Northern Virginia. Most of the transient population is made up of military families who move to the region for a few years for work at MCBQ, or Dahlgren, or the Pentagon, or Fort A.P. Hill, or one of the other installations between Richmond and Washington D.C.

We can examine Stafford County's view of communities of shared interests. Reviewing the Stafford County website, the following ten items are linked on the "Schools and Regional Groups" section (https://staffordcountyva.gov/government/schools and regional groups/index.php ), providing Stafford's most important regional affiliations:
1. Stafford Schools - limited to Stafford.
2. Central Rappahannock Regional Library (CRRL) - a regional library system that includes the City of Fredericksburg, and Stafford, Spotsylvania, King George, Louisa, and Westmoreland counties.
3. Fredericksburg Area Metropolitan Planning Org. (FAMPO) - FAMPO's mission is "to assist with the development of regional transportation plans for the Fredericksburg area." FAMPO is staffed and funded through the George Washington Regional Commission (GWRC). (see below for more on GWRC)
4. Fredericksburg Regional Transit - serves bus lines in the City of Fredericksburg, and Stafford and Spotsylvania counties.
5. George Washington Regional Commission - GWRC "facilitat[es] local government cooperation in addressing, on a regional basis, problems of greater than local significance, and provides a broad array of services for the benefit of the 372,000 residents of Planning District 16 . Our current areas of focus include economic development, environmental services, human services (including homeless services support), affordable housing, transportation demand management, and rural and urban transportation planning." Planning District 16 is composed of the City of Fredericksburg, and Stafford, Spotsylvania, King George, and Caroline counties.
6. Germanna Community College - Community college serving the City of Fredericksburg, Stafford, Spotsylvania, Orange, and Culpeper counties.
7. University of Mary Washington - Virginia public university, with a main campus in the City of Fredericksburg, with a campus in Stafford County, and with a campus in King George County.
8. Rappahannock Area Health District - Virginia Department of Health district that provides medical, environmental, and public health services to residents of the City of Fredericksburg, and Caroline, King George, Spotsylvania, and Stafford counties.
9. The R-Board (Landfill and Recycling) - a regional solid waste management board which serves the City of Fredericksburg, and Stafford County.
10. Virginia Railway Express (VRE) - the VRE is a commuter rail service with two service corridors: Spotsylvania County to Washington D.C. and Bristow (Prince William County) to Washington D.C. VRE is co-owned by two regional transportation commissions: the Potomac and Rappahannock Transportation Commission (PRTC), and the Northern Virginia Transportation Commission (NVTC). PRTC provides for public rail and bus systems for Prince William County, Manassas city, and Manassas Park city, and public rail for the City of Fredericksburg, Stafford, and Spotsylvania counties.

Of the nine regional groups important enough to be listed on the Stafford County government website, only one group includes Prince William County. That group (VRE) is only half-owned by the PRTC. Stafford, Fredericksburg, and Spotsylvania counties only participate in half (rail service) of the PRTC activity.

Additional research yields more examples:
11. Region 7 of the Virginia Association of Counties (VACo)

12. Virginia Department of Transportation (VDOT) Fredericksburg District.

\section*{- Fredericksburg District}

Fredericksburg is made up of 14 counties, spanning from Stafford to Spotsylvania on the western end to Mathews and Gloucester on the eastern border.

More than 5,200 miles of roadway run through this district.
This includes almost 800 miles of primary roads, more than 4.300 miles of secondary road, and more than 46 miles of interstate roadways.

\section*{Fredericksburg District}

87 Deacon Road
Fredericksburg Virginia, 22405
540-899-4288
Marcie Parker, P.E., district engineer

13. GO Virginia Region 6

15. Virginia Department of Juvenile Justice

\section*{COURT SERVICE UNITS (CSU)}

In almost every case of a regional service, district, or area, Stafford County is fully split from Prince William County and the rest of Northern Virginia at MCBQ. This is not an accident. This is not a weird artifact. It is reality. These are physically separated entities with separate interests, and despite a few similarities, mostly superficial, the two are not communities of shared interest.

A detailed analysis of Prince William County would yield that they do not consider Stafford County, or other points south, to be communities of interest, peer counties, or part of Northern Virginia.

Prince William County is part of the Northern Virginia culture. That culture includes Alexandria, Arlington, Fairfax County, Fairfax City, Manassas, Manassas Park, and Loudon. Many of us moved to Stafford specifically to get away from that culture in our home lives. Even those of us who can't fully cut ourselves off from it in our professional lives. Even Prince William's form of local government differs from Stafford's because it serves their interests in ways that certainly wouldn't serve ours.

One particularly stark demonstration is seen in local print media. I subscribe to my local paper, the Free Lance Star, centered on Fredericksburg and also covering Stafford, Spotsylvania, King George, Caroline, Orange, and other regional counties. The Prince William Times serves Prince William. They ran an article this week on the redistricting maps and could not even be bothered to include the Stafford portions of the proposed districts (or current districts) in their maps:

It is important to the people of Stafford County to have their representatives share their actual interests. As we've seen, Prince William and Stafford might be better classified as "communities of disinterest."

\section*{Conclusion}

Under the proposed map, the New 7th Congressional District would include Prince William, Manassas, Manassas Park, Fredericksburg City, Stafford, and parts of Fairfax County and Spotsylvania. This New 7 \({ }^{\text {th }}\) Congressional District should be cut at the Prince William-Stafford border, and the northern areas and southern areas redrawn into districts that better align with the interests on either side of that border.

Under the proposed map, the New \(29^{\text {th }}\) State Senate District would include part of Prince William County and part of Stafford County. This New \(29^{\text {th }}\) State Senate District should be cut at the Prince WilliamStafford border, and the northern areas and southern areas redrawn into districts that better align with the interests on either side of that border.

Under the proposed map, the new \(23^{\text {rd }}\) House of Delegates District would include part of Prince William County and part of Stafford County. This New \(23^{\text {rd }}\) House of Delegates District should be cut at the Prince William-Stafford border, and the northern areas and southern areas redrawn into districts that better align with the interests on either side of that border.

Ms Alisa W Padden,
The proposed redistricting map that will combine central Virginia districts with northern
Virginia will eliminates equal representation of voters in central Virginia. Northern Virginia is dominated by the democrat party therefore creating disenfranchisement of conservative voters in the current 5th district. This division is unfair and must not be used.

Thank you ,
William Van Ryn

\section*{THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS}

My name is Kevin G. NeIson. I live in Midlothian, Precinct 504, in Chesterfield County. I relocated to central Virginia in 2014 when I was appointed President of Porvair Filtration Group, Inc., a leading manufacturer of sophisticated, highly engineered filtration products for the aerospace, nuclear, chemical process, bioscience, and semiconductor industries. My wife and I chose to live in Midlothian due to its proximity to Richmond, as we often attend sporting events at the local universities as well as the concerts and theatrical events the city offers. In 2016, after considering other states, I decided to keep our rapidly-growing business in central Virginia and opened our brand-new, state-of-the-art North American headquarters here. I made this decision in consideration of our existing workforce, our ability to attract new employees from the local colleges, access to I-95, I-85, and I-64, and easy access to the Richmond International airport.

I object to the new redistricting map proposed by the Special Masters. Splitting Midlothian away from greater Richmond and the rest of Chesterfield County makes no sense, and it is contrary to the "Communities of Interest" standard. Their plan puts us in a new House of Delegates 72nd district with people living in rural counties whose priorities do not revolve around our urban concerns, not to mention issues that Porvair and other manufacturing companies face, such as supply chain problems, hiring skilled engineering and manufacturing labor, and infrastructure and logistics concerns.

For the reasons listed herein, I request that preferential consideration be given to the Farkas map as an alternative redistricting plan.

\section*{Regards,}

3542 Highbridge Dr.
Midlothian, VA 23113

\section*{Remarks by Michael McClary for the Redistricting Public Hearing before the Supreme Court of Virginia, December 15, 2021, and Revised Comments for Subsequent Consideration for Potential Revisions to the Work of the Special Masters, submitted on December 20, 2021}
- My name is Michael McClary, and I am a native Virginian, having lived my entire life here, except when I was away in the Army. I would like to thank the honorable justices for giving me the opportunity to comment on the work of the Special Masters in revising Virginia's Congressional and General Assembly districts after the commission failed so miserably.
- I am a West Point graduate, a Vietnam combat veteran, and a retired Federal senior executive. I grew up in the Piedmont and I have lived in Central Virginia for 35 years and in Culpeper County for the past 12.
- I commend the Special Masters for their very admirable work, but I believe there are still many issues that must be addressed.
- Many others have spoken and have written quite eloquently about what has been done to Henrico, Chesterfield, Spotsylvania, Louisa, and Albemarle Counties.
- In discussing their methodology, the masters mention the word "Culpeper" only once, and "Piedmont" only twice. We in Culpeper are horrified to know that others consider us part of "Northern Virginia." The current \(7^{\text {th }}\) Congressional District is not mentioned at all. It's as though we never existed. Central Virginia has been a community of interest for many, many years, and now it has been completely eliminated and scattered among other proposed districts with which it has little in common.
- Loudon County, the megalopolis anchor of the proposed \(10^{\text {th }}\) Congressional District is essentially a part of that northern region that is completely focused on the federal city of Washington, DC.
- The rest of us pride ourselves on our rural heritage, and our focus on agriculture, timber, natural resources, and our small-town environments.
- Loudon County's mostly urban population numbers more than 413,000 - more than twice the combined populations of Fauquier, Rappahannock, Culpeper, Madison, Orange, and Greene Counties, and the rural portions of Albemarle and Spotsylvania Counties that have been allocated to the new \(10^{\text {th }}\) District.
- This, and its number of registered voters dwarf the entirety of the rest of the district, thereby effectively disenfranchising the rest of us.
- We have nothing in common with Loudon County. We don't go to Loudon County for anything. Instead, we almost always, and exclusively, go to Charlottesville or Fredericksburg for shopping, dining, healthcare, services, and recreation. Loudon, far to the north, is in a galaxy far, far away.
- Locally, in past elections, the Town of Culpeper and Culpeper County have had 16 different ballots because of the way the county has been split up among 3 Senate districts and 2 House of Delegates districts. It creates a nightmare for our Registrar of Elections every time we go to the polls.
- In this iteration, the planners had the good sense to put all of Culpeper County into one Senate district. They should do the same for the House of Delegates. The Rappahannock and Rapidan Rivers form natural boundaries of a single community of interest, and that is the Culpeper County community that surrounds the town of Culpeper. That's where we all go to shop, dine, and participate in community events and recreational opportunities. We share many common holidays and celebrations with Madison and Orange, often participating in each other's events. Not so much with Rappahannock, Fauquier and Greene Counties.
- It would make more sense to me to include the entirety of Culpeper County in the new House of Delegates District 62 , and move Greene County to District 55 , as it is very closely associated with Charlottesville and Albemarle County, not the counties to its north.
- Finally, and crucially, in this day and age, it is simply unacceptable to revise our districts with the effect of disadvantaging all three of Virginia's women members of its Congressional delegation, and in particular, completely removing Congresswoman Abigail Spanberger from the present \(7^{\text {th }}\) Congressional District, and the 10 -county constituency for which she has been working so arduously for the past four years. Not only that, but she has also become quite well regarded by members of both sides of the aisle for working effectively and in a bipartisan basis.

Her legislative accomplishments have been significant, and she has become renowned for the effectiveness of her district services to \(7^{\text {th }}\) District residents. To gerrymander her out of her district is simply outrageous.
- I join with the other speakers in urging the Supreme Court to reconsider the dismantling of our \(7^{\text {th }}\) Congressional District. Geography doesn't vote, people vote. I thank the Court for the opportunity to comment on this important process.

I urge your reconsideration of changes made to the Second District. I believe we should maintain our military community as it now exists, a community that is critical to the economic well-being of our region. Our Chesapeake Beach neighborhood borders Naval Station Little Creek, who works with us on recurring flooding among other issues. Our collective voices have been impactful in resolving problems.

I am concerned, also, about the impact of redistricting on women leaders, as we work to increase our participation in such key roles. We have enjoyed highly effective leadership in the Second District, which we value greatly.

Again, I urge your reconsideration. Thank you for the opportunity to comment.

My name Mike Jones and I serve as the Deputy Town Manager and the Director of Public Safety \& Emergency Management for the Town of Hurt Va. We are a community that is coming "back to life" and economic development and regional cooperation is extremely important to our present and our future. We have been the victims many times of failed gov't policies in the past that gutted the economic heart of our community and essentially ignored us.
The plan that you have included us in takes away so many good things including the cooperation, collegiality and the community of like interests that is so vital to our survival.
The localities that you have lumped together have no common interest in Hurt or northern Pittsylvania County. They have shown no interest in us in the past. The Town of Hurt has rebounded thanks to new Hurt centered town leadership, supported by the leadership and staff of Pittsylvania County and the residents of the our town and county. We also pay taxes to Pittsylvania County in addition to town taxes.
Your plan takes our political influence out if our community of like interests and places us with strangers when it comes to knowing our needs, wants and limitations .
Staying in our current district will serve us and our partners with a combined economic and leadership team that is looking to help make Hurt the shining star of Northern Pittsylvania county.
Your plan dilutes snd fragments our abilities to manage our own destiny and places us into a district where we are essentially strangers.
Please leave us alone and let us stay in our current district that will allow us to continue improving the lives of our citizens and the viability of a town that was near death. We have worked very hard to get where we are know and we have established strong and effective team relationships with our county.
We do not want or need to be placed into a district that will not serve the interests of our citizens, our Town and our county. Putting us in the proposed district fractures all the work we done to bring Hurt back to life. No one has asked our opinions about this change and that is one thing that a small town struggles with - being heard by Richmond.
Please strongly consider "leaving us in our district that is working for us" and don't place us into a district that we have nothing in common with. We are geographically separated by the Staunton River as well as community culture and cooperative county government. Our efforts to attract business \& industrial interests are well served by what we have now.
Simply put, the proposed plan to put us into a new district that we have little ties or history working together will greatly damage our Town.
Thank you for serious considering our very real concerns and don't undo years of our efforts to bring our town back.

Sincerely,
Mr. Michael A. Jones, M. S.
Deputy Town Manager \& Director of Public Safety \& Emergency Management for the Town of Hurt VA. 804-350-1672

I can think of no perfect plan for redistricting that would leave all citizens, voters or politicians completely happy or even in total agreement with one another. At best, drawing new district lines can only achieve more fairness than continued gerrymandering designed to preserve political careers. If Virginians truly want an impartial map drawn then approval of the maps drawn by these two masters is likely the closest you will get.

As a former delegate who served a decade in a gerrymandered district I am not afraid to say that I believe the term "non partisan" no longer applies; "impartial" seems much more practical and more likely to accomplish. That, of course, will require sacrificing some sacred cows. I encourage you to accept the maps as drawn, and wish you much success in your endeavor.

Sincerely,
Thew Honorable Richard P. "Dickie" Bell
Former Delegate - 20th House District

\section*{To the Supreme Court:}

As the comment period for the redistricting process draws to a close, I want to commend the members of the Court for the commitment they have shown to a new, fairer, more transparent redistricting process for the Commonwealth of Virginia.

I have worked on redistricting reform for close to 15 years. Many of us were disappointed when the new redistricting commission broke down over partisan lines. But I have been pleased by the approach taken by both the retired appeals court judges who appointed the citizen commission members, as well as the decisions of the Supreme Court since the Court was required to take over the process. Although many persons argued that redistricting would inevitably take a partisan tilt if it ended up in the hands of the Court, you have dispelled that notion with your conscientious rejection of overly partisan nominees for special master, and your participation in public hearings and review of public comments.

Recent election results demonstrate that Virginia is still a very competitive state politically. Its geography and historic political boundaries also make it more challenging to redistrict than some states. It will, in the end, be impossible to please everyone. Arguably, several previous rounds of political gerrymandering created districts that were so indefensible that setting the boundaries straight again will inevitably lead to incumbents facing incumbents, and other legislators choosing to retire rather than to move. I, for one, would be very sorry if Virginia were to lose the three talented Congresswomen it currently has, but I also recognize that the protection of districts in which they can win is not a valid criteria for drawing maps. However, promoting competition where the potential for competition exists, preserving communities of interest
and jurisdictional boundaries, and drawing districts that are compact and contiguous ARE all appropriate goals.

We will have another decade to consider whether we should approve a new constitutional amendment to create a redistricting commission that is less partisan and more independent of the legislature than the one we put in place. The Court itself may have some views on this. In the meantime, thank you for doing your part to make this year's process certainly fairer and more transparent than it has been in the past.

\section*{Supreme Court of Virginia}

100 North Ninth Street, 5" Floor
Richmond, Virginia 23219-1315

\section*{Dear Madame Clerk:}

Protecting and enhancing the voting power of historic minorities in this country is a very important public policy goal. Protecting the American franchise of "one person one vote" is also important. Reducing hyper partisan gerrymandering is an important aspiration of an increasing number of Virginians. It is a factor I considered when vetoing initial redistricting legislation proposed by my own Republican controlled legislature a decade ago.

I write to reply briefly to the filing of the Elias Law Group in this matter. Marc Elias is a Democratic election law attorney who has represented such prominent Democratic candidates as Terry McAuliffe and Hillary Clinton. Mr. Elias is the leader of a national Democratic Party effort to influence the outcomes of state redistricting processes through lawsuits and he has been heavily engaged in redistricting in Virginia in the past.

In 2014, Mr. Elias brought a lawsuit challenging Virginia's previous House of Delegates map as an unconstitutional racial gerrymander. After several years of litigation, he succeeded in obtaining a court order requiring the redrawing of a dozen state House districts which ultimately reduced the Black voting-age population (BVAP) in each. Three Black delegates lost their races for reelection last month running in districts that were redrawn as a result of Mr. Elias’s lawsuit. Adopting his recommended changes to the special masters' proposed congressional map could further reduce Black representation, currently 2 of 11, in the Commonwealth.

Mr. Elias submitted his proposed congressional map on behalf of James Farkas, who was Elias's client in another lawsuit challenging Virginia's previous congressional map. That litigation also succeeded forcing a redrawing of maps, which ended in the elimination of the Commonwealth's only majority-minority congressional district. The pattern and message is clear: This Court should avoid creating any majority-minority
congressional districts, or Mr. Elias will bring a legal challenge using the same plaintiff as last time. Mr. Elias professes a concern that the special masters' proposal will harm minority communities even as he proposes an alternative map featuring zero majority-minority districts. The last time a court accepted Mr. Elias's contentions concerning redistricting in Virginia, Black incumbents lost. This Court should reject Mr. Elias's recommendations or risk Virginia's Black representation in the U.S. Congress diminishing as was seen in the House of Delegates.

Virginia's Black voting-age population stands at approximately 20 percent of its total voting-age population. Given this number, one would expect about two congressional districts featuring a BVAP exceeding 50 percent on a map drawn pursuant to neutral redistricting principles. The special masters’ proposal includes two districts with BVAP exceeding 40 percent (the Third and Fourth Districts) but none in which Black voters constitute an outright majority of voters. One might slightly increase the BVAP in these two districts to get them over 50 percent in order to increase the likelihood that Black representatives will be elected, but Mr. Elias urges a different approach.

Mr. Elias recommends complete changes to the special masters’ proposal, claiming that it is clear that "their first and predominant consideration . . . was race." Elias Letter at 19. Yet the special masters' proposed Third and Fourth Districts do not differ that much demographically from their current iteration, which Mr.
Elias admits "has proven more than sufficient for the Black communities in those districts to elect the candidates of their choice." Id. at 4. The special masters have proposed a plan in which the Fourth District would have a BVAP of 45.3 percent and the Third a BVAP of 44.5 percent, as compared to 40 and 47.2 respectively on the current map. In other words, the special masters have created two "minority opportunity" congressional districts in which black voters constitute a plurality but not a majority of voters.

Mr. Elias's plan substantially reduces the BVAP of the Third District and leaves the BVAP of the Fourth relatively unchanged, creating a map that could lead to reduced minority representation in Congress. Mr. Elias proposes reducing the black votingage population in the Third District by more than five percentage points to less than 42 percent, while failing to raise BVAP higher than 40 percent in the Fourth (as compared to the special masters' proposed gain of more than five percentage points in that district). To simplify: The special masters propose two districts with BVAPs around 45 percent, and Mr. Elias proposes two districts that are both closer to 40 percent. Mr. Elias apparently seeks to reduce Black voting power in order to expand Black representation, which does not seem logical.

These proposed changes are not made any more explicable with reference to communities of interest. Mr. Elias recommends carving the heavily Black City of Norfolk out of the Third District and placing it with Virginia Beach in the adjacent Second. The last Virginia congressional map that placed the entire City of Norfolk
in the same district as Virginia Beach was the one adopted by the General Assembly in 1981, indicating that several generations of Virginia elected officials in both parties have interpreted their communities of interest differently. He also persists in trying to draw the district lines in Hampton Roads on a north-south basis, when it is clear by looking at the orientation of interstate highways and patterns of settlement in the region that the real divisions between communities of interest run east-west. The special masters' proposal recognizes this reality by using the Hampton Roads Beltway as the natural dividing line between the Second and Third Districts. Mr. Elias seeks to create communities of interest because he arbitrarily believes that a Black voting-age population around 45 percent in two districts is too high.

None of this would matter if not for the fact that Mr. Elias's proposed changes could have an adverse impact on Black representation in Congress. As mentioned, Mr. Elias's previous lawsuit succeeded in getting a dozen House of Delegates districts redrawn with lower BVAPs to rectify an alleged racial gerrymander. The districts were redrawn to make them less Black, and then, in the most recent election, three black delegates running for reelection in those districts were defeated-one-fifth of all the black members currently serving in the House. Black representation could decrease again if that process and logic were repeated for the Congress.

While only future elections will show whether the special masters' proposal would expand Black representation, a Black delegate lost her race this year after Mr. Elias's lawsuit dropped her BVAP from 58\% to 47\%. It is obvious that Mr. Elias's proposal could sacrifice Black elected officeholders. Reducing the Black voting-age population in certain districts to the 40-42 percent range substantially increases the chance that Black members will not be elected. It is especially true when it follows the retirement of a well-known person like Rep. Bobby Scott. Mr. Elias's plan unfortunately seems to be an attempt to use allegations of racial gerrymandering to force the Court to approve what is actually a partisan gerrymander.

The Virginia Constitution, as overwhelmingly amended by the people of Virginia in 2020, requires map drawers to "provide, where practicable, opportunities for racial and ethnic communities to elect candidates of their choice." Va. Const. Art. II, § 6. It is clearly practicable to create a Third and Fourth District in which Black voters are sufficiently numerous to elect the candidates of their choice, as demonstrated by the current map and affirmed by the special masters' proposal. The Constitution also prohibits the adoption of maps that, "when considered on a statewide basis, unduly favor or disfavor any political party." Va. Code Ann. § 24.2-304.04(8). Mr. Elias's gerrymandered map, which would result in the creation of only three Republican-leaning districts (27\%) in a state in which the Republican candidate received over 50 percent of the vote in the most recent statewide election, clearly runs afoul of this requirement. Therefore, this Court should maintain a Black voting-age population of greater than 40 percent in both
districts-and potentially raise the BVAP to near 50 percent, given the results of the most recent state election-rather than subjecting Virginia's Black voters to another of Mr. Elias's risky partisan electoral plans.

Thank you very much for your consideration.
Sincerely,
Robert F. McDonnell

This comment concerns congressional redistricting.
Northern Virginia, particularly Tysons Corner and the area's outer western and southern portions, is projected to grow even more in the coming years. The special masters’ solution to that seems to be to expand their geographic area to include
rural areas to the south or, in the case of Tysons Corner, to its more suburban west. This will have the effect of diluting votes as these areas grow. We should have a greater number of smaller districts throughout the state for these densely populated areas, and save the sprawling ones for the rural areas.

Respectfully,
Lynn and Jeff Walthall
9228 Bailey Lane
Fairfax VA 22031 (who will have our votes diluted by Tysons Corner)

\section*{THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS}

To the redistricting masters:

I am a constituent in the current 2nd Congressional District of Virginia and have a number of concerns regarding the recently altered configuration of my district. I will briefly outline the three most critical concerns below:
1) Living in East Beach, Norfolk, I have become increasingly aware of the military and environmental links between the Virginia Beach oceanfront on the Atlantic and the Chesapeake Bay beachfront in Norfolk. By splitting representation, our area loses consistency of advocacy in these two critical areas of federal support. (One military base in particular, Little Creek Joint Expeditionary base actually spans both Norfolk and Virginia Beach counties and waterfront accesses.)
2) Eliminating the residency of the current 2nd district elected representative also negatively affects the impact of their advocacy for the military as well as environmental concerns, as seniority in committee appointments offers a stronger voice on behalf of the district and Virginia as a whole.
3) In looking at the reconfigured districts, it appears one would have to travel through an entirely different district in order to reach one portion of the newly outlined 2nd from the other. My understanding of your intentions was that this is exactly the kind of awkward configuration we were trying to avoid.

I urge the masters to reconsider their current determination of the 2nd district and allow for one representative to be the advocate for the above mentioned areas in Washington.

Sincerely,
Carol Roth
9730 28th Bay St.
Norfolk, VA 23518

COMMENTS: DISAPPROVE OF PROPOSED REDISTRICTING PLAN

WHY?
* CURRENT DISTRICT 'works'- -no need to disrupt lives with this proposal. Covid -19 pandemic plus general economic downturn has ALL of us at super high stress level; don't add more!
* CURRENT DISTRICT'S military and veteran population base would experience dramatic, negative change in profile and common interests- -not good for them nor area in general.
* CURRENT DISTRICT'S permanent population and those who come into the area to work,example: military personnel, need to have same state/federal representatives to support and advocate for their best interests.
NOTE: Your notice dates to respond to proposed plan arrived at a very busy, personal time for many: holiday celebrations, college students arriving home to bond with families and friends, etc. What could have made this decision so important that it HAD TO BE DONE in month of December? Or was scheduling done on purpose for obvious reasons? What ever the reason, makes one question lack of 'common sense' used when preparing your calendar of deadlines.

Dear Va redistricting commission:

I am writing to comment on the proposed new districts in the 69th and 71st. I live in Hampton Roads (Williamsburg). The new district does not place Williamsburg with Hampton Roads, but rather extends into the Richmond area. This isn't an appropriate match for Williamsburg, which is very much part of the Hampton Roads community (jobs, residents, health care services). Please revise to keep Williamsburg as a part of with Hampton Roads.

Warm regards,
Jonathan Scheerer
Resident of Williamsburg

Please ensure the voting integrity of the Roanoke and New River Valley (Virginia District 19) by implementing a redistricting plan that makes the district compact and continuous.

Drawing up the voting district in this way will best serve the people of Virginia. A contiguous and compact voting district for the Roanoke and New River Valley would be consistent with the both the United States Constitution and the Constitution of the State of Virginia.

Thank you,

Daniel J. Geary, Ph.D.

The proposed district lines between Districts 69 and 71 make no sense, other than political gains for one party over another. All the area surrounding Williamsburg must be in the same district as the city itself. Our children go to school in a James City County Williamsburg school system, our social, religious, community, entertainment, and commercial activities are in common. We share the same city mailing address: Williamsburg. We must be able to vote based on those common interests, not on the whim of a political party's quest for power, which often results in people in power having no actual connection to those in their district.

I was hoping that this redistricting would be one of integrity and impartiality, based on reasonable assessment of where people live and congregate, not on political gain.

}

Dear redistricting committee,
I am having trouble understanding the 69th HOD district. It fragments the Southern part of Williamsburg and heads across the York river to carve out a slice of Gloucester. All of Williamsburg should be kept together with Hampton Roads. Gloucester is on a different peninsula and in a different county. It makes more sense to try to place all of Williamsburg into the 69th. As far as I can tell this is the only district to span the York or James river.

Jonathan Scheerer
Williamsburg resident

Subject: VA Redistributing Concerns and Submitted Public Comments

## Public comments submitted by Carole Hinton, Augusta County resident to redistricting@vacourts.gov

I strongly oppose breaking Augusta County in half and separating its two independent cities from District 2. Staunton, Waynesboro, and all of Augusta County should be retained in District 2 as communities of interest, public school districts, regional school divisions, watersheds, economic development partnerships, cultural heritage and agriculture. These communities are strengthened by sharing representation in one Senate district and it would represent a significant loss to change that. Senator Hanger has represented this area well and has been a great champion for our

## communities.

## Sincerely, <br> Carole Hinton

## EXTERNAL EMAIL

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

I urge that this proposal be rejected for the following reasons:

## Military

Military and veteran populations that are essential to the socio-economic strength of Hampton Roads should not be split in the congressional districts.

Naval Station Norfolk, Fleet Forces in Norfolk, as well as Air Station Oceana in Virginia Beach work so closely together and have active duty servicemembers who live in both localities. They deserve to have the same federal representation in order to best advocate for their interests.

## Environmental

The ocean view and waterfront parts of Norfolk and Virginia Beach specifically should be together in federal representation due to their shared environmental concerns.
$\bullet$
Reports by leading environmental scientists that the sea level could rise by several feet along our shores by the end of the century should be raising serious alarm.
Beyond the human cost of that disastrous possibility, the economic and infrastructural damage such a change could inflict on these communities is unthinkable.

## Contiguity/Compactness

The district is shaped like a "crooked J" that is not functionally contiguous. Due to the Great Dismal Swamp, constituents would have to drive through a majority of the 3rd district to get from one end of the 2nd to the other.
-
By putting Suffolk/Isle of Wight back in the 3rd, you get a more compact district in the 2nd and don't disrupt the compactness of the 3rd.
-
It takes longer to drive from Southampton County to the Virginia Beach District Office than it does to a District Office in Newport News.

The special masters intended to adhere to functional congruity however they focused more in minimizing county splits. There should be a balance that doesn't disenfranchise voters in the Hamptons Roads districts.

Respectfully yours,
James F. Boland

Dear Honorable Members of the Virginia Supreme Court and Special Masters:
On behalf of my constituents in the Town of Hurt, and additionally on behalf of the entire Hurt voting precinct in far northern Pittsylvania County, I am reaching out to you concerning the boundary between the proposed Virginia Legislative Districts 48 and 52 (House of Delegates).

If the proposed new districts are established in their current form, then this one precinct will become "isolated" in a sense from most of Pittsylvania County and instead be represented in Richmond by a Delegate whose core constituency lies in Campbell and Bedford Counties. The result will be a "remote island effect," for lack of a better expression, imposed on Hurt precinct voters collectively.

Economic development and education (which we all know are interrelated), are two areas of significant concern to us under the current proposal.

Over the last few years, Hurt has worked diligently with Pittsylvania County and City of Danville (and thus their elected officials) to create the Staunton River Regional Industrial Facility Authority (SRRIFA) for the purpose of revitalizing a local economy that was taken to the brink of ruin with the loss of legacy industries such as furniture, textiles, tobacco, and others. SRRI FA, which specifically works to develop the Southern Virginia Multimodal Park in Hurt, needs to avoid major upheavals to the local political landscape -- at least for the foreseeable future -- to ensure/maximize functionality.

SRRIFA broke ground earlier this year on its first project, and other prospects are showing encouraging signs. Redistricting of its territory into that of two other counties who have limited incentive and vested interest, especially at this critical time, would not constitute a prudent course of action for the Staunton River Region.

In regards to public education, there is one school (J ohn L. Hurt Jr. Elementary) located in the Hurt precinct. If it is redistricted as drawn, then that school community would have its concerns fall under the purview of a legislator from two other counties, while most of the remainder of the Pittsylvania County school division would continue to be represented by its Chatham-based Delegate who is knowledgeable of and committed to specific local issues.

Given these concerns and potentially others, I respectfully urge you to reconsider and adjust the boundary to maintain the Hurt precinct in its rightful place, which is the new District 48, not District 52 .

I thank you sincerely for your time and attention to this matter.
Appreciatively,

RE: State Senate District - Augusta County
FROM: Lynn R. Mitchell, Augusta County resident (currently State Senate District 24 / House of Delegates District 20)

Concerns with the current redistricting map for Augusta County:

1) Staunton and Waynesboro are part of the state senate district encompassing Augusta County; indeed, Augusta's seat of government is in Staunton. The three localities work together with shared entities that work with and help residents in the area, and would be better represented as one Senate district.
2) The redrawn map puts three incumbent state senators together in the district which would result in losing two of them, a tremendous loss of institutional knowledge.

Thank you for the opportunity to voice my concerns.

Dear Special Masters,
I am writing from Portsmouth.
Portsmouth is an African American majority community. I note from your redistricting proposal that you are redrawing two adjacent State Senate boundaries from which current African American Senators serve. This appears to be a denial of a specific racial group, in the whole, to elect representatives of their choice.

Similarly, your proposal combines areas represented by Portsmouth's current congressman, who is African American, with the residence of his party colleague in the US House of Representatives. This may well have the effect of abridging African American representation in Congress on the whole, as your proposed 2nd Congressional district appears as if you drew it to strip my congressman of his current party colleague.

Please recognize the citizens of Portsmouth, and work carefully to avoid abridging African American voting rights in any way.

Respectfully,
Stephen Ketcham

It is imperative that the commission maintain the communities of interest that exist between Radford, Blacksburg and Roanoke City. In addition to transportation communities of interest, via bus lines and train travel the 460 bypass and I81, there is a strong economic connection in which people from these areas engage significantly in employment, shopping, fine dining and commercial/banking and legal transactions. Those of us 'on top of the mountain' head North to Roanoke, rarely South for commercial transactions. Large centers of employment in all three localities share the majority of employees from within these three areas. The most significant connection, and one that would be severed under a mapping strategy that separates Roanoke City and the Blacksburg/Radford area, is the myriad educational ties among Virginia Tech, Radford University and the Carilion medical complex.
These communities are inextricably bound together and deserve cohesive representation in government.
Thank you for taking this comment into consideration.

Good morning,
I believe Senate Districts 4 and 5 are poorly drawn. Blacksburg, Christiansburg, and Roanoke should be in one district. There are many ways these regions are connected. The Smartway Bus has stops in these three localities daily, including to the train station and the airport. The Virginia Tech Medical School and Fralin Biomedical Institute have locations in both Blacksburg and Roanoke. There is also the Roanoke-Blacksburg Technology Council. Blacksburg has little in common with the rural counties in the district you are proposing. If it is not possible to have Blacksburg, Christiansburg, and Roanoke in the same district, then at least Blacksburg and Roanoke should be in the same district.

Thank you.
Jessica Bennett

Justices of the Court,
I have submitted my own comments for the record, and watched the testimony of many others who spoke to different concerns, whether valid or contrived, that they had with the maps.

One issue I have with the maps that were released by the special masters, is that while on the top they look to be like acceptable maps, around the edges when you dig deeper these maps actually do a lot to decrease the quality or representation afforded to all residents of our Commonwealth.

A benefit to having the legislature draw the maps, opposed to out-of-state special masters, is the members of the legislature have close connection with their communities.

I think the court should do everything it can to listen to experts on Virginia when it comes to adjusting the special maps. One of the Virginia experts many people have been saying should have an input is Ben Tribbett.

Ben posted very good comments on twitter (screenshots attached) and I wanted you all to have the chance to look them over and consider his comments when it came to map adjustments.

You can view his comments at
https://twitter.com/notlarrysabato/status/1472926722790424576?s=21

Ben Tribbett
@notlarrysabato

## You have until 11 am to make comments for the special masters to consider. Here are my thoughts on the draft maps. (Thread)

© Senator Scott Surovell @ @ssurovell • 2d
Redistricting public comment period CLOSES in 2 days so get your comments in ASAP to redistricting@vacourts.gov if you want them read or take 2 min online on the maps themselves! Senate - virginiaredistricting.org/legdistricting... House - virginiaredistricting.org/legdistricting... Congress - virginiaredistricting.org/legdistricting...

Ben Tribbett @notlarrysabato.43m
That was a great example of a backfire though as the special masters didn't seem to know enough about Virginia to see they were splitting the key military communities apart that have always shared Congressional reps. Saw lots of testimony on it, so hopefully they fix it.

## Ben Tribbett @notlarrysabato.42m

In regards to the new 7th CD- the special masters should decide what it actually is. They poorly drew a PWC centered district and a 95 centered district. They should pick one or the other and draw around that. Haymarket to Fredericksburg is dumb.

1

2

Ben Tribbett @notlarrysabato • 31m
Finally, the new Fredericksburg seat should actually be greater Fredericksburg, keep it simple when possible.
Q 1

I strongly oppose breaking Augusta County in half and separating its two independent cities from District 2. Staunton, Waynesboro, and all of Augusta County should be retained in District 2 as communities of interest, public school districts, regional school divisions, watersheds, economic development partnerships, cultural heritage and agriculture. These communities are strengthened by sharing representation in one Senate district and it would represent a significant loss to change that. Senator Hanger has represented this area well and has been a great champion for our communities.

Sincerely,
Jim Hinton

I am unalterably opposed to politically-motivated redistricting ("gerrymandering") of voting precincts. I have lost faith in local, regional and national governmental decisions as no political decision has been "for the people" in the last dozen years if not more.

It is time to sweep all elected non-representatives from office and begin anew.
Vote NO on politically-sanctioned gerrymandering.

Honorable Chief Justice and Justices of the Supreme Court of Virginia:
As a citizen and voter of the commonwealth for more than half a century, I have followed legislative redistricting for a least the last four iterations. I was somewhat hopeful that our latest effort would yield more equitable results than its predecessors, but I had concerns that the structure of the independent commission charged with drawing legislative boundaries would result in stalemate. Also, the presence of equal numbers of incumbent legislators and regular citizens on the body was antithetical to any semblance of independence from political influence.

The "court of last resort" stage in which the redistricting effort finds itself at this late date holds the promise, however, of producing what I would consider a fair outcome. The methodology applied to the task by the Special Masters removed the thumbs of self-interested legislators from the scale of justice and applied geographic and demographic data in what to my eye appears an unbiased manner. Although I as a voter with no political party allegiance believe that the controlling statute should have taken cognizance of the fact that I and others like me are an important part of the political landscape, I consider the work product of the Special Masters superior to what the previous approaches to redistricting created.

In reviewing other commentary on the proposal before you, I have noted sympathetically certain concerns from regular citizens about separations of select communities of interest. If substantiated by fact and remediable without a major unraveling of the larger portion of the redistricting tapestry, I would urge you to accommodate those constituencies. On the other hand, concerns from legislators about having to compete in the new state order with members of their own parties to retain their seats should be treated as the cost of doing business in a more equitable environment. At times the greatest service to the community consists of getting out of the way of progress.

Please let me know if you need additional information.

Yours truly,
Mark Geduldig-Yatrofsky, PO Box 50141, Portsmouth, VA 23703-0141, 757

My comment on the congressional map is as follows:
The Special Masters' proposed map needlessly splits Albemarle County. Albemarle and Greene are both part of the Charlottesville metro area and media market, and should be kept together in the 5th District.

To replace the lost population, Warren, Clarke and Page counties should be added to the 10th. Warren and Clarke are both part of the D.C. metropolitan area/media amarket. In addition, this would remove the need for any county splits in the 10th besides Spotsylvania. And it would eliminate the need to split Roanoke City from Roanoke County, which separates a community of interest.

While the Special Master's report claimed that it was not possible to draw a compact majorityminority district in the Richmond area that is above 33\% African American, this appears to have been incorrect. The proposed 4th district below is 38\% African American VAP, about the same as the current 4th (41\%), and would serve as an effective VRA district while remaining a compact, Richmond-centered district.

My overall proposed map is below. It is extremely compact and eliminates the split communities of interest in the Special Master's proposed map (that is, Charlottesville, Richmond, and Roanoke).

Good morning,
I'm a Navy veteran and resident of Virginia Beach and am writing to ask you to keep Military and veteran populations together as a community of interest. We are essential to the socio-economic strength of Hampton Roads and should not be split into different congressional districts. Virginia Beach and Norfolk not only have veteran communities in common, but we move between the communities regularly.
Naval Station Norfolk, Fleet Forces in Norfolk, as well as Air Station Oceana in Virginia Beach work so closely together and have active duty servicemembers who live in both localities. We deserve to have the same federal representation in order to best advocate for their interests.

Thank you for your consideration.

To the Honorable Donald W. Lemons, Chief Justice, the Honorable Justices of the Supreme Court of Virginia, and Special Masters,

The City of Waynesboro objects to the proposed House and Senate redistricting proposals. Noting our belief that the Staunton, Augusta, Waynesboro region is, at least locally, regarded as a community of shared interests, the City encourages the Masters to review the plan and would favor a plan that recognizes the common and shared interests of the two cities and Augusta County. The local governments work regionally provide key services and facilities such as the regional landfill, regional jail, social services, juvenile detention, Office on Youth. Further, the region more closely identifies and coordinates with counties and municipalities to the north on initiatives such as Go Virginia, the SAW MPO and the Workforce Development Board. The regional and cooperative work occurring among the localities relies, to some extent on coordination with and support from State Senator and House of Delegates member. As drawn the SAW region is split among two House districts. Divisions increase if the Harrisonburg and Rockingham localities are included. The configuration not support coordinated governance between the Commonwealth and the localities. Waynesboro's municipal leadership also objects to the reconfiguration of the second and third Senate districts.

Respectfully Submitted by Mike Hamp, City Manager on behalf of the City Council.

## THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

I have deep concerns about the way the maps drawn by the Special Masters split the communities of interest in the Richmond suburbs of Henrico and Chesterfield County into three different voting districts, in an apparent direct contradiction of their mandate. Two of these districts would now be anchored by heavily rural populations, with which we have little in common. There are strong economic ties between these two suburban regions, including the shared GRTC transportation network and a shared regional health care system. All three of the major health care providers, which are among the largest employers in the Richmond area, have patient care facilities in all three locations. I have personally used VCU Health providers in Richmond, Henrico, and Chesterfield in the past year. Many residents of these counties work in the other, or in Richmond, using highways that readily connect them. We have common interests of regional development and transportation that are not shared with the more rural areas into which we have been redistricted. We are diverse communities whose voices and racial composition are being diluted by this split. As a resident of Chesterfield County for 37 years, my community of interest includes the city of Richmond - where I commuted to work for 35 years - as well as Henrico - where I shop, use the park system, frequent entertainment venues, and have medical and financial services providers. There are numerous social and cultural ties connecting the Richmond suburbs in these two counties and the city of Richmond. Many retail and restaurant locations in both suburbs are frequented by residents of the other. The Richmond theatre community includes performance venues in Chesterfield and Henrico. My two favorite music venues are in Henrico. Chesterfield, Henrico, and Richmond share a Governor's School. Shalom Farms, which is the largest provider of fresh produce to Feed More, Central Virginia’s food bank, grows the bulk of their produce - over 500,000 servings on a site in Midlothian which is then distributed to families in need in Richmond, Henrico, and Chesterfield. My church belongs to a social justice network, RISC, which is comprised of congregations in Richmond, Henrico and Chesterfield that have actively engaged in the past several years on issues of housing, education, unemployment, student mental health, and gun violence prevention - with specific projects in Richmond, Henrico, and Chesterfield. The interests of these suburban communities west of Richmond will not be served by the proposed maps, which effectively take away our voice.

Sincerely yours,
Gail Christie

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Thank you for your work on this important redistricting effort.
I would like to offer comments on important problems with the existing maps on for the 69th and 71st districts. My main comment is that Williamsburg should not be moved into the 71st, as it does not have shared interest with Richmond suburbs or Upper Peninsula rural communities.

Williamsburg needs to remain in the 69th district, as it should not be separated from James City County. JCC and Williamsburg our really one mutual community that rely on many of the same services and have a shared economy.

Furthermore, Williamsburg has been separated from lower James City County, including Grove, in the current draft map. The history of the African American community in the Historic Triangle links the City and Grove in essential ways. Separating these two areas severs that historical link and shared community history and contemporary experience.

Thank you for your consideration.
Sincerely,
Andrew M. Rose

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Redistricting masters:
I live in the current 2nd Congressional District of Virginia, and I"m extremely concerned about the recently suggested and altered configuration of my district. Here's what worries me:

I live in Norfolk, where much of the military and it's bases are. That military presence is an enormous part of the economic lifeblood of our district. Those bases are located across Virginia Beach and Norfolk...we dearly need to have consistent representation, to coordinate advocating for the needs of our military and also the many thousands of people who depend economically on their presence. By splitting representation, our area loses that ability, and may cost us federal support.

Another critical reason not to split our district up as suggested relates to the environment, which is a critical concern for me. We depend on the health of our ocean and Chesapeake Bay, and need someone representing us who resides in this district and who has a vested stake in the environmental health of where we both live. The new map jeopardizes this increasingly critical issue.

The weird "J" shape configuration of the revised 2nd district would require driving through a large portion of the 3rd district to re-enter the 2nd...It is my belief that this sort of non-contiguous separation is exactly what redistricting is supposed to avoid.

I STRONGLY urge the special masters to reconsider their current map of the 2nd district and PLEASE allow for ONE representative to be the advocate for our economic and environmental future.

Thank you,
Allan Brum

Good morning. I am writing to challenge the latest redistricting map for the Congressional Districts. In particular, I feel that the 2nd District has been changed drastically which will affect the mutual communities of interest in our cities.
- There are large populations of military families and bases in the current district which share concerns that are best served by the same Congressional Representative.
- The coastal communities have environmental concerns that again are shared and benefit from working on solutions together. This is a major concern with catastrophic consequences if not dealt with immediately.
- I live in Virginia Beach on the border of Norfolk. Many of the residents in both of these communities live in one area and work in the other. It just makes sense that one person serves as their representative in Congress.
- Culturally speaking, Norfolk and Virginia Beach share similar interests in the Arts community with their museums, concert venues, and theaters.
- From what I have read, the new redistricting map splits up minority populations unfairly. In 2021, we should be putting racism behind us and moving forward to a just and equal representation in our government.

Please reconsider this map and restore the 2nd District to a more just and sensible representation of this area of Virginia. Thank you.

Sincerely,
Ellen J Clements

\section*{EXTERNAL EMAIL}

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Good morning,
Thank you for the work that the Court and the special masters have already put into the critically important and complex process of legislative redistricting. My name is Brittany Rose and I reside in the western portion of Henrico County here in the Richmond suburbs. I have provided public comment on every single map that was proposed by the redistricting commission, and I appreciate being given the opportunity on Friday to address you and your work. These comments are slightly expanded to include a few items that I was not able to fit within my 3 minutes of testimony.

As with many others from the Richmond suburbs and broader central Virginia region who have already testified and provided feedback on the interactive website, I have very serious concerns with how our region has been split apart in the proposed Congressional maps. The current proposal would carve my portion of western Henrico County, which is currently in CD7, into CD1 with largely rural counties stretching all the way to the eastern shore. It feels very much as though my community has been treated as simply a way to increase population in a district for another, disparate portion of the commonwealth. The Richmond suburbs, including Henrico and Chesterfield, share very real and tangible connections - economically, socially, through public transport infrastructure, and in many more ways that you have already heard about. Another example I would like to share is how our region is tied together through the provision of health services. When I have sought medical care for my children through the VCU health system over the course of the past year, we have been seen by providers at the main hospital in the City of Richmond, at satellite offices in Henrico, and as recently as Monday at a facility in Chesterfield. To split these three geographically close and inexorably tied localities into three separate Congressional districts (CD1, CD4, and CD5) simply does not make sense by any measure of what constitutes a community of interest.

I strongly support the approach taken towards CD7 in the Farkas Congressional maps that were proposed on Thursday evening. This proposal does a far superior job of recognizing central Virginia as a region with shared interests - particularly with the east/west orientation of CD7 as they have proposed compared to the north/south orientation of the current CD7 or the effective drawing and quartering of the Richmond region in the court's draft maps.

Regarding the state level redistricting, I have mixed feelings about the proposed maps for the House of Delegates where I would be drawn into district 57 comprised of part of western Henrico and eastern Goochland counties. On one hand, I appreciate that the court's proposal would not split up the significant Asian population in my area of Henrico as the current maps do and as many of the commission's proposed maps would have done. One the other hand, I have a concern about how the western portion of Henrico County has been split into four separate districts - two (HD58 and HD80) are comprised of just Henrico residents. In the other
two proposed districts, including mine - HD57 and HD59 - parts of western Henrico County are paired with neighboring rural counties. As with the proposed congressional districts, I feel that my community in western Henrico County has been split apart primarily to add population to surrounding rural counties instead of respecting our collective community of interest in Henrico.

Regarding the state Senate maps, I very much appreciate the fact that my portion of Henrico County would be drawn into a SD16, a district that is fully comprised of Henrico County. In fact, although Henrico would be split into three Senate districts instead of the current two under the current proposal, two of the three would be comprised fully of Henrico residents and the third would include similar communities outside of Henrico. This is the sole proposal in which I feel Henrico County has been fully recognized and maintained.

I request that you instruct the special masters to incorporate the input into the plan that they submit to you for your final consideration. Thank you for your time and for inviting and utilizing public comment on the legislative maps.

Sincerely, Brittany Rose

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

The New River Valley, particularly Blacksburg, Radford, and Christiansburg should be grouped together as representative of the New River Valley in each of the redistricting designs. This is an existing community of interest, and should not be connected with any parts of Roanoke/Salem. We have both university-related and non university-related interests that are in concert. The New River Valley should be celebrated as a true compact community of interest. Our mountainous rural environment surrounding the New River is a significant feature of the state of Virginia and we deserve recognition and encouragement in all state decision making processes.
Respectfully, Mary Alice Barksdale, 618 7th St., Radford, VA, 540-818-8620

December 20, 2021
Clerk of the Supreme Court of Virginia
Re: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A (comments on proposed redistricting map of Chesterfield County)

To Whom It May Concern,
Chesterfield County has been for my family a single community, its residents linked by shared government, shared opportunities, problems and solutions, shared transportation arteries, school opportunities, employers, shared networks of medical care and other services, shopping opportunities...much like a sprawling city. Our 37 years in Chesterfield has always felt like an experience within one community-living in 2 of its neighborhoods, sharing the upbringing of our 3 children with county schools, supporting our church, appreciating arts and recreational opportunities, mostly along a 5 mile stretch of Hull Street Rd. Yet the proposed map splinters those 5 miles into 3 districts. Our community should "remain whole" to a greater degree than the proposed map allows and shouldn't arbitrarily be split multiple times.

Our county is increasingly politically "competitive," another value that must be defended in new maps. This competitiveness has been quite evident in races up and down the ballot, and I believe electoral competition is essential for responsive government. Yet, rather than preserving this increasing competition for future House races, the new map splits Chesterfield into 3 noncompetitive districts.

Chesterfield is also now racially and culturally diverse. This matters greatly to us, to our church and its justice-seeking mission. With more than \(40 \%\) non-white voters in the 2020 census, Chesterfield's diversity could have been honored by creating minority "opportunity districts"-another value that should be defended in new maps--where one constituency could have an amplified voice by allying with other groups. Instead, by chopping up the county into vertical slices, the proposed map "packs" much of our minority vote into a single House district (76). This may have been an oversight, but it appears to go against the letter and spirit of our new redistricting laws, smacking of racial gerrymandering.

Thank you for considering these concerns.
Herschell Emery

I want to write and comment about the Supreme Court of Virginia's first proposal for the House of Delegates and Senate redistricting.

I believe that the New River Valley will be poorly impacted by both maps. In the Senate, it makes sense to pair Blacksburg, Radford and Roanoke together. These areas have similar economies and also the tie between Virginia Tech and Roanoke is such an important driver of this area's growth. Pairing most of Blacksburg with a district that includes Tazewell, Wytheville and Marion doesn't make sense and feels like a partisan attempt to split up a Democratic area. Even more important is the HoD proposal, Radford and Blacksburg have so many similarities that make sense to combine for a single HoD seat. They are both university towns, with deep connection to the NRV. Please keep Radford and Blacksburg together in a single district!

Best,
James Harder

To Whom It May Concern: I am a citizen of Roanoke County, Town of Vinton. I do not support separating the town of Vinton from the rest of the Roanoke Valley and lumping it in with communities from which it is geographically and socially isolated, seemingly for political purposes. In general, Congressional districts should be geographical. They should combine communities that are geographically close and socially knit together. This also intrinsically avoids re-drawing district boundaries to favor certain political entities or parties and also avoids segregating districts by race, as has been attempted in the past. Therefore, I strongly support keeping Vinton together with the other communities in the Roanoke Valley and NOT grouping it with communities as far removed as Staunton, which otherwise would have no connection with Vinton.

\author{

}

December 20, 2021

Supreme Court of Virginia 100 N. \(9^{\text {th }}\) Street
Richmond, Virginia 23219
To Whom It May Concern,
I am reaching out to express my concern regarding the Congressional District Maps proposed by the Special Masters as part of the Virginia redistricting requirements. Specifically, I would like to address Congressional Districts 2 and 3.

I have lived in Norfolk all 43 years of my life, and have served on the Norfolk City Council, representing Ward 5 since 2010. Ward 5 borders Virginia Beach and includes entrance gates in Norfolk to the Joint Expeditionary Base - Little Creek. Ward 5 also includes all of the main gates into Naval Station Norfolk. In addition, Ward 5 also includes just over six miles of Norfolk waterfront on the Chesapeake Bay and includes water entrances to the Joint Expeditionary Base. Serving Norfolk citizens these last 12 years, gives me a unique perspective when discussing communities of interest.

I can appreciate the Special Masters working to keep boundaries as compact as possible which is evident in the proposed \(3^{\text {rd }}\) Congressional District. However, the elongated \(2^{\text {nd }}\) Congressional District is not compact, and by moving military installations located in Norfolk out of this district, it splits communities of interest in Hampton Roads.

Military and veteran populations that are essential to the socio-economic strength of Hampton Roads should not be split in the congressional districts. Naval Station Norfolk, Fleet Forces in Norfolk, as well as Air Station Oceana in Virginia Beach work so closely together and have active duty servicemembers who live in both localities. They deserve to have the same federal representation to best advocate for their interests. Norfolk communities in Ocean View which is in Ward 5 and those bordering Naval Station Norfolk and Little Creek overlap with Virginia Beach as a community of interest. Many of the residents here cross city lines regularly for work and have more in common with Virginia Beach than other neighborhoods and localities that will be in the proposed new \(3^{\text {rd }}\) Congressional District. Isle of Wight \& Suffolk which would now be in the new \(2^{\text {nd }}\) Congressional District share more economically and culturally with Portsmouth in the 3rd than they do with Virginia Beach.

December 20, 2021
Page Two

The Ocean View and waterfront parts of Norfolk and Virginia Beach specifically should be together in federal representation due to their shared environmental concerns. Reports by leading environmental scientists state that sea level could rise by several feet along our shores by the end of the century should be raising serious alarm. Beyond the human cost of that disastrous possibility, the economic and infrastructural damage such a change could inflict on these communities is unthinkable.

It is clear to me that the Special Masters prioritized not splitting localities at the expense of splitting communities of interest in Hampton Roads. If this is allowed to proceed, I am concerned about the diluted representation our military installations and population will have in Congress.

Sincerely,

Thomas R. Smigiel Jr.
Councilman Ward 5

\section*{McLean Citizens Association}

The Voice of McLean for Over 100 Years

Post Office Box 273
McLean, Virginia 22101
December 20, 2021
Dear Justices and Special Masters,
I am writing on behalf of the McLean Citizens Association (MCA), which represents area households to local and state governmental bodies through a 40-member board of directions. We have served the interests of the Greater McLean community since 1914 and is the oldest civic association in Fairfax County.

We have reviewed the proposed redistricting maps for the Virginia Senate, Virginia House of Delegates, and Congress and are concerned that the Greater McLean community is split between neighboring districts in each proposal. While we understand many constitutional and statutory provisions are considered, for our purpose, these maps fail to preserve a community of interest (COI). The Greater McLean community shares a strong sense of "place" in orientation to our schools as well as public services, including police and fire protection, libraries, senior centers, and park facilities, of which these boundaries ignore.

The memoranda submitted by the Special Masters notes, "we acknowledge there are likely other communities of interest of which we are not aware. We look forward to receiving the commentary... of the public to help improve the map in this regard." We indeed hope for the maps to be improved upon and ask your consideration in keeping our historic Great McLean community together.

Thank you for your time and efforts on behalf of the Commonwealth.
Respectfully,

Robert H. Jackson
President

I oppose the plan to lump rural Giles county together with prosperous, rapidly growing Blacksburg. Having lived for more than a decade in Blacksburg and now for more than 20 years in Eggleston, I can assure you that the two do not form a rational community of interest. Giles County needs sustainable economic development, public transportation options for the isolated rural poor, and more resources to address a severe and worsening epidemic of addiction that both arises from and fuels the lack of hope and opportunity here. (For example, there is a desperate need for affordable housing for those recovering from addiction).

Giles County has great natural beauty and agricultural interests, both of which need to be preserved and developed sustainably to support local communities - for instance, with its access to the Appalachian Trail and the New River, it has great potential for expanded ecotourism that would preserve our natural resources and provide long-term economic opportunities in the community.
Giles County needs a representative who will recognize and work for its unique interests and for its residents. Blacksburg has a more affluent and on average more educated population whose demands would, I fear, likely drown out Giles County's urgent but differing needs. Instead, I believe Blacksburg and Roanoke form a far more rational community of interest and are much more reasonably paired in the same district. There are very strong economic and transportation links between the two, and VT has already expanded its campus to Roanoke by placing the Carilion School of Medicine there; they did not choose to bring that campus and its attendant jobs to Giles County.
I have spent the past five years running a children's book donation project, Open Book for the New River Valley, which works with numerous community partners such as Head Start, New River Valley Community Services, and the Giles Co. Health Department, and attend the Giles Co. focus group, which brings together representatives from these and many other organizations, as well as law enforcement, which has taught me much about the needs of our local communities. Please don't eviscerate our county's ability to work for its own interests by placing us in the same district with thriving, prosperous Blacksburg.

Sincerely,
Laura P. Livesay

To whom it may concern,

During my 4 years at Virginia Tech and in Blacksburg, I had the privilege to work on 3 campaigns for the House of Delegates in the current HD12. Despite being a brutal gerrymander that split the campus of Virginia Tech in half, this district saw multiple competitive elections. However, the newly proposed HD41, instead of better uniting communities of interest, divides Virginia Tech and Radford into separate districts while connecting Virginia Tech to communities even further away with even less in common. Speaking as a \(3 x\) organizer in this region, I can attest that this district, while nominally competitive, is unlikely to change hands this decade as drawn. I encourage the Court and special masters to once again unite Blacksburg with Radford while keeping Tech's campus whole. The resulting district will be highly competitive and give a chance for Virginia's youth- from either party- to influence who represents them in the General Assembly.

With Thanks and Happy Holidays,
William Barlow
Virginia Tech Alumnus '21
Resident of Blacksburg, VA

Dear Justices of the Supreme Court,

As President of the Greater Wilton Woods Citizens Association, I'm asking you to reconsider the proposed changes to the existing \(43^{\text {rd }}\) and \(44^{\text {th }}\) districts (the newly proposed \(16^{\text {th }}\) and \(17^{\text {th }}\) districts). The proposed changes will dilute our neighborhood voice in the Virginia legislature. By not considering community boundary lines and Fairfax County School District Pyramids lines the proposed changes cause unnecessary community splits in my area.

\section*{Boundary of the Greater Wilton Woods Citizens Association}

The Clermont precinct (423) and the Mt. Eagle precinct (408) should be included in in the new district 17. The new District 17 should mirror the current District 43 and to balance that, the new District 16 should mirror the current District 44.

Thank you and I hope you will consider and implement my comments.

Lawrence Dempsey
President, Greater Wilton Woods Citizens Association

Chief Justice and Justices of the Virginia Supreme Court,
Thank you for the opportunity to address the Court on Friday, December 17, 2021 regarding the proposed congressional map. I am providing my written comments as a follow up to my public testimony for the record.

Thank you,
Karen Mask

Good afternoon. My name is Karen Mask and I am a resident of Chesterfield County. To the Supreme Court Justices - thank you for allowing me the opportunity to address the Court today. Thank you also to the Court's Special Masters and administrative staff for their work during this process.

My family and I relocated to the Richmond metro area from Atlanta, Georgia in the summer of 2015. As we researched the various localities prior to our move, we discovered that the City of Richmond, Henrico County, and Chesterfield County were thriving intertwined communities that afforded great housing, employment, healthcare, and economic flexibility for families like ours. Ultimately, we bought a house in Chesterfield County so our sons could attend the county's excellent public schools. We have established healthcare relationships with providers in Chesterfield, Henrico, and even in Charlottesville. We are employed in Richmond and Henrico and, lastly, shop and enjoy entertainment venues in all four localities l've mentioned.

This background highlights the first issue I have with the December 8 Map - the map
tears apart Central Virginia communities of interest; including the Richmond,

Henrico, and Chesterfield corridor and the I-64 corridor from Western Richmond to Charlottesville. We must do better.

Secondly, the December 8 Map packs Black voters into congressional districts 3 and 4, effectively weakening the strength of the Black vote in the region. The 2020 Census demonstrated significant minority population growth in Virginia and the voices of these minority voters deserve to be heard. We must do better.

Thirdly, the December 8 Map disproportionately adversely affects the three Congresswomen currently serving Virginia and, subsequently, the constituencies they serve. My constituency, the current 7th congressional district, would be spread across 5 congressional districts in the new map. Similar disruptions to incumbent constituencies - meaning the communities who are served together under our current maps - would occur across the state, such as in the Hampton Roads area. Those responsible for redistricting have a duty to produce new maps that meet legal requirements while minimizing change. We must do better.

It has been suggested that there isn't a way to keep central Virginia communities together in the redistricting process. I respectfully disagree. The Farkas Map presented to the Court addresses the concerns l've outlined today, resulting in a fair map that complies with federal and state law. Specifically, the Farkas Map:
-
creates compact districts which maintain communities of interest while minimizing change
-
protects the voting strength of Virginia's growing minority population and
equally distributes voters across the 11 congressional districts
We must do better. The Farkas Map better addresses the redistricting needs of Virginia and I urge the Court to consider the Farkas Map in its deliberations. Thank you for your time.

The proposal to remove Norfolk from the 2nd district smacks of
Gerrymandering. Virginia Beach and Norfolk have similar environments and concerns and should not be separated.

Jerry Sovich

Clerk of the Supreme Court of Virginia
Re: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A (comments on proposed Senate redistricting map of Chesterfield County)

To Whom It May Concern,
By separating Chesterfield County, Henrico County and Richmond, the proposed map treats these communities as if they are not in fact a highly integrated "community of interest," its residents linked by opportunities, highway systems, employment opportunities, medical care and other services, shopping, arts and recreation.

As part of this community, Chesterfield County, where my family has lived for 37 years, is increasingly politically "competitive" and a new Senate map should preserve this positive quality that makes government more responsive to voters. Yet, rather than preserving this increasing competition, the proposed separation of Henrico, Chesterfield and Richmond from each other reduces competition. The effect becomes even more extreme with the further subdivision of both Henrico and Chesterfield along north-south lines, splitting each into noncompetitive districts.

Chesterfield is also now racially and culturally diverse. This matters greatly to us, to our church and its justiceseeking mission. With more than \(40 \%\) non-white voters in the 2020 census, Chesterfield's diversity could have been honored by creating minority "opportunity districts"-another value that should be defended in new maps-where one constituency could have an amplified voice by allying with other groups. Instead, by chopping up the county into vertical slices, the proposed map "packs" much of our minority vote into a single Senate district (15). The West-East subdivision of Henrico has the same undesirable impact on that county.

Thank you for considering these concerns.

As a resident of Virginia Beach for 46 years I've watched Virginia Beach change from a bedroom community of Norfolk to the largest city in the state. It is apparent that the Norfolk and Va Beach communities share the same interests and challenges. Our mutual military presence makes it easier for our legislators to address our concerns. The 2nd CD should continue to encompass Va Beach and Norfolk so we can more forward with what's in the best interests to support our military, wives, and children. Additionally we face the same new climate/ environmental challenges. Therefore please allow the 2nd Congressional District to remain intact.

\hline Dear Virginia Supreme Court:
\end{tabular}

I am writing to support the House and Senate maps created by the Special Masters. The borders do an excellent job representing communities of interest in Arlington while keeping our representation compact. Keeping communities of interest together, such as the Rosslyn-Ballston metro corridor, Halls Hill, and Green Valley, will keep our diverse community strong and represented. In addition, including Falls Church City along with Arlington also makes sense given we already share our judicial functions and several constitutional officers. Both the House and Senate maps accomplish this goal.

I urge the Supreme Court to adopt without change the proposed House and Senate maps that respect the unique and individual communities of interest in Arlington and Falls Church.

Respectfully,

Paula Potts
604 A N Tazewell St

COUNTY OF PRINCE EDWARD, VIRGINIA

December 20, 2021

Post Office Box 382
I I I N. South Street, \(3^{\text {rd }}\) Floor

\section*{VIA EMAIL@REDISTRICTING@VACOURTS.GOV}

Ms. Muriel-Theresa Pitney, Clerk of the Court
Supreme Court of Virginia
100 North 9th Street, \(5^{\text {th }}\) Floor
Richmond, Virginia 23219
Dear Ms. Pitney:
I write on behalf of the Board of Supervisors of the County of Prince Edward, Virginia, as we wish to provide input and express several concerns regarding the proposed Redistricting maps for the establishment of voting districts for the Virginia General Assembly.
1. The redistricting maps, as proposed, have split the County of Prince Edward between two Senate Districts and two House of Delegates Districts. For a small rural community, this separates our community of interest essentially in four different directions. By carving up our county into four dissimilar General Assembly districts, Prince Edward County's voice in the Virginia General Assembly is minimalized.
2. The current House of Delegates map could make it virtually impossible for the County of Prince Edward to meet the equal population requirement for state legislative districts. As currently drawn, the Prince Edward County population included in House District 56 totals 2,890 people. The optimum population for our eight local election districts is 2,716 . This is a deviation of 174 people, or \(6.41 \%\). Two issues come into play using the current map:
a. The U.S. Supreme Gourt has held that local election districts are subject to the-substantially equal population standard. The County of Prince Edward should have populations that are substantially equal to each other, with a plus or minus five percent deviation from the ideal district population. The current map creates a \(+6.41 \%\) deviation for the County's District 2 (Lockett); and
b. Section 24.2-307 of the Code of Virginia, 1950, as amended, reads: "Each precinct shall be wholly contained within a single congressional district, Senate district, House of Delegates district, and election district used for the election of one or more members of the governing body or school board for the county or city." If the current House of Delegates map is approved, the County is locked into keeping local District 2 (Lockett) as drawn in order to meet the requirements of the Section 24.2-307. This puts the County in violation of the substantially equal population standard.

While the Board of Supervisors unanimously opposes the injurious subdivision of our county by the draft plan, pragmatically, we would ask the Court, at a minimum, to consider one change to the House of Delegates districts map. Moving one Prince Edward County Census Block (we provide the attached map highlighting an example of a block that could be moved) from House District 56 to House District 50 (from local District 2 into local District 3) will cure the local issues outlined above and enable the County of Prince Edward to comply with the substantially equal population standard and the requirements of Section 24.2-307 of the Code of Virginia.

The County of Prince Edward is most appreciative of this opportunity to provide input and we thank the Court, in advance, for its consideration of our input and concerns. We stand ready to answer questions and provide additional information, if needed.

Linited States \(\mathfrak{S e n a t e}\)
}

December 20, 2021
Ms. Muriel-Theresa Pitney
Clerk of Court
Supreme Court of Virginia
100 N. 9th Street, 5th Floor
Richmond, VA 23219
Dear Ms. Pitney:
We are writing to offer comment on the Special Masters' proposed Congressional Districts Map released on December 7, 2021. While the intention of the proposed map was to balance a number of competing considerations to create fairer maps, the result instead places the heavy weight of change on the three women in the delegation.

In 2009, there were no women representing Virginia at the federal level. Although Virginia had previously elected two women to the House of Representatives, a woman did not join our delegation again until 2011 and we did not have multiple women serving in our delegation until 2019. The three women in our delegation have served with distinction since being elected and now advocate for the interests of their districts and Virginia on key committees in Congress.

Although the proposed map makes some changes to each of Virginia's eleven Congressional Districts, the most impactful geographic changes occur in the three districts currently represented by women. The women representing Virginia's second and seventh districts would no longer live in the districts that they have now been elected twice to represent under these proposed maps. Additionally, Virginia's tenth district- also represented by a woman - was significantly redrawn.

This is not intended to be a partisan critique of the proposed maps. We are submitting these comments because we believe it is possible to spread the burden of changing district lines across the entire delegation rather than asking the women in our delegation to shoulder a disproportionate burden. Thank you for your consideration.

Sincerely,

Mark R. Warner
United States Senator

Tim Kaine
United States Senator

\end{tabular}

\section*{EXTERNAL EMAIL}

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Dear Justices,
Districts should be compact so citizens can have greater access to their legislators. The same partisan voices that inflicted the 2011 Senate gerrymander on our region want to again needlessly slice and dice the Roanoke Valley, New River Valley, and Staunton for partisan goals. These are different communities as represented by their different advocacy organizations, education systems, hospitals, and commuter habits.

Advocacy Organizations
Business interests have collectively organized in these distinct communities as the Roanoke Regional Chamber of Commerce; the Montgomery County Chamber of Commerce; and the Greater Augusta Regional Chamber of Commerce. The NAACP has three distinct branch chapters serving these regions including the Roanoke Branch NAACP; the Montgomery County - Radford City - Floyd County NAACP; and the Staunton NAACP. The local governments of Roanoke City, Roanoke County, the City of Salem, and the Town of Vinton collectively advocate with others through the Roanoke Valley-Alleghany Regional Commission; Montgomery County, Radford, Blacksburg and Christiansburg are all part of the New River Valley Commission; and Staunton is part of the Central Shenandoah Planning District Commission. Charities are similar organized in these regions with the United Way having three distinct chapters in each of these three communities.

\section*{Education}

Virginia's K-12 school systems are almost exclusively organized by county and city and splitting jurisdictions usually means splitting local school communities. Even at the community college level these are distinct communities. Community college students from Roanoke County, Roanoke City, Salem, and Vinton attend Virginia Western Community College; Montgomery County, Radford, Christiansburg, and Blacksburg students attend New River Valley Community College; and Staunton students attend Blue Ridge Community College

Hospitals
Roanoke County, Roanoke City, Salem, and Vinton are served by Carilion's Roanoke Memorial Hospital and HCA's LewisGale Hospital. Montgomery County, Radford, Blacksburg, and Christiansburg are served by the Carillion New River Valley Medical Center and HCA's LewisGale Hospital Montgomery. Staunton is served by Augusta Health.

Commuter Habits
The picture of these communities is also reinforced by the Weldon Cooper's March 2018 report, Virginia Locality-to-Locality Commuting Data.
Roanoke County's top commuting partners are Roanoke City, Salem, and Botetourt County. Roanoke City's top commuting partners are Roanoke County, Salem, Botetourt County, and Franklin County.
Salem's top commuting partners are Roanoke County and Roanoke City.
Montgomery County's top commuting partner is Pulaski.
Radford's top commuting partners are Montgomery and Pulaski.
Staunton's top 7 commuting partners do not include any community south of Augusta County.
When joining with like-minded citizens, seeking education, seeking healthcare, or going to work it's clear that the Roanoke Valley, New River Valley, and Staunton area have distinct, recognizable communities.

The legislative districts serving citizens in these regions should be drawn compactly to increase access to their legislators and not needlessly divided for partisan purposes.

Thank you for your consideration,
David Suetterlein

The Special Masters' plan continues the split with the Counties of Lancaster, Northumberland, Richmond and Westmoreland from the 2010 redistricting.
Prior to 2010 redistricting these counties comprising the "Northern Neck of Virginia" and had been represented by Senator Richard Stuart, John Chicehect and Paul Mann which goes back for my voting lifetime(I am 64 currently).

These counties have been connected to various regional government bodies just as long or even longer. They are part of the 15th Judicial District, the Northern Neck Planning Commission \#17, Three Rivers Health Department, Northern Neck Technical Center, and the Middle Peninsula-Northern Neck Counseling Center(CSB).

These counties have an extensive number of common interests and long term connections. Splitting these counties apart hurts regional cooperation and joint plans.

I respectfully request that these counties remain intact and together as they did prior to the 2010 redistricting process.

Respectfully submitted,
Thomas H. Tomlin

To Whom It May Concern:
I am a citizen of the Town of Vinton of Roanoke County. I do not support separating the town of Vinton from the rest of the Roanoke Valley and lumping it in with communities from which it is geographically and socially isolated, seemingly for political purposes. In general, Congressional districts should be geographical. They should combine communities that are geographically close and socially knit together. This also intrinsically avoids re-drawing district boundaries to favor certain political entities or parties and also avoids segregating districts by race, as has been attempted in the past.
I strongly support keeping Vinton together with the other communities in the Roanoke Valley and NOT grouping it with communities as far removed as Staunton, which otherwise would have no connection with Vinton.
Thank you
Cheryl Brooks
641 Ramada Rd, Vinton, VA 24179

Clerk of the Supreme Court of Virginia
Re: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A (comments on proposed Congressional redistricting map for Chesterfield County)

To Whom It May Concern,
As long-time residents of Chesterfield County, my family has experienced Greater Richmond as a single "community of interest" where shared opportunities, problems and solutions link diverse groups in countless positive ways. The proposed map fails to acknowledge the vital connections and shared interests of Chesterfield County, Henrico County and Richmond. By splitting our area apart along north-south lines, the proposed map dis-integrates our community. Worse yet, the map for Chesterfield then quite strangely links our community's districts with rural communities to the West. Clearly this does not create coherent Senate districts around voters with shared interests, needs, concerns!

Furthermore, this mis-match reduces "competitive" districts in Chesterfield, which has become increasingly competitive. Competitive districts were supposed to be valued in the new maps, as they encourage responsive government. By joining of our community to rural ones to redraw our maps, the new map sacrifices competition and representation for both urban and rural communities.

Thank you for considering these concerns.

I am writing to comment on the proposed VA House of Delegate \#72 map as well as the US Congressional District \#5. I am a resident of Midlothian precinct \#504, currently in US District \#7 and the VA House of Delegates District \#68. I urge you to revisit the consequences of separating Midlothian (particularly in HOD Map District \#72) from our true communities of interest in Chesterfield and the greater Richmond area.

I have been working, along with many others, to strengthen the public transportation services provided by the Greater Richmond Transit Company (GRTC) in the greater Richmond Metro area, in order to help people in the Metro area, especially the many who don't own cars, to access employment and vital services. I have served as a community volunteer since 2013, representing my church (located in the city of Richmond), along with RVA Rapid Transit, a non-profit organization advocating for public transportation in the Richmond Metro area. I fear the proposed US map \#5 and VA map \#72 would diminish our voices as advocates for the vital maintenance and extension of the public transportation system in the counties of Chesterfield and Henrico if we were represented by officials who would be focused on the very different transportation challenges of their rural constituents in Powhatan, Amelia, and Nottoway counties. Thank you for considering my comments.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Dear Sir/Madam,
I would like to take this opportunity to provide public feedback regarding the redistricting map of Va. presented by the courts. My comments focus on districts 69 and 71.

They are as follows:
1. Williamsburg has been separated from lower J ames City County, including Grove. The history of African Americans in the Historic Triangle links the City and Grove. For that reason, they should not be separated.
2. Lower James City County and Williamsburg rely on many of the same services in the Williamsburg area, such as transportation, healthcare, and social services.
3. The 69th district picks up a small portion of Gloucester. This is a very different community and should be part of a district that is on the other side of the York River with the rest of Gloucester County. This makes no sense and should be removed from the 69th district.
3. The new maps put Williamsburg in the 71st District, which runs all the way to Providence Forge. Williamsburg has always been part of Hampton Roads. This puts Williamsburg with other communities that extend up into the Richmond area instead of keeping it with other Hampton Roads communities. This needs to be rectified and remain in the Hampton Roads geography.

To make this make map more balanced and fairer, it is my recommendation to add Williamsburg back into the 69th and remove the portion of Gloucester from the 69th.

Looking at the redistricting map of Va. overall, there are several glaring deficiencies, including-

The December 8 Map fails to achieve population equality while fully abandoning a modest change approach. The December 8 Map appears to impermissibly use race as a predominant factor.
The December 8 Map fails to respect communities of interest.
I believe the Farkas Map accounts for Virginia's population changes while ensuring compliance with federal and Virginia law. The Farkas Map provides equally
apportioned districts that are compact, share common community interests, and protect the voting power of Virginia's increasing racial and ethnic minority populations, consistent with all applicable laws and legal precedent. The Farkas Map achieves the goals that are more fully and consistent than the Special Masters' December 8 Map. It is my recommendation to use the Farkas Map as a template moving forward in this process.

The Virginia Supreme Court has an opportunity to come up with a plan for redistricting that will be a beacon for the rest of the country to emulate. Do not waste this opportunity or fall short of your responsibility to do what is best for this great state.

Thank you for your time and attention to this email.

Dear Sirs,
I am Joseph Reynes. I live at 401 Warren Crescent, Norfolk Virginia 23507. You can reach me at my e-mail jreynesf16@aol.com or phone 757-719-0323. I am against the proposed redistricting plan as currently laid out.
I would like to voice my displeasure and non-support for the proposed redistricting plan put forward. As a retired veteran of 35 years service and a 12 plus year resident of Virginia this proposed redistricting is not just biased in is unfair to veterans who serve their country and chose this area to live.
This plan will break the military and veteran populations that are essential to the socio-economic strength of the Hampton Roads area disadvantaging those who have served our country and continue to serve.
As an independent I was also disappointed that this plan unfairly targets three sitting women representatives and three register democrats in what is called fairness. The single act of placing these representatives out of their current districts places them at a disadvantage and does not represent the fairness of our forefathers. I could understand a split between parties and gender. But this appears to be a targeted messages against all women and democrats when we as a nation need to looking towards how we heal and understand our differences.
Bottom line: I do not agree or support the proposed redistricting plan as current laid out. We need to fix the current challenges to fairness but this plan does not do that and is even worse than what we have now. We need a bipartisan effort that includes, both parties and independents to make that happen.

Sincerely,

Joseph Reynes

Your Honors, Virginia Redistricting Special Masters, and fellow Virginians,

My name is Lawrence Knorr, my wife, Karen, and I live in Midlothian, Va. We moved here in 2005 to continue my employment with DuPont, which has a large manufacturing and R\&D facility in the Richmond city area. I found this was very common where I worked and lived; people working in and by the city and living in the surrounding smaller communities in Chesterfield and Henrico. Our first night here we and our young son, Daniel, went to a Flying Squirrels baseball game at the Richmond Diamond. The first of many trips there. Within a short period of time he began playing on the FC Richmond Travel soccer team and I became active in the Richmond Dive club. We learned about and started participating in the many cultural events, festivals, activities, and opportunities associated with being close to the city; concerts, heritage festivals, outdoor activities associated with the James River...

Over the years we have enjoyed and benefited from living close to Richmond, and Richmond has benefited from the many people like us who don't live there, but are close by and give of our time, talent, and treasure to activities and causes we care about and can marshal around due to their being a center of gravity which the city's size, breadth and diversity enables. Similarly, our local community benefits from the people who gain their economic security from employment in the city. We shop nearby and support local merchants, invest in our homes and neighborhoods raising property values and allowing higher funding of schools and support to our local community services and charities. Its clear this is our community of interest, and its a win win and our elected representatives should have squarely in the center of their responsibilities and priorities.

Our elected representatives need to put their energies into enhancing and growing this mutually beneficial relationship between Chesterfield, Henrico, and the city of Richmond; actively attracting potential new employers while aiding with legislation to keep the city attractive to current and potential future ones. They also need to understand the needs and realities of the surrounding communities that end up providing much of the people resources needed to successfully operate businesses. The communities need to stay attractive as places to live in to attract the talented people who the companies need. We've all seen what happens when a significant employer leaves an area; large numbers of house sales that need to happen quickly, property values decline, and the whole community is negatively impacted. We need coherent, unified legislative representation that can only be realistically provided by having the same person represent our full community of interest. I believe this is a key reason the communities of interest criteria is a key provision of the redistricting effort.

The current redistricting maps further divide the communities of interest of Chesterfield, Henrico and Richmond beyond what is required by the guiding criteria. If accepted, I will live in a voting district that is more gerrymandered than before, largely dominated by rural voters who do not share my same community of interest, needs and desires. I urge you to keep these areas together as much as possible.

It is crucial at this period in time when the foundations of democracy, our voting and election processes, are under attack that this redistricting be done extremely well. I understand this has been very contentious, a large amount of effort has been spent, and there are many special interests, barriers, and realities. It is now to the courts to decide. I urge you to do what in your heart of hearts you know is right, even if it is not the path of expediency. You are the final decider because there is confidence that we are still a country that operates under the rule of law, and you will. This is too important to not have it done very well; for us now, and for our future. I urge you to be open to all avenues to get us to the desired end result, regardless of where they come from. Your service is very appreciated, as is this opportunity to present to you.

Muriel-Theresa
Pitney
Supreme Court of
Virginia
Street, 5th Floor

\section*{Clerk of Court}

100 North Ninth
Richmond, Virginia 23219-

Dear Madam Clerk:

My name is Shaun Brown, I am a lifelong resident, born and raised in Virginia, attending Brown University, The London School of Economics and St.Hilda's College, Oxford University. I urge this Court to reject the voting maps submitted by the Special Masters because they sharply limit the number of majority-Black Senate and House Districts throughout Virginia.

My first experience with speaking out and fighting the lawsuits and backroom negotiations to dilute the vote of Black Virginians started when I graduated and returned home from Brown University in 1980 soon becoming one of the youngest members of the Democratic Party's Central Committee representing Newport News. On the Peninsula, the City of Newport News, led the way for single member districts at the local level. That set the tone for a single member district fight for House of Delegate seats that would insure not just Black representation but Black representation that reflected the neighborhood, socio-economic and class issues of the community. More than just securing a Black face, the neighborhood and community consensus, was to insure a Black face that was tied to the community. At that time there were several vibrant civic and community organizations throughout the City of Newport News, not just in the Black community. This issue of the type of Black representation was a problem for the House of Delegate, State Senator, now Congressman Bobby Scott who fought against us in favor of multi-member House of Delegate Districts. The thinking was that there was a need for a Black representative that could better serve the Black communities' interest by using leverage by negotiating an agenda, and placing the needs of all, over the specific needs and issues of the Black community. Congressman Scott intervened and derailed an agreed-upon plan for the drawing of City Council districts in Newport News, under the Department of Justice purview at that time. The City of Newport News was one of the last cities in the United States to integrate its school system.

The local NAACP, former Councilwoman and Mayor, Virginia Democratic Party's Vice Chair Jessie Rattley's public hearing consensus and the Newport News Republican

Party all agreed on six single member districts in Newport News with the mayor elected at large. At the time, the mayor was selected by the council. The intervention resulted in three districts (south, central and north) with 2 members each with the mayor elected at large in Newport News which has not always served the Black communities' interest, as anticipated in the 1980s. Congressman Bobby Scott, former Councilmember Charles Allen (now deceased), and local civil rights Attorney Oscar Blayton, we were told, met with the Justice Department officials who were waiting for the public hearing and community meeting outcome. They derailed the agreed on single member district plan.

Today's maps remind us of that same fight from the 1980s, in Newport News and around Hampton's school board seats district lines. Asking the Black community to once again place our issues behind and aside, reminds me of when I was told early on that the Virginia Democratic Party would concentrate on the needs of the middle class White Virginians. It was the impact of the then Democratic Leadership Council that was not in the Democratic Party, but an unofficial effort formed outside of the Party to move the Party to the center. Much of that strategy in moving the Party to the center to break the Republican stronghold then as it is now undermines the needs of Black Virginians and other protected groups.

During the 1980s until now, I have served as a member, executive committee member, founder or President of many organizations including Newport News'Neighborhood Council 24-34A Inc, (civic organization); Hampton's Coalition for Justice, (statewide civil rights); YWCA of the Virginia Peninsula, board member under 30 and in the 2000s; Candidate for Democratic Nomination, 2nd Congressional District,Virginia 2018, (Certified as a Independent-Ballot Controversy); Democratic Nominee, \(2^{\text {nd }}\) Congressional District, Virginia (2016); Progressive Democrats of America 2016; 2016 Bernie Sanders for President National Delegate the Democratic National Convention; Rev. Al Sharpton's National Action Network, Virginia Representative ; Founding Board Member of The Newport News Community Free Clinic; Save Our Southeast; Restore Inner City Peace (cease fire); as well as continuing to work with numerous candidates for local, state, and national office, including my own runs for city council, the Virginia House of Delegates, \(95^{\text {th }}\) District and Congress. I have been on the frontline fighting child hunger, gentrification, police shootings, coal dust environmental racism, police brutality, mass incarceration and fighting for voting rights, small businesses, entrepreneurs , inner city and rural economic development, real local police accountability commissions for each city or county, industrial development, removal of Confederate monuments, jobs, prison reform and affordable housing. These are all issues along with kitchen table issues that can be directly impacted by like minded neighborhood and community focused elected representatives in Virginia at all levels of public office. This is not a new fight. It is an

\section*{important fight for the very essence proclaimed by the Emancipation Proclamation that took until the 1960s to reach much of Hampton Roads.}

Section 2 of the Voting Rights Act prevents "a denial or abridgement of the right of any citizen of the United States to vote on account of race or color." 52 U.S.C. § 10301(a). Such a "denial or abridgment" occurs if "the political processes leading to nomination or election in the State or political subdivision are not equally open to participation" by members of a protected class "in that its members have less opportunity than other members of the electorate to participate in the political process and to elect representatives of their choice." Id. § 10301(b).

If approved, the Special Master's maps will reduce the number of Senate Districts to two, and the number of House Districts to five. Reducing majority-African American voting districts by more than half harms Virginia's Black Americans. But again, members of the Court, this is not a new story for Black Virginians.

Yes, I have highlighted the City of Newport News. But again, let us now forget the Emancipation Proclamation some 158 years ago and the harm of not freeing all Black Virginians in now West Virginia, including Berkley, Accomac, Northampton, Elizabeth City, York, Princess Ann, and Norfolk, including the cities of Norfolk and Portsmouth in 1863.

\section*{Transcript of the Proclamation}

January 1, 1863
A Transcription
By the President of the United States of America:

\section*{A Proclamation.}

Whereas, on the twenty-second day of September, in the year of our Lord one thousand eight hundred and sixty-two, a proclamation was issued by the President of the United States, containing, among other things, the following, to wit:
"That on the first day of January, in the year of our Lord one thousand eight hundred and sixty-three, all persons held as slaves within any State or designated part of a State, the people whereof shall then be in rebellion against the United States, shall be then, thenceforward, and forever free; and the Executive Government of the United States, including the military and naval authority thereof, will recognize and maintain the freedom of such persons, and will do no act or acts to repress such persons, or any of them, in any efforts they may make for their actual freedom.
"That the Executive will, on the first day of January aforesaid, by proclamation, designate the States and parts of States, if any, in which the people thereof, respectively, shall then be in rebellion against the United States; and the fact that any State, or the people thereof, shall on that day be, in good faith, represented in the Congress of the United States by members chosen thereto at elections wherein a majority of the qualified voters of such State shall have participated, shall, in the absence of strong countervailing testimony, be deemed conclusive evidence that such State, and the people thereof, are not then in rebellion against the United States."

Now, therefore I, Abraham Lincoln, President of the United States, by virtue of the power in me vested as Commander-in-Chief, of the Army and Navy of the United States in time of actual armed rebellion against the authority and government of the United States, and as a fit and necessary war measure for suppressing said rebellion, do, on this first day of January, in the year of our Lord one thousand eight hundred and sixtythree, and in accordance with my purpose so to do publicly proclaimed for the full period of one hundred days, from the day first above mentioned, order and designate as the States and parts of States wherein the people thereof respectively, are this day in rebellion against the United States, the following, to wit:

Arkansas, Texas, Louisiana, (except the Parishes of St. Bernard, Plaquemines, Jefferson, St. John, St. Charles, St. James Ascension, Assumption, Terrebonne, Lafourche, St. Mary, St. Martin, and Orleans, including the City of New Orleans) Mississippi, Alabama, Florida, Georgia, South Carolina, North Carolina, and Virginia, (except the forty-eight counties designated as West Virginia, and also the counties of Berkley, Accomac, Northampton, Elizabeth City, York, Princess Ann, and Norfolk, including the cities of Norfolk and Portsmouth[)], and which excepted parts, are for the present, left precisely as if this proclamation were not issued.

And by virtue of the power, and for the purpose aforesaid, I do order and declare that all persons held as slaves within said designated States, and parts of States, are, and henceforward shall be free; and that the Executive government of the United States, including the military and naval authorities thereof, will recognize and maintain the freedom of said persons.

And I hereby enjoin upon the people so declared to be free to abstain from all violence, unless in necessary self-defence; and I recommend to them that, in all cases when allowed, they labor faithfully for reasonable wages.

And I further declare and make known, that such persons of suitable condition, will be received into the armed service of the United States to garrison forts, positions, stations, and other places, and to man vessels of all sorts in said service.

And upon this act, sincerely believed to be an act of justice, warranted by the Constitution, upon military necessity, I invoke the considerate judgment of mankind, and the gracious favor of Almighty God.

In witness whereof, I have hereunto set my hand and caused the seal of the United States to be affixed.
Done at the City of Washington, this first day of January, in the year of our Lord one thousand eight hundred and sixty three, and of the Independence of the United States of America the eighty-seventh.

By the President: ABRAHAM LINCOLN
WILLIAM H. SEWARD, Secretary of State
National Archives
I ask that you reject these maps in the name of a just life that can only be defined for me by Bible law, because of a liberation theology that was ingrained in me early at age nine when I recall playing hopscotch on my grandmother's sidewalk on 31st Street in Newport News, Virginia. I ran in the house for a cool glass of water passing the television reporting that Dr. Martin Luther King had been killed. I looked up at my grandmother more than once who was seasoning the chicken to fry in the brown paper bag and making hot rolls. Seemingly not phased, the First Gravel Hill Baptist Church Deaconess, Caroline Melinda Rowlett Hill, simply said to me "remember he said that he may not make it there with us". My grandmother had boarded the bus in Newport News, Virginia to attend the "March on Washington in 1963". She had heard Dr. King's " I Have a Dream Speech." As a kid that day in April 1968, I became a part of the "us" in the movement and understood that others had to carry on the fight. We are our brother's keeper and we must possess a righteous anger when people are not treated fairly. This practical wisdom involves what I call a "perpetual sensitivity" to what a situation requires even when it is important to speak to the unequal use of government policies.

Is the promise of a promised land the same for all people? And who are the people? Your decisions in accepting or rejecting these maps will determine who the people are. Do we not have a right to be represented by people who are among us. It is beyond a civil right, it is a human right.

My Virginia Powhatan Confederacy family sought refugee in Black Virginia houses of worship so as not to perish, as a result of the creation of the British Proclamation and line of demarcation in the Western part of the State of Virginia in 1763. That too was a line drawn to "choose the people", a line that was drawn to keep the colonists east and Native Americans west. This Royal Proclamation of 1763 was very unpopular and angered the colonists. They felt the British wanted to keep an eye on them. By 1840, tens of thousands of Native Americans had been driven off of their land in the southeastern states and forced to go West in the Trail of Tears including my ancestors.

Finally, I ask that this Court recognize the relevance of ancient biblical laws, the foundation of our legal system, dating back to the "chosen people" in the Old Testament and the promise of a promise land in the covenant theology of the Book of Genesis and the Book
of Deuteronomy. You will determine the "chosen people" and control the promise of the promise land for Black Virginians in your decision here in the State of Virginia, the home of the first representative government in British North America in what came to be known as the "new world".

My hope is that you follow the 563 Commandment. Judge righteously. (Leviticus 19:15).

Respected Justices, I am writing to you very disappointed with the proposed redistricting maps whether they are for Congressional districts or Virginia House of delegates and senate. I live in Midlothian, shop in Chesterfield \& Henrico, our Hindu Temples are in Henrico, Chesterfiled and Goochland and I have volunteered in City of Richmond schools for many years. In short, Central Virginia area is integral to my living. By lumping Midlothian with rural 5th district, my family has nothing in common with that district. The proposed maps will harm regional cooperation related to Central Virginia in developing infrastructure, transportation(GRTC), education and many other cultural ties that exist now. The new maps will further divide rather than unite communities of common interests and have unintended consequences of Virginians losing confidence in electoral systems.

The redistricting must be done by keeping communities of interest together at the same time having contiguous and compact districts. It has been done before and can be done again.
Thank you.

\title{
THE FARMVILLE AREA CHAMBER OF COMMERCE forward, together
}

December 20, 2021

\author{
VIA EMAIL @, REDISTRICTING@VACOURTS.GOV \\ Ms. Muriel-Theresa Pitney Clerk of the Court \\ Supreme Court of Virginia \\ 100 North 9th Street, 5th Floor \\ Richmond, Virginia 23219
}

Dear Ms. Pitney:

I am writing on behalf of the Farmville Area Chamber of Commerce located in Prince Edward County, Virginia. We would like to offer input and express concerns regarding the proposed Redistricting maps for the establishment of voting districts for the Virginia General Assembly.

The redistricting maps, as proposed, have divided the County of Prince Edward by both Senate Districts and House of Delegate Districts. This separates our rural community, and divides the community into different directions, minimizing the County's voice in the Virginia General Assembly.

The current House of Delegates map will make it difficult for Prince Edward County to meet population requirements for state legislative districts. The current map potentially places Prince Edward County in deviation of the ideal district population.

We would ask the court to change the current draft plan by moving one Prince Edward County Census Block from House District 56 to House District 50, from local District 2 into local District 3. We believe this will allow the County of Prince Edward to comply with the substantial equal population standard and maintain the County's voice in the Virginia General Assembly.

The Farmville Area Chamber of Commerce is grateful for the opportunity to provide input and we thank the court for its consideration.

Respectfully,

Anne Tyler Paulek

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

To: The Honorable Justices of the Virginia Supreme Court
Our address in Henrico County is currently in Congressional District 7. Under the proposed redistricting plan we would be in C.D. 4. If it is not feasible for all of Henrico to be in the same district, we would like the portions of Henrico that are currently in district 7 to be included in new C.D. 1.

We are currently in Senate District 12. Under the proposed plan we would be in S.D. 14. We would like to see the boundary of proposed S.D. 16 moved farther east to incorporate our address.

We are currently in House District 72 but would be in proposed H.D. 80. We would like to see the boundary of proposed H.D. 57 moved farther east to incorporate our address.

Thank you for your consideration of our requests.
Faye Weems

Making the 5th district more manageable makes sense. The old 5th district was larger than the state of NJ. Having an area that large did not allow proper representation by a single individual.

To the Court:
I believe the proposed House of Delegates map needs significant modification, especially in House of Delegates Districts 69 and 71, the two districts that would include all of Williamsburg and J ames City County. Delegate Mike Mullin has recently moved to the 69th. Williamsburg is included in the 71st. Redistricting will make both House of Delegates districts very Republican if they aren't changed.
1. Williamsburg has been separated from lower James City County, including Grove. The history of African Americans in the Historic Triangle links the City and Grove. For that reason, they should not be separated.
2. Lower James City County and Williamsburg rely on many of the same services in the Williamsburg area, such as transportation, healthcare, and social services.
2. The 69th moves across the York River and picks up a small portion of Gloucester. This is a very different community and should be part of a district that is on the other side of the York River with the rest of Gloucester County.
3. The new maps put Williamsburg in the 71st District, which runs all the way to Providence Forge. Williamsburg has always been part of Hampton Roads. This puts Williamsburg with other communities that extend up into the Richmond area instead of keeping it with other Hampton Roads communities.

Regarding the state senate map, I request that Poquoson be put in the 23rd District (Hampton) for the following reasons:
1. It would preserve the community of interest that exists between Hampton and Poquoson. They have a shared geography as the Peninsula's two Atlantic-facing localities.
2. Both Poquoson and Hampton sit on the Back Bay River.
3. In 2019 the court adopted a special master-recommended House of Delegates District that consolidated parts of Hampton and Poquoson into one district.
4. Redrawing Districts 23 and 24 as suggested would put more of Newport News into the same district, minimizing splits in counties and cities.
5. The Newport News-Williamsburg Airport would be in the same district as Newport News and Williamsburg!

Thank you for your consideration.

Subject: 7th, 10th \& 11th Congressiona Districts
To: The Justices of the Virginia Supreme Court and the Special Masters:
Overall the proposed Congressional maps reflect a logical, rational approach that is consistent with the applicable criteria. A few minor adjustments would address many of the criticisms submitted to the Court. A proposed map is pasted below and can be found at https://districtr.org/plan/94818.

First, to address the many concerns raised by the citizens of Albemarle and Charlottesville and the areas surrounding Charlottesville, move the southerner border of the 10th District north to the Green and Orange County lines. This proposed 10th District is marked in the Gray Blue color.

Second, to address the many concerns raised by citizens in northern Spotsylvania County and the area surrounding Fredericksburg, move those northern Spotsylvania precincts from the 10th to the 7th Congressional District as reflected on the map pasted below and at the URL. This proposed 7th District is marked in the Light Green color.

Third, to accommodate the population impact of these two changes in the 10th District, move the eastern border of the 10th District at Loudoun County east to the Reston Parkway and the intersection of Reston Parkway and Wiehle Avenue, and east from Loudoun to Utterback Store Road as shown on the map pasted below and at the URL. This western portion of Fairfax County is closely aligned with the eastern portion of Loudoun County, and Reston Parkway, Wiehle Avenue and Utterback Store Road serve as natural defined boundaries.

Fourth, to ensure population balance for the proposed 11th District, move the southern boundary of the 11th District into Prince William County to incorporate Lake Ridge and Woodbridge which are closely connected in community of interests to the rest of the 11th District. The Prince William County Parkway forms a natural defined southern boundary for most of this District. This proposed 11th is marked in the Yellow color.

Fifth, to ensure population balance for the proposed 7th District, extend the boundary of the 7th District to include King George County and Caroline County. This change would also address some of the concerns raised that more of central Virginia should be included in the 7th.

Sixth, there are no changes to the Special Masters' proposed 8th District.

Seventh, there would need to be similar minor adjustments to the 1st and 5th to balance populations.

In summary, these proposed changes address many of the citizens' concerns, are balanced from a population perspective, are consistent with the communities of interests, and reflect the same political competitive balance as the Special Masters' maps.

Respectfully submitted.

Dear Virginia Supreme Court:

As an Arlington County voter, I am writing to support adoption of the Special Masters' proposal for the new State Senate and House of Delegates Districts as published.

The Masters worked free of the usual political considerations such as residency of current members and partisan complexion of localities. For perhaps the first time, incumbents have not been able to choose their voters, which almost everyone acknowledges has contributed to the toxic partisanship and polarization plaguing both the Commonwealth and our country. The districts do a fine job of keeping communities of interest together, including in Arlington (e.g., those living along Columbia Pike, in the Metro Corridors and with our diverse communities from Halls Hill to Green Valley to Johnson Hill).

It also makes perfect sense to include together the City of Falls Church with Arlington County, given the commonality of the two jurisdictions' court systems and certain Constitutional officers (e.g., Commonwealth's Attorney, Clerk of the Court).

Finally, I will note that as a former Independent member of the Arlington County Board (2014-2018), I saw close-up the negative effects of the current districts for both chambers, orchestrated by Republicans in the House of Delegates and Democrats in the State Senate. Some members of the General Assembly have paid limited to no attention to the residents of the far-flung appendages that comprise their districts. Lines that would make a circus contortionist blush foster both cynicism and confusion among even wellinformed citizens and can be a form of voter suppression in and of itself.

\title{
Please accept the work of the Special Masters and do right by every resident of our great Commonwealth. Adopt their work as proposed.
}

\section*{Memo on Special Masters Congressional Districts DEC 20}

To: Virginia Supreme Court
Fm: Richard Galt Zimermann, Jr.
1226 Brookside Landing, Chesapeake, VA 23320-2826, richardzimermann@verizon.net cell: 703-946-7543
Dt: December 20, 2021
A concrete critique of each of the 11 Congressional districts follows in four pages. Page 4 continues with criteria explained to evaluate each one. Reference Virginia Redistricting Commission website Citizen Map \#164 for Eleven Compact Congressional Districts.

\section*{Congressional Districts VA-8 and VA-11.}

The Master Memo VA-8 fails several standards of good districting. 1) The Arlington locality is divided unnecessarily. 2) It divides the community of interest among residents self-identifying themselves as living "inside the beltway" and in the Realtor industry "beltway neighborhoods" in urban school zones adjacent outside the pavement perimeter. 3) It violates a district of like habitat by refusing concentric additions of adjacent school zones in favor of a jutting southward mass of suburbia and forested parkway drive south to the Mount Vernon estate.
- The Master Memo district has spikes outside the Beltway at Merrifield and at North Springfield that can be justified by attendance zones for the Pine Spring Elementary School (E.S.) and the North Springfield E.S. Both irregular boundaries can be encompassed by a compact expansion of the "Beltway neighborhoods" Congressional District (Realtor term) by adding adjacent PreK-5 attendance zones uniformly in compact groups of one or two at a time, thus presenting a relatively smooth district boundary.

Likewise at least three (3) nested State Senate districts fail best practices:
1) SD-40, the Arlington locality is divided unnecessarily. It alone can support its own Virginia Senator with 215,785 residents, with an excess of 22,857 to spare.
2) These 'overage' numbers can be ceded to Alexandria's SD-39 in a core formed by the Census Blocks of Abingdon Elementary School that lie west of the National Cemetery. Falls Church can become the core urban center for a compact SD-37, east of Fairfax City to reform it.
3) The Princeton Gerrymandering Project criteria for measures of compactness FAIL at Master Memo SD-37, because the Memo scores it less than the Princeton standard 0.3600 for 40 Virginia districts by 0.3060 Reock against juts and by 0.2548 Polsby-Popper against fingerling-tendrils (the Memo conflates its unexplained, but too-low bar for a poor score limit in 11 districts, then incomprehensively lowers it for 40 districts ( \(40>11\) ), violating conventional statistical methodology).

The Master Memo VA-11 fails several standards of good districting.
1) It fails to keep the community of interest in urban western Fairfax County and adjacent urban eastern Loudoun County, tied by their commutes to the NoVa DC Metro MSA. Loudoun County east of Leesburg has an urban population density around Ashburn of upwards of 1000-3000 persons per square kilometer, as does adjacent Fairfax in the same MSA. More on this in the VA-10 critique.
2) The Memo fails to contemplate the Fairfax self-drawn cultural boundary along its divide north-south along US-50. Compatible and corresponding communities of interest can be found among school attendance zones for public Pre-K-5, Middle, and High Schools, all falling to either side of the urban highway.
3) The Memo district sloughs off the westernmost of the "Dulles Corridor" as it divides the COI found now and expanding soon in adjacent Fairfax and Loudoun County. They have like densities of 1000-3000+ per sq km , unlike west of Leesburg in Loudoun County with rural densities of \(1-100+\) per sq km . The COI uses the Dulles Access Freeway and the Ashburn Greenway Toll Road. The existing SILVER Metro Line opens Phase

II in MAY 2022 to connect western Fairfax's Reston, the Dulles Airport, and eastern Loudoun's Ashburn Station.

\section*{Congressional Districts 6 and 9 (Appalachia, Shenandoah Valley)}

The Master Memo VA-6 fails several standards of good districting. It fails the Princeton Gerrymandering Project as under 0.3200 for both Reock test 0.2213 against juts and Polsby-Popper 0.2220 test against fingering-tendrils. It also fails the self-referenced and statistically unexplained Memo "low" score for 11 districts, 0.2500 or lower.
1) The Memo district breaks apart three independent urban COIs as defined by the Census, and confirmed by Virginia locality Planning District commuting reports.
- The Winchester MSA commutes 1-2 hours east into NoVa DC Metro, VA-7 to Ashburn and the Dulles Corridor, I-66 into northern Fairfax, and Amtrak nearby Harpers Ferry into DC Union Station for Metro connections elsewhere into NoVa.
- The Harrisonburg MSA - Staunton MSA commute 1-2 hours to adjacent Charlottesville MSA with 6 weekday bus connections between them, and I-64 Commuter Rail connects Charlottesville, Staunton, Lexington and Covington (see Va Redistricting Commission Citizen Map\#164, "11-Compact Congressional Districts").
- The Roanoke MSA communities of interest are broken apart two ways. a) Roanoke City and Salem City are divided from all of Roanoke County along I-81, b) the adjacent Blacksburg MSA along I-81.
2) The urban locality in Roanoke County is split unnecessarily for the Memo's self-reported nostalgia unconnected to the 2020 population or today's COIs. The Memo references the "pre-Civil War" maps of the "Shenandoah Valley", the northern Great Valley. That explanation FAILS to justify drawing a district that breaks up the urban settlement concentrated in the Roanoke Valley and the south Great Valley of Virginia, now over three times the size of that surrounding Winchester and Harry Byrd, Sr.'s apple orchards.
3) The Memo VA-6 jumps the Blue Ridge to snatch the "Southside" Martinsburg into its Shenandoah (sic) Valley district, breaking the COI between Martinsburg MSA and adjacent Danville MSA along US-58 within the Dan River watershed.

The Master Memo VA-9 fails several standards of good districting.
1) Although an appeal is made to "geographical constraints" at the Mountain Plateau and the Great Valley of Virginia, the Memo district unaccountably refuses the COI of adjacent Blacksburg MSA and Roanoke MSA localities as documented by the Census and confirmed in Virginia Planning District commuting reports for the associated localities.
2) Likewise, the Memo district leaps over the Blue Ridge Mountains to ignore adjacent Valley MSA communities of interest, despite imagined "geographical constraints" imposed by the north-flowing Shenandoah River into the Potomac River at Harpers Ferry, nearby the commuter rail connection into DC, to break up the COI of adjacent "Southside" MSAs at Martinsburg and Danville, Virginia.
3) The Memo district is apparently not compact because it is too rectangular. This will be manifest on inspection by using the Brennan Center for Justice test adopted against 'sausage district' gerrymandering, the Length-Width test.
- The VA-9 district could achieve substantially more 'compactness' by any measure, were it to turn north at I81 to encompass more of the Blacksburg MSA-Roanoke MSA community of interest documented in the Virginia "Southwest" cultural region reported by the Cooper- Institute of the University of Virginia, previously adopted with bi-partisan majorities by the Virginia Redistricting Commission. The Court should require its Special Masters to follow the guidelines passed by the Redistricting Commission as binding, according to its charter remit by the General Assembly for the purpose in redistricting by the 2020 Census.

\section*{Districts 2 and 3 (Hampton Roads and Virginia Beach)}

The Master Memo VA-2 fails several standards of good districting. It fails the Princeton Gerrymandering Project as under 0.3200 for both Reock test 0.2320 against juts and Polsby-Popper 0.2111 test against
fingering-tendrils. It also fails the Memo's self-referenced and statistically unexplained "low" score for 11 districts, 0.2500 or lower (a 'hurdle' is not adjusted upwards for maps with larger numbers of districts measured).
1) The Memo district splits a continuous 400 -year and now current COI on the shores of the Chesapeake Bay, confirmed in Virginia Planning District commuting reports.
2) It splits off the South Hampton Roads from adjacent MSA cities, diluting like URBAN habitat with rural extremes with only "partisan" preferences in common. Less the north-facing Cape Henry Shore on the Chesapeake Bay, north of Virginia's First Landing Park and the Lafayette River, Virginia Beach, Norfolk, and eastern Chesapeake City adjacent those other two South Hampton Roads cities have sufficient numbers to populate its own compact Congressional District.
3) The Memo VA-02 is NOT compact, it makes a fish-hook turn east, to jut south of the James River and burrow over 80-mi. into the Dismal Swamp (no clams) and beyond into Southside Virginia.

The Master Memo VA-3 fails several standards of good districting.
1) The Memo district artificially unites cities that do not have a majority of their populations commuting across the James River. 2020 Hampton Roads commuting data shows the largest numbers travel from Virginia Beach to Norfolk (77,000/day), second is Hampton to Newport News (32,671/day), third is Chesapeake to Norfolk (26,336/day), all without crossing the James River.
2) The Memo VA-3 breaks away the Lower Peninsula with a COI north to Williamsburg and suburban James County, to separate it from COI by locality commuting with the Middle Peninsula, along with fishery and maritime connections with the Eastern Shore and the Northern Neck among localities with Chesapeake Bay shoreline.

\section*{Districts 4 and 5 (Richmond and Southside)}

The Master Memo VA-4 fails several standards of good districting. It fails the Princeton Gerrymandering Project as under 0.3200 for the Polsby-Popper 0.2111 test against fingering-tendrils. The district is visibly elongated from above the James River to the Carolina Line, so it has become suspect of failing the Brennan Center adopted Length-Width test for compactness; it deserves measurement as do all Virginia districts for 2020.
1) The Memo district breaks urban Richmond, eastern Henrico County and Hanover County apart from their north-of-the-James River MSA communities of interest.
2) The Memo VA-4 again divides an urban county at Henrico separating large numbers of Virginia residents from any benefit from "respecting locality boundaries". In this case, urban Henrico has a population of 334,389 versus the also divided rural Southampton County with 18,570 , or a ratio of \(18: 1\) disadvantage urban locality COI.

The Master Memo VA- 5 fails several standards of good districting. This Memo district is unique in dividing urban locality districts at three points of the compass, and one Southside MSA communities of interest.
1) The Memo district to the east breaks the urban locality boundaries of Chesterfield County and the south Richmond City MSA adjacent in Chesterfield County.
2) To the north, it breaks the urban locality boundary of Albemarle County in the Charlottesville MSA.
3) To the west, it breaks the urban locality boundary of Bedford County in the Lynchburg MSA.
4) To the south, it breaks the adjacent urban cores in the Danville MSA and the Martinsville MSA.

\section*{Districts 1, 7, and 10 (North Tidewater and outer Northern Virginia)}

The Master Memo VA-1 fails several standards of good districting. It fails the Princeton Gerrymandering Project as under 0.3200 for the Reock 0.3198 test and the Polsby-Popper 0.3138 test against fingering-tendrils. The district is visibly elongated from the Chesapeake Bay in the east to the upper Piedmont foothills of the Blue Ridge Mountains, so it has become suspect of failing the Brennan Center adopted Length-Width test for compactness; it deserves measurement as do all Virginia districts for 2020.
1) The Memo-district breaks the Richmond MSA community of interest with western Henrico and Hanover County.
2) Memo VA-1 divides the urban locality in Henrico County of 334,389 without dividing any comparable population in compensation among rural localities in this district, or anywhere on the Congressional District map.

The Master Memo VA-7 fails several standards of good districting. It fails the Princeton Gerrymandering Project as under 0.3200 for the Polsby-Popper 0.2593 test against fingering-tendrils. The district is visibly massively jutting west of the I-95 and commuter rail corridor, so it is suspect of failing the Brennan Center adopted Length-Width test for compactness; it should be measured as do all Virginia districts for 2020.
1) The Memo district divides an urban locality by slicing off the eastern portion of Fairfax County.
2) Memo VA-7 notes a "ringed approach" to the NoVa DC Metro MSA "would be a trivial task", and that would best suit the nonpartisan Census MSA boundary drawn from Spotsylvania County (certainly Fredericksburg-adjacent) west to embrace the COI of adjacent commuting Winchester MSA.
3) See the Congressional District plan for compact four (4) compact Congressional districts in the Virginia Redistricting Commission Citizen Map \#164, "11-Compact Virginia Congressional Districts".

The Master Memo VA-10 fails several standards of good districting. It fails the Princeton Gerrymandering Project as under 0.3200 for the Polsby-Popper 0.2535 test against fingering-tendrils. The district is visibly elongated into a rectangle with massive juts running south and east of NoVa DC-Metro MSA, so it is suspect of failing the Brennan Center adopted Length-Width test for compactness; it should be measured as do all Virginia districts for 2020.
1) The Memo district divides an urban locality by slicing off the northern portion of Albemarle County.
2) Memo VA-10 cuts off the commuting COI of the Winchester MSA into the NoVa DC-Metro MSA.
3) Memo VA-10 cuts off Charlottesville surrounding Albemarle County with 6 buses/day to adjacent Staunton MSA, ten addition connections to Harrisonburg, and Augusta County.

FIVE District Criteria: Create districts with communities of interest based on Virginia's 2020 settlement: I. Map districts of adjacent localities with similar commuting patterns. II. Map districts of like residential habitat. III. Map districts of authentic, locally defined cultural community, IV. Map districts nesting small into larger districts. V. For each kind of district, map each district accrual compactly from an initial settlement core of greatest density.
I. Redistrict adjacent localities that are consistent with a nonpartisan uniform national standard and confirmed in the commuting reports made by Virginia Planning Districts for each locality in the state. These are linked by the residents' reported commuting patterns for commercial and social purposes, reflecting changes since the last census as updated MSAs, the Metro- and Micropolitan Statistical Areas.
II. Redistrict by like residential habitat. Counties are no longer uniform in their settlement, but like communities of interest can be seen in patterns of settlement by its density. (A) urban with urban, (B) urban with suburban, (C) suburban with suburban, and (D) suburban with the much fewer living in exurban and rural habitat settlements.
III. Redistrict by authentic cultural community defined in the respected locality governments. Cities and Counties in Virginia uniformly organize attendance zones for PreK-5 schools with compatible cultures that enhance early childhood education. These boundaries can be nearly approximated by Census Blocks for statistical reporting. They should never be broken by any district boundary meant to mirror the people settled in a place.
IV. Redistrict by nesting smaller into larger districts: Delegate districts into State Senate districts and State Senate districts into Congressional districts to create a non-partisan electoral community of interest.
V. Redistrict compactly in equal populations as described by law, so as to reflect the reported \(70 \%\) of Virginians living in urban settlement in each legislature chamber. Meet academically statistical standards for Reock test against 'juts', Polsby-Popper test against 'fingerling-tendrils', and Length-Width test against 'sausages' in district shapes.
- Begin with an urban core for each kind of nested district, and accrue population concentrically and within locality boundaries to meet the district number for each of the three kinds of districts. For example, when adding each easterly settlement, then add another settlement north or south of like habitat to maintain a compact district at each iteration while drawing a district. Do not add multiple settlements in the same direction to create a 'sausage' district jumping habitats.
- Statewide, (a) do not divide (frack) any locality more than once in any kind of district, (b) do not divide small cities less than 50 square miles (Lynchburg and smaller), nor incorporated towns, college campuses, or historical districts, (c) excepting only the largest Fairfax County with over a million residents, and that into only three portions of like settlement (a) inside- and Beltway-adjacent, (b) north of US-50, and south of US50, following the local County's nearly uniform division of itself by its PreK-5, Middle School and High School attendance zones along US-50.

Muriel-Theresa Pitney

RE,: Rules and Procedures for Implementing the Requirements of Article II, Section 6-A
To Whom It May Concern:
Pursuant to Rule 4(a) of the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A of the Constitution of Virginia, I am submitting the following comments and suggestions regarding the redistricting for the Virginia House of Delegates.

Based on the recently presented maps, I would like to highlight the importance of maintaining several districts as presented. Virginia's Latino community has very little political representation on the state and local levels and deserves opportunities to elect representatives who can be a voice for these communities. Proposed House District 20, 13, 19, 24, 14, 27, 03, 16, 25, 21, 23, 04, 17, and 77 all would have a Hispanic population of over \(20 \%\) which should be applauded. An additional 18 House Districts have Hispanic populations at over \(10 \%\) which proportionally represent the numbers shared by the recent effort. The demographic makeup of all of these districts should be maintained and a concentrated effort to bring other districts to proportional representation should be made where possible.

Similarly there are 16 proposed Senate Districts that showcase the proportional representation of the Hispanic community within Virginia. A similar effort should be made to bring additional proposed districts above the \(10 \%\) threshold.

Speaking to the proposed House districts that most directly impact me, I want to thank the map drafters for taking into consideration the three geographic communities that exist within Arlington - North, South, and development corridors - as these are three unique communities. However, residents of Falls Church have expressed their concern with being grouped with the proposed \(1^{\text {st }}\) District which many would agree with. Instead a portion of proposed district 6 could be added to district one to make up for the population difference and reduce the community differences. The spillover from proposed district 2 into Alexandria should also be addressed potentially by expanding district 3 west towards N Carlin Springs rd in areas of Buckingham. Overall this breakup of Arlington respects the unique diversity of proposed district 3 and the new urban renter-heavy developments of district 2.

Looking foxward to the final maps that respect the diversity of Virginia.

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Chief Justice, Justices of the Supreme Court, and the Special Masters:

My name is Tara Durant, and I am the Delegate-elect for the current 28th District of the House of Delegates. I submit this comment together with Chief Charles Bullock, Tribal Chief of the Patawomeck Tribe in Stafford County. The proposed map of the Special Masters unintentionally splits lands leased by the Patawomeck Tribe and, as a result, fails to preserve a community of interest essential to the Tribe for social, cultural, and economic reasons. We ask that this community of interest be preserved in proposed House District 65 , where the current Tribal Center is located. Additional detail follows below:

As noted in the memorandum drafted by the Special Masters, the Statutory Criteria found in the Virginia Code specifically requires that "[d]istricts shall be drawn to preserve communities of interest. For purposes of this subdivision, a 'community of interest' means a neighborhood or any geographically defined group of people living in an area who share similar social, cultural, and economic interests. A 'community of interest' does not include a community based upon political affiliation or relationship with a political party, elected official, or candidate for office." See Va. Code § 24.2-304.04, part 5. The Special Masters memorandum specifically highlights the fact that the Special Masters may have unintentionally overlooked communities of interest, and, consequently, "look[ed] forward to receiving the commentary of this Court and of the public to help improve the map in this regard." See Memorandum of the Special Masters at 7. This comment highlights one important and discernible community of interest overlooked by the Special Masters.

The proposed map of the Special Masters splits the tribal land of the Patawomeck Tribe in Stafford County. Specifically, the Patawomeck Tribe leases two parcels of land from Stafford County. The first parcel is located at 638 Kings Highway, Fredericksburg Va. 22405, which is the location of The Patawomeck Indian Tribal Center, Museum, and Native Village. This Tribal Center will be opening to the public in June 2022. This parcel is located in the proposed House District 65.

The second parcel, The Patawomeck Memorial Band Park, is located on County Rd 608, Stafford Va. 22554. This property, located near Aquia Landing, will be the future reinterment site of their ancestral relatives' remains currently housed at the Smithsonian Indian Museum in Suitland, Maryland. This parcel is located in the proposed House District 64.

Finally, the tribal members reside primarily in Stafford county. As a community of interest, the Patawomeck Tribe would be best served with unity of representation in one District.

For the foregoing reasons, we ask that this community of interest be preserved in House District 65.

\section*{Sincerely,}

Tara Durant
Delegate-elect, House District 28

To: Delegate Mrs. Tara Durant HD 28 December 16, 2021 From: Chief Charles "Bootsie" Bullock
Patawomeck Indian Tribe of Virginia Inc.
Re: Proposed Redistricting
Honorable Mrs. Durant

I write to you to express my concern about the 2021 proposed Virginia redistricting. The Patawomeck Indian Tribe of Virginia is state recognized and based in Stafford County.

The Patawomeck Tribe leases two parcels of land from Stafford County. The first parcel that the Patawomeck Tribe has under lease is located at 638 Kings Highway Fredericksburg Va. 22405, which is the location of The Patawomeck Indian Tribal Center/Museum/Native Village. This Tribal Center will be opening to the public in June 2022.

The second parcel "The Patawomeck Memorial Band Park " has leased is located on County Rd 608 Stafford Va. 22554. This subject property, located near Aquia Landing, will be the future reinterment site of our ancestral relatives remains currently housed at the Smithsonian Indian Museum in Suitland Maryland.
"The first People of Stafford County", The Patawomeck Indian Tribe of Va. Has been dated to or around 1200-1300 AD.

Between 1935-1940 Judge William Graham and T. Dale Stewart of the U.S National

Museum/Natural History performed an archaeological exploration of the Indian town site of Patawomeck (44ST2 and 44ST1). This is the Patawomeck village visited by Capt. John Smith in 1608. The extensive recorded information is all archived in T. Dale Stewart's book "Archeological Exploration of Patawomeck: The Indian Town Site 44ST2 Ancestral to the One 44ST1 Visited in 1608 by Capt. John Smith".

The reclaiming of our deceased tribal members and very sacred artifacts will be complete once our Federal Recognition application approval process has been completed. At this point our ancestors will be returned to the native soil not far from where they were removed from some 80+ years ago.

I write these few lines to you with urgency, as the leader of the Patawomeck Indian Tribe of Va., it is very disturbing that the proposed redistricting plan will split the two leased parcels that the Patawomeck and Stafford share in agreement. Currently both are in the \(28^{\text {th }}\) district, the new proposal would place one in the \(64^{\text {th }}\) and one in the \(65^{\text {th }}\) districts. I do look forward to your reply and future correspondence of the status on this critical part of the Patawomeck Indian Tribe of Virginia's historical significance. Furthermore the Patawomeck Indian Tribe of Virginia is looking forward to becoming a great partner on many fronts with the great state of Virginia.

Respectfully,
Chief Charles "Bootsie" Bullock

EXTERNAL EMAIL
THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Subject: 7th, 10th \& 11th Congressiona Districts
To: The Justices of the Virginia Supreme Court and the Special Masters:
Overall the proposed Congressional maps reflect a logical, rational approach that is consistent with the applicable criteria. A few minor adjustments would address many of the criticisms submitted to the Court. A proposed map is pasted below and can be found at https://districtr.org/plan/94818.

First, to address the many concerns raised by the citizens of Albemarle and Charlottesville and the areas surrounding Charlottesville, move the southerner border of the 10th District north to the Green and Orange County lines. This proposed 10th District is marked in the Gray Blue color.

Second, to address the many concerns raised by citizens in northern Spotsylvania County and the area surrounding Fredericksburg, move those northern Spotsylvania precincts from the 10th to the 7th Congressional District as reflected on the map pasted below and at the URL. This proposed 7th District is marked in the Light Green color.

Third, to accommodate the population impact of these two changes in the 10th District, move the eastern border of the 10th District at Loudoun County east to the Reston Parkway and the intersection of Reston Parkway and Wiehle Avenue, and east from Loudoun to Utterback Store Road as shown on the map pasted below and at the URL. This western portion of Fairfax County is closely aligned with the eastern portion of Loudoun County, and Reston Parkway, Wiehle Avenue and Utterback Store Road serve as natural defined boundaries.

Fourth, to ensure population balance for the proposed 11th District, move the southern boundary of the 11th District into Prince William County to incorporate Lake Ridge and Woodbridge which are closely connected in community of interests to the rest of the 11th District. The Prince William County Parkway forms a natural defined southern boundary for most of this District. This proposed 11th is marked in the Yellow color.

Fifth, to ensure population balance for the proposed 7th District, extend the boundary of the 7th District to include King George County and Caroline County. This change would also address some of the concerns raised that more of central Virginia should be included in the 7th.

Sixth, there are no changes to the Special Masters' proposed 8th District.

Seventh, there would need to be similar minor adjustments to the 1st and 5th to balance populations.

In summary, these proposed changes address many of the citizens' concerns, are balanced from a population perspective, are consistent with the communities of interests, and reflect the same political competitive balance as the Special Masters' maps.

Respectfully submitted.

December 20, 2021

\section*{Supreme Court of Virginia}
P.O. Box 1315

100 North Ninth Street, 5th Floor
Richmond, VA 23219-1315
Dear Honorable Justices of the Virginia Supreme Court, The Redistricting Special Masters, and The Clerk of the Court, I greatly appreciate this opportunity to offer comments on the impact of the three proposed redistricting maps on my Chesterfield County Midlothian - Precinct Robious \#504 community. Several of my neighbors have raised concerns about the maps, particularly the House of Delegate Map \#72. They highlight that the map fails to acknowledge how deeply our communities of interest as business owners, professionals (staffing major businesses educational institutions, as well as areas governments), church members and community activists align with Richmond, Henrico County, as well as other parts of Chesterfield. They underscore further that the social ties of their families rarely coincide with any of the towns in our new district, but rather with the greater Richmond metropolitan area.

I, however, want to address the shortcomings of these maps with respect to the standard of creating competitive districts. Over the last decade, Chesterfield and my precinct, in particular, witnessed changing demographics and significant shifts in political alignments. The hard work of many of my neighbors contributed to the current moment where our precinct is finally considered competitive and has contributed to the hard-fought efforts that culminated in the elections of Congresswoman Spanberger, Senator Hashmi, and Representative Adams. On the surface, while \(5^{\text {th }}\) District appears to be drawn in a contiguous fashion, the same cannot be said for the \(72^{\text {nd }}\) House of Delegates district. In the instance of Senate District 12, while it is boundaries also seem contiguous, it has been redrawn in such a manner to favor heavily Republicans as there no longer are votes from Henrico or parts of Richmond that had made this race so competitive in recent years.

Not only will we not be represented by the candidates we worked so hard to elect, in seems that the new maps confine my precinct to races that are likely to remain largely non-competitive well into the foreseeable future. I would assert that for my neighbors, and residents in other parts of Midlothian, however uneven the political terrain is in the districts in their current configuration, they did far more to boost confidence in the electoral system than the Special Masters' proposed maps.

I hope that attention can be drawn to, in particular, HOD map District \#72 that represents the most extreme example of the maps' shortcomings. Here Midlothian is misaligned with the rural counties of Powhatan, Amelia, and Nottaway. I encourage the Court to consider how the work of the Special Masters might be adjusted to avoid outcomes that seem to fall well short of honoring the competitiveness and communities of interest criteria that were to guide the redistricting effort.

I thank the Court, the Special Masters, and Court staff for their consideration and diligent efforts to fulfill their charge. I urge you, however, to take the additional time to ensure that the redistricting initiative meets your highest standards with respect to its impact on my neighborhood and others similarly affected in Midlothian.

Sincerely,

Ron B. Alpern

To: Virginia Supreme Court
I am concerned about the proposed redistricting aimed at separating Blacksburg from Roanoke City. These communities have shared interests as well as comprising economic centers of activity. I join with others in requesting that you keep these two communities (Blacksburg and Roanoke City) together as one Senate district. The map currently shows Blacksburg joined to rural counties such as Tazewell, communities which share little in common. This kind of redistricting would make it difficult for Blacksburg and Roanoke City to have their interests properly represented in the Virginia Senate. It would make it difficult to elect a Democrat to office, a phenomenon that would make a travesty of democracy in this region. The proposed redistricting appears to copycat other efforts across the U.S. which are clearly partisan in nature and are intended to make it easier for Republicans to establish single-party rule.

Thank you for your consideration and for your attention to establishing a genuine democratic process in the state of Virginia.

Subject: 7th, 10th \& 11th Congressiona Districts
To: The Justices of the Virginia Supreme Court and the Special Masters:
Overall the proposed Congressional maps reflect a logical, rational approach that is consistent with the applicable criteria. A few minor adjustments would address many of the criticisms submitted to the Court. A proposed map is pasted below and can be found at https://districtr.org/plan/94818.

First, to address the many concerns raised by the citizens of Albemarle and Charlottesville and the areas surrounding Charlottesville, move the southerner border of the 10th District north to the Green and Orange County lines. This proposed 10th District is marked in the Gray Blue color.

Second, to address the many concerns raised by citizens in northern Spotsylvania County and the area surrounding Fredericksburg, move those northern Spotsylvania precincts from the 10th to the 7th Congressional District as reflected on the map pasted below and at the URL. This proposed 7th District is marked in the Light Green color.

Third, to accommodate the population impact of these two changes in the 10th District, move the eastern border of the 10th District at Loudoun County east to the Reston Parkway and the intersection of Reston Parkway and Wiehle Avenue, and east from Loudoun to Utterback Store Road as shown on the map pasted below and at the URL. This western portion of Fairfax County is closely aligned with the eastern portion of Loudoun County, and Reston Parkway, Wiehle Avenue and Utterback Store Road serve as natural defined boundaries.

Fourth, to ensure population balance for the proposed 11th District, move the southern boundary of the 11th District into Prince William County to incorporate Lake Ridge and Woodbridge which are closely connected in community of interests to the rest of the 11th District. The Prince William County Parkway forms a natural defined southern boundary for most of this District. This proposed 11th is marked in the Yellow color.

Fifth, to ensure population balance for the proposed 7th District, extend the boundary of the 7th District to include King George County and Caroline County. This change would also address some of the concerns raised that more of central Virginia should be included in the 7th.

Sixth, there are no changes to the Special Masters' proposed 8th District.

Seventh, there would need to be similar minor adjustments to the 1st and 5th to balance populations.

In summary, these proposed changes address many of the citizens' concerns, are balanced from a population perspective, are consistent with the communities of interests, and reflect the same political competitive balance as the Special Masters' maps.

Respectfully submitted.

Dear Virginia Court,
I believe that Vinton should be drawn with the rest of Roanoke County and not in a district tied to Staunton. The New River Valley, Roanoke Valley, and Staunton all have separate community college systems, are in different planning districts, have different hospitals, and the centers of gravity in distinct local economies. I don't believe that the Roanoke Valley should be artificially split between Staunton and the New River Valley when there are more than enough citizens for three distinct districts.

Thank you for your consideration,
Lisa Centofanti

\section*{Subject: Virginia Redistricting - Virginia AFL-CIO Public Comment}

Virginia AFL-CIO challenges this current redistricting process and the proposed maps. The goal was not to have court drawn maps, and it is with the current maps that we have failed not just the intended goal, but the people of Virginia from having a fair process and a fair result.

The maps as currently drafted split localities in a variety of ways across the state. Due to those splits, there are numerous decreases in minority representation, disparages military and veteran populations, leaves behind rural communities, and inconsideration of functional compacting and contiguity of some geographical locations, and an overall lack of economical, infrastructural, and cultural considerations.

The current maps as drawn can be seen as maps of convenience rather than maps that equitably and fairly represent the interests of our great Commonwealth's population.

It is our hope that the final drawing of the maps includes the necessary changes that will better serve and represent the people of the Commonwealth in actuality, and not in theory.

Thanks in advance for your consideration,

Jonathan L. Stone

\section*{Comment on Proposed Virginia Congressional Redistricting Map}

Dear Hon. Donald W. Lemons:
As a current resident and registered voter in the City of Virginia Beach, Virginia. I write to submit my official comment in disapproval of the current Virginia Congressional Maps prepared by the Special Masters appointed by the Virginia Supreme Court for the redistricting of the Virginia Congressional districts.

Although the special masters as a general rule appear to focus on and accomplish one of the primary goals of ensuring compactness while respecting traditional county and city political lines. Thereby ensuring the Congressional districts are draw in a manner where our elected officials are representing common communities of interest. For the Second Congressional District, in which I am a resident off for both the current and the proposed congressional lines, I am of the opinion the district is faulty in one primary and important way. The Proposed Second Congressional District has drawn out of the district the City of Norfolk. Norfolk and Virginia Beach as two areas with the largest concentration of military installations has many of the same economic and community interests. As a result, it would accomplish the purpose of the redistricting commission to redraw the lines ensuring that Norfolk and Virginia Beach are in the same congressional district. Whereas the current proposed Second Congressional District includes communities on its border such as Isle of Wight and Suffolk whose economic and community interest are more in line with the proposed \(3^{\text {rd }}\) or \(4^{\text {th }}\) congressional district.

Hon. Donald W. Lemons
Chief Justice
Virginia Supreme Court
December 20, 2021
Page 2

It is my opinion that the communities of Norfolk and Virginia Beach with similar military, economic, and community interests would be better served by a single representative in the U.S. House of Representatives.

Respectfully Submitted,

```

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

Chief Justice, Justices of the Supreme Court, and the Special Masters:

My name is Tara Durant, and I am the Delegate-elect for the current 28th District of the House of Delegates. I submit this comment together with Chief Charles Bullock, Tribal Chief of the Patawomeck Tribe in Stafford County. The proposed map of the Special Masters unintentionally splits lands leased by the Patawomeck Tribe and, as a result, fails to preserve a community of interest essential to the Tribe for social, cultural, and economic reasons. We ask that this community of interest be preserved in proposed House District 65 , where the current Tribal Center is located. Additional detail follows below:

As noted in the memorandum drafted by the Special Masters, the Statutory Criteria found in the Virginia Code specifically requires that "[d]istricts shall be drawn to preserve communities of interest. For purposes of this subdivision, a 'community of interest' means a neighborhood or any geographically defined group of people living in an area who share similar social, cultural, and economic interests. A 'community of interest' does not include a community based upon political affiliation or relationship with a political party, elected official, or candidate for office." See Va. Code § 24.2-304.04, part 5. The Special Masters memorandum specifically highlights the fact that the Special Masters may have unintentionally overlooked communities of interest, and, consequently, "look[ed] forward to receiving the commentary of this Court and of the public to help improve the map in this regard." See Memorandum of the Special Masters at 7. This comment highlights one important and discernible community of interest overlooked by the Special Masters.

The proposed map of the Special Masters splits the tribal land of the Patawomeck Tribe in Stafford County. Specifically, the Patawomeck Tribe leases two parcels of land from Stafford County. The first parcel is located at 638 Kings Highway, Fredericksburg Va. 22405, which is the location of The Patawomeck Indian Tribal Center, Museum, and Native Village. This Tribal Center will be opening to the public in June 2022. This parcel is located

\section*{in the proposed House District 65.}

The second parcel, The Patawomeck Memorial Band Park, is located on County Rd 608, Stafford Va. 22554. This property, located near Aquia Landing, will be the future reinterment site of their ancestral relatives' remains currently housed at the Smithsonian Indian Museum in Suitland, Maryland. This parcel is located in the proposed House District 64.

Finally, the tribal members reside primarily in Stafford county. As a community of interest, the Patawomeck Tribe would be best served with unity of representation in one District.

For the foregoing reasons, we ask that this community of interest be preserved in House District 65.

Sincerely,
Tara Durant
Delegate-elect, House District 28

To: Delegate Mrs. Tara Durant HD 28 December 16, 2021 From: Chief Charles "Bootsie" Bullock
Patawomeck Indian Tribe of Virginia Inc.
Re: Proposed Redistricting
Honorable Mrs. Durant

I write to you to express my concern about the 2021 proposed Virginia redistricting. The Patawomeck Indian Tribe of Virginia is state recognized and based in Stafford County.

The Patawomeck Tribe leases two parcels of land from Stafford County. The first parcel that the Patawomeck Tribe has under lease is located at 638 Kings Highway Fredericksburg Va. 22405, which is the location of The Patawomeck Indian Tribal Center/Museum/Native Village. This Tribal Center will be opening to the public in June 2022.

The second parcel "The Patawomeck Memorial Band Park " has leased is located on County Rd 608 Stafford Va. 22554. This subject property, located near Aquia Landing, will be the future reinterment site of our ancestral relatives remains currently housed at the Smithsonian Indian Museum in Suitland Maryland.
"The first People of Stafford County", The Patawomeck Indian Tribe of Va. Has been dated to or around 1200-1300 AD.

Between 1935-1940 Judge William Graham and T. Dale Stewart of the U.S National Museum/Natural History performed an archaeological exploration of the Indian town site of Patawomeck (44ST2 and 44ST1). This is the Patawomeck village visited by Capt. John Smith in 1608. The extensive recorded information is all archived in T. Dale Stewart's book " Archeological Exploration of Patawomeck: The Indian Town Site 44ST2 Ancestral to the One 44ST1 Visited in 1608 by Capt. John Smith''.

The reclaiming of our deceased tribal members and very sacred artifacts will be complete once our Federal Recognition application approval process has been completed. At this point our ancestors will be returned to the native soil not far from where they were removed from some 80+ years ago.

I write these few lines to you with urgency, as the leader of the Patawomeck Indian Tribe of Va., it is very disturbing that the proposed redistricting plan will split the two leased parcels that the Patawomeck and Stafford share in agreement. Currently both are in the \(28^{\text {th }}\) district, the new proposal would place one in the \(64^{\text {th }}\) and one in the \(65^{\text {th }}\) districts. I do look forward to your reply and future correspondence of the status on this critical part of the Patawomeck Indian Tribe of Virginia's historical significance. Furthermore the Patawomeck Indian Tribe of Virginia is looking forward to becoming a great partner on many fronts with the great state of Virginia.

Respectfully,
Chief Charles "Bootsie" Bullock

The VA Senate map for West Springfield doesn't make much sense. We are more similar to the neighborhoods in Burke and not really associated with neighbors on the east side of 395. It also doesn't make sense to put dividing lines through neighborhoods where families know each other as neighbors and/or through the elementary school systems. Please take a look at school districts, and larger boundaries in our area. Highways, Rivers and Current Elementary school boundaries should be taken into account when looking at Communities of Interest.

To Whom It May Concern:
Please see my comments below relating to redistricting:

> 1. Williamsburg has been separated from lower J ames City County, including Grove. The history of African Americans in the Historic Triangle links the City and Grove. For that reason, they should not be separated.
2. Lower J ames City County and Williamsburg rely on many of the same services in the Williamsburg area, such as transportation, healthcare, and social services.
2. The 69th takes a head-scratching jog across the York River and picks up a small portion of Gloucester. This is a very different community and should be part of a district that is on the other side of the York River with the rest of Gloucester County.
3. The new maps put Williamsburg in the 71st District, which runs all the way to Providence Forge. Williamsburg has always been part of Hampton Roads. This puts Williamsburg with other communities that extend up into the Richmond area instead of keeping it with other Hampton Roads communities.

Thank you for the opportunity to express my opinion/concerns
Sincerely
William Evers

December 20, 2021

Dear Special Masters Grofman and Trende:

I submit this letter on behalf of the Sikh American Legal Defense and Education Fund (SALDEF). In my previous letter, dated November 29, 2021, I outlined best principles for the inclusion of and the demographics of the Asian American and Pacific Islander (AAPI) community in Virginia, based on our experience advocating for our communities in the redistricting commission process.

My comments today are focused on the Congressional draft maps produced for public review. As SALDEF noted in our previous comments and submissions to the coalition, along with other diverse advocates, the AAPI community has grown in the state and their size and distribution is allowing them to elect representatives of their choosing, who consider and are responsive to their communities needs. Unfortunately, the distributed maps do not reflect the growth of the AAPI community and may, in fact, stymie their ability to receive adequate representation.

We join the many speakers at the two public hearings who expressed grave concern about the cracking of the western suburbs of Richmond. Henrico County is now \(9.1 \%\) Asian \({ }^{1}\),

1
https://www.census.gov/quickfacts/fact/table/chesterfieldcountyvirginia,henricocountyvirginia,US/PST0452 19
per the 2020 Census, with the vast majority of these AAPI residents arriving since the 2010 Census, fueling growth in the region. AAPI communities in Henrico are establishing new businesses, community centers, and houses of worship. Importantly, these communities also cross county and city lines to access established centers and houses of worship in Chesterfield County and the Greater Richmond area. Diverse areas like Henrico County \({ }^{2}\), in the new maps, are being pulled away from their neighbors and into districts that incorporate much less diverse parts of Western and Southern Virginia, as in the proposed new 1st district. The story repeats with Amelia \({ }^{3}\) County and with Chesterfield County, and with other Richmond suburbs that have grown increasingly diverse over the last decade, all being carved up and distributed across the new 1st and 5th Districts in the pursuit of satisfying numerical requirements.

It is the position of SALDEF that the carving up of greater Richmond, in the pursuit of numerical requirements, is a departure from the legal requirement in Article II, Section 6 of the Constitution of Virginia, which states: "Districts shall provide, where practicable, opportunities for racial and ethnic communities to elect candidates of their choice." \({ }^{44}\) The Virginia code expands further. Section 24.2-304.04(3) states that "no district shall be drawn that results in a denial or abridgement of the rights of any racial or language minority group to participate in the political process." \({ }^{5}\) The recasting of Henrico County into the new VA-5 forces its burgeoning AAPI population into a district that spans large areas of Virginia that are inconsistent with their demographics, values, and priorities. Thus, the new districts will likely have the effect of limiting the ability of the growing AAPI population, as well as Hispanic and Black population in the region, from being able to effectively participate in the political process and select representatives who are considerate of their needs and of their choosing, while concurrently

5 https://virginiaredistricting.org/2021/Data/Public\%20Hearings/082321materials.pdf
dividing them from their larger community of interest. We strongly suggest that these areas be revisited by the special masters and the suburbs of Richmond remain in districts that incorporate the areas in which they live, work, and worship.

Thank you for your attention to this matter and your consideration of AAPI communities of interest as you draw new district lines. Should you have any further questions please feel free to contact me at kiran@saldef.org, or my colleagues Navdeep Singh at navdeep.singh@saldef.org and Jyot Singh at jyot.singh@saldef.org.

Sincerely,

Kiran Kaur Gill

From: b.irishlass@msn.com
Sent: Monday, December 20, 2021 5:05 PM
To: redistricting@VAcourts.gov
Subject: Redistricting.

To the Court:
I believe the proposed House of Delegates map needs significant modification, especially in House of Delegates Districts 69 and 71, the two districts that would include all of Williamsburg and J ames City County. Delegate Mike Mullin has recently moved to the 69th. Williamsburg is included in the 71st. Redistricting will make both House of Delegates districts very Republican if they aren't changed.
1. Williamsburg has been separated from lower James City County, including Grove. The history of African Americans in the Historic Triangle links the City and Grove. For that reason, they should not be separated.
2. Lower J ames City County and Williamsburg rely on many of the same services in the Williamsburg area, such as transportation, healthcare, and social services.
2. The 69th moves across the York River and
picks up a small portion of Gloucester. This is a very different community and should be part of a district that is on the other side of the York River with the rest of Gloucester County.
3. The new maps put Williamsburg in the 71st District, which runs all the way to Providence Forge. Williamsburg has always been part of Hampton Roads. This puts Williamsburg with other communities that extend up into the Richmond area instead of keeping it with other Hampton Roads communities.

Regarding the state senate map, I request that Poquoson be put in the 23rd District (Hampton) for the following reasons:
1. It would preserve the community of interest that exists between Hampton and Poquoson. They have a shared geography as the Peninsula's two Atlantic-facing localities.
2. Both Poquoson and Hampton sit on the Back Bay River.
3. In 2019 the court adopted a special master-recommended House of Delegates District that consolidated parts of Hampton and Poquoson into one district.
4. Redrawing Districts 23 and 24 as suggested would put more of Newport News into the same district, minimizing splits in counties and cities.
5. The Newport News-Williamsburg Airport would be in the same district as Newport News and Williamsburg!

Thank you for your consideration.

Supreme Court of Virginia Justices,

I work for Hamkae Center, a nonpartisan Asian American community building organization based in Fairfax, Virginia. I would like to make the following suggestions based on feedback from Ilryong Moon, an Asian American resident of Fairfax County:

Please consider joining Loudoun County and Prince William County to make a new CD10. Then join the rest of the map makers' proposed CD10 and the rest of the map makers' proposed CD 7 with Charlottesville to create a new CD 7. This would help fix CD10's elongated shape. Loudoun County has more in common with Prince William County as they are both part of Northern Virginia, and they both have higher minority populations compared to the rural counties that the map makers have paired with Loudoun County in the proposed CD10. Putting Loudoun and Prince William in one Congressional District would help give minority populations a stronger chance of electing officials that they feel represent their communities' interests and values.

Since SD37's population deviation is \(2.03 \%\), please consider adding some of SD37's western precincts (north of Legato and east of Fair Lakes), such as the Monument precinct, to SD36. SD36 has a high Asian American population, so adding precincts from SD37 that have high Asian American populations to SD36 would be beneficial. Keeping Asian American populations together gives those populations a stronger chance to elect an official that they feel represents their communities' interests and values.

We hope you will take these points into consideration. Thank you for your time.

Best regards,
Sami Watson, Field Coordinator

David H. Stonehill
5605 Lake Sharon Drive
Glen Allen, VA 23060

December 20, 2021
Ms. Muriel-Theresa Pitney
Clerk of the Supreme Court of Virginia
Supreme Court Building
100 North Ninth Street
Richmond, VA 23219

\section*{Public Comment regarding Virginia Redistricting}

Dear Ms. Pitney:
This Comment is submitted pursuant to the Rules and Procedures for Implementing the Requirements of Article II, Section 6-A. I am writing to comment upon the Special Masters' Congressional Redistricting Map which was released on December 8, 2021 (the Map). My specific interest is in reference to changes proposed for the Virginia Seventh Congressional District (VA-7).

I am an attorney, licensed in New York State, who has been a resident of Glen Allen, Virginia since January, 2021. Glen Allen is within Henrico County. Since 2001, I have been involved with voter protection and election law issues with organizations such as the New York Democratic Lawyers Council. I have previously testified at public hearings regarding Redistricting within New York State.

I have observed the current redistricting effort in Virginia with great interest, not just as a person with experience with government and politics but also from a Jewish perspective. I do not view the Map as being friendly to the concerns and needs of religious and racial minorities. For example, concentrating more black voters within the Fourth

Ms. Muriel-Theresa Pitney
Written Comment of David H. Stonehill
December 20, 2021
Page Two
Congressional District, mainly centered in Richmond, only reduces their numbers and political clout within neighboring districts such as VA-7.

I was particularly struck at the way two prominent Richmond metro counties, Chesterfield and Henrico, are separated regarding their Congressional Districts. The two counties are very much communities of interest with common bonds in numerous areas such as commerce, history and friendship. Dividing the two counties will weaken their united political power as important suburban districts. This will adversely affect their voice in such areas as transportation and economic development.

By linking Chesterfield and Henrico Counties with heavily rural Congressional Districts, the Map acts to suppress the importance of Richmond's suburbs. As beautiful as the rural areas are, suburban Richmond is not foremost on their inhabitants' issues. These constituents will therefore vote accordingly for Members of Congress who may not be friendly toward the suburbs.

The current VA-7 is a crucial swing District which contains a diverse group of voters and which in many ways represents the Commonwealth of Virginia. Taking the district and arbitrarily kicking it northward does not reflect the will of the people in a democracy. There is no underlying governmental interest to partition the Richmond suburbs and to suppress vital links between the residents and voters of Chesterfield and Henrico Counties.

Another area I want to address concerns the needs of minority areas as a component of the redistricting process. It is an axiom that minority areas will have a smaller political impact on governmental operations than more affluent communities. As a result of this, and keeping in mind the requirement to satisfy the doctrines of Equal Protection and Due Process, minority communities should be kept together as much as possible when Congressional lines are drawn. This is especially true regarding Chesterfield and Henrico Counties. The Map acts to dilute the minority vote in the Richmond suburbs. Utilization of the Map will result in minority constituents' needs being ignored or given a low priority. A political party which reflects the needs of minorities has a more difficult time getting its candidates elected because the poor and the wealthy often have different priorities for government. Being part of a minority can create a feeling of political

Ms. Muriel-Theresa Pitney
Written Comment of David H. Stonehill
December 20, 2021
Page Three
hopelessness and despair. If a person feels that he/she is being ignored by his/her elected officials, the person may very well withdraw from the political process completely. "Why bother to vote at all, nothing changes", the person may think.

It is true that minority communities do suffer lower turnout in elections than do affluent communities. This is a most insidious form of vote suppression indeed because it is done internally by the voter. The voter simply stops voting. This is really unacceptable in a modern democracy. A high level of political participation should be encouraged for all of our elections whether in a Presidential year or not. We must encourage all of our citizens to vote and to become engaged with their government in a meaningful way. This means showing leadership by giving people a reason to vote. A reason begins through the preservation of minority communities within a single VA-7 Congressional District for both Chesterfield and Henrico Counties respectively.

I urge this Court as well as the Special Masters to also reconsider the Map based upon the views of our citizens and friends who are expressing their interests through public hearings and by other written comments. The Court is engaged in an important mission and I wish you well.

Respectfully yours,
David H. Stonehill

\section*{THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON} ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

While a heroic effort, the Special Masters' first draft Redistricting Maps have fundamental flaws crying out for improvement in the case of my present State Senate District 34 (proposed draft State Senate District 37); present State Delegate District 37 (proposed State Delegate District 11); and present U.S. House of Representatives District 11 (proposed U.S. House of Representative District 11).

The Special Masters' Memo of 12/7/21 ("Memo";"M") states that although they were instructed to prioritize first the 14th Amendment and then the Voting Rights Act, instead they began with the Statutory Criteria (Code Sec. 24.2-304.04) to draw districts they believe meet the constitution and statutory population requirements (Memo at p. 2). By so doing, they exalted simplified proxy criteria such as the statutory "deviations of population should be no more than 5 percent for legislative districts" and mistakenly suggest this is "bettering" the U.S. Supreme Court's \(10 \%\) deviation precedent guideline for state legislative districts as if, taken to mathematical extremes, a half percent deviation of population for legislative districts would be even better in meeting the fundamental spirit and meaning of the 14th Amendment right to "due process under the law to protect life, liberty, and property." This elevates a metric above the meaning of the 14th Amendment. It is possible that the reasonable flexibility permitted by a \(10 \%\) guideline may be a better fit to the factual spatial population distributions in some communities. Similarly, the Special Masters draft maps err by elevating the impotent metric of "compact" as-the-crow-flies polygons over any real attempt to identify certain communities of interest.

This sterile metric approach works against a better informed U.S. Supreme Court approach which is to recognize that "shared broadcast and print media, public transport infrastructure, and institutions such as schools and churches" are part of its definition of community of interest (M. at p. 6) Indeed the Special Masters recognize that this partial definition illustrates the existence of unique communities of interest (COI) like the Blue Ridge and Shenandoah Valley. In keeping with this better definition of a COI, I believe that any redistricting needs to recognize the diverse but vibrant community interest displayed in the neighborhoods surrounding central State 123 and major crossroads such as the east-west U.S. Hwy 50). Community of Interest does not require a homogeneity of population or dwelling type. Rather, the DIVERSITY characterizes the resident population and business/ cultural features along the Hwy 123 and Hwy 50 east that make it a unique Community of Interest.

Every urban planner knows (B.S. magna cum laude, Urban Life/Land Development major, thank you) that people don't fly like crows and so "compact" polygons are not necessarily indicative of a COI. Rather, major transportation arteries, common houses of worship and cultural interests, GMU students, senior citizens, multi-residential dwellers share a common interest in a multicultural small town way of life, complete with town festivals, local print media, outdoor parks and concerts, multi-ethnic population, schools and baby to grandparent
families. The vibrant, diverse COI on both sides of Hwy 123 and Hwy 50 east of Hwy 123 need redistricting that respects keeping together GMU, Fairfax City, central Fairfax County, Oakton, Vienna, Tyson, my Stonehurst neighborhood, Mantua, and Kings Park West.

Thank you,
Sabina U. Joe

COMMITTEE ASSIGNMENTS:

December 20, 2021

Ms. Muriel-Theresa Pitney
Clerk of the Supreme Court of Virginia
100 N. 9th St., \(5^{\text {th }}\) Floor
Richmond, VA 23219

\section*{Dear Madam Clerk:}

The House Republican Caucus respectfully submits two maps for consideration by the Court and the Special Masters. Both maps follow the requirements of the United States Constitution, including the 14th Amendment, the Voting Rights Act of 1965, the Constitution of Virginia, the Code of Virginia, and other applicable federal and state constitutional and statutory provisions.

The first map was drawn independently from the Special Masters' and represents an ideal map that follows the above criteria. We respectfully commend it to the Court and the Special Masters for consideration.

The Second Map begins with the Special Masters' map and simply unpairs two incumbents with as few other moves as possible to effectuate the unpairing. As has been widely reported, the Special Masters' map pairs numerous incumbents (and in two cases triples them). Both incumbents identified in the Second Map live adjacent to another district that does not currently have a resident legislator. Rather than force them to physically move or run against a colleague, the Second Map would slightly move the district lines. We understand that if the Court accepts some or all of this map, it may accept reciprocal unpairing for Democrat legislators who are similarly paired.

Founding Father Roger Sherman expressed the importance of preserving the ability of sitting legislators to continue serving when he stated, "Nothing renders government more unstable than a frequent change of the persons that administer it." The House of Delegates is in session for only 60 days and experiences significant turnover - in the 2021 term, 70 members had been Delegates for fewer than ten years and 40 members had been Delegates for fewer than five. A map that unnecessarily pairs legislators hampers institutional knowledge and the stability of the House. We respectfully ask the Court to adopt some or all of the changes in this map.

Copies of the maps and the shape files are included with this submission. Thank you for your consideration.
Regards,

C. Todd Gilbert

House Minority Leader

Honorable Members of the Supreme Court,
As a native and 45+ year resident of Montgomery County, I believe the Special Masters missed the mark here in the New River Valley when drawing both House (HD 41 and 42) and Senate (S4 and 5) district lines.

As the Special Masters point out, Communities of Interest (COI) form the underpinnings of HD districts. The New River Valley (NRV), consisting of Floyd, Giles, Montgomery and Pulaski counties and the city of Radford, is a clearly defined and cohesive COI, both geographically and culturally. Characterized by substantial cooperation and integration of governmental, economic, and educational activity, Virginia Tech provides the anchor for our NRV community.

Currently, the NRV is bound within two HD districts and two Senate districts; the proposed map places us in four widely divergent HD, and two Senate districts that entirely excludes Floyd county. None of this makes sense from any standpoint.

From a strict population standpoint, the NRV contains 181,854 residents, enough for two contiguous and compact HD districts, though I am sorry to say, would require shifting anywhere from approximately 5,000 to 13,500 residents into adjacent districts. Still, I believe this is far preferable to what is both proposed and exists. Those folks on the periphery of the NRV could be integrated into district/s sensibly and with sensitivity to their interests.

Further, within this context, there is a highly integrated core population of Blacksburg, Christiansburg and Radford city with a population of 84,244 that could form a single HD; the remaining NRV population (minus the aforementioned residents) could then be served by the other HD.

Senate districts are not so clearly or easily drawn. That said, I believe we can do better by the residents of the NRV by linking them with the Roanoke Valley, with which we have many economic, educational and social ties. Further, governments in the two regions regularly cooperate on issues of transportation, public safety, and economic development. Coupling the NRV with counties much further to the west and with differing local needs simply doesn't make sense as in the proposed S5, nor does excluding Floyd county altogether.

The combined populations of the NRV and the Roanoke Valley is 404,140; nearly enough for two contiguous and compact districts with similar interests. The minutia is harder to cipher given the population distribution, yet seems far more sensible and serving of the populous than placing said residents in 4 geographically, economically and socially divergent Senate districts.

I do hope you will consider these recommendations, as I believe they would better serve the interests and needs of the citizens of the New River and Roanoke Valleys for years to come, than would the proposed districts.

Respectfully yours,
Kelly Brennan

Judges,
The map as drawn completely ignores the mandate to respect communities of interest for much of the state. Please adjust it to maintain the communities of Charlottesville, Lynchburg, Roanoke, and Richmond. Charlottesville's community of interest is especially hacked up; that should be priority \# 1 .

Thank you,

Mike Tabony

Subject: Redistricting Comment on Supreme Ct of Va Draft Plan by Special Masters
To: <redistricting@vacourts.gov>

While a heroic effort, the Special Masters' first draft Redistricting Maps have fundamental flaws crying out for improvement in the case of my present State Senate District 34 (proposed draft State Senate District 37); present State Delegate District 37 (proposed State Delegate District 11); and present U.S. House of Representatives District 11 (proposed U.S. House of Representative District 11).

The Special Masters' Memo of 12/7/21 ("Memo";"M") states that although they were instructed to prioritize first the 14th Amendment and then the Voting Rights Act, instead they began with the Statutory Criteria (Code Sec. 24.2-304.04) to draw districts they believe meet the constitution and statutory population requirements (Memo at p. 2). By so doing, they exalted simplified proxy criteria such as the statutory "deviations of population should be no more than 5 percent for legislative districts" and mistakenly suggest this is "bettering" the U.S. Supreme Court's 10\% deviation precedent guideline for state legislative districts as if, taken to mathematical extremes, a half percent deviation of population for legislative districts would be even better in meeting the fundamental spirit and meaning of the 14th Amendment right to "due process under the law to protect life, liberty, and property." This elevates a metric above the meaning of the 14th Amendment. It is possible that the reasonable flexibility permitted by a \(10 \%\) guideline may be a better fit to the factual spatial population distributions in some communities. Similarly, the Special Masters draft maps err by elevating the impotent metric of "compact" as-the-crow-flies polygons over any real attempt to identify certain communities of interest.

This sterile metric approach works against a better informed U.S. Supreme Court approach which is to recognize that "shared broadcast and print media, public transport infrastructure, and institutions such as schools and churches" are part of its definition of community of interest (M. at p. 6) Indeed the Special Masters recognize that this partial definition illustrates
the existence of unique communities of interest (COI) like the Blue Ridge and Shenandoah Valley. In keeping with this better definition of a COI, I believe that any redistricting needs to recognize the diverse but vibrant community interest displayed in the neighborhoods surrounding central State 123 and major crossroads such as the east-west U.S. Hwy 50). Community of Interest does not require a homogeneity of population or dwelling type. Rather, the DIVERSITY characterizes the resident population and business/ cultural features along the Hwy 123 and Hwy 50 east that make it a unique Community of Interest.

Every urban planner knows (B.S. magna cum laude, Urban Life/Land Development major, thank you) that people don't fly like crows and so "compact" polygons are not necessarily indicative of a COI. Rather, major transportation arteries, common houses of worship and cultural interests, GMU students, senior citizens, multi-residential dwellers share a common interest in a multicultural small town way of life, complete with town festivals, local print media, outdoor parks and concerts, multi-ethnic population, schools and baby to grandparent families. The vibrant, diverse COI on both sides of Hwy 123 and Hwy 50 east of Hwy 123 need redistricting that respects keeping together GMU, Fairfax City, central Fairfax County, Oakton, Vienna, Tyson, my Stonehurst neighborhood, Mantua, and Kings Park West.

\section*{EXTERNAL EMAIL}

THIS MESSAGE ORIGINATED FROM AN EXTERNAL ADDRESS. USE CAUTION CLICKING ON ANY LINKS OR DOWNLOADING ANY ATTACHMENTS

To the Honorable Justices of the Supreme Court of Virginia From Diana Crosswhite, MUEP, Henrico County Resident

First, I tried commenting directly on the map and nothing happened. I tried using Google Chrome and Microsoft Edge.

I am a native Virginian. I was born in Abingdon, VA and lived there until I attended college at UVa in Charlottesville. After graduating with my Master's Degree in Urban and Environmental Planning, I moved to Richmond, VA to begin my work career. I first was employed in the private sector as an Associate Planner that worked with communities all across Virginia to implement projects under the Community Development Block Grant program. My most notable project was working with the City of Franklin after the flood from Hurricane Floyd. I left the private sector and have been employed by Virginia Housing since July 2002 and work in the Housing Choice Voucher program as the Policy and Training Manager. I say all of this because I feel my experience is valid to the conversation of redistricting and I did apply to be on the commission but was not chosen.

Data analysis and mapping are huge parts of my life and I fervently disagree with the Congressional Map proposed by the Special Masters. Although the SMs seemed to avoid any appearance of gerrymandering, I do not feel that they gave any consideration regarding the needs that different populations of the citizens of Virginia. I know you have received a lot of comments from people in the current 7th District, which is my district, who are outraged that you eliminated the district of a female Congressperson but my feelings on this are purely from a logical, data driven perspective. Including parts suburban Henrico with counties in the Northern Neck and Middle Peninsula makes absolutely no sense. The needs of these communities are completely different from the needs of inner Central Virginia. Proposed Districts 1, 2, 3, 4, 5, 6, and 9 need to be reconsidered. These areas need representatives in Congress that are focused on their specific issues and not competing with other parts of Virginia because of the economic and social issues. Middlesex County should not have to compete with the suburban Henrico county when it comes to projects that affect that costal county that has a low median income.

I hope that you, the Court and the Special Masters, will consider having some open work
sessions during the first weeks of January to work with the citizens of these areas to identify needs beyond population and geography. I was against the way the Redistricting Commission was formed because I knew this very problem was going to occur. I wholeheartedly believe the original proposal was much more in line with a true non-partisan commission but here we are. Please listen to the citizens and re-evaluate the maps that have been submitted for your consideration. I know there are any number of planners across Virginia that are more than willing to provide assistance should you need it.

Respectfully,
Diana C. Crosswhite

Dear Ms. Padden,
I have lived in the Fifth District in Charlottesville, Virginia for fourteen years. Before that I lived in Northern Virginia for twenty-nine years. I live in Central Virginia, but the redistricing plan moves Charlottesville from the Fifth District, which is primarily in Central Virginia, to the Tenth District, which is primarily in Northern Virginia. I believe it extends all the way to Loudon County. Based on my experience in living in both Northern and Central Virginia, I believe the two populations have significant differences. Therefore, it doesn't seem logical to move Charlottesville to the Tenth District. For this reason, I believe I will be better represented if Charlottesville remains in the district that represents the values of Central Virginians.

Sincerely,
Patricia Van Ryn

Re: Proposed changes to special masters' draft redistricting maps for VA Delegates, Senate

\section*{INTRO}

Please accept my sincere gratitude for the great care and diligence in which the Court has solicited and heard commentary from the public about the newly proposed maps for Virginia legislative and congressional districts. I believe that all things considered, the special masters have performed admirably in drafting compact, equitable, and competitive districts for the House of Delegates and Senate of Virginia. Of course, as Virginia residents, it is incumbent upon the public to use this opportunity to consult with the Court on the details of these maps, especially with respect to communities of interest. Virginia, as you certainly know, is not a flat landscape, and though the draft maps are a fine start, the special masters did not quite capture the importance of certain local communities of interest with respect to the House and Senate districts. I provided my comment at the 12/17 public hearing, but in only 3 minutes I don't believe I could fully explain my recommendations. I will do so in greater detail in this written comment, instead. These maps, and the demographic data that I will provide to justify these changes, were created and retrieved in the MyDistricting Virginia online tool offered by the Virginia Redistricting Commission. Thank you for your attention to this.

Proposed Change: Wakefield Precinct to HD14

I recommend that Wakefield precinct in Annandale be moved from HD15 to HD14 to better represent the Annandale area. Annandale is a substantial census-designated area and ZIP code (22003) which shares many commercial and cultural gems of the region, including the performing arts center at Northern Virginia Community College Annandale Campus and culturally significant commercial centers and dining establishments. Wakefield precinct in particular shares much of the same school-attendance area as HD14, virtually all of Mantua, Ridgelea and Mill Creek Park to the north also attends Woodson high school, and Chapel precinct which is also HD14 under the draft map is half of the Wakefield Forest Elementary School attendance area, the other half being Wakefield precinct itself; they should not be arbitrarily separated.

Moving Wakefield precinct to HD14 would further unite the Annandale area along the significant thoroughfare of Little River Turnpike, and fully unite the Wakefield Forest elementary school attendance area. These neighborhoods share a strong sense of shared community. The map screenshot included with this message shows that combined with other common-sense changes, House Districts 14 (+.76\%) and 15 (-1.02\%) would be still very close to target population. HD14 would maintain its majorityminority status. Not pictured on this map screenshot, but included in the demographic readout of the districts, is the inclusion of the half of Woodburn precinct inside the beltway within HD13 to offset the increase in population from Wakefield precinct. This would create a recognizable dividing line between the two districts at Gallows Road, and HD13 would still be closer to target population (+2.16\%) than several other proposed House districts. Finally, neither of these small changes would upset the nesting principle as they would still be within Senate District 35.

Proposed Change: Robinson, Laurel, Bonnie Brae and Sideburn Precincts to HD11, SD37

\section*{Proposed Change: Robinson, Laurel, Bonnie Brae and Sideburn Precincts to HD11, SD37 (Cont'd)}

The present draft maps for House and Senate unfortunately divide the Kings Park West censusdesignated place between two House and two Senate districts. The drafts also did not capture the community of shared interest between these four precincts in the GMU area with the Fairfax campus and University Mall to its immediate north and further north with Fairfax City. This community has far more in common commercially and culturally with Fairfax City and GMU than it has with distant Centreville and Clifton, with which it is currently paired in HD10 and SD36, the only other precinct (Robinson) being arbitrarily included in HD15 and SD35. Instead, all four precincts should be included in the Fairfax City-centered districts of HD11 and SD37. This would unite the Kings Park West censusdesignated place and preserve this vital community of shared interest between that larger area and GMU-Fairfax City.

The impact on target population in HD11 and SD37 would be offset by another important change to the northwest, which I will explain in a different section. After all these changes are made, HD 11 (+.79\%) and SD37 (+1.81\%) would still be within target population range.

\section*{Proposed Change: Fairview Precinct to HD15 and SD35}

The Burke Centre census-designated place and homeowners association is a definite community of interest including a total of three precincts (Fairview, Terra Centre, and Burke Centre) that has unfortunately been divided into two House and two Senate districts under the draft maps. This is easily fixed by moving Fairview precinct to HD15 and SD15 from where it was previously (HD10 and SD36) with which it shares little interest or commercial ties. Burke Centre is one of two census-designated areas in the greater Burke ZIP-code (22015) which under this proposal would be fully unified in one House and one Senate district for the first time. The changes to target population of these districts are offset in my other proposed changes, which I have explained in the other sections of this proposal.

\section*{Proposed Change: Monument, Centerpoint and Penderbrook precincts to HD10 and SD36}

This final change not only offsets the adjustments to other districts by population, but better captures the commercial and transportation interests of this relatively new area of development around Fairfax Corner and Fair Oaks Mall, which includes Monument, Centerpoint, Penderbrook and Eagle View precincts. All share much closer economic and transportation ties with Centreville, along the Routes 66 and 29 Lee Hwy corridors, and with western Fairfax County communities represented within the new boundaries of SD36 along Routes 608 West Ox Road and 286 Fairfax County Parkway. The inclusion of these three precincts with their sister precinct of Eagle View in HD10 and SD36 would make the Senate district more compact, better represent the needs of these shared communities of interest, and also favorably improve the diversity of this region currently represented by this House and Senate district. The slight loss of compactness for HD11 and SD37 is regrettable, but it is more important that these communities be well-represented for their shared interests. The Fairfax County Board recognized this
shared interest when it moved Penderbrook precinct into Springfield magisterial district (includes
Centerpoint) and all three precincts moving to these new districts would form a neat and recognizable border with Fairfax City.

Aaron Yohai Proposal - Senate Districts Map (Fairfax County, Fairfax City)

Aaron Yohai Proposal - House Districts Map (Fairfax County, Fairfax City)

\section*{Summary:}
A. Wakefield Precinct - moves to HD14, remains in SD35
B. Robinson, Laurel, Sideburn, Bonnie Brae precincts - move to HD11, SD37
C. Fairview precinct - moves to HD15, SD35
D. Monument, Centerpoint, Penderbrook precincts - move to HD10, SD36

\section*{C. TODD GILBERT}

COMMITTEE ASSIGNMENTS:

December 20, 2021

Ms. Muriel-Theresa Pitney
Clerk of the Supreme Court of Virginia
100 N. 9th St.
Richmond, VA 23219

Dear Madam Clerk:
The House Democratic Caucus submitted two maps: the first is drawn "from scratch" (hereinafter "Democratic Map \#1") and the second makes modifications to the map crafted by the Special Masters (hereinafter "Democratic Map \#2"). Both maps are simply a power grab by the Democratic Party that opposed the bipartisan commission.

The first map is the aspirational map of the Democrats, and it represents their model plan. It should be rejected out of hand. Contrary to the assertion of the Democrats, it is in no way "balanced and fair."

First, it does not comply with maintenance of communities of interest. District \#64 stretches and winds from the bedroom community of Colonial Heights through rural communities to Smithfield. District \#88 stretches from the Fredericksburg suburbs in Spotsylvania to Greene County. District \#25 is split by the Blue Ridge mountains, and given that there is not even a road connection between the two parts, its delegate would have to go outside his / her district to drive from Page County to Madison County.

The winding nature of the districts is reflected in the map's compactness score that shows the districts are not compact - and they are less compact overall than the maps drawn by the Masters. This lack of compactness exposes the unbalanced and unfair basis for the Democratic maps. As one example of many, to unpair Delegate Rip Sullivan, District \#48 stretches across three jurisdictions, Fairfax County, Arlington, and Alexandria. (This of course is additionally not a community of interest.) Similarly, in addition to the District \#25 noted above, District \#100 connects the Eastern Shore with a portion of Norfolk which cannot be reached by bridge, and would require the delegate to drive through another district simply to meet with his constituents. Similarly gerrymandered districts abound in Democratic Map \#1.

The map's partisan intent is especially obvious from the pairings included therein. The map makes tortured efforts to unpair Democratic incumbents. See, for example, District \#31, where Delegate Guzman's residence is carefully carved out of District \#52 and placed in District \#31. Despite obviously knowing of the addresses of elected officials, the map pairs numerous Republican delegates and delegate-elects: (1) Delegate Will Morefield and Delegate Jeff Campbell in District \#3; (2) Delegate James Edmunds and Delegate Les Adams in District \#16; (3) Delegate Jay Leftwich and Delegate Barry Knight in District \#81, although there is an "empty" district \#78 adjacent; (4) Delegate Lee Ware and Delegate-elect Kim Taylor in District \#65; (5) Delegate Kathy Byron and Delegate Chris Head in District \#17; and (6) Delegate Joe McNamara and Delegate-elect Marie March in District \#6. This last is especially obvious, as Delegate McNamara's residence is less than 100 yards from the boundary for the new empty district \#8. The map also pairs Republican Delegate Emily Brewer and Democratic Delegate Clint Jenkins in District \#76, but District \#76 is a district
with a significant Democratic advantage as drawn. Indeed, the only apparent pairing of Democratic incumbents is District \#94, which currently contains Delegate Mike Mullin and Delegate Shelley Simonds, but Delegate Mullin has already announced his intention to move to Williamsburg, which is - conveniently - in an empty seat (District \#93). In short, the Democratic map would pair and thereby eliminate 7 Republican incumbents and not a single Democrat.

The true purpose of the map is to entrench an unassailable Democratic majority for the next decade, and this can be demonstrated by the scalpel-like precision of the districts drawn. From the Special Masters memorandum, we gather that the Special Masters used data from the 2017 Attorney General race without allocating Central Absentee voters to their individual precincts. Using this data, the median \(50^{\text {th }}\) and \(51^{\text {st }}\) most Democratic districts returned \(55.08 \%\) and \(54.77 \%\) in favor of Democrats, and this is notwithstanding the geographic advantage that the Special Masters noted for the Republicans. In other words, Democratic Map \#1 is much more politically disproportionate than the Special Masters' map. This can be more easily observed in the actual election results for the proposed districts. Although the Democratic statewide candidate obtained \(53.3 \%\) of the vote, he would have won a majority in 61 seats under the Democratic Map \#1. This map is a direct effort to ensure Democratic majorities.

In sum, Democratic Map \#1 does not comply with the map drawing criteria identified by the court and is simply a political effort by the Democratic party to overturn what Virginia voters placed in the Constitution. It should be rejected out of hand.

Democratic Map \#2 is intended to protect specific identified Democratic incumbents, sometimes at the expense of others, and to do it under the obviously false guise of promoting communities of interest. In doing this, Democrats seek to use their maps to choose the winners and losers in the next election. For example, to unpair Delegate David Bulova, two precincts are swapped between Districts 10 and 11, extending tendrils into each and making them both less compact. To unpair Delegate Vivian Watts, one precinct is moved from District 15 to District 14. To unpair Delegate Luke Torian, the already uncompact District 19 is extended even further, and the district is clearly not a community of interest as it extends from Mount Vernon to Woodbridge. The Map also modifies the boundary between Districts \#78 and \#79 in Richmond, which has the effect of moving Delegate Bourne into the same district as Delegate McQuinn.

Democratic Map \# 2 purports to address communities of interest, but Democratic Leadership who submitted the map would have the Court and Special Masters believe that the transfer of the handful of precincts just so happened to always unpair senior incumbents who had been paired in the Special Masters' map. Democratic Map \#2 would: 1) unpair the current Speaker who drafted the letter to the Special Masters; 2) unpair the current chair of the House Appropriations Committee; 3) unpair the current chair of the House Finance Committee; and 4) unpair the current chair of the House General Laws Committee. It would also move a member of the Black Caucus into a District with another member of the Black Caucus, ensuring the loss of at least one member of the Black Caucus.

This Court should reject the calculated and partisan efforts of the Democrats in these two plans, and it should not accept the efforts of the Democratic party to undermine the will of the people of the Commonwealth of Virginia.

For the foregoing reasons, the two maps submitted by the Democrats should be rejected.
Regards,

C. Todd Gilbert

House Minority Leader```

    -Toni Morrison

[^11]:    ${ }^{1}$ The US territory of Puerto Rico has enjoyed a population of United States citizens larger than the smallest 20 states, the District of Columbia larger than that of the smallest [2] states; smaller territories include the US Virgin Islands in the Caribbean, and beyond the state of Hawaii, the Western Pacific Ocean include Guam, American Samoa, and Northern Mariana Islands. The Philippines voted its independence from the US in [1947] following territorial law enacted by the US Congress.
    ${ }^{2}$ Two relevant notes: (1) "The Greatest Generation" ratified the 1957 [Treaty] making the US an asylum nation for refugees and their families fleeing from religious or political persecution. (2) In 1798 Virginia "interposed" state government, the Jeffersonian-Republican "Spirit of ' 98 " campaign slogan, to petition Congress and sue the John Adams administration against arbitrary deportation to protect Virginian settlers who were French-speaking expatriates from Caribbean revolutions. They had taken up residence in port cities but mostly on the western Kentucky frontier. Virginia was protecting its own, as many had become state citizens to vote after a one-year residence, shorter than the 7 -year requirement for US citizenship at the time.

[^12]:    ${ }^{3}$ In a 1789 Union of states that required the voters for state Senate to have more property and establishment church membership (Congregationalists in Massachusetts, Episcopalians in South Carolina) the US Constitution embraced the largest democratic electorate allowed in each state among their various constitutions and statutes, so as to legitimize the new US Congress. The national government was to be rooted in the sovereign people as broadly as could be at the time, in each place ... and, meant to be improved upon over time.
    ${ }^{4}$ In accordance with requirements of federal and state laws that address racial and ethnic fairness..." the Equal Protection Clause of the US $14^{\text {th }}$ Amendment, and the Voting Rights Act of 1965 as amended and judicially interpreted.
    ${ }^{5}$ Generally speaking, 'majority-minority' districts have over $50 \%$ minority population; 'minority opportunity' districts over $40 \%$ minority population; 'minority competitive' districts over $30 \%$ minority population. 'Minority participation' districts have the right to register, vote, and reasonable access to cast a ballot, in the author's view. Some Courts have taken cognizance of "eligible voting population" of self-identified 'blacks' or 'multi-race' census populations when they are a super-majority of the 'minority' resident population in district with a history of

[^13]:    racially polarized voting. In Virginia, Northern Virginia and Richmond City have the lowest incidence of racially polarized voting (Self-identified Whites voting only for white candidates of their party, but not a black candidate of the same party on the same ballot.)
    ${ }^{6}$ Note the Virginia state and federal court cases.

[^14]:    ${ }^{7}$ Folks do not move into precincts to vote, they move into neighborhoods with their families. Redistricting adjusts legislatures to new numbers of their citizens in new settlements. Localities should redraw precincts to conform to new districts in nearly equal voting populations with equal access to cast ballots, machines, and poll workers.
    ${ }^{8}$ The Brennan Center for Justice at the New York University Law School publishes A Citizen's Guide to Redistricting by Justin Levitt. It provides a study and recommended guidelines for redistricting commission redistricting.

[^15]:    ${ }^{9}$ Sourcing provided as it becomes available, I use my own terms for now until I learn the NGS map key. ${ }^{10}$ The guiding intent for representing people in a democratic-republic is to (a) mirror their settlements in places (b) weighted by resident numbers in single-member districts. The legislature assembled is to reflect the composition of all the people in their places, NOT arbitrary places with people, not one sort of people in different places.

    - See litigation surrounding the court decisions "one-man-one-vote" doctrine that overturned previous Virginia General Assembly redistricting.
    - County incorporation in 1600s Virginia held nearly equal numbers of heads of household. That ENDED at 1676 Bacon's Rebellion of newly emancipated indentured servants and slaves freed at the Biblical 7years. The new regime added property requirements to vote and hereditary racial slavery. After the War of 1812 , voting expanded with militia members. But locality representation added non-voting slaves as property to boost eastern rural county "apportionment" in addition to counting free white populations. In early 1800s Virginia, this underrepresented urban, commercial, and industrial centers in the General Assembly.
    ${ }^{11}$ The centrality of urban populations as settlement and habitat of the residents to be represented in Virginia's legislature districts cannot be overemphasized for fair redistricting, because $70 \%$ of Virginians live in Census-reported "urban" areas. Rural voices are to receive the weight proportionate to their numbers of population, not as equal places to be disproportionately represented in the legislature.
    ${ }^{12}$ Most of the United States and most of Virginia live within MSAs. They are linked by the economic and social commuting reported for residents in each locality by Census Tract and Census Block. At the center of each MSA area are one or more "urban cores". Micropolitan Statistical Areas populations exceed 10,000 population, and Metropolitan Statistical Areas exceed 50,000.
    ${ }^{13}$ Major thoroughfares include Virginia state routes (VA-7), US highways (US-60), and Interstate highways (I-64).
    ${ }^{14}$ Federal and state court-approved tests include (a) Length-Width against elongated 'sausage' shapes urban-sliced gerrymanders, (b) Polsby-Popper against jagged juts, and (c) Reock against tendril-fingers.

[^16]:    ${ }^{16}$ From the total population for each district, this chart subtracts the "White" for each district to make a CHART column for racial "Minority" to sidestep any conflation in the races using "Hispanic" or "Latino".

    Date: October 16, 2021 at 1:59 PM
    To: oped@timesdispatch.com

[^21]:    Unfortunately, when Congressional districts were redrawn in 2016 and House Districts in 2019 using 2010 census data and not current precinct map lines, several split districts were created in Norfolk.

[^22]:    ${ }^{1}$ Virginia Dep't of Elections, 2021 November General Election Absentee Statistics, https://results.elections.virginia.gov/vaelections/2021\%20November\%20General/Site/Statistics/Absentee.html (Nov. 15, 2021).

[^23]:    * County staff has determined that the County could, on its own, in compliance with Va. Code § 24.2304.1(D) (permitting the locality to make adjustments not exceeding the lesser of 250 persons or five percent of the population of a district), make a third adjustment, identified as "\#1" on the accompanying overall map (Map 1), to eliminate one remaining split precinct issue, as the change would involve a population group of only 120 people. The area involved is bounded by Marlboro Road on the north, Hites Road on the east, Clark Road on the south, and Clark Road and Middle Road on the west, and entails 4 census blocks: 510690506002021, 510690506002020, 510690506002019 , and 510690506002018 . In the alternative, the County respectfully submits that Court could also simply move this area as well from House of Delegates District 32 to District 31, as the shift would still leave the deviation in population totals for Districts 31 and 32 less than in the Special Masters' proposed maps.

    ${ }^{15}$ The Special Masters appear to have recognized this obligation. See Special Masters Memo at 22 ("Districts 13, 14 and 15 are minority opportunity districts. We forced ourselves to draw these districts within the constraints placed on other districts: Compactness, minimization of county splits and attention to communities of interest."). We also agree with the Special Masters that the relevant inquiry under the VRA is not the literal number of "minoritymajority districts" but rather the number of districts "where minority groups are able to elect their candidates of choice, either alone or in coalition with other groups." Id. at 26-27.
